HER MAJESTY'S GOVERNMENT

MEMBERS OF THE CABINET

(FORMED BY THE RT. HON. TONY BLAIR, MP, JUNE 2001)

PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
SECRETARY OF STATE FOR FOREIGN AND COMMONWEALTH AFFAIRS—The Rt. Hon. Jack Straw, MP
SECRETARY OF STATE FOR THE HOME DEPARTMENT—The Rt. Hon. David Blunkett, MP
SECRETARY OF STATE FOR ENVIRONMENT, FOOD AND RURAL AFFAIRS—The Rt. Hon. Margaret Beckett, MP
SECRETARY OF STATE FOR TRANSPORT AND SECRETARY OF STATE FOR SCOTLAND—The Rt. Hon. Alistair Darling, MP
SECRETARY OF STATE FOR HEALTH—The Rt. Hon. Dr. John Reid, MP
SECRETARY OF STATE FOR NORTHERN IRELAND—The Rt. Hon. Paul Murphy, MP
SECRETARY OF STATE FOR DEFENCE—The Rt. Hon. Geoffrey Hoon, MP
SECRETARY OF STATE FOR WORK AND PENSIONS—The Rt. Hon. Andrew Smith, MP
SECRETARY OF STATE FOR TRADE AND INDUSTRY—The Rt. Hon. Patricia Hewitt, MP
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
PARLIAMENTARY SECRETARY TO THE TREASURY—The Rt. Hon. Hilary Armstrong, MP
SECRETARY OF STATE FOR EDUCATION AND SKILLS—The Rt. Hon. Charles Clarke, MP
CHIEF SECRETARY TO THE TREASURY—The Rt. Hon. Paul Boateng, MP
LEADER OF THE HOUSE OF COMMONS, SECRETARY OF STATE FOR WALES AND LORD PRIVY SEAL—The Rt. Hon. Peter Hain, MP
MINISTER WITHOUT PORTFOLIO—The Rt. Hon. Ian McCartney, MP
LEADER OF THE HOUSE OF LORDS AND PRESIDENT OF THE COUNCIL—The Rt. Hon. The Baroness Amos
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS AND LORD CHANCELLOR (FOR THE TRANSITIONAL PERIOD)—The Rt. Hon. The Lord Falconer of Thoroton, QC
SECRETARY OF STATE FOR INTERNATIONAL DEVELOPMENT—The Rt. Hon. Hilary Benn, MP

DEPARTMENTS OF STATE AND MINISTERS

Office of the Deputy Prime Minister—
DEPUTY PRIME MINISTER AND FIRST SECRETARY OF STATE—The Rt. Hon. John Prescott, MP
MINISTERS OF STATE—
Minister for Local and Regional Government—The Rt. Hon. Nick Raynsford, MP
Minister for Regeneration and the Regions—The Rt. Hon. The Lord Rooker
Minister for Housing and Planning—The Rt. Hon. Keith Hill, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Yvette Cooper, MP
Phil Hope, Esq, MP

Cabinet Office—
MINISTER FOR THE CABINET OFFICE AND CHANCELLOR OF THE DUCHY OF LANCASTER—Douglas Alexander, Esq, MP

Constitutional Affairs—
SECRETARY OF STATE FOR CONSTITUTIONAL AFFAIRS—The Rt. Hon. The Lord Falconer of Thoroton, QC
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Christopher Leslie, Esq, MP
David Lammy, Esq, MP
The Lord Filkin, CBE
Anne McGuire, MP (Parliamentary Under-Secretary of State for Scotland)
Don Touhig, Esq, MP (Parliamentary Under-Secretary of State for Wales)

Culture, Media and Sport—
SECRETARY OF STATE FOR CULTURE, MEDIA AND SPORT—The Rt. Hon. Tessa Jowell, MP
MINISTERS OF STATE—
Minister for Sport and Tourism—The Rt. Hon. Richard Caborn, MP
Minister for the Arts—The Rt. Hon. Estelle Morris, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—
The Rt. Hon. The Lord McIntosh of Haringey (Minister for Media and Heritage)

Defence—
SECRETARY OF STATE—The Rt. Hon. Geoffrey Hoon, MP
MINISTER OF STATE—
The Rt. Hon. Adam Ingram, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Bach (Minister for Defence Procurement)
Ivor Caplin, Esq, MP

Education and Skills—
SECRETARY OF STATE—The Rt. Hon. Charles Clarke, MP
MINISTERS OF STATE—
Minister for School Standards—David Miliband, Esq, MP
Minister for Children—The Rt. Hon. Margaret Hodge, MP
Minister for Lifelong Learning, Further and Higher Education—The Rt. Hon. Alan Johnson, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Baroness Ashton of Upholland
Ivan Lewis, Esq, MP
Stephen Twigg, Esq, MP

Environment, Food and Rural Affairs—
SECRETARY OF STATE—The Rt. Hon. Margaret Beckett, MP
MINISTERS OF STATE—
Minister for Rural Affairs and Local Environmental Quality—The Rt. Hon. Alun Michael, MP
Minister for the Environment and Agri-environment—Elliot Morley, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Whitty
Ben Bradshaw, Esq, MP

Foreign and Commonwealth Affairs—
SECRETARY OF STATE—The Rt. Hon. Jack Straw, MP
MINISTERS OF STATE—
Minister for the Middle East—The Rt. Hon. The Baroness Symons of Vernham Dean
Minister for Europe—Denis MacShane, Esq, MP
Minister for Trade and Investment—Mike O'Brien, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Bill Rammell, Esq, MP
Chris Mullin, Esq, MP

Health—
SECRETARY OF STATE—The Rt. Hon. Dr. John Reid, MP
MINISTERS OF STATE—
The Rt. Hon. John Hutton, MP
Rosie Winterton, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Miss Melanie Johnson, MP
Dr. Stephen Ladyman, MP
The Lord Warner

Home Office—
SECRETARY OF STATE—The Rt. Hon. David Blunkett, MP
MINISTERS OF STATE—
Minister for Crime Reduction, Policing and Community Safety—Ms Hazel Blears, MP
Minister for Criminal Justice System and Law Reform—The Baroness Scotland of Asthal, QC
Minister for Citizenship and Immigration—Desmond Browne, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Paul Goggins, Esq, MP
Caroline Flint, MP
Fiona Mactaggart, MP

International Development—
SECRETARY OF STATE—The Rt. Hon. Hilary Benn, MP
PARLIAMENTARY UNDER-SECRETARY OF STATE—Gareth Thomas, Esq, MP

Law Officers' Department—
ATTORNEY-GENERAL—The Rt. Hon. Lord Goldsmith, QC
SOLICITOR-GENERAL—The Rt. Hon. Harriet Harman, QC, MP
ADVOCATE-GENERAL FOR SCOTLAND—Dr. Lynda Clark, QC, MP

Leader of the House of Commons—
LEADER OF THE HOUSE OF COMMONS—The Rt. Hon. Peter Hain, MP
DEPUTY LEADER OF THE HOUSE OF COMMONS—Phil Woolas, Esq, MP

Northern Ireland Office—
SECRETARY OF STATE—The Rt. Hon. Paul Murphy, MP
MINISTER OF STATE—
The Rt. Hon. John Spellar, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
Ian Pearson, Esq, MP
Angela Smith, MP
Barry Gardiner, Esq, MP

Paymaster General's Office—
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP

Privy Council Office—
LORD PRESIDENT OF THE COUNCIL AND LEADER OF THE HOUSE OF LORDS—The Rt. Hon. The Baroness Amos

Trade and Industry—
SECRETARY OF STATE AND MINISTER FOR WOMEN AND EQUALITY—The Rt. Hon. Patricia Hewitt, MP
MINISTERS OF STATE—
Minister for Energy, E-Commerce and Postal Services—Stephen Timms, Esq, MP
Minister for Trade and Investment—Mike O'Brien, Esq, MP
Minister for Industry and the Regions and Deputy Minister for Women and Equality—The Rt. Hon. Jacqui Smith, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Lord Sainsbury of Turville (Minister for Science and Innovation)
Nigel Griffiths, Esq, MP (Minister for Small Business and Enterprise)
Gerry Sutcliffe, Esq, MP (Minister for Employment Relations, Competition and Consumers)

Transport—
SECRETARY OF STATE—The Rt. Hon. Alistair Darling, MP
MINISTER OF STATE—
Dr. Kim Howells, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
David Jamieson, Esq, MP
Tony McNulty, Esq, MP

Treasury—
PRIME MINISTER, FIRST LORD OF THE TREASURY AND MINISTER FOR THE CIVIL SERVICE—The Rt. Hon. Tony Blair, MP
CHANCELLOR OF THE EXCHEQUER—The Rt. Hon. Gordon Brown, MP
CHIEF SECRETARY—The Rt. Hon. Paul Boateng, MP
PAYMASTER GENERAL—The Rt. Hon. Dawn Primarolo, MP
FINANCIAL SECRETARY—Ms Ruth Kelly, MP
ECONOMIC SECRETARY—John Healey, Esq, MP
PARLIAMENTARY SECRETARY—The Rt. Hon. Hilary Armstrong, MP
LORDS COMMISSIONERS—
John Heppell, Esq, MP
Nick Ainger, Esq, MP
Jim Murphy, Esq, MP
Derek Twigg, Esq, MP
Joan Ryan, MP
ASSISTANT WHIPS—
Fraser Kemp, Esq, MP
Charlotte Atkins, MP
Gillian Merron, MP
Vernon Coaker, Esq, MP
Paul Clark, Esq, MP
Margaret Moran, MP
Bridget Prentice, MP

Work and Pensions—
SECRETARY OF STATE—The Rt. Hon. Andrew Smith, MP
MINISTERS OF STATE—
Minister for Work—The Rt. Hon. Jane Kennedy, MP
Minister for Pensions—Malcolm Wicks, Esq, MP
PARLIAMENTARY UNDER-SECRETARIES OF STATE—
The Rt. Hon. The Baroness Hollis of Heigham
Maria Eagle, MP
Chris Pond, Esq, MP

Her Majesty's Household—
LORD CHAMBERLAIN—The Rt. Hon. The Lord Luce, GCVO
LORD STEWARD—The Duke of Abercorn, KG
MASTER OF THE HORSE—The Lord Vestey
TREASURER—Bob Ainsworth, Esq, MP
COMPTROLLER—Thomas McAvoy, Esq, MP
VICE-CHAMBERLAIN—Jim Fitzpatrick, Esq, MP
CAPTAIN OF THE HONOURABLE CORPS OF GENTLEMEN-AT-ARMS—The Rt. Hon. The Lord Grocott
CAPTAIN OF THE QUEEN'S BODYGUARD OF THE YEOMAN OF THE GUARD—The Lord Davies of Oldham
LORDS IN WAITING—The Lord Bassam of Brighton, The Lord Evans of Temple Guiting
BARONESSES IN WAITING—The Baroness Farrington of Ribbleton, The Baroness Andrews, OBE, The Baroness Crawley

---

SECOND CHURCH ESTATES COMMISSIONER, REPRESENTING CHURCH COMMISSIONERS— Sir Stuart Bell, MP

HOUSE OF COMMONS

THE SPEAKER—The Rt. Hon. Michael J. Martin, MP

CHAIRMAN OF WAYS AND MEANS—The Rt. Hon. Sir Alan Haselhurst, MP

FIRST DEPUTY CHAIRMAN OF WAYS AND MEANS—Mrs. Sylvia Heal, MP

SECOND DEPUTY CHAIRMAN OF WAYS AND MEANS—Sir Michael Lord, MP

CHAIRMEN'S PANEL—
Mrs. Irene Adams, MP, David Amess, Esq, MP, Janet Anderson, MP, Nigel Beard, Esq, MP, Miss Anne Begg, MP, Joe Benton, Esq, MP, Sir John Butterfill, MP, Martin Caton, Esq, MP, David Chidgey, Esq, MP, Derek Conway, Esq, MP, Frank Cook, Esq, MP, James Cran, Esq, MP, John Cummings, Esq, MP, The Rt. Hon. Eric Forth, MP, Roger Gale, Esq, MP, Win Griffiths, Esq, MP, Mike Hancock, Esq, MP, Jimmy Hood, Esq, MP, Kevin Hughes, Esq, MP, Alan Hurst, Esq, MP, Eric Illsley, Esq, MP, John McWilliam, Esq, MP, Bill O'Brien, Esq, MP, Edward O'Hara, Esq, MP, Bill Olner, Esq, MP, Peter Pike, Esq, MP, Dame Marion Roe, MP, Jonathan Sayeed, Esq, MP, George Stevenson, Esq, MP, David Taylor, Esq, MP, The Rt. Hon. Miss Ann Widdecombe, MP, Sir Nicholas Winterton, MP

HOUSE OF COMMONS COMMISSION—
The Rt. Hon. The Speaker (Chairman), The Rt. Hon. Peter Hain, MP, Oliver Heald, Esq, MP, Sir Archy Kirkwood, MP, Sir Stuart Bell, MP, Sir Patrick Cormack, FSA, MP

SECRETARY OF THE COMMISSION—Robert Rogers

ASSISTANT SECRETARY—Shona McGlashan

AUDIT COMMITTEE—
Oliver Heald, Esq, MP (Chairman), Sir Archy Kirkwood, MP, Sir Thomas S. Legg, KCB, QC, David Taylor, FCA

SECRETARY OF THE AUDIT COMMITTEE—Dr. Mark Egan

BOARD OF MANAGEMENT—
Roger Sands, (Chief Executive), George Cubie, CB (Clerk of Committees, Department of the Clerk of the House), Sir Michael Cummins (Serjeant at Arms), Priscilla Baines, CB (Librarian), Andrew Walker (Director of Finance and Administration), Bill Garland (Editor of the Official Report), Sue Harrison (Director of Catering Services)

SECRETARY OF THE BOARD OF MANAGEMENT—Richard Ware, DPhil

SPEAKER'S SECRETARY—Roger Daw

SPEAKER'S COUNSEL—John Vaux

SPEAKER'S CHAPLAIN—Rev. Canon Robert Wright

MEDICAL ADVISER TO THE SPEAKER—Dr. Ron Zeegen, OBE, FRCP, MRCS, DObst, RCOG

PARLIAMENTARY COMMISSIONER FOR STANDARDS—Sir Philip Mawer

19 July 2004

Written Ministerial Statements

Monday 19 July 2004

DEFENCE

Future Aircraft Carrier

The Secretary of State for Defence (Mr. Geoffrey Hoon): I am pleased to announce that we have decided to extend the future aircraft carrier (CVF) programme assessment phase. This extension will enable us to carry out further risk reduction work and increase the maturity of the design prior to making our main investment decision on demonstration and manufacture (D&M). In line with smart acquisition principles, by spending the right amount of time and money in the assessment phase we will gain a better understanding of the technical and supply-side risks before we make any major commitments. We had planned to complete this risk reduction work within the original demonstration phase. The underlying programme has not been adjusted, but rather the point at which we make the main investment decision has shifted.

We anticipate moving into the D&M phase during 2005, following the main gate decision. At this point we intend to finalise performance, time and cost parameters of the carriers. These will continue to be refined during the remainder of the assessment phase. Our target in service dates (ISO) for the CVF remain 2012 and 2015. When built the two vessels will be the largest and most powerful warships ever constructed in the United Kingdom.

We have also agreed the alliancing principles with industry for the CVF programme which confirms the commitment of all parties to the programme and to an alliance based on commercial best practice. The alliancing principles will provide the most effective way of managing risk and reward and will bring together all parties with a vested financial interest, thus ensuring that we deliver CVF collaboratively. We will now discuss and agree the detailed alliancing arrangements with industry, including the roles and responsibilities of alliance members.

TRADE AND INDUSTRY

UK Civil Plutonium and Uranium

The Parliamentary Under-Secretary of State for Trade and Industry (Nigel Griffiths): The Department will be placing the figures for the United Kingdom's stocks of civil plutonium and uranium as at 31 December 2003 in the Library of the House. In accordance with our commitment under the "Guidelines for the Management of Plutonium", we will also be sending the figures to the director general of the International Atomic Energy Agency (IAEA), who will circulate them to Member States in due course. The figures will be available on the Department's and the IAEA's websites.

The figures show that stocks of unirradiated plutonium in the UK totalled 96.3 tonnes at the end of 2003. Changes from the corresponding figures for 2002 are a consequence of continuing reprocessing operations (e.g. as reflected in the increased quantity of "unirradiated separated plutonium in product stores at reprocessing plants"). Other smaller changes are the result of material being allocated to UK fuel. The decrease in unirradiated separated plutonium held elsewhere is due to both Thorp and magnox reprocessing plants being close to empty during December 2003 whereas they were operating over that period in the proceeding year. The decrease in the civil depleted, natural and low enriched uranium figures reflects the change in requirements for these materials at the fuel fabrication plants and reactors.

CULTURE, MEDIA AND SPORT

Creative Industries Forum on Intellectual Property

The Minister for the Arts (Estelle Morris): I am pleased to inform the House that the Government are setting up a creative industries forum on intellectual property. This will be a cross-governmental body, with ministerial representation, and jointly chaired by me and my noble Friend the Minister for Science and Innovation (Lord Sainsbury), who is making a similar statement to the House of Lords. I am pleased to say that there will also be strong representation from the private sector, both from the creative industries themselves and from other key industry stakeholders such as Internet service providers and hardware manufacturers. Consumers will also be represented.

The forum will create a dialogue on intellectual property issues, such as business models, education and awareness raising, strategies for maximising the opportunities for the creative industries in a digital environment, while also addressing the challenges such as file sharing and piracy.

The launch and first meeting of the forum is taking place on 19 July at the London College of Communication, Elephant and Castle. Industry has warmly welcomed the initiative.

It is anticipated that the forum will work through meetings that will set tasks and objectives to be taken forward. There is intended to be a focus on outputs and deliverables, and I am confident that this will represent a significant development in an area crucial to the UK's future competitiveness.

Terms of reference and membership of the forum will be placed in the Libraries of both Houses shortly.

SOLICITOR GENERAL

Serious Fraud Office

The Solicitor-General (Ms Harriet Harman): The annual report of the Serious Fraud Office has today been published and laid before Parliament. Copies have been placed in the Libraries of both Houses.

HOME DEPARTMENT

Strategic Plan for Criminal Justice

The Secretary of State for the Home Department (Mr. David Blunkett): Today the Government will publish Command Paper 6288, entitled "Cutting Crime—Delivering Justice: Strategic Plan for Criminal Justice 2004–08". Copies of the paper have been placed in the Libraries of the House.

The strategic plan for criminal justice sets out the Government's vision for the criminal justice system (CJS) and how we aim to achieve it, combining forces across the Home Office, the Department for Constitutional Affairs and the Law Officers' Departments.

The plan focuses on how we will provide a better service to victims and witnesses of crime, increase the number of offences brought to justice, tackle offenders who fail to comply with court dates, fines and sentences and improve the way criminal justice agencies work together. This is closely linked to our overall approach to preventing crime and reducing reoffending, which is set out in a parallel document, the Home Office strategic plan. I will announce the details of that plan to the House in an oral statement later today.

The Government are committed to ongoing reform of the criminal justice system. The CJS strategic plan explains how much has already been achieved. Huge steps have been made to establish joint working across the CJS—largely through the success of the 42 Local Criminal Justice Boards across England and Wales and the strong leadership of the National Criminal Justice Board. We know these changes are working because we are seeing improvements on the ground. Overall, crime is down by 25 per cent. since 1997. 7 per cent. more offences have been brought to justice in the last two years. The number of crown court trials that fail to go ahead on the day scheduled has fallen by 25 per cent. The number of assets recovered in the last three years has doubled. Public confidence in criminal justice was falling sharply: we have turned this around.

We have achieved a great deal, but there are still some real issues to tackle. The CJS Strategic plan outlines our key objectives for reform, structured around a vision of the delivery of criminal justice in 2008. To achieve this vision, we need to improve the way agencies work together to support and protect victims and witnesses; we need to further increase the number of offenders brought to justice; we need to tackle offenders who fail to comply with court dates, fines and sentences; and we need to continue progress towards fully joined-up working, including providing the CJS with the information technology it needs to work effectively.

The goal of these reforms is to deliver a service that responds better to the needs of the communities it is there to serve.

Improved service for victims and witnesses is at the heart of this. By the end of next year, in all cases where someone is charged with an offence, the victims and witnesses will be offered support by a witness care unit, to make it more likely that they attend court and give evidence. Over the period, Crown court buildings will have separate waiting facilities for prosecution and defence victims and witnesses. The victims fund, which will pay for better support services for victims, will also be boosted by a surcharge on all criminals who are convicted.

The public also need to know that the offenders will be brought to book and respect for the law will be maintained. The CJS strategic plan sets out how the prosecution will take responsibility for charging, co-operating earlier with the police to identify the correct charge for the offence. It also describes innovative measures to crack down on those who fail to turn up at court or comply with fines and community penalties. Those who breach bail can now expect action to be taken straightaway, and to be punished for this whatever the decision on the original case. We are working hard to make sure that every offender who defaults on their fine is pursued and made to pay it. With our measures on asset recovery it will be the criminal who pays not the community. Our approach includes: increased powers for frontline enforcement staff including search and entry, and new measures and sanctions from the Courts Act 2003 to help recoup fines, including attachment of earnings and deduction of state benefits, and car clamping. And by rolling out direct access to the police national computer (PNC) for all magistrates courts by autumn 2004, we will enable police officers to identify whether an offender is on the run from court or defaulting on a fine or community sentence.

We will also pilot the community justice centre concept in North Liverpool, bringing new approaches to tackle the low level crime and antisocial behaviour which can make communal life miserable; and to reach offenders and their problems before they progress to serious crime. Court sentences will combine punishment with support to help offenders kick their crime habit. The community will be involved in helping to steer people away from crime.

To achieve all these goals we need to work in close partnership across the justice system. The development of the National Criminal Justice Board and Local Criminal Justice Boards has made great strides in delivering a more seamless service and better outcomes. To build on this, we are announcing today that, in future, joint working across the CJS will be further strengthened by the establishment of the Office for Criminal Justice Reform on a cross departmental basis. This implements the recommendations of a recent review of CJS capacity published in a parallel document "Criminal Justice Reform: Working Together". This means that the teams driving progress on shared CJS targets will in future report on an equal basis to the Home Office, Department for Constitutional Affairs and Law Officers' Departments. Establishing the Office for Criminal Justice Reform as a shared resource serving all three Departments builds on the firm foundations of what we have achieved, and is a powerful symbol of our resolve to work together effectively to deliver better services for the public.

Reducing Re-Offending

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): I have today placed in the Library of the House copies of the "Reducing Re-offending National Action Plan". This fulfils the Government's commitment to reducing re-offending through greater strategic direction and collaborative

working. The plan aims to address the concerns raised in a number of important reports on the theme of rehabilitation, including the social exclusion unit report on "reducing re-offending by ex-prisoners" and the joint thematic report "Through the prison gate" by Her Majesty's chief inspector of prison and Her Majesty's chief inspector of probation.

Over 60 national action points have been agreed across Government within the key areas to support the rehabilitation of offenders. For each agreed action point, the plan suggests complementary activity for those working at local and regional level to consider. A complementary approach is being developed in Wales led by the correctional services and the Welsh Assembly Government.

The plan has been set within our radical proposals for improving the management of offenders through the creation of a National Offender Management Service (NOMS). The new service is a key building block in achieving integrated service delivery, with end-to-end case management and co-ordinated interventions focused on individual offenders.

The delivery of the Plan will be overseen by a cross-Government board of senior officials, chaired by the chief executive of NOMS, including representatives from key government departments responsible for complementary services such as health, education and training, employment and housing.

DEPUTY PRIME MINISTER

Regional Planning Guidance for the East Midlands

The Minister for Housing and Planning (Keith Hill): My right hon. Friend the Deputy Prime Minister is today publishing for public consultation the proposed changes to the draft revised regional planning guidance for the east midlands (RPG8). They follow the public examination into draft revised RPG8 held in November-December 2003.

RPG8 was issued by the Secretary of State on 24 January 2002 to provide a broad development strategy for the east midlands up to 2021. This also represents the spatial element of the east midlands integrated regional strategy (IRS) and provides the framework for meeting the region's development needs in a way that promotes a more sustainable pattern of development.

The current revision makes the guidance more concise, more regionally specific, more focused on delivery and with cross references to national policy rather than repetition. However, the revision is not a complete review and several key parts are not revised, including housing provision figures which are retained from the existing RPG8. These will be reviewed at the next full review of RPG8 when it is re-cast as a regional spatial strategy under the principles set out in the new Planning and Compulsory Purchase Act.

New elements in the draft revision include:

New policies to promote sustainable economic growth consistent with the region's economic strategy produced by the East Midlands Development Agency;

A new regional transport strategy which has been informed by a number of major studies in the region;

Higher targets for improving biodiversity, promoting energy efficiency and renewable energy, and recycling waste

A new approach to dealing with flood risk

Proposals for more detailed sub-regional strategies in parts of the region, including areas of Northamptonshire covered by the Milton Keynes and south midlands study.

The Office of the Deputy Prime Minister supports the broad thrust of the draft revision and has accepted most of the recommendations of the independent panel, many of which have been made to improve clarity and to eliminate as far as possible any ambiguity in the wording of policies. Among the recommendations that my right hon. Friend the Deputy Prime Minister has accepted is the deletion of a geographically based policy indicating general areas where wind energy proposals might be acceptable and the substitution of a criteria-based policy in line with current Government guidelines as expressed in PPS22.

However, my right hon. Friend has not accepted the panel's recommendation to delete a policy requiring a review of the Nottingham-Derby green belt to be undertaken. The panel's view was that the policy was superfluous as PPG2 provides adequate guidance for any review. However, since the original Nottingham-Derby green belt was drawn up in the 1980s there has been no overall strategic review of the green belt, and with the development of planning policy, particularly related to the principles of sustainable development, together with the increasing development pressures in the Nottingham-Derby area, the Deputy Prime Minister considers that there is a need for a strategic review of the green belt carried out by all the affected planning authorities in a single exercise, overseen by the regional assembly as regional planning body. The policy and supporting paragraphs are therefore retained and amended accordingly.

The issue raising most discussion at the public examination related to a policy that proposed a target of a 50 per cent. cut in the predicted growth in traffic without reference to the Government's priority of reducing congestion in urban areas and at key pinch points in the regional road network. The panel rejected this argument and recommended that the policy be retained. The proposed changes, which are endorsed by my right hon. Friend the Secretary of State for Transport, omit the original target for traffic growth reduction but retain the principle of reducing traffic growth as one of a series of measures encouraging behavioural change, which also includes the principle of reducing congestion.

The panel has also suggested that further indicators be included to measure the effectiveness of policies. These require further discussion with regional stakeholders and views on these will be sought during public consultation. This also applies to the inclusion of a new map, which will illustrate the region's environmental and cultural assets.

I have today written to the east midlands regional assembly with the proposed changes indicating areas where views are particularly sought. There will now be a 12-week period for public consultation on the proposed changes which will end on 8 October 2004.

Copies of the relevant documents are available in the Libraries of the House and have been provided for all the region's MPs, MEPs and local authorities. Documents are also available on the Government office for the east midlands website http://www.go-em.gov.uk/.

Regional Planning Guidance for Yorkshire and the Humber

The Minister for Housing and Planning (Keith Hill): My right hon. Friend the Deputy Prime Minister will publish this week for public consultation proposed changes to the draft revised regional planning guidance for Yorkshire and the Humber (RPG12). They follow the public examination into the selective review of RPG12 held in February 2004.

The panel that held the public examination endorsed the approach taken by the Yorkshire and Humber assembly in the selective review and recommended only modest changes to clarify and refine the document. More radical changes to RPG should await preparation of a regional spatial strategy (RSS), which the assembly is currently working on to prepare a draft by April 2005.

The proposed changes being published this week reflect this approach. They are largely as recommended by the panel and are modest in nature. They also take account of suggestions made in the public consultation last autumn, the sustainability appraisal carried out on draft revised RPG, and to take account of national policy. The main issues addressed in the selective review of RPG and covered by the proposed changes are as follows:

Preparation of regional spatial strategy

The proposed changes clearly set out the timetable and issues to be addressed in the preparation of a new RSS. RSS will build on this selective review of RPG and carry forward a lot of the core strategy. But it will need to look again at a number of important policy areas, such as housing, economic development, waste management and transport priorities. The changes make it clear that this will need to be in the context of the northern way growth strategy.

Renewable energy

The panel concluded that draft revised RPG contains appropriate regional and sub regional targets for renewable energy generation to contribute to the national target that renewable energy should provide 10 per cent. of UK electricity supply by 2010 and consistent with the aspiration to reach 20 per cent. nationally by 2020. The proposed changes therefore carry these forward.

Climate change

The panel recommend a target to reduce greenhouse gas emissions from the region by at least 20 per cent. below 1990 levels by 2010 and by at least 25 per cent. below 1990 levels by 2015. These are consistent with the regional economic strategy, make a positive contribution to national targets and are carried forward in the proposed changes.

Development and flood risk

The panel commend work done by YHA, the Environment Agency and local authorities to address flooding issues and consider that revised draft RPG provides an integrated and sustainable regional framework. The proposed changes simply seek to further clarify the policy.

Waste management

The panel endorse the approach taken in draft revised RPG to the management of municipal waste, including sub-regional targets for recycling/composting and guidance on new facilities that may be required. The proposed changes make a number of detailed changes to clarify the policies and targets. Importantly, they also emphasise the need for urgent, further work for RSS to drive forward the waste management strategy and ensure the delivery of significant numbers of new facilities to allow landfill directive targets to be met.

Public transport accessibility

The panel considers that draft revised RPG includes a sophisticated and innovative public transport accessibility policy which should help achieve spatial planning and transport objectives in an integrated way. The proposed changes clarify how the policy will be implemented.

Strategic transport demand management

The proposed changes carry forward the panel's recommendation that RPG should set out action that local authorities can take immediately on car parking strategies, a range of actions that can be taken in the short to medium term, and a commitment to take forward area-wide charging in the region if and when there is a national framework in place to support it.

Transport investment priorities

The panel considers the list of priorities set out in draft revised RPG to be generally appropriate. They recommend some detailed changes to the way the priorities are presented and to add some management measures (rather than infrastructure improvements). The proposed changes take forward most of these recommendations and ensure that RPG reflects national commitments and Government guidance on the inclusion of regional priorities.

I will write to the chair of the Yorkshire and Humber assembly this week informing him of publication of the proposed changes. Copies of the proposed changes will be put on the government office for Yorkshire and the Humber website and sent to the region's local authorities and all other interested parties. There will be a 10-week period of consultation which will end on Friday 24 September 2004.

Planning Appeal Procedures

The Minister for Housing and Planning (Keith Hill): On 15 January, *Official Report*, columns 43–44WS, I announced our intention, following a review, to consult on proposals to amend the planning appeals procedures rules and regulations to allow third parties a further opportunity to comment on the main parties' appeal statements at the nine-week stage of an appeal. This would bring the opportunities for third parties to

comment in line with the opportunities that local planning authorities and appellants have to make representations.

We received an overwhelmingly positive response to the proposals. We therefore intend to amend the relevant planning appeals procedures to allow third parties an additional opportunity to make representations on appeals at the nine-week stage as well as the six-week stage. The consultation document, however, made clear that the proposed change to the arrangements would only come into affect once the planning casework system (PCS) was operational. The PCS will facilitate electronic appeals and thus the availability of all appeal documents for inspection on-line/electronically. I now expect this to be in place by March 2005 and we will amend the appeals procedures at that point.

Regional Planning Guidance for the South-East

The Minister for Housing and Planning (Keith Hill): My right hon. Friend the Deputy Prime Minister is today publishing the alterations to chapter 12 of the regional planning guidance for the south-east: the Ashford growth area. This follows the public examination into the draft alterations in December 2003, the panel report in February 2004 and the consultation on the Secretary of State's proposed changes that closed on 17th June 2004.

The alterations represent a revision to the regional planning guidance for the south-east (RPG9), as published in March 2001. On commencement of the Planning and Compulsory Purchase Act the alterations will be part of a statutory regional special strategy (RSS).

The alterations aim to achieve sustainable growth in Ashford, which was identified as a growth area in RPG9. They set out the scale and form of development at Ashford to 2016, and form a special framework for the preparation of local planning documents and other relevant policy documents.

The consultation period for the proposed changes to the draft alterations ended on the 17 June with 40 responses from individuals or organisations. These mainly related to issues which had already been raised at the public examination and therefore only minor changes to the proposed alterations have been made.

Planning Inspectorate

The Minister for Housing and Planning (Keith Hill): I have today laid before the House a copy of the planning inspectorate's annual report and accounts for 2003–04.

The report gives an overview of the performance of the inspectorate and highlights the ways in which it is contributing to the Government's planning reform agenda. It demonstrates the importance of a credible, accessible planning tribunal service which is open, transparent and impartial.

Copies of the report have been made available in the Libraries of the House.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Pesticides Safety Directorate

The Minister for Rural Affairs and Local Environmental Quality (Alun Michael): The 2003–04 annual report and accounts for the pesticides safety directorate were laid before Parliament today.

Copies are available in the Libraries of both Houses.

Illegal Meat Imports

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): As required under the Animal Health Act 1981 the Government will publish today a review of controls on the import of animal products for the financial year 2003–04. We welcome the opportunity to report on progress made in the past year.

Seizures of illegally imported animal products have doubled in the past year. This has been delivered by continuing to follow the three key principles of:

evidence based policy;

investment in enforcement; and

securing better public engagement and awareness.

Over the course of the year customs has built up its enforcement activity in relation to products of animal origin. There has been a sustained effort inland, at the borders, and overseas, to increase the travelling public's awareness of the restrictions relating to importing products of animal origin. The Food Standards Agency has also worked with local and port health authorities to achieve a step change in the enforcement of controls on imported food inland.

Also published today is an assessment of the risks of foot and mouth disease and certain pig diseases entering the country through illegally imported meat. This has been refined since last year when it only considered foot and mouth disease. The results of this are available at:

http://www.defra.gov.uk/animalh/illegali/pdf/risk-assessment04.pdf

The Government will continue to develop their approach to managing the risk posed by illegal imports. Working with all agencies involved, we will continue to build on enforcement activity and work to raise awareness of the rules.

Copies of the review will be placed in the Libraries of both Houses and on the DEFRA illegal imports website:

http://www.defra.gov.uk/animalh/illegali/pdf/annual-review04.pdf

The risk assessment is available on the DEFRA illegal imports website:

http://www.defra.gov.uk/animalh/illegali/pdf/risk-assessment04.pdf

Hard copies are available on request.

Written Ministerial Statements

Tuesday 20 July 2004

INTERNATIONAL DEVELOPMENT

HIV/AIDS Strategy

The Secretary of State for International Development (Hilary Benn): I have placed in the Libraries of both Houses copies of "Taking Action: The UK's Strategy for tackling HIV and AIDS in the Developing World" which I published today.

This paper is being published by the Department for International Development (DFID) but the following Government Departments worked with DFID to help produce it: the Department of Health, the Foreign and Commonwealth Office, HM Treasury, the Department of Trade and Industry, the Patent Office, the Inland Revenue, the Ministry of Defence, the Home Office, the Department for Education and Skills and the Department for Culture, Media and Sport.

AIDS is one of the greatest threats to eradicating poverty and achieving the millennium development goals. Over the last 25 years the number of people affected by HIV has risen dramatically, from the first AIDS cases identified in the 1980s to the 38 million who are living with HIV and AIDS today. Over 20 million people have died. Sub-Saharan Africa has suffered the severest impact: over 25 million people are currently living with HIV and AIDS and 12 million children have been orphaned by AIDS. By 2010 the number of orphans who will have lost parents to AIDS may rise to 18 million. In Asia and eastern Europe, there is a serious risk of a generalised epidemic unless action is taken now. In all regions, women and young people are particularly vulnerable.

The UK Government are committed to fighting AIDS and reversing the spread of HIV. The challenges facing the world were set out in the "UK's Call for Action on HIV/AIDS" published on world AIDS day last year. "Taking Action: The UK's Strategy for Tackling HIV and AIDS in the Developing World" sets out how the UK will respond to the challenges by promoting a comprehensive response to tackle prevention, treatment and care as well as addressing the social impact of AIDS; prioritising the needs of women, young people, including orphans and other children; focusing on human rights, stigma and discrimination; and ensuring that action on AIDS is sustainable in the long term as well as responsive to immediate needs.

As announced in the spending review, the UK Government will commit at least £1.5 billion over the next three years to tackle AIDS in the developing world. Of this, at least £150 million will be dedicated to helping orphans and other children made vulnerable by AIDS, especially in Africa. We will also be doubling our contribution to the Global Fund to fight AIDS, TB and malaria with an additional £77 million over the next three years. This is in addition to extra money for UNAIDS and UNFPA announced in my statement of 6 July.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Transmissible Spongiform Encephalopathies

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): A progress report on transmissible spongiform encephalopathies in Great Britain was placed in the Library of the House today.

The report explains primarily how we have managed BSE during 2003. The encouraging reduction in BSE in cattle continues. This shows that the controls that have been put in place are continuing to have an important effect.

The report explains the background to our application to the European Commission to be classified as a Moderate BSE risk, which will help to re-open exports markets for UK beef; it also outlines the progress of the TSE surveillance programme. It provides an overview of TSE research and sets out progress on the national scrapie plan, as well as our continuing efforts to ensure compliance with the rules on specified risk material and animal feed.

The report is being published on DEFRA's website at: http://www.defra.gov.uk/animalh/bse/index.html.

TREASURY

Tonnage Tax (Post-Implementation Review)

The Paymaster General (Dawn Primarolo): The tonnage tax was introduced in 2000 as part of a package of measures to revive the UK shipping industry. In July 2002, I announced that the Inland Revenue and the Department for Transport would commence a review of the way the regime is operating, and invited public contributions. A number of representations have been received. Individuals and groups wishing to make further representations are invited to do so by 30 September 2004. Details about how representations can be made are available on the Inland Revenue's website.

NORTHERN IRELAND

Forensic Science Annual Report

The Minister of State, Northern Ireland Office (Mr. John Spellar): I have today published the Forensic Science Northern Ireland annual report and accounts 2003–04. The annual report sets out performance of the agency against key targets. Copies of the report have today been laid before the House.

Independent Monitoring Commission (Second Report)

The Secretary of State for Northern Ireland (Mr. Paul Murphy): On 20 April 2004 I formally requested the Independent Monitoring Commission to prepare a

security normalisation report under article 5(2) of the international agreement between the British and Irish Governments.

Article 5(2) enables the British Government to commission the IMC to prepare a report on security normalisation activity undertaken over a specified period. I asked the IMC to report on all normalisation activities which have taken place since December 1999 up to the present time. The activities are set out in article 5(1)(a)(i) to (v) of the international agreement. The IMC report also takes account of views on the effects of normalisation on the ground and the programme of reform to deliver a community based policing environment in Northern Ireland. It is distinct from the monitoring of the programme of normalisation included in the joint declaration which is yet to be commenced.

I am most grateful to the commission for its thorough report. The report is helpful in identifying the extent of steps that have been taken to reduce the security profile in Northern Ireland. The report also recognises that further steps are being taken, but that these must be measured against the prevailing assessment of the security threat.

I have placed copies of the second report of the Independent Monitoring Commission in the Libraries of both Houses.

Youth Justice Agency (Annual Report and Accounts)

The Minister of State, Northern Ireland Office (Mr. John Spellar): I have placed copies of the Youth Justice Agency's annual report and accounts for 2003–04 in the Libraries of both Houses.

This is the agency's first annual report since its inception on 1 April 2003. It achieved eight of its nine key performance targets and all 20 of its development objectives.

Prison Service (Annual Report and Accounts)

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Ian Pearson): I have placed copies of the Northern Ireland Prison Service's annual report and accounts for 2003–04 in the Libraries of both Houses.

The annual report details that the service met seven of its 12 key targets in full and partially met an eighth. Of the comprehensive programme of 24 development objectives set for the service, 12 were achieved, four were partially achieved and substantial progress was made towards meeting the remaining eight.

DEPUTY PRIME MINISTER

Ordnance Survey (Framework Document)

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Yvette Cooper): I am pleased to announce today that a new framework document for Ordnance Survey has been published and is also available in the Libraries of both Houses.

On 23 July 2002 the Government announced that following a quinquennial review, Ordnance Survey, a non-ministerial Government Department, should retain its status as a Trading Fund and executive agency. It was also agreed that further work should be undertaken on three issues: freedoms and flexibilities that should be made available to Ordnance Survey; the provision and location of policy advice to government on geographic information; and issues surrounding Ordnance Survey's relationship with the Office of the Deputy Prime Minister.

The new framework document defines the role and responsibilities of, and delegations accorded to, Ordnance Survey. Ordnance Survey's delegations and freedoms are no different from all other trading funds. They have the ability to borrow funds, from the national loans fund, and have recruitment and retention flexibilities available that are consistent with those generally available to agencies acting at arms length from central Government, and operating within a commercial environment. A Treasury Minute was laid before the House setting a new financial target for Ordnance Survey on 15 January 2004.

The Government have considered options for the provision of policy advice on geographic information. They have concluded that it is appropriate that the director general and chief executive of Ordnance Survey should remain as official advisor to Ministers on all aspects of survey, mapping and geographic information, and continue to provide advice to meet specific requests. The Government also separately recognise that there is scope for the creation of a geographic information panel to consider medium and long term strategic and policy issues. A panel would also provide a channel, to complement advice to Ministers provided by the director general, on the wider, more effective and systematic use of geographic information. The panel will be chaired for the first year by the director general and chief executive of Ordnance Survey with the intention of rotating the chair on an annual or biennial basis. Panel members will review the chairmanship annually and put recommendations to Ministers. The terms of reference and membership of the panel will be announced shortly.

Ordnance Survey's relationship, as a non-ministerial government department and an executive agency, with the Office of the Deputy Prime Minister is set out in the Framework Document. The Office of the Deputy Prime Minister acts in the capacity of protecting the Government's shareholding in Ordnance Survey, and as a customer for Ordnance Survey's data. It is important that at both ministerial and official levels, there is proper separation of responsibility between those who deal with the Government's investment in Ordnance Survey, and those taking decisions to purchase Ordnance Survey data. The Minister for Ordnance Survey will therefore play no part in any decisions or discussions relating to such commercially based transactions, primarily through the pan-government agreement for the supply of Ordnance Survey mapping data to Government. Arrangements will also be maintained to ensure that officials within this office are not in a position where they might be considered to hold conflicting responsibilities.

The Government consider that Ordnance Survey has a critically important role to play in ensuring that the UK economy fully benefits from the availability of quality, up-to-date and definitive geographic

information databases. Full and effective use of geographic information can generate significant benefits, opportunities and efficiencies for all those who have a requirement within their businesses and operations to use information that can be geographically referenced.

The new framework document will enable Ordnance Survey to continue to develop and enhance their underpinning database, and ensure that products derived from the database are delivered in a manner that meets both customer and national requirements.

Park Homes (Consultation Paper on Implied Terms)

The Minister for Housing and Planning (Keith Hill): My right hon. Friend the Deputy Prime Minister will publish for public consultation on 30 July, a paper on park home implied terms and a written statement.

The Housing Bill includes several clauses that improve the rights of park home owners. These include two powers allowing the appropriate national authority (Secretary of State for England, and the National Assembly for Wales in relation to Wales) to make secondary legislation relating to the implied terms and the written statement.

Provision has been made for the first exercise of the power to specify new implied terms, and to amend and delete existing ones, to have retrospective effect. It is therefore vital that we address all the important issues in the first exercise of the power. An affirmative resolution approving the order from both Houses of Parliament will be necessary.

In the consultation paper we have proposed 22 changes to the implied terms on which we have already consulted informally. We propose, for example, amendments on, among other things, further tightening of the resale process, increased transparency in the payment system and more residents' rights through the quiet enjoyment of the pitch.

The Housing Bill contains a re-enactment of the power of the appropriate national authority to prescribe requirements with which written statements must comply. The consultation paper proposes several changes to the requirements taking account of the proposed implied terms.

Copies of the paper are being sent to a wide range of interested parties including local authorities, trade and resident associations, and others with an interest in this issue. The closing date for responses is 22 October.

Copies of the paper will also be placed in the Libraries of the House, and will be available on the Office of the Deputy Prime Minister's website at www.odpm.gov.uk.

TRADE AND INDUSTRY

Employment Tribunal Service (Performance Targets)

The Parliamentary Under-Secretary of State for Trade and Industry (Mr. Gerry Sutcliffe): The employment tribunals service has published its annual report and accounts for 2003–04 today. Copies have been laid before Parliament and will be placed on the ETS website at http://www.ets.gov.uk.

I have set the employment tribunals service the following targets for 2004–05:

Quality

75 per cent. of single employment tribunal cases to a first hearing within 26 weeks of receipt.

Minimum to be achieved by all offices in relation to above target: 65 per cent.

85 per cent. of employment tribunal decisions issued within four weeks of the final hearing.

85 per cent. of employment tribunal users satisfied with the service offered by ETS.

75 per cent of appeals to EAT to a first hearing within 26 weeks of receipt.

Efficiency

Three per cent. real terms reduction in employment tribunal administrative unit costs.

In addition to these key targets:

Finance

Pay 100 per cent. of invoices within 30 days of receipt of goods or services or a valid invoice, whichever is the later.

Questions delegated to the Chief Executive

Reply within 10 working days to all letters from Members of Parliament delegated for the Chief Executive's reply.

Audit Regulation (Annual Reports of the Recognised Supervisory Bodies)

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): I have received the annual reports for the year 2003 from the five recognised supervisory bodies for company auditors: a combined report from the Institutes of Chartered Accountants in England and Wales, Scotland and Ireland, and one each from the Association of Certified Chartered Accountants and the Association of Authorised Public Accountants. Copies of the reports have been placed in the Libraries of both Houses.

Schedule 11 of the Companies Act 1989 sets out the requirements which a body must meet to be eligible for recognised supervisory body status. These include requirements to have adequate arrangements for monitoring and enforcing compliance with its rules relating to membership and eligibility (e.g. holding an appropriate qualification, being a fit and proper person, working to technical and ethical standards, maintaining competence), discipline and investigation of complaints. In these reports, the recognised bodies inform the Government about their activities in relation to these arrangements.

In January 2003, I announced a number of changes to the regulatory regime of the accountancy and audit professions, including the establishment of a new independent inspection unit, located within the Financial Reporting Council, and a professional oversight board for accountancy (POBA), to take over, from this Department, my functions under Part II of the Companies Act 1989 in respect of the recognised supervisory bodies. I am pleased to report that these bodies are now established and in operation. The delegation of these powers is dependent on provisions in the Companies (Audit, Investigation and Community

Enterprise) Bill currently before the House and so for the time being my Department continues to have responsibility or oversight of the recognised supervisory bodies.

Coal Authority (Annual Report and Accounts)

The Parliamentary Under-Secretary of State for Trade and Industry (Nigel Griffiths): I have today laid a copy of the Coal Authority report and accounts for 2003–04 before Parliament.

HOME DEPARTMENT

Multi-agency Initial Assessment Team Trial

The Minister for Crime Reduction, Policing and Community Safety (Ms Hazel Blears): As part of the continuing work to improve the capability to deal with major incidents, the Home Office, Office of the Deputy Prime Minister and the Department of Health are sponsoring a trial of a multi-agency initial assessment team (MAIAT) in the London area.

Comprising officers from the London Fire Brigade, the Metropolitan Police, City of London Police and the London Ambulance Service, MAIAT will provide an initial assessment of potential chemical, biological, radiological or other major incidents.

The aim of the trial is to see whether a dedicated team could add to the emergency response by providing an early, effective and integrated assessment of the nature and risk of a CBRN incident. The trial will focus on central London.

The trial will be for one year during which the overall value of the team and the specific tasks it undertakes will be monitored, and lessons would be learned as the team develops. A full evaluation will be done towards the end of 2005, and lessons learned will be shared with emergency services elsewhere in the country.

This initiative has been developed with the emergency services in London and builds on their strong working relationship. It aims to add to, not replace, the capability we already have for responding to major incidents.

National Offender Management Service

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): On 6 January 2004, the Home Secretary announced the Government's response to Patrick Carter's review of the correctional services and confirmed our intention to establish a national offender management service. This statement outlines the way I intend to introduce the new single service.

The Carter review highlighted the fact that no single organisation has responsibility for managing offenders. The review proposed that the existing organisations should be absorbed within a new service focused on the end-to-end management of offenders throughout their sentence.

Since January, I have conducted two consultation exercises and have received nearly 400 written responses. After careful consideration, I have decided that the option of moving immediately to create new regional boards is unlikely to deliver better management of offenders and better services—my two main objectives. Instead, I intend at this stage to concentrate on introducing the concept and practice of end-to-end offender management. There has been widespread support for this approach and it is key to achieving our overall aim of reducing re-offending. I will introduce greater competition within correctional services by using the powers of the Secretary of State but at this stage I have concluded that this can best be achieved through the existing 42 probation boards. This will allow us to maintain important local links with other criminal justice agencies and the experience gained will allow us to take forward future structural change in a more informed way.

The regional offender managers will have direct responsibility for budget allocation. They will support the existing local boards in moving to an offender management model, manage board performance, develop contestability, and pilot commissioning in their area. They will play an important part in achieving more effective service delivery through greater competition, using providers of prison and community interventions from across the public, private and voluntary sectors and determining where to split purchaser and provider. This approach will give us the opportunity to expose the core of offender management, and not just interventions, to competition.

The 42 local probation boards will refocus their role around a new statutory responsibility for managing offenders. They are already able to purchase and commission services. The consultation responses show they are eager to respond to the Carter review and to embed the concept of offender management. I want to enlist this interest and enthusiasm although I am also determined that the boards embark on a radical programme of change, not least to extend their commissioning function.

While the regional offender managers will lead performance and innovation at regional level, individual offender management will continue to be organised locally below the existing area level. I recognise the importance of the links and relationships that underpin effective joint working. The work probation areas currently undertaken in child protection, on the local criminal justice boards, in the criminal and disorder reduction partnerships and in the youth offending teams will continue.

In parallel to the ongoing development of NOMS and the core concepts of offender management and contestability I intend to proceed with vigour in implementing the other initiatives recommended in the Carter review that are critical to achieving our goal of reducing re-offending, and which have at their heart the proper punishment and rehabilitation of offenders that will lead to a safer society for all.

CAC Annual Report (Immigration and Nationality Directorate)

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I am pleased to announce the publication of the independent Complaints Audit Committee (CAC) annual report on the Immigration

and Nationality Directorate of the Home Office, for the year 2003–04. Copies are available in the Library of the House and on the Immigration and Nationality Directorate's website.

This is the CAC's 10th report. Their role is to monitor the effectiveness of IND's procedures for investigating complaints about the conduct and efficiency of staff in IND. Their findings are valuable to the organisation.

The CAC has commended and recognised the continued improvement in the processes involved with complaints handling by IND, as well as the continued support of the IND's senior management team.

As with previous reports this annual report highlights a number of areas where IND could improve its customer service, supported by a number of recommendations. IND will use these recommendations to help inform their wider change and reform programme.

Refugee Integration Strategy/Refugee Funding Decisions

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I am today publishing, and placing in the Libraries of both Houses, a draft for consultation of our new national refugee integration strategy, "Integration Matters". The purpose of the strategy, which applies to England and will replace that set out in 2000 in "Full and Equal Citizens", is to help refugees build new lives in the United Kingdom and integrate to the full: the actions it proposes will enable refugees to achieve their full potential, to contribute to the communities in which they live, and to access the public services they need. It sets out how we will use our investment in refugee services, particularly through the European refugee fund and the challenge fund, to promote these ends. The draft strategy proposes for the first time a set of indicators which, in conjunction with a major study of the experiences of new migrants, will enable us to monitor its effectiveness and make changes where necessary. In this task we will rely on the expertise of the National Refugee Integration Forum, whose role in drawing up the draft strategy has been invaluable.

In accordance with best practice, we are allowing three months for comment, and we would welcome the widest possible range of contributions: from the public, voluntary, and private sectors, and of course from refugees themselves. Further online copies of the strategy can be obtained from Priscilla.Pegg@homeoffice.gsi.gov.uk to whom any comments should be sent. We are publishing simultaneously with the draft strategy the results of a skills audit of refugees, which has also been placed in the Libraries of both Houses and forms part of the evidence base underlying the strategy, demonstrating both the wide range of skills brought to the United Kingdom by refugees and the extent of the help which many of them need in order to contribute fully to British society.

I am also announcing today the grants we are making for 2004–05 from the European refugee fund and the refugee challenge fund. Both funds exist to channel much-needed resources to innovative projects designed to deliver services tailored to the specific needs of refugees. We have been able this year to fund 38 projects for a total of £2.5 million under the European refugee fund, and 79 projects for a total of £3 million under the challenge fund. A list of the successful projects has been placed in the Libraries of both Houses.

Compact on Relations between Government and the Voluntary and Community Sector (Fifth Annual Meeting)

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): I am today placing in the Library of the House copies of the report of the fifth annual meeting, held on 5 May 2004, to review the compact on relations between Government and the voluntary and community sector.

The meeting reviewed the significant achievements made across Government and the voluntary and community sector to implement and develop the compact. The compact is the blueprint for improving partnership working between Government, at all levels, and the sector.

The challenge now is to make sure the compact is used as a practical tool to improve public services and citizens' everyday lives.

The compact action plan in the report of the fifth annual meeting sets out our priorities for driving the relationship between Government and the sector forward this year.

CULTURE, MEDIA AND SPORT

BBC Charter Review: "What You Said About the BBC"

The Secretary of State for Culture, Media and Sport (Tessa Jowell): On 11 December 2003, I announced the first phase of BBC Charter review with the launch of a major public consultation. The consultation was supported by a programme of survey research, visits to different parts of the country to hear the views of people in the media industry and the public first hand, and a series of events for children and young people to hear what they had to say.

By the time the consultation closed on 31 March 2004 we had received over 5,000 written responses and there had been over 25,000 unique visitors to the charter review website. We published the responses on the internet as the consultation proceeded. The research fieldwork we commissioned was completed in June this year.

Today, I am publishing the results of this consultation and research. The report we are publishing "What You Said About the BBC" summarises the main points that were put to us. It does not capture every single one of the many hundreds of issues raised, which is why I am also publishing in full the reports of research and consultation on which "What You Said About the BBC" is based. These documents, together with the consultation responses I have already published, should be seen as a complementary package and taken together give a comprehensive picture of the views received.

"What You Said About the BBC" contains both praise and criticism. Most people indicated that they value the BBC and hold it in high esteem, but a significant minority disagreed. To those who like the BBC it was generally seen as the best broadcaster for news, documentaries and features about personal

interests. But even to many supporters it is seen as being by no means perfect. Although satisfaction levels are high, most people want to see changes. However, there is a clear view that the BBC should continue to remain independent of Government, parliamentary and commercial pressures.

People believe the BBC should keep up with developments in new technology and should be a leading partner in new markets-this will be particularly relevant as we make the journey towards full switchover from analogue to digital broadcasting.

Contributors clearly felt that there was room for improvement in the way the BBC is governed and regulated, although there is more debate to be had about exactly what changes are needed.

On the question of how we should pay for the BBC, the licence fee was widely considered to be the best—or rather the "least worst"—method for the time being, although other options were put forward and questions were raised about how the licence fee is set, collected and distributed.

The findings contained in this report will feed directly into the review of the BBC's charter. As I have said on numerous occasions, the only certain outcome of charter review will be a strong BBC, independent of Government.

I have placed copies of "What You Said About the BBC" and the supporting research in the Libraries of both Houses. Further copies are available from the charter review website: http://www.bbccharterreview.org.uk.

DEFENCE

Watchkeeper (Selection of Preferred Bidder)

The Secretary of State for Defence (Mr. Geoffrey Hoon): I am pleased to announce the new chapter to the strategic defence review setting out the potential for unmanned aerial vehicles (UAVs) significantly to improve operational effectiveness. UAVs will be a key contributor to network enabled capability and their ability to provide persistent surveillance of the battlefield or theatre of operations, without putting lives at risk has been demonstrated recently by US operations in Afghanistan and coalition operations in Iraq.

The central element of the UK's current plans for acquiring UAVs is the Watchkeeper programme, which will provide UK commanders with accurate, timely and high quality imagery. Watchkeeper will be an advanced system integrating air vehicles, sensor payloads and ground control facilities. It will be joined to the wider command and control network through communication systems such as Bowman, allowing information to be passed quickly, providing commanders with an improved understanding of the battle space and shortening sensor to shooter times.

The competition for entry into the final stage of the Watchkeeper programme has been run between two industrial teams led by Northrop Grumman and Thales Defence Ltd. Both submitted bids reflecting an understanding of the programme requirements, the technical complexities, the project management requirements and UK industrial participation. Following detailed consideration of the proposals, on the basis of value for money and demonstration of the best potential to deliver the required capability, the selection of the team led by Thales Defence Ltd will be announced as the preferred bidder for the Watchkeeper demonstration and manufacturing phase by the Secretary of State for Defence at the Farnborough international airshow today. Further negotiations will be required before the project is ready to pass its main investment decision. It is planned to start these negotiations immediately. Depending on the outcome of that work, we aim to make the main gate decision on Watchkeeper later this year. The intention remains to bring Watchkeeper into service as soon as possible with capability beginning around the end of 2006.

HEALTH

NHS Estates and Facilities Management Development Agency (Annual Report)

The Minister of State, Department of Health (Mr. John Hutton): We have received the NHS Estates and Facilities Management Development Agency annual report and accounts 2003–04 and copies have today been laid in accordance with the requirements of section 5 of the Exchequer and Audit Departments Act 1921.

The report describes the agency's performance against key tasks and targets and incorporates its accounts for that year.

Copies of annual report and accounts 2003–04 have been placed in the Library.

TRANSPORT

Air Quality (Heathrow)

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): The Department is today making information available on its website concerning the programme of work promised in the "Future of Air Transport" White Paper to examine how to make best use of Heathrow's existing two runways, and how a third runway could be added after a new runway at Stansted, while complying with strict conditions on air quality, noise and improved public transport access. Copies of the information available today have also been placed in the Libraries of the House.

The most challenging issue confronting expansion at Heathrow is compliance with forthcoming EU air quality limits. In addressing this issue, we have set up three air quality panels—involving independent experts supported by officials—to help us review the data and methodology used in analysis underpinning the White Paper and to advise on any further research and data that may be required over the next 12–18 months. In addition, work is underway with key stakeholders to explore the issues surrounding mixed mode operations and the options for improved surface access.

We are aiming to reach conclusions on the prospects for further development at Heathrow in time to contribute to the White Paper progress report promised

for 2006. Any proposals that were not consulted on in the run up to the White Paper, such as the introduction of mixed mode, will require full public consultation.

Early work will be focused on evidence gathering and analysis. We are committed to keeping people involved in this process and informed of any significant developments. In addition to the information and documents that we are making available on the Department's website, we will also hold periodic meetings with stakeholders and interested parties. The information on the web site—available at www.dft.gov.uk/aviation/projectheathrow—provides a summary of the project and its work and gives details of the air quality panels. We will keep this information under review as the project progresses, adding material as appropriate and responding to the feedback we receive.

Crossrail

The Secretary of State for Transport (Mr Alistair Darling): On 14 July last year I announced I had received business case proposals for the east-west London Crossrail project from Cross London Rail Links (CLRL) and that I was establishing an expert team to assess them. On 9 September I announced that Adrian Montague had been appointed to lead the review.

The Crossrail team had the following terms of reference:

(i) To establish the full cost of Cross London Rail Link's July 2003 Crossrail business case proposals, and to assess:

(ii) (a) whether they are likely to deliver to time, scope and budget;

(b) whether the business case proposals will offer value for money;

(c) the extent of Government funding that can be justified;

(d) the proportion of the funding required from non-Government sources.

(iii) To identify any means of delivering a Crossrail project which offer better performance than the business case proposals against tests at (ii) (a)–(d) above.

(iv) To report to the Secretary of State as soon as practicable.

I have studied the Montague findings closely. They broadly confirm the CLRL proposals, but indicate scope for important improvements. I am publishing the report today.

I have confirmed on many occasions the Government's support for the principle of building a new east-west Crossrail link. Indeed, as the Prime Minister says in his foreword to my transport strategy document today, Crossrail is a project that we want to see delivered.

In light of the Montague report, and the Government's analysis of what needs to be done to give effect to the suggested improvements, I am now confident that Crossrail should proceed, although a major funding challenge remains and I shall return to that later. I intend that appropriate powers for the construction of Crossrail should be sought by means of a hybrid Bill to be introduced in Parliament at the earliest opportunity.

The Montague report finds that, while some individual cost and revenue elements may be queried, CLRL's overall indicative cost for the scheme they propose, some £10 billion at 2002 prices, is broadly correct. It would appear to deliver acceptable value for money and provide an effective vehicle to support the Government's regeneration objectives and the creation of sustainable communities both in the Thames gateway and elsewhere, though there is scope for debate about the level of wider benefits that might be realised.

While the review concluded that there were no pivotal problems with CLRL's proposals, there were nonetheless areas of doubt. In particular, the review questioned whether CLRL's scheme could be operated at the planned high train throughput levels, given the multiple interfaces between Crossrail and the national railway network. The review also questioned the capacity of the construction industry to tackle such a large project in one go, and the suitability of CLRL's current governance structure to delivering the project.

In aggregate, these concerns create significant uncertainty. Some doubts reflect the nature of a scheme at this stage of its development, and could be expected to be resolved as the design matured, but others—not least those above—are more enduring. As a result, the review could not confirm the deliverability of the CLRL business case proposals as they stood. Montague made suggestions for further work and improvements. I have set in hand the further work needed to ensure that these areas of concern are satisfactorily addressed.

As provided for by its terms of reference, the review considered alternative ways of delivering a Crossrail project. Specifically, it explored a number of options based on a Paddington-Liverpool Street tunnel that runs broadly along the line of the currently safeguarded central route. All of these represented less extensive schemes than that initially proposed by CLRL and would enable a Crossrail project to be delivered at lower cost. They would also overcome some of the potential interface, capacity and deliverability problems identified above. In particular, although reliability questions arising from multiple interfaces should be substantially alleviated once Network Rail's plans for improved performance on the national railway show results, reducing the number of interfaces between Crossrail and the wider rail network would clearly bring advantages.

On the basis of the review's work, it is clear that the case for a limb to Richmond/Kingston is relatively weakly developed, and that an extension on the western side to Maidenhead might provide a better solution. This would be a key change, and would align directly with key review concerns about the scale, and deliverability of the project and number of interfaces it has with the national railway. I am today inviting CLRL to bring forward as soon as practicable confirmed route proposals for which powers should be sought in the hybrid Bill.

CLRL have already asked me to update the safeguarding directions for the central section of its proposed route, replacing the existing ones from 1990 and 1991, which are somewhat out of date. Updating the safeguarding directions would not only protect the

route, but also allow affected property-owners access to compensation via the statutory blight provisions. Accordingly, I will now issue safeguarding directions forthwith for the central section of CLRL's plans. Subject to due process, including the necessary consultation with local authorities, I would expect to safeguard the rest of the route, including access for the Thames gateway.

The review also explored ways of funding and financing Crossrail, including by means of alternative funding mechanisms and a novel stakeholder equity concept, which would involve using a fares supplement to provide passengers with a real stake in the future of Crossrail and to offer protection against project cost overruns. While this is a highly innovative idea that is worthy of further consideration, the potential to use fares as a buffer against cost overruns is limited. It would need to be considered in the context both of the existing fare level and pressures on fares more generally.

The Montague report makes clear the scale of funding challenge that Crossrail represents. As I explained in my statement last year, those who benefit from Crossrail should contribute substantially to its delivery. The Montague report confirms the likely availability of funds through alternative funding mechanisms but notes that these are not nearly enough to close the very large funding gap. Further work therefore needs to be done to develop a funding solution that is equitable to all parties, and which can successfully deliver a London project of such importance. My Department and HM Treasury will take this forward, working with the Mayor and the London business and finance community. This will include consulting on appropriate alternative funding mechanisms before next Summer, so that those who benefit from Crossrail are in a position to contribute as fully as possible to meeting the costs.

A key element of a robust project funding plan would be an effective mechanism to ensure that those bearing the risks of the project have proper control of it. In due course, control of a London-based scheme such as Crossrail should lie with London interests directly. However, as the review's report also makes clear, CLRL's current ownership structure is unlikely to provide an effective basis for the robust project governance that will be required initially for the management of the hybrid Bill, and then for the construction of the Crossrail itself.

Accordingly, I propose to reform Crossrail as a joint venture company between my Department and Transport for London, at least for the purposes of seeking and obtaining the necessary powers. The Secretary of State will appoint, with the agreement of the Mayor, an independent chairman of CLRL, who will have a casting vote on the board of the company. This will ensure that CLRL's Board has the clear decision-taking capability that the current deadlocked structure lacks. TfL will be involved in all aspects of the progress of the Bill and Crossrail could subsequently be transferred for TfL implementation.

The Crossrail concept has been around in one form or another for many years and commands considerable support from business and the travelling public alike. It has the promise to improve significantly travel into and across the centre of the capital and also to deliver wider benefits, in particular to the east of London. The Government's decision to proceed with this project after decades of prevarication represents a significant milestone in the history of London as we seek to build a transport system fit for the twenty-first century.

CABINET OFFICE

Government Car and Despatch Agency (Annual Report)

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): I have today laid the Government Car and Despatch Agency annual report and accounts 2003–04 before Parliament, copies of which are available in the Library.

FOREIGN AND COMMONWEALTH AFFAIRS

Hong Kong

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): The latest report on the implementation of the Sino-British joint declaration on Hong Kong was published today and copies have been placed in the Library of the House. A copy of the report is also available on the Foreign and Commonwealth Office website www.fco.gov.uk. The report covers the period from 1 January to 30 June 2004 and includes a foreword by my right hon. Friend the Foreign Secretary.

I commend the Report to the House.

Constitutional Treaty for the European Union (Provisional Text)

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): I have laid before the House Command Paper 6289, containing the text agreed by the European Council on 17–18 June 2004 for a Constitutional Treaty for the European Union (CIG 86/04). Copies have been placed in the Library of the House and the Vote Office.

This is an interim text of the treaty, which still has to go through a process of technical amendment by jurist-linguists this summer. The Dutch presidency then plan for the final text to be signed by Heads of State and Government on 29 October.

Command Paper 6289 includes the declarations of the council that will accompany the treaty, and the protocols that are new or directly relevant to the UK (the remainder can be seen in the on-line version of the treaty, at http://www.fco.gov.uk. We will present the final text in full to Parliament this autumn, also as a Command Paper, prior to introducing legislation to give it effect in UK law—subject to its approval in a referendum.

WORK AND PENSIONS

International Labour Conference 2003 (Convention 185)

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): The 91st session of the International Labour Conference 2003 adopted a new Convention 185—Seafarers' Identity Documents Convention. We have today laid before Parliament a

White Paper entitled "International Labour Conference, Proposed action on a Convention adopted at the 91st Session of the International Labour Conference 2003", (Cm 6290), copies of which have been placed in the Library.

Hand Arm Vibration Syndrome

The Minister for Work (Jane Kennedy): The Industrial Injuries Advisory Council (IIAC) has completed its review of hand arm vibration syndrome (HAVS) and its report has been laid before Parliament (Cm 6098). The Government thank the council for the care and diligence taken in producing the report, and has decided to implement the report's recommendation to widen the terms of prescription of prescribed disease A11.

The revised prescription will take account of sensorineural symptoms, which are not included in the current prescription for prescribed disease A11.

The Department for Work and Pensions is currently working on detailed plans for putting this report into practice, which will include communicating with those representing people who may be affected.

Written Ministerial Statements

Wednesday 21 July 2004

DEPUTY PRIME MINISTER

Energy Performance of Buildings Directive

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Phil Hope): I have today published two consultation documents. The first of these covers our proposals for amending the building regulations energy efficiency provisions (part L) and implementing the energy performance of buildings directive (EPBD). The second describes our proposals for amending the guidance in approved document F that supports part F—ventilation of the building regulations. Both consultation documents contain draft regulatory impact assessments.

Driving up the energy efficiency of our buildings is critical to our success in achieving the carbon emission reduction targets in the Energy White Paper and our energy efficiency action plan and will also contribute to our goals for developing more sustainable communities.

Raising performance standards and introducing requirements for efficiency in the use of boilers and air conditioning systems will not only make a difference in the drive to tackle climate change, they will also help to create warmer, healthier homes and more comfortable and productive workplaces.

The proposals for building energy performance certification requirements will enable prospective purchasers and tenants to be more aware of energy performance whenever buildings are constructed, sold or rented out.

Energy used in buildings is responsible for roughly half the UK's carbon dioxide emissions. Wasting energy costs money whereas measures such as loft insulation, boiler replacements and more effective controls often pay for themselves within a few years.

One of the cornerstones of saving energy is to make building structures more airtight to minimise heating or cooling energy losses due to air leaking through gaps in the structure. This is addressed in the amendments to part L. However, it is also essential to ensure there is sufficient controlled ventilation to maintain good indoor air quality to protect the health of the building occupants. This is one of the roles of part F, and is why approved document F has been revised in conjunction with part L.

The guidance on ventilation systems has been expanded to cover more options, and also changed from a prescriptive to a performance-based approach that should encourage innovation.

A new section in the proposed guidance deals with the design of smoking rooms in workplaces. The new edition of the approved document will also take into account the commitments made in the public health White Paper to be published later this year.

The consultation documents will be sent to several hundred organisations that have an interest in the energy efficiency of buildings and/or ventilation. Paper copies have also been placed in the Libraries of both Houses and the text can be downloaded from the ODPM website.

The consultation period for both sets of proposals closes on Friday 22 October 2004. Following this my officials will work with the Building Regulations Advisory Committee to consider how the proposals might need to be modified to take account of the opinions expressed in the consultations, and (for part F) the commitments that may be made in the public health White Paper. I am aiming, however, to lay the legislation needed to implement the directive and amend the building regulations and approved documents by July next year, and to achieve our goal of bringing them into effect by the end of December 2005.

Local Government Finance Settlement 2005–06

The Minister for Local and Regional Government (Mr. Nick Raynsford): Together with representatives of local government and other Government Departments, the Office of the Deputy Prime Minister has reviewed the prospect for incorporating 2001 census data in the formula calculations used to distribute formula grant to local authorities. The Office of the Deputy Prime Minister has concluded that we should postpone the introduction of 2001 census data in the calculation of the local government finance settlement until the formula freeze is lifted, in 2006–07 at the earliest.

The 2001 White Paper "Strong Local Leadership—Quality Public Services", (CM5237), announced that the funding formula would be frozen for at least 2004–05 and 2005–06. Our aim is to provide local government with predictable and stable funding, so that they can plan their finances and their service provision from year to year.

It is clear that using 2001 census data to calculate the local government finance settlement will require formula changes, and will cause some large changes to the distribution of formula spending shares.

In deciding not to update the census data used in the funding formulae in 2005–06, we have balanced our aim of using the most up to date data to calculate local government grants against our commitment to the formula freeze and to stability and predictability in local government funding.

The Office of the Deputy Prime Minister will work with local government to produce options to include the 2001 census data in the funding formula once the present formula freeze is lifted.

Revaluation, Transitional Rates Relief and Small Business Rates Relief

The Minister for Local and Regional Government (Mr. Nick Raynsford): This statement provides initial information about the impact of the business rates

revaluation that will take effect from 1 April 2005, gives details of the proposed transitional relief scheme and sets out the Government's proposals for the small business rate relief scheme which also takes effect from 1 April 2005.

Table 1 below shows the overall effect of revaluation as a percentage change in rateable values and on rate bills.

Table 1: Overall effect of Revaluation for England and by Region including Central List—2005

Economic Region	*Average % change in RV from the 2000 rating lists to the 2005 rating lists*	*Average % change in liability as a result of revaluation before reliefs are applied*
East	20.5	1.1
East Midlands	15.9	−2.8
London	17.1	−0.8
North East	15.0	−3.4
North West	14.9	−3.5
South East	20.2	0.7
South West	19.9	0.4
West Midlands	13.6	−4.5
Yorkshire and Humberside	13.1	−5.3
Central list	32.9	10.5
Total	17.9	—

Notes:
1. The regional figures are based on the data in local lists of properties for each relevant billing authority. The Central List includes various utilities and networks that are not specific to a billing authority area. Central List properties pay their rates direct to the Secretary of State and the revenue is added to the NNDR revenue pool.
2. The third column simply deals with the effect of revaluation. In addition to this the final liability will be uprated to take account of the annual inflation increase.

Table 2 shows the movement in rateable values as a result of the 2005 revaluation by economic region and key property types—offices, shops, warehouses and factories.

Table 2: Movement in Rateable Values—By Region and Property Types

	Main Property Types							
	Offices		*Shops*		*Warehouses*		*Factories*	
Region	*RV Change*	*Liability Average*	*RV Change*	*Liability Average*	*RV Change*	*Liability Average*	*RV Change*	*Liability Average*
East	16%	−2.6%	27%	7.3%	23%	3.3%	19%	0.4%
East Midlands	18%	−1.4%	23%	3.6%	15%	−3.2%	12%	−6.0%
London	11%	−5.4%	26%	7.1%	23%	2.8%	22%	3.0%
North East	24%	2.2%	24%	4.8%	13%	−4.8%	13%	−5.6%
North West	18%	−0.5%	22%	3.0%	11%	−6.4%	10%	−7.3%
South East	8%	−9.0%	29%	8.4%	29%	8.8%	23%	3.4%
South West	21%	1.6%	27%	6.3%	16%	−2.3%	14%	−4.8%
West Midlands	15%	−3.8%	20%	0.7%	11%	−6.6%	6%	−11%
Yorkshire and Humberside	14%	−3.9%	26%	6.0%	12%	−5.7%	9%	−8.3%
England	13%	−4.7%	25%	5.7%	18%	−0.5%	14%	−4.2%

Notes:
1. "RV change" reflect the average percentage increase in rateable value from the 2000 rating lists to the 2005 rating lists.
2. "Liability average" is the average change in liability as a result of revaluation before reliefs are applied.

Although the tables show an overall national increase in rateable values, this does not mean an increase in the overall tax take, or that rate bills will necessarily rise by the same amount. The purpose of revaluations is to distribute tax in a more equitable way by updating the valuation of property, thereby making the tax base more current and relevant. The tables therefore also show the likely effect of revaluation on rates bills.

This information provides important indicators of national trends. However, it is not necessarily a good predictor of changes in an individual's rates bill since these will be affected by more local differences and by factors that are specific to the individual property. Nevertheless, in England as a whole, nearly 60 per cent. of properties will see a fall in their rateable values and therefore a fall in their rate liability.

The Valuation Office Agency is finalising the preparation of the draft rating lists that will be published on 1 October. These are being published three months earlier than usual and will contain more comprehensive information than ever before. This will enable ratepayers to plan ahead with much greater certainty and should also reduce the number of appeals.

The Local Government Act 2003 provides that the 2005 revaluation must be accompanied by a transition scheme to lessen the effects of sudden and significant rises in rates bills. The legislation provides that the scheme must be self-financing, so that the costs do not fall on other taxpayers. For revaluation 2005, we are proposing a four-year self-financing transitional scheme. The costs of phasing in increases will be met by phasing down the reductions in liability for others.

The scheme seeks to provide an appropriate balance between protecting those who experience larger increases in rates bills and allowing those who enjoy a fall in bills to experience the full benefit as quickly as possible. As a result we propose the caps for properties experiencing increases will be 12.5 per cent., 17.5 per cent., 20 per cent. and 25 per cent. for the four years and for small properties 5 per cent., 7.5 per cent., 10 per cent. and 20 per cent.

For large properties experiencing reductions in rate bills, these would be capped at the rates of 7 per cent., 10 per cent., 17.5 per cent. and 20 per cent. For small properties, the rates proposed are 17.5 per cent., 25 per cent, 45 per cent. and 50 per cent. These downward caps

are significantly more generous than in any previous transitional scheme and mean that those liable to decreases in their rates bills will benefit more quickly than under earlier schemes. Also, the effect of the separate capping levels means that small businesses will only be required to make a very small contribution to the scheme.

Further details of the transitional scheme will be included in a consultation paper to be published shortly. The consultation will continue until October, by which time businesses will know their proposed rateable value from the valuation office agency draft rating lists. This will enable ratepayers to consider the effect of the proposed scheme alongside their proposed new rateable values before responding to the consultation.

I am also announcing our proposals for the new small business rate relief scheme. Government recognise that the current system of business rates places a disproportionate burden on small businesses. The small business rate relief scheme will address that.

Plans for a small business rate relief scheme were first announced in 2001 in the White Paper "Strong Local Leadership—Quality Public Services". The White Paper proposed that rate relief should be available at 50 per cent. for properties with a rateable value up to £3,000 with relief declining in percentage terms on a sliding scale until at £8,000 there would be no entitlement to relief. However, we undertook to review these thresholds before the scheme was implemented. The scheme that we will be consulting on next month is significantly more generous than the one originally envisaged, and proposes that the thresholds should be set at £5,000 and £10,000. We are also introducing a buffer zone so that business properties with rateable values between £10,000 and £15,000 will not have to contribute towards the relief.

The scheme will be funded through a supplement on the rates bills of larger businesses, in line with the requirement in the Local Government Act 2003, although we have made a commitment that this should not add more than 2.5 per cent. to bills. The proposed scheme would increase the overall supplement to no more than 0.67p. This equates to a 1.6 per cent. increase in rates bills.

We estimate that more than 400,000 small businesses stand to benefit from the proposed scheme.

EDUCATION AND SKILLS

Parental Separation: Children's Needs and Parents' Responsibilities

The Minister for Children (Margaret Hodge): This statement is being made on a joint basis, together with my noble Friend the Parliamentary Under-Secretary of State for Constitutional Affairs and my right hon. Friend the Secretary of State for Trade and Industry and Minister for Women and Equality.

I am pleased to report that consultation document "Parental Separation: Children's Needs and Parents' Responsibilities" (Cm 6273) is today being presented to Parliament.

Parental separation affects many children and their families. When handled well the adverse impact on their children can be minimised. When things go badly the effects can be very damaging for children, both in the short and longer terms. These risks can be reduced if parents can resolve parenting issues in an amicable fashion. Because of social changes, more children experience parental relationship breakdown than a generation ago: 150,000 to 200,000 parental couples separate each year. In addition, fathers are, in general, more actively involved in caring for and helping to raise their children.

Currently, only 10 per cent. of separating couples with children have had their contact arrangements ordered by the courts, though the number of court applications for contact is rising each year, with the courts in England and Wales making 67,000 contact orders last year. The majority of applications are made by fathers, reflecting the fact that most children live with their mothers following separation.

I am clear that there is scope for considerable improvement in the way in which the family justice system, together with its associated services, deal with contact disputes. This view is widely shared among judges, legal practitioners and voluntary organisations. Some fathers' groups assert that the courts and the law are biased against them. I do not accept this view. However, what I do accept is that major changes are needed, in order to ensure that court and other interventions into family life become much more effective in helping to secure effective resolutions which are in the interests of the child. I strongly believe that in most cases it is very much in the interests of the child to have an on-going relationship with both parents. By improving the system, the Government can make their proper contribution to enabling more non-resident parents to enjoy meaningful ongoing relationships with their children.

Following the most careful consideration across Government, we have determined that it would not be helpful, in any practical sense, to revise the principles that currently underpin the central piece of legislation—the Children Act 1989, in particular, the paramountcy principle, which makes the child's welfare the court's first consideration. This primary legislation, as interpreted and defined by the case law, already makes clear that both parents are equal and that both should continue to have a meaningful relationship with their children after parental separation, so long as it is safe. We fully accept that we need to make changes to the current system, and to support parents in settling their disputes, by providing more effective help for them to do so.

This consultation document puts forward proposals which are intended to help those undergoing parental separation to resolve their disputes more effectively so that children's needs are better met. They are based on the recognition that the primary responsibility for caring for children rests with parents rather than with the state. Their aims are threefold. Firstly, they aim to minimise conflict and support good outcomes, both for children and their parents, preferably without recourse to the courts. Secondly, they aim to improve parental access to those services which can enable them to reach agreements. Thirdly, they aim to improve legal processes and service delivery for those who do go to court. While most of our proposals are focused on the

10 per cent. of parents who turn to the courts, a number of them are intended to be relevant to all parents who separate.

In developing these proposals, we have listened carefully to what parents and children have said. The consumer Strategy work of the Department for Constitutional Affairs involved drawing together evidence from research and conducting workshops and focus groups with parents. The key message from the parents was that they wanted help and support to navigate the emotional and practical issues they faced during the breakdown of their relationship.

We have also consulted widely with the key stakeholders, including parents' groups, academics, voluntary organisations and service providers, including the judiciary, legal professionals and the Children and Family Court Advisory and Support Service (CAFCASS). It is this approach that will ensure rapid improvements at local level. Alongside the publication of this consultation document, the president of the Family Division and the chief executives of the court service and of CAFCASS are today writing to all judges, court service staff and CAFCASS officers to begin the process of change.

The consultation period, which begins today, will run until 1 November 2004. Comments and discussions about the proposals will be welcome. The Government plan to implement many of these proposals quickly and robustly and to pursue the legislation that is needed as soon as possible.

HOUSE OF COMMONS

"I Will Write" Replies

The Leader of the House of Commons (Mr. Peter Hain): The Speaker has raised with me his concern, and that of other Members, about the number of "I will write" replies to parliamentary questions, and the inaccessibility of the subsequent responses. The matter was also raised by the Public Administration Committee in its report on "Ministerial Accountability and Parliamentary Questions" [Third Report, HC355, paragraph 29].

Following discussion with ministerial colleagues, and in consultation with Mr. Speaker and the House authorities, I have agreed the following arrangements, which will take effect from September.

> Government Departments will continue to make every effort to provide a substantive answer to every parliamentary question within the customary timescale.
>
> Departments will give "I will write" answers only rarely, when there is particular reason for delay.
>
> At the end of each session, Departments will make every effort to answer questions substantively before prorogation; but, if this is not possible, Ministers will—instead of issuing an "I will write" reply, as in the past—answer the question with the following form of words: "It has not proved possible to respond to the [Right] hon. Member in the time available before Prorogation". It will then be open to the Member concerned to re-table the question in the new session if he or she wishes.
>
> On those occasions where an "I will write" answer is necessary, a copy of the subsequent substantive response will be sent to Hansard and to the Library, and will be printed with the written answers in the next edition of Hansard.
>
> If the subsequent response is longer than Hansard would normally publish, notification will be printed that the response is available in the Library of the House. The response will be available to Members in the Library and to the public on application to the House of Commons information office.
>
> If Ministers wish to provide, in response to a question, personal or confidential information that would not be appropriate for publication, this will be made clear in the answer. The "I will write" formula will not be used and copies will not be sent to Hansard or the Library.

I believe that these new arrangements will substantially reduce the number of "I will write" replies, and make the subsequent responses much more accessible both to other Members and to the public.

Public Bills: Exchanges Between the Houses

The Leader of the House of Commons (Mr. Peter Hain): During the final stages of the Planning and Compulsory Purchase Bill in May, a procedural difficulty arose in the House of Lords. Contrary to the intention of this House, it appeared to the House of Lords that a message from the Commons amounted to a "double insistence" in respect of one Lords amendment. In such circumstances, a Bill is normally lost. However, as this was clearly not the wish of either House, the House of Lords agreed to vary the normal practice in that House, to allow the Bill to continue in play.

The Leader of the House of Lords invited the Clerks of both Houses and parliamentary counsel to consider jointly the lessons learnt from this episode and how best to avoid such a situation in the future. In particular, they were asked to look at the practice of considering amendments in the other House in groups or packages and the procedural consequences which can follow.

Following consideration by a working group of Clerks and parliamentary counsel, the Clerks of both Houses have agreed the following statement of position:

> "Before a bill can become an Act of Parliament, the two Houses have to agree on the text. The procedure for reaching agreement appears simple in concept, but can become extremely complicated in practice because of the political context. It may involve, for example, one House having to back away from an entrenched position.
>
> Following Third Reading and passing of the bill in the second House, a list of amendments made by that House is compiled and sent back to the first House for their consideration. If the first House agrees to all of the amendments made in the second House, the bill is ready for Royal Assent. If it does not, it returns the bill to the second House, with reasons for disagreeing to the amendments, and/or with further amendments. The second House then considers the reasons and amendments offered by the first House. The exchanges between the two Houses continue until:
>
> (a) agreement is reached, or
>
> (b) the Session is brought to an end, without agreement having been reached, or
>
> (c) 'double insistence' is reached, which normally results in the bill being lost.
>
> The term double insistence is used to describe a situation where one House insists on an amendment to which the other has disagreed, and the other House insists on its disagreement. If this point is reached, and neither House has offered alternatives, the bill is lost. This doctrine is set out in Erskine May 23 edition, page 639, which, however, goes on to say 'there is no binding rule of order which governs these proceedings in either House, and, if there is a desire to save

the bill, some variation in the proceedings may be devised in order to effect this object.'

In the case of the Planning and Compulsory Purchase Bill, two amendments (Lords amendments 1 and 3) were still under discussion in the final exchanges between the two Houses. In the Commons, the two amendments were treated as forming a package, and a single amendment (1C) was considered by the Commons to be an amendment in lieu of both Lords amendments. But the reason given for disagreeing to Lords amendment 3 made no mention of the link between amendment 1 and amendment 3. Accordingly, the Lords Clerks advised that double insistence had been reached on amendment 3, and they advised the Government that it would be necessary to move a motion to vary the normal practice of the House, and thus allow further consideration of the bill. A motion was agreed to on 11 May.

We have been asked to consider the lessons which can be learnt from these exchanges.

By way of background, we note that the speed and complexity of exchanges between the two Houses has increased markedly in recent years. This is due partly to political circumstances, and partly to technical advances in text handling, which have made possible extremely rapid turn-around of bills. Increased speed inevitably carries the risk of misunderstanding or error, and reduces the time available for consideration of the possible consequences of each House's decisions.

Particularly in the Commons, the practice has developed of packaging and grouping amendments during these final stages.[1] Packaging and grouping are useful ways of signalling perceived connections between amendments. But these are techniques for organising debate within each House; neither House can be expected either to discover, or to feel bound to follow, arrangements made by the other for the consideration of amendments. Messages between the two Houses, and reasons for disagreement, are ways of communicating perceived connections between amendments, but these in turn depend upon the terms of the motions in each House. We consider that the wording of motions could be improved, in order to make clearer the links between the different elements of a 'package' of amendments. We also think that the wording should be improved, in order to make the action of one House clearer to the other and, where necessary, to identify any package.

As an example, in a case where one House insists on disagreement to more than one amendment and offers an alternative only to one, intending that single alternative to encourage the other House to reconsider all the relevant amendments, the most certain way of avoiding the need in future for a motion disapplying the double insistence rule will be to ensure that a single motion to disagree is laid before the House along the lines of 'that this House insists on its disagreement to amendments 1, 2 and 3 but proposes the following amendment in lieu of amendment 1'. The other House will then be able to identify the group of amendments as a package.

We are in agreement that in such a case the resultant message to the other House would not amount to a double insistence, whether or not the House receiving it chose to 'unpackage' the amendments for the purposes of debate.

From a practical point of view, we consider that the packaging of amendments has advantages, and that there could be benefits from bringing the practices of the two Houses more closely together in this respect. With this in mind, the Clerk of the Parliaments will invite the Lords Procedure Committee to consider changes to the practice of the House, to allow more flexibility in dealing with Commons amendments which have been packaged.

Although, in many cases, it is likely that the two Houses will be prepared to consider as a whole a package of amendments which has been received from the other House, there will be other cases when either House may wish to consider the elements of a package separately for political reasons. It is not the purpose of procedure to provide political solutions, but rather to facilitate the consideration of options. Each House remains the master of its own procedures, and where there is disagreement about packaging, it will be possible, as at present, for the other House to consider amendments separately to the extent desired."

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Protection of Animals (Amendment) Act 2000

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): The Royal Society for the Prevention of Cruelty to Animals has signed a written agreement with the Secretary of State for Environment, Food and Rural Affairs, to allow them to perform the functions of an approved prosecutor under Section 1 (3) (e) of the Protection of Animals (Amendment) Act 2000. This Act supplements the Protection of Animals Act 1911, by allowing a magistrates court to make an order relating to the temporary care or for the disposal, sale or slaughter of animals kept for commercial purposes that are the subject of a prosecution brought under the 1911 Act by a prosecutor. The agreement with the RSPCA will take effect from 1 September 2004 and will apply to England only. Copies of the model agreement have been deposited in the Libraries. The model agreement and associated guidance notes can also be found on Defra's website at: www.defra.gov.uk/animalh/welfare/farmed/on-farm/.htm.

Future of Nirex

The Secretary of State for Environment, Food and Rural Affairs (Margaret Beckett): In my statement of 16 July 2003, I announced that Government was looking at the best way of making Nirex "independent of industry and under greater Government control". I would now like to make a further statement, concerning the means of moving forward with this, that I have agreed with my Right Hon. Friend the Secretary of State for Trade and Industry.

The Government, through DEFRA and DTI, intend to establish a new company limited by guarantee (CLG) to hold the shares in Nirex, and oversee its business operations. The transfer of Nirex shares to the new CLG will be covered by an appropriate commercial transaction with existing Nirex shareholders. The CLG will, effectively, provide a means of placing Nirex assets and intellectual property into trust, whilst enabling it to continue with its important work that includes setting standards for the conditioning and packaging of radioactive waste, until the Government can take their decision on policy for the long-term management of the UK's higher activity radioactive waste, and the means

[1] In this note, 'grouping' refers to the practice (in both Houses) whereby related amendments are debated together, but the fate of individual amendments in the group is decided separately. 'Packaging' refers to the practice (currently only used in the House of Commons), in the final stages of a bill's passage, where a number of related amendments may be grouped together for the purposes of both debate and decision. So, for example, a motion on a "package" might invite the House to agree to amendments (a), (b) and (c) to a Bill, in lieu of Lords amendments 42 to 44 and 61.

of its delivery, in light of recommendations from the independent Committee on Radioactive Waste Management (CoRWM). The funding will be by contract, primarily through the NDA. Nirex will be separate from, and independent of, the NDA.

The new arrangements will achieve both the objectives stated in my previous announcement, to make Nirex independent of industry and bring the company under greater Government control. The aim is to agree the detail of them by about October/November of this year for them to come fully into operation from 1 April 2005.

Successful implementation is subject to a significant amount of more detailed work currently being undertaken by DEFRA and the DTI in conjunction with Nirex and its present shareholders, including an ongoing programme of due diligence work. All parties are committed to achieving a successful outcome to this process.

Home Energy Conservation Act Data

The Minister for the Environment and Agri-environment (Mr. Elliot Morley): Data reported by energy conservation authorities in England under the Home Energy Conservation Act 1995 in the period 1 April 1996 to 31 March 2003 have been placed in the Libraries of both Houses. These data have also been published on the Department for Food and Rural Affairs' website, at address http://www.defra.gov.uk/environment/energy/heca95/index.htm.

Authorities have reported an overall improvement in domestic energy efficiency of approximately 12 per cent. as measured against a 1996 baseline.

NORTHERN IRELAND

Gender Equality Strategy Consultation

The Secretary of State for Northern Ireland (Mr. Paul Murphy): I wish to advise the House that on 14 August 2004, I will announce a public consultation exercise in respect of a proposed gender equality strategy, the Government's high level policy for tackling gender inequalities in Northern Ireland.

This consultation follows our fulfilment of a commitment given by the previous Northern Ireland executive, in its programme for Government (2001–04) to bringing forward and implementing a cross-departmental strategy to tackle gender inequalities.

Copies of the Consultation Paper "Gender Matters—Towards a Cross Departmental Strategic Framework to Promote Gender Equality For Women And Men 2005–15" have been placed in the Libraries of both Houses.

Insolvency Service Annual Report and Account (Year Ending 31 March 2003)

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Barry Gardiner): In accordance with Articles 372 and 358(4) of the Insolvency (Northern Ireland) Order 1989 copies of the Insolvency Service Annual Report and Account for year ending 31 March 2003 have been placed in both Libraries of the House today.

Invest Northern Ireland (Annual Report and Accounts 2002–03)

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Barry Gardiner): The annual report and accounts of Invest Northern Ireland for the financial year ending 31 March 2003 were deposited in the Libraries of both Houses.

Youth Council

The Secretary of State for Northern Ireland (Mr. Paul Murphy): The 2001–02 accounts of the Youth Council for Northern Ireland were deposited in the Libraries of both Houses on 21 July 2004.

Ordnance Survey (Corporate Plan 2004–07 and Business Plan 2004–05)

The Parliamentary Under-Secretary of State for Northern Ireland (Angela Smith): I have today arranged for the Ordnance Survey of Northern Ireland corporate plan 2004–07 and business plan 2004–05 document to be placed in the Libraries of both Houses. This document will also be made available on the Ordnance Survey of Northern Ireland website at: www.osni.gov.uk.

North/South Implementation Bodies—Tourism Ireland Ltd

The Secretary of State for Northern Ireland (Mr. Paul Murphy): I have today placed in the Library papers relating to decisions that have been taken during the period 1 October 2003 to 5 July 2004 which relate to the North/South Implementation Bodies and Tourism Ireland Ltd under the terms of the exchange of notes of 19 November 2002 (Cmnd 5708).

HOME DEPARTMENT

Visually Recorded Pre-trial Cross-examination

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): The Youth Justice and Criminal Evidence Act 1999 (the 1999 Act) contained, among other provisions, eight special measures for vulnerable or intimidated witnesses. They are essentially different ways of giving evidence in criminal trials that were designed either to improve the quality of evidence given by witnesses through reducing their levels of stress or to make it possible for witnesses who find difficulty in giving their evidence to have access to justice.

This Government have already implemented, or is piloting, seven of the eight measures. The eighth measure—visually recorded pre-trial cross-examination—was always going to be the most complicated of the measures to implement. It was also always likely to be applied to the smallest number of cases.

A number of stakeholders have expressed their concerns to us about the detail of its implementation. We therefore commissioned Professor Diane Birch, a leading academic in the field, to review and provide advice on the workability of visually recorded pre-trial cross-examination. A copy of Professor Birch's report has been laid in the Library today.

The report concludes that one of the two main reasons for undertaking visually recorded pre-trial cross-examination—that of capturing all the witness's evidence early in the pre-trial process—is no longer valid. That is because of new rules on disclosure that effectively mean that by the time both counsel are in a position to undertake visually recorded pre-trial cross-examination, they will be ready to go ahead with the trial itself.

The second reason—keeping the witness out of court altogether—is still valid. However, the report concludes that rather than introduce the cumbersome mechanism of visually recorded pre-trial cross-examination many months after having visually recorded evidence-in-chief, it would be far more sensible to return to the original recommendation in the report of the advisory group on video evidence (1989) chaired by his Honour Judge Thomas Pigot QC. This was that the child should appear at an informal hearing, at which both the child's evidence-in-chief (supplemented, where there was one, by an earlier video recorded interview) and the cross-examination would be recorded on video for subsequent transmission to the court.

The report recommends that section 28 of the 1999 Act that provides for visually recorded pre-trial cross-examination should be revisited. It recommends also that the operation of section 21 of the same Act should be reviewed. Section 21 provides that under-17 year olds who are witnesses in cases of sex or violence are given no choice in having certain special measures—such as visually recorded evidence-in-chief or live TV links—applied to them, whether they wish for them or not. So a 16½ year old who has witnessed any sort of violent crime, even where he was not himself involved, would be forced to give evidence in this way.

The Government are disappointed not to be implementing one of the eight special measures for vulnerable or intimidated witnesses that we provided for in good faith five years ago. But we believe it is better to take the advice of one of the leading experts in the field and many senior practitioners, and revisit this complex issue. Our aim is to achieve genuine improvements to the way in which vulnerable and intimidated witnesses give their evidence, and this will not be achieved by ploughing on doggedly with implementation of provisions which informed advice suggests will not be practicable or yield the benefits originally envisaged.

We have therefore decided that in the autumn we shall embark upon a wider review of how child evidence is taken and presented in the criminal courts, particularly in cases involving sex or violence, with the aim of delivering the greater flexibility recommended in Professor Birch's report. This will assist in our aim of enabling measures to be more tailored to the individual witness's needs.

We are also ensuring that everything that can be done to improve the experience of those witnesses who might have benefited from the implementation of section 28 is being done. The "No Witness No Justice" project will ensure that children's needs are assessed and met, so that, for example, pre-trial court visits are arranged; access to a range of emotional support and guidance through appropriate groups is offered; where possible home visits take place; and parents are provided with a single point of contact to access information and advice throughout the case. We will continue to improve court buildings so that encounters between the defendant and the child witness are minimised, for example through providing more TV live links. We will also continue to work with the judiciary and the bar to ensure that children's needs and wishes are recognised by the courts.

Public and Contracted Prisons

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): In my written statement on 15 July announcing publication of the Prison Service and national probation service annual reports for 2003–04, I stated that a full breakdown of the performance of both public and contracted prison establishments in relation to the applicable key performance indicators (KPIs) would be provided at a later date.

The information on all applicable KPIs is presented in the table that has been placed in the Library. No category A prisoners escaped from any prison and so performance on this KPI is not included in the table. Information is not available at establishment level on the resettlement KPI (which is calculated on the basis of a national resettlement survey), and on the two KPIs on contracted escorts (escapes and timely arrival at court) which are not managed at establishment level. The contracted prisons do not have targets on staff sickness levels or minority ethnic representation. Due to data collection problems there are no figures available for doubling in contracted prisons.

Forensic Science Service Annual Report and Accounts 2003–04

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): I have today laid before Parliament copies of the Forensic Science Service's (FSS) annual report and accounts for 2003–04.

Performance against agency targets 2003–04:

The FSS met 20 of its 22 targets and put in a robust financial performance. Of the two targets not achieved, one was missed narrowly and the other became unachievable through circumstances outside of the agency's control. Details are contained in the annual report.

The Forensic Science Service agency targets for 2004–05 are as follows:

Finance:

Target 1

Three year rolling average of 15 per cent. minimum return on capital employed.

Target 2

75 per cent. reduction in charges versus the average earnings index.

Target 3

Increase investment in development by a minimum of 12 per cent. of turnover.

Target 4

Secure £1.25 million of external funding for research and development.

Non-Finance:

Target 1

Embed the internal FSS end to end process.

Target 2

Implement the new definitions of timeliness (NDoT) based on investigative and evidential contributions of forensic science for 100 per cent. of forces.

Target 3

Make available to 100 per cent. of forces the process of end to end case ownership.

Target 4

Sign up 100 per cent. of customers (police and CPS) at force level to service agreements (timelines and charging) in context of national protocol.

Target 5

Allocation of 100 per cent. of cases to a dedicated FSS case officer.

Target 6

Roll out training packages for police and CPS to support new ways of working.

Target 7

Design and develop a link between NDNAD and NAFIS (carried forward from last year).

Target 8

Maintain a capacity to deliver fast track processing of DNA samples within 48 hours.

Target 9

Deliver 15 per cent. of DNA samples (subject to demand) within 48 hours (fast track processing).

Target 10

Average time of seven days to analyse and inform customers of DNA crime scene stain results (normal track).

Target 11

95 per cent. of DNA crime scene stain results (see above) will have a turn round time of 12 days.

Target 12

Average time of five days to analyse and inform customers of DNA suspect sample results on database (normal track cases).

Target 13

95 per cent of DNA suspect sample results (see above) will have a turn round time of eight days.

Target 14

Increase forensic effectiveness by fully implementing the index and benchmark system.

Target 15

95 per cent of jobs (excluding road traffic accidents and alcohols) will have a turn round time of 35 days.

Target 16

Maintain ISO Accreditation.

Target 17

Maintain Investors in People accreditation.

Target 18

Maintain diversity programme.

Harmondsworth Immigration Removal Centre

The Minister for Citizenship and Immigration (Mr. Desmond Browne): On the evening of 19 July there was a serious disturbance at Harmondsworth immigration removal centre.

At about 8 pm staff found a detainee hanging in a shower-room at the centre. At about 11 pm a number of detainees became disruptive and started to set a number of fires in the communal areas. These fires were put out by the newly installed fire protection system. The police and fire services were called to the scene.

The disturbance continued and became more serious. Staff from UKDS, the company managing the centre under contract from the Home Office, withdrew from the association areas. Standing arrangements in the Prison Service for dealing with serious incidents were activated, and by midnight the Gold Command Suite at Prison Service headquarters was in operation. By 4 am on 20 July the Prison Service Operation Tornado teams went into the centre. By 8 am three of the four house blocks were under Prison Service control. The fourth came under control a little later in the morning, and by 2 pm all parts of the centre were calm.

The Centre is, for the time being, unsuitable for use. The 441 detainees who were there at the time of the disturbance are being removed to other accommodation, and we are in the final stages of dispersing them across a range of sites, including the IND removal estate and prison establishments while a small number have been taken into police custody. No detainees have been released. An assessment of the damage is being made with UKDS, and the centre will be reopened as quickly as possible. In the meantime, alternative arrangements are being made for the handling in particular of those detainees whose asylum claims were being dealt with under the fast track.

This was a serious disturbance, and I pay tribute to all those who responded quickly and succeeded in restoring order. It is important to note that the disturbance did not lead to loss of life or serious injury. No detainees escaped, and the measures which had been taken to prevent a recurrence of the fire at Yarl's Wood Centre proved successful. We are determined that the centre be restored to full use as soon as possible.

The tragic death of the detainee earlier in the evening of 19 July will be the subject of a full investigation by the Prison and Probation Ombudsman. The police are conducting a criminal investigation into the events themselves. There are also likely to be managerial lessons to be learned and I have instigated an immediate investigation, the terms of reference of which will be: to establish the facts of the events at Harmondsworth on the evening of 19 July and the morning of 20 July; to consider the factors which may have given rise to the disturbance and the effectiveness of the measures which were taken to deal with it; and to make recommendations.

CONSTITUTIONAL AFFAIRS

Court Services

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. Christopher Leslie): The MCSI inspection of courts services annual report for 2003–04 has been laid before Parliament today. This document gives full details of the MCSI's performance for that year. Copies of the report have been place in the Libraries of both Houses.

DEFENCE

Project ISOLUS

The Minister of State, Ministry of Defence (Mr. Adam Ingram): On 4 February 2004 I informed the House of Commons that Ministry of Defence owned coastal sites were being considered for their suitability to store radioactive material from nuclear-powered submarines under Project ISOLUS. That exercise is now complete and one site, the royal armaments depot (RNAD) at Coulport in Dumbartonshire, has been found suitable in principle. One of the industry bidders, Serco Assurance, in partnership with Parsons Brinckerhoff Ltd. and RWE Nukem Ltd., is seeking to use a MOD site in their proposal and they will now be asked if they wish to incorporate Coulport into their bid, as will the other bidders.

I want to make it clear that this does not mean that Coulport has been selected as the storage location—there is still much work to be done before a final decision is made. Nor does it mean that industry has to incorporate the site in any bid. It does, however, mean that those other coastal sites included in the review, some of which have been the subject of considerable speculation, have been assessed as unsuitable and are not storage options.

Coulport has, of course, previously been named in an industry bid, and is one of the sites on which we consulted the public last year. I do not envisage setting in train further consultation at this stage. If, however, any of the proposals from industry change in substance as a result of the inclusion of Coulport we will instigate a further public consultation exercise. As at all stages of the ISOLUS process, safety, in terms of the general public, the workforce and the environment, will be a key factor in all of our decisions. The concerns expressed by the public during the events at the various sites named in each of the industry bids have been captured by the 50 recommendations contained in the Lancaster University report on the consultation exercise. These recommendations are currently being considered and, following consultation with other government departments and devolved administrations, a Government response will be published later this year.

The exercise to identify potential MOD sites has concentrated on those by the coast in view of the current preferred option of land storage of cut out intact reactor compartments. The 118 sites were assessed against the following criteria: sufficient spare capacity to accommodate a storage facility; long term security of tenure; development of a storage facility that is feasible and cost effective, would not breach existing agreements with MOD, NATO or other countries, and would not inhibit the site's current principal operational function; access from the sea, capable of accepting heavy loads; and no safety hazard, such as flooding, coastal erosion and whether the site is used for handling and storing explosives, or where unexploded ordnance has been identified, for which there is no cost effective engineering solution.

In parallel with the detailed consideration of the outcome of the public consultation, and informed by the recommendations flowing from it, evaluation of the various industry outline proposals will be completed. We expect to be able to announce early next year how the project will be taken forward. Moreover, the Government remains committed to a further round of public consultation before any final decisions are taken.

Military Low Flying Annual Report

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): The amount of low flying training carried out in the UK low flying system (UKLFS) during the training year April 2003 to March 2004 was the minimum required for aircrew to reach and maintain their ability to fly at low level. The number of low flying training hours booked in the UKLFS (excluding the rotary wing dedicated user areas, where different booking arrangements apply) decreased by 1,996 hours, in comparison with the previous training year.

We are committed to ensuring that low flying training across the UK is spread as widely as is practically possible across the UK so that no single area is too burdened. However, due to a variety of reasons, population distribution and geographical and climate restrictions, it is unavoidable that some areas of the country may experience more activity than others.

I have today placed in the Library of the House a report giving a detailed account of the low flying training that has taken place in the UK low flying system for the training year April 2003 to March 2004.

The report is also available on the MOD web site: www.mod.uk/issues/lowflying.

Quick Reaction Alert

The Minister of State, Ministry of Defence (Mr. Adam Ingram): On 23 April 2004, *Official Report*, columns 30–31WS, my right hon. Friend the Secretary of State for Defence announced that Typhoon aircraft would be based at RAF Coningsby, RAF Leeming and RAF Leuchars. I have now decided that RAF Leuchars will be the second Typhoon base after RAF Coningsby. This is in order to meet the requirement for quick reaction alert (interceptor) aircraft cover for the UK. RAF Coningsby and RAF Leuchars are already established as bases for this purpose, which will continue after Typhoon is introduced.

Woolwich Station

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): A review has been undertaken of the defence requirement for the retention of Woolwich station. The review took account of our future ground based air defence requirements, of the strategy for the rationalisation of the Defence Estate and of the recommendations of the Lyons review. It has concluded that the Ministry of Defence should re-locate units currently based in Woolwich to sites yet to be decided. This will allow the Woolwich site to be made available for non-defence use. Further work is now needed on implementing this decision. All personnel affected have today been advised of our intention and they and their union representatives will be consulted fully as our plans develop.

Defence Housing Overseas

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): Last year, the Ministry of Defence carried out a business process review of the management and delivery of defence housing. The review recommended merger between Defence Estates and the Defence Housing Executive, the agency responsible for the management and delivery of defence family housing in Great Britain but not in Northern Ireland or abroad. As Phase 2 of the study, following the above merger, a further review is being undertaken of the management and delivery of family housing for UK forces overseas and in Northern Ireland.

The aim of the review is to examine the function, role, operation, funding and organisation of defence housing in Northern Ireland and overseas. It will seek to identify the most efficient and effective process to support the management and delivery of defence housing in those areas.

The review team will consult with a range of stakeholders during the course of the review including single-service customers, trade unions, other Government Departments and other relevant bodies. The Ministry of Defence is interested also to hear the views of other organisations or individuals who would like to make a contribution to the review. Those wishing to do so should send their contribution by 31 August 2004 to:

Review team for the management and delivery of defence housing overseas:

Ministry of Defence

Directorate of Management and Consultancy Services

Main building

Whitehall

SW1A 2HB

Or by email: pat.rodger614@mod.uk.

Duke of York's Royal Military School

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): The following Key Targets have been set for the Duke of York's Royal Military School for Financial Year 2004–05:

To achieve an average GCSE points score per 15 year old pupil of 61.

To achieve 90 per cent. of 15 year old pupils gaining five or more passes graded A* to C at GCSE.

To achieve 30 per cent. of GCSE passes at grades A* or A.

To achieve an average GCE points score per candidate of 268.

To achieve 35 per cent. of GCE passes at grades A or B.

To achieve a pupil per capita cost of no more than £13,545.

To generate income of at least £800,000.

To achieve at least 310 applications for September 2004 intake.

Armed Forces Pay Review Body

The Secretary of State for Defence (Mr. Geoffrey Hoon): I am pleased to announce that I have re-appointed Dr Anne Wright as a member of the Armed Forces Pay Review Body for a second three-year term, commencing March 2005. This appointment has been conducted in accordance with the Office of the Commissioner for Public Appointments guidance on appointments to public bodies.

HEALTH

Medicines and Healthcare Products Regulatory Agency

The Minister of State, Department of Health (Ms Rosie Winterton): We have received the annual report and accounts of the Medicines and Healthcare Products Regulatory Agency for 2003–04 which has been laid before Parliament today in accordance with the requirements of sections 5(2) and 5(3) of the Exchequer and Audit Departments Act 1921. Copies have also been placed in the Library.

Meat Hygiene Service

The Parliamentary Under-Secretary of State for Health (Miss Melanie Johnson): The 2003–04 annual report and accounts for the Meat Hygiene Service was laid before Parliament today.

Copies will be placed in the Library, but formal printing and publication will not take place for another six to nine weeks, pending preparation of a version in the Welsh language, as required by the Welsh Language Act 1993.

Health and Social Care Standards

The Secretary of State for Health (Dr. John Reid): I am publishing today "National Standards, Local Action: Health and Social Care Standards and Planning Framework 2005–06—2007–08", incorporating "Standards for Better Health". This will support the national health service and social care in taking forward the agenda set out in the NHS improvement plan, setting out a framework for continuing quality improvement.

Much progress has already been made across the NHS. Waiting times are falling, mortality rates for the major diseases are down and there are more NHS staff treating NHS patients. The development of clinical governance, the establishment of the National Institute for Clinical Excellence, the publication of National Service Frameworks and the establishment of independent inspectorates for health and for social care have set a framework for safe, high quality care. This is underpinned by "The NHS Improvement Plan" that sets out a programme for further progress and clear improvements in health outcomes and patient care.

"Standards for Better Health" and "National Standards, Local Action" together set out a new approach that will deliver this agenda, with reduced national targets underpinned by robust standards to drive up quality and safety. NHS patients are entitled to care that is safe and effective and "Standards for Better Health" sets out the standards all providers and commissioners of NHS care are expected to meet to deliver safe and effective care.

The standards-driven approach set out in these two documents establishes an integrated framework for performance improvement, setting the parameters for

local plans and targets;

independent inspection by the Healthcare Commission and CSCI;

performance assessment and ratings.

"Standards for Better Health" is published by the Secretary of State for Health under Section 46 of the Health and Social Care (Community Health and Standards) Act 2003. "Standards for Better Health" follows a formal consultation on draft proposals in the spring and defines standards covering the full spectrum of health care from public health through to acute care, which have been developed with two principal objectives. First, they include a set of core standards which provide a common set of requirements applying across all health care organisations to ensure that the health services that are provided are both safe and of an acceptable quality.

Secondly, there is a set of developmental standards providing a framework for continuous improvement in the overall quality of care people receive. Setting developmental standards in this way ensures that the extra resources being directed to the NHS are used to help raise the level of performance measurably year on year.

"Standards for Better Health" will apply with immediate effect to all health care organisations in England, including NHS foundation trusts. All those providing or commissioning NHS health care in England will have to take them into account when planning or commissioning health care services.

The Healthcare Commission will measure performance against the standards and progress against national and local targets developed in line with "National Standards, Local Action" into account in its annual reviews and assessments of health care by (and for) each NHS body in England, including NHS Foundation Trusts. By delivering on targets that relate directly to health care standards, NHS bodies will be able to demonstrate to the commission that they are performing well against those standards.

In "Standards for Better Health", for the first time the Government are setting out a comprehensive statement of the standards NHS bodies and providers of NHS care are expected to meet. "Standards for Better Health" will act as a key driver for quality improvement throughout the NHS, but one aim has been to clarify and to reduce the large number of requirements and standards that have (in the past) been set centrally, either directly from the Department itself or by its arms length bodies. Some of the Department's own standards and requirements are currently under review and the review of arms length bodies will provide an opportunity to change some of the requirements that they currently impose.

The development of the new high-level standards represents the first step toward simplifying and rationalising the expectations on the service. Taken alongside the reduced requirements in "National Standards, Local Action" this will give organisations greater flexibility for local innovation, underpinned by a strong focus on safe, effective health care and improvements in the outcomes that matter most for patients and service users driving forward the programme set out in the "NHS Improvement Plan".

Copies of "National Standards, Local Action" have been placed in the Library.

Health Service Bodies

The Minister of State, Department of Health (Mr. John Hutton): For the health service bodies listed as follows, their annual accounts and any accompanying Comptroller and Auditor General reports have today been laid before the House of Commons pursuant to section 98(1 C) of the National Health Service Act 1977. Copies have been placed in the Library:

Dental Practice Board

Dental Vocational Training Authority

Family Health Services Appeal Authority

Health Development Agency

Health Protection Agency

National Blood Authority

National Clinical Assessment Authority

National Institute for Clinical Excellence

National Patient Safety Agency

National Treatment Agency

NHS Appointments Commission

NHS Information Authority

NHS Litigation Authority

NHS Logistics Authority

NHSU

Prescription Pricing Authority

Retained Organs Commission

UK Transplant

National Health Service Pensions Agency

The Minister of State, Department of Health (Mr. John Hutton): I have approved the national health service pensions agency annual report and accounts for 2003–04, which have today been laid before the House of Commons in accordance with the requirements of Section 7 of the Government Resources and Accounts Act 2000.

Copies have been placed in the Library.

Medicines Commission and Medicines Act Advisory Bodies

The Minister of State, Department of Health (Ms Rosie Winterton): We have received the annual report of the Medicines Commission and Medicines Act advisory bodies for 2003, which has been laid before Parliament today in accordance with the requirements of section 5(2) of the Medicines Act 1968.

Bound volumes have been placed in the Library containing the 2003 reports of the Medicines Commission, the committee on Safety of Medicines, the advisory board on the registration of homoeopathic products, the British Pharmacopoeia Commission, the independent review panel on advertising, the independent panel for borderline products and the veterinary products committee.

We are glad to acknowledge the valuable work done by the distinguished members of the Medicines Act advisory bodies and thank them for the time and effort dedicated in the public interest to this important work.

Chronically Sick and Disabled Persons Act

The Parliamentary Under-Secretary of State for Health (Dr. Stephen Ladyman): The annual report for 2003 is being published today and copies have been placed in the Library. The report covers research and development work carried out by or on behalf of any Government Department in relation to equipment that might increase the range of activities and independence or well being of disabled people.

The current report places such research in the context of the national health service improvement plan, and outlines the role of assistive technology in making independent living easier for older people and people with disabilities. The report describes the wide range of Government funded projects supporting the development, introduction and evaluation of assistive technology.

NHS Purchasing and Supply Agency

The Minister of State, Department of Health (Mr. John Hutton): The NHS purchasing and supply agency's annual report and accounts has been published today and copies have been placed in the Library.

WORK AND PENSIONS

Knowsley Metropolitan Borough Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Knowsley Metropolitan Borough Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for housing benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002-03, Knowsley Metropolitan Borough Council administered some £70.8 million in housing benefits, about 19.3 per cent. of its gross revenue expenditure.

BFI inspected Knowsley Metropolitan Borough Council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The report finds that since 2000 the council had been implementing an ambitious programme of activity that included: implementation of the Verification Framework; implementing new IT systems; a re-organisation of its Revenues and Benefits division; and the establishment of one stop shops and a customer contact centre. Many of the earlier changes were responsible for a considerable backlog of housing benefit claims, attributed to poor management and pointing to a lack of effective planning and organisation.

The council's benefits service had improved from a "poor" classification in December 2002 to a "fair" classification in December 2003 as part of the comprehensive performance assessment programme. The benefits service had a committed workforce and the report acknowledges the considerable efforts made by Members, senior officers and staff over a sustained period of time.

The report finds that the council had not documented its approach to benefits administration, had not put in place essential strategic policies, and had insufficient procedural staff guidance which resulted in staff making inconsistent decisions when processing claims. The report notes serious concerns about the lack of management assurance and public accountability provided by the benefits service.

The council had received "Beacon Council" recognition for its accessible services, providing public access at several one stop shops and handling all incoming telephone calls at its customer contact centre. It had not however reviewed its service against the requirements of the Disability Discrimination Act 1995 and was also not complying with the Race Relations Amendment Act 1976. Physical access issues for customers with disabilities had been considered but their access to services including information needs had not been assessed neither had the needs of customers whose first language was not English. The council's benefit claim form was clear and simple.

The council had made an impressive effort to clear a backlog of new claims resulting in the council's average number of days to process new claims to housing benefits as being approximately 44 days, compared with the standard of 36 days. However, the council was not consistently applying the standards required for gathering and confirming supporting evidence. Claims processing had taken priority over other work, resulting in a backlog of over 20,000 items of post that was not being managed, contributing to high levels of avoidable overpayments. Sampling showed the average time taken to process changes of circumstances was 58.2 days, compared with the standard of nine days.

The council was making positive efforts to raise the profile of counter-fraud activity but it needs to improve publicity of its prosecution policy both internally and externally to demonstrate that it takes fraud seriously. The report notes extreme concerns that the prosecution process used by Knowsley Metropolitan Borough Council allowed customers to remain under caution for excessive periods of time. Also that the council's prosecution referral process and scoring system that determined appropriate action to be taken and sanction to be applied, undermined the prosecution policy.

The council's benefit overpayment policies and procedures were of a good standard and fraud overpayments were pursued rigorously and promptly recovered. However, sampling showed that 70 per cent.

of benefit overpayments were as a result of the council not promptly processing notified changes of circumstances.

The on-site phase of the inspection took place in October and November 2003, and the report was cleared on 16 April 2004. The 17-week timeline was not met due to key officers in the council not being available for the clearance of the report.

The report makes recommendations to help the council address weaknesses and further to improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Bristol City Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Bristol City Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for Housing Benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, Bristol City Council administered some £78.7 million in housing benefits, about 9.7 per cent. of its gross revenue expenditure.

BFI inspected Bristol City Council against the performance standards for housing benefits, and concludes that the council's benefits service had not reached standard in any of the seven functional areas—strategic management, customer services, processing of claims, working with landlords, internal security, counter-fraud and overpayments.

The report finds a high level of commitment by the council to improve its benefit service. During the inspection, the council implemented a number of changes to address issues that were highlighted by BFI.

In April 2001, having acknowledged that there were problems with the speed and quality of the service it was providing, the council began a programme of fundamental changes in the way it administered housing benefits. Changes included the centralisation and reorganisation of its benefits processing work, and an upgrade to the benefits IT system.

Despite the changes, delays in processing benefit claims and a significant backlog of work were still evident at the time of the inspection. Customers had to wait an average 74 days to have their new benefit claims processed compared to the standard of 36 days. Verification of supporting evidence for benefit claims was generally conducted to a good standard. However, insufficient and ineffective management checking meant that the council did not have sufficient assurance that the benefits system was secure or that benefit was being paid correctly. Accuracy rates in 2002–03 were reported as 86 per cent., placing the council in the bottom three of all councils.

Customers experienced problems with the council's benefits service, with almost a third of all calls being abandoned unanswered, and customers being asked to supply evidence to support a claim more than once.

The report finds that the quality of the council's counter-fraud investigation work was very effective and it was applying the full range of sanctions in line with its policies. All benefit fraud investigations staff were trained to professional standards.

The council was committed to the recovery of benefit overpayments and had a recovery team within the benefits service. However, many overpayments were caused by the council not processing reported changes of circumstances promptly, and delays in the adjudication of fraud overpayments. The lack of procedural guidance and management checking meant the council had no assurance to the accuracy of overpayments and recovery work.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Disability Rights Commission

The Secretary of State for Work and Pensions (Mr. Andrew Smith): The Disability Rights Commission's annual report and accounts 2003–04 have been published today and laid before Parliament. The DRC's annual report of its activities in 2003–04 details considerable success in its work to eliminate discrimination against disabled people; promote equal opportunities; encourage good practice and keep the working of the Disability Discrimination Act and the DRC Act under review.

Remploy

The Parliamentary Under-Secretary of State for Work and Pensions (Maria Eagle): Remploy's achievement against its targets set by Government for 2003–04 is in the table.

	Target	*Achievement*
Gross margin—the Company will achieve gross margin of £55 million	£55 million	£54.4 million
Progressions from Remploy factories and interwork to open employment	1,650	1,408
Average cost of a supported employee	£10,400	£11,095
Employee development time	5 per cent.	7.8 per cent.

Remploy will publish its annual report and accounts in the autumn giving further detail of its performance throughout 2003–04. Copies of the annual report and accounts will be placed in the Library.

Agency Annual Reports and Accounts

The Secretary of State for Work and Pensions (Mr. Andrew Smith): I am pleased to announce that the Department for Work and Pensions has today published the 2003–04 annual reports and accounts for three of its executive agencies: Jobcentre Plus (HC 909), The Pension Service (HC 722) and Appeals Service (HC785). Copies have been placed in the Library.

SCOTLAND

Commission on Boundary Differences and Voting Systems

The Secretary of State for Scotland (Mr. Alistair Darling): Following my announcement on the setting up of the Commission on Boundary Differences and Voting Systems, *Official Report*, 9 February 2004, Column 1150–51, I can now announce the members of the commission. These are as follows:

Professor Sir John Arbuthnott	Chairman of the Greater Glasgow NHS Board and Former Principal and Vice Chancellor of the University of Strathclyde
Mr. Adam Bruce	Director, McGrigors Public Policy, Edinburgh
Professor Mike Donnelly	Professor of Management, University of Paisley
Mr. Donal Dowds	Divisional Managing Director, BAA Scotland and USA
Mr. John Keggie	Self-employed businessman. Former Deputy General Secretary, CWU Postal
Mr. John Lawrie, OBE	Former investment manager. Former Chairman, Scottish Liberal Party
Councillor Alison Magee	Convenor, Highland Council
Mr. John Mc Cormick	Former Controller, BBC Scotland
Dr. Nicola Mc Ewen	Lecturer in politics, University of Edinburgh
Ms Mary Pitcaithly	Chief Executive and Returning Officer, Falkirk Council
Mr. Mike Russell	Freelance journalist and broadcaster. Former MSP for South Scotland

The Office of the Commissioner for Public Appointments was fully involved in the process of appointment.

The commission will start its work very shortly and is expected to report to me and the First Minister in about 18 months.

TRANSPORT

Night Flying Restrictions

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): I announced on 15 January 2004, *Official Report*, columns 44–46WS that, following consultation last year, we had decided to continue the present night restrictions regime at Heathrow, Gatwick and Stansted until the end of the summer season 2005 (30 October 2005). This was to allow us time to consider comments received in response to the question about the appropriate review cycle in the consultation paper "The Future Development of Air Transport in the United Kingdom: South East", and the wider policy context, before we consult on a new night restrictions regime for those airports, to take effect from 30 October 2005.

We intend to carry out the consultation on the new regime in two stages: we are publishing the consultation paper on stage one today. The consultation paper is rather different from previous consultations on night restrictions for Heathrow, Gatwick and Stansted. The paper sets out the general background to the whole of the consultation and our intention that the next regime should apply for six years, to the end of the summer season 2011. By that time the 5th Terminal at Heathrow will have been in operation for about three years and the opening date for a 2nd runway at Stansted (if planning permission is granted) should be known.

The consultation paper also includes:

- a statement of our broad aims for the night restrictions at Heathrow, Gatwick and Stansted and an invitation to suggest environmental objectives and specific noise abatement objectives for each of those airports;
- detailed proposals relating to the classification of aircraft, the main focus of this first stage of the consultation,
- further background information and extended preliminary consultation on some other aspects of the night restrictions regime; and
- an explanation of how and when we shall carry out assessments to comply with Directive 2002/30 of the European Parliament and of the Council (implemented into UK law by The Aerodromes (Noise Restrictions) (Rules and Procedures) Regulations 2003—SI No.1742 of 2003) and also a Regulatory Impact Assessment.

The issues relating to the way aircraft are classified for night restrictions purposes need to be resolved in stage one so that the effects of different options for the length of the night quota period, the size of the noise quotas and movement limits and the ratios between them, can each be assessed properly in stage two.

At present, aircraft are classified according to the Quota Count (QC) system that was specially designed for the night restrictions at Heathrow, Gatwick and Stansted and introduced in 1993. The QC classification system is based on aircraft noise certification data (determined in accordance with the requirements of the International Civil Aviation Organisation (ICAO), and we propose to retain it.

The consultation paper on the one year extension to present restrictions referred to the findings of a technical review[1] which used data collected in normal operating circumstances to verify the QC classification of aircraft types. The results show that most aircraft currently operating at night at Heathrow, Gatwick and Stansted have operational noise levels that accord with their present classification. To the extent that the study highlights differences between observed operational noise and ICAO standards, the differences have been brought to the attention of the international technical

[1] Quota Count Validation Study: Noise Measurement and Analysis: ERCD Report 0205.

experts currently examining ICAO noise certification requirements. We believe in and support the international system of noise certification. We are pressing for the certification requirements to be updated, to reflect modern operating procedures and conditions, and to be made more rigorous.

Article 4(4) of Directive 2002–30 and Regulation 5(3) of SI No. 1742 preclude the use of any system of noise classification other than that based on ICAO noise certification data. It follows that, although the UK (and other Member States) may choose how to use ICAO data in imposing operating restrictions, it has no discretion to substitute measurements of operational noise as an alternative to the noise certification data. That would have the effect of decoupling the classification of the aircraft concerned from their noise certification data. We are, therefore, not consulting on this issue.

If we retain the QC system it is still possible to modify or extend it provided the classification remains based on noise certification data. Changes arising from earlier commitments and technical studies that we are considering taking forward are:

whether to remove the weight limit on jet aircraft able to qualify as exempt but, at the same time, to introduce a new QC/0.25 band;

whether to retain the minus 9 EPNdB adjustment for arrivals which takes account of the difference between the noise impacts of arrivals and departures;

whether to prohibit QC/4 aircraft from being scheduled or from operating in the present night quota period.

These are the key issues for this first stage of the consultation. They are explained in more detail in section 7 of the consultation paper.

The consultation paper also contains information to meet the new regulatory requirements established by Directive 2002/30/EC and SI 2003 No 1742, including data that will be used in stage two as the basis against which to compare the effects of proposed changes to the night restrictions regime. The data will also feed into the draft Regulatory Impact Assessment that we shall provide at stage two. All consultees are invited to include in their responses to this first stage of the consultation any data that they wish to have taken into account when we produce those draft assessments for stage two.

The consultation will close on 29 October. Copies of the consultation paper are available in the House Library. All responses will be taken into account and reflected as appropriate in the stage 2 consultation paper and related assessments.

TREASURY

National Statistics

The Financial Secretary to the Treasury (Ruth Kelly): The National Statistics annual report has been published today. A number of copies of the report have been placed in both Libraries of the House. The report can also be obtained free of charge on the National Statistics website at: www.statistics.gov.uk/about/national_statistics/documentation.asp.

Office for National Statistics

The Financial Secretary to the Treasury (Ruth Kelly): The Office for National Statistics annual report and accounts for 2003–04 are being laid before Parliament today. They contain an assessment of how the Office for National Statistics performed against its key targets in 2003–04. Electronic copies are freely available on the National Statistics website and a number of copies have been placed in the Libraries of both Houses.

Spending Review (Regional Priorities)

The Economic Secretary to the Treasury (John Healey): "2004 Spending Review: Meeting Regional Priorities", is being published today and copies are available in the Libraries of the House.

This document meets the Treasury's commitment to set out how the 2004 Spending Review, announced to Parliament on 12 July 2004, responds to the issues and priorities identified in the regional emphasis documents jointly prepared by the Government office, regional development agency and regional chamber in each English region.

The document reaffirms the Government's commitment to improving regional economic performance. It summarises the next steps the Government is taking to ensure that the evidence base supports the Government's regional policy agenda, and sets out the SR04 response to input from the regions as well as plans for devolving further resources and responsibilities in every region.

Written Ministerial Statements

Thursday 22 July 2004

INTERNATIONAL DEVELOPMENT

Southern Africa (Food Crisis)

The Secretary of State for International Development (Hilary Benn): There continue to be significant humanitarian needs in Southern Africa, but the widespread humanitarian crisis that began in 2001 has eased. The countries with the most acute needs are Lesotho, Swaziland and Zimbabwe. Since 2001, my Department has provided humanitarian assistance totalling over $136 million for the six countries covered by the UN consolidated appeals for Southern Africa—Zimbabwe, Zambia, Malawi, Mozambique, Lesotho and Swaziland.

Total availability of the cereals harvest in the region, including South Africa, is forecast to be around 22.7 million metric tonnes this year. This is around the same level as the past five year average for the region. Late rains and increased plantings have helped to increase production levels in Mozambique and Zambia in particular, while output in South Africa is slightly down on last year. Zambia has overtaken South Africa as the biggest regional source of grains for WFP programmes in Southern Africa this year. However, production in Malawi, Lesotho and Swaziland has declined compared to last year; and throughout the region, many poor people are unable to secure enough food regardless of the national or regional production level.

The UN has recently released the latest crop and food supply assessments for Angola, Lesotho, Malawi, Mozambique and Swaziland. The biggest shortfall is again expected to be in Zimbabwe. The Government of Zimbabwe's refusal to allow the UN to complete its assessment in the country makes it difficult to quantify food aid needs, but the Government's forecasts of a bumper harvest are not taken seriously by the main agencies working there. The cereal shortfall after domestic production in Zimbabwe is likely to be in the region of around 600,000 to 1 million metric tonnes. Despite claims to the contrary, the Zimbabwe Government is expected to import cereals to cover this shortfall although it is difficult to say how much of the gap they will be able to cover. Pockets of extreme vulnerability are likely to remain beyond the period of the UN Consolidated Appeal (which ends in December), particularly among socially marginalised groups.

DFID is discussing humanitarian needs with the UN in order to prepare for periods of greater need over the next 10 months. We will respond to further funding appeals in close co-ordination with the Vulnerability Assessment Committees operating in the region.

Zimbabwe

DFID has spent £67 million in humanitarian assistance to Zimbabwe since September 2001. DFID's support for humanitarian relief will be funded through a protracted relief programme worth £18 million over the next two years. This will work with NGOs to provide support to approximately 1.5 million of the poorest households in the country, particularly those affected by HIV/AIDS. The programme will provide targeted food aid, low-cost agricultural inputs and rehabilitation of water points support to stop people falling into acute distress.

Zambia

Although Zambia is expecting a good cereal harvest this year, Zambians remain vulnerable due to risks associated with access to food, HIV/AIDS and adverse economic conditions—factors that are common throughout the region. DFID recently began a £10 million programme supporting CARE International to help some of the most destitute and poorest groups in Zambia manage these risks more effectively and are supporting the Government's efforts to establish a vulnerability monitoring system in the country.

Mozambique

In Mozambique, DFID's poverty reduction budget support programme has allowed the Government of Mozambique steadily to improve its disaster management capacity and end the previous pattern of annual emergencies. We continue to support targeted food aid and nutritional supplementation programmes as well as seed and input fairs in Mozambique, a method that gives farmers their choice of appropriate agriculture inputs while supporting the private sector and local economies.

Malawi

In Malawi, we are working with the UN to support school feeding programmes to feed over 100,000 pupils in five districts. In addition, through the Malawi Social Action Fund, DFID will provide £4.95 million to vulnerable people through a "cash-for-work" programme from which 100,000 households are expected to benefit.

Swaziland and Lesotho

In Swaziland and Lesotho, we continue to support targeted food aid programmes through the World Food Programme and supplemented by support for seed fairs with FAO. We are also supporting nutritional monitoring work in Lesotho. We are spending £2 million in Lesotho to support the Government's food security priorities as part of the Poverty Reduction Strategy process. This will include the establishment of a national food security policy, which will be aimed at sustaining and promoting livelihoods.

Longer-Term Response

In response to the International Development Select Committee's report of March 2003, DFID is working with Governments, the UN and the NGO community to improve our understanding and response to the problem of food insecurity in Southern Africa. We have produced a regional hunger and vulnerability strategy which outlines the regional dimensions of food security in the region and forms the basis of a regional programme of support, which is currently being designed.

We are also working with the regional UN office in Johannesburg to encourage better joint programming among UN Agencies and NGO partners in the region. And we are supporting the vulnerability assessment committees in Lesotho, Malawi, Mozambique, Swaziland, Zambia and Zimbabwe so that they can better track vulnerability trends and allow countries and the international community to respond more effectively.

Ghana

The Secretary of State for International Development (Hilary Benn): Ghana successfully reached completion point under the heavily indebted poor countries initiative (HIPC) on 13 July 2004, becoming the 14th country to do so.

Under the arrangements agreed when Ghana applied for HIPC status, Ghana will have its debt reduced in net present value terms by $2.2 billion. In addition, many bilateral creditors have indicated their intention to provide additional relief beyond the enhanced HIPC initiative (estimated to total about US$500 million in NPV terms). Between 2004 and 2013, Ghana could save approximately US$230 million annually in debt service costs.

Debt relief, together with bilateral assistance beyond HIPC relief, will lower Ghana's debt-to-export ratio to 84 per cent. and its debt-to-government revenue ratio to 130 per cent. in 2004. It is estimated that Ghana's debt will remain sustainable (by HIPC definitions) for a wide range of scenarios covering the next 20 years.

Ghana applied for HIPC status in 2001 with the strong encouragement of the UK, and in particular of my right hon. Friend the Member for Birmingham, Ladywood (Clare Short) then Secretary of State for International Development. Since then the Government of Ghana has begun to implement its poverty reduction strategy, maintained sound macro-economic management, and undertaken some important structural reforms as agreed at decision point.

Completion point is good news for Ghana, and an opportunity to move further and faster with its poverty reduction programmes.

DEFENCE

Reserve Forces

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): I am publishing today, a consultation document setting out proposals to update the financial assistance arrangements for reservists who are called out for permanent service and their employers.

The current arrangements are set out in statutory instrument 1997, Number 309. The Government fully recognise that it is important that reservists are financially secure when called out. We are equally aware of the need to avoid placing a reservist's employer at a financial disadvantage during that period. Therefore, as announced in the Defence White Paper of 2003 and which I restated to the House on 13 May, these arrangements are being reviewed in the light of our experiences in military operations.

The consultation document will be given a wide circulation, which will include the reserve forces' and cadets' associations, various bodies representing employers, the Trades Union Congress, the British Medical Association, the British Dental Association and other interested parties. The closing date for responses is 15 October 2004.

Copies of the consultation document will be in the Library of the House and will also be available on the Ministry of Defence website, at: http://www.mod.uk/consultation/reservists.htm

Armoured Vehicle Training Service

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): I am pleased to announce that the landmark training consortium has been chosen as the intended preferred bidder for the Ministry of Defence's armoured vehicles training (AVTS).

The AVTS project aims to deliver live and synthetic armoured fighting vehicles training for Britain's armed forces through a private finance initiative (PFI). The service is planned to last for 30 years and covers training in the UK and Germany, as well as refresher training for troops deployed on operations.

In line with the Ministry of Defence's announcement yesterday, AVTS forms part of the policy to modernise defence outlined in the recent defence White Paper. The service will exploit new technologies and invest in a flexible and modern training service that will help our Armed Forces maintain the battle-winning professionalism they displayed recently in Iraq.

PFI offers the opportunity for enhanced training capability faster and cheaper than could be achieved through a conventional procurement. The MOD will now engage with landmark training to assess if a satisfactory, affordable, value for money deal is achievable. Final decisions will not take place until the negotiations have been satisfactorily concluded.

HOME DEPARTMENT

Managed Migration Review

The Secretary of State for the Home Department (Mr. David Blunkett): As part of the top to bottom review of immigration, the Government have already announced a number of measures to address abuses of the managed migration routes. This statement provides details of additional measures that we intend to bring forward. There will be further announcements in due course.

As part of this package, my right hon. Friend the Secretary of State for Education and Skills recently announced plans to establish a register of genuine education providers, by the end of the year. In the meantime we have continued our programme of visits to suspect colleges. To date we have visited 672: 178 (26 per cent.) were genuine; 195 (29 per cent.) were not; and 299 (45 per cent.) will require further investigation. All applications in respect of institutions found not to be genuine are now being refused.

Further detailed work on student applications and routes of potential abuse have raised concerns about the large numbers of overseas nationals switching in-country to the student category, often for lower level courses.

I have therefore decided to prohibit switching into the student category for anything other than degree level courses. Visa nationals are already prohibited from switching: this will place non-visa nationals in a similar position.

Genuine students wishing to study on courses below degree level will therefore need to seek entry clearance overseas. Those who intend to study but have not finalised their arrangements may use the prospective student category.

A related problem has been identified with overseas students who take a succession of short courses at a low level and demonstrate no clear plan of study. I have therefore decided to reduce the overall time that may be spent on such short courses below degree level to a maximum of two years.

Arrangements are in hand to bring these changes in to effect from September.

I am also announcing changes that will restrict further the circumstances in which those admitted to the United Kingdom in a temporary category will be allowed to switch into employment routes.

My hon. Friend the Minister for Citizenship and Immigration announced on 19 May that those admitted under the sectors based scheme (SBS) and seasonal agricultural workers scheme (SAWS) would no longer be allowed to switch into work permit employment. I am now also making further changes to the immigration rules which will mean that only those who are present in the United Kingdom as work permit holders, graduated students, working holidaymakers, postgraduate doctors, dentists and trainee general practitioners may switch into the high skilled migrant programme (HSMP) and innovator categories. Switching from most temporary categories into work permit employment, HSMP and the innovator category will therefore only be allowed in exceptional circumstances. The changes will come into effect on 1 October 2004.

These measures will help to ensure that the separation of temporary and permanent migration routes, which is necessary to an effective immigration control, is preserved. It is also desirable that switching policy should be clear and transparent.

These measures will not prevent UK employers from recruiting overseas workers with skills that they need. It will simply mean that those currently in the UK in a temporary category will normally need to return to their country of residence and seek entry clearance to come to the UK for employment.

The Government is determined to ensure that the benefits of managed migration should be realised, as well as limiting the scope for abuse of the system.

Sir Gareth Roberts' review—"The Supply of People with Science, Technology, Engineering and Mathematics Skills"—highlighted the fact that the UK was suffering from a severe shortage of physical science, engineering and mathematics students at university and skilled workers in the labour market. He said that the shortage could do serious damage to the UK's future growth. In response, the Government have decided that students at UK universities graduating from specific physical science, engineering and mathematics courses should be permitted to stay in the UK for one year following their graduation to take up employment.

I am now announcing the detail of how the new science and engineering graduate scheme will work. The new scheme will be open to undergraduates (at 2:2 level and above), Masters and Doctors who have successfully completed a shortage physical science, engineering or mathematics course, as defined by the Secretary of State for Education and Skills. The eligible courses will be reviewed by the Department for Education and Skills on an annual basis. The list of eligible courses for the first year of this scheme is annexed to this statement.

We want to attract individuals with skills in these shortage areas to the UK. We expect that individuals who do not initially find employment in their chosen field will successfully find work in their sector within the one-year period of the scheme. If an individual can not meet the requirements for work permit employment, or can not meet the requirements to switch into another of our managed migration schemes, they will be required to leave the United Kingdom once their one year on the science and engineering graduate scheme is over.

We will be making the changes required to the Immigration Rules to implement this scheme in October. It will be open to this year's graduates.

Further to my statement on 17 June about Ken Sutton's report on the operation of the European Association Agreements in Romania and Bulgaria, work has been in hand in the UK and at posts overseas to implement the recommendations in Mr Button's report about the procedures and guidance which need to be in place to manage applications under the agreements, and the additional safeguards which need to be in place.

It is now our intention to resume consideration of initial applications, that is for entry clearance and in-country switching (which will be limited under Mr Sutton's recommendations) from 1 September and to resume a service on further leave to remain and indefinite leave to remain later in the year.

I am also today announcing changes to the current arrangements for Ministers of Religion. The Government is concerned that those who come to the United Kingdom to serve as ministers or religion should understand and respect the community in which they teach and work. I am therefore making changes that take account of consultations which were carried out in 2002 after publication of the White Paper (secure borders, safe haven) and discussions held during June and July this year with faith representatives. Under the changes we will be bringing into force, those seeking entry as a Minister of Religion will be required to demonstrate that they have a basic command of spoken English by providing an International English Language Testing System (IELTS) certificate at the "limited user" level (Level 4). We intend to raise the requirement to level 6 spoken and written English (competent user) after an interim period of two years. Missionaries, Members of Religious Orders (i.e. monks and nuns) and preachers visiting the UK on a religious tour will not be expected to undertake an English language test before entering the UK.

I will shortly be laying before Parliament the proposed changes to the immigration rules that will allow the English language requirement to be introduced. I envisage the new requirement will come into force at the end of August.

For people with existing English skills—for example, those educated in an English speaking nation—discretion will be applied to allow entry where evidence is provided that an individual speaks competent English. These requirements will be set out in the immigration rules for all those seeking to enter the United Kingdom as a Minister of Religion as well as those switching in-country.

We are also amending the immigration rules formally to permit in-country switching to Minister of Religion status, with certain limitations. These include that the applicant is legally entitled to be in the United Kingdom as a student or through any other managed migration route; that they have been here not less than one year; and that appropriate evidence is provided of their suitability for the post. This provision will not apply to visitors or asylum-seekers. This was also in the White Paper, which specifically proposed allowing qualified people from overseas to switch their status in-country to fill local vacancies as Ministers of Religion.

During the second half of this year we will be launching a further round of consultations and meetings with faith communities about what further measures might be taken by the Government in collaboration with faith communities to ensure that the pastoral and religious needs of British congregations in a diverse and cohesive society are met. In particular, we will be consulting on whether there would be merit in introducing religious qualification requirements for those seeking admission as a Minister of Religion. Work will be undertaken with United Kingdom faith communities to identify what skills and qualifications a successful minister needs, with a view to developing standards or accredited qualifications that applicants for the Minister of Religion category must meet. We will look to faith communities to tell us what the requirements should be. In addition the Government is proposing to invite views on the proposal that at the point at which a Minister of Religion from abroad applies for an extension of stay, usually after their first year in this country, they should be asked to undergo an assessment of their civic knowledge and the level of their community engagement. We will therefore be consulting faith communities about the elements of such an assessment and arrangements for making training or tuition available.

Further announcements will be made in due course.

First Degree Graduates Course List

Principle Subject Heading	HESA Code
# Pre clinical medicine	A1
# Pre clinical dentistry	A2
# Biology	C1
# Botany	C2
# Biochemistry	C7
# Food Science	D4
# Other Agricultural Subjects	D9
# Chemistry	F1
# Materials Science	F2
# Physics	F3
# Geology	F6
# Environmental Science and other physical sciences	F9
# Statistics	G4
# Other Mathematical Sciences	G9
# Balanced combinations with Mathematical sciences excluding	GZ

Charity Commission

The Parliamentary Under-Secretary of State for the Home Department (Fiona Mactaggart): I am today announcing that the Charity Commission will be publishing their Department report for 2004 on 23 July. Copies of the report will be available in the Library.

Parole

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): The Criminal Justice Act 2003 introduced important changes in relation to the release of certain life sentence prisoners and extended sentence prisoners. In particular, the authority for determining the release of tariff-expired mandatory life sentence prisoners transferred from the Secretary of State to the Parole Board in December 2003. This followed the earlier decision by the European Court of Human Rights in the case of Dennis Stafford that a court-like body should determine the release of such prisoners. As a result of these changes, the Parole Board rules 1997 have been amended, as have certain related directions to the Parole Board made under the Criminal Justice Act 1991which have also been extended to cover all types of life sentence prisoners.

Parole Board Rules

The new Rules will address:

the arrangements under which Parole Board panels are appointed to consider the cases of tariff expired life sentence prisoners and extended sentence prisoners;

the procedural arrangements for panel consideration of such cases both on the papers and at oral hearings;

the information and reports to be provided by the Secretary of State and the evidence to be supplied by the prisoner, and

the arrangements for witnesses and observers to attend the hearing.

The rules will apply for the first time to Parole Board reviews for tariff-expired mandatory life sentence prisoners as well as to all other existing lifers to whom the previous rules applied. What this means in practice is that the new arrangements will provide for all tariff expired lifers to have their cases considered initially "on the papers", and, if not satisfied with the outcome of that paper panel decision, at a further oral hearing on request. The Government are persuaded that these new arrangements will be just as fair to all parties involved as the previous arrangements, and will have the added advantage of enabling the Board to deal with cases more efficiently and effectively.

The rules also provide for similar arrangements to apply to the review of the continued detention of recalled extended sentence prisoners.

The other major change to the rules is that they will now empower the Parole Board panels to call witnesses to oral hearings in their own right. Previously, panels have tended to rely on either party to call witnesses. This is in line with a recommendation of the comprehensive review of parole and lifer processes on which I have reported to the House previously.

Directions

Amendments have also been made to the Secretary of State's directions to the Parole Board on the release and recall of mandatory life sentence prisoners and their transfer from closed to open conditions. The amended Directions will, for the first time, apply to all lifers, not just mandatory lifers. They have been designed to reinforce the importance of risk assessment and they will set out more clearly, the factors that panels are expected to take into account in reaching decisions on a lifer's risk to the public.

The Parole Board have been extensively consulted on the content of the rules and directions and the rules have also been discussed with prisoners' legal representatives.

The new rules and directions come into force on 1 August 2004. Copies of the rules and directions have been placed in the House of Commons Library.

Immigration and Nationality Protectorate

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I am today placing in the Libraries of both Houses a copy of the annual report by Mary Coussey, the race monitor appointed in respect of the Home Office's Immigration and Nationality Directorate under the terms of the Race Relations (Amendment) Act 2002. We will be studying the report carefully and I will publish my reply in due course.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Single Farm Payment

The Secretary of State for Environment, Food and Rural Affairs (Margaret Beckett): I am announcing today further measures concerning the implementation

of the decoupled single payment in England. These include measures to promote more environment-friendly and sustainable farming, to go alongside the reduction in red tape and boost to farm incomes that CAP reform will deliver.

The CAP reforms agreed last year were a major advance which will encourage an improvement in the economic and environmental performance of English agriculture. The reform adopts a new deregulatory approach to farm support, by decoupling agricultural subsidy from production and simplifying the application process for farmers. Ten major CAP payment schemes will be replaced by one new single payment—considerably reducing the administrative burden for farmers. And the greater freedom to farm provided by the reform will offer opportunities for the industry to enhance incomes.

We have consulted widely on the key aspects of today's announcement. I believe the measures I have decided upon represent the best balance of interests, taking account of the all the representations I have received. Further decisions will be announced over the coming months.

As part of the reform, farmers in England sharing some £1.7 billion of payments under the CAP will have to meet new cross-compliance standards designed to protect the environment, animal health and welfare, public health and plant health. Following public consultation and discussions with the range of stakeholders, I have decided upon a series of practical cross-compliance measures that will set a new baseline standard for environmental performance for agriculture. These are a relatively light requirement, representing a mixture of common-sense farming practice and support for existing legislation, which should help drive an improvement in overall performance and deliver public benefit. They will help contribute to a number of the Government's objectives set out in the strategy for sustainable farming and food by protecting soils, wildlife habitats and the landscape. A description of these measures (which are distinct from those included in agri-environment schemes) may be found on the DEFRA website and my Department will be sending a communication to all farmers shortly.

The possible cross-compliance measure which has most divided opinion was whether farmers should be required to leave uncultivated two metre field margins alongside hedges and ditches, as an alternative to payment for these measures through the new entry level stewardship (ELS). After careful reflection I have decided that the way forward is to use both cross-compliance and ELS in a complementary way. For cross-compliance purposes farmers will be required to protect hedges and ditches by not cultivating, fertilising and spraying within two metres of the centre line (or a minimum of one metre from the top of the bank in the case of ditches). In addition, farmers will be able to receive payment under ELS for positive management of their hedges, as well as for establishing and managing a range of buffer strip options next to the cross-compliance protection zone around hedges and ditches. Since one of the qualifying conditions for the hedgerow management options in ELS will be that farmers leave a minimum uncultivated strip, those farmers entering hedges into ELS will largely be meeting their cross-compliance requirements in this respect. I am aware there are particular issues about how we accommodate those farmers who have retained small fields and those who want to plant new hedges. We will discuss with the industry and key stakeholders the practical details, so that we can announce the specific arrangements in the early autumn. Finally, I intend to implement this particular cross-compliance measure from the start of the main cropping cycle in July 2005, recognising that farmers have already made plans for the coming season.

Cross-compliance measures will be enforced in a cost-effective and proportionate way that avoids placing unnecessary burdens on farmers. Full use will be made of existing inspections where possible, with the Rural Payments Agency working in close partnership with the specialist agencies to ensure a fully co-ordinated approach. This will be developed in line with other departmental initiatives such as the whole farm approach, which is designed to streamline farmers' interactions with Government.

Close partnership working in order to join up public services at the point of delivery to our customers—whether to farm businesses or other customers—is a key element of the reforms I announced yesterday as part of our Rural Strategy 2004. The new Integrated Agency will be a future partner of the Rural Payments Agency, both in these arrangements for delivering cross-compliance, and in providing environmental grants through the agri-environment schemes.

The cross-compliance measures which have been selected will be complemented by those available through agri-environment schemes in England, which are designed to deliver environmental enhancement and positive management for the public good. A new scheme, environmental stewardship, is being introduced in 2005 and this includes the new entry level stewardship (ELS). The ELS will be open to applications from all farmers, and will provide payments to enable farmers to deliver what society increasingly demands: the sustainable management of our countryside as a whole. This expansion will be funded partly through a deduction (known as "modulation") from the new overall CAP single payment pot. Modulation takes two forms a compulsory element levied at a uniform rate in all member states and the possibility of an additional national rate, at the discretion of the member state. I have decided to take advantage of the option for additional national modulation in England, subject to detailed EU rules being formally adopted early in the autumn. Modulation will be levied at a rate of 5 per cent. in 2005 and 10 per cent. in 2006, when we expect take-up of ELS to be considerably higher. These amounts include both the compulsory EU element and the additional national element. The combined modulation rate to apply in 2005 will therefore be very similar to the modulation rate of 4.5 per cent. previously scheduled to apply in that year. The funds raised through modulation in these years will be matched by funds from the Exchequer, doubling the amount of money returned to the rural economy.

No decisions have yet been taken as to the rates of modulation and of Exchequer match funding that will apply in England from 2007. These will depend on a number of factors, including future EU financing

arrangements for rural development measures and take-up of the ELS. But, based on current estimates, the overall rate of modulation may rise further in future years.

On 22 April I made a written statement concerning the determination of the regional boundaries in England for the purposes of the single payment. I can now confirm that farmers will be able to make representations against the location of the Moorland Line on their holdings. The arrangements will be operated by officials in the Rural Payments Agency (RPA) and Rural Development Service (RDS), and farmers unhappy with the results of their representations will be able to make an appeal through a formal appeals procedure. The process will begin during August, when application forms and guidance notes will be available in an information pack from the RPA. Farmers will be able to ask for a pack by ringing an RPA helpline. Under the flat rate payment system we have adopted in England, set aside rates must be calculated using a method set out in European legislation concerning the single payment. I can now announce that the percentage of land to be set aside in the coming year in each of the English regions is as follows:

8.0 per cent. outside the upland severely disadvantaged area (SDA)

1.3 per cent. within the non moorland SDA

There will be no requirement to set aside land in the moorland SDA. These rates are lower than have applied in the past, but a greater area of land will attract a set aside obligation from 2005, thus approximately maintaining the area of land under set aside overall.

Information concerning the management conditions that will apply on set aside land will be made available shortly and a communication will be sent to all farmers.

The National Reserve is the mechanism by which certain defined categories of applicant may apply for subsidy entitlements for which they would not qualify through the normal process. A range of decisions relating to the reserve are required to be taken at UK level and some others have UK wide implications. As the Northern Ireland consultation process has only just finished and full consideration of the results has not been completed, it is not possible to make an announcement at this stage. We will be discussing the issues further throughout the summer and hope to be in a position to make an announcement shortly after the recess.

Another issue that will be given further attention over the coming weeks is how to apply the new scheme in respect of common land. My officials will shortly discuss a potential solution with stakeholders.

Further decisions concerning implementation of CAP reform will be announced in due course. The RPA is currently in the process of contacting those farmers with historic subsidy records to inform them of the crop area and livestock numbers that will be used to calculate the historic entitlement and resolve any queries. If a farmer is unhappy with the outcome of a representation against a decision concerning this data, he or she will be able to make an appeal through a formal appeals procedure. Also during the summer the RPA will provide an opportunity for farmers who have not yet registered their land on the rural land register to do so. This exercise is intended to benefit farmers who consider that they may be entitled to the flat-rate element of the single payment, and/or would like to apply for environmental stewardship. In Spring 2005 the RPA will despatch application forms to farmers for the single payment. The deadline for completed application forms to be returned to the RPA will be 15th May 2005. In the summer of 2005, when the aggregate area of land applied upon is known, we will advise applicants of entitlement amounts. The window for making single payments to farmers runs from 1 December 2005 to 30 June 2006.

Fisheries

The Parliamentary Under-Secretary of State for Environment, Food and Rural Affairs (Mr. Ben Bradshaw): We have been concerned for a number of years about levels of bycatch of common dolphins in the bass pelagic pair trawl fishery prosecuted off the south and south west coasts of England. I am also aware of the keen public interest in this issue which has been the subject of an EFRA Select Committee Report. We have been committed to making progress on reducing this bycatch and have carried out considerable research to identify the fisheries concerned and to seek mitigating measures which would allow fisheries to continue while at the same time protecting dolphins.

We have reluctantly concluded, in the light of findings from our most recent research, that current levels of bycatch in this fishery may constitute a threat to the common dolphin population and that Community action to address this problem is needed urgently. Our research this season observed 169 dolphin casualties. Across the UK fleet as a whole, and including the larger French element of the fishery, this constitutes a serious problem. It has also become clear from our research that mitigation methods are not currently sufficiently developed to reduce bycatch to more acceptable levels. Until such a time as a proven means of reducing bycatch has been identified, we believe that other more radical options to reduce bycatch in this fishery are now needed.

There is a clear need for action on a community level. This is because the fishery is prosecuted by a significantly larger number of vessels from other member states. This is why the UK has for many years, in the light of our research findings, pressed for meaningful action at an EU level. I was pleased that an EU regulation to reduce the incidental bycatch of small cetaceans was adopted recently, but this will not provide an early solution to the problem we now face in the light of research we now have available.

I therefore intend to request the European Commission to take action under Article 7 of Council Regulation 2371/2002. This provides for the introduction of emergency measures which could run for six months and be renewed for a further 6 months, allowing 12 months for more permanent protection to be put in place. We will be asking the European Commission to take action to close the fishery for the forthcoming season whilst permanent measures are considered. I look forward to the Commission's response to our case for emergency action. If it is not accepted then I will consider other options including restricting the number of vessels allowed into the fishery and seeking a ban on pair trawling within 12 miles of the UK.

Revised Large Combustion Plants Directive

The Secretary of State for Environment, Food and Rural Affairs (Margaret Beckett): The Government have listened to and take seriously the concerns that have been expressed by the various industrial sectors affected about the possible impact of the LCPD on jobs and security of energy supply. In view of this, Defra jointly with DTI have been carrying out extensive further analysis of all the possibilities that the Directive might offer in order to seek an optimal solution within the framework of sustainable development, in a way that will work for industry without compromising the environmental goals set by the directive.

Our further analysis has shown that a modified approach, drawing on work already done on the National Emissions Reduction Plan (NERP) and Emissions Limit Value (ELV) approaches would deliver the desired environmental outcomes in a way that is more cost-effective for business. The Government intend to explore this approach with the European Commission. We will also be holding further discussions with the Commission about the legal definition of a combustion plant which is unclear in the directive.

The LCPD does not come into force until 2008 for pre-1987 plants. Nevertheless, we are very conscious of the need for certainty about the application of EU environmental directives so that industry can plan future investments. Final decisions on the UK implementation approach will be made as soon as possible. We will keep stakeholders informed of developments in the meantime.

HEALTH

Reducing Bureaucracy

The Secretary of State for Health (Dr. John Reid): On 20 May 2004, *Official Report*, column 61WS, I announced the completion of the initial stage of the review of my Department's arm's length bodies (ALBs). I made it clear then that there is considerable scope to improve efficiency and reduce bureaucracy in the ALB sector and I laid down the following parameters for the review:

a 50 per cent. reduction in the number of ALBs;

a saving in expenditure by ALBs of £0.5 billion by 2007–08; and

a reduction in posts of 25 per cent. in the same period.

The next stage of the review has now been completed and decisions have been taken on a reconfiguration of the ALB sector and its functions. Some of these functions provide reassurance to patients about standards in an increasingly devolved health and social care system. Others provide functions that can literally be life saving. The reconfiguration will enhance these essential functions while eliminating overlaps and devolving functions where possible. It will not put the safety and welfare of patients in jeopardy. The changes are summarised below and explained in a report, "Reconfiguring the Department of Health's Arm's Length Bodies", copies of which have been placed in the Library.

I want now to move to detailed discussions with all interested parties about how to implement these changes. Some changes will require primary or secondary legislation and the parliamentary scrutiny that goes with that. Some statutory consultation will be required on specific changes.

Last week, my right hon. Friend the Chancellor of the Exchequer announced the Government's overall plans for releasing resources to the front-line. The ALB review contributes to those plans. It will also lift the burden that the central overhead can place on frontline staff. The way in which we achieve the ALB reductions will be linked to the analysis undertaken for the Gershon efficiency review. The changes I will be making reflect the Prime Minister's wider civil service reform agenda and will also deliver the expectations of the Lyons review on public sector relocation.

The ALB review covered the work of stand-alone national organisations sponsored by the Department to undertake executive functions. Some 38 of these existed in the baseline year of 2003–04, although the review also looked at four prospective ALBs. A list of the bodies can be found in the report. The decisions I have taken so far will reduce the number of ALBs by almost half to 20, in the following four main categories.

Regulation

ALBs in this category regulate, inspect and hold specific parts of the system to account. They often have their own primary powers and extra independence from direction by the Secretary of State.

The Healthcare Commission (whose statutory name is the Commission for Healthcare Audit and Inspection), the Independent Regulator of National Health Service Foundation Trusts and the Commission for Social Care Inspection, will continue to regulate providers and their services. The Healthcare Commission will take on the main role of the Mental Health Act Commission, which will be abolished.

A new Regulatory Authority for Fertility and Tissue will be created to encompass the work of the Human Fertilisation and Embryology Authority and The Human Tissue Authority.

The Council for the Regulation of Health Care Professionals will continue to oversee the statutory health professional self-regulatory bodies and the General Social Care Council will continue to regulate social care workers. The Postgraduate Medical Education and Training Board will take on the role of the Dental Vocational Training Authority, which will be abolished.

The Medicines and Healthcare Products Regulatory Agency will continue to regulate medicines and healthcare products.

Standards

ALBs in this category establish national standards and best practice.

The National Institute for Clinical Excellence (NICE) will take on the work of the Health Development Agency (HDA) in order to link standards work on both the prevention and treatment of ill health. The HDA will be abolished.

Public welfare

ALBs in this category are focused primarily on the safety, protection, well- being and involvement of patients and public.

The National Clinical Assessment Authority (NCAA) will be brought into the National Patient Safety Agency (NPSA) which will also support high quality, independent ethical review of all research that could affect patients. The NPSA will take on the lead national perspective on hospital food, cleanliness and safe hospital design. NPSA will also take over responsibility for the national confidential enquiries from NICE.

The Health Protection Agency (HPA) has taken on functions from the Public Health Laboratory Service and will take on the role of the National Radiological Protection Board under the Health Protection Agency Act 2004. The PHLS and the NRPB are to be abolished. The National Biological Standards Board will also be abolished and its functions taken on by others, primarily the HPA.

The regional functions and staff of the National Treatment Agency for Substance Misuse will be transferred to existing mainstream structures as soon as possible. A further announcement on this will be made shortly. Centrally the NTA will continue in existence until we are confident that a detailed programme of mainstreaming drug treatment within the NHS is successfully in place. A review of progress will take place in 2006 to agree any further action needed to ensure drug treatment is fully mainstreamed into the NHS including agreeing the future of the NTA's national functions.

The Commission for Patient and Public Involvement in Health will be abolished. Patients' forums will remain the cornerstone of the arrangements we have put in place to create opportunities for patients and the public to influence health services. Stronger, more efficient arrangements to provide administrative support and advice to forums will be put in place after consultation. The NHS Appointments Commission will appoint forum members. A clearer quality framework for forum activities in monitoring and reviewing health services will be established and communicated to forums as quickly as possible.

Central services to the NHS

These ALBs provide services involving economies of scale and focused expertise.

A new Blood and Transplant Authority will be created to encompass the services provided by the National Blood Authority and UK Transplant, which will be abolished.

The NHS Litigation Authority (NHSLA) will be reconstituted to oversee the proposed NHS redress scheme and manage the financial compensation element at national level. Further details on how the scheme will operate will be published later this year, and implementation will require primary legislation. The NHSLA will also take on the functions of the Family Health Services Appeal Authority (Special Health Authority) which will be abolished.

The NHS Appointments Commission will be reconstituted as an executive non-departmental public body with wider powers to make public appointments. It will also make appointments to patients' forums and to research ethics committees.

The NHSU is subject to a more detailed study, within the overall ALB Review process, which will be completed shortly. The NHS Modernisation Agency will have most of its budget and staff devolved to the NHS, with a smaller core remaining within the Department for the present.

A new Health and Social Care Information Centre will be created to reduce burdens on the front-line by co-ordinating information requirements across a wide range of bodies. The new centre will retain some of the information-related functions of the current NHS Information Authority and will take on the statistics and information management functions of the Department. The NHSIA will be abolished. To build on the progress and momentum achieved to date, and reflect its sheer scale, the National Programme for Information Technology will become a time-limited executive agency for three to five years and will incorporate the IT functions of the NHSIA.

A new NHS Business Services Authority will be created to replace the NHS Pensions Agency, the Dental Practice Board, the Prescription Pricing Authority and the NHS Counter Fraud and Security Management Authority, all of which will be abolished.

The NHS Purchasing and Supply Agency will be reformed. The role of the NHS Logistics Authority will be market-tested. It is anticipated that the function will be contracted out and that the NHS Logistics Authority will be abolished.

A Dental Special Health Authority will no longer be created.

NHS Direct and NHS Professionals will retain their ALB status for two to three years. In the meantime, we will work with both organisations to consider how they may prepare to transfer to independent status as bodies established on foundation principles to operate in the public interest.

A small core estates team will be brought into the Department and NHS Estates abolished.

Releasing resources to the frontline

In 2003–04, ALBs spent a total of £4.8 billion, including operating costs of £1.8 billion, and employed around 25,000 staff.

The principles outlined in Sir Peter Gershon's efficiency review will be applied to the ALB sector to generate more than £200 million in cash-releasing savings for the front-line, for example by sharing back office services and by carrying out activities more efficiently. No ALB will be exempt from the need to improve efficiency. In addition, £150 to £200 million will be released to frontline control by devolving functions from ALBs. The scope for achieving full cost recovery for regulation will be investigated and taken forward.

The Department's commercial directorate is scrutinising the business processes and procurement activities of many of the central services ALBs to establish the full scope of the efficiencies to be made, especially in relation to the money (about £3 billion) that is spent by ALBs on behalf of frontline

organisations on NHS supplies, temporary staff and litigation services. The commercial directorate's work on the NHS supply chain is already well advanced, suggesting savings of approximately £150 to 200 million in the period to the end of 2007–08.

We are confident that expenditure on ALBs can be reduced by at least £0.5 billion by 2007–08. Savings of this magnitude will be associated with a reduction in the number of posts in the ALB sector of about 25 per cent.

The ALB Review will now move to implementation. Over the next three to four months my officials will work closely with the devolved Administrations, ALBs, staff interests and other stakeholders to draw up implementation plans and to resolve outstanding issues on allocation of functions. These plans will include decision points on new ALB functions and processes, staffing levels, budgets, location and time scales for transfer. A small team in the Department will oversee this process. These arrangements will ensure delivery of the saving of £0.5 billion by 2007–08 and the reduction of posts within ALBs.

Blood Donations

The Secretary of State for Health (Dr. John Reid): My statement on 17 December 2003 informed the House of the first case of possible transmission of vCJD via blood transfusion and the actions taken as a result of this case to protect future blood supplies. I promised then to provide updates on any major changes.

My statement of 16 March 2004 indicated that the committee on the microbiological safety of blood and tissue for transplantation (MSBT) had met at my request to consider whether further measures were needed. The recommendations were to exclude from donating blood anyone who had previously received transfusions of whole blood components since January 1980. These measures were introduced with effect from 5 April 2004.

MSBT met again on 29 June to review experience of these measures. The committee recommended tightening the exclusion criteria for two groups who have similarly received transfusions of whole blood components since January 1980:

previously transfused apheresis donors; and,

donors who were unsure if they had previously had a blood transfusion

Apheresis donors are a small pool of committed donors who make frequent attendances to donate blood, where machine processing removes only certain blood components and the rest is returned to the donor.

When actions were taken in April 2004 to exclude certain donors, neither of these groups were excluded until any potential impact on the blood supply became clearer.

In the light of experience since the exclusions came into effect, MSBT has now advised that these groups can be excluded without adverse impact on the blood supply. These new exclusions will take effect from 2 August.

In a separate development, a second case of possible vCJD prion transmission via blood transfusion has now been confirmed. A patient in the UK received a transfusion of blood in 1999 from a donor who subsequently developed vCJD. Though the patient died of causes unrelated to vCJD, abnormal prion protein has been found in spleen tissue. This patient had a genetic type that differs from that so far found in patients who have developed vCJD.

I understand that a detailed account of the case will be appearing soon in the medical journal *The Lancet*. This new finding was referred to the spongiform encephalopathy advisory committee (SEAC) and MSBT for expert advice. SEAC agreed that this second patient with apparent vCJD infection added to the evidence that the vCJD agent can be transmitted by blood. MSBT concurred with this view, and has advised that no additional public health measures are required to protect the blood supply. This confirms the precautionary approach set out in my statement of 17 December.

Counter Fraud and Security Management Service Accounts 2003–04

The Minister of State, Department of Health (Mr. John Hutton): For the Counter Fraud and Security Management Service, their annual accounts and any accompanying Comptroller and Auditor General report have today been laid before the House of Commons pursuant to section 98(1 C) of the National Health Service Act 1977. Copies have been placed in the Library.

Primary Care Dental Workforce Review

The Minister of State, Department of Health (Ms Rosie Winterton): The Secretary of State's written ministerial statement on 16 July set out the Government's plans for rebuilding national health service dentistry, ensuring better access to NHS dental care and improving oral health in England. The plans included a significant increase in funding and a substantial programme of action to increase dental workforce capacity. These improvements will be made against the background of the move to local commissioning in October 2005.

The views of a wide range of organisations were helpful to us in drawing up our proposals. For example, the British Dental Association and representatives from the NHS and higher education were among those who contributed to the report of the primary care dental workforce review that was completed in 2002. Although time has moved on, the report is important contextual information about the perceived needs as seen in 2002. The report assisted our thinking as we developed the comprehensive plans announced last week. We are therefore publishing the report today. It is available on the Department's website at www.dh.gov.uk/publications. Copies of the report have been placed in the Library.

David Bennett Inquiry

The Minister of State, Department of Health (Ms Rosie Winterton): This statement follows publication of the independent inquiry into the death of David (Rocky) Bennett, and my written statement on 12 February, *Official Report*, column 77WS, which set out the action being taken to deliver race equality in mental health services, and respond to the recommendations of the inquiry.

I wish to inform the House that, further to the reply given to the hon. Member for Gloucester (Mr Dhanda) by my right hon. Friend the Secretary of State for Health on 8 June at column 138, our response to the inquiry will not be available in July, but will be provided later this year.

I want to reassure the House that this delay is because we want to ensure that our response to the inquiry report recommendations can be set alongside our wider programme of action to improve mental health care for black and minority ethnic communities. This will be published in the autumn, following our consultation on the framework in the report "Delivering Race Equality". We need more time to consider the significant issues raised during our consultation on this document. We also want to ensure that we properly address the recommendations of the inquiry report.

In the meantime we must ensure that NHS staff have the skills they need to provide services, without discrimination, for people from black and minority ethnic communities. I am pleased to inform the House that the NHSU will be giving priority to develop and deliver this training for NHS staff, starting with staff in mental health settings.

Further information about progress on the national work we have started and to which I referred in my statement of 12 February is now available. This includes information about the programme of work led by the National Institute for Mental Health to support the development of effective services for people with mental health problems from black and ethnic minority communities; and guidance on best practice to support the safe and therapeutic management of aggression and violence in mental health inpatient settings.

I would like to draw particular attention to the publication yesterday of our Health and Social Care Standards and Planning Framework. It sets out the local action needed to commission services for the public to take forward the NHS Improvement Plan through effective partnership working. It sets out the national framework for PCTs and their partner organisations to take account of different needs and inequalities in their local populations. It commits us to providing national data year on year on the experience of service users from black and minority ethnic communities. It sets out how PCTs should support access to assessment, treatment and care for all those at risk, paying particular attention to the needs of those from black and minority ethnic communities and other groups that may be hard to reach.

I would also like to take this opportunity to reiterate my view that there is no place for racism or discrimination in the NHS. Discrimination, both direct and indirect does exist. It is unacceptable; it contradicts the basic value of equity that is the cornerstone of the health service. We are committed to rooting out racism, tackling the inequalities that exist, and ensuring that the experience of people from black and minority ethnic communities is improved.

[1] Details of the NIMH(E) programme, including key publications, can be found at http://www.nimhe.org.uk/priorities/black.asp. NIMHE's guidance "Developing Positive Practice to Support the Safe and Therapeutic Management of Aggression and Violence in Mental Health Inpatient Settings: Mental Health Policy Implementation Guide" has been developed to support mental health service providers and enable them to review their current policies and procedures relating to education, training and practice in the safe and therapeutic management of aggression and violence. It can be found at http://www.nimhe.org.uk/whatshapp/item_display_publications.asp?id=441

PRIME MINISTER

Interception of Communications Commissioner and the Intelligence Services Commissioner (Annual Reports)

The Prime Minister (Mr. Tony Blair): I have today laid before both Houses the annual reports for 2003 of the Interception of Communications Commissioner, the right hon. Sir Swinton Thomas and the Intelligence Services Commissioner, the right hon. Lord Justice Simon Brown. Some sensitive information has been excluded from the reports of the Interception of Communications Commissioner and the Intelligence Services Commissioner in accordance with Section 58(7) and 60(5) of the Regulation of Investigatory Powers Act.

I am grateful to the Commissioners for their reports and the work that has gone into preparing them.

FOREIGN AND COMMONWEALTH AFFAIRS

Berezovsky and Zakayev

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): Russian citizens Boris Abramovich Berezovsky and Akhmed Iliasovich Zakayev were granted asylum in the UK last year, as is public knowledge.

The grant of asylum to these two persons was made after due assessment by the relevant authorities of their cases and of the UK's obligations under the 1951 UN Convention on refugees and domestic law. They did not enter the UK at the invitation of Her Majesty's Government. A grant of asylum does not imply support from the UK Government for an individual's views, activities or statements.

We take very seriously the requirement for any person granted asylum in the UK to comply with the conditions of the UN convention under which refugees are recognised, and with the provisions of UK law. Recipients of asylum receive cautions not to take part in criminal activities, or activities such as support for or encouragement of terrorist organisations, or activities endangering national security or public order. Where individuals granted asylum breach these conditions we would not hesitate to take action against them and have strengthened the law to enable us to do so more effectively.

Iraq: Export Licence Applications

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): Following consultation with the Foreign and Commonwealth Office and the Ministry of Defence, the Department of Trade and Industry recently approved a further licence to export military list goods to Iraq. The arms embargo against Iraq remains in place under United Nations Security Council resolutions 1483 (22 May 2003) and 1546 (8 June 2004). UNSCR 1483 (2003)

includes an exception for "arms and related materiel required by the (Coalition Provisional) Authority to serve the purposes of this and other related resolutions".

Accordingly, prior to the hand over of power on 28 June and the Coalition Provisional Authority ceasing to exist, Her Majesty's Government considered it appropriate to grant exemptions for the export of military listed goods for use by Iraqi police forces, Ministry of Justice personnel, Ministry of Oil security personnel and Iraqi security forces. The licence is consistent with the consolidated EU and national arms export licensing criteria. Future applications will continue to be assessed on a case-by-case basis against the UN embargo and consolidated criteria, taking into account the circumstances prevailing at the time.

Her Majesty's Government also considers it appropriate to grant a licence for the export of assault rifles and semi-automatic pistols for use by a private security company, contracted to provide support for personnel working under contract with the Iraqi Board of Supreme Audit. The coalition provisional authority (CPA) certified the requirement for these weapons prior to the CPA ceasing to exist on 28 June. The licence is consistent with the consolidated EU and national arms export licensing criteria. Future applications will continue to be assessed on a case-by-case basis against the UN embargo and consolidated criteria, taking into account the circumstances prevailing at the time.

British Council Trustees

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Chris Mullin): Copies on the British Council Trustees' report and accounts for the financial year ended 31 March 2004 have been placed in the Library of the House. During the period the council received £165.5 million grant in aid from the Foreign and Commonwealth Office.

Export Licensing

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): Enhanced statistical information on strategic export licensing will, from July 2004, be released on a quarterly basis, instead of once a year through the annual report on strategic export controls, as at present. The first quarterly report on strategic export controls will be published on the Department of Trade and Industry and Foreign and Commonwealth Office websites: www.dti.gov.ukand www.fco.gov.uk on 28 July. This report will contain information on export licensing decisions taken from January to March 2004.

From now on, statistical data will be published on the FCO and DTI websites three months after the last decision in any given quarter. Until now, decisions taken in one calendar year have been reported in the annual report on strategic export controls in the middle of the following year. Information on the earliest licensing decisions reported in the annual report was not therefore made available until some 18 months later.

From 2004, the annual report, which the Government have a statutory obligation to produce, will summarise information already provided in quarterly reports, as well as describing export control policy developments. It will be produced in hard and electronic copy. The hard copy will include a CD-ROM containing all of the licensing data published in the quarterly reports for that year. The Government intend to publish the next quarterly report, relating to decisions taken between April and June 2004, in October.

The introduction of quarterly reports reflects the Government's commitment to further improve the openness of its strategic export licensing system, which is already acknowledged to be amongst the most transparent in the world.

The Government's most recent strategic export controls annual report was published on 7 June.

CULTURE MEDIA AND SPORT

Independent Review of S4C

The Secretary of State for Culture, Media and Sport (Tessa Jowell): On 3 March this year, I announced the appointment of Roger Laughton, Head of Bournemouth University Media School, assisted by Meurig Royles as Welsh language assessor, to carry out an independent review of S4C.

I am today publishing Mr Laughton's report of his review and copies have been deposited in the Libraries of both Houses. I welcome this very thorough analysis of S4C's current position and the challenges facing the authority in the digital age. The report's conclusions and recommendations raise a number of issues relating to the Government's Digital Action Plan, BBC Charter review and Ofcom's review of public service broadcasting, which will need to be addressed in the context of those initiatives. My Department will liaise with the authority and with other interested organisations to consider Mr Laughton's recommendations in detail and I will notify the House of the resulting conclusions in due course.

Digital Television

The Secretary of State for Culture, Media and Sport (Tessa Jowell): In my statement of 19 May I said that I would report further stages in establishing the plan for switchover. I am pleased to say that much progress has been made in the discussions between the Government, Ofcom, and the public service broadcasters.

While the broadcasters have not reached a full consensus on the optimum timetable, some—including the BBC—have suggested that 2012 may be the most appropriate date for the completion of switchover. This could mean beginning the switching sequence as early as 2007. This would be subject to agreement on a detailed plan, including resolution of the remaining issues raised in the discussions, Ofcom plans to include reference to this timetable in the draft digital licences for Channels 3, 4, 5 and Teletext which they expect to publish for consultation later this summer.

We continue to believe that an ordered process leading to the earliest practicable switchover remains desirable given the advantages to consumers, the broadcasting industry and future growth of innovative new services. We believe that switchover should be broadcaster-led but that the final decision on timetable should balance these benefits against the need to ensure that the interests of the most vulnerable consumers are protected. I have therefore asked Ofcom's independent

consumer panel to consider what measures might be necessary to ensure this protection and to report to me later this year with their advice. We will also take advice from leading charities. The Government's final endorsement of a timetable will be subject to being satisfied that adequate measures are in place to meet this objective.

The BBC, in their 29 June publication "Building Public Value", proposed that 2012 should be the target-date for switchover. The BBC made clear its willingness to be a "leader and coordinator across the industry" and to "take a special responsibility for bringing the final cohorts into the digital television universe". I have asked the BBC how they propose to take this forward.

The Government remains committed to ensuring that switchover is planned and implemented in a way which is platform and broadcaster neutral. Consumers must have clear, unbiased information about what is available on each platform and from each provider so that they can make an informed choice. In particular, people who buy television equipment now should know that switchover will take place during the expected lifetime of television sets bought today. We are therefore engaged with retailers and manufacturers—who also need to plan ahead—to see that good clear information is given to consumers currently planning to buy a television or an item of recording equipment. We expect this information to spread through retail outlets from September, identified by the switchover logo.

As an early step towards switchover, we are proceeding with a technical trial in two villages—Ferryside and Llansteffan—in South Wales. The residents have responded overwhelmingly in favour of taking part in this trial. If, as we expect, this switchover trial is successful, this community will be the first in the UK to go fully digital next spring.

We expect further progress on these matters in the coming months and I will report to the House on material developments as they occur.

CONSTITUTIONAL AFFAIRS

Civil Legal Aid

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): With the agreement of the Secretary of State for Constitutional Affairs, the Legal Services Commission (LSC) has today published a consultation paper entitled "A New Focus for Civil Legal Aid—Encouraging Early Resolution; Discouraging Unnecessary Litigation".

The main theme of the paper is to re-focus the civil legal aid scheme from contested litigation and to encourage early resolution of disputes. With a limited budget, we need to ensure that legal aid funding is targeted on the most needy cases and in the priority areas. The proposed changes are also required to update the LSC's funding code in the light of new initiatives—for example, changes in handling clinical negligence cases and the new Independent Police Complaints Commission. The changes to family legal aid complement the proposals announced in our Green Paper entitled "Parental Separation: Childrens' Needs and Parents' Responsibilities".

The main proposals are as follows:

to restructure the levels of service for private law family cases to encourage the early and amicable resolution of family disputes wherever possible. A new level of service called family help will replace the existing three services, and will build upon the work already done through the FAInS (Family Advice and Information Service). This proposal will be piloted through FAInS providers before full implementation;

to introduce wider powers to refuse funding for divorce (ancillary relief) cases on the grounds that private funding mechanisms may be available, for example, using the value of the assets in dispute;

to introduce stricter controls over multiple and repeat applications in private law family cases and to limit funding to one certificate per client at any time;

to remove from scope low priority categories of case, such as legal help for drafting divorce and judicial separation petitions and changes of name;

to revise the financial eligibility limits to achieve uniform income limits across all levels of service. The upper limit for qualifying for legal representation in court would be reduced, to the (lower) level for legal help, as adjusted for inflation. However, there should be appropriate safeguards and exemptions in place to ensure the most vulnerable applicants are protected;

to remove the current rule which disregards £100k of equity in an applicant's home in assessing financial eligibility for legal aid. Again, there will be exemptions for the most vulnerable clients;

in clinical negligence cases and complaints against the police, a requirement that redress is initially pursued through the appropriate complaints procedure before funding for litigation can be considered.

Copies of the consultation paper have been placed in the Library of both Houses. It is available on the LSC's website: www.legalservices.gov.uk

Court Service

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. Christopher Leslie): The Court Service annual report and accounts for 2003–04 has been laid before Parliament today. This document gives full details of the agency's performance and expenditure for that year. Copies of the report have been placed in the Libraries of both Houses.

The Magistrates' Courts business returns annual report 2003–04 has been laid before Parliament today. Copies of the report have been placed in the Libraries of both Houses.

International Human Rights Instruments

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): My right hon and noble Friend the Secretary of State for Constitutional Affairs has made the following written ministerial statement.

"The Interdepartmental review of international human rights instruments announced on 7 March 2002 by my right hon. and noble Friend the Lord Irvine of Lairg has been concluded.

In the course of the review, the Government has ratified the optional protocol to the United Nations Convention against torture; has signed and ratified Protocol 13 to the European Convention on Human Rights; ratified the Optional Protocol to the Convention on the Rights of the Child, relating to Children in Armed Conflict; and extended the European Convention on Human Rights to the Cyprus sovereign base area. We have decided to accept the Optional Protocol to the Convention on the Elimination of all forms of discrimination against women, which will help us to assess the effects of individual petition to the UN generally. By accepting the Protocol we are also confirming the United Kingdom's commitment to women and equality issues, spearheaded by the Minister for Women, Patricia Hewitt. We will also sign Protocol 7 to the European Convention on Human Rights; ratify chapters A and B of the Convention on Participation of Foreigners in Public Life; withdraw the general reservation relating to immigration entered under the Convention on the Elimination of all forms of discrimination Against women; and modify the reservation relating to the Throne and the armed forces entered under the Convention on the Elimination of all forms of discrimination against women. Finally we will dispense with a group of reservations now obsolete".

DEPUTY PRIME MINISTER

Planning

The Minister for Housing and Planning (Keith Hill): The Office of the Deputy Prime Minister expects to publish in August new planning policy statements on both sustainable development in rural areas and renewable energy in England. These will be the first in a new series of planning policy statements that are being introduced as part of the Government's programme of reform to the planning system. The new planning policy statement 7 (PPS7) will replace existing planning policy guidance note 7 (PPG7), "The Countryside—Environmental Quality and Economic and Social Development", published in February 1997. The new planning policy statement 22 (PPS22) will replace existing planning policy guidance note 22 (PPG22): "Renewable Energy" published in February 1993.

A draft of PPS7 was issued for public consultation in September 2003. The key policy aims of PPS7 are to plan for and facilitate good quality, sustainable development to support thriving rural communities and businesses, while protecting the beauty and character of the countryside.

A draft of PPS22 was issued for consultation in November 2003. The final document will be an important step towards facilitating the delivery of more renewable energy developments and thereby meeting this Government's commitments in respect of global warming and climate change.

Local planning authorities will need to have regard to the policies in PPS7 and PPS22 in preparing their local development documents, as should regional planning bodies in the preparation of regional spatial strategies. The policies may also be material to decisions on individual planning applications.

Copies of both PPS7 and PPS22 will be made available in the Libraries of both Houses following publication. They will also be made available on the website of the Office of the Deputy Prime Minister. Copies of the responses to the consultation exercises will be made available for inspection through the Office of the Deputy Prime Minister's library and lists of those responses will also be placed in the Libraries of both Houses.

Planning Policy Statements 11 and 12

The Minister for Housing and Planning (Keith Hill): The Office of the Deputy Prime Minister intends to publish in August Planning Policy Statements detailing the process by which Parts 1 and 2 of the Planning and Compulsory Purchase Act (2004) are to be implemented. Planning Policy Statement 11 (PPS11) sets out the implementation process of Part 1—Regional Functions and replaces Planning Policy Guidance 11—Regional Planning, published in October 2000. Planning Policy Statement 12 (PPS12) sets out the implementation process of Part 2—Local Development and replaces Planning Policy Guidance 12—Development Plans published in December 1999. These Planning Policy Statements are integral to the Governments programme of reforming the planning system.

A draft of PPS11 was issued for public consultation in October 2003. PPS11 provides Government guidance on the new arrangements for regional planning. The new procedural arrangements will better deliver policy at the regional level by giving more weight to what is currently Regional Planning Guidance by replacing it with a statutory Regional Spatial Strategy (RSS). The new local development documents will have to be in general conformity with this RSS, and the RSS will be made part of the development plan.

A draft of PPS12 was issued for public consultation in October 2003. PPS12 provides Government guidance on the new arrangements for the preparation of local development documents, which will comprise the local development framework. The local development framework is largely a "portfolio" of local development documents that collectively deliver the spatial planning strategy for the local planning authority's area. Local development frameworks are intended to streamline the local planning process and promote a proactive and positive approach to managing development.

Copies of both PPS11 and PPS12 will be made available in the Libraries of the House following publication. They will also be made available on the web site of the Office of the Deputy Prime Minister. Copies of the responses to the consultation exercises will be made available for inspection through the Office of the Deputy Prime Minister's library and lists of those responses will also be placed in the libraries of the House.

CABINET OFFICE

Central Office of Information

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): Copies of the Central Office of Information's annual report and accounts have today been laid before Parliament and copies have been placed in the Library.

Regulatory Impact Assessment Process

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): An updated measurement of the level of compliance with the regulatory impact assessment process is today being placed on the website of the Cabinet Office Regulatory Impact Unit. An exercise in June 2004 to establish a snapshot of the level of compliance, based on consultations carried out in the twelve weeks to 16 June 2004, showed a compliance rate of 96 per cent. We will continue to keep this under regular review and will report back to Parliament as appropriate.

Parliamentary Commissioner for Administration

The Minister for the Cabinet Office and Chancellor of the Duchy of Lancaster (Mr. Douglas Alexander): In response to a request from the Parliamentary Commissioner for Administration (The Ombudsman), I have agreed to extend her jurisdiction to include the role of the Government Actuary's Department in relation to the prudential regulation of insurers prior to this function being transferred to the Financial Services Authority in April 2001. This will enable the Ombudsman to conduct a full investigation into Equitable Life. The amendment to the legislation to make this change will be made as soon as possible.

TRADE AND INDUSTRY

Estate Agents (OFT Report)

The Parliamentary Under-Secretary of State for Trade and Industry (Mr. Gerry Sutcliffe): On 23 March, the Government welcomed the publication of the Office of Fair Trading's (OFT's) comprehensive analysis of the estate agency market in England and Wales and the effectiveness of the Estate Agents Act 1979. The Government now propose a package of measures building on and strengthening the OFT's proposals. We plan to give enforcers the regulatory tools they need to tackle rogue agents without unnecessarily driving up costs to house sellers, and to provide a cost-effective means by which consumers may win any justified compensation from estate agents through a free independent redress mechanism such as an Ombudsman scheme.

The Government intend to use the Housing Bill presently before Parliament to provide for such a redress mechanism.

Estate agents have a key role in the housing market. For most people buying a house is the most expensive purchase they ever make. It is vital that this market works well and that consumers are adequately protected against unfair practices. Our proposals will mean that consumers have better information, that enforcement activity is directed on those agents who deliberately flout the law and that industry schemes to provide redress are available within a competitive environment.

The key elements of the Government's proposals are:

> A consultation document later this year on how the OFT's proposals could be brought into effect and what more could be done to strengthen the regulation of estate agents.
>
> Taking a power in the Housing Bill to require estate agents to belong to any industry redress scheme approved for the purpose by the Secretary of State. The power would be linked with marketing homes with Home Information Packs (HIPs) and its exercise would be subject to detailed evaluation and consultation once Government and industry have drawn up detailed proposals.
>
> Working with stakeholders to develop methods to evaluate trends in consumer detriment in this market and the case for an industry qualification and national quality standards for estate agents.

In their report, the OFT concluded that the estate agency market works well in many respects and the market structure is competitive, with businesses able to enter and exit the market with ease. But consumers could make average savings of around £300 on each house sale if they did more to shop around and negotiate fees.

However, the report highlighted significant consumer dissatisfaction with estate agents' services, ranging from serious uncorrected abuses that the Estate Agents Act should deter (for example, failure to pass on offers or declare a personal interest) to, more commonly, quality of service issues (for example, delays and inadequate communication). Much of estate agency business is conducted orally with relatively little documentation so the process is not transparent and it is consequently difficult for enforcers to detect and substantiate that abuse has occurred in order that it might be dealt with.

The OFT's broad approach to the problems they have found in the market is

> to ensure a baseline of protection for consumers by making the present regulatory regime more enforceable. The OFT recommend that estate agents should be required to maintain written records of offers, that these should have to be copied to those making the offer as well as sellers, and that the enforcement agencies are given enhanced powers to access these when there are reasonable grounds to suspect that the Act has been breached. Breach of statutory undertakings given under the Enterprise Act 2002 should become "trigger" events enabling enforcement action, and the OFT should be able to ban a person who has committed certain offences, not just when he has been convicted of them (as is currently the case).
>
> to promote quality of service and redress beyond minimum standards by creating incentives for members of the industry to sign up to recognised Codes of Practice with free systems of redress. The Consumer Code of Practice of the Ombudsman for Estate Agents Company Ltd (OEA) has now completed Stage One of the OFT approval process (the code is meeting the OFT's core criteria on paper) and is seeking to complete Stage Two of the process (it will need to show the code is functioning effectively in practice) in order to obtain OFT approval. However, at present it only covers around 40 per cent. of agents. Whilst the OFT hope their promotion of the Scheme—should it be approved—will boost its membership and profile, the OFT recommend that powers should be obtained to establish a statutory redress mechanism in the event that voluntary methods do not realise the anticipated improvements.

The OFT's recommendations also cover such matters as making the statutory terms used in estate agency contracts clearer, extending the definition of an estate agent's personal interest in a deal and bringing the definition of estate agency in the Act up to date.

There have been calls for the introduction of a positive licensing system as a way of improving standards and increasing protection in this market. The OFT specifically addressed the question of whether positive licensing, which could include a fitness test and training or competence requirements, would improve regulation in this market. They reject it for a number of reasons:

> A requirement for estate agents to obtain licences before they engage in business would not deal with the main identified causes of serious problems in this market. These tend to concern the way existing agents conduct their business and are consequently unlikely to be detected by a screening test in advance of granting a licence.
>
> Estate agents clearly need to understand their obligations under the legislation but their role is primarily that of salesmen and intermediaries. Evidence from cases where estate agents have been banned suggests that misconduct results from a lack of integrity rather than deficiencies in their knowledge or expertise.
>
> Positive licensing would adversely affect the benefits consumers receive in terms of downward pressure on prices that results from the ease with which new businesses can enter the market and increase competition. It would also be costly to administer and these costs would ultimately be passed on to consumers in the form of higher fees.

The OFT's conclusion is that positive licensing would raise costs and inhibit competition without delivering enough improvements to justify this. In their view, a more effectively enforced negative licensing system combined with the OFT's new powers under the Enterprise Act will be effective in dealing with malpractice.

In considering our response to the OFT's report, the Government have consulted stakeholders and taken into account the representations we have received. We will continue to consult fully as we take this work forward.

In large measure, the Government agree with the OFT's analysis which identifies a number of clear problems and the case for action to deal with these. We believe that their recommendations potentially offer an effective and proportionate basis for tackling the problems they have identified in this sector.

However, we believe that it may be necessary to go beyond the OFT's proposals in tackling consumer detriment in this market. In particular we wish to take further views on the question of enforcement and to see what can be done to build on the OFT's initial analysis. It is clear that amendments to the legislation are necessary to improve protection in this area. The Government are therefore proposing to consult later this year on a package of measures that will bring about real improvements in this sector. Our proposals will cover:

> Making estate agents dealings with consumers more transparent by requiring them to copy to buyers the written offers they have passed on to sellers and to keep clear and comprehensive records of each property transaction. This will give consumers more confidence that they are being treated fairly.
>
> Giving the OFT and local Trading Standards Departments the comprehensive armoury of regulatory tools they need to investigate consumer complaints properly, address unfair practices and drive the rogues out of the market. We will look at whether they should have powers to demand the on-site production of administration records, files and copies of correspondence when they have reasonable grounds to suspect estate agents have not complied with the provisions of the Estate Agents Act.
>
> Allowing enforcement action to be taken where specified offences have been committed, regardless of whether or not the offenders have been successfully prosecuted.
>
> Widening the range of circumstances in which the OFT can consider the fitness of agents and the range of sanctions available to them.
>
> Widening the circumstances in which estate agents have to disclose their personal interest in property transactions.
>
> Modernising the Estate Agents Act so it is relevant to developments in estate agency practices, such as internet enterprises, and making it clear that consumers are protected.
>
> Making estate agency contracts more transparent so consumers have a better understanding of their liabilities and are not ambushed by clauses in small print or unclear language.
>
> Making it easier for the OFT and Trading Standards Officers to addressing flyboarding abuses by requiring agents to identify specific properties on "for sale" boards.
>
> Encouraging estate agents to improve quality of service by subscribing to and developing codes of practice that will meet the standards required to obtain OFT approval.

In addition, an OFT consumer information campaign will alert consumers to how they can get best value for their money by shopping around, negotiating fees and checking whether agents subscribe to consumer codes of practice, such as the OEA's Code of Practice.

In the Consultation Document, we will also raise whether there are other ways going beyond the OFT's recommendations in which enforcement could be improved e.g. whether some of the OFT's powers could be delegated to local authorities, whether the OFT's internal procedures for dealing with cases involving estate agents can be streamlined, and what could be done to improve communications between the OEA, the OFT and other relevant bodies to facilitate enforcement action being taken when there are serious complaints about estate agents. And we will work with the OFT and Trading Standards to ensure that the best use is made of their new enforcement powers. Updating the regulatory system on its own will not be sufficient to tackle unscrupulous behaviour unless it is effectively and speedily enforced and problems in this sector are prioritized and the necessary resources allocated to them. We are confident that the OFT and local Trading Standards Offices will rise to this challenge but we will want to work with them so that consumers benefit from real improvements in behaviour in this sector.

The Government have noted calls for positive licensing of estate agents but we agree with the OFT's analysis that this is not justified. We believe that stakeholders have underestimated the potential impact of the OFT's recommendations as an overall package for addressing mischief in this sector. These recommendations can address the most serious problems without imposing unnecessary costs on businesses or inhibiting competition (both of which would result in higher fees). But we are also committed

to going beyond the OFT's proposals, for example in making it possible to require estate agents to belong to an industry redress system.

The Government agree that access to free, independent redress is important in the estate agency sector and offers a proportionate means of dealing with consumer complaints about quality of service issues. The OEA is currently seeking approval for its Consumer Code of Practice from the OFT which would enable member agencies to demonstrate a clear commitment to higher standards.

The Government are concerned, however, that by itself this would leave many consumers unable to obtain redress without resort to the courts. Housing markets are local so a seller may not have the option of engaging an estate agent who subscribes to a redress scheme. A buyer who wants a particular property may also have no choice as he will have to deal with the estate agent or agents selected by the seller.

The Government are also conscious that with the introduction from 2007 of HIPs as provided in the Housing Bill estate agents may well play an increasingly pivotal role in housing transactions. On the other hand, the Government are concerned that any redress scheme should not impose an unnecessary burden on the industry or significantly increase barriers to entry, neither of which would be in consumers' interests. Proposals for a redress scheme need to be reconciled with the fact that there are no positive licensing arrangements for estate agents.

The Government also accept that there are advantages in redress arrangements being run by the industry rather than the state. The Government believe that a way of reconciling these different considerations is for Parliament to provide a power to require estate agents to belong to any redress scheme approved for that purpose by the Secretary of State. Under the proposed arrangements, enforcement would fall under the present statutory arrangements in the Estate Agents Act: that is, that Act would apply to breach of the duty to belong to the scheme as it currently applies to a person who has engaged in an undesirable practice under the Act, so that enforcement action, including prohibition from acting as an estate agent, could be taken against any estate agent who failed to comply with the duty. The Government consider that the Housing Bill represents an opportunity to deal with this matter and propose to bring forward amendments to the Bill during the Committee stage in another place to provide for such arrangements. In recognition of the fact that this is a new proposal on which the Government have yet to consult, we would not propose to exercise the power until it was clear what industry scheme or schemes would seek recognition, what arrangements they would have for providing redress including the fees they would charge estate agents, consultation had been carried out on the detailed arrangements and a full Regulatory Impact Assessment had been done. Subject to those considerations, the Government hope that the arrangements will be brought into effect before the introduction of HIPs in 2007.

We encourage those in the industry who wish to do so to subscribe to more wide-ranging codes of practice and to seek approval under the OFT's Consumer Codes Approval Scheme.

Turning to other steps the Government intend to take in respect of this market, we want to improve the evidence base so as to gain a better picture of just how much consumer detriment there is in this market and how much our proposals improve it. We plan to invite the main stakeholders to join us in trying to devise a methodology for this. Such a better evidence base might establish the need to take further steps in future.

We also plan to work with stakeholders on the scope for devising and promoting a recognised qualification for estate agents. We see benefit in this as something that, if properly done, could provide a career incentive to raise standards.

We also note that the British Standards Institute, the UK National Standards Body, is considering developing a service quality Standard and associated Kitemark for the provision of residential estate agency services and we shall follow with interest progress on this.

Consumers deserve a better deal from estate agents than, as the OFT's report shows, in many cases they have got. The Government's proposals will go a long way to providing consumers in this vital market with a much better deal.

Regional Development Agencies 2003–04

The Minister for Industry and the Regions (Jacqui Smith): I have today laid before Parliament the annual reports and accounts for 2003–04 for the eight Regional Development Agencies (RDAs) outside of London. Copies have been placed in the Library of the House. The Government welcomes the contribution that the RDAs have made during this year to driving forward economic development in their respective regions.

Also published today are the RDAs' reported Tier 3 outputs for 2003–04. These results are evidence that the RDAs continue to play a valuable role in improving the economic performance of the English regions and, through working with their partners, the RDAs are making a real difference to the individual regional economies concerned. The figures cover the creation and safeguarding of jobs, the amount of brownfield land brought back into use, the number of businesses added to the regional economies, the number of learning opportunities created and the amount of private sector investment attracted benefiting deprived areas, all as a result of RDA activity.

Press releases on the Tier 3 outputs have been issued in each region. Copies of the output results have been placed in the Library of the House, and are also available on the DTI website atwww.dti.gov.uk/rda/info.

TRANSPORT

Street Works

The Parliamentary Under-Secretary of State for Transport (Mr. Tony McNulty): Regulations under section 74 of the New Roads and Street Works Act 1991 came into force in April 2001. These allow highway authorities to charge utility companies for works in the street that overrun an agreed deadline.

Separate regulations under section 74A of the 1991 Act allow highway authorities to charge utility companies a daily rate, commonly known as "lane rental", whenever the latter carry out works in the street. The 74A powers have not, as yet, been activated nationally, but have been tested in pilot schemes in the London Borough of Camden and in Middlesbrough, which ended on 31 March 2004.

The Department appointed consultants, Halcrow, to monitor the effectiveness of both sets of powers in reducing disruption on the highway. Halcrow have produced two final reports covering the section 74 and 74A powers respectively. Copies of each report will be placed in the Libraries of both Houses shortly.

WORK AND PENSIONS

Child Support Agency

The Secretary of State for Work and Pensions (Mr. Andrew Smith): I am pleased to announce that the Department for Work and Pensions has today published the 2003–04 annual report and accounts for the Child Support Agency (HC 782).

Copies have been placed in the Library.

New Child Support Scheme (Progress Report)

The Secretary of State for Work and Pensions (Mr. Andrew Smith): The new arrangements for child support came into operation for new cases and some linked old scheme cases from 3 March 2003. Progress has been slower than anticipated, chiefly due to problems with the new computer and telephony systems that are being progressively remedied by EDS, the service provider. Recovery has now proceeded to the stage at which the agency has sufficient confidence in the system's ability to handle new applications to permit it to undertake its own recovery programme to improve compliance and increase its clearance rate. The Department will continue to withhold substantial payments from EDS until more satisfactory system performance has been achieved.

The number of cases cleared was 45,000, taking the total number of clearances (calculations and closures) to over 197,000. The total number of cases cleared continues to rise but, clearly, we need to do much more and the agency has instigated a programme designed to drive performance improvement and build on the progress made during 2003–04, with further emphasis on achieving positive outcomes for families.

The poorest families are starting to gain significantly in real terms from the new system with the introduction of the child maintenance premium. This last quarter saw a further rise—the highest quarterly rise to date—with over 8,000 first child maintenance payments being made and bringing the total number of beneficiaries to over 25,000.

Whereas under the old system, most cases were closed before calculations were made, the reverse is now true. The ratio between those cases reaching calculation compared with those that closed remained consistent with previous quarters at around 6:4, comparing favourably with the ratio of 4:6 under the old scheme.

Technical issues precluded the reporting of reliable figures on compliance and throughput during 2003–04 and this, in turn, has impacted the agency's ability to manage performance improvements. We still do not have complete, fully accurate or timely information on compliance. The best information now available suggests that, in March 2004, just over half of those non-resident parents due to make payments did so.

The agency is in the process of validating the compliance information it has for this quarter with the aim of providing this in future quarterly reports. We expect performance to improve progressively over the next year or so as the new arrangements move into steady state and better information is made available to support performance improvements.

A special exercise was undertaken to test accuracy at the end of 2003–04. At the end of the first year of the new scheme, 82 per cent. of decisions checked were accurate to the nearest penny (against a target of 90 per cent.).

Average weekly child support maintenance payments to parents with care are shown in the table. Figures are for June 2004 only and are calculated as the total amount received and allocated divided by the number of cases.

	1 Qualifying Child	2 Qualifying Children	3 Qualifying Children
Average Weekly Payment	£33.25	£47.95	£53.49

Summary of Agency Performance to June 2004

Agency Performance	*Quarter 1 Mar–Jun 2003*	*Quarter 2 Jul–Sep 2003*	*Quarter 3 Oct–Dec 2003*	*Quarter 4 Jan–Mar 2004*	*Quarter 5 Apr–Jun 2004*	*Scheme to June 2004*
Applications received	73,582	78,982	85,306	83,652	83,094	404,616
Applications cleared	12,648	38,583	49,453	51,876[1]	45,097[1]	197,657[1]
of which: Maintenance Calculations	6,671	23,857	29,672	31,229[1]	25,657[1]	117,086[1]
Closures[2]	5,977	14,726	19,781	20,647[1]	19,440[1]	80,571[1]
First payments made through the Agency	461	5,164	11,473	14,017	14,974	46,089
First Child Maintenance Premium payments made	77	3,314	6,173	7,484	8,070	25,118

Agency Performance (April 2004 to June 2004)	*Apr–04*	*May–04*	*Jun–04*	*Total in Quarter*
Applications Received	28,530	27,933	26,631	83,094
Applications Cleared	14,729	14,809	15,559	45,097
of which:				
Maintenance Calculations	8,515	8,428	8,714	25,657
Closures[2]	6,214	6,381	6,845	19,440
First Payments Made Through the Agency	5,164	4,745	5,065	14,974
First Child Maintenance Premium Payments Made	2,813	2,546	2,711	8,070

Notes

1. Quarter 4 2003–04 totals, Quarter 1 2004–05 totals and Scheme to Date figures include clerical cases (new scheme cases unable to be progressed on the new system).

Figures for these are as follows:

Scheme to March 2004		Scheme to June 2004
Applications cleared	824	1,345
Maintenance Calculations	715	1,134
Closures	109	211

2. Closures: Applications close for a variety of reasons. The main reasons are that the parent with care withdraws the application, perhaps due to reconciliation, or having agreed private arrangements with the non-resident parent.

3. A proportion of cases that have a maintenance calculation in place may already be receiving payment directly, but will not be reflected in the figures shown above.

4. Figures for child maintenance premium payments include an estimate of the number of parents who receive the premium by way of a disregard to their income support/income-based jobseekers allowance.

Written Ministerial Statements

Tuesday 7 September 2004

INTERNATIONAL DEVELOPMENT

Pitcairn Island

The Parliamentary Under-Secretary of State for International Development (Mr. Gareth Thomas): Following detailed engineering assessment and design work over the past 12 months or so, I have set aside a total of £1.9 million from DFID funds to repair and refurbish the Hill of Difficulty road and the jetty/slipway in Pitcairn Island. Preparations are now in hand, with a view to expected commencement of the work in November of this year. In addition to this assistance, we will continue to provide medical and social welfare support for the island community.

Reducing Maternal Deaths

The Secretary of State for International Development (Hilary Benn): Last week I published a strategy paper, "Reducing Maternal Deaths", setting out the evidence on what is needed to reduce maternal deaths in developing countries. The paper complements our recent position paper on sexual and reproductive health and rights, and DFID's target strategy papers on "Better Health for Poor People" and "Realising Human Rights for Poor People".

There is an urgent need to make faster progress towards the fifth millennium development goal of improving maternal health. Every year worldwide, more than 529,000 women die from complications in pregnancy and childbirth, all but 2,500 of them in developing countries. The UK is firmly committed to the target of reducing the maternal mortality ratio (the number of deaths per 100,000 live births) by three quarters by 2015, from a 1990 baseline. The health of the mother is inextricably linked to the health of her newborn child.

The paper sets out four priorities for DFID: increasing awareness and commitment to action, supporting partner countries to improve access to services, addressing wider barriers to maternal health, especially improving the status and rights of women, and generating and using new knowledge.

DFID is already supporting work in all these areas but will increase those efforts and encourage partners to do likewise. The strategy includes a commitment to increase year-on-year investment in maternal health.

I am placing a copy of the paper in the Library of the House. It is also available on DFID's website at www.dfid.gov.uk.

TREASURY

United Kingdom Coins

The Chancellor of the Exchequer (Mr. Gordon Brown): Her Majesty the Queen has been graciously pleased to approve my recommendation that the following coins should be issued in 2005 and 2006:

a gold half-sovereign, sovereign, double-sovereign and five pounds in 2005 bearing a new reverse design;

a crown piece to celebrate the eightieth birthday of Her Majesty the Queen in 2006;

a pair of two-pound coins to mark the 200th anniversary in 2006 of the birth of Isambard Kingdom Brunel; and

a series of three fifty-pence pieces to commemorate the 150th anniversary in 2006 of the institution of the Victoria Cross.

Collector versions of all these coins will be released at a premium above face value. In the case of the crown, the two-pound coins and the fifty pence pieces, during the course of 2006, versions will also become available at face value from banks and post offices.

HEALTH

Pharmacy Services (Control of Entry Regulations)

The Minister of State, Department of Health (Ms Rosie Winterton): On 17 January 2003, the Office of Fair Trading (OFT) published its report "The Control of Entry Regulations and Retail Pharmacy Services in the UK". It recommended abolition of the current restrictions on National Health Service pharmacy applications known as "control of entry".

On 17 July 2003 the Government published their response to the report for England, in which they announced their intention to move cautiously in the direction recommended by the OFT.

In summary, the package of measures proposed first the introduction of new criteria of competition and choice to the current regulatory test. Secondly they would exempt completely four types of pharmacy applications from that test. These four exemptions would apply to applications in respect of large shopping developments over 15,000 square metres (though we will not now include town centre developments); to pharmacies intending to open more than 100 hours per week; to pharmacies which are part of consortia developing new one-stop primary care centres; and to pharmacies which would be wholly internet or mail-order based. Finally, we would further reform and modernise the current regulatory system.

We issued a consultation document on 29 August 2003, "Proposals to Reform and Modernise the NHS (Pharmaceutical Services) Regulations 1992", which explained these proposals in more detail and sought views on how best to implement the package of measures; 270 responses were received. A summary of those responses is available on the Department's website at www.dh.gov.uk/mpi.

We also set up an expert advisory group, the advisory group on the reform of the NHS (Pharmaceutical Services) Regulations 1992, under the chairmanship of Mrs. Anne Galbraith, chair of the Prescription Pricing Authority. Its role was to advise how best to implement the proposals, taking account of the OFT report and

responses subsequently received, and to offer further advice. We received the group's report in January this year. We published the executive summary of their report in March. This is available on the Department's website at http://www.advisorybodies.doh.gov.uk/pharmacyregulationconsultation/execsum.htm. We will publish the group's full report later this year when we bring forward the necessary regulatory changes.

We took careful account of the advisory group's report and recommendations and the responses to the consultation in drawing up our plans for implementation. Stakeholders from a wide range of key interests were represented on the group. These included patients and consumers, the NHS, pharmacists and health professions as well as those with experience of competition and regulatory reform. The group provided constructive and valuable advice. In order to end any uncertainty for patients, for the NHS and for community pharmacies, I announced on 18 August that the Government had accepted the great majority of their recommendations in relation to the proposals set out in the consultation document and would now proceed to implement them, but with some amendments.

We will work to introduce the new criteria of competition and choice to the current regulatory test through secondary rather than primary legislation. We also intend to develop criteria for primary care trusts (PCTs) to reject administratively any application which does not undertake to provide the required essential pharmaceutical services under the proposed new contractual framework for community pharmacy. Similar arrangements will be made for appliance contractors. We intend these criteria to be rolled out to all PCTs later this year subject to our ongoing discussions with the Pharmaceutical Services Negotiating Committee (PSNC) and NHS Confederation to finalise the details of that framework.

We will proceed with our plans to exempt four types of pharmacy application from the control of entry test.

However, we will not exempt pharmacy applications for town centre shopping developments over 15,000 square metres. The exemption would still apply to out-of-centre and out-of-town developments as we originally proposed. Such exempted developments will be included in a published list and a provisional list is now available on the Department's website at www.dh.gov.uk/mpi. We are considering further how the list is to be updated and will provide more information when we bring forward the draft changes to the regulations. Pharmacies, which have hitherto found difficulty in gaining a NHS pharmacy contract in shopping developments in town centres, will nonetheless be able to apply to their local PCT for admission to the pharmaceutical list under the reformed regulatory test, when it is introduced, or to make use of the exemption to open more than 100 hours per week.

For pharmacies which intend to open for more than 100 hours per week, we will include a requirement for PCTs to remove from their pharmaceutical list any pharmacy that consistently fails to meet the terms of the exemption unless there is good cause—for example, a fire causing temporary closure.

Applications from members of a consortium establishing a new one-stop primary care centre will also be exempted, provided the centre provides a regular, comprehensive range of services and serves a substantial population of 18,000 to 20,000 patients. The exemption will only apply to centres which are part of the local PCT's strategic service development plan or equivalent written service development strategy. Such centres will, in addition to usual general practitioner services, offer a wide range of primary and community based services, such as dentistry, optometry, podiatry, or other social or community services. The Regulations will define a consortium and specify governance arrangements. Guidance for PCTs will cover situations where a service provider withdraws from a centre so that this does not require the closure of the exempted pharmacy.

Applications for wholly mail order or internet-based pharmacy services will similarly be exempted and we will apply a number of measures to ensure such pharmacies provide a fully professional service within the provisions of the new contractual framework. Internet pharmacies, as with all retail pharmacies in England, Wales and Scotland, must be registered with the Royal Pharmaceutical Society of Great Britain (RPSGB). All pharmacies, whether or not they provide online services, are subject to the same statutory requirements; and to the RPSGB's requirements including standards; inspection arrangements; and code of professional ethics.

We will also introduce regulatory safeguards to protect against manipulation or abuse of the new freedoms. For example, the four exemptions will require applicants to provide a full and prescribed range of services. These would be for local determination by the PCT in relation to the first three exemptions, or nationally determined by the Department in discussion with the NHS in relation to the exemption for wholly internet or mail order based pharmacies. Apart from dispensing prescriptions, such services might include managing a patient's repeat medication, helping patients get the best from the medicines they are taking and promoting healthier lifestyles. For example, pharmacies are well placed to provide support for people at risk of coronary heart disease, giving advice on stopping smoking, or how to improve nutrition or physical activity.

Key elements of our proposals, including the four exemptions, are either implicitly or explicitly linked to the delivery of pharmaceutical services under the new contractual framework. Our plan is to implement these reforms in tandem with that framework. The Department has held tripartite negotiations on the framework with the PSNC and the NHS Confederation for the last 18 months. On 24 August, the PSNC accepted our offer of funding subject to final agreement on a number of detailed issues which we are discussing with them and the NHS Confederation. We aim to conclude these as soon as possible. We will prepare and consult on the necessary regulatory changes and aim to implement the reformed regime as soon as is practicable thereafter.

Guidance for the NHS on how to implement the regulations was last drawn up in 1992. An overhaul is long overdue. So we will amend this information to bring it fully up to date to assist PCTs in implementation. This would include developing supplementary questions to inform PCT assessments of

pharmacy applications. We will also propose enhanced data collection from PCTs, subject to approval by the body overseeing NHS data requirements, to inform assessment of progress on our package of reforms and evaluate the impact of these exemptions in 2006.

We will also take additional steps as proposed to further modernise and reform the current system through a combination of regulatory and administrative changes.

PCTs will be able to invite applications from contractors. We will revise the application forms to reflect the criteria that PCTs use in assessing applications. We will require PCTs to reach a decision on an application within four months of the due date for receipt, unless there is good cause. We will also require them to consult widely with patient, consumer and local community groups that have a direct interest in local pharmaceutical provision, and set an administrative minimum consultation period of 45 days.

We will introduce an automatic exemption for all minor relocations under 500 metres, but retain the discretion for PCTs to override this where there is good cause. An example of this would be where geographical obstacles or transport difficulties would affect continued access to pharmaceutical services. Similarly there will be a minimum 12-month trading period requirement before a further application for a minor relocation can be accepted, unless, again, the applicant shows there is good cause.

We will remove the current restriction, which prevents cross-PCT boundary minor relocations, but ensure there are means to remove the contractor from the list of the PCT he is leaving and the receiving PCT agrees to the relocation.

We will retain the concept of preliminary consent for a pharmacy application, but will limit the maximum period for grant of such consent to six months.

Similarly, we will provide for a maximum period of grant of full consent of nine months. We will also enable PCTs to have the discretion to require an applicant to commence pharmaceutical services within a given period not exceeding three months unless there is good cause.

In addition, we will introduce two measures proposed to us by the advisory group. We will allow PCTs to set a fixed date every month for the receipt of applications and we will require PCTs to deal with applications that do not require local consultation within a maximum of 30 days.

However, we will retain in guidance the long-stop discretion which enables PCTs to decide competing applications of equal merit on the basis of the first past the post.

We will also reform the appeals system. We will allow appeals for change of ownership to be combined with appeals concerning minor relocations.

Certain of our proposals would require primary legislation. When parliamentary time permits, we will consider introducing new legislation to enable reasonable charges, but not full cost recovery, for pharmacy applications to be introduced. We will also consider enabling PCTs to take into account, when assessing applications, the improvements they would bring to the provision of, or access to, over-the-counter medicines and other healthcare products. We do not intend, however, to introduce legislation to enable charges to be levied for appeals. We would consult further on such legislation.

We also plan to introduce, subject to further discussions, measures developed by the Pharmaceutical Services Negotiating Committee and the General Practitioner's Committee of the British Medical Association and the Dispensing Doctors' Association to reform the rules governing NHS rural dispensing. These bodies reviewed their proposals in the light of the Government response to the OFT report, presented their findings to the advisory group which in turn recommended they should proceed. Officials from the Department have met these organisations recently to hold further discussions on how best the reforms should be introduced to the current legislation. We aim to implement these in tandem with the other reforms I am announcing today.

The measures I have announced represent an important step forward for community pharmacy services and our ambition to deliver a balanced package of reform measures. They will raise standards for patients, encourage innovation and excellence in service provision whilst at the same time supporting community pharmacies, many of which are small businesses. Community pharmacies provide a highly valued service and we are committed to their ongoing development and integration in the NHS. We also want to ensure that our reforms do not mean that services to more vulnerable groups of patients or those in deprived or rural areas suffer.

We are determined to improve access to, and the choice of, pharmacy services so that community pharmacy is recognised as a key player in the provision of NHS services. These reforms will provide an environment in which community pharmacy services can thrive.

NHS Foundation Trusts

The Secretary of State for Health (Dr. John Reid): I announced on 26 July that I would support 20 National Health Service trusts in their bids to become NHS foundation trusts as part of wave 1A.

These trusts have made an application to Monitor (whose statutory name is the independent regulator of NHS foundation trusts) for authorisation as NHS foundation trusts, and are setting up their new governance arrangements including recruiting members to hold elections to the board of governors. On 2 August, Monitor announced that wave 1A applicants would be handled as two groups, with target dates for authorisation being 1 November 2004 and 1 February 2005. Details of the two groups are as follows:

1 November 2004

Barnsley District General Hospital NHS Trust

Burton Hospitals NHS Trust

Chesterfield and North Derbyshire Royal Hospitals NHS Trust

Gateshead Health NHS Trust

Harrogate Healthcare NHS Trust

Nottingham City Hospital NHS Trust

Southend Hospital NHS Trust

South Tyneside Healthcare NHS Trust

West Suffolk Hospitals NHS Trust

1 February 2005

Aintree Hospitals NHS Trust

Birmingham Heartlands and Solihull NHS Trust

Birmingham Women's Healthcare NHS Trust

East Somerset NHS Trust

Frimley Park Hospitals NHS Trust

Lancaster Teaching Hospitals NHS Trust

Liverpool Women's Hospital NHS Trust

Newcastle Upon Tyne Hospitals NHS Trust

Royal Bournemouth and Christchurch NHS Trust

Royal National Hospital for Rheumatic Diseases NHS Trust

Wrightington, Wigan and Leigh NHS Trust

On 26 July, I indicated that in addition to three-star rated acute and specialist trusts, mental health trusts would for the first time be invited to apply for NHS foundation trust status. We will formally invite applications for wave 2 later this autumn and outline the timetable for authorisation, which will be subject to the outcome of the review into NHS foundation trusts being undertaken by the Healthcare Commission (whose statutory name is the Commission for Healthcare Audit and Inspection).

EDUCATION AND SKILLS

Summer Examinations Results

The Secretary of State for Education and Skills (Mr. Charles Clarke): I would like to report on this summer's results for Key Stages 1, 2 and 3, GCSE and A level, which show that we are making steady progress in raising standards at every level.

At age 7—Key Stage 1

Some 1.85 per cent. of pupils achieved the expected level in reading (an increase of 1 percentage point over 2003) and 90 per cent. of pupils did so in maths (unchanged from 2003).[1]

At age 11—Key Stage 2

A record 77 per cent. of pupils achieved the expected level in English, an increase of 2 percentage points from last year (up 12 percentage points compared to 1998), and 74 per cent. of pupils achieved the expected level in Maths, a 1 percentage point increase from last year (up 15 percentage points from 6 years ago). These are good results and show that standards achieved by pupils in our primary schools are continuing to improve. Pupils and parents can be confident that their primary schools are still getting better and better.

Standards at Key Stage 2 are improving in all areas but some of the biggest strides are in some of the poorest areas, such as Hackney where English improved by 7 percentage points and Maths by 6 percentage points compared to 2003 and Sunderland, where there was a 5 percentage point improvement in English and a 4 percentage point improvement in Maths. Among other LEAs Hartlepool and Southampton recorded the highest improvements in both English and Maths results. It shows that poverty is not a barrier to success. It is a tribute to the hard work of teachers who have made this possible. We will continue to offer them targeted help and support.

At age 14

I am pleased to see progress made in maths. At Key Stage 3, there has been a 2 percentage point increase in the number of pupils achieving level 5 in Maths and over 50 per cent. of 14 year olds are now reaching level 6 in maths, a tremendous achievement. There has been a 2 percentage point fall in the number of pupils achieving level 5 in Science compared to last year, although there has been a 10 percentage points increase since 1998.

Publication of Key Stage 3 English results has been deferred until the outcome, in terms of scale and nature, of the extended marking process for schools is known. Under the National Statistics Code of Practice, it is the statistics Head of Profession in the Department who decides on the content and timing of the release of National Statistics, and provides advice to ministers.

At GCSE

I welcome the rise in the number of entries achieving top grades for all candidates in England and Wales—the biggest rise in A* to C grades since 1999. The provisional results show that:

Grades at A*–C for all candidates in England and Wales have increased by 1.1 percentage points to 59.2% (compared to a 0.2 percentage point rise last summer)

Some 97.6 per cent. of GCSE entrants achieved a grade A*–G—the same rate as last year

Grades A*–C at maths have increased by 1.6 percentage points to 51.7 per cent. English is up by 0.2 percentage point to 59.9 per cent.

An increase of entries in chemistry of 5 per cent., in physics of 5.1 per cent. and in biology of 4.4 per cent.

Boys' improvement at grades A*–C has increased by 1.3 percentage points compared with 0.9 for girls

These results are excellent and reflect the hard work of pupils and teachers. I am encouraged that more pupils are taking maths and gaining good grades, mirroring the rise for 14 year olds. It is also good to see more pupils taking science.

As with the primary schools, some of the biggest improvements this year have been in schools in some of our poorer and lowest attaining areas. In North Tyneside early indications are that the GCSE results have increased from 48 per cent. of pupils gaining five or more good GCSEs to 54 per cent. this year. At school level the International School in Birmingham increased from 9 per cent. of its pupils gaining 5 A* to C grades last year to 32 per cent. this year—still a long way to go but huge improvement and a tribute to the leadership of these schools.

A further example of this improvement can be seen in London. For the first time all London boroughs are now achieving above 40 per cent. of pupils gaining 5 A* to C grades at GCSE. The provisional results also indicate that some of the fastest improving areas are among the most deprived boroughs: Islington is up by 7 percentage points; Tower Hamlets is up by 5.3 percentage points; Haringey is up by 5.6 percentage points; Hackney is up by 5.8 percentage points; Lewisham is up by 6.3 percentage points and Newham is up by 3.9 percentage points.

These results build on very fast improvement from last year's results when Hackney was up by 8 percentage points and Islington up by 5 points. So the trend is clearly upwards.

At A level

The overall pass rate rose to 96 per cent. from 95.4 per cent. last year. A grades at A level increased by 0.8 percentage points to 22.4 per cent. and the overall AS pass rate has increased by 0.2 percentage points to 86.9 per cent. Excluding General Studies, English and Mathematics attracted the highest number of entries at A level and are two of the three most popular subjects at AS.

These results are built on the hard work of students, schools and colleges and will open up more opportunities for our young people to achieve success. I congratulate the students and thank our teachers for their commitment.

At a time when Ofsted says the standard of teaching has never been higher, we should expect to have rising levels of achievement in our schools and colleges. We are getting better as a country at getting the best out of our young people. We should applaud them and applaud their teachers, schools and colleges.

I am determined that we should move forward to improve performance further. We will continue to progress with some important developments from the start of the new school term.

Specialist schools

Some 506 specialist schools will begin operating as specialist for the first time this September. This means that 2.1 million pupils will be educated in one of the 1,954 specialist schools—62 per cent. of all English secondary schools, up from just 257 in 1997. The evidence shows that specialist schools help pupils to gain better grades.

Academies

Five new Academies open in Barnet, Hackney, Hillingdon, Lambeth and Northampton. They will build on the success of the existing 12 where I was pleased to see some excellent GCSE results this summer. For example The King's Academy in Middlesbrough where 34 per cent. of pupils achieved five or more A*–C GCSEs, an increase of around 12 percentage points on the joint results of the predecessor schools in 2003.

Workforce Reform

Workforce reform is in the next phase and the radical enhancement of the role of teachers continues. There are not just more teachers than at any time since the early 1980s but teachers are being given professional support in class with more assistants. Teachers will increasingly have more time to prepare better lessons.

Education Maintenance Allowance

This will be available nationally to help young people stay on in education, at school or college.

ICT

Current activity focuses on supporting the personalised learning and transforming school workforce agendas. Over 99 per cent. of schools in England are now connected to the Internet of which, at June 2004, 61 per cent. of primary and 98 per cent. of secondary had a connection at broadband speeds appropriate to their needs.

Schools continue to invest in the new technologies that support enhanced teaching and learning. By March 2004 63 per cent. of primary schools had an electronic interactive whiteboard (average 1.9 a school) and 92 per cent. of secondary schools (average 7.5 a school).

In the longer term I am looking forward to receiving later in the autumn the final report from Mike Tomlinson's Working Group on 14–19 Reform. He will be coming forward with proposals looking at how we stretch the most able, boost participation, improve the vocational offer and reduce the burden of assessment.

[1] Figures for 2004 and 2003 are not strictly comparable because of the trial involving 34 LEAs and a quarter of 7 year olds that reported only teacher assessment. The independent assessment of the trial is expected later this month and we shall comment further on these results then.

HOME DEPARTMENT

Animal Procedures Committee

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): In accordance with Section 20(5) of the Animals (Scientific Procedures) Act 1986, I have placed the Committee's annual report for 2003 in the Library today. Among other things the report includes advice given by the Committee to Ministers about applications for licences to perform particular experiments on animals; results of research projects funded by the Home Office on the Committee's advice; and advice presented to Ministers on how to assess more accurately the costs and benefits of animal experimentation.

Scientific Procedures on Living Animals

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): I wish to announce that the publication entitled "Statistics of Scientific Procedures on Living Animals in Great Britain—2003" is being presented as a Command Paper, Cm 6291, today. Copies will be placed in the House Library.

This annual report meets the requirement in the Animals (Scientific Procedures) Act 1986 to keep Parliament informed about the use of animals for experimental or other purposes. It also forms the basis for meeting periodic reporting requirements at EU level. The format and content of future reports is currently being reviewed by the Animals Procedures Committee.

The report shows an overall increase over last year of 2.2 per cent. in the number of procedures undertaken. The total number of procedures was 2.79 million, an increase of 59,000 over the previous year. This is within typical year-on-year variability.

Non-toxicological procedures accounted for about 84 per cent. of the procedures carried out in 2003. These included studies for fundamental biological or applied research in human and veterinary medicine, with the main areas of use being for immunological studies, pharmaceutical research and development, and cancer research.

Procedures for toxicological purposes accounted for the remaining 16 per cent. of all procedures. About 63 per cent. of these were for testing the safety and efficacy of new drugs and medicines.

In keeping with previous years, those procedures which used mice or rats (or other rodents) were the great majority at 85 per cent. Those using fish amounted to 6 per cent. and those using birds, 4 per cent. The total of all procedures using dogs, cats, horses and non-human primates, that is those species offered special protection by the Act, was less than 1 per cent. of the total.

Genetically normal animals were used in 1,749,000 regulated procedures, representing 63 per cent. of all procedures for 2003 (compared with 65 per cent. in 2002 and 84 per cent. in 1995). Genetically modified animals (nearly all rodents) were used in 764,000 regulated procedures, representing 27 per cent. of all procedures for 2003 (compared with 26 per cent. in 2002 and 8 per cent. in 1995).

These trends have been evident over recent years, reflecting the changing balance in use between genetically normal and modified animals, and are set to continue as advances in genetic science open up new and promising avenues of research.

I should point out in relation to the statistics that the Home Office, as regulatory authority under the 1986 Act, does not control the overall amount of animal research and testing which takes place, the imperative being to minimise the numbers of animals used for justifiable purposes. We ensure, in carrying out our licensing function, that the provisions of the Act are rigorously applied in each programme of work. All animal use must be justified, and for each particular programme of work the number of animals used and the suffering caused must be minimised.

TRADE AND INDUSTRY

Director and Auditor Liability

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): The House will be aware that, between December 2003 and March 2004, the Government consulted widely on the case for reform of the law on director and auditor liability. Over 120 responses to the consultation were received from investors; companies, both large and small; auditors; legal advisers; industry bodies; academia; and the general public. I am grateful to all those who took the time and trouble to contribute. In the light of the consultation responses the Office of Fair Trading was asked to undertake a study of the potential impact on competition in the audit market of a cap on auditor liability. I am grateful to them for completing and publishing this so quickly.

Directors

It is essential for British competitiveness that we have a diverse pool of high-quality individuals willing to become directors, and that directors are willing to take informed and rational risks. But it is also important that directors act in accordance with their duties, and that negligent directors can be held to account by their companies. The courts have in recent years imposed a much more demanding standard of care, skill and diligence on directors. This has been a very welcome development.

The consultation built on the recommendations both of the Company Law Review and of Sir Derek Higgs' study on non-executive directors. It identified two particular concerns:

> exposure to liabilities arising from legal action against directors by third parties. The sharp rise in the number of class actions by groups of shareholders in the US has made this a particular concern for directors of British companies with a US listing;
>
> the cost of lengthy court proceedings. Companies are currently permitted to indemnify a director against the cost of defending legal proceedings, but only when judgment has been given in the director's favour or he has been acquitted. For many directors, such indemnification comes too late and the prospect provides cold comfort.

The consultation indicated these issues are affecting the recruitment and behaviour of directors. I therefore intend to introduce a balanced and proportionate package of reforms, by tabling amendments to the Companies House (Audit, Investigations and Community Enterprise) Bill at its Commons Committee stage. The proposals will in particular introduce two important relaxations of the current prohibition on companies exempting their directors from, or indemnifying them against, liability:

> they will permit, but not require, companies to indemnify directors in respect of proceedings brought by third parties (covering both legal costs and the financial costs of any adverse judgement, except for the legal costs of unsuccessful defence of criminal proceedings, fines imposed in criminal proceedings and penalties imposed by regulatory bodies such as the financial services authority);
>
> they will permit, but not require, companies to pay directors' defence costs as they are incurred, even if the action is brought by the company itself. The director would still be liable to pay any damages awarded to the company and to repay his defence costs to the company if his defence were unsuccessful (except where the company chooses to indemnify the director in respect of his legal costs in civil proceedings brought by third parties).

The Government amendments will also remove an arguable loophole under which a company in the same group may currently provide an indemnity to a director that would be unlawful if it was provided directly by the company of which the individual was a director.

The amendments will also require disclosure in the directors' report by companies that indemnify directors. Shareholders will also have the right to inspect any indemnification agreement. Companies that do not indemnify directors will not have to make any disclosure.

Auditors

The consultation also covered the position of auditors.

The Government wish to see a competitive and high-quality market for audit services, shareholders using high quality and reliable information, and an adequate system of redress for when things go wrong. There must also be an appropriate degree of transparency and accountability for the audit process.

The Government are actively pursuing this agenda. The Bill already extends the powers of auditors to obtain information, and contains new provisions for each director to confirm there is no relevant audit information of which he is aware but the company's auditors are unaware.

There are also a number of initiatives to improve the quality of the audit and other information provided to shareholders. For example:

the recommendations of the Review chaired by Sir Robert Smith mean that in listed companies there will shortly be enhanced audit committee reporting to shareholders, including better information on key audit judgements;

the auditing practices board, a subsidiary of the financial reporting council, has published for comment draft new ethical standards relating to the independence of auditors which are expected to be finalised this autumn;

the financial reporting council has established an audit inspection unit which has begun independent reviews of the effectiveness of the audit procedures of the four largest audit firms;

the audit regulatory activities of the professional accountancy bodies are now subject to independent oversight by the professional oversight board for accountancy, a subsidiary of the financial reporting council;

a new accountancy investigation and discipline board has been established, as a subsidiary of the financial reporting council, in order to investigate public interest cases of alleged breaches of professional standards by auditors and it has commenced its first investigation;

the financial reporting council has recently set up a group under Douglas Flint to review the current guidance on internal risk control;

we are also considering carefully the responses to our recent consultation on the operating and financial review.

In line with the company law review's recommendations, and as supported in the consultation, I have decided not to bring forward amendments to the current Bill to extend an auditor's duty of care.

The consultation showed a wide variety of views both as to whether reform of the law on liability of auditors was needed, and if so what form it should take. Some investors also had concerns about whether the audit process was serving them sufficiently well. It was also a matter of concern that the leaders of some of our largest companies were worried their choice of auditor was limited.

I have considered carefully whether there is a case for a change in the law on auditor liability. I am grateful to the Office of Fair Trading for looking at the competition implications of enabling shareholders to agree in advance a maximum amount for which the auditor would be liable. In the light of the consultation responses, and the OFT's advice that introducing a cap would not significantly enhance competition, I have concluded against proposing changes to the law on this.

The Government remain committed to improving the operation of the audit market and will continue to consider any proposals, including the possibility of limiting liability on a proportionate basis by contract, which can be demonstrated significantly to enhance competition, and to improve quality, in the audit market. The Government intend to look closely at this option and actively call upon auditors, business and investors to work together to examine whether proposals for a system of proportionate liability via contract are practical and/or desirable.

However no change to the law on financial liability could protect one of an auditor's greatest assets—its reputation. That responsibility rests with the professionalism of auditors themselves.

National Grid Company

The Minister for Energy, E-Commerce and Postal Services (Mr. Stephen Timms): On 17 December 2002, *Official Report*, column 45WS, the then Minister for Energy and Construction, my right hon. Friend the Member for Cunninghame, North made a statement to Parliament saying that Ministers were minded to accept the recommendation of the GB system operator selection panel that National Grid Company's application for the role of GB system operator should be accepted. Licensing of the GB system operator could not take place until the Energy Bill had received Royal Assent. The necessary legislation is now in place and I have confirmed the appointment of the National Grid Company as the GB system operator under the British Electricity Trading and Transmission Arrangements (BETTA), with effect from 1 September 2004.

World Trade Organisation

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): On 1 August the General Council of the World Trade Organisation agreed a framework text for further negotiations on the Doha development agenda. Commissioners Lamy and Fischler negotiated on behalf of the European Union. I warmly welcome this framework agreement, which is a crucial step on the road to delivering a trade round that will benefit developed and developing countries alike.

On 17 September last year I made an oral statement to the House, *Official Report*, columns 861–863, about the WTO ministerial conference in Cancun, where WTO Members had been unable to reach an agreement. In that statement I said that in order to get the Doha development agenda back on track, the WTO community would need to lift its sights to the prize on offer. I believe that WTO members have done just that. The period since Cancun has been marked by a much more positive and business-like atmosphere and the framework agreement has now cemented the progress made.

For the most part the purpose of the framework agreement is to set out guiding principles for future negotiations rather than to provide specific proposals. However, it contains sufficient detail to allow technical discussions to continue during the rest of this year, when the US presidential elections and the appointment of a new College of Commissioners are likely to limit political engagement in the round.

The framework agreement gives greater detail on the direction of the negotiations on agriculture, industrial tariffs, commits WTO members to negotiate on a trade facilitation agreement and sets a revised target date for more requests in the ongoing services negotiations. Agriculture is generally acknowledged to be the key to progress in the round and the agriculture section contains a welcome level of detail. The agreement provides for extensive special and differential treatment for developing countries across all the sectors covered. Three of the four so-called Singapore issues (competition, investment and transparency in government procurement), divergent views on which did much to derail talks at Cancun, have been dropped from the Doha development agenda. The fourth—trade facilitation—will now be the subject of negotiations.

The text of the agreement reflects the increasing influence of developing countries within the WTO. This is a development that I have previously welcomed. India and Brazil in particular played an influential role in the lead up to the agreement. Both the G20 group (larger developing country agricultural exporters) and G90 (some 62 smaller developing countries) engaged in the negotiations in a flexible and constructive manner. My right hon. Friend the Secretary of State for International Development, my right hon. Friend the Secretary of State for Environment, Food and Rural Affairs, my hon. Friend the Minister for Trade, Investment and Foreign Affairs and I were in regular contact with a number of influential members of both of these groupings, as well as our EU colleagues, to underline the importance of reaching an agreement. My hon. Friend the Minister for Trade, Investment and Foreign Affairs and I between us attended the two General Affairs and External Relations Council meetings held in the last week of July to agree the EU's position for this stage of the negotiations.

The Government have been strongly supportive of the Commission's approach to negotiations in the period since Cancun. We consider that the Commission have shown leadership and flexibility to move talks forward, capitalising on the stronger negotiating position that the EU enjoys after the CAP reforms of June 2003 and March 2004, which will cut significantly the level both of trade-distorting domestic support and export subsidies. In particular, the conditional offer to eliminate of export subsidies in the letter of 9 May from Commissioners Lamy and Fischler to WTO trade Ministers helped to breathe new life into the talks and encouraged other developed countries to match the EU's level of ambition. My hon. Friend the Minister for Trade, Investment and Foreign Affairs and I attended meetings of the General Affairs and External Relations Council in the week leading up to the Framework Agreement where we strongly supported the European Commission.

There is much still to be done. The challenge now for the whole WTO membership of 148 countries is to build on this success and to ensure that the momentum that has been built up is maintained in the detailed negotiations that will now follow. Success in the round has the potential to deliver huge benefits, including for developing countries as their opportunities for trade increase, so adding to their prosperity, aiding development and contributing towards the achievement of the millennium development goals.

The Government will continue to do all we can, both inside the EU and within the broader WTO community, to help deliver an ambitious development-focussed round. In particular, we will press hard for substantial progress before the sixth WTO ministerial meeting in Hong Kong scheduled for December 2005.

WORK AND PENSIONS

Remploy

The Parliamentary Under-Secretary of State for Work and Pensions (Maria Eagle): I have, on behalf of my right hon. Friend the Secretary of State for Work and Pensions, written to the Chairman of Remploy approving the 2004–05 and 2005–06 performance and resources agreement targets between the Department and the company. The targets have been negotiated by the chief executive of Jobcentre Plus on behalf of my right hon. Friend the Secretary of State for Work and Pensions. The targets for 2004–05 are:

- a total of 1,400 progressions from Remploy factories or Interwork to mainstream unsupported employment;
- Remploy Ltd will keep within an average cost per supported employee of £10,500;
- the company will achieve a gross margin (sales less cost of materials) figure of £60.5 million;
- the company's employee development time will be at least 5 per cent.

The full agreement for 2004–05 has been placed in the Library.

Pension Credit

The Minister for Pensions (Malcolm Wicks): I can now provide the latest monthly progress report on the take-up of pension credit, which became payable on 6 October 2003.

At the end of July, there were 2.58 million pensioner households (3.13 million individuals) being paid pension credit, an increase of 33,000 households (40,000 individuals) during July. As at 31 July, there were 1.92 million households (2.33 million individuals) receiving more money as a result of the introduction of pension credit, gaining by an average £16.02 a week. The average pension credit award at the end of July was £41.80 per week.

Customers whose applications are successful in the period up to October this year will have their entitlement backdated to 6 October 2003 (or to the date of entitlement if this is later). The 2004 Budget statement confirmed that backdating arrangements will continue beyond October 2004. This means that anyone eligible applying after October 2004 will see their entitlement backdated by up to 12 months. A report showing progress to the end of July is available in the Library. The report includes regional breakdowns of the number of pension credit households and is accompanied by tables showing numbers of pension credit awards in parliamentary constituencies in Great Britain. Copies of the report are also available for hon. Members in the Vote Office.

FOREIGN AND COMMONWEALTH AFFAIRS

Middle East Peace Process (Civilian Deaths)

The Minister for Europe (Mr. Denis MacShane): I answered PQs 180074 and 180090 on 28 June 2004, *Official Report*, columns 129W and 131W respectively. Both PQs related to the Middle East Peace Process. The questions and answers given were as follows:

PQ 180074

To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate his Department has made of the number of Israeli civilians killed since the beginning of the intifada in September 2000; and how many were under the age of 18.

Mr. MacShane: We estimate that 944 Israeli civilians have been killed since the beginning of the intifada in September 2000. This estimate is based on a variety of sources, including the UN, NGOs and the media. We do not hold figures for those killed under the age of 18 years.

PQ 180090

To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate his Department has made of the number of Palestinian civilians killed since September 2000; and how many were under 18.

Mr. MacShane: We estimate that 3,242 Palestinian civilians have been killed since the beginning of the intifada in September 2000. This estimate is based on a variety of sources, including the UN, NGOs and the media. We do not hold figures for those killed under the age of 18 years.

Since answering PQs 180074 and 180090 however, it has been brought to our attention by the British Embassy in Tel Aviv that the figures provided in these answers on 28 June were inaccurate. The figures given were for total deaths on each side rather than civilian deaths, so these figures would also include Israeli Defence Force soldiers, militants and suicide bombers as well as civilians.

I apologise for this error and would like to clarify that the figures initially given in the answer of 28 June were for the total numbers of Israeli and Palestinian deaths rather than just civilian deaths. Figures for civilian deaths are not held centrally and could be provided only at disproportionate costs.

Sanctions

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): Currently the United Kingdom implements mandatory UN sanctions, imposed by the UN Security Council acting under chapter VII of the Charter of the United Nations, in relation to Al Quaeda and the Taliban, the Democratic Republic of Congo, Iraq, Liberia, Rwanda, Sierra Leone, Sudan and Somalia. In addition, the UK implements sanctions imposed by the European Union in relation to Bosnia and Herzegovina, Burma, China, the DRC, the former Federal Republic of Yugoslavia, Libya, Moldova, Sudan and Zimbabwe. In accordance with a decision of the OSCE, the United Kingdom implements arms embargoes on Armenia and Azerbaijan. A full list of sanctions regimes and restrictive measures implemented by the UK has been placed in the Library of the House. Annexed to this is a summary of additional UK restrictions on the export of strategic goods. These documents are also available on the FCO website at http://www.fco.gov.uk/sanctions. and are updated each time there are changes to sanctions regimes implemented by the UK, or to UK restrictions on the export of strategic goods. Restrictive measures implemented in the UK are also implemented in the Overseas Territories and Crown dependencies.

European Union

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): I will today lay before Parliament the latest White Paper on Prospects for the EU (Cm 6310). Copies will be placed in the Library of the House and will be available from the Vote Office in the House of Commons and the Printed Paper Office in the House of Lords. A copy will also be available on the Foreign and Commonwealth Office website www.fco.gov.uk.

This White Paper is a supplement to the one published in April on Prospects for the EU in 2004 (Cm 6174). As well as setting out the issues we expect the Union to address in the rest of the year, it updates readers on developments since April and provides a short breakdown of the achievements of Ireland's EU Presidency, which ran from January to June. It covers the full gamut of EU business, from enlargement—and whether we should start negotiations with Turkey on membership of the Union—to the Lisbon Agenda for economic and social reform—which includes developing the single market, simplifying new and outdated regulation, and increasing employment.

The purpose of this White Paper, and April's, is to keep Parliament and the public informed about developments in the EU, the Government's approach to them and the benefits they will bring to the UK and its citizens.

The next White Paper on Prospects for the EU will be published in January 2005, to be followed by a shorter update—along the lines of the one published today—in July 2005.

These White Papers are part of the Government's commitment to make EU business more accessible and interesting for Parliament, the media and members of the public alike—by providing an appropriate amount of detail and depth on significant progress that might have an impact on our daily lives. I hope they will play a vital role in involving Parliament more closely in EU affairs, and trust that Members of both Houses will read them. I commend this White Paper to the House.

Sanctions (Recent Changes)

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): On 11 June the Council of the European Union adopted common position 2004/510/CFSP. The Council adopted EC regulation 1353/2004 on 27 July. These amend common position 2004/31/CFSP of 10 January and EC regulation 131/2004 of 28 January, which renewed the arms embargo against Sudan and added an exemption for the supply of de-mining equipment. The new measures broaden the exemptions to the prohibition on the supply of arms, technical assistance and financial assistance to include crisis management operations of the African Union. This allows EU member states to offer full practical and financial support to the deployment of the African Union's ceasefire commission to Darfur. With the support of her Majesty's Government, the United Nations Security Council on 30 July unanimously adopted resolution 1556 (2004), which, inter alia, imposes an arms embargo against non-governmental entities and individuals, including the Janjaweed, operating in the states of North Darfur, South Darfur and West Darfur in Sudan.

With the support of Her Majesty's Government, the United Nations Security Council on 27 July 2004 unanimously adopted resolution 1552 (2004) on the

situation concerning the Democratic Republic of the Congo. This renewed the arms embargo imposed by UNSCR 1493 (2003) for one year and extended the mandate of the UN expert group established by UNSCR 1533 (2004) to monitor the embargo for a further six months.

With the support of Her Majesty's Government, the United Nations Security Council on 8 June unanimously adopted UN Security Council resolution 1546 (2004). Among other measures, the resolution leaves the arms embargo in place, with new exemptions for arms and related material required by the Government of Iraq or the multinational force to serve the purposes of the resolution. The resolution passes all outstanding rights, responsibilities and obligations relating to the oil for food programme to the Government of Iraq, including ensuring independently authenticated confirmation that goods have been delivered, and it leaves in place the financial sanctions upon former Government of Iraq funds and any funds belonging to Saddam Hussein, senior members of his regime and their immediate family members.

On 26 April, the Council of the European Union adopted common position 2004/423/CFSP and EC Regulation 798/2004, concerning Burma. These renewed the restrictive measures imposed by common position 2003/297/CFSP from 30 April 2004 for a further 12 months, in view of the current political situation in Burma, notably the failure of the regime to pursue the process of national reconciliation, respect for human rights and democracy. The restrictive measures comprise an assets freeze and travel ban against members of the regime and others, an arms embargo, a prohibition on the attachment and hosting of military personnel to diplomatic missions, restrictions on development programmes and a suspension of high-level bilateral governmental visits to Burma.

Written Ministerial Statements

Wednesday 8 September 2004

DEPUTY PRIME MINISTER

Biodiversity and Geological Conservation

The Minister for Housing and Planning (Keith Hill): I am announcing today the publication of a consultation draft of a new planning policy statement on biodiversity and geological conservation and a draft circular (published jointly with the Department for Environment, Food and Rural Affairs) to accompany it. The draft of planning policy statement 9 (PPS9) sets out the Government's national planning policies for biodiversity and geological conservation. The accompanying draft circular provides administrative guidance on the application of the law relating to planning and nature conservation as it applies in England.

It is intended that PPS9, together with the circular and future good practice guidance will, in due course replace planning policy guidance note 9 on nature conservation published in 1994. The draft PPS9, and its supporting documents meet the commitment set out in the planning Green Paper for shorter, more focused and policy rich statements of planning policy with separate advice on non-policy matters.

The draft PPS takes account of legislative changes since 1994 that affect biodiversity and geological conservation, and reflects the commitments in the "Biodiversity Strategy for England", published in 2002. It has a clearer focus on the need to conserve, enhance and restore biological diversity.

Consultation on the draft of PPS9 and the accompanying draft circular will run until 9 December 2004. Copies of the draft consultation papers have been made available in the Libraries of the House.

Standards Board for England

The Parliamentary Under-Secretary of State, Office of the Deputy Prime Minister (Phil Hope): The Standards Board for England's annual report and accounts for 2003–04 have been placed in the Library of the House together with an annual review of the board's activities during the year.

The report and accounts cover the second year of significant operations by the standards board for England. During the year ended 31 March 2004, 3566 allegations of misconduct had been referred to the Standards Board, an increase of about 20 per cent. compared with the previous year.

The annual report highlights that the board is continuing to work in partnership with local government to promote and sustain the high standards of conduct, which are essential to public confidence in our local democracy.

HEALTH

Mental Health Bill

The Minister of State, Department of Health (Ms Rosie Winterton): The Government have today published a Mental Health Bill. This Bill will be subject to pre-legislative scrutiny. A joint scrutiny committee has been established and has been asked to present its report by the end of March 2005.

Mental health legislation sets out the circumstances in which a person can be treated for mental disorder without their consent and the safeguards they are entitled to. The vast majority of people with mental health problems do not need to be treated against their wishes but occasionally this is necessary, normally to protect themselves, but more occasionally to protect others.

It has long been recognised that the current mental health legislation, the Mental Health Act 1983, needs to be updated, in line with the development of services and of human rights law to give a greater focus on patients' needs and wishes. In 1998, the Government set up an expert committee to advise on how mental health legislation should be shaped to reflect contemporary patterns of care and treatment and to support government policy. In 2002, following a Green and a White Paper, a draft Bill was published for consultation.

Since then, the comments received on the 2002 draft have been considered in full and, following further work and meetings with stakeholders, a revised Bill has been produced. We have made changes to address the concerns expressed by stakeholders. The Bill brings the framework for the compulsory treatment of people with serious mental health disorders up to date.

This Bill needs to be considered in the context of the wider Government strategy to improve mental health services. In 1998, the National Service Framework for mental health set out national standards for the care and treatment of adults with mental disorder. The NHS Plan announced, in 2000, substantial additional investment for mental health services. As a result of the National Service Framework and the additional investment, significant improvements have been made in mental health services. This is particularly the case in relation to community-based services, such as crisis resolution and assertive outreach teams. It is important that mental health legislation is now modernised.

The Bill will provide important benefits. The Bill means that the small minority of people with mental health problems who need to be treated against their wishes, normally for their protection but occasionally to protect the public, will get the right treatment at the right time. This meets the needs of the individual patient and makes sure that the public is protected.

The Bill ensures there is no compulsion without the provision of appropriate treatment. Safeguards for patients will be greatly strengthened with a choice of representative, access to advocacy and all use of compulsory treatment beyond 28 days having to be authorised by the new independent mental health tribunal or the courts. Under the Bill, patients who are ill and vulnerable will be able to get the treatment they need in the community, including non-dangerous mentally disordered offenders who may otherwise receive a prison sentence.

Legislation about compulsory treatment inevitably raises many difficult issues. There has already been much discussion about this proposed new legislation. Pre-legislative scrutiny will now allow further considered debate. We look forward to receiving the report of the scrutiny committee.

Copies of the Bill and of the explanatory notes have been placed in the Library.

HOME DEPARTMENT

Asylum Seekers

The Minister for Citizenship and Immigration (Mr. Desmond Browne): The Government are firmly committed to ensuring that the country information material they produce to inform asylum decisions meets the highest standards.

Accurate, objective and up to date country information is fundamental to a fair and effective asylum system. The independent advisory panel on country information (APCI) was set up to provide rigorous external scrutiny of country information material produced by the Home Office and make recommendations to help ensure that it is of the highest quality. The APCI has already shown itself to be working in a robust and forthright manner.

While we are satisfied that the country information material produced by the Home Office is already of a good standard, we recognise that improvements can be made. We have responded swiftly and positively to issues raised by the APCI and announced earlier this year the introduction of a range of improvements in the way the material is produced and quality assured. The measures introduced were welcomed by the APCI and have resulted in a clear improvement in the quality and presentation of country information material.

The panel rightly considers it essential that the Home Office's country information material should not only be objective in fact, but that it should also be perceived as being objective and have the confidence of all its users. The APCI was concerned that the country information would not be perceived as impartial while it was being produced by country information and policy unit (CIPU) which also has the function of advising on the development of country specific asylum policies. The APCI made a recommendation that the Home Office bring forward proposals to address this issue.

We have given very careful consideration to the APCI's recommendation and I am announcing today that the current country information and country policy functions of the CIPU will be separated. In future, the production of country information material used by the Home Office will be undertaken by a country information unit dedicated solely to that function. The existing CIPU country policy function will be undertaken separately within the Immigration and Nationality Directorate. These changes, which directly reflect the APCI's thinking, will be put in place as soon as the necessary arrangements can be made.

I am also announcing today that in future country reports will be produced and published at six-monthly intervals on the top 20 asylum generating countries (and other countries for which an operational need is identified) instead of the current top 35 countries. The reduction in the number of country reports produced is consistent with the significant reduction in asylum intake. This step will enable the resources freed to be used to help assure the standard of the country information material produced, whilst ensuring that country reports are still produced on the main asylum generating countries. Country information material will continue to be produced on those countries which fall outside the top 20 in the way that is now done for countries which fall outside the top 35.

Immigration Applications

The Minister for Citizenship and Immigration (Mr. Desmond Browne): I am publishing today a consultation document setting out options for new fees for immigration applications. As part of the ongoing review of the immigration system, the Home Office has been reviewing the charges for a range of immigration services: leave to remain; leave to remain associated with an immigration employment document; the Highly Skilled Migrant Programme, the Sectors Based Scheme, and Travel Documents.

We are seeking the views of the public, businesses, the education sector, legal representatives and our other stakeholders, regarding proposals to include the costs of non-asylum appeals and enforcement activity in the overall charge for an immigration application. We are also consulting on proposals to:

- introduce new payment methods for customers;
- introduce fees for applications for the transfer conditions of limited leave to a new passport or travel document; and
- introduce separate travel documents for children.

We aim to implement new charges from 1 April 2005.

We will be consulting on charges for work permits and for applications to the Seasonal Agricultural Workers Scheme later in the year.

A partial regulatory impact assessment, which estimates the likely cost to business of increasing the fees for applications to the sectors based scheme and applications for leave to remain associated with an immigration employment document, is available by visiting www.homeoffice.gov.uk or www.direct.gov.uk, or by telephoning 0114 279 3422.

An electronic version of the consultation document is available from 8 September on the Home Office website at: www.homeoffice.gov.uk. Hard copies of the consultation document will be available from 15 September, in the Libraries of both Houses or from the Charging Programme Office (telephone: 0151 235 8359).

Interested parties are invited to submit their comments and views, by Wednesday 8 December 2004 to:

Charging Programme Office, 3 Floor Cunard Building, Water Street, Liverpool, L2 OPP or by e-mail to: charging.consultation@homeoffice.gsi.gov.uk.

All replies that are received will be made public unless the author explicitly requests that this should not happen.

DEFENCE

Defence Procurement Agency

The Minister of State, Ministry of Defence (Mr. Adam Ingram): Six key targets have been set for the Chief Executive of the Defence Procurement Agency for the financial year 2004–2005.

In a change to previous years, the first three key targets now apply to all projects over £20 million which have passed their main gate approval but not yet achieved in service date (ISD). Key targets 2 and 3 are consistent with the goals set in the Department's public service agreement (PSA) for major equipment projects, although for the key targets, all movement in most likely ISD and cost forecasts will be measured, rather than only that which is in excess of the approval. The fourth key target relates to improvements in DPA Customer satisfaction. A revised key target 5, comprising a basket of measures, replaces the previous straight measure in order to provide a better indication of DPA efficiency. There is a new sixth key target reflecting the importance which the Department attaches to delivery of assets to the front-line. The key targets are:

Key Target 1: Key requirements Compliance

Predicted achievement of customers' core requirements[1] for projects: 97 per cent.

Key Target 2: Average in-year in service date slippage

Average in-year slippage of in service dates not to exceed 0.9 months

Key Target 3: Average in-year cost growth

Average in-year cost variation not to exceed 0.5 per cent.

Key Target 4: Customer survey satisfaction rating

Customer satisfaction rating of 72 per cent.

Key Target 5: Achievement of planned efficiency measures[2]

(i) Measured asset turnover in months by comparing assets delivered to total assets less current liabilities	69.6
(ii) Measures value of assets delivered as a multiple of operating cost	10.7
(iii) Measures value of assets added to the balance sheet as a multiple of operating cost.	16.2

[1] Around 10 core requirements per projects are agreed between the DPA and MOD headquarters, defining the essential characteristics of the equipment/capability.

[2] Target levels differ from those in the published corporate business plan as they reflect start of year forecast data.

Key Target 6: Asset deliveries

Variance between planned and actual in-year asset deliveries not to exceed 15 per cent.

Ministry of Defence Police and Guarding Agency

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): Key Targets have been set for the chief executive of the Ministry of Defence Police and Guarding Agency (MDPGA) for the financial year 2004–05. This year the key targets focus on MDP and work is ongoing to establish an effective and joined up performance management system that will fully incorporate the MGS and MDP from next year.

The targets are as follows:

Key Target 1:

By March 2005, as a means of providing greater public reassurance, ensure that no more than 25 per cent. of the duty time of dedicated patrol officers is expended on activities not directly related to patrol duties.

Key Target 2:

By 31 March 2005, as a means of reducing crime and protecting MOD property and interests, achieve a crime-solving rate of 50 per cent. for the investigation of primary crime.

Key Target 3:

By 31 March 2005, in order to delivery performance as defined in relevant establishment CSAs, ensure that the Agency fulfils at least 95 per cent. of its funded and agreed customer taskings.

Key Target 4:

By 31 March 2005, in order to maintain appropriate levels of security as defined in relevant MDP CSAs, seek to maintain and improve upon the average baseline Security Contribution Index score achieved in the previous quarter at each establishment contributing to the index system.

Key Target 5:

By 31 March 2005, within the overall recruitment of police staff, and as part of an overall programme to retain personnel levels, to have recruited at least 15 per cent. women and 4 per cent. from minority ethnic communities.

Key Target 6:

By 31 March 2005, excepting unforeseen operational commitments, and with the intention of providing cost effective policing and guarding, as well as maintaining an appropriate work life balance for personnel, reduce the amount of overtime worked by each officer to no more than eight hours worked per week averaged over a 17 week rolling period.

Key Target 7:

By 31 March 2005, in order to maintain a healthy and effective workforce and contribute to the achievement of other key targets, reduce the overall level of sickness lost within the Agency (except MGS personnel) by one hour per member of staff per month against the corresponding achievement in the previous year.

Key Target 8:

By 31 March 2005, to have provided a greater clarity as to the extent of fraud within the MOD and thereby to have raised the awareness, by engaging with, and encouraging the MOD community to provide intelligence, with a view to increasing the number of reported fraud cases.

Deployment of RAF Harrier GR7s to Afghanistan

The Secretary of State for Defence (Mr. Geoffrey Hoon): The United Kingdom has a long-standing commitment to help the people of Afghanistan to rebuild their country as a stable, secure and prosperous nation. That process is now approaching a vital stage. NATO is in the process of expanding the international security assistance force (ISAF) by creating more provincial reconstruction teams (PRTs). The coalition, meanwhile, continues to deploy PRTs of its own and to engage the remnants of the Taliban and its al-Qaeda supporters that reject all the Afghan people have achieved since 2001. Both the ISAF and the coalition provide essential support to the Afghan transitional

authority and to the United Nations' Assistance Mission Afghanistan as they prepare for the Afghan presidential elections which are due on 9 October 2004.

These are important tasks and both the coalition and the ISAF merit our support. In response to a coalition request for the United Kingdom to provide a close air support capability to coalition forces operating in southern Afghanistan, I have agreed the deployment of six Royal Air Force Harrier GR7 aircraft to Kandahar, Afghanistan. The aircraft will be provided by No. 3 Squadron, Royal Air Force, and the deployment is planned to be for nine months. The first personnel from 53 Field Squadron (Airfield Support), Royal Engineers, and No. 3 Squadron have already deployed to Kandahar and the force should be operational by the end of this month. The deployment will reach a strength of some 315 personnel in its early stages but will eventually settle at a strength of about 230. The cost of the deployment is estimated to be some £35.5 million.

This is our first deployment of combat aircraft to Afghanistan in the current campaign. While their principal role will be to support coalition forces, the aircraft will also be available to support the ISAF. NATO has identified three such tasks: close air support as ISAF expands into Western Afghanistan; an airborne intelligence, surveillance and reconnaissance (ISR) capability to support all ISAF forces, and; the provision of "air presence patrols" as part of the ISAF's support for the security of the Afghan presidential elections.

The versatility of the Harriers, which will be equipped with laser-guided bombs, air to surface missiles and the joint reconnaissance pod, makes them an ideal asset to meet all these tasks. Deployment of these aircraft confirms our commitment to the NATO mission in Afghanistan, our support for the ISAF and our determination to help ensure the success of the international community's support for the Afghan electoral process. The Army and Royal Air Force personnel will provide a highly capable and credible force that will contribute to improving the security environment in the region. This is another clear sign of the UK's long term commitment to achieving a stable and secure Afghanistan.

Naval Recruiting and Training Agency

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): In 1997 the initial and major phase of the transfer of support service activities to Flagship Training Ltd (Flagship), under partnership arrangements with the Naval Recruiting and Training Agency (NRTA), was agreed and subsequently implemented.

I am pleased to inform the House that I have now agreed in principle to the next phase under this arrangement and the transfer of the provision of services which falls into two categories: harmonisation, and the integration of the nuclear department.

This phase will enhance the support services already transferred, providing greater efficiencies and effectiveness across the five major training Establishments for the Royal Navy. There are potential total savings for the Naval Recruiting and Training Agency of approximately £6 million over the remainder of the contract period to 2011.

The anticipated number of posts to be transferred is 296 (273 civilian and 23 service) under harmonisation and 24 (20 civilian and 4 Service) in the nuclear department. The trades unions have been regularly informed of progress and the formal consultation process has begun. A copy of the consultative documents has been placed in the Library of the House.

Training Group Defence Agency

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): The commander-in-chief, Royal Air Force personnel and training command has set the chief executive of the Training Group Defence Agency the following targets for financial year 2004–2005:

Key Target 1A:
Output—RAF Initial Flying Training

To recruit and train the required number of Royal Air Force aircrew to the standards required for entry to operational conversion unit training and other specialist flying training courses.

Fast-Jet Pilots	42
Multi-Engine Pilots	48
Rotary Wing Pilots	46
Fast-Jet Weapons Systems Operators	28
Multi-Engine Weapons Systems Operators	9
Non-Commissioned Aircrew	103
Total	276

Key Target 1B:

Output—RAF Initial Ground Training

To recruit and train the required number of Royal Air Force personnel to the standards required to undertake ground appointments.

Officer Basic Specialist Training	274
Airman Basic Specialist Training	2,166
Total	2,440

Key Target 2A:
Output—Defence Flying Training

To train aircrew of the three services to standards for entry to the Royal Air Force and Royal Navy operational conversion unit training, the Defence Helicopter Flying School and other specialist flying training courses, as well as providing training places for international students.

RAF	560
RN	164
Army	305
Tri-Service	95
International	113
Total	1,237

Key Target 2B:
Output—Defence Ground Training

To train personnel of the three services to the standards required to undertake ground appointments.

RAF	17,763
RN	3,983
Army	6,766
Total	28,512

To underpin the military effectiveness of the Royal Air Force by the timely provision of military personnel trained to the standards agreed with the agency's customers.

Key Target 4:
Cost Management

To ensure that the necessary systems are in place to manage the business on an output-cost basis.

Key Target 5:

Efficiency

To reduce the average per capita cost of training by improving first time and overall pass rates.

	First Time Pass Rate	*Overall Pass Rate*
Officers—Phase 1	75%	98%
Officers—Phase 2	90%	97%
Airmen—Phase 1	75%	90%
Airmen—Phase 2 (< 38 weeks)	80%	90%
Airmen—Phase 2 (> 38 weeks)	63%	83%

SOLICITOR GENERAL

Iraq: Prosecution of Trooper Williams

The Solicitor-General (Ms Harriet Harman): My right hon. Friend the Attorney-General has made the following Ministerial Statement.

"As I indicated in my written statement to the House on 14 June, *Official Report, Lords*, columns WS 22–24, this case, which involves an alleged unlawful killing by shooting of an Iraqi citizen during the course of an arrest, was brought to my attention after charges were dismissed by the soldier's commanding officer. This meant the case could not be tried by court martial. I referred it to the CPS who asked the Metropolitan Police for assistance in collecting further evidence.

I can confirm that today the Metropolitan Police, on the advice of the CPS, charged Trooper Williams with the murder of Hassan Said on 3 August 2003 in Ad Dayr Iraq. Trooper Williams has been kept in custody to appear at Bow Street magistrates court this afternoon.

Trooper Williams is a member of 2nd Royal Tank Regiment."

Written Ministerial Statements

Thursday 9 September 2004

TRADE AND INDUSTRY

Nuclear Industry (Decommissioning)

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): The Government's updated policy on the decommissioning of the UK's nuclear facilities has been published today. Copies have been placed in the Libraries of both Houses. The statement is also available on the DTI website at: www.dti.gov.uk.

HOME DEPARTMENT

"Policing: Building Safer Communities Together"

The Minister for Crime Reduction, Policing and Community Safety (Ms Hazel Blears): I have today placed in the Libraries of both Houses copies of the results from the consultation paper "Policing: Building Safer Communities Together".

On 4 November 2003 a major consultation on police reform was launched with the publication of the above paper. A shorter questionnaire version aimed at the general public was also published on 27 February 2004. These documents set out the Government's vision for the future of police reform and posed a series of questions on how to achieve this. We want to build a modernised, truly representative police service which is more visible and accessible and which delivers core national standards of policing to all communities within a framework which enables forces to respond to local priorities.

The response to the consultation was very encouraging and the clear message received was that, while there are areas in which debate and discussion will continue, we are heading in the right direction. In particular there was a strong appetite for greater community engagement, more visible and accessible policing and giving local people a greater say in determining local community safety priorities.

Additional copies of the consultation results, and the original consultation paper and questionnaire are available on the police reform website www.policereform.gov.uk.

Terrorism Act 2000 (Independent Reviewer)

The Secretary of State for the Home Department (Mr. David Blunkett): Lord Carlile of Berriew QC has agreed to continue in his role as independent reviewer of the Terrorism Act 2000 for a further three years.

I am grateful to Lord Carlile in accepting this invitation.

HEALTH

Blood Donation and vCJD

The Secretary of State for Health (Dr. John Reid): Following my statements to the House on 17 December 2003 and 16 March 2004 concerning variant Creutzfeldt-Jakob disease (vCJD) and blood, I wish to provide an update on some further developments in this area.

My statement on 17 December 2003 informed the House of the first case of possible transmission of vCJD via blood transfusion and the precautionary actions taken. Those actions included measures to protect future blood supplies and contacting recipients of blood from donors who subsequently went on to develop vCJD. A further written statement on 22 July 2004 indicated a second case of possible vCJD prion transmission via blood transfusion had been confirmed.

I also made reference in December to the fact that other patients, including people with haemophilia and other bleeding disorders, would have received plasma products before they were sourced from the United States of America. Although there are now two reports of possible transmission of vCJD via blood, the risk of transmission via plasma products, which will have been derived from large pools of plasma donated from many thousands of people—and therefore heavily diluted—is uncertain. But it cannot be excluded. The CJD incident panel (CJDIP) was asked to advise on a case-by-case basis (having adopted a highly precautionary approach) which recipients of plasma products will need to be contacted. This advice has been received and a programme of action has been agreed.

In June 2004 the Health Protection Agency (HPA), on behalf of the CJD incident panel, reported on an assessment of the risk associated with each batch of product and advised my Department on:

> which patients needed to be assessed and possibly subsequently contacted, and
>
> managing the possible risk to public health of those patients.

In the light of these assessments, the HPA is today initiating a process to notify relevant patients of these developments. The HPA is sending information to clinicians to enable them to trace particular plasma products. The clinicians will then notify any patients identified as "at risk" as a precaution. Any patients affected should expect to be contacted by clinicians later this month.

Aside from patients with haemophilia or other bleeding disorders, the other main group of patients who may have received significant amounts of affected blood products are patients with primary immunodeficiency (PID).

Throughout this exercise we have been concerned to ensure that the results of the risk assessment are communicated to patients by the clinicians responsible for their day-to-day care, so that appropriate supporting information can be provided. Further details about the risk assessment exercise will not be disclosed until after patients are informed of the outcome. I will make a further statement at a later date, if necessary.

Richard Neale

The Secretary of State for Health (Dr. John Reid): The report of the committee of inquiry into how the National Health Service handled allegations about the conduct of Richard Neale (Cm 6315) was published today and copies have been placed in the Library. This is one of the three inquiries announced in July 2001 by my right hon. Friend, Alan Milburn, the then Secretary of State for Health. The other two inquiries were to consider how the NHS handled allegations about the conduct of Clifford Ayling, a former GP; and William Kerr and Michael Haslam, former psychiatrists.

The Government would like to thank the chairman of the inquiry, Her Honour Judge Suzan Matthews QC and the two members of her panel, Christine Funnell and Derek Caldwell, for their thorough review of the circumstances surrounding the appointments and employment of Richard Neale in the NHS. Their hard work in bringing together the relevant issues and their sympathy and understanding in dealing with them is very much appreciated. The Government would also like to thank the secretariat and legal team who provided such excellent support for the review.

The Government are very grateful to the former patients of Richard Neale who chose to provide evidence to the inquiry, and to Richard Neale's former colleagues and other witnesses who also gave evidence, all of whom generously gave their time to assist the inquiry.

If we are to learn the lessons when things go wrong we must ensure that systems are in place which have the confidence of patients who wish to raise concerns. All patients have the right to expect a high standard of care from clinicians. Richard Neale fell short of these standards and as a result caused the patients in his care unnecessary distress. I should like to extend my sympathies to all those patients involved who suffered in this way.

The NHS failed many of Richard Neale's former patients and the inquiry has provided the opportunity not only for their voices to be heard, but also to ensure that their experiences will help strengthen the systems now in place to try to prevent similar incidents in the future.

The report sets out in detail the history of Richard Neale's appointments in Canada and his subsequent employment in the UK. It charts the system failures that allowed him to be employed as a consultant without a proper understanding of his background; and a mixture of similar failures coupled with complacency that permitted him to continue practising in spite of concerns being raised about him.

Since these events have come to light, we have taken a number of steps to help avoid similar incidents in the future. In setting out details of the failures over many years, the inquiry found that

"... even before the inquiry began many of the wider lessons had been learnt and change implemented".

The NHS has indeed been subject to considerable changes over the past few years, many having the specific aim of improving the patient experience, especially patient safety. But we are not complacent and we recognise the need for further improvements. The inquiry's conclusions and recommendations, together with those of the Clifford Ayling inquiry also published today, will help us to ensure that the patient experience is properly at the centre of our work in the NHS.

Many of the recommendations made by this inquiry are concerned with improvements in way that complaints are handled by the NHS. These include ensuring that patients have both sufficient and correct information about their treatment to inform their decisions as well as strengthening the role of the Patient Advisory Liaison Service (PALS) to support patients who have concerns, and some of this work is already underway. Issues around complaints are also being considered by the Shipman inquiry, which is likely to produce recommendations in its Fifth Report due later this year. They are also being considered by the William Kerr/Michael Haslam inquiry, whose report is also expected later this year. We will therefore consider these recommendations together with those of the Shipman, Clifford Ayling and William Kerr/Michael Haslam inquiries and give a detailed response in due course.

In the meantime, the Government will consider very carefully the other recommendations concerning the appointment and employment of consultants and doctors in other grades, as well as the role of the Council for the Regulation of Healthcare Professionals (now known as the Council for Healthcare Regulatory Excellence), and will respond to these as soon as we can.

We have made clear that patient safety is a priority and the UK has led the way in pushing forward in this area. Tomorrow, I will be talking to fellow EU health ministers about the lessons EU members can learn from one another and make clear that patient safety will be a key issue during the UK presidency of the EU next year.

This inquiry has provided a valuable insight into a series of errors over a long period of time in the appointment processes and in Richard Neale's employment performance. It has painstakingly identified the causes of those errors and has made helpful recommendations about how best to avoid repeating them. We will review the improvements we have made in the past few years to ensure that they address the concerns raised in the report. The Government are grateful to all those whose contributions to the review will help us fulfil our commitment to patient safety.

Clifford Ayling

The Secretary of State for Health (Dr. John Reid): The report of the committee of inquiry into how the National Health Service handled allegations about the conduct of Clifford Ayling (Cm 6298) is being published today and copies have been placed in the Library. This is one of the three inquiries announced in July 2001 by my right hon. Friend, Alan Milburn, the then Secretary of State for Health. The other two inquiries were to consider how the NHS handled allegations about the conduct of Richard Neale, a former gynaecologist; and William Kerr and Michael Haslam, former psychiatrists.

The Government would like to thank Dame Anna Pauffley, the chairman of the inquiry, and the two members of her panel, Peter Berman and Mary Whitty, for their delicate handling of undoubtedly sensitive issues. Their report is painstakingly researched and

provides in clear detail a history of events in the NHS that led, in December 2000, to Clifford Ayling's conviction on 12 counts of indecent assault. It charts the procedures then in place through which patients could raise concerns about their treatment; and the failures in those systems that let down many of Clifford Ayling's patients so badly. The Government are very grateful to Dame Anna and her panel for producing such a comprehensive report and to the secretariat and legal team for their tremendous support.

The Government are also grateful to those former patients of Clifford Ayling who came forward and provided evidence to the inquiry which must, at times, have been very difficult and painful. The systems in place in the NHS to help and support these patients who raised concerns about Clifford Ayling's behaviour and treatment let them down. No patient should be left in a position where those in charge of their care are able to abuse their trust and take advantage. My sympathies go to the patients involved in this case. They will have the benefit of knowing that their evidence will help to ensure that better and more robust systems will be put in place to avoid similar incidents in the future.

Similarly, the evidence provided by former colleagues was clearly very important to the inquiry in determining how the systems worked, or failed. Their candour in giving evidence is very much appreciated.

Since these events have come to light, we have taken a number of steps to help avoid similar incidents in the future and the report itself recognises that considerable change has taken place in the NHS since Clifford Ayling practised, concluding . . .

> "The impact of the Government's plans and investment in health services has dramatically altered the landscape of the NHS. At an organisational level, it is almost unrecognisable as the NHS in which Ayling practised. The emphasis on patient safety, remedial action for poor clinical performance, closer scrutiny of untoward events and empowering patients in the management of services are greatly welcomed."

The changes introduced in recent years have already sought to address the weaknesses found by the inquiry as being a cause for concern. For this reason the inquiry has directed its recommendations towards strengthening the systems now in place rather than offering new or alternative proposals for action.

The Government welcome the recommendations in the report which include proposals both to address the issue of sexualised behaviour and to ensure that guidance is available for dealing with it; and that all trusts and primary care practices should have an explicit policy on the use of chaperones. These are important issues that will require detailed consideration if changes are to be implemented effectively. Likewise, the role of patient advocacy when dealing with 'sexualised behaviour' in both the hospital and the primary care setting will also require further detailed consideration.

The report acknowledges that considerable changes have already been made. These include substantial changes to the NHS complaints procedure and the current development of guidance to trusts on how to handle untoward incidents. Further changes are in hand and planned.

It recommends improvements to the recording of complaints against individual practitioners and the importance of co-ordinating complaints, coupled with the need to ensure that employers are aware of other employment being undertaken by their medical staff.

Other recommendations include requiring staff of NHS trusts and other healthcare organisations employing staff, such as deputising services, to declare concurrent employment and for this requirement to be suitably adapted to ensure that PCTs are kept informed of other professional work undertaken by GPs; the provision of better support for single-handed practitioners and their practice managers; and clarification of the roles of the respective professional and local bodies in primary care.

The Department of Health is also asked to develop a memorandum of understanding with professional regulatory bodies and the Crown Prosecution Service; and to work with strategic health authorities to provide guidance to trusts on handling untoward incidents.

Issues around complaints are also being considered by the Shipman inquiry, which is likely to produce recommendations in its fifth report due later this year. *They are also being considered by the William Kerr/* Michael Haslam inquiry whose report is also expected later this year. We will therefore consider these recommendations together with those of the Shipman, Neale and William Kerr/Michael Haslam inquiries and give a detailed response in due course.

The Department of Health is asked to take account of the inquiry's recommendations in the development of its current work on a memorandum of understanding with the NHS, the police and the Health and Safety Executive. We shall of course ensure that the report and its recommendations are brought to the attention of the project board taking this work forward. As part of this work, guidance is currently being developed for the NHS including a strategy for involving patients and others.

Our purpose in setting up this inquiry, as with all investigations of errors in the NHS, is to learn the lessons and put in place procedures to minimise the risk of similar errors occurring in the future. As already indicated, much work has already been done and further work is in hand. We very much welcome this report and its recommendations, and those of the Richard Neale inquiry also published today, with their emphasis on putting patients at the centre of health care. These reports will provide an important contribution to a continuing process of improvement.

We have made clear that patient safety is a priority and the UK has led the way in pushing forward in this area. Tomorrow, I will be talking to fellow EU health ministers about the lessons EU members can learn from one another and make clear that patient safety will be a key issue during the UK presidency of the EU next year.

It is completely unacceptable that the events described in this report were allowed to happen. In acting on the inquiry's recommendations we will be guided by the need to prevent future patients having to suffer in the same way as many patients of Clifford Ayling.

FOREIGN AND COMMONWEALTH AFFAIRS

Libya: Future Defence Requirements

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): On 19 December 2003, Libya announced that it would dismantle its weapons of mass destruction programmes, and limit its ballistic missiles to a range of less than 300km. Since then, Libya has been working to put these commitments into effect, and has been pursuing a course of reintegration into the international community. The Government welcome and fully supports this process.

The Government recognise that Libya, following its decision to renounce weapons of mass destruction, has legitimate defence requirements. The United Kingdom has a clear interest in developing an open and co-operative relationship with Libya on defence matters. During his visit to Libya on 25 March, my right hon. Friend the Prime Minister announced the appointment of General Robin Searby as the United Kingdom Defence Co-ordinator for Libya in order to offer Libya a new military relationship with the United Kingdom. As a natural part of progress towards full normalisation of the United Kingdom's relations with Libya, the Government intend to respond to Libyan requests to discuss their legitimate defence requirements in detail.

The Government welcome news of Libyan and German agreement on a compensation package for the victims of the 1986 La Belle disco bombing as a significant milestone in the process of rebuilding the United Kingdom's and the European Union's relations with Libya. In light of this agreement, the United Kingdom expects to revisit the issue of the EU arms embargo imposed on Libya in 1986 with EU partners over coming months. If the embargo were removed, the Consolidated EU and National Arms Export Licensing Criteria (which apply to all countries) would be the test against which any proposed export of defence equipment to Libya would be assessed.

While the embargo remains in place, all contact with Libya in this area must fall within the terms of the EU arms embargo and United Kingdom law. This means that no commitments in relation to the actual supply of licensable defence equipment will be made while the embargo is in place.

European Union Charter of Fundamental Rights

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): At the European Council in Brussels on 17–18 June 2004, EU Heads of Government agreed to include the charter of fundamental rights as part II of the constitutional treaty. This statement sets out the Government's views on the charter of fundamental rights.

Changes to the European Union charter of fundamental rights, which make it suitable for incorporation into the treaties.

The EU charter was agreed at Nice in 2000 as a political declaration, not as treaty law. At the same time, the European Council agreed that

"in accordance with the Cologne conclusions, the question of the charter's force would be considered later"—

conclusions of the Nice European Council reference 00/1843, deposited in the Library of the House on 11 December 2000. Her Majesty's Government made it clear that we could not agree to incorporation of the charter into the treaties without further legal clarification of its meaning and application. In the White Paper "A Constitutional Treaty for the EU", Cm 5934 of September 2003, Her Majesty's Government said we would make a final decision on incorporation of the charter into the constitutional treaty only in the light of the overall picture at the IGC.

The charter, including its original preamble, and its own special rules of application and interpretation, is now part II of the constitutional treaty, and is introduced by article I-7(1) of the treaty. Article I-7 deals with fundamental rights generally. Besides introducing the charter, article I-7(1) acknowledges the distinction made in the charter between rights and principles. Human rights and other fundamental rights guaranteed by the European Convention on Human Rights (ECHR) and in the constitutional traditions common to all the member states remain general principles of EU law (see article I-7(3)); and insofar as the charter affirms such rights, they will be interpreted in accordance with the ECHR. Article I-7(2) enables the Union to accede to the ECHR in its own right.

Significant amendments have been made to articles II-51 and II-52 in title VII of the charter, now entitled "General Provisions Governing the Interpretation and Application of the Charter". The charter applies to the Union—its institutions, agencies and bodies—and, though only when they are implementing Union law, to the member states. Paragraph (1) of article II-51 has been further clarified to show that the charter does not entail any extension of the Union's competences or any extension of the scope of its application for member states. Paragraph (2) of article II-51 also confirms that the charter does not have the effect of extending the scope of application of Union law beyond the powers of the Union as established in the other parts of the constitutional treaty.

Article II-52 deals with interpretation, and significantly improves the original charter provisions. It indicates that there are four sources for the content of the charter's rights, freedoms and principles: provisions of EU law, the ECHR, the constitutional traditions common to the member states and national law. Under article II-52(2), charter articles based on existing EU law are to be read subject to the conditions and limits set out in the constitutional treaty; that is, they are effectively subordinated to their legal base in other parts of the constitution. Under article II-52(3), rights in the charter that correspond to rights in the ECHR have the same meaning and scope as given by the jurisprudence of the Strasbourg Court. Article I-7(2) on EU accession to the ECHR will help ensure consistency of jurisprudence as between the European Court of Human Rights and the European Court of Justice.

Under article II-52(4), those charter provisions which draw upon the common constitutional traditions of the member states must be interpreted "in harmony" with such traditions.

Article II-52(6) emphasises the respect to be given to "national laws and practices", as referred to in the charter provisions.

Article II-52(5) is aimed at clarifying the distinction the charter makes between legally enforceable rights on the one hand, and the principles, of an aspirational nature, on the other, which are to be found mainly in the solidarity title of the charter. Principles are designed to guide the actions of the Union institutions, and of the member states when implementing Union law. The Union must observe principles by virtue of article II-51(1) when deciding whether to exercise its competences; but there is no obligation to legislate, and the charter itself generates no additional powers to do so. Principles apply within the limitations set out in article II-51(2).

Finally, a further new horizontal article, article II-52(7), has been added to the constitutional treaty. Article II-52(7) requires the charter to be interpreted with due regard to the official explanations, which address the legal bases for each of the charter's provisions. The explanations have been updated and strengthened and are the subject of a special declaration by the member states which ensures that they are published with the new treaty. The official explanations constitute an authoritative guide to the legal meaning of the charter's provisions and will help ensure that the charter is not misinterpreted.

Whether incorporation of the European Union charter of fundamental rights into the treaties will increase the powers of the European Union

Incorporation of the European Union charter of fundamental rights into the treaties will not increase the powers of the European Union. The charter of fundamental rights must be read as a whole, including the general provisions governing the interpretation and application of the charter, as set out in articles II-51 to 53 of the charter. Article II-51(2) provides that the charter does not extend the scope of application of Union law beyond the powers of the Union or establish any new power or task for the Union, or modify powers and tasks defined by the other parts of the constitutional treaty.

The benefits to the United Kingdom of the European Union charter of fundamental rights

Although fundamental rights, freedoms and principles are guaranteed by the Governments of the member states in accordance with national law, there was no statement of rights, etc. binding the European Union. The charter sets out such a statement for the Union. Following incorporation of the charter, the institutions, bodies and agencies of the Union will be bound to recognise those rights, etc. in exercising any of their powers. The charter should help ensure that citizens' basic rights and liberties are protected at EU level, as they are in their own countries.

The effect of Article II-28 of the charter of fundamental rights upon the laws governing industrial relations in the United Kingdom

In practice, article II-28 of the charter of fundamental rights will have no effect upon the laws governing industrial relations in the United Kingdom. Article II-28 states that workers and employers enjoy rights of collective bargaining and action

> "in accordance with Union law and national laws and practices".

There is no Union law in this area, nor could there be in future. EU action on pay, the right of association, the right to strike and the right to impose lock-outs is specifically excluded—see article III-104(6) of the constitutional treaty. Charter article II-52(6) provides that full account should be taken of national laws and practices as specified in the charter. As with all the charter provisions, and by virtue of article II-52(7), it is important to read article II-28 alongside the official explanation, which in this instance points out that

> "The modalities and limits for the exercise of collective action, including strike action, come under national laws and practices".

The United Kingdom's laws governing industrial relations maintain a balance between workers' rights to pursue legitimate trade disputes and employers' rights to conduct their businesses without undue disruption from illegitimate strike action. Article II-28 will not alter that balance.

Diplomatic Missions: Outstanding National Non-domestic Rate Bills

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): The majority of diplomatic missions in the United Kingdom meet their obligations and pay the national non-domestic rate (NNDR) requested from them. The total amount outstanding from all diplomatic missions is approximately £980,000. However, as at 31 July 2004 missions listed below owed over £10,000 in respect of NNDR. Twelve additional diplomatic missions, who owe £10,000 or more in respect of national non-domestic rates, have made arrangements with the valuation office agency to clear their outstanding debts and have not been included in this list.

Country	*Amount*
Mozambique	£33,718,35
Cameroon	£32,640,33
Zimbabwe	£31,778,64
Uganda	£30,892,13
Egypt	£26,674,46
Bangladesh	£25,948,51
China	£25,241,49
Côte d'Ivoire	£20,788,06
Senegal	£19,198,79
Saudi Arabia	£14,400,70
Yemen Republic	£13,582,61
Total	£274,864,07

Diplomatic Missions: Serious Offences

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): From a community of around 20,000 in the United Kingdom entitled to immunity, 16 serious offences, allegedly committed by such persons, were drawn to the attention of the Foreign and Commonwealth Office in 2003. Serious offences are defined in accordance with the 1985 White Paper on Diplomatic Immunities and Privileges—that is as offences that would in certain circumstances, carry a penalty of 12 months or more imprisonment.

Diplomatic Missions: Unpaid Traffic Fines

The Secretary of State for Foreign and Commonwealth Affairs (Mr. Jack Straw): There were 4,565 outstanding parking and other minor traffic violation fines incurred by diplomatic missions and international organisation in the United Kingdom recorded during the year 1 January

2003 to 31 December 2003. These totalled £407,950.00. In May this year the Foreign and Commonwealth Office wrote to all affected diplomatic missions and international organisation giving them the opportunity either to pay their outstanding fines or to appeal against them if they considered that the fines had been issued incorrectly. As a result payments totalling £49,280.00 were received, leaving a total of 3,941 (£350,170.00) unpaid fines for 2003. The table below details those diplomatic missions and international organisations that have 11 or more undisputed fines unpaid.

Diplomatic Mission/ International Organisation	*No. of fines outstanding*	*Amount in £*
Libya	365	34,480.00
Saudi Arabia	264	24,200.00
Nigeria	232	15,850.00
Georgia	172	16,460.00
China	160	14,080.00
Kazakhstan	146	13,670.00
Turkey	116	10,410.00
Egypt	115	10,930.00
Ghana	106	9,650.00
Greece	94	8,230.00
Senegal	93	8,680.00
United Arab Emirates	92	7,900.00
Angola	87	7,380.00
Kuwait	85	8,270.00
France	78	6,370.00
Afghanistan	76	7,370.00
Russia	75	6,980.00
Algeria	72	6,780.00
Jordan	71	6,660.00
Yemen	60	5,110.00
Malaysia	59	5,720.00
Oman	58	3,830.00
Hungary	56	5,500.00
Kenya	44	4,200.00
Brunei	41	3,920.00
Iran	41	3,280.00
Sudan	40	3,350.00
Rwanda	35	2,650.00
Bahrain	34	3,400.00
Mozambique	34	2,690.00
Germany	32	2,980.00
Brazil	32	2,660.00
Korea (DPR)	31	2,450.00
Uganda	30	2,950.00
Bangladesh	29	2,820.00
Ukraine	29	2,480.00
Tunisia	28	2,590.00
Philippines	28	2,380.00
Poland	27	2,030.00
Tanzania	26	2,370.00
Bulgaria	26	2,350.00
Romania	25	2,300.00
Latvia	24	2,130.00
Zambia	23	2,140.00
Lithuania	22	2,150.00
Morocco	22	2,090.00
Cyprus	22	1,780.00
Guinea	22	1,430.00
Syria	18	1,570.00
Cuba	18	1,440.00
Belgium	16	1,600.00
Fiji	16	1,600.00
Pakistan	16	1,540.00
Vietnam	16	1,540.00
Spain	16	1,220.00
Azerbaijan	15	1,400.00
Thailand	15	1,360.00
Sierra Leone	15	990.00
United States of America	14	1,310.00
Cameroon	14	1,300.00
Jamaica	14	1,280.00
Panama	14	1,240.00
Uzbekistan	12	1,020.00
Zimbabwe	12	710.00
Total	3,720	331,200.00

The number of outstanding fines incurred by diplomatic missions in the UK for non-payment of the London congestion charge at the end of its first year of operation in February 2004 was 1,847. The table below shows the 10 diplomatic missions with the highest number of outstanding fines.

1	Egypt	250
2	U.A.E	182
3	Angola	126
4	Kazakhstan	84
5	Sudan	81
6	Tanzania	72
7	Sierra Leone	66
8	Zimbabwe	52
9	Algeria	50
10	Malawi	50

CONSTITUTIONAL AFFAIRS

Mental Capacity Bill

The Parliamentary Under-Secretary of State for Constitutional Affairs (Mr. David Lammy): My noble Friend the Parliamentary Under-Secretary of State, Baroness Ashton of Upholland, has made the following written ministerial statement.

The draft code of practice that supports the Mental Capacity Bill has been placed in the Libraries of both Houses. The Mental Capacity Bill, when it is being considered at Commons Committee stage will be informed by having the draft code available. (We are not in parliamentary terms scrutinising the code itself). The code gives a greater level of detail on many of the Bill's provisions and demonstrates how we think those acting under the Bill will need to be guided when putting these provisions into practice.

LEADER OF THE HOUSE

State Opening of Parliament

The Leader of the House of Commons (Mr. Peter Hain): The State Opening of Parliament will be on Tuesday 23 November. I plan to announce the date of prorogation as soon as I am able.

NORTHEN IRELAND

Tourist Board

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Barry Gardiner): The Northern Ireland Tourist Board's 2002–03 annual report and accounts were deposited in the Libraries of both Houses today.

Written Ministerial Statement

Monday 13 September 2004

WORK AND PENSIONS

Opportunity for All—Sixth Annual Report

The Secretary of State for Work and Pensions (Alan Johnson): Today I have published "Opportunity for All—Sixth Annual Report 2004", Cm 6239. The report sets out our strategy for tackling poverty and social exclusion, and reports on the indicators used to monitor progress. Copies have been placed in the Library.

Poverty and social exclusion are deep-rooted problems that have built up over many years and will take time to resolve. Our strategy has been to tackle the root causes of poverty. I am pleased to report substantial progress has been made on a range of our indicators. For example, we have seen improvements for children living in workless households, people of all ages living in homes that are of the set standard of decency, employment rates, including those for disabled people, lone parents, ethnic minority people and people aged 50 and over, and the number of people sleeping rough.

Undoubtedly there is more to do. Tackling the root causes of poverty takes time as well as commitment and investment. It also requires a partnership across all sectors of society. However, it is exciting that we are now starting to see early signs of some equally deep-rooted change.

Written Ministerial Statements

Tuesday 14 September 2004

EDUCATION AND SKILLS

Higher Education (Admissions)

The Secretary of State for Education and Skills (Mr. Charles Clarke): I am delighted today to commend to the House the report from Professor Steven Schwartz, vice-chancellor of Brunei University, on fair admissions to higher education.

Professor Schwartz and his group have over the last 15 months carried out an extensive and thorough examination of the processes for admission to higher education and have consulted widely on two occasions before presenting their conclusions. I am indebted to Professor Schwartz and all who have worked so diligently with him on this important task.

Responsibility for admissions to higher education rests firmly with the institutions themselves. They have to be satisfied that the students they admit have the ability and potential to complete their studies successfully. That is right and proper and this report unreservedly maintains that position. It also confirms, on the basis of the evidence, that admissions processes in our universities and colleges of higher education are generally fair. Nevertheless, Government has an interest in ensuring that admissions processes also command the confidence of prospective students, their parents, advisers and teachers. That is why I invited Professor Schwartz to identify options for institutions to adopt when assessing the merit, achievement and potential of applicants for their courses.

The report "Fair Admissions to Higher Education: Recommendations for Good Practice" will stand as a practical guide for institutions as they review and develop their admissions policies, practices and systems. Everyone involved with admissions to higher education has a deep concern to ensure that they are fair and that they are seen to be fair. In pursuit of that end, Professor Schwartz has identified five underlying principles that I wholeheartedly endorse as the basis for fair admissions.

These principles will support:

transparency in admissions processes;

selection for merit, potential and diversity;

reliability, validity and relevance of assessment methods;

minimising barriers for applicants; and

professionalism in all aspects of admissions services.

Taken together, the five principles provide the bedrock for building fair admissions systems that provide equal opportunity for all individuals, regardless of background, to gain admission to a course suited to their ability and aspirations. The implementation guidelines also offered by Professor Schwartz will help institutions in mainstreaming the principles within their own admissions systems. I hope that all universities and colleges will take immediate steps to introduce the principles and guidelines within their own arrangements.

The report is more than just a guide however. It is also a call for action by higher education institutions and across the wider education establishment including some matters for Government and the Higher Education Funding Council for England.

These include:

setting up a new Centre of Expertise on Admissions. I can confirm that the Higher Education Funding Council for England will work with Universities UK, the Standing Conference of Principals and the Universities and Colleges Admissions Service to see how this Centre can be established, perhaps under the umbrella of the HE Academy where it would dovetail well with the role for staff development.

research to assess the feasibility and reliability of a single, national test for potential that is not fully demonstrated by exam results. I support this as an early task for the new Centre of Expertise on Admissions and will look carefully at the outcomes of the study alongside the final report from Mike Tomlinson on 14–19 qualifications reform that is due in the autumn, before deciding on the way forward. What we must not have is tests for tests sake, but if there is a genuine need, it would be right to explore the opportunity.

ensuring that consistent levels of advice and guidance are available to all applicants. Similar messages are emerging from Mike Tomlinson's working group as well as from the End to End Review of Careers Education and Guidance that my Department has undertaken. As part of its work on the Youth Green Paper—to be published in the autumn—the Department is consdering how it can best ensure that all young people are able to access and interpret the information and advice they need to make well-informed decisions.

the introduction of a radically different system for applications to higher education whereby students will not apply for higher education courses until they know their exam results. I am concerned that over very many years such a system has acquired the reputation of a holy grail for the HE admissions world—desirable but not achievable. I am aware of the complexity of the practical difficulties that would need to be overcome before a post-qualification application (PQA) system could be introduced, but I remain persuaded by the arguments for PQA which have been endorsed by Professor Schwartz and his group. It must be fairer and more transparent for students to know their final results before making important choices about where and what to study, and this must also aid decision-making by universities. PQA could also help many students, including those from families without a tradition of HE, to feel more confident in applying to our leading universities. I have therefore asked Sir Alan Wilson, the Director General for Higher Education and the former Vice Chancellor of Leeds University, to lead the work on implementation for PQA. He will be assisted by an implementation group which he will establish. Sir Alan will consult with all interested parties, engaging fully the devolved administrations, and advise me on the arrangements and an appropriate timescale for the introduction of PQA.

Finally, ProfessorSchwartz has asked that I initiate a further review of admissions after three years as a means to assess progress in implementing his group's recommendations. I accept that it would be sensible to follow up this initial review and that three years will allow time for some of the more immediate benefits to have been realised and for appropriate action to be underway to secure the longer term ones. I shall commission the further review in due course.

DEPUTY PRIME MINISTER

Housing and Planning in the Regions

The Minister for Housing and Planning (Keith Hill): I am pleased to announce the publication of a consultation paper concerning the merger of the regional housing boards and the regional planning bodies.

The paper responds to one of the recommendations in Kate Barker's review of housing supply (ISBN 1-84532-010-7) published in March. We have already accepted her recommendation that responsibility for housing and planning regional strategies should be merged. The paper proposes that responsibility should rest with regional assemblies. This is in line with our general policy on devolving decision-making and the broadening of the role of assemblies on integrating regional strategies.

The paper also covers proposals for taking forward Kate Barker's recommendation for the provision of independent advice to the regions to strengthen the evidence base that supports regional housing and planning strategies and increase the transparency of the processes for producing these strategies.

Consultation will run until 30 November 2004. Copies of the consultation paper have been made available in the Libraries of the House and it is available on the ODPM website.

Poor Planning Authorities

The Minister for Housing and Planning (Keith Hill): In my statement of 17 July 2003, *Official Report*, column 57WS, I explained our approach to achieving the Office of the Deputy Prime Minister's public service agreement six (PSA6) target. This requires all local planning authorities to complete local development frameworks by 2006 and to perform at or above best value targets for development control (BV109) by 2006 with interim milestones to be agreed in the service delivery agreement. The revised PSA6 target, announced in July as part of the outcome of the spending review, will require all local planning authorities to sustain this level of performance to 2008.

We are now one year nearer to the 2006–07 target date and, whilst local authorities' performance overall has shown encouraging progress, there is still much to be done. I am therefore setting out today ways in which we are working with local planning authorities and strengthening our strategy of engagement with those that are performing poorly in their handling of planning applications.

We will continue to designate poorly performing authorities as planning standards authorities on an annual basis, as described in my statement of last year. Where their performance falls below specified thresholds, in terms of the percentage of applications determined within the target time frame, then they are asked to achieve specific performance standards in the following year. In 2004–05 both the thresholds and the standards were raised by 2–5 percentage points. This was a relatively modest increase to give local authorities further time to make use of the additional resources available though planning delivery grant. We envisage a more significant ratcheting up of both the thresholds and standards for 2005–06 (by up to 10 percentage points) as a necessary step towards meeting the targets in 2006–07, as follows:

Percentage of applications determined within time

		2003–04	*2004–05*	*2005–06*	*2006–07*
Major	Threshold	28	30	40	50
	Standard to be met	50	52	57	60
Minor	Threshold	37	40	50	55
	Standard to be met	55	58	63	65
Other	Threshold	55	60	65	70
	Standard to be met	70	73	75	80

Threshold = performance below this level at previous year ending June would qualify authority for standard.
Standard = percentage achievement required within 13 weeks for major and eight weeks for minor and other applications.

We will encourage authorities to draw up trajectories and improvement plans as soon as they are identified as potential standards authorities, and will review their progress against trajectories shortly after they are designated. Help in this process will be made available, including support from the new planning advisory service that the Office of the Deputy Prime Minister has invited the Improvement and Development Agency to host. Further support comes in the form of continued funding through the planning delivery grant after 2005–06, as announced in July following the spending review.

In the course of the year for which an authority has been designated as a standards authority, my officials will contact the authority's planning service to collect information on what steps have been taken or will be taken to improve its planning performance. This will be assessed to determine if further action will be needed to support performance improvements. Regard will be given to authorities' progress towards the specific performance standards they were set and, in the longer term, authorities' ability to reach the targets set out in ODPM's public service agreement six (PSA6).

Engagement with an authority will be reviewed at the end of the year for which it has been designated as a standards authority in light of whether it has achieved the standards specified in the best value order and any demonstrable sustained improvement in performance over the period. We will remain engaged with authorities until we are confident that a sustainable level of improvement has been achieved, with the level of engagement proportionate to the risk of failure.

Authorities causing serious concern will be asked to self-assess their performance against trajectories and draw up improvement plans to share with the relevant Government office for the regions, who in turn will report on progress to ODPM on a quarterly basis. If performance continues to deteriorate then we will

consider the case for further more direct intervention. In doing so we would adopt the proportionate approach outlined in my earlier statement and would have regard to the authorities' CPA status.

Authorities causing a lesser degree of concern will be asked to self-assess performance against trajectories and share their conclusions with the relevant Government office for the regions on a quarterly basis. Government Offices will report to ODPM by exception, where performance shows significant deterioration.

I will consider the case for relaxing the intensity of engagement or for disengagement with other authorities where the annualised performance in all three categories of application is on or above the relevant planning standard and the authority's own trajectory for two consecutive quarters.

Over the last year 39 planning standards authorities were found to have made significant improvements in performance, and outstanding improvements in a number of cases. I congratulate them all on their success in improving their performance and I expect to see them making further rapid progress towards meeting and exceeding the national targets. The 39 authorities were:

Bedford District Council

London Borough of Brent

Brighton & Hove Unitary Authority

Bristol City Council

Calderdale Met. Borough Council

Canterbury City Council

Chichester District Council

Durham City Council

London Borough of Ealing

East Cambridgeshire District Council

East Hampshire District Council

Epsom and Ewell District Council

Fareham District Council

Forest Heath District Council

Gloucester District Council

Havant District Council

Isle of Wight Unitary Authority

Kerrier District Council

London Borough of Lambeth

Leeds City Council

Mansfield District Council

Medway Unitary Authority

Milton Keynes Unitary Authority

North Devon District Council

Oldham Met. Borough Council

Reading Borough Council

Reigate and Banstead District Council

London Borough of Richmond upon Thames

Rossendale District Council

Sheffield City Council

Spelthorne District Council

Taunton Deane District Council

Three Rivers District Council

Vale of White Horse District Council

Wansbeck District Council

Wear Valley District Council

West Lindsey District Council

Weymouth and Portland District Council

Worcester District Council

The new planning advisory service (PAS) will play an important role in supporting local planning authorities. This includes through a newly developed improvement planning programme. Already the PAS has held an introductory event on improvement planning which will be followed up with a series of regional workshops and other ongoing support. Also as part of the PAS a new advisory panel on large applications is now gearing up to assist a number of local planning authorities in the high demand regions of London and the wider south east.

The PSA6 targets are challenging but we believe achievable. We will continue to monitor progress and to keep our strategy for engagement under review as we approach the target year of 2006–07.

North East Regional Assembly

The Minister for Local and Regional Government (Mr. Nick Raynsford): I am today publishing a consultation paper on draft guidance to the Electoral Commission on drawing up the constituencies for a North East regional assembly.

If, following a yes vote in the referendum on the establishment of a regional assembly in the North East, the Secretary of State proposes that a regional assembly should be established, the Government will direct the Electoral Commission to provide advice on the drawing up of the electoral areas for a North East regional assembly. This direction will be accompanied by statutory guidance on what the Electoral Commission should take into account in preparing its advice. It is this guidance on which we are consulting.

The consultation paper includes a full draft of the guidance the Secretary of State proposes to issue. The Secretary of State proposes to direct the Electoral Commission to provide advice on:

the number of electoral areas;

the electoral areas into which the North East is to be divided; and

the name by which these electoral areas are to be known.

Therefore, the draft guidance sets out the matters the Government feel that the Electoral Commission should take into account when preparing its advice. The Secretary of State is not proposing to seek the Commission's advice on the total number of members for a North East assembly.

A copy of this consultation paper will be available in the Libraries of both Houses and in the "Regions" section of the Office of the Deputy Prime Minister website. The end date for the consultation is 22 October 2004.

FOREIGN AND COMMONWEALTH AFFAIRS

Hong Kong

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): We welcome the fact that Legislative Council elections were generally well run. Clearly there were a number of technical problems on the day in some locations and we understand that the SAR Government and the Electoral Affairs Commission will be looking into these. That said, there appears to have been fair treatment for all candidates and we have no reason to question the validity of the outcome.

TRADE AND INDUSTRY

Offers in the 22nd Offshore and 12th Inshore (Oil and Gas) Licensing Rounds

The Minister for Energy and E-Commerce (Mr. Mike O'Brien): I am pleased to inform the House that as a result of the 22nd offshore and 12th onshore oil and gas licensing rounds, I am today offering 97 offshore licences (58 of them under "promote" terms, seven under frontier terms and 32 under the traditional terms) and 26 petroleum and development licences for the onshore area. The companies will have a fixed period in which to accept the offers made.

This is a very good result and demonstrates the keen interest still being shown in exploiting the United Kingdom's hydrocarbon resources.

A list of the successful companies in the rounds can be viewed on the DTI website at http://www.dti.gov.uk/.

Regulator of Community Interest Companies and Sectoral Regulators

The Minister for Industry and the Regions (Jacqui Smith): To assist discussion of the Companies (Audit, Investigations and Community Enterprise) Bill in Standing Committee, it may be helpful if I outline how the Government intend the powers of the new regulator of community interest companies (CICs), created by clause 24 of the Bill, to interact with those of other regulators in particular sectors of activity, and in particular the regulators of registered social landlords (RSLs).

The consultation paper on CICs which the Government published last year said that the CIC regulator

"will work with other companies' regulators, and with any sectoral regulators with relevant competences, to ensure that there is a single interface between CICs and their stakeholders on one hand, and regulators on the other".[1]

The consultation confirmed that this is the right approach, and that simplicity of regulation is highly valued by social enterprises. The single most important step in achieving it is to integrate the new regulator with companies house. The CIC regulator will therefore be located in companies house, and the processes for setting up a CIC and making annual community interest company reports will be linked to the equivalent processes for all companies.

The consultation paper referred to "sectoral regulators with relevant competences" because CICs potentially have a wide range of uses. Some CICs may therefore operate in sectors that are already subject to legal and regulatory constraints in matters such as the use of assets. In such cases, the Government are determined that overlapping regulation should be avoided.

We have already identified one sector where work is necessary to achieve this. registered social landlords, or RSLs, are subject to statutory constraints on the use of their assets, and on their activities, under housing legislation. The RSL sector is regulated in England by the Housing Corporation, in Scotland by Communities Scotland, and in Wales by the Housing Directorate of the National Assembly for Wales.

RSLs currently use a variety of legal forms, and we believe that some may be interested in becoming CICs, or in establishing CIC subsidiaries. The Government are particularly mindful of the need to avoid complicating the regulation of RSLs that choose to use the CIC form, in the light of a recent report on the Housing Corporation by this House's Committee on Housing, Planning, Local Government and the Regions, which stressed the need to streamline the regulation of RSLs and to avoid duplication.

We intend to achieve this streamlining for RSLs using the CIC form, by making orders under the Deregulation and Contracting Out Act 1994, to enable the CIC regulator to delegate relevant powers to the appropriate RSL regulators in England and Wales. The orders will be subject to affirmative resolution in both Houses of Parliament. The position is rather different in Scotland because of the devolution settlement, and we are in discussion with the Scottish Executive and Communities Scotland about the appropriate way to arrange the delegation of powers.

The detail of which powers should be delegated to the RSL regulators is being discussed by the Government, the RSL regulators and the devolved administrations. The principle will be that the CIC regulator should delegate those powers that duplicate or overlap with those of the RSL regulators. Regulatory action in respect of RSLs using the CIC form will then normally be the responsibility of the relevant RSL regulator, using either their powers under housing legislation, or the powers delegated to them by the CIC regulator.

The real value of delegating powers in this way is that it will allow the RSL regulators to take the clear lead in regulating RSL CICs. Those CICs can then be confident that the relevant RSL regulator in England, Scotland or Wales is the key body with which they must deal, in respect of their obligations both as RSLs and as CICs. Delegated powers will be exercisable concurrently by the CIC regulator and the sectoral bodies, but we expect that the CIC regulator will only have a limited "backroom" role in respect of RSLs using the CIC form, for instance in agreeing their registration as CICs. Clause 39 of this Bill allows the CIC regulator to use his supervisory powers only to the extent necessary to maintain confidence in CICs, and it will not normally be appropriate for him to act where he has delegated those powers to a sectoral regulator.

Written Ministerial Statements

Wednesday 15 September 2004

EDUCATION AND SKILLS

Key Stage 1

The Parliamentary Under-Secretary of State for Education and Skills (Mr. Stephen Twigg): The trial of the new assessment arrangement at key stage 1 has now concluded and a decision about extending the new arrangements to all schools has been made.

In 2003, we asked the Qualifications and Curriculum Authority (QCA) to trial an approach that placed more emphasis on teacher assessment and national reporting of teacher assessment levels. Schools taking part in the trial administered the national curriculum tasks and tests in reading, writing and mathematics and the outcomes of these, plus all the evidence from work done throughout the year, were used by teachers to make judgments about children's progress in each subject, which were reported to parents and LEAs.

An independent evaluation of the new arrangements was carried out by Leeds university on behalf of the QCA. The evaluation proved favourable and we have accepted the QCA's recommendation to extend the new arrangements to all schools at key stage 1 from the current academic year.

HOME DEPARTMENT

M26 Taser

The Parliamentary Under-Secretary of State for the Home Department (Caroline Flint): Five police forces have been trialling the use of Taser since April 2003 on a strictly limited basis. In the light of the results of the trial, I have authorised chief officers throughout England and Wales to deploy Taser for use in the same strictly limited circumstances. Chief officers can now make the M26 Taser available to authorised firearms officers in their force as a less lethal alternative for use in situations where a firearms authority has been granted in accordance with criteria laid down in the ACPO manual of guidance on police use of firearms.

The Defence Scientific Advisory Council (DSAC) sub-committee on the medical implications of less lethal weapons (DOMILL) was invited to provide a second statement on the medical implications of the use of the M26 Advanced Taser. The DOMILL statement confirms that the risk of death from the M26 Taser is very low. I have placed a copy of the statement in the Library of the House.

HEALTH

National Service Framework (Maternity and Children's Services)

The Secretary of State for Health (Dr. John Reid): In February 2001, we announced that the Department would be developing a new national service framework (NSF) to set in place new standards for children's services. I am pleased to announce that the children's NSF is today being published. Copies have been placed in the Library.

This NSF is the most complex to date, covering maternity services and the full range of issues for children and young people across health and social care, as well as the interface with education. It has been developed in active consultation with young people and the direct participation of over 250 experts and practitioners from the field. We also sought the views of key stakeholders through a major consultation exercise.

The children's NSF is an evidence-based, 10-year strategy that advocates a cultural shift in the provision of care, with services being designed and delivered around the needs of children and their families. The NSF recognises that children's needs are different and that it is important they have personalised services that take account of their individual views and beliefs, and enable them to make informed choices about their care. Setting standards for maternity care will also enable women to make real choices about the birth of their babies. It highlights the need for high-quality services that offer choice and are prompt, convenient and responsive and that look at the whole child, rather than as a presenting illness or problem.

The broad remit of the NSF is covered in 11 standards, which are:

promoting health and well-being, identifying needs and intervening early;

supporting parents or carers;

child, young person and family centred services;

growing up;

safeguarding and promoting the welfare of children and young people;

children and young people who are ill;

children in hospital;

disabled children and young people and those with complex health needs;

mental and psychological well-being of children and young people;

medicines;

maternity.

The children's NSF has been developed in line with the Government's wider public sector reform, to devolve power and responsibility to local agencies. Consequently, although this NSF sets out the levels of service quality that we expect services to attain by 2014, it is to be left to local discretion to determine how change should be effected.

DEPUTY PRIME MINISTER

Regional Assemblies Information Campaign

The Minister for Local and Regional Government (Mr. Nick Raynsford): In August we sent a leaflet to every household in the north-east entitled "An Elected Assembly for the North East—Have Your Say". The leaflet provided information about the regional assembly and local government referendums to be held on 4 November, including details of the options for local government reorganisation.

An error has been discovered in the information provided about the cost of local government reorganisation in County Durham. The cost figure for option A—one single tier local authority for the county of Durham—was correctly shown. However, the upfront cost of implementing "option B"—that is, of restructuring local government to create three unitary authorities to take over the functions currently exercised by the existing county and district councils—was stated as £38 million. It should have been £49 million.

We will shortly be writing to all households in County Durham correcting this error. The Government will meet the costs of implementing either option, as stated in the leaflet.

TRANSPORT

Network Rail

The Secretary of State for Transport (Mr. Alistair Darling): Network Rail plans to launch a Debt Issuance Programme (DIP) later this autumn. This will provide a long term, flexible financing platform for Network Rail. It will allow the company to raise finance at a lower cost than the previously envisaged securitisation. Details of the DIP and the support Government intends to provide for it by means of a financial indemnity are set out in Minutes laid before the House today.

NORTHERN IRELAND

Staff Commission for Education and Library Boards Accounts 2002–03

The Parliamentary Under-Secretary of State for Northern Ireland (Mr. Barry Gardiner): The 2002–03 accounts of the Staff Commission for Education and Library Boards were deposited in the Libraries of both Houses today.

Written Ministerial Statements

Thursday 16 September 2004

EDUCATION AND SKILLS

Resources for Children and Learners

The Secretary of State for Education and Skills (Mr. Charles Clarke): In his Budget in March, my right hon. Friend the Chancellor of the Exchequer outlined continued growth in investment in education and children's services up to 2007–08; showing again the priority the Government give to children and learners.

On 8 July, we published our five year strategy for children and learners, setting out how the Government will use new forms to build on substantial improvements in every stage of education and children's services since 1997—from the early years of a child's life to lifelong learning and adult skills.

Today I am giving more detail of how the additional investment announced by my right hon. Friend the Chancellor will support the reforms set out in the five year strategy.

Early Years and Children's Services

Investment in early years and childcare will increase £769 million between this year and 2007–08. The Government will announce a 10-year childcare strategy in the pre-Budget report when more detailed plans will be published. The broad areas to be covered will include:

- By 2008, there will be up to 2,500 children's centres;
- Bringing education and childcare together into a single integrated offer for pre-school children; and
- Developing a year round, 8am-6pm, child care offer in many primary schools; with secondary schools offering a range of "things for young people to do".

Investment in children's services will increase by almost £1 billion by 2007–08 compared with 2004–05. We will use this investment to start taking forward key areas of reforms set out in "Every Child Matters" to achieve better opportunities and outcomes for children, young people and their families. We will provide support in the following areas:

- Increase the information available to parents and carers.
- Ensure that the professionals working with children have the right skills and competencies to support children and their families more effectively.
- Improve support to looked alter children by enhancing the provision of mentoring to this group and improve support to tester carers in order to increase recruitment and retention.
- Improve early identification and protection of vulnerable children by supporting a common assessment framework and developing arrangements for sharing information between agencies to prevent any child slipping through the net.

We are committed to rationalising funding streams to local authorities and the voluntary sector and reducing the number of processes. We will discuss with partners how resources can be delivered to ensure funding can be flexibly deployed at the front-line where delivery of services impact most.

Schools

We will increase revenue funding for schools by some £3.5 billion overall between 2005–06 and 2007–08. That means that we will have increased revenue funding for schools by about £1,300 per pupil or 45 per cent. in real terms in the years since we took office.

Our twin aims are to make the quality of teaching even better than it is now with schools driving their own and others improvement and to widen opportunities for pupils and teachers through enriching the curriculum. Specific examples of additional investment include:

- The budget for specialist schools will increase by over £100 million by 2008 to help all schools that meet the standard to become specialist;
- There will be an extra £30 million by 2008 for our leading schools which will be expected to work together with other schools to raise standards everywhere;
- There will be an extra £65 million a year for our primary and secondary strategies that have helped to increase pupil attainment since 1997, with resources targeted on those schools that need the greatest support;
- There will be continuing support for schools in areas served by the "Excellence in Cities Programme" which has helped to improve exam results at a faster rate than the national average;
- We will be making additional resources to the teacher training agency to improve the supply of high quality maths and science teachers and support the professional development of teachers: and
- To help schools enrich the curriculum, the budget for sport will increase by over £30 million by 2007–08 and there will also be more resources for music, modern foreign languages and for partnerships between schools and the arts.

We look forward in the months ahead to discussions with schools and local education authorities on the best way to deliver all the resources that support schools. We will have a new ring-fenced budget for schools from 2006–07 and are committed both to delivering three-year budgets for schools and to rationalising the existing funding streams.

Capital investment in schools will increase by £750 million to £6.3 billion by 2007–08 including ICT and PFI credits to support further improvements to all schools and allowing every secondary school to be refurbished or rebuilt to a modern standard over the next 10 to 15 years.

14–19. Further Education (FE) and Skills

Total funding for FE, skills and to develop the 14–19 phase will rise by £1.5 billion by 2007–08 compared to 2004–05, taking the Government's total expenditure on post-16 (excluding Higher Education (HE) to £11 billion.

This is a substantial overall investment, building on the increases in funding in the three years up to 2005–06, which will allow the sector to meet growth in 16–19 participation and enable progress to be sustained on two key agendas: delivering success for all to continue to drive up quality, and reshaping the sector to become more demand led as set out in the Skills Strategy.

We will provide greater freedom for colleges and training providers through a new delivery structure. This will be based on autonomy and independence for good colleges and providers, backed up by a risk-based approach to lighter touch inspection but tougher sanctions on poor quality.

This will enable colleges to engage more effectively with employers by offering the training that they need, and to increase employer and individual co-financing of training in line with the benefits they receive. This is important for the sustainability of the sector and future expansion. We want all colleges to be put on a secure financial footing to deliver the important challenges that we have set out in our five-year strategy. Under the new delivery arrangements, successful colleges will be able to grow and prosper.

The settlement includes funding to continue the development of a transformed 14–19 phase of education, in the light of the commitments made in the Department's five-year strategy. The working group on 14–19 reform, chaired by Mike Tomlinson, will issue its final report this autumn making proposals for a radical reshaping of the 14–19 phase. The Government have set out the five tests that will shape its response to the proposals, but whatever the response, the direction of travel is clear. We are therefore allocating funds to build on the work over the last few years to improve this phase of education, including workforce training and spreading good practice from the 14–19 pathfinders.

We must support colleges in making the transition to a more demand-led approach in which greater funding comes from employers and individuals, because the training they get is designed and delivered in a way that better meets their needs. We will be looking carefully at how we can best do that. As set out in the five-year strategy, we are committed to incorporating the principles of the employer training pilots within mainstream funding for adults, as a way of promoting a more demand-led approach. We will also continue to use the Learning and Skills Council's (LSC) annual business cycle to allocate public funds in a way that better matches our national skills priorities, including through the new Level 2 entitlement.

We will continue our drive to upgrade facilities in further education and training with an increase of 31 per cent. in capital funding between 2004–05 and 2007–08. We will also bring local decision-making and allocations for 16–19 capital provision into alignment. Working with the Department and other partners, the LSC will establish a single capital budget for new 16–19 provision across schools and FE.

The achievements of learners depend on the quality of the teaching and learning they receive, and the way in which their teachers and trainers are themselves trained, managed and supported. We will increase by £70 million by 2007–08 our investment in initial training and continuous professional development, for teachers, trainers, leaders and managers in colleges, work-based learning and adult and community learning.

Higher Education (HE)

Government expenditure on higher education will increase by around £2 billion between 2004–05 and 2007–08, taking total investment to almost £9.5 billion. This builds on the significant increases from 2002 spending review, and it confirms our commitment to stand by HE in future spending reviews, made in the White Paper and repeated during the discussions on the HE Bill.

We will increase the HEFCE grant to allow for further increases in student numbers while maintaining the level of student funding per head in real terms.

HE institutions will also benefit from increases in research funding: DfES recurrent funding for research will increase from £1.236 billion in 2005–06 to over £1.4 billion in 2007–08—around 9 per cent., in real terms. Our contribution to total UK science spending, together with the contribution from the Office of Science and Technology, will exceed £5 billion by 2007–08.

On top of all this, HE institutions will receive in full the extra income they generate from charging variable fees—in steady state (ie by 2010) this will be around £1.2 billion extra.

HE institutions will start to receive this extra income in academic year 2006–07. We expect the first tranche to be paid in two instalments—one half in early 2007, and the other before the end of the academic year.

Full time students will benefit from an enhanced student support package:

An HE grant of up to £2,700 for the poorest new students;

Enhanced bursaries, paid from HEIs' new fee income stream;

Fee loans from 2006, both for existing and new students;

A maintenance loan increased to the level of average student expenditure on essential items, both for existing and new students;

Affordable repayments for student loans—9 per cent. of salary above £15,000, for all students after April 2005. So students will make a contribution towards the cost of their higher education, but only when they can afford to do so;

And for new students, a loan write off after 25 years-that will particularly help those graduates who choose low paid work.

Part time students will also benefit from an enhanced package from this autumn. Grants for will replace loans, and a new statutory fee grant will replace the old discretionary scheme. The poorest students will get £825 in grants for fees and course costs.

Overall, this spending review will help to put excellence in HE on a sustainable footing and will secure world-class standards through:

increased teaching funding;

increased research funding;

increased fee income; and

better support for students.

This will enable us to make a significant impact on the funding gap we know exists, and to continue expansion on a sensible, properly funded basis.

Value for money and efficiency

The total investment in education and training is much larger than the figures presented here. Families have always invested and will continue to invest in their children's care and development. Employers invest in the training and development of their workforce. Support for education-in cash and in kind-is growing. We expect co-funding to grow over the spending review period, as individuals and employers become readier to invest in better education and training that meets their needs.

We must ensure that we get maximum value from every pound of additional investment for children and learners. Enabling people across the children, education and skills system to get better value for money from our investment in public services is our aim in the Efficiency Review. We have identified ways to achieve gains in value for money of £4.3 billion over the Spending Review period. For example, we will

reduce the number of civil service posts in the DfES and OFSTED by 1,960;

enable front-line profesionals in schools, colleges and higher education institutions to use their time more productively, enabling institutions to achieve more with their resources; for example through workforce reform, investment in ICT and reducing administrative burdens;

improve procurement of goods, services and new school building, using a new Procurement Centre of Excellence to strengthen procurement practice across the education and children's services sectors;

streamline the delivery system for each sector through improvements in policy, funding and regulation, such as the lighter touch process for OFSTED inspection, streamlined data collection and reduced reporting and monitoring requirements introduced in the New Relationship with Schools.

In conclusion, this statement sets out how we will use the additional resources for children and learners over the next three years to deliver the ambitious programme set out in the five-year strategy. I will be vigilant in ensuring that they are used efficiently and effectively. If resources are not being used to best effect. I will not hesitate to ensure they are switched to where they are most needed, and I will inform Parliament of any significant movements.

HOME DEPARTMENT

Fast Track Asylum and Detention Policy

The Minister for Citizenship and Immigration (Mr. Desmond Browne): A key element in the Government's strategy to speed up the processing of asylum claims has been the introduction of the fast track asylum processes operated initially at the Oakington reception centre and now also at Harmondsworth removal centre and other locations. The use of detention to fast track suitable claims under these processes is necessary to achieve the objective of delivering decisions quickly. This ensures, among other things, that those whose claims can be quickly decided can be removed as quickly as possible in the event that the claim is unsuccessful.

The lawfulness of detaining asylum claimants for the sole purpose of deciding their claims quickly was upheld by the Court of Appeal and by the House of Lords in the case of Saadi.

When we began the fast track process we said that it was our intention to detain asylum claimants suitable for a quick decision for a period of about seven to 10 days. If we could not decide the claim within that time scale, the claimant would be released or moved to another place of detention with the facilities to support people detained for longer periods. In the vast majority of cases, we have been able to do exactly that. However, the need to ensure a really sharp focus on quality decision making, including for example in non-suspensive appeal (NSA) cases the need for a second pair of eyes, means we cannot always make decisions and serve them on claimants within the original seven to 10 target time scale. While we are able to do this in over 95 per cent. of non-NSA Oakington claims, our experience has shown us that NSA claims take slightly longer, with the majority of decisions being made and served within 14 days. The purpose of this announcement is to set out our revised fast track process detention policy.

The fast track process has scheduled days set aside for specific activities (interviewing, serving the decision etc. but we intend this to be a guide as to how the process will generally operate. There will always be occasions when for operational or other reasons it is not possible to undertake certain activities. This may be because the claimant is temporarily unwell, there is an interpreter problem, the claimant requires longer to obtain further evidence or wishes to submit late representations for example. The process must be flexible enough to accommodate such circumstances. We would not necessarily release people from detention or from the process or move them to another place of detention simply because the timetable cannot be adhered to, if the indications are that we can make and serve a decision within a reasonable time-scale. However, the period of detention for making a quick decision will not be allowed to continue for longer than is reasonable in all the circumstances. We will aim to make decisions within 10 to 14 days, but there will be occasions where it is quicker—for example, at Harmondsworth or a non-NSA decision at Oakington. However, we will continue to detain for the purpose of deciding the claim quickly, even beyond the 10 to 14 day time scale, unless the length of time before a decision can be made looks like it will be longer than is reasonable in all the circumstances. Continued detention may also be merited in some cases irrespective of decision time scale, where our general detention criteria apply. We may also detain claimants after we have made and served a decision in accordance with our general detention criteria.

Applicants with dependants may be detained for the purposes of making a quick decision on their claim, but there may be operational constraints on who can be detained from time to time. For example, the acceptance of families or pregnant females into Oakington may be halted temporarily if there is an illness circulating which might be harmful to them—chicken pox for example. The criteria for acceptance are applied equally to those entering the Oakington and Harmondsworth processes. The principal difference is that at Oakington, individuals with dependants on their asylum claims can be detained at the centre and at Harmondsworth they cannot. Separating dependants on a claim from the claimant can present operational difficulties and for that reason and the fact that it has no female or family accommodation, Harmondsworth will, in general, only accept male claimants who have no dependants on their claims. That is not to say that, at Oakington or Harmondsworth or any other location where fast tracking is carried out, we will never detain a claimant who has dependants on their claim, even where it is not possible to detain the dependants with the claimant. There may be occasions when we believe it is necessary and right so to do.

When deciding whom to accept into fast track processes, account is taken of any particular individual circumstances known to us, which might make the claim particularly complex, or unlikely to be resolved in the time scales, however flexibly applied. The existence of UK based family ties—such as a spouse, partner or child—would not automatically exclude a claimant

from the process as some issues, such as article 8 family life ones, can be relatively easy to decide quickly given the case law and the individual's actual circumstances.

We will continually review how our fast track processes are operating, the criteria for acceptance into them and the indicative process time scales we aim for. This will apply equally to those we are presently operating and to any we may seek to introduce as part of our overall strategy of speeding up the asylum process and making it more effective.

Joseph Scoles

The Parliamentary Under-Secretary of State for the Home Department (Paul Goggins): The coroner for the mid and north division of the county of Shropshire wrote to my right hon. Friend the Home Secretary, on 5 May, recommending a public inquiry into certain issues arising from the inquest into the death of John Peter Joseph Scoles (known as Joseph) at Stoke Heath young offenders institution on 24 March, 2002.

The Treasury solicitors wrote to the legal representatives for Joseph's family to seek their comments on what the coroner had recommended. Having received and considered their comments, together with the coroner's recommendation, I am now able to announce the measures I have taken and am taking to ensure that the matters arising from Joseph's tragic death and the coroner's recommendations are properly considered.

The issues fall into three broad categories. They are: the appropriateness of the sentence Joseph received; the effectiveness of relevant operational procedures in identifying, placing and safeguarding vulnerable young people in custody; and whether the juvenile secure estate has adequate accommodation to meet the needs of vulnerable young people.

The steps I am taking to deal with these are as follows:

I have referred the circumstances in which Joseph received a custodial sentence on three counts of attempted robbery to the Sentencing Guidelines Council, requesting it to take this case into account in its current work to draw up guidelines on sentencing for robbery;

I have appointed David Lambert, a former Assistant Chief Inspector of the Social Services Inspectorate, to examine the operational issues raised by this case, including through the coroner's inquest. I have also asked him to provide a summary account of all investigations that have been conducted into Joseph's death;

I have asked the Youth Justice Board, which is preparing proposals for its vision for the future juvenile custodial estate, to take full account of the points made by the coroner on the adequacy of custodial provision for vulnerable young offenders.

I consider that the above measures are the most effective means of addressing the matters the coroner has drawn to the Home Secretary's attention and what lessons should be learned from Joseph's death. I am grateful to the coroner, and to Joseph's family, for highlighting the issues that are of concern to them. Nothing can bring Joseph back, but I do want to ensure that everything is done to prevent the repetition of such a tragic event.

NORTHERN IRELAND

Chief Electoral Officer for Northern Ireland

The Secretary of State for Northern Ireland (Mr. Paul Murphy): The chief electoral officer for Northern Ireland, Mr Denis Stanley, is responsible for all aspects of electoral administration in Northern Ireland, including the conduct of all elections and referendums; and for electoral registration. In accordance with section 14 of the Electoral Law Act (Northern Ireland) 1962, the chief electoral officer is required to submit an annual report to the Secretary of State.

I am pleased to announce that the annual report of the chief electoral officer for Northern Ireland for the year 2003–04 has been laid before Parliament. Copies are available in the Library.

Compensation Agency

The Minister of State, Northern Ireland Office (Mr. John Spellar): The compensation agency will publish today its corporate plan for 2004–07 and business plan for 2004–05. I have set the agency the following key performance targets for 2004–05:

Claims under the Criminal Damage (Compensation) (Northern Ireland) Order 1977

1. Maintain average time taken to reach decisions at 18 weeks for claims received from 1 April 2004.

2. Reduce by 85 per cent. the number of claims in hand at 31st March 2004 on which no decision has been reached; and

3.* Process claims under the Criminal Damage and Terrorism Act schemes at a combined average unit cost of £310.

Claims under the Terrorism Act 2000

4. Reach decisions on claims in 70 days for claims received from 1st April 2004;

5. Reduce by 90 per cent. the number of claims in hand at 31st March 2004 on which no decision has been reached; and

3.* Process claims under the Criminal Damage and Terrorism Act schemes at the combined average unit cost of £310.

* This unit cost target relates to claims under the Criminal Damage and Terrorism Act schemes. The work involved in processing these claims is carried out in a single organisational unit within the agency so the efficiency of this element of the agency's operations is measured by reference to a combined unit cost target.

Claims under Criminal Injuries (Compensation) (Northern Ireland) Order 1988

6. Reduce by 45 per cent. the number of claims in hand at 31st March 2004.

Claims under the Criminal Injuries Compensation (Northern Ireland) Order 2002 (Tariff)

7. Decide 50 per cent. of all applications within twelve months of receiving the application.

8. Reach decisions on applications at an average unit cost of £280.

Compliance with Legislation/Standards of Adjudication—All Schemes

9. The agency's standards of adjudication are appropriate, which will be confirmed by the Department's internal audit branch through random sampling of claims.

Value for Money—All Schemes

10. Manage the workload in 2004–05 within a running costs budget (to cover salaries and administrative expenditure) to financial limits agreed with the Department (including in-year adjustments).

DEPUTY PRIME MINISTER

Green Belt Statistics

The Minister for Housing and Planning (Keith Hill): On 29 March this year I announced the release of new statistics on the change in the amount of green belt in England between 1997 and 2003. This showed an increase of around 25,000 hectares in the amount of green belt identified in adopted local and unitary development plans.

It was subsequently pointed out to me that the published figures contained errors, notably a significant transcription error effecting Bolsover's figure for 2003 and minor errors for three other authorities. Correcting for these errors meant that the correct figure for the increase in Green Belt in England between 1997 and 2003 should have been around 19,000 hectares and not the 25,000 figure published in March.

I apologised to the House for these errors during the town planning debate on 26 May and said that I had publicised the 19,000 hectares figure in my reply on 10 May to a parliamentary question from the hon. Member for Lewes (Norman Baker). However, I assured the House during the Town Planning debate that further work was being carried out on checking the figures to ensure that they are robust. This involved an independent internal audit of how the statistics were compiled and confirmation by local authorities that the change recorded for their areas was correct.

I am pleased to tell the house that the internal audit did not find any further errors and that only minor revisions have been made as a consequence of consulting with local authorities. The statistical release with the corrected figures has been reissued today and copies are available in the Libraries of both Houses. The re-issued statistics confirm the earlier estimate of a net increase of around 19,000 hectares in the extent of green belt in England between 1997 and 2003.

I apologise to the House for the errors in the first place and on the length of time it has taken to re-issue the correct statistics.

Planning Fees Consultation

The Minister for Housing and Planning (Keith Hill): In my statement to the House of Commons on 20 January 2004, *Official Report*, column 55WS, on publication of "The Planning Service: Costs and Fees", I said that that research would be followed up with full consultation on bringing further resource into the planning service.

I have today issued a consultation document, "Changes to the System of Planning Fees in England". This sets out in detail our proposals to improve the resourcing of planning so that it can deliver better services to the community and to business.

The proposals include raising planning fees by an average of 17 per cent. This is intended to help authorities recover more of the costs of handling planning applications. In many cases, especially for the larger applications, the current fee falls far short of the handling costs.

The increases are designed to fall differentially on applicants. For example a small business which acquired a new property and needed to apply for a change of use permission would see a fee increase from £220 to £240. Major developers and larger applicants will be asked to pay more—the maximum fee for a major development will rise from £11,000 to £28,000.

I am also consulting on the introduction of a performance relationship, the first time this has happened in relation to fees increases. Those authorities that meet Government targets for handling major applications will be allowed to increase the application fee they charge by up to 10 per cent. to help them meet more of the costs of handling these large and often complex applications. This will encourage authorities to work harder to meet our targets. Authorities that offer the facility for applications to be made online will also have the option to reduce those fees to encourage the submission of online applications and greater efficiency in the system.

In all, the proposed increases are expected to raise around £30 million for the planning service. Next year we will also be considering the need to look at widening the scope of planning fees, and the need for further regular increases in fees to ensure that costs in providing a planning service are being fully covered. In the meantime, I consider that the rises proposed are a sensible increase, which together with the continuing planning delivery grant, is helping to provide sustained and much-needed resource to improve planning services.

The document is available on the ODPM website copies are also available in the Libraries of both Houses. The consultation period ends on 6 December.

Housing Market Renewal Pathfinders and Elected Regional Assemblies

The Minister for Local and Regional Government (Mr. Nick Raynsford): The Government intend to pass responsibility for housing market renewal pathfinders to elected regional assemblies, in those regions that vote for them. The first region to hold a referendum over an elected regional assembly will be the north-east and the referendum will be on 4 November 2004. Housing market renewal pathfinders are responsible for tackling low housing demand and we think that this responsibility would sit well with elected assemblies' strategic housing powers. My right hon. Friend Lord Rooker will be writing shortly to the Chairs of the housing market renewal pathfinders so that we can take into account their views.

DEFENCE

Suez Canal Zone Medal/Ministry of Defence Medal Office

The Parliamentary Under-Secretary of State for Defence (Mr. Ivor Caplin): During defence questions on 19 July 2004, I gave an undertaking to the House to

make a statement about progress made during the summer in the issuing of the Canal zone medal to Suez veterans.

As at the week ending 10 September 2004, 41,314 applications had been received and acknowledged, and 14,761 medals dispatched. The Royal Navy is now assessing applications as they are received (5 February 2004 as at 19 July 2004), the Royal Air Force is assessing applications received on 30 December 2003 (26 November as at 19 July), and although the army medal office is still assessing applications from 31 October 2003, this is due to some 4,300 applications being received during that week. This peak in applications, which occurred following my statement to the House on 23 October, is nearly cleared and the assessment of applications received during November will begin very shortly.

While this significant army backlog remains, a number of measures implemented by the joint personnel administration team responsible for setting up the MOD medal office at RAF Innsworth are already bringing tangible benefits. A new medal laser engraving facility has recently been installed at Innsworth. This is currently being used solely to engrave Iraq medals and over 6,000 have been produced during its first four weeks of operation. This has allowed the engraving facility at the army medal office to concentrate its efforts on the Suez Canal zone medal and as a result, the engraving backlog of some 1,800 medals has been cleared during the last month. Improvements to the information systems used by the army medal office, the facility to work overtime and the diversion of staff to Suez Canal zone medal processing are helping to improve matters further. These measures, coupled with the concerted efforts of army medal office staff have brought about an increase of approximately 30 per cent. in the army assessment rate during recent weeks.

This increase in output has resulted in an average of some one hundred and twenty more applications per week being assessed since July.

I can also announce that with effect from 1 October 2004 the armed forces personnel administration agency will assume full responsibility for the management of medal output, target setting and performance monitoring. This will allow many of the benefits of a single MOD medal office, such as common procedures based on single Service best practice, to be introduced prior to its actual formation date next spring.

Following these initial changes, I now anticipate that the backlog should be cleared by January 2006 and I hope this can continue to be improved upon. I should like to pay tribute to the staff of the single service medal offices for their part in bringing about this improvement.

End-to-End Business Process Review of Disposal Activity in the MOD

The Minister of State, Ministry of Defence (Mr. Adam Ingram): I have today agreed that the Ministry of Defence should retain its in-house disposal expertise and that the two in-house disposal organisations, the Disposal Services Agency and Head of Specialisation (Disposal and Sales) of the Defence Logistics Organisation (DLO), should merge under the ownership of the DLO with effect from 1 April 2005, retaining agency status and where appropriate relocating. The relocation will form part of the Ministry of Defence's contribution to the Government's Independent Review of Public Sector Rationalisation, the "Lyons Review". I have directed work to begin on implementing the review's recommendations, and I will make arrangements to place a copy of the review in the Library of the House.

End-to-End Logistics Implementation: Air Depth Support

The Minister of State, Ministry of Defence (Mr. Adam Ingram): Following extensive work to identify the best way forward for military aircraft support, I am announcing today my preferred option, subject to trades union consultation.

In 2003 the Ministry of Defence undertook an end-to-end review of the logistics process from the front line to industry. This review, the results of which I announced on 10 September 2003, concluded that there was a need, and substantial scope, for improvement in all areas of military air systems support—in industry, the Defence Logistics Organisation (DLO) and the services front line commands alike.

The review recommended that on-aircraft depth support—deep repair, scheduled maintenance and modification of aircraft—could best be rationalised by concentrating at main operating bases (MOBs), and that this conclusion should be tested in an investment appraisal.

The investment appraisal identified three broad options—to concentrate forward support of certain air platforms to MOBs, to concentrate backwards the same platforms to Defence Aviation Repair Agency (DARA) sites and where appropriate industry sites, or a hybrid solution with some platforms concentrated forward and others back.

In order not to prejudice the in-service date of the upgraded Harrier GR9 of 2006, I have already announced that Harrier support will concentrate forward to the MOB at RAF Cottesmore.

The wider investment appraisal and subsequent affordability analysis has demonstrated that concentrating support of the Tornado GR4 aircraft forward at the MOB at RAF Marham would provide best value for money compared with the alternative of concentrating backward on the DARA site at St. Athan.

Conversely, the work has demonstrated that it would not be cost-effective to concentrate the Tornado F3 aircraft either forward or back, given that it will soon be replaced by Typhoon. The work has also shown that it would provide better value for money to concentrate depth support for Lynx, Chinook and Sea King back to DARA Fleetlands.

My preferred way ahead is consistent with the announcement made by my right hon. Friend the Secretary of State for Defence on 21 July this year, which set out the need for the armed forces and their associated support functions to evolve in order to meet the demands of a changing world.

The streamlining of our logistic and support functions, such as those which flow from the end-to-end logistics review, will help the Department meet its targets under the efficiency review. In conjunction with

the £3.7 billion increase to the defence budget, it will enable us to continue to modernise our armed forces, tailoring our military capability to meet the challenges of the future.

Our preferred way forward has implications for our military and civilian work-force, as well as for our partners in industry who undertake depth support of military aircraft.

Concentrating support for rotary aircraft at DARA Fleetlands offers the opportunity to exploit fully the economies of scale that may be achieved by collocating these platforms at a single centre. Sufficient defence work would remain at DARA St. Athan to enable continued operations there until 2008–09.

We will explore with other Government Departments alternative options for St. Athan after 2009, although the migration of work and the withdrawal from service of some platforms means that 500 redundancies would be needed there in 2005. In the longer term, failure to win alternative work would result in the closure of St. Athan.

The application of end-to-end principles will ensure that the MOD works smarter and will improve efficiency by adopting modern best practice in supporting our military aircraft. It will lead to reductions of some 1,500 RAF uniformed personnel, which form part of the overall reductions of 7,500 set out in the 21 July announcement on force structure changes and defence change and modernisation programmes.

There would also be modest reductions in MOD civilian posts and contractor staff posts at RAF Lossiemouth, RAF St. Mawgan and Wattisham and RNAS Yeovilton. Other service personnel would be transferred to the new depth support locations.

A formal consultation period of 30 working days will now begin with the trades unions. Once a final decision has been taken detailed consultation on the implementation of it will follow.

TRADE AND INDUSTRY

Rural Post Offices

The Secretary of State for Trade and Industry (Ms Patricia Hewitt): The performance and innovation unit report on modernising the post office network, published in June 2000, recommended that the Government should support the rural network in the first instance to 2006. It also recommended that the postal services commission, Postcomm, should advise the Government on options for the rural network after 2006. I have received that advice and have considered it very carefully.

The Government are fully committed to supporting the Post Office's strategy for creating a viable and vibrant post office network that meets changing customer needs, providing reasonable access to services in rural communities.

My hon. Friend the then Minister of State for Energy, E-Commerce and Postal Services announced in the House on 2 December 2002 the Government's decision to make £450 million available to support the rural post office network through from 2003 to 2006. That three-year package was intended as a transitional measure, designed to help rural post offices through the changes in the network's business between 2003 and 2006.

At this point in the transition rural post offices continue to face real challenges and a large part of the rural network continues to be unsustainable commercially. For many post offices the number of customers they serve is simply too small to make the business attractive or sustainable. With the prospect of customer numbers continuing to fall as people access services in different ways it is clear that there are challenges ahead and that new ways to deliver services more efficiently and effectively are needed.

How and where people access services is changing. It is not clear that the present network best meets those changing needs, or whether because of that the current shape and scale of the rural network is a viable long-term prospect. A solution for the longer-term will need to take these changes fully into account.

Against this background Postcomm has advised the Government to review the reasons for and nature of our support of the rural network in the longer term. They advise that the nature of that support may need to change substantially.

Postcomm's advice recognises that such changes must be well informed and that further work will be necessary. Pilot activity by the Post Office, funded by the Government, to test new ways of ensuring access to post office services in rural areas is under-way. The lessons that will emerge from these trials over the next 12 to 18 months will be crucial in informing longer-term decisions about the future shape of the rural post office network. At this stage it is simply too early to draw conclusions.

The Government have, therefore, concluded that now is not the right time to take decisions about the long-term future of the rural network.

It is, however, vital that we continue to support the network through this continuing difficult period. The Government are committed to ensuring reasonable access for rural communities to postal and other services. It is also clear from Postcomm's advice to us that without Government funding much of the current rural network would face closure.

I am, therefore, pleased to announce that the Government have decided, subject to securing any further necessary state aid clearance from the European Commission, to extend its transitional financial facility for rural post offices for two further years from 2006 until 2008.

The Government will make available up to a maximum of £150 million a year until 2008 to enable Post Office Ltd. to continue to meet the cost of maintaining the non-commercial part of the rural post office network and to pilot new ways of delivering services. Pilot activity is a key element of the current funding package—we have already allocated £25 million to fund pilots. Our intention is that this will continue to be a key element of the package going forward.

The funding will ensure that Post Office Ltd. will have money to test new ways of delivering services and will not be forced to close unprofitable rural post offices because of a lack of funding.

Current funding is from the gilts—Government money previously received as dividends from the company and made available back to the company for certain specific uses—and it is our intention that the further funding to April 2008 will also come from these gilts. The detailed mechanism, sums of money and timing of payments will be subject to further detailed discussion with the company, as well as being subject to state aid clearance.

The PIU report recommended that the Post Office should be required to prevent avoidable closures of rural post offices, in the first instance to 2006. Postcomm has advised us that it is concerned that this policy can lead to post offices being saved or reopened where it is clear that customer numbers have dwindled to levels far below what is sustainable. Furthermore they have recommended that this policy should not be extended beyond April 2006.

The Government's direction to Post Office Ltd. to maintain the network and do all they can to prevent avoidable closures remains in place. There is no question of them being able to initiate the closure of offices. However, in response to Postcomm's immediate concern I propose to amend the definition of what is unavoidable so that when Post Office Ltd. is responding to a closure—for example when a sub-postmaster decides to retire—it takes into account circumstances where there is no prospect of a viable future for a post office because of a collapse in demand for services in a particular location. The intention will be to ensure that Post Office Ltd. is focused on maintaining access to services in rural areas fully taking into account local circumstances. These changes, yet to be worked up in detail, will be published.

I believe that we will be better placed to take a decision on the longer-term future of the rural network, including whether the current policy on avoidable closures should continue beyond April 2006, when we have feedback from the pilot activity now being undertaken by the Post Office.

I propose therefore to ask Post Office Ltd. for a full report on pilot activity and its implications for future access to post office services by the end of 2005. I will then review the policy on avoidable closures beyond April 2006 at that point.

Coal Investment Aid

The Minister for Energy and E-Commerce (Mr. Mike O'Brien): Following the acceptance of awards worth £41 million in the first of three planned CIA application periods, up to £19 million was available when bids in the second application period were invited in April 2004.

When the deadline for applications passed on 1 June, 12 applications had been received for a total of £94.6 million. All but one were for projects at mines which are already eligible for support following awards in Period 1.

On review, the one new application was found to be incomplete. The applicant was given an opportunity to submit additional information but was unable to do so. This application therefore could not be considered for an award.

Two further applications were for further support for projects which had already received substantial awards in Period 1 and for which further awards could not be justified on value for money grounds.

The nine remaining applications have been assessed and awarded further support worth a total of £16.42 million. Most of this is expected to be drawn down by 31 March 2006. These offers leave a balance of around £2.5 million for further awards and to meet CIA administration costs.

A summary of the Period 2 awards is given below. More details will be published shortly on the DTI Energy Group website.

Applicant/Production Unit	*Project Description*	*Period 1 Award*	*Period 2 CIA Sought*	*Period 2 Award*	*Tonnes Secured Mt*	*Jobs Secured/ Created*
Eckington Colliery Partnerships, S Yorks	Extension of main drift to access two new areas of reserves; acquisition of coal handling and other equipment	£0.063m	£0.014m	£0.014m	0.3	25/6
Energybuild, Aberpergwm, S Glamorgan	Recovery of cross-measure drifts to access reserves through fault; upgrade of coal preparation plant & surface/admin facilities. Purchase of rail head.	£1.1m	£2.76m	£2.42m	20.0	78/100
Hatfield Colliery, S Yorks	Develop access to Barnsley Main seam	[1]£15.0m	£33.28m	£0.0m	100	
Tower Colliery, Mid Glamorgan	Development of replacement panels	£2.2m	£3.5m	£0.0m	3.5	420/0
UK Coal plc, Ellington, Northumberland	Development of replacement panels, purchase of new face equipment	£2.1m	£2.9m	£0.0m	2.1	360/0
UK Coal plc, Daw Mill, W Midlands	Strategic development to access reserves in Warwickshire Thick seam; coal face mechanisation programme including purchase of set of powered roof supports; 3D surface seismic survey & surface boreholes	£9.6m	£2.72m	£1.26m	32.8	543/0
UK Coal plc, Harworth, S Yorks	Development driveage to access 2 areas of Deep Soft reserves; purchase of new face equipment	£4.6m	£4.8m	£1.72m	10.4	511/0
UK Coal plc, Kellingley, N Yorks	Strategic driveage to access the Silkstone seam to the south of current workings and Beeston seam to the east; purchase of new face equipment; upgrade of No. 2					

Applicant/Production Unit	*Project Description*	*Period 1 Award*	*Period 2 CIA Sought*	*Period 2 Award*	*Tonnes Secured Mt*	*Jobs Secured/ Created*
	winders	£7.2m	£8.0m	£2.27m	19.15	630/0
UK Coal plc, Maltby, S Yorks	Strategic driveage to access reserves in Parkgate seam; provision of development & face machinery	£2.4m	£7.53m	£2.71m	9.03	528/0
UK Coal plc, Rossington, S Yorks	Strategic driveage to access reserves in Barnsley/Dunsil seam to the east of current workings; infrastructure improvements; 3D surface seismic survey	£3.2m	£3.54m	£1.39m	15.6	386/0
UK Coal plc, Thoresby, Notts	Development driveage to access reserves in Parkgate seam; purchase of new face and heading machinery and conveyor system.	£2.9m	[2]£15.0m	£2.09m	16.5	509/0
UK Coal plc, Welbeck, Notts	Development driveage to access reserves in Deep Soft seam; infrastructure improvements; upgrade of ROM handling plant	£5.2m	£10.66	£2.54m	8.0	528/0
	Total	£40.7m	£94.6m	£16.42m	131.8	3738/106

[1] Award was not taken up.
[2] Included revision of project covered by Period 1 award.
NB .No Period 2 application was received from J Flack & Sons Ltd for Hay Royds Colliery, W Yorks, which received an award of £140,000 in Period 1.

INTERNATIONAL DEVELOPMENT

Hurricane Ivan

The Secretary of State for International Development (Hilary Benn): On 14 September 2004, I provided the House with an oral statement on the impact that Hurricane Ivan was having on a number of islands in the Caribbean. I would like to update the House today, in advance of the recess, on the latest situation and the international relief effort being undertaken. I will provide a further written statement following the return of the House.

Hurricane Ivan has now passed through the Caribbean and is in the gulf of Mexico. It was downgraded to a category four hurricane and made landfall along the United States coast on 15 September. It took one week, from 7 to 14 September, for the hurricane to travel from Grenada, to Jamaica, the Cayman Islands and finally western Cuba, causing over 60 deaths and severe damage along its way.

The situation in Grenada continues to be serious. The latest reports from the island indicate that 37 people died and over 300 were injured as a result of the hurricane. Two thirds of the population (60,000 people) are reportedly affected and it is estimated that between 4,000 and 8,000 people are living in shelters. The range of figures reflects that many of these shelters are private houses of which there are up to 200. Electricity supply continues to be a problem and piped water is only available to about a third of households across the island. In the meantime water tankers are operating, but fuel is in short supply. This is hampering both transport and emergency electricity generation. The main hospital is working and sustained only minor damage. Drugs are in short supply as the main stock was destroyed. Other hospitals on the island suffered more extensive damage. There is a dawn to dusk curfew following the looting that occurred immediately after the hurricane had hit the island.

The relief operation is scaling up quickly but continues to face problems with coordination and communications. The emergency operation centre building was destroyed in the immediate aftermath of the hurricane but was brought back into operation by the efforts of HMS Richmond. It is now fully operational with assistance from the regional Caribbean disaster emergency response agency and a recently arrived United Nations disaster assessment and coordination team. Roads and airports are now open. Distribution of food and other relief items is proceeding slowly, in part due to fuel shortage and in part due to the scale of properly assessing where need is greatest. The United Nations team will help in prioritising the delivery of supplies. Communicating with the population is also a constraint. There are only FM broadcasts operational, and these do not reach the whole island. The two dependencies of Carriacou and Petit Martinique have yet to be assessed.

As I reported to the House on 14 September, the Department for International Development delivered plastic sheeting for 1,400 families and water containers for 11,000 people on 11 September and made an immediate contribution of some £83,000 to the Pan American Health Organisation. We have since made a contribution of £132,000 to the preliminary appeal for Grenada of the International Federation of the Red Cross. The Pan American Health Organisation and the International Federation of the Red Cross are both active in Grenada. The Pan American Health Organisation has deployed medical personnel and vaccines. The International Federation of the Red Cross has sent a number of relief flights with basic relief items, including shelter materials. The Department for International Development are continuing to monitor the situation closely, in particular the level of medical supplies on the island, and will consider providing further relief assistance as needs become clearer. We are in daily contact with the Pan American Health Organisation concerning health needs.

The United States Agency for International Development has provided plastic sheeting for 25,000 people and other relief items in Grenada. The Canadian International Development Agency have approved support of £211,100 and the European Community's humanitarian office have approved an allocation of £1.03 million for Grenada. The bulk of this allocation will go towards the Red Cross operation and Oxfam who are assisting with emergency water and sanitation work. The United Kingdom's share of this European Community support is about £200,000.

The two-person humanitarian assessment team sent to the region by the Department for International Development arrived in Kingston, Jamaica on 13 September. On 14 September, they met with representatives from the Government of Jamaica, national and international organizations, and other donors. They report good coordination between the Government's Office for Disaster Preparedness and Emergency Management, the Jamaican Red Cross, the Salvation Army and the United Nations disaster assistance and coordination team. Joint rapid assessments are underway with several areas of the island already identified as the most severely affected. These areas include Westmoreland, Claredon, Morant Bay, May Penn and the northeast Blue Mountains. It is not thought that there is widespread devastation but there are a number of pockets of devastation.

Until the assessments are completed, exact figures are difficult to come by but there are reported to be 200 to 245 shelters open, serving between 4,000 to 13,000 residents across the island. Water is the key issue in many of the hardest hit communities. Food stocks in the Blue Mountain region were reported as running low. Heavy flooding in the surrounding area is delaying assessments. As an interim measure, the Government of Jamaica through its defence forces has airlifted an initial stock of food to the region. The Red Cross has also delivered relief supplies. Although most of the hospitals are operational, they report a lack of power and water supplies with much of the ground water contaminated. The Pan American Health Organization is working with the Ministry of Health to identify specific needs in the health sector and resolve these problems. A number of non-governmental organisations have undertaken preliminary assessments to address short-term relief needs. The Department for International Development has received requests for funding support from Save the Children, Oxfam and ADRA. These proposals are being urgently considered.

The Department for International Development assessment team arrived on the Cayman Islands, from Jamaica on 15 September. They are assisting the Government in undertaking urgent humanitarian needs assessments, which will determine what further urgent supplies are required. Initial estimates indicate 15–20 per cent. of residential houses completely destroyed and 20 per cent. with major damage. The Department for International Development had already responded to an earlier request for assistance by procuring 3 million water purification tablets, 50 chainsaws, 500 camp cots for children and 5,000 pieces of plastic sheeting. These supplies are on their way to the island, with our first relief flight arriving today. The International Federation of the Red Cross is also planning a relief flight.

The Governor is concerned about maintaining security on the islands and is looking to obtain additional security support. The Foreign and Commonwealth Office is considering the request. The Governor is not aware of medical supply problems but the assessment being undertaken will confirm these and other needs. The main concern appears to be water supply and the need to deliver water purification tablets, which the Department for International Development is supplying. A water trucking system is being set up. HMS Richmond sent a 17-person party on shore on 14 September. They have repaired generators, attended to damaged buildings and have been providing food distributions. Of a population of 42,000, approximately 3,000 people remain in shelters. Food supplies are being delivered to all shelters. The airport on the island is now fully operational and busy with both passenger and cargo aircraft. This has enabled 30 dialysis patients needing emergency dialysis and ongoing care to be airlifted to the United States by Cayman Airways. Shops have reopened. The Caribbean Utilities Company will support restoration of power supplies.

Ivan swung past the western edge of Cuba late on 13 September as a category five hurricane. One and a half million people had been evacuated from the area by the Cuban authorities, with 300,000 people placed in shelters. The western area of Cuba is sparsely populated and there have been no immediate reports of deaths, injuries or serious damage to buildings. It is mainly a tobacco growing area but planting does not begin till next month so limited damage is expected on tobacco crops. Its impact on agricultural installations and housing in coastal areas is to be reported. Airports have reopened and children are expected to return to school this week.

The Ministry of Foreign Investment and Economic Cooperation are forming an assessment team to inform the Government of needs. Cuba prepared itself well ahead of the hurricane and fortunately appears to have been spared the full force of the hurricane, and national emergency services have mobilised rapidly to distribute food and non-food items to displaced people.

Whilst Hurricane Ivan has passed out of the Caribbean, hurricane warnings remain in place for the Yucatan peninsula in Mexico. Residents and tourists have been evacuated from areas likely to be affected by strong winds and waves. No reports are yet available on the impact on the Yucatan peninsula but damage is likely to be contained.

Further information on the continuing relief effort to affected islands will be made available via the Department for International Development website http://www.dfid.gov.uk/.

This will include details of how concerned members of the public could help via relief agencies.

Iraq (Reconstruction)

The Secretary of State for International Development (Hilary Benn): I visited Baghdad and Basra from 31 August to 1 September to learn for myself about progress with reconstruction on the ground. I met Prime Minister Allawi, development Ministers, representatives from the United Nations, civil society and the Independent Electoral Commission of Iraq, and representatives from local government.

The interim Iraqi Government is now clearly in charge, although recent events in Najaf have dominated its first months in power. The difficult security situation has inevitably slowed down the reconstruction effort of not just the UK, but also of other donors and the multilateral agencies. However, it was clear that progress is still being made. Some 45 km of water pipes have been laid in Basra since my last visit in February and electricity distribution is now more equitable across the national grid. Partially due to these efforts, the riots that happened in Basra last summer because of the lack of basic services have not reoccurred this year.

While in Iraq I announced a number of new UK bilateral projects, focusing on building the capacity of the Iraqi Administration, and promoting employment creation, in southern Iraq. These projects mark an important step forward in our reconstruction efforts in southern Iraq as we move from meeting short-term humanitarian and immediate infrastructure rehabilitation needs towards addressing longer-term development challenges. Southern Iraq should receive massive reconstruction funds over next two to three years from a range of sources, including the USA, Japan and the World Bank and UN trust funds. One of DFID's aims is to help the Iraqi administration to ensure that this money is spent quickly and well, and that the benefits of reconstruction are widely shared across the population. We are investing £20.5 million in strengthening local management, planning and financial capacity in the four southern governorates of Basra, Muthanna, Dhi Qar and Maysan, including £15 million for projects developed by the Governorates. We have also started a new £16.5 million programme to finance employment programmes and further emergency infrastructure repairs.

DFID has committed £331 million to humanitarian and reconstruction assistance in Iraq since March 2003. Of this total £78 million has been allocated to bilateral reconstruction projects in southern Iraq; £19 million to support for the new interim Iraqi Government, the justice sector, independent media, civil society and political participation; and £28 million for consultants and secondments to the Coalition Provisional Authority while it was in office up to 28 June. £70 million has been paid into the trust funds managed by the United Nations and the World Bank, to be spent primarily on health, education, water and sanitation projects, assistance for refugees and strengthening governance; and nearly £12 million has been committed to IMF and international finance corporation programmes for economic governance support and small business development. Updates on DFID's programmes can be found on the internet at www.dfid.gov.uk, as well as in the House Library.

As on my previous two visits to Iraq, I was impressed by the extraordinary courage and commitment of all the people, both international and Iraqi, who are working to help the new Iraqi Government and the people of Iraq to build the better future that they deserve.

Post Conflict Reconstruction Unit

The Secretary of State for International Development (Hilary Benn): Together with the Secretary of State for Foreign Affairs and the Secretary of State for Defence, I wish to inform Parliament of the Government's intention to improve the United Kingdom's capacity to deal with immediate post conflict stabilisation, including by integrating civilian and military policy, planning and operations. In recent years, the United Kingdom, with the international community, has been increasingly involved in helping countries to stabilise after conflict. We need to deal better with conflict and instability, learn lessons and improve our capability to respond. Within this broader context, there is particular scope to improve the way in which we deal with immediate post conflict situations, especially those which include military and civilian components. The Foreign and Commonwealth Office, Ministry of Defence and Department for International Development are working closely to develop the capabilities that are needed. The Foreign Secretary will chair a new Cabinet sub-committee on post conflict reconstruction. My right hon. Friends and I expect to be in a position formally to establish an inter-departmental post conflict reconstruction unit later this year to lead this work. It will have a policy and operational role. In spring 2005 we anticipate being able to inform Parliament about its initial capabilities. Meanwhile, my right hon. Friends and I have placed a note in the House of Commons library which provides more detail about the Government's aims and plans.

Pakistan

The Parliamentary Under-Secretary of State for International Development (Mr. Gareth Thomas): On 15 September 2004, the Secretary of State for International Development wrote to Shaukat Aziz, Pakistan Prime Minister and Minister of Finance, to notify him that DFID has now cancelled Pakistan's ex-CDC debt amounting to £19 million.

The outstanding loans made by the former Commonwealth Development Corporation to public sector bodies in developing countries were removed from the newly formed CDC Capital Partners balance sheet on 31 August 2000 and transferred to DFID. In the case of Pakistan, the loan concerned was to the Karachi Water and Sewerage Board.

The only other inter-governmental debt between the UK and Pakistan relates to export credit guarantees. Following the Paris Club Agreement, this debt was rescheduled and is now valued at only £9 million.

In 2001 DFID agreed to cancel the ex-CDC debt, subject to Pakistan completing the second review of the Poverty Reduction Growth Facility (PRGF) with the International Monetary Fund. In the interim, the debt was suspended with no interest payments required from Pakistan to DFID. On 23 June 2004 the IMF Executive Board successfully completed the second annual review of Pakistan's PRGF, implying the ex-CDC debt can now be cancelled.

The Pakistan programme continues to be a high priority for DFID. As announced to the House in March 2003, during 2003 DFID provided Pakistan with £55 million to cancel debt held with the Asian Development Bank, World Bank and International Monetary Fund. Over the next two years (2004–05 and 2005–06), DFID's assistance to Pakistan will be £70 and £74 million respectively. This will support the

Government of Pakistan achieve the millennium development goals through the implementation of their poverty reduction strategy (published in December 2003). Priorities for DFD3 are increasing the incomes of poor people, improving service delivery to poor people and increasing accountability of the state to poor people.

HEALTH

Continuing Care

The Parliamentary Under-Secretary of State for Health (Dr. Stephen Ladyman): I am reporting on progress with investigations into cases where individuals may have been inappropriately denied fully funded National Health Service care since 1996. These cases relate only to matters of past financial injustice and all claimants had access to care services and NHS treatment.

The majority of strategic health authorities (SHAs) have made considerable progress since December in the process of remedying any consequent financial injustice to patients (or the estates of such patients) who had wrongly been made to pay for the cost of their continuing care. In December, just over 22 per cent. of cases received had been completed. Between December and March a substantial number of additional cases had been reported and by the end of March 57 per cent. of cases had been completed. A percentage completion rate of pre-March 31 cases of more than 85 per cent. in July reflects the amount of work undertaken by all NHS and local authority personnel involved.

The NHS has stressed the importance of all cases being investigated thoroughly and accurately and as such is committed to reviewing each application on its own merits. The process involved in undertaking an in-depth review involves contact with many health and social care organisations and bodies, and as such there have been considerable delays in obtaining all the relevant records and patient data. In some cases data and information from aged cases has been lost and, wherever possible, it must be gathered from alternative sources.

Delays should not automatically be attributed to the SHAs involved in particular cases; occasionally it is the claimant themselves who are responsible for the delay. Many SHAs are now exceeding 95 per cent. completion. In some cases, however, progress has been unsatisfactory, and the Department will take up the matter directly with those SHAs.

In total, almost 20 per cent. of cases have been granted recompense. As stated previously, the NHS expects to pay a total of £180 million when all the cases received by the end of March 2004 have been completed.

Approximately 1,600 cases remain outstanding, which is unacceptable. However, I am assured that all cases relating to living people have been prioritised, and that new applications for NHS continuing care are being dealt with in a timely fashion. My Department will be liaising with all SHAs to ensure appropriate procedures are now in place and that outstanding cases are resolved as quickly as possible.

The proportion of completed cases by SHA is shown in the table.

Figures for progress with restitution cases in continuing care

Strategic health authority (SHA) name	*At Dec 03 Number of cases*	*At Dec 03 Percentage completed*	*At March 04 Number of cases*	*At March 04 Percentage completed*	*At July 04 Percentage completed**	*At July 04 Cases eligible for payment***
Norfolk, Suffolk and Cambridgeshire SHA	512	2.3	651	43.2	91.8	72
Bedfordshire and Hertfordshire SHA	216	13.0	212	48.1	59.5	38

Health Committee's Report

The Parliamentary Under-Secretary of State for Health (Miss Melanie Johnson): The Government's response to the Health Committee's Fourth Report of Session 2003–04 on palliative care, Cm 6327, has been published today. Copies have been placed in the Library.

WORK AND PENSIONS

Benefit Fraud Inspectorate Phase 10 Work Programme

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) has today announced its phase 10 work programme.

BFI will be undertaking shorter inspections focused on the areas of poor local authority performance in the administration of housing benefits. Inspections focusing on the time taken to process benefit claims will be undertaken at Mid-Suffolk district council and Flintshire county council. Inspections focusing on the adequacy of councils' counter-fraud arrangements will be undertaken at a number of authorities including Gravesham borough council, south Buckinghamshire district council and south Cambridge district council.

BFI will undertake full inspections on four local authorities whose benefits administration has been identified as poor or fair under the comprehensive performance assessment regime. These include Castle Point borough council, Mansfield district council and south Northamptonshire council. A full inspection of Bromsgrove district council's benefits service will be made with the agreement of a Government monitoring board which has been set up by the Office of the Deputy Prime Minister.

BFI will also undertake a full inspection of Newport city council whose benefits service performance has been identified as a significant risk following assessment under the Wales programme for improvement.

BFI is an independent unit within the Department for Work and Pensions that inspects and reports directly to the Secretary of State for Work and Pensions on the standard of benefits administration and counter-fraud activity in local authorities and the Department itself.

Liverpool City Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the benefit fraud inspectorate (BFI) inspection report on Liverpool city council was published today and copies of the report have been placed in the Library.

Following the housing Green paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for Housing Benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, Liverpool city council administered some £237.1 million in housing benefits, 21.69 per cent. of its gross revenue expenditure.

BFI inspected Liverpool city council in July 2000 and identified significant weaknesses in its provision and management of benefit and counter fraud services.

The second inspection report finds that since July 2000 the council had initiated a major business transformation programme to address the issues and recommendations in BFI's first report. These included the:

re-engineering of its business processes;

establishment of a joint venture with a major private contractor to provide essential business services to improve its benefits and counter fraud services, including a customer contact centre and one stop shops;

implementation of a document management system in January 2003;

full implementation of the verification framework in April 2003;

replacement of its benefits and council tax IT systems in October 2003.

The report finds that the council had a clear vision for its benefits service supported by policies covering the full range of benefit administration activities. However, IT problems led to a backlog of work and the council had consistently failed to meet best value performance indicators for speed of processing claims. Delays in processing claims were undermining most aspects of the benefits service. New claim customers had to wait an average of 143 days for a claim to be processed and delays in processing reported changes of circumstances had resulted in overpayments being incurred unnecessarily by the council, representing a loss of public funds.

BFI had serious concerns about the total level of overpayment debt at the council, and an estimated £3.5 million of outstanding debt had not been transferred from its old benefits IT system.

BFI commend internal audit for its support of the benefits management team in addressing areas of weakness identified.

The counter fraud service was very effective and made use of the full range of sanctions available. The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Departmental Efficiency

The Secretary of State for Work and Pensions (Alan Johnson): On 29 June, following on from the announcements in the Budget, my predecessor gave an update to the House on the progress of the DWP efficiency programme which will reduce my Department's workforce by 30,000 by 2008.

The June statement highlighted that Jobcentre Plus was reviewing the scope to increase the efficiency of its benefits processing by reducing the number of sites in which this work is carried out. He also announced that, as part of their programme to modernise benefit processing and contact centre operations, Jobcentre Plus will take on six pensions centres.

I can today announce that:

Subject to further detailed planning benefit processing will be centralised in 81 sites by 2008. I would like to make it clear that 37 sites will cease to be viable and will close altogether as a direct consequence of centralisation. Not all jobs will go with many transferring elsewhere. In those sites not named for closure there is continued Jobcentre Plus activity and their future will be determined in the normal way as part of the rollout of the Jobcentre Plus network.

As part of the Jobcentre Plus roll-out strategy Jobcentre Plus Direct (which provides an initial telephone contact service for customers) will deliver services through 23 contact centres by 2006. This will involve moving work from a number of existing locations within the Jobcentre Plus network and will result in the closure of three sites where contact centre work is currently undertaken; Provan, Banbury and Milton Keynes.

In line with the Lyons Review, which recommended relocating some public sector activities away from London and the South East, Employer Services Direct will close two of its 11 Employer Direct sites, in Portsmouth and Bromley, by Summer 2005. Work will be moved to other sites.

Staff in all affected sites are being briefed by their managers today. We continue to consult with the trade unions. We have already outlined to them our policy proposals for handling these changes.

The changes I am announcing today are the latest component of our continuing modernisation programme that will lead to more efficient and effective services for our customers.

Pension Protection Fund/Pension Regulator

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): Improving member protection is a Government priority. The Pension Protection Fund and the Pensions Regulator form the basis of providing such protection and successful introduction of both organisations is a priority of this Government.

As the Pensions Bill is continuing its passage through the House there has been cross-party support for the principles behind both the Pension Protection Fund and the Pensions Regulator and the desire to provide protection for individuals as soon as possible.

The intention, subject to parliamentary approval, is to achieve successful introduction of both organisations by April 2005. This timetable is very challenging and in

order to make this date a reality it is necessary for the Department for Work and Pensions to carry out essential activities in advance of the legislation receiving Royal Assent.

Therefore, Parliamentary approval for additional resources of £477,000 for these new services will be sought in a supplementary estimate for the Department for Work and Pensions as soon as legislation is passed. Pending that approval, this urgent expenditure will be met by repayable cash advances from the contingency fund.

In addition, although no cash advance is required, the Department for Work and Pensions will be agreeing to contractual and lease arrangements in respect of accommodation in Croydon, where the staff of the Pension Protection Fund will be located. These negotiations are ongoing, however the Department will endeavour to keep resource consequences to a minimum. When these costs are known the Department will inform the House.

Croydon was chosen as it met the three key criteria, essential to ensure that the Pension Protection Fund can operate with optimum effectiveness and efficiency, within the required deadline. These key criteria are: achieving successful implementation—which includes direct links and proximity to both the Pension Regulator in Brighton and key stakeholders in London; ability to recruit the right staff and value for money.

London Borough of Enfield

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on London Borough of Enfield Council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for Housing Benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002-03, London Borough of Enfield Council administered nearly £123 million in housing benefits, representing some 17.5 per cent of its gross revenue expenditure.

The report concludes that the council had made sustained improvements in some important areas since the initial inspection of the benefits service in September 2002.

Between September 2002 and March 2004 it had reduced its backlog of work of some 6,800 items to 1,882 and made significant improvements in processing new benefit claims, reducing the time taken to determine claims from 67 days on average in 2002-03 to 41 days by February 2004.

The council had made organisational changes to strengthen its stand against benefit fraud. It had increased the number of investigators, leading to improvements in the quality of investigative work and the number of sanctions being applied to fraudsters.

However the council needs to improve the identification, classification and recovery of benefit overpayments.

The report makes recommendations to help the council address weaknesses and to further improve the administration of Housing Benefit and Council Tax Benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Teesdale District Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Teesdale district council was published today and copies of the report have been placed in the Library.

Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for Housing Benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002-03, Teesdale district council administered nearly £4.56 million in housing benefits, about 43.3 per cent. of its gross revenue expenditure.

BFI's report identifies a number of significant concerns. Some strategic management policies were lacking and this meant that managers and staff did not have a clear understanding of what was essential to deliver a high quality service.

Below this, a lack of procedural guidance hindered benefits administration and counter-fraud work. Processes were based on custom and practice, which meant that staff had no reference materials and there was no assurance safeguards for new staff. Despite the lack of documented policies and procedures, the standard of work in many areas was generally good and the report notes the improvement in claims processing times which were just outside the upper quartile performance for all local authorities in the United Kingdom.

Particular weaknesses were found, however, in customer services. A best value benefits satisfaction survey that was due in 2003 had not been undertaken. There had been no measurement of customer waiting times or assessment of the telephone service provided.

No formal take-up strategy was in place and BFI concluded that the council was not providing adequate information to current or potential customers.

The report found that informal working relationships between departments in the council had resulted in poor communications that were detrimental to benefits service customers. The housing unit had sent repossession notices to council tenants with rent arrears even when the arrears were due to benefit claims not having been processed.

The report raises concern that there had been little work undertaken to recover overpayments. This had resulted in an accruing debt and consequential loss of available funds to the council. Although it was still to achieve its first successful prosecution, the application of other sanctions was an encouraging sign that the council was establishing an effective counter-fraud operation.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Inspection Report of the Benefit Fraud inspectorate in Respect of Swindon Borough Council

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions, the Benefit Fraud Inspectorate (BFI) inspection report on Swindon Borough Council was published today and copies of the report have been placed in the Library. Following the housing Green Paper "Quality and Choice: A Decent Home for All", published in April 2000, the Department for Work and Pensions developed a performance framework for housing benefits. The "Performance Standards for Housing Benefits" allow local authorities to make a comprehensive self-assessment of whether they deliver benefit effectively and securely. They are the standards that the Department for Work and Pensions expects local authorities to aspire to and achieve in time.

In 2002–03, Swindon Borough Council administered some £34 million in housing benefits, about 13 per cent. of its gross revenue expenditure.

The report concludes that the council had made sustained improvements in some important areas since the current contractor took responsibility for the Benefits service in August 2002.

Between August 2002 and January 2003 it had cleared its backlog of work of some 9,400 cases and made significant improvements in processing new benefit claims, reducing the time taken to determine claims from 89 days on average in 2002–03 to 59 days in 2003–04.

It had also carried out a number of good quality fraud investigations, prosecuting eight benefit fraudsters during 2003–04.

However, the council needs to develop a strategic manágement infrastructure to enable effective management and monitoring of the benefit service. This will also provide senior managers and elected Members with assurance that recommendations from auditors and other regulators are implemented.

The council also needs to do more to process claims accurately, prevent and deter benefit fraud and recover the £2.58 million of housing benefit debt outstanding.

The council have asked for help from the BFI's performance improvement action team.

The report makes recommendations to help the council address weaknesses and to further improve the administration of housing benefit and council tax benefit, as well as counter-fraud activities.

My right hon. Friend the Secretary of State is now considering the report and will be asking the council for its proposals in response to the BFI's findings and recommendations.

Housing Benefit Quarterly Performance Statistics

The Parliamentary Under-Secretary of State for Work and Pensions (Mr. Chris Pond): On behalf of my right hon. Friend the Secretary of State for Work and Pensions I am announcing the publication of performance statistics for local authority administration of housing benefit and council tax benefit (HB and CTB) for the first quarter of 2004–05. A copy of the quarterly statistics for all local authorities in Great Britain has been placed in the Library and has been published on the Department for Work and Pensions website at: http://www.dwp.gov.uk/asd/other_stats.html.

Publishing these statistics is part our strategy for reforming housing benefit and for ensuring that local authorities are accountable for their performance in administration of housing benefit and council tax benefit.

Housing benefit and council tax benefit performance statistics show that in the first quarter of 2004–05, authorities that returned data reported that:

- new claims were processed in an average of 50 days, compared to 52 days in the first quarter of 2003–04
- some 146 authorities had met the performance standard for processing new claims, compared to 103 in the same quarter of 2003–04
- change of circumstances were processed in an average of 14 days, compared with 16 days in the first quarter of 2003–04
- some 40 authorities met the performance standard for processing change of circumstances, compared to 113 in the same quarter of 2003–04.

The statistics are un-audited and are provided quarterly by local authorities to my Department.

The most recent audited Best Value performance information for English local authorities for 2002–03 was published by my right hon. Friend the Deputy

Prime Minister on 18 December 2003 on the Best Value Performance Indicators website at: http://www.bvpi.gov.uk/home.asp. A copy is available in the Library.

The most recent corresponding data for local authorities in Wales is also for 2002–03. This is published on the Audit Commission website at http://www.lgdu-wales.gov.uk/eng/Project.asp?id = SX99AI-A77F4BA8. A paper copy of the relevant extract from this site is available in the Library.

The most recent corresponding data for local authorities in Scotland are also for 2002–03 and are in the Accounts Commission publication "Performance Indicators 2002–03: Benefits, Finance and Corporate Issues", a copy of which is available in the Library.

Pension Credit

The Minister for Pensions (Malcolm Wicks): I can now provide the latest monthly progress report on the take-up of pension credit, which became payable on 6 October 2003.

There are now 2.61 million pensioner households (3.17 million individuals) being paid pension credit, an increase of 25,000 households (31,000 individuals) during August. As at 31 August, there are 1.94 million households (2.36 million individuals) now receiving more money as a result of the introduction of Pension Credit, gaining by an average £16.33 a week. The average pension credit award is £41.71 per week.

There is plenty of time for pensioners to apply for pension credit. To ensure that people do not lose out, customers whose applications are successful in the period up to October 2004 will have their payment backdated to 6 October 2003 (or to the date of entitlement if this is later). The 2004 Budget statement confirmed that backdating arrangements will continue beyond October 2004. This means that anyone eligible applying after October 2004 will see their payment backdated by up to 12 months.

I am placing in the Library a report showing progress so far, including regional breakdowns of the number of pension credit households and accompanied by tables showing the numbers of pension credit awards in Parliamentary constituencies in Great Britain. Copies of the report and the tables are also available for hon. Members in the Vote Office.

PRIME MINISTER

House of Lords Appointments Commission

The Prime Minister (Mr. Tony Blair): I have today placed the House of Lords Appointments Commission annual report for 2003–04 in the Libraries of the House.

I am grateful to the members of the commission for the report and the work that has gone into preparing it.

Official Histories of Privatisation and the D-Notice System

The Prime Minister (Mr. Tony Blair): I have appointed Professor David Parker, Professor of Business Economics and Strategy at Cranfield University, to write "The Official History of Privatisation". I have also appointed Rear Admiral Nick Wilkinson, who will shortly be succeeded as Secretary of the Defence, Press and Broadcasting Advisory Committee, to write "The Official History of the D-Notice System".

Chief Surveillance Commissioner/Surveillance Commissioner

The Prime Minister (Mr. Tony Blair): I am pleased to announce that I have approved the re-appointment of the right hon. Sir Andrew Legatt as chief surveillance commissioner and the appointment of the noble Lord Coulsfield as a surveillance commissioner under the terms of section 91 of the Police Act 1997.

Both appointments commenced on 1 July 2004 and are until 30 June 2007.

FOREIGN AND COMMONWEALTH

North Korea

The Parliamentary Under-Secretary of State for Foreign and Commonwealth Affairs (Mr. Bill Rammell): I visited the Democratic People's Republic of Korea (DPRK or north Korea) from 11 to 14 September. It was the first ever visit by a British Minister. I undertook the trip because the north Koreans had agreed, for the first time, to substantive discussions on the nuclear issue and human rights. I met Foreign Minister Paek Nam Sun, Chairman of the Supreme People's Assembly Chae Thae Bok, Human Rights Minister Choe Su Hon and Kim Gye Gwan, head of the DPRK's delegation to the six-party talks on dismantling north Korea's nuclear programme.

I stressed to Foreign Minister Paek and Chief Negotiator Kim Gye Gwan the importance which the UK and the international community attach to the continuation of the Six Party Talks. For some time, it has been clear that the north Koreans might not proceed with the scheduled fourth round of talks by the end of September. The Foreign Minister restated the DPRK's commitment to the talks process, but admitted the DPRK's reluctance to meet again in September. I also impressed the need for the DPRK to admit its Uranium Enrichment Programme, and encouraged the regime to look to the example of Libya.

Before my visit the FCO delegation consulted on the human rights situation with three leading NGOs—Amnesty International, Human Rights Watch and Christian Solidarity World-wide. Armed with detailed information on individual cases, I was able to hand to Human Rights Minister Choe Su Hon a list of 18 named individuals, and asked for a full written response. In particular, I raised the cases of two south Korean pastors reportedly abducted to the DPRK from China whose details we learned about from Christian Solidarity World-wide. I handed over satellite photographs of what appear to be a number of large prison camps in the DPRK and asked for both an explanation and for access to them by diplomats resident in Pyongyang. I also pressed for the north Koreans to allow visits, so far barred, by the recently appointed UN Special Rapporteur for human rights in

the DPRK and by other thematic UN human rights Special Rapporteurs; and further visits by Foreign Office Human Rights experts. I hope to hear more about this at the UN General Assembly next week when I will meet Choe Su Hon again to continue our discussions. I repeatedly made the points that blanket denials by the north Koreans of alleged human rights violations were simply not credible.

My visit coincided with reports of a large explosion in the north of the country. Having asked for an explanation, Foreign Minister Peak said it was a planned explosion of a mountain for theconstruction of a hydro-electric power plant. He agreed to my request that diplomats might visit to see for themselves. The arrangements are now in hand. The British Ambassador visited the blast site today; I have asked for an urgent report on the visit.

SOLICITOR GENERAL

Treasury Solicitor

The Solicitor-General (Ms Harriet Harman): The Treasury Solicitor's annual report and accounts 2003–04 have today been published and laid before Parliament.

Copies have been placed in the Libraries of both Houses.

Written Answers to Questions

Monday 19 July 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

British/Spanish Fishing Fleets

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what the size of the *(a)* British and *(b)* Spanish fishing fleet (i) is and (ii) was in 1997; and what estimate she has made of the size of each fleet in 2006. [183340]

Mr. Bradshaw: The information available is given in the table. No estimate has been made of the anticipated size of the UK fleet in 2006, and an estimate for the Spanish fleet is also not available.

	Number of vessels	*Gross tonnage (tonnes)* [3]	*Engine power (Kw)*
UK fleet [1]:			
As at 31 December 1996	8,667	274,532	1,054,927
As at 31 December 2003	7,271	234,037	918,258
Spanish fleet [2]:			
As at 31 December 1996	18,244	603,249	1,537,453
As at 31 December 2003	14,579	489,002	1,200,712

[1] Data for the UK fishing fleet incorporate estimates for the fleets of the Isle of Man and the Channel Islands.
[2] Analysis of EC Fishing Vessel Register data provided by EUROSTAT.
[3] Tonnage data for the UK fleet incorporate the effect of the remeasurement of vessels onto a Gross Tonnage basis from other methodologies.

Departmental Costs

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs what the cost was of refurbishments to the fabric of the Department's buildings in each year since May 1997. [184379]

Alun Michael: Expenditure on fabric refurbishment each year since the Department's creation in 2001 was:

	£
2001–2002	850,000
2002–2003	3,525,000
2003–2004	2,464,799

Diagnostic Techniques and Equipment

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what action she is taking to reverse the amendments to EU Regulation 1774–2002 which prevent the import of by-products for use in development of diagnostic techniques and equipment. [183348]

Mr. Bradshaw: The Government fully supports the intention of EU Regulation 1774–2002 to provide effective control on the use and importation of animal by-products. However, we recognise that in the case of certain products of particular importance to the development of diagnostic techniques and equipment, the rules on import may not be fully justified by the risk to animal or public health presented by the products.

Following a meeting with industry representatives on 1 July, we have written to the European Commission asking them to reconsider the application of the current import requirements to these products. Officials attending the meeting of the Standing Committee on the Food Chain and Animal Health on 14 July will also raise the issue.

We are keeping industry contacts informed of progress.

English Nature

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs how many applications for judicial review were made against English Nature in the High Court in each year between 1997 and 2003 by *(a)* individuals, *(b)* non-governmental organisations and *(c)* corporate entities. [181514]

Mr. Bradshaw: There were no applications for judicial review made against English Nature between 1997 and 2000. Details of applications made between 2001 and 2003 are as follows:

	Individuals	*Non-governmental organisations*	*Corporate entities*
High court			
2001	1	None	[1]1
2002	1	None	None
2003	None	None	[1]1

[1] English Nature were co-defendants with the Secretary of State

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs how many judicial reviews brought against English Nature in the *(a)* High Court and *(b)* Court of Appeal between 1997 and 2003 (i) were successful and (ii) resulted in an order for costs being made against the applicant; and what costs were awarded in each case. [181522]

Mr. Bradshaw: English Nature has been successful in all proceedings brought between 1997 and 2003. Details are as follows:

One application for Judicial Review was made to the High Court, against English Nature, by an individual (2001). This was unsuccessful and no costs were awarded against that individual.

One Judicial Review heard by the High Court, brought by a company against English Nature as co-defendant with the Secretary of State, was successfully defended (2001). English Nature were awarded £117,500 (inc VAT) for their part of the costs. There was no appeal made to the Court of Appeal.

Two further cases have been heard in the High Court:

One was brought by an individual against English Nature. The action was successfully defended. However the individual concerned appealed to the Court of Appeal. The appeal was granted in 2003, but the case was not heard until 2004. English Nature won that case. English Nature incurred costs of £250,000 (ex VAT). In reaching its decision the Court awarded costs to English Nature. It is still possible for the aggrieved to petition the House of Lords.

The other was brought by a company against the Secretary of State and English Nature in 2003. The action was successfully defended. The company concerned has now appealed to the Court of Appeal and the case will be heard later this year. Costs are, therefore, still accruing and the outcome of the case will determine the costs issue.

Fishing Families

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to assist fishing families suffering hardship. [183353]

Mr. Bradshaw: We have taken substantial measures in recent years to address the issues facing those affected by the state of the fishing industry. £85 million of grant has been available to the UK industry in 2001–04 under the Structural Funds programme plus further amounts for specific schemes in various parts of the UK. This has included funds to promote increased competitiveness in the industry and enable vessel owners to leave the industry by decommissioning their vessels.

The Prime Minister commissioned his Strategy Unit to recommend action to create a stable future both for the industry and for the communities which depend upon it. We are now preparing to draw up an action plan with stakeholders to take forward the recommendations in the Unit's report "Net Benefits: A sustainable and profitable future for UK fishing".

Regional Development Agencies, local Business Links, Learning and Skills Councils and Job Centre Plus provide expert support to communities affected by the depletion of fish stocks.

Non-departmental Public Bodies

Mr. Stephen O'Brien: To ask the Secretary of State for Environment, Food and Rural Affairs how many non-departmental public bodies for which her Department is responsible have been *(a)* established and *(b)* abolished since 1997. [182950]

Alun Michael: The Department for Environment, Food and Rural Affairs was established in June 2001, at which time Defra was responsible for 57 NDPBs[1]. Since then the number of NDPBs established and abolished are as follows:

	NDPBs established	*NDPBs abolished*
June 2001–March 2002[2]	1	3
April 2002–March 2003	2	2
April 2003–March 2004	3	3

[1] Number includes 2 public corporations

[2] These figures are sourced from "Public Bodies". In "Public Bodies 2001" a DTI sponsored NDPB was included in Defra's return and our two public corporations were listed as an Executive NDPB and a Nationalised Industry. These were printer's errors and the figures above are correct even though they do not directly correlate with "Public Bodies".

Rural Proofing

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what measures she proposes to strengthen rural proofing at regional level. [183913]

Alun Michael: The application of rural proofing principles at all levels of government, both in policy formulation and delivery, makes an essential contribution to our aim of building sustainable rural communities. The rural teams in all the non-London Government Offices play a leading role, as the latest Countryside Agency's Rural Proofing Report makes clear and will continue to bring rural proofing into all major policy workstreams at regional and sub-regional levels, including those of the Regional Development Agencies. Joint publications by the Regional Development Agencies show how they are approaching their work with a clear focus on Sustainable Development.

The Regional White Paper 'Your Region, Your Choice' makes rural policy one of the functions of the proposed Elected Regional Assemblies, and Regional Housing Boards are required to rural proof their policies.

INTERNATIONAL DEVELOPMENT

Iraq

Mr. Rosindell: To ask the Secretary of State for International Development how many hospitals there are in Iraq; and at what capacity they are running. [184272]

Hilary Benn: According to the May 2004 Iraq Humanitarian Assistance Report, there are 240 hospitals and 1,200 primary health care clinics employing over 100,000 health workers. There are no statistics available showing what capacity these hospitals are running at. Preliminary indicators that are available show a doctor to population ratio at five per 10,000, which is satisfactory, but a severe shortage of nurses with only an estimated total of 12,000 active in the health sector.

There are many challenges facing the health sector in Iraq. DFID's main support to date has been to help ensure that the Ministry of Health can call on expertise to help them restore essential services. DFID has provided £5 million to the World Health Organisation to enable them to work with the Iraqis on these issues. Additional DFID support is being channelled through the multi-donor World Bank and United Nations trust funds, to which DFID has made an initial contribution of £70 million.

EU Development Spending

Clare Short: To ask the Secretary of State for International Development how much and what percentage of the UK aid budget was committed to EU development spending in each year since 1990. [184772]

Hilary Benn: The following table provides the information from financial year 1990–91 to 2002–03, the latest year for which figures are available.

Percentage of UK aid budget to the European Commission (EC)

£ million

	European Commission	*EC percentage of total DFID programme*
1990–91	317	19
1991–92	413	21
1992–93	464	22
1993–94	516	23

Percentage of UK aid budget to the European Commission (EC)

£ million

	European Commission	*EC percentage of total DFID programme*
1994–95	599	26
1995–96	677	30
1996–97	620	29
1997–98	543	26
1998–99	735	31
1999–2000	739	29
2000–01	700	25
2001–02	724	25
2002–03	851	26

Source:
Statistics on International Development. Prepared by: SRSG 14/07/04.

International Aid (UN Target)

Mr. Davidson: To ask the Secretary of State for International Development if he will list those countries which meet the UN target of spending 0.7 per cent. of gross domestic product on international aid; if he will list those countries which have set a date by which they will do so; and if he will make a statement. [184135]

Hilary Benn: Countries that already meet the UN target of spending 0.7 per cent. of gross national income on official development assistance are:

Denmark
Luxembourg
Netherlands
Norway
Sweden

Other countries that have set a date by which they will reach the 0.7 per cent. target are:

Belgium
Finland
France
Ireland
Spain

On Monday 12 July, as part of the 2004 Spending Review, the Chancellor announced that UK ODA would reach nearly £6.5 billion a year by 2007–08. Total UK ODA as a proportion of GNI will rise from 0.34 per cent. (provisionally) in 2003 to 0.39 per cent. next year, 0.42 per cent. in 2006–07 and to 0.47 per cent. in 2007–08. The Government wishes to maintain these rates of growth in the overseas aid ratio which on this timetable would rise beyond 0.5 per cent. after 2008 and reach 0.7 per cent. by 2013.

The Chancellor's proposal to establish the International Financing Facility provides an additional means of significantly increasing investment in international development to address the funding gap. If the International Finance Facility (IFF) succeeds, total UK aid flows based on estimated disbursements from the IFF, excluding the debt service elements, could achieve the equivalent of 0.7 per cent. ODA/GNI earlier, by 2008–09.

Travel Costs

Dr. Cable: To ask the Secretary of State for International Development what the travel costs were of civil servants in *(a)* his Department and *(b)* its related agencies in each year since 1997. [183893]

Hilary Benn: The figures reflect domestic and overseas travel. All official travel is undertaken in accordance with the rules contained in DFID's staff handbook, which reflects the requirements of the Civil Service Management Code. Figures for earlier years are not available and could be provided only at disproportionate cost. Figures for travel costs within administration costs budgets for years for which information is readily available are as follows.

£

	Amount
2001–02	2,358,000
2002–03	2,645,000

In 2003–04 DFID introduced new procedures to capture administration costs, which had previously been recorded on the programme budget. This included travel expenditure, previously incurred by overseas offices, which constitutes the bulk of official travel. These changes will increase transparency and enable DFID to manage administrative costs more effectively, but means that 2003–04 figures are not comparable with earlier years.

£

	Amount
2003–04[1]	10,715,000

[1] Provisional

DEPUTY PRIME MINISTER

Affordable Housing

Mr. Gray: To ask the Deputy Prime Minister when he expects to meet regional planning guidance targets for affordable housing provision in the South West; and why the Housing Corporation is planning to fund fewer new homes per year for 2004 to 2006 in the South West than the 2001 Regional Planning Guidance target. [185181]

Keith Hill: The policy of the Office of the Deputy Prime Minister—as set out in Planning Policy Guidance Note 3 (PPG3)—is not to set region-wide targets or quotas for affordable housing. Targets are more appropriately set at the local level as they are, necessarily, derived from local circumstances and assessments. The figures set out in Regional Planning Guidance for the South West (RPG10) are, therefore, not a target but an indicator against which the provision of affordable housing can be monitored. Although better quality information than currently available is needed to assess how we are progressing against this indicator, we do know that we are not yet providing sufficient affordable homes. That is why the Office of the Deputy Prime Minister has accepted Kate Barker's recommendation that there should be a step-change in housing supply. Over the coming months, we will be consulting on a package of proposals designed to

achieve this, including the provision of independent advice to the Regions, which should improve significantly our ability to deliver and monitor the provision of affordable homes.

The office of the Deputy Prime Minister is also committing more resources to the delivery of affordable homes—the 2004 Spending Review will allow us to increase new social house building by 50 per cent. The Housing Corporation's Approved Development Programme (ADP) for the financial years 2004–05 and 2005–06 is worth £188.2 million and will deliver approximately 6,000 affordable homes in the South West. However, the ADP is not the only means available to deliver affordable housing. The planning system also provides local authorities with other tools to deliver affordable homes.

PPG3 requires that Local Planning authorities should plan to meet the housing requirements of the whole community, including those in need of affordable and special needs housing. The provision of affordable housing is a local authority responsibility and should be made on the basis of robust local assessments of needs. Where need is clearly demonstrated for affordable housing, this should be taken into account in formulating development plan policies and in deciding planning applications involving housing.

Coalfield Enterprise Fund

Jeff Ennis: To ask the Deputy Prime Minister what progress is being made in the take-up of the Coalfield Enterprise Fund, with particular reference to south Yorkshire. [184109]

Phil Hope: The Coalfields Enterprise Fund is a venture capital fund aimed at investing in small and medium-sized companies with growth potential in the former coalfields. The Deputy Prime Minster announced the Fund on 26 March this year.

The fund manager has embarked upon a comprehensive marketing and promotional programme to establish the fund across the former coalfield areas including south Yorkshire.

As at the 13 July 2004 the Fund Manager had received a total of 27 applications for investment, of which 12 are in the former Yorkshire coalfield areas. Of these, four have been rejected as not fulfilling the Fund's investment criteria and eight are receiving further consideration.

Councillors' Allowances (London)

Mr. Rosindell: To ask the Deputy Prime Minister what the total amount paid in allowances to councillors was in each of the London boroughs in 2003–04. [184281]

Mr. Raynsford: The information requested is not held centrally and could be provided only at disproportionate cost. The setting of local allowance levels is a matter for each local authority, taking into account its local circumstances and the views of its independent remuneration panel.

House Prices (Portsmouth)

Mr. Hancock: To ask the Deputy Prime Minister what the percentage change in house prices in Portsmouth was in each of the last five years. [184351]

Keith Hill: The annual percentage change in residential property prices in Portsmouth for each of the last five years is tabled as follows:

	Average price (all dwellings) (£)	*Percentage change over previous year*
1999	71,185	+8.9
2000	185 85	+20.0
2001	95.911	+12.3
2002	117.161	+22.2
2003	137,435	+17.3

Notes:
1. The figures exclude any transactions believed to be below market value;
2. Over the period 1999–2003 the average number of property sales included in the figures was about 5,400 per annum.

Source:
Land Registry

Housing (Right to Buy)

Mr. Drew: To ask the Deputy Prime Minister when he will make an assessment of the success of the Housing (Right to Buy) (Limits on Discount) (Amendment) Order 2003. [184609]

Keith Hill: Reliable information on the effect of the Housing (Right to Buy) (Limits on Discount) (Amendment) Order 2003 on Right to Buy sales is not yet available. Many sales in 2003–04 resulted from applications made by tenants before the order came into effect on 27 March 2003. The Government are keeping the question of maximum Right to Buy discounts under review.

Mr. Drew: To ask the Deputy Prime Minister what plans he has to expand into new areas the Housing (Right to Buy) (Limits on Discount) (Amendment) Order 2003. [184610]

Keith Hill: The Office of the Deputy Prime Minister has no plans to lower the maximum discount available to tenants under the Right to Buy scheme in any other areas, but we are keeping the question under review.

Mr. Drew: To ask the Deputy Prime Minister what representations he has received on the Housing (Right to Buy) (Limits on Discount) (Amendment) Order 2003. [184611]

Keith Hill: The Office of the Deputy Prime Minister has received a number of representations on this order, from individual tenants, social landlords, and other organisations. Some have criticised the Government's decision to lower the maximum amount of discount available to tenants under the Right to Buy scheme in 41 areas under the greatest housing pressure, while others have supported it.

Housing Investment

Dr. Naysmith: To ask the Deputy Prime Minister what discussions he has had with the Treasury on boosting affordable housing investment in the South West in the Comprehensive Spending Review 2004. [183991]

Keith Hill: I refer my hon. Friend to the Deputy Prime Minister's statement to the House on 13 July. By 2008, we will have more than doubled spending on new affordable housing in England since 1997, reaching £2.25 billion in 2008. This will be funded through direct investment, the private finance initiative programme and efficiencies in procurement.

The Office of the Deputy Prime Minister will be looking carefully at how the funds for direct investment, including the additional funding for 2006–07 and 2007–08 for high demand areas, are split between regions. This needs to reflect the pattern of needs between regions and the Government's national priorities and targets. The Office of the Deputy Prime Minister is looking to complete this work by the end of the year.

Housing

Llew Smith: To ask the Deputy Prime Minister how much additional brownfield land he expects to be used for home building as a result of his announcement of 13 July. [184827]

Keith Hill: Planning Policy Guidance Note 3: "Housing" sets a national target that by 2008, 60 per cent. of additional housing should be provided on previously-developed land and through conversions of existing, buildings. In the Spending Review statement published in the House on 12 July 2004, my right hon. Friend the Chancellor of the Exchequer reaffirmed the Government's commitment to the 60 per cent. target. The provisional estimate for 2003 is 66 per cent.

Mr. Tony Clarke: To ask the Deputy Prime Minister how many lettings have been made by *(a)* local authorities and *(b)* housing associations in Northampton in each of the last five years, broken down by category. [184843]

Keith Hill: Information on the number of lettings to new tenants made by local authorities and Registered Social Landlords (RSLs) in the Northampton area, broken down by category excluding any transfers and mutual exchanges, is tabled as follows:

Number of local authority new lettings made in Northampton area

Type of tenancy	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*[1]
New secure	1,316	1,186	1,295	1,218	1,080	—

ODPM's Housing Investment Programme returns and Housing Corporations CORE return

Housing Waiting Lists

Mr. Gray: To ask the Deputy Prime Minister what assessment he has made of the reasons for the change in housing waiting lists in the South West Region in the last year; and how he intends to reduce the waiting lists. [185184]

Keith Hill: Social housing waiting lists and the reasons for changes in them are a key part of the evidence considered by local housing authorities while carrying out assessments of local housing need. These assessments are used by the authorities in developing their housing strategies and should also influence local planning policies for the provision of affordable housing.

The provision of new affordable housing is the number one priority of the South West Housing Body who will be investing £188 million in the financial years 2004–05 and 2005–06 to deliver approximately 6,000 affordable homes within the South West.

Key Workers (Housing)

Mr. Edward Davey: To ask the Deputy Prime Minister how many key workers have received *(a)* equity loans, *(b)* higher value loans, *(c)* help with shared ownership and *(d)* help with intermediate renting in (i) each scheme zone and (ii) each English region from the Key Worker Living scheme, broken down by key worker group. [184141]

Keith Hill: The following table sets out details of the equity loans paid under the Key Worker Living (KWL) scheme between it going live on 1 April and the end of June. No transactions involving higher value equity loans have been finalised at this stage. The shared ownership and intermediate renting schemes available through KWL are on newly built properties and will be coming on stream gradually during the life of the programme.

Zone	Region	Key worker group			
		NHS	Teacher	Police	Other
Essex	East	2	2	1	—
South East Consortium	South East	18	25	3	[1]1
East London	London	2	—	1	—
North London	London	2	—	1	—
South East London	London	5	2	3	—
South West London	London	—	—	1	—
West London	London	1	1	1	—
Total		30	30	11	1

[1] Social worker.

Mr. Edward Davey: To ask the Deputy Prime Minister what the *(a)* budget, *(b)* funding from his Department and *(c)* funding from other Government Departments is for the Key Worker Living scheme in the current financial year. [184142]

Keith Hill: £690 million (including Zone Agent administration costs) will be spent through Key Worker Living, of which around £25 million is being contributed by participating employers. Discussions are also ongoing with employers and other Government Departments about additional land contributions and access to accommodation on the NHS Estate.

Mr. Edward Davey: To ask the Deputy Prime Minister how much has been *(a)* budgeted for and *(b)* spent on (i) administration and (ii) consultants' fees by each of the zone agents in the Key Worker Living scheme. [184143]

Keith Hill: Four products are available under the Key Worker Living programme: market purchase 'Homebuy'; new build 'Homebuy'; new build shared ownership and, intermediate renting at subsidised levels. NHS owned units are also being made available more widely. The zone agents (ZAs) act as a one-stop shop by providing information for all such schemes as well as administering market purchase (MP) Homebuy. The ZA administration cost for each completed MP Homebuy case is expected to average £2,218.

Although directly linked to market purchase Homebuy, the fee covers on-costs incurred by zone agents e.g. consultancy, to operate the full one stop shop service, including directing key workers to new build schemes and rental accommodation.

Landfill (Expansion Areas)

Mr. Sayeed: To ask the Deputy Prime Minister what consultation there is between his Department and the Department for Environment, Food and Rural Affairs on landfill in expansion areas. [184751]

Keith Hill: There is close working across Government Departments on matters relating to the growth areas, including on the sustainable management of waste.

Mr. Sayeed: To ask the Deputy Prime Minister what steps the Government will be taking to ensure the Review of Old Mineral Permissions is not used to co-locate landfill with development of 4,500 homes at the Wixams, formerly Elstow Garden Villages in Bedfordshire. [184750]

Keith Hill: Mineral planning authorities are required, under provisions in the Environment Act 1995, to undertake initial and periodic reviews of old mineral planning permissions in order to secure improved environmental and operating standards at mineral sites.

It is understood that Bedfordshire county council is currently considering an application for new planning conditions to apply to the restoration of former mineral workings at Elstow South. The hon. Member should make his views on the application known to the authority if he has not already done so.

Local Authorities' Performance Indicators

Mrs. Spelman: To ask the Deputy Prime Minister if he will place the unaudited data from the Best Value User Satisfaction Surveys 2003–04: General Survey Initial Topline Report for the 14 best value performance indicators for each of the 377 authorities available in the Library. [184975]

Mr. Raynsford: I refer the hon. Member to the answer given to her previous question on 12 July 2004, *Official Report*, column 868W.

National Housing Federation

Mr. Gray: To ask the Deputy Prime Minister what assessment he has made of the National Housing Federation's booklet The Evidence Update; and if he will take account of it in making future housing investment decisions about the South West region. [185183]

Keith Hill: The Office of the Deputy Prime Minister welcomes the work that the National Housing Federation (NHF) have done for their recent reports on housing needs in the, South East and South West. The general picture on housing pressures and the affordability of home ownership is in line with our analysis which under-pinned discussions of funding for affordable housing in the 2004 Spending Review. Officials from the Office of the Deputy Prime Minister will be meeting with the NHF shortly to discuss these reports.

The NHF South West is represented on the South West Housing Body Steering Group and as such they will play a key role in the development of the region's new Regional Housing Strategy (RHS) due for publication in early 2005. The RHS will reflect all relevant evidence from a variety of sources and will form the basis for the Housing Body's recommendations to Ministers on the distribution of housing resources within the region.

Regional Government (West Midlands)

Mr. Wiggin: To ask the Deputy Prime Minister if he will hold public meetings in Herefordshire to discuss proposals for a West Midlands Regional Assembly. [184018]

Mr. Raynsford: The Office of the Deputy Prime Ministers soundings about the interest in holding a referendum on whether to establish an elected regional assembly showed that the level of interest in the West Midlands is low. We therefore have no proposals to hold a referendum in the West Midlands during this Parliament and see no merit in holding public meetings in Herefordshire.

Social Housing

Mr. Hancock: To ask the Deputy Prime Minister how many *(a)* affordable homes and *(b)* homes for rent have been built in Portsmouth in each of the last five years. [184313]

Keith Hill: Figures for affordable homes built and homes for rent built are not available centrally.

Based on data reported by Portsmouth council and the National House-Building Council, the number of registered social landlord and council dwellings that have been built within Portsmouth in the last five financial years are as follows.

	Number
1999–2000	37
2000–01	92
2001–02	76
2002–03	88
2003–04	78

Mr. Hancock: To ask the Deputy Prime Minister how many lettings have been made by *(a)* the local authority and *(b)* housing associations in Portsmouth in each of the last five years, broken down by category. [184314]

Keith Hill: Information on the number of lettings to new tenants made by Portsmouth city council, and Registered Social Landlords (RSLs) in the Portsmouth area; broken down by category excluding any transfers and mutual exchanges, is tabled as follows:

Number of local authority new lettings made by Portsmouth CC[1]

Type of tenancy	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*[2]

TRANSPORT

A21 Upgrade

Gregory Barker: To ask the Secretary of State for Transport what assessment he has made of the impact on local communities of the delays in announcing his preferred route for the upgraded A21 at Hurst Green. [184652]

Mr. Jamieson *[holding answer 16 July 2004]:* No assessment has been made of the impact of delay in the announcement. I am aware of the local concern over the delays however, this section of the A21 is particularly sensitive and I have asked for further advice from the Highways Agency. When I have received their report I will make an announcement.

Gregory Barker: To ask the Secretary of State for Transport when he will announce his preferred route for the A21 at Hurst Green. [184653]

Mr. Jamieson *[holding answer 16 July 2004]:* I have asked the Highways Agency to carry out further work on this scheme including a review of alignment, road standard and value for money. When I receive their report later this summer I will make an announcement.

Airport Security Act 1982

Mr. Paice: To ask the Secretary of State for Transport what arrangements are in place for the resolution of disputes between police forces and airports designated under the Airport Security Act 1982 regarding the costs to be included within the re-charge arrangements. [184900]

Mr. McNulty: Section 26(3) of the Aviation Security Act 1982 states that this is a matter for agreement between the manager of the designated airport and the police authority in question. Failing agreement, the Secretary of State for Transport will arbitrate. Following Sir John Wheeler's review of Aviation Security, this system is being reviewed with a view to

making appropriate use of the Multi-Agency Threat and Risk Assessments (MATRAs) currently being undertaken at airports as a basis for agreement and, where necessary, arbitration.

Airports

Mr. Truswell: To ask the Secretary of State for Transport when he will issue guidance to airport operators regarding the airport master plan referred to in paragraph 8.38 of the White Paper, The Future of Air Transport. [183762]

Mr. McNulty: Guidance on the Preparation of Airport Master Plans was published jointly by the Department for Transport, the Scottish Executive, the Welsh Assembly Government and the Department for Regional Development in Northern Ireland on 12 July. Copies have been placed in the House Library and can also be downloaded from the DfT website www.dft.gsi.gov.uk.

Congestion Charges

Llew Smith: To ask the Secretary of State for Transport what assessment he has made of the health impact of the implementation of traffic congestion charges in cities where there is experience of their operation. [184388]

Mr. Jamieson: The Mayor of London introduced a scheme to reduce congestion in central London in February 2003. Early indications suggest that congestion charging has resulted in a significant reduction in road traffic in central London. The First Annual Monitoring Report by Transport for London (TfL) considered the direct effect of the congestion charge on air quality would be relatively modest. TfL's Second Annual Report estimated small decreases in both PM_{10} particles and nitrogen oxides in the charging zone. It is too early, however, to assess fully the air quality changes and thus to calculate the implied impact on health. GLA/TfL estimated that congestion charging would result in between 150 and 250 fewer reported accidents, involving injury, per year within Greater London. TfL's Second Annual Report highlighted that the recent pattern of decreasing levels of accidents within the charging zone is continuing, and there is no evidence of detrimental change in road traffic accidents within or around the zone.

Dangerous Goods (Safety)

Patrick Mercer: To ask the Secretary of State for Transport what measures his Department *(a)* has put in place and *(b)* plans to put in place regarding the implementation of the Dangerous Goods Safety Advisors scheme throughout the transport industry. [184590]

Mr. Jamieson: The requirement for the appointment of Dangerous Goods Safety Advisers stemmed from EU Directives 96/35/EC (June 1996) and 2000/18/EC (April 2000). Statutory Instrument 1999 No. 257 implemented the requirement into national legislation—The Transport of Dangerous Goods (Safety Advisers) Regulations 1999 (as amended). The 1999 regulations were later subsumed into Statutory Instrument 2004 No. 586—The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2004. This legislation implemented the requirements of the EU Framework Directives for Rail and Road, which required member states to align their national legislation with the international requirements for the transport of dangerous goods by rail and road. Similar legislation is in place in Northern Ireland.

The EU requirement to appoint safety advisers applied only to the transport modes of road, rail and inland waterways.

Diabetic Retinopathy (Driving Licences)

Mr. Sanders: To ask the Secretary of State for Transport how many diabetic retinopathy sufferers have had their driving licences revoked in each of the past three years; how many appealed against the decision; and how many had their licence subsequently returned. [184633]

Mr. Jamieson: Information on the total number of revocations over the last three years for drivers who have diabetic retinopathy is not available without incurring disproportionate costs. When a licence is revoked, the driver is always offered the opportunity to provide fresh evidence, which in such cases would normally be in the form of further visual field charts. If the new fields satisfy the standard, a licence will be re-issued. No information is readily available on how many drivers have their licences returned on this basis.

Since 2001, 18 drivers revoked because of diabetic retinopathy have formally appealed to a magistrates court in England and Wales or to a Sheriff Court in Scotland. Three went to a full hearing and of these two were dismissed and one was upheld and a new licence was issued. The other 15 appeals were withdrawn and eight have subsequently been issued with licences following the submission of fresh visual fields which met the required standard.

Mr. Sanders: To ask the Secretary of State for Transport what his Department's policy is on driving and visual disorders as they relate to people with diabetes; and if he will make a statement. [184635]

Mr. Jamieson: The visual standards and assessment procedures applied in relation to drivers with diabetes are those to which all drivers are subject, regardless of their medical condition.

Fishermen (Working Time Directive)

Mr. Paterson: To ask the Secretary of State for Transport what exemptions or derogations are applicable to fishermen in respect of the Working Time Directive; whether they are *(a)* temporary and *(b)* permanent; and when those that are temporary will expire. [184717]

Mr. Jamieson: Under the Fishing Vessels (Working Time: Sea Fishermen) Regulations 2004, which comes into force on 16 August, the Secretary of State may grant exceptions from the limit on the maximum weekly working time and the minimum periods of daily and weekly rest for objective or technical reasons or reasons concerning the organisation of work, provided he has consulted those concerned and the exception is subject to such conditions and limitations as will protect

fishermen's health and safety. He may alter or cancel any exception on reasonable notice and after consultation with those affected.

Mr. Paterson: To ask the Secretary of State for Transport whether the Working Time Directive is in force in relation to its application to commercial sea fishing activity. [185196]

Mr. Jamieson: The Fishing Vessels (Working Time: Sea Fishermen) Regulations 2004 were laid in Parliament on 13 July 2004 and come into force on 16 August 2004. The Regulations implement the European Directives on working time in respect of workers engaged in sea fishing.

Heavy Goods Vehicles

Mr. Drew: To ask the Secretary of State for Transport how many vehicles using the UK's roads were heavy goods vehicles in each of the last three years for which figures are available; how many road accidents involved HGVs in each year; how many people were *(a)* killed and *(b)* injured in such accidents; and what percentage these figures represent of the total in each case. [184302]

Mr. Jamieson: The latest available figures are for 2001 to 2003 when the number of UK-registered heavy goods vehicles on the roads was:

	Number of heavy goods vehicles
2001	449,000
2002	453,000
2003	456,000

In addition, it is estimated that between 50,000 and 70,000 foreign-registered HGVs use roads in Great Britain.

The information requested about road accidents involving HGVs in the UK, and casualties arising from these accidents is shown in the table.

	Road accidents involving HGVs		*People killed in road accidents involving HGVs*		*People injured in road accidents involving HGVs*	
	Number	*Percentage of all road accidents*	*Number*	*Percentage of all road fatalities*	*Number*	*Percentage of all injured road casualties*
2001	14,160	6	578	16	18,738	6
2002	12,894	6	532	15	17,058	5
2003	12,643	6	530	14	16,758	6

Mr. Drew: To ask the Secretary of State for Transport how many licensed heavy goods vehicles there were in the UK in each of the last 10 years. [184333]

Mr. Jamieson: The number of heavy goods vehicles licensed at the end of each of the last 10 years in the United Kingdom are as follows:

	Number of heavy goods vehicles
1994	430,500
1995	434,200
1996	438,000
1997	440,600
1998	439,500
1999	439,900
2000	443,300
2001	449,100
2002	453,000
2003	455,600

International Ship and Port Facility Security Code

Patrick Mercer: To ask the Secretary of State for Transport whether the training being given to ship security officers will train them in all 25 of the topics given in Part B of the International Ship and Port Facility Security Code. [184598]

Mr. Jamieson: The Maritime and Coastguard Agency approve training providers against the training specification for ship security officers which covers 23 of the 25 topics identified in Part B of the ISPS Code. Those concerning the layout of the individual ship are covered by the ship security officers' professional knowledge, and those concerning crowd management and control techniques are covered by other professional qualifications.

Motorcycles and Mopeds

Mr. Waterson: To ask the Secretary of State for Transport how many crashes involving motorcycles and mopeds resulting in death or serious injury there have been in *(a)* the UK, *(b)* East Sussex and *(c)* Eastbourne in each of the last 10 years. [184304]

Mr. Jamieson: The information requested is shown in the following table.

Fatal and Serious road accidents involving TWMVs[1] by area: 1994 to 2003

	East Sussex	*Eastbourne*	*UK*
1994	82	4	7,029
1995	79	4	6,906
1996	95	5	6,434
1997	80	5	6,729
1998	91	9	6,721
1999	76	5	7,163
2000	77	3	7,711
2001	86	8	7,670
2002	98	7	7,835
2003	90	3	7,951

[1] Two wheeled motor vehicles, mopeds, motor scooters and motorcycles.

Mr. Waterson: To ask the Secretary of State for Transport if he will list the laws and regulations affecting pillion passengers of less than 16 years of age on motorcycles and mopeds. [184305]

Mr. Jamieson: The following legislation affects all pillion passengers irrespective of age:

Only motorcyclists who have passed a motorcycle test can carry passengers. (Regulation 16 of the Motor Vehicles (Driving Licences) Regulations 1999)

The machine must be equipped with suitable supports or rests for the feet of the pillion passenger. (Regulation 102 of the Road Vehicles (Construction and Use) Regulations 1986)

Pillion passengers must be capable of sitting astride a proper seat securely fixed to the motorcycle. This may require specific adaptations to accommodate young children. (Section 23(2) of the Road Traffic Act 1988)

A pillion passenger must wear a safety helmet. (Motor Cycles (Protective Helmets) Regulations 1998)

The decision to carry a passenger on a motorcycle remains with the rider, who is legally responsible for ensuring that the passenger is safely supported. (Section 23(3) of the Road Traffic Act 1988)

Any passenger must be carried in a manner so that no danger is caused, or likely to be caused, to any person on the vehicle or on the road. (Regulation 100 of the Road Vehicles (Construction and Use) Regulations 1986)

It is an offence to use a vehicle when the number of passengers, or the manner in which they are carried, is such that it involves a danger of injury to any person. (Section 8 of the Road Traffic Act 1991)

Mr. Waterson: To ask the Secretary of State for Transport how many pillion passengers on motorcycles and mopeds have been *(a)* killed and *(b)* seriously injured in each of the last 10 years in (i) the UK, (ii) East Sussex and (iii) Eastbourne. [184306]

Mr. Jamieson: The information requested is shown in the following table.

Number of TWMV[1] passengers[2] killed or seriously injured: 1994 to 2003

Casualties

	East Sussex		*Eastbourne*		*UK*	
	Killed	*Serious*	*Killed*	*Serious*	*Killed*	*Serious*
1994	1	5	0	0	45	449
1995	0	9	0	1	30	505
1996	0	8	0	0	26	474
1997	1	9	0	0	33	465
1998	0	10	0	0	33	411
1999	0	2	0	1	24	449
2000	1	9	0	0	32	468
2001	0	5	0	0	29	403
2002	1	3	0	0	29	454
2003	3	4	0	0	30	428

[1] Two wheeled motor vehicles, mopeds, motor scooters and motorcycles.
[2] Includes casualties in motorcycle sidecars.

Mr. Flook: To ask the Secretary of State for Transport how many road accidents involving motorcycles and mopeds resulting in *(a)* death and *(b)* hospitalisation of (i) riders and (ii) pillion passengers there have been in (A) England, (B) Somerset, (C) Taunton Deane and (D) West Somerset in each of the last seven years. [184651]

Mr. Jamieson: The numbers of accidents involving a fatal of serious injury to a motorcycle/moped rider or passenger in the areas requested are given in the following table. "Serious" injuries are defined within the Departments road accident reporting system (STATS 19) as injuries for which a person is detained in hospital as an in-patient, plus injuries that may not lead to hospitalisation such as concussion, severe shock and severe cuts and lacerations.

	Severity	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*
England	Fatal	437	433	486	539	501	532	598
	Serious	5,132	5,165	5,462	5,804	5,822	5,955	6,093
Somerset	Fatal	3	8	7	10	11	8	6
	Serious	61	47	43	59	44	56	57
Taunton Deane	Fatal	0	3	0	0	2	0	0
	Serious	14	10	8	8	5	16	12
West Somerset	Fatal	1	1	0	2	3	1	1
	Serious	3	1	4	1	7	6	5

Railways

John Thurso: To ask the Secretary of State for Transport which organisations provided *(a)* legal, *(b)* financial and *(c)* auditing services valued at over £25,000 to the Strategic Rail Authority in each year since 2001; and what the value of these services was in each case. [180861]

Mr. McNulty: The information is shown in the following tables.

Road Traffic Accidents (Fatalities)

Mr. Chope: To ask the Secretary of State for Transport how many fatalities there were from road traffic accidents in each local authority area in England and Wales in *(a)* 1998, *(b)* 1999, *(c)* 2000 and *(d)* 2001. [184766]

Mr. Jamieson *[holding answer 16 July 2004]*: The information requested has been placed in the Libraries of the House.

Strategic Rail Authority

John Thurso: To ask the Secretary of State for Transport what the total value was of *(a)* technical and financial contracts, *(b)* technical consultants used on a call-off basis and *(c)* financial consultants used on a call-off basis by the Strategic Rail Authority in each year since 2001. [180893]

Mr. McNulty: The information is shown in the following table.

Approved invoices paid

£

Financial year	2000-01[1]	2001-02	2002-03	2003-04	2004-05[2]	Total
Technical and financial expenditure (non-call-offs)	352,553.87	4,608,001.72	9,744,734.23	3,906,538.03	830,827.42	19,442,655.28

[1] Figures in this column show expenditure for the two months February 2001 (when the SRA was established) and March 2001.
[2] Figures in this column show expenditure for the three months April to June 2004.

Transec

Patrick Mercer: To ask the Secretary of State for Transport how often the Director of Transec reports to him. [184601]

Mr. Jamieson: Frequently.

Transport Operator Identity Crime

Patrick Mercer: To ask the Secretary of State for Transport whether he plans to put in place measures to counter transport operator identity crime. [184606]

Mr. Jamieson: Security measures in place to manage the terrorist threat to the transport system vary according to the mode of transport and the threat. Where appropriate, such measures include the security screening of transport operators and the checking of their identity on entry to a restricted zone.

Uninsured Driving

Mr. Chope: To ask the Secretary of State for Transport when he intends to publish the report commissioned by his Department into uninsured driving. [184768]

Mr. Jamieson *[holding answer 16 July 2004]*: We are carefully considering all the recommendations in the report by Professor Greenaway on uninsured driving, and will be publishing the report as soon as possible.

DEFENCE

Iraq

16. **Mr. Kevan Jones:** To ask the Secretary of State for Defence when the Iraqi security forces will be at full operational level. [184484]

Mr. Hoon: The Iraqi Security Forces consist of the Iraqi Police Service, Iraqi Armed Forces, Iraqi National Guard, Iraqi Border Police, Facilities Protection Force, Iraqi Coastal Defence Force and Iraqi Riverine Patrol Service among others. Each of these is a separate organisation and has its own intensive programme of training and capability development. Some units of each are already operational locally. Further capability development will occur at different rates in each organisation. It is for the Iraqi Government to determine when the capability they seek is being delivered.

Mr. Ben Chapman: To ask the Secretary of State for Defence if he will make a statement on the time scale for the Iraqi security forces to reach full operational capacity. [184488]

Mr. Hoon: I refer my hon. Friend to the answer I gave earlier today to my hon. Friend the Member for North Durham (Mr. Jones).

21. **Kali Mountford:** To ask the Secretary of State for Defence what work his Department is doing with the *(a)* Department for International Development and *(b)* non-governmental organisations to assist the post-war reconstruction of Iraq. [184490]

Mr. Hoon: The Ministry of Defence's main contribution to the reconstruction of Iraq is to help provide the security that allows reconstruction projects to take place. We also work with the Department for International Development on numerous reconstruction projects in the South under the auspices of the Emergency Infrastructure Programme, with United Kingdom soldiers rebuilding and offering advice. We work with DFID to ensure that our Quick Impact Project money, which brings about short-term improvements in living conditions, is disbursed wisely.

MOD coordinates closely with DFID on Iraq policy issues, including strategic communication, capacity building and use of funds from the Global Conflict Prevention Pool. NGOs concerned with reconstruction normally engage with DfID. Our close relationship with DfID ensures that our collective reconstruction effort can take account of concerns or proposals from NGOs.

Mr. Rosindell: To ask the Secretary of State for Defence how many British troops are in Iraq; and what British equipment is deployed there. [184268]

Mr. Ingram: As at the 13 July there are around 8,500 British troops deployed on Operation Telic in Iraq.

There are currently around 2,800 Army vehicles and other pieces of equipment ranging from challenger tanks and helicopters through to fuel tankers and forklift handling equipment, generators and Land Rovers. The RAF has a mixture of Combat, Air Transport, Refuelling and Maritime Surveillance aircraft involved in operations in the Gulf and the Royal Navy has some warships and support vessels.

Mr. Rosindell: To ask the Secretary of State for Defence what percentage of the UK's defence budget has been devoted specifically to the armed forces in Iraq over the past 15 months. [184270]

Mr. Ingram: The Ministry of Defence, in common with other Government Departments, publishes expenditure data on an annual basis in its Resource Accounts following audit by the National Audit Office. Details of costs of operations in Iraq for the Financial Year 2003-04 will be published in the MOD's Annual Report and Accounts following audit in September. Total costs are expected to be within the £1,539 million voted by Parliament which represents 3.6 per cent. of the total resource and capital expenditure limits voted to my Department in the Spring Supplementary Estimates.

Audited figures for the cost of operations in Iraq in this financial year will be published in the MOD's Resource Accounts in 2005. It is too early to provide any estimate for the total costs that will be incurred this year, but we will ask the House to vote the necessary funds in Supplementary Estimates in due course.

Mr. Hancock: To ask the Secretary of State for Defence if he will list the incidents that have led to compensation being paid to Iraqi people in the sector occupied by British forces for *(a)* death, *(b)* injury and *(c)* destruction of property. [169408]

Mr. Ingram: As at 16 July, the following incidents have led to compensation being paid to Iraqi people in the sector occupied by British Forces.

		Number
Death	Road traffic accidents	6
	Gunshot wounds	3
	Bomb attack on British Army vehicle	1
	Death in detention	1
Injury	Road traffic accidents	14
	Gunshot wounds	3
	Sustained during arrest	11
	Resulting from property searches	2
Property damage	—	24
Vehicle damage	Road traffic accidents	57

Mr. Kilfoyle: To ask the Secretary of State for Defence which private companies' services have been employed by his Department in Iraq; and how much has been paid to each. [175095]

Mr. Ingram: We employ contractors to undertake a wide variety of tasks such as support of equipment, construction and removal of camps, catering and translation. They are contracted by a number of separate military commands including in theatre.

A record of which private companies' services have been employed is not held centrally and could only be established at disproportionate cost; details of the respective contracts are commercial in confidence.

Recruitment (Regimental Attainment)

17. **Bob Russell:** To ask the Secretary of State for Defence what account he takes of the recruitment attainment by regiments when considering the future configuration of the Army. [184485]

Mr. Ingram: We continually monitor the ability of Regiments to recruit and retain personnel, their success in doing so would be one element taken into account in decisions on the future structure of the Army.

Scottish Regiments

18. **Mr. David Stewart:** To ask the Secretary of State for Defence what plans he has to reorganise the structure and recruitment areas of the Scottish regiments. [184486]

Mr. Ingram: The armed forces are constantly evolving to reflect the strategic security environment in which they operate. The Defence White Paper published last December established the policy context for shaping the future structure of our armed forces. For the Army, it outlined the vision of a more balanced force that is flexible, rapidly deployable and sustainable for the variety of operational tasks that we envisage it undertaking.

Against this policy guideline, we have been working through the detailed implications for the Army's force structure. We anticipate being in a position to make announcements about the conclusions of this work shortly.

Service Personnel (Occupational Stress)

19. **Mr. Kidney:** To ask the Secretary of State for Defence what steps his Department takes to assist service personnel in coping with the stresses of serving in war zones. [184487]

Mr. Caplin: Preparation for dealing with potentially stressful operational situations forms part of normal training for all Service personnel All Service personnel are given pre and post deployment briefings on dealing with the possibility of post traumatic stress, including guidance on who to consult if they experience problems. Trained mental health staff are also deployed to provide advice to personnel in theatre, supported by both Defence Medical Services and our Welfare Services all of whom play such an extremely important part in supporting our forces both regular and reserve.

Departmental Agencies (Relocation)

22. **Mr. Jim Cousins:** To ask the Secretary of State for Defence what proposals he has for moving the headquarters of one of his Department's agencies to the north-east of England. [184491]

Mr. Caplin: The Ministry of Defence has no plans to relocate any Defence Agency Headquarters to the North East. However, we are conducting an examination of the Defence estate as part of our estate rationalisation strategy.

Afghanistan

Mr. Sarwar: To ask the Secretary of State for Defence what action the Department is taking to improve the security situation in Afghanistan. [184479]

Mr. Hoon: The UK is making a major contribution to improving the security situation in Afghanistan. The transfer of control of our Provincial Reconstruction Teams in Mazar-e Sharif and Meymanek together with associated support forces, was a major step in implementing the first stage of ISAF's expansion across Afghanistan; a process we see as playing a vital role in helping the Afghans create a secure and stable country. Together with our forces in Kabul, we now contribute around 580 personnel to the ISAF, and are also engaged in providing wider support to security sector reform in Afghanistan. Looking ahead, and as my right hon. Friend the Prime Minister announced to the House on 30 June, we have offered to deploy the Headquarters of the Allied Rapid Reaction Corps to lead ISAF in 2006. This is the clearest possible evidence of our commitment to ISAF and to Afghanistan.

Mr. Tynan: To ask the Secretary of State for Defence if he will make a statement on the UK contribution to the International Security Assistance Force in Afghanistan. [184489]

Mr. Hoon: Of the 580 United Kingdom personnel serving with the International Security Assistance Force in Afghanistan, 340 are deployed to Kabul where they are assisting the Afghan Transitional Authority to maintain security. The remainder are serving in the UK-led multinational Provincial Reconstruction Teams in Mazar-e Sharif and Meymaneh, and the associated Forward Support Base, in Northern Afghanistan.

RAF Bases (US Personnel)

Norman Baker: To ask the Secretary of State for Defence, at what percentage of RAF bases RAF personnel are outnumbered by US personnel. [184492]

Mr. Ingram: There are 10 RAF bases where RAF personnel are outnumbered by the United States personnel, which is approximately 17 per cent. of the principal RAF bases in the United Kingdom.

Aircraft Carriers Programme

Mr. Hepburn: To ask the Secretary of State for Defence if he will make a statement on the future of the aircraft carriers programme. [184481]

Mr. Hoon: I refer my hon. Friend to the Written Statement made to the House earlier today.

Cadet Forces

Mr. Keith Simpson: To ask the Secretary of State for Defence if he will make a statement on the training objectives of each of the cadet forces. [184156]

Mr. Caplin *[holding answer 15 July 2004]:* The training objectives of each of the cadet forces are broadly similar, differing only to reflect the traditions and ethos of the parent Service. They support the key themes of the Government youth policies by providing training aimed at capacity building, maximising personal potential and social inclusion. Training is undertaken by cadets under two broad headings: military training and adventurous training in the approximate proportions of 60 per cent. and 40 per cent. respectively. The military training functions are as follows:

a. To provide the opportunity for young people to exercise responsibility and leadership, and to learn from the Services how they can be best developed.

b. To impart a basic knowledge and understanding of the role of the armed forces.

c. To encourage those who have an interest in the Services to be aware of the career opportunities the armed forces have to offer.

The adventurous training includes activities that are arduous and include an element of risk to test the courage and endurance of cadets and develop their qualities of character.

The military training syllabi contain such topics as turnout and drill, skill at arms, shooting, map and compass, fieldcraft, and first aid. Rock climbing, mountain walking, canoeing, caving, offshore sailing, sub aqua diving and parachuting are just some of the approved adventurous training activities undertaken by cadets with the view to making them better citizens.

Arms Trafficking

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will make a statement on his letter of 16 June to the US Defense Secretary; and what implications this has for future Government policy. [182390]

Mr. Hoon: We are working with the United States Administration to secure the necessary legislative approval to give effect to an exemption for the United Kingdom from the International Traffic in Arms Regulations as soon as possible. We remain in close contact with the Administration on this and look forward to its successful conclusion.

Hawk Aircraft

Mr. Gerald Howarth: To ask the Secretary of State for Defence how long he expects the current fleet of Red Arrows Hawk aircraft to remain in service; and what plans he has for their replacement. [180498]

Mr. Ingram: It is expected that the current fleet of Hawk Red Arrows will continue flying into the next decade. The management of the Red Arrows fleet beyond that time frame is a matter for periodic review.

EU Military Planning/Structures

Mr. Soames: To ask the Secretary of State for Defence what the Government's commitment to the EU military planning cell is in terms of *(a)* civilian and uniformed personnel and *(b)* funding. [184903]

Mr. Hoon: Both the European Union cell at SHAPE and the new civil-military cell in the EU Military Staff will be funded out of the Council Secretariat budget. No decisions on the size or manning of these have yet been taken.

Mr. Soames: To ask the Secretary of State for Defence when he expects the EU planning cell to stand up; and what its role will be. [184904]

Mr. Hoon: The European Union is setting up a cell at SHAPE to improve the strategic partnership between the EU and NATO and, in particular, the planning of "Berlin Plus" operations where the EU uses NATO's planning capability.

It is also establishing a civil-military cell within the EU Military Staff, which will improve coherence between the EU's civilian and military responses, develop expertise in managing the civilian-military interface, and undertake advance strategic planning for joint civil-military operations. This will also have the capacity to generate an ad hoc Operations Centre for an operation, in particular where a joint civil-military response is required, where no national headquarters is identified, and if agreed unanimously by EU member states.

The June European Council agreed that these cells should be established by the end of 2004, with the ability to set up an Operations Centre available by 1 January 2006.

Mr. Soames: To ask the Secretary of State for Defence if he will list the military agreements *(a)* in force and *(b)* in negotiation between EU members in respect of military structures outside NATO. [184905]

Mr. Hoon: The following table sets out the main multilateral military structures outside NATO which include European Union members. A number of these also include non-EU countries. In addition, there are many other bilateral military agreements between individual EU member states.

The United Kingdom is a party to military agreements in respect of four of these structures, as listed in the following table. Military agreements between other EU members are a matter for those member states' governments.

Structure	EU participants
EAG—European Air Group	Belgium, France, Germany, Italy, Spain, UK
European Airlift Centre	Belgium, France, Germany, Italy, Netherlands, Spain, UK
Sealift Co-ordination Centre (Eindhoven)	Netherlands, UK
European Amphibious Initiative (including the UK/Netherlands Amphibious Force)	France, Italy, Netherlands, Spain, UK
SHIRBRIG—Stand-by High Readiness Brigade	Austria, Denmark, Finland, Ireland, Italy, Lithuania, Netherlands, Norway, Poland, Portugal, Slovenia, Spain, Sweden. (Observers: Czech Republic, Hungary)
SEEBRIG—South-Eastern Europe Brigade	Greece, Italy, Slovenia
NORDCAPS—Nordic Co-ordinated Arrangement for Military Peace Support	Finland, Sweden, Denmark
EUROCORPS	Germany, Belgium, Spain, France, Luxembourg
EUROFOR	France, Italy, Portugal, Spain
EUROMARFOR	France, Italy, Portugal, Spain

Lance-Corporal William Graham

Mr. McNamara: To ask the Secretary of State for Defence pursuant to his answer of 14 June 2004, *Official Report*, column 644W, on Lance Corporal William Graham, what exceptional reasons were laid before the Director of Manning to make desirable the retention of Lance Corporal William Graham in the Army. [182733]

Mr. Ingram: I am withholding the details in accordance with Exemption 12 (Privacy of an individual) of the Code of Practice on Access to Government Information.

Management Groups

Mr. Keith Simpson: To ask the Secretary of State for Defence if he will list the responsibilities of the *(a)* Command Field Army, *(b)* Command Regional Forces, *(c)* Defence Supply Chain HQ, *(d)* Primary Health Care, *(e)* QVS, *(f)* DYRMS, *(g)* Defence Academy, *(h)* Defence Medical Services Department and *(i)* Defence Medical Education and Training Agency management groups. [181748]

Mr. Caplin: The responsibilities of the management groupings requested are listed as follows:

(a) Exercising operational command of the field Army and training designated forces for war and other operations in order to provide military capability in the right place, at the right time in the most cost effective manner.

(b) The Commander Regional Forces maintains, and where possible, enhances the provision of the military capability and infrastructure support required to meet CinC Land's operational requirements.

(c) The Defence Supply Chain provides a range of support functions to enable the British armed forces to carry out operations. These include storing and distributing all the supplies needed by the forces, such as equipment, mail, medical supplies, fuel, clothing, food and ammunition, as well as transporting personnel and freight anywhere in the world.

(d) Primary health care comes under the responsibility of the single services except in Germany (responsibility lies with British Forces Germany Health Care) and on operations (responsibility lies with PJHQ). It covers, general practice, occupational health, public health and environmental medicine as well as rehabilitation services and, to a degree, mental health care. These services are available to all armed forces personnel, and entitled civilians ie dependants of service personnel on overseas postings and UK civilians overseas. The standard of healthcare is at least equal to primary health care available on the NHS.

(e) The role of the Queen Victoria School is to provide, in accordance with the provision of the Royal Warrant and within a stable boarding environment, education in keeping with the curriculum and standards of the Scottish education system so as to enable pupils admitted to the school to proceed to university or other higher or further education institutions, or to enter directly into the armed services, professions, commerce or industry.

(f) The Duke of York's Royal Military School's role is to provide, in accordance with the provisions of the Royal Warrant, secondary education within a stable environment for those admitted to the school so as to enable them to proceed to university or other higher education institutions, or to enter directly into the armed services, professions, commerce or industry.

(g) The Defence Academy is a national and international centre of excellence, providing military and civilian personnel with high quality training and education, primarily at the postgraduate level, and conducts research in fields related to defence. The teaching and research it provides are at all times coherent and responsive both to Defence customer needs and to developing national and international circumstances.

(h) DMSD is responsible for the delivering the required Deployable Medical Operational Capability and a health and healthcare system that maximises the number of service personnel 'fit for task'. The Defence Medical Services provide the armed forces with a comprehensive medical service in peace, war and operations other than war to standards at least equal to the national health service (NHS).

(i) DMETA delivers medical training to specified standards for personnel of the Defence Medical Services to meet the operational requirement. The agency also makes trained personnel available to front line commanders for training, operations and deployment.

Further information on individual defence agencies is available in the Library of the House.

Means-tested Benefits

Mr. Viggers: To ask the Secretary of State for Defence if he will list the means-tested benefits available through his Department and the agencies for which it is responsible *(a)* in May 1997 and *(b)* now. [182568]

Mr. Caplin: Under the rules of the War Pension Scheme, the Veterans Agency takes into account claimants' means when assessing the level of certain benefits and allowances paid to those affected by death or injury as a result of service in the armed forces. Specifically:

In 1997, the War Widowers pension was means tested, but this is no longer the case.

In 1997, and now, a claimant's income is one of the factors taken into consideration when determining entitlement to the following additional allowances: additional allowance for unemployability supplement, allowance for lower standard of occupation and rent allowance.

Medical Services

Mr. Swayne: To ask the Secretary of State for Defence whether the Department provides a single seamless health service to British servicemen and women and their families serving in Germany; and if he will make a statement. [183258]

Mr. Caplin: The British Forces Germany (BFG) health service is responsible for the provision of health care for the Army, and the few remaining RAF personnel in Germany. It aims to provide a seamless service to its patients, which include civilian staff and families, and standards of service at least comparable to those of the national health service.

The BFG health service brings together military personnel, Guy's and St. Thomas' National Health Trust and the Soldiers', Sailors' and Airmen's Families Association (SSAFA) into a co-operative military/civilian and public/private working partnership backed by open-book financial arrangements and close collaboration at every management level.

Primary care is provided by medical centres located in each of the Garrisons and run by military and civilian medical staff employed by the Defence Medical Service supported by SSAFA.

Hospital-based care is provided, through Guy's and St. Thomas' as prime contractor, at five German hospitals selected to serve the areas where British forces are based in Germany.

In the German hospitals, Guy's and St. Thomas' liaison staff provide on-site support to patients. British style menus are available as well as English language television and newspapers.

Services are continually monitored to ensure that standards are maintained and as part of this process regular patient satisfaction surveys are conducted.

Mr. Swayne: To ask the Secretary of State for Defence (1) what duty he has to provide medical services to Service personnel; and if he will make a statement; [183259]

(2) whether he has a duty to provide medical services for Servicemen and women and their families equivalent to the duty of the Secretary of State under the Health Act 1977; and if he will make a statement. [183257]

Mr. Caplin: The main activity of the Ministry of Defence is to deliver security for the people of the United Kingdom and the Overseas Territories by defending their security, including against terrorism, and so to act as a force for good by strengthening international peace and stability. In doing so, it has a responsibility as an employer, to take care of all its personnel. However, this responsibility is not equivalent to that of the Secretary of State for Health who, under the Health Act 1977 has a duty to:

"continue the promotion in England and Wales of a comprehensive health service."

As part of its responsibility to take care of all its personnel the Ministry of Defence, through the Defence Medical Services, provides comprehensive medical services, to standards at least equal to the NHS, to Servicemen and women in peace, war and operations other than war in order to maintain military capability. In the main, primary care is delivered by the single Services. Secondary care for Service personnel is usually provided through routine treatment within the NHS unless there are operational reasons to do otherwise. In the UK, medical services for families of Servicemen and women are usually provided within the NHS. Overseas, the Ministry of Defence is committed to providing medical services for families accompanying Service personnel which are comparable to those provided by the NHS.

Orange Parades

Mr. McNamara: To ask the Secretary of State for Defence what the cost was of providing assistance to the Police Service of Northern Ireland in policing the 1 July parade organised by Ballymacarrett District Loyal Orange Lodge No. 6. [182853]

Mr. Ingram: There were no additional Army manpower costs in providing public order support to the Police Service of Northern Ireland in connection with the 1 July parade organised by the Ballymacarrett Loyal Orange Lodge District No. 6 in East Belfast. It is not possible to provide the additional equipment usage and fuel costs except at disproportionate cost.

Trident Replacement

Jeremy Corbyn: To ask the Secretary of State for Defence, what progress has been made in assessing options for the replacement of the Trident missile system. [184480]

Mr. Hoon: Work on a range of options for maintaining a nuclear deterrent capability is in hand in accordance with the policy set out in last December's Defence White Paper. As that White paper made clear, decisions on whether to replace Trident are not needed this Parliament but are likely to be required in the next one.

PRIME MINISTER

Arms Trafficking

Mr. Cousins: To ask the Prime Minister on how many occasions he has raised British exemption from the US International Traffic in Arms Regulation with the US Administration; and when he expects the exemption to be granted. [185171]

The Prime Minister: We are working closely with the US Administration to secure the necessary legislative approval to give effect to an exemption for the United Kingdom from the International Traffic in Arms Regulations as soon as possible.

Butler Report

Llew Smith: To ask the Prime Minister which Ministers were provided with an advance copy of the Butler Committee Report. [184825]

The Prime Minister: The Butler Review provided the Government with the final version of its report on 13 July.

Llew Smith: To ask the Prime Minister if he will establish an inquiry into the leaks to the media of parts of the report of the Butler Committee on the review of intelligence on weapons of mass destruction prior to its publication. [185188]

The Prime Minister: The Government have no plans to establish an inquiry.

Correspondence

Hugh Robertson: To ask the Prime Minister when he will answer the letter to him of 30 June from the hon. Member for Faversham and Mid-Kent about the Iraq Oil for Food programme. [185160]

The Prime Minister: My Office received the letter on 5 July. I shall reply to the hon. Member shortly.

G8 Presidency (Priorities)

Bob Spink: To ask the Prime Minister what the Government's priorities were when the UK last held the G8 presidency; and what priorities will be set for the next presidency. [184222]

The Prime Minister: The priorities of the G7 summit held in Birmingham in 1998 were increasing employment, the environment and crime, particularly drugs and money laundering. We also sought to take steps forward on debt relief, which led to the Highly Indebted Poor Countries (HIPC) initiative.

The main priorities for the UK presidency of the G8 in 2005 will be Africa and climate change. The work of the Commission for Africa and taking forward the Kyoto Protocol will be major parts of our agenda.

We will also take forward issues from this year's G8 meeting in the United States including reform in the Middle East, counter-terrorism, non-proliferation and trade.

Iraq

Clare Short: To ask the Prime Minister pursuant to his statement of 14 July on the Butler report, what information caused him to decide on 15 March 2003 that it was his unequivocal view that Iraq was in further material breach of Resolution 1441; what account he took of Dr. Hans Blix's recent report on increased co-operation from the Iraqi authorities and his request for more time for inspections; and if he will make a statement. [185082]

The Prime Minister: Iraq was in further material breach under Operative Paragraph 4 of UNSCR 1441 because of

> "false statements or omissions in the declarations submitted by Iraq pursuant to this resolution and failure by Iraq to comply with, and cooperate fully in the implementation of this resolution."

As Lord Butler said in his report

> "We have been told that, in coming to this view, the Prime Minister took account both of the overall intelligence picture and of information from a wide range of other sources, including especially UNMOVIC information." (paragraph 385, HC 898)

Llew Smith: To ask the Prime Minister whether following publication of the Butler Committee report he is able to reveal whether GCHQ provided any information on alleged attempts by Iraq to obtain uranium from Niger. [185567]

The Prime Minister: As Lord Butler made clear in his report

> "The British Government had intelligence from several different sources indicating that this visit was for the purpose of acquiring uranium" (paragraph 503 *(b)* HC 898).

Ministerial Committee on Public Health

Dr. Murrison: To ask the Prime Minister when the Ministerial Committee on Public Health (MISC27) was established. [184567]

The Prime Minister: I announced the establishment of the Ministerial Committee on Public Health (MISC27) to Parliament on Thursday 27 May 2004.

Radioactive Waste (Italy)

Llew Smith: To ask the Prime Minister whether he discussed with President Berlusconi, during his meeting on 13 July, the future timetable for the return of radioactive waste to Italy arising from the contracted reprocessing of Italian spent nuclear fuel at Sellafield. [184826]

The Prime Minister: My discussions with Prime Minister Berlusconi focused on international and European issues. As with previous administrations, it is not the practice of this Government to make public all the details of discussions with foreign Governments.

Terrorism

Llew Smith: To ask the Prime Minister what plans he has to publish further Joint Intelligence Committee assessments to assist public understanding of the threats from terrorism and proliferation, to which he made special reference in his statement to the House on 14 July. [185187]

The Prime Minister: The Government have no current plans to publish Joint Intelligence Committee assessments. However, as the Butler report recognises in paragraph 342 (HC 898), there are likely to be demands in the future on Government to put intelligence into the public domain. The Government fully accepts the conclusions of the Butler report, including those relating to the public use of intelligence.

TREASURY

Annual Income (Taxpayers)

Mr. Cousins: To ask the Chancellor of the Exchequer how many taxpayers have *(a)* total annual income and *(b)* earned annual income in excess of (i) £100,000, (ii) £250,000 and (iii) £1 million. [185166]

Dawn Primarolo: The information is given in the following table:

	Number of taxpayers (thousand)	
Income range	*(a) By range of annual income*	*(b) By range of earned income*
(i) £100,000 or more	329	278
(ii) £250,000 or more	63	51
(iii) £1,000,000 or more	5	4

Note:
The estimates are based on the Survey of Personal Incomes 2001–02.

Art Prizes (Taxation)

Miss Kirkbride: To ask the Chancellor of the Exchequer what estimate he has made of the amount of revenue raised from taxation of prizes awarded for art, in each of the last three years. [184446]

Dawn Primarolo: The Inland Revenue does not have central records of the amount of revenue raised from taxation of prizes awarded for art. These sort of data are not shown separately on tax returns and to ask taxpayers to provide it would be an extra burden. If a prize is received by an individual in the course of a trade, vocation or profession, then the prize will normally be taxable.

Central European Fund

Mr. Rosindell: To ask the Chancellor of the Exchequer how much the United Kingdom contributed to the Central European Fund in *(a)* 1997, *(b)* 1999, *(c)* 2001 and *(d)* 2004; and what the contributions made by other European member states were for those years. [184259]

Ruth Kelly: I am unaware of the Central European Fund. However, Government figures for the UK's gross contribution, abatement, public sector receipts and net contribution to the EC Budget for the years 1999, 2001 together with a forecast for 2004 can be found in Table 3 of the 2004 European Community Finances White Paper (Cm 6134). Details for 1997 can be found in Table 3 of the 2003 European Community Finances White Paper (Cm 5800).

Details, as published by the European Commission, of Member States, including the UK, gross contributions, after taking account of the UK abatement, to the EC Budget for the years 1999 and 2001 can be, found in Tables 2 and 2A of the 2004 European Community Finances White Paper (Cm 6134). Details for 1997 can be found in Tables 2 and 2A of the 2003 European Community Finances White Paper (Cm 5800). The following table provides the latest EC Budget estimates of these contributions for 2004.

	2004 € million
Belgium	3,749
Denmark	2,061
Germany	21,878
Greece	1,738
Spain	8,202
France	16,801
Ireland	1,266
Italy	13,674
Luxembourg	218
Netherlands	5,459
Austria	2,216
Portugal	1,440
Finland	1,490
Sweden	2,686
UK	12,857
Czech Republic	545
Estonia	57
Cyprus	89
Latvia	67
Lithuania	126
Hungary	560
Malta	35
Poland	1,345
Slovenia	191
Slovakia	240

Source:
Amending Budget No. 5/2004.

The figures shown for the 10 new member states represent contributions for two thirds of the year, following enlargement on 1 May 2004.

Civil Contingencies

Llew Smith: To ask the Chancellor of the Exchequer what additional resources he plans to make available for emergency planning officers in local authorities to deal with planning for civil contingencies arising from terrorist attacks *(a)* on nuclear installations and *(b)* using dirty radiological bombs. [184391]

Mr. Boateng: As my right hon. Friend the Chancellor of the Exchequer announced in his statement of 12 July, the Government will double the contribution previously allocated to the Civil Defence Grant from £20 million to £40 million from 2005–06. This will further enhance the capacity of local authorities to carry out emergency planning in response to a wide range of civil contingencies. The funding will be provided through an increase to Formula Spending Share for local authorities through the EPCS (Environmental, Protective and Cultural Services) block.

Civil Service Staff

Mr. Lilley: To ask the Chancellor of the Exchequer if he will estimate the *(a)* gross and *(b)* net reduction in the number of civil service posts and the number of posts which will be outsourced by 2008 in (i) the UK administration and (ii) the devolved Administrations. [184874]

Mr. Boateng *[holding answer 19 July 2004]:* As announced in the Spending Review there will be a gross reduction of 84,150 posts by 2008, and after redeployment to the frontline there will be a net reduction of 70,600 posts.

Any future outsourcing changes will be made by Departments in line with their business need. The devolved Administrations will announce their spending plans for devolved areas in the autumn in the normal way.

Mr. Tony Clarke: To ask the Chancellor of the Exchequer what estimate he has made of reductions in staff numbers due to efficiency savings within the civil service for civil servants working in Northampton. [184841]

Mr. Boateng: There will be an overall gross reduction in posts of 84,150 by 2008 and departments will pursue these reductions in line with business needs.

It is for individual Departments to finalise specific plans.

Tourism (Clacton-on-Sea)

Mr. Ivan Henderson: To ask the Chancellor of the Exchequer how many people were employed in tourism-related jobs in Clacton-on-Sea on the latest date for which figures are available. [184993]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Ivan Henderson, dated 19 July 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question about tourism-related jobs in Clacton-on-Sea. (184993)

The latest available data, from the 2002 Annual Business Inquiry, shows that the total number of employee jobs in tourism related industries in Clacton-on-Sea was 1,400. This total is obtained by combining figures for those working in the following industries as identified by Standard Industrial Classification 2003:

hotels

restaurants

bars

activities of travel agencies

library, archives and museums etc.

sporting activities

other recreational activities.

Departmental Electricity Use

Norman Lamb: To ask the Chancellor of the Exchequer what proportion of electricity used by buildings in *(a)* his Department and *(b)* agencies of the Department came from renewable sources in each year since 1997. [181844]

Ruth Kelly: The following information and tables provide the information required in the form in which the Chancellors Departments and Agencies have been able to compile it without having to incur disproportionate costs. The proportion of electricity used by buildings in the Chancellors' Department and its agencies that came from renewable sources in each year since 1997 is given as follows:

Office for National Statistics

	Percentage
1997–01	0
2001 (To date)	10

Royal Mint

None of the electricity used by Royal Mint came from renewable sources.

HM Customs and Excise Inland Revenue and the Valuation Office Agency

Information prior to 2001–02 could be obtained only at disproportionate cost.

	Percentage
2001–02	13
2002–03	10
2003–04	10

Debt Management Office and National Savings and Investments

Information on the sustainability of electricity is not held by DMO and NS&I for any years.

Government Actuary's Department

Data is not available prior to July 2003. Since then none of the electricity used by GAD came from renewable sources.

Office of Government Commerce

None of the electricity used by OGC came from renewable sources. OGC Buying Solutions (set up in 2001) used the following:

	Percentage
2001–02	0
2002–03	100
2003–04	[1]100

[1] 100 per cent. six months 60 per cent. six months: variation due to relocation

HM Treasury

The percentage from renewable sources from July 2003 for HM Treasury to date is 57 per cent. Although some supplies before this date had been from renewable sources, it has not been possible to quantify them.

Departmental Publications (Storage)

Dr. Cable: To ask the Chancellor of the Exchequer how many departmental publications are in storage; and where they are located. [183874]

Ruth Kelly: The majority of requests for publications are met by the Treasury's website, www.hm-treasury.gov.uk.

Approximately 15 copies of each recent Treasury publication are held centrally to fulfil requests from members of the public without internet access, with larger quantities held for documents that are likely to attract considerable interest. Materials to help UK businesses deal with the euro as a foreign currency are held by an outside distributor in Manchester.

Treasury teams also hold some stocks of publications for their own use.

EU Funding

Mr. Foulkes: To ask the Chancellor of the Exchequer if he will list the construction projects in each region of the UK which have received whole or partial funding from the EU in each of the last five years, broken down by local authority area; and what the value of the EU funding was *(a)* per project and *(b)* as a percentage of the total cost. [184520]

Mr. Boateng: Information on UK receipts from the EC budget can be found in Table 3.3 of the 2004 European Community Finances White Paper (Cmd 6134). Detailed information on individual projects is not held centrally, and the question could only be answered at disproportionate cost.

Mr. Foulkes: To ask the Chancellor of the Exchequer if he will estimate the total value of funding received by each region of the UK from the European Union in each of the last five years, broken down by type of funding; and what the value of matching UK funding is in each case. [184521]

Mr. Boateng: The UK is eligible for EU spending through Structural Funds, which is managed by DTI, the Common Agricultural Policy, which is managed by DEFRA, and internal policies, which are managed by DTI, DfES, DWP, DCMS, the Department of Health, the Department for Transport, and the Home Office. Information on UK receipts from the EC budget can be found in Table 3.3 of the 2004 European Community Finances White Paper (Cmd 6134).

Detailed information on individual projects is not held centrally, and so the actual funding received in each year by region, broken down by type of funding, and the value of matching UK funding, could be obtained only at disproportionate cost.

Euro (Pension Liabilities)

Mr. Webb: To ask the Chancellor of the Exchequer what assessment he has made of the implications of British membership of the Euro for the UK's liability to share in the unfunded pension liabilities of other Eurozone countries; and if he will make a statement. [185068]

Ruth Kelly: Article 103 of the EC Treaty explicitly rules out adoption of liabilities of one member state by others or by the EU as a whole. EMU membership would not change this.

KF Concept

Mr. David Stewart: To ask the Chancellor of the Exchequer what discussions he has had with the Financial Services Authority on its investigations into the KF concept. [183216]

Ruth Kelly: I understand that there have been no discussions between the Treasury and the Financial Services Authority concerning its investigations into the KF Concept and the activities of Mr. Kevin Foster and his associates. The FSA has issued public statements on its website www.fsa.gov.uk about the progress of its investigation and it would be inappropriate to comment further. Anyone with relevant information about or who has suffered detriment because of the KF Concept should contact the FSA.

MRSA (Frimley Park Hospital)

Andrew Mackinlay: To ask the Chancellor of the Exchequer how many people have died in the past three years at Frimley Park Hospital where the cause of death has been wholly or partly attributable to MRSA; and if he will make a statement. [184668]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Andrew Mackinlay, dated 19 July 2004:

As National Statistician, I have been asked to reply to your recent question asking how many people have died at Frimley Park Hospital where the cause of death has been wholly or partly attributable to MRSA. (184668)

The total number of deaths in Frimley Park Hospital where the cause of death was wholly or partly attributable to MRSA[1] in the years 2000 to 2002, the latest year for which figures are available, was seven.

[1] Identified using the methodology described in Griffiths C, Lamagni TL, Crowcroft NS, Duckworth G and Rooney C (2004) Trends in MRSA in England and Wales: analysis of morbidity and mortality data for 1993–2002. Health Statistics Quarterly 21, 15–22.

Non-departmental Public Bodies

Llew Smith: To ask the Chancellor of the Exchequer how many new employees of non-departmental public bodies will be created as a result of the announcements made in the Comprehensive Spending Review. [184383]

Mr. Boateng: All areas of the public service are committed to achieving efficiency gains of 2.5 per cent. per year over the Spending Review period. How these savings are delivered within non-departmental bodies (NDPBs) and the resulting changes to workforce number will be decided by the Department and their respective NDPBs.

Postal Services (Dangerous Goods)

Mr. David Stewart: To ask the Chancellor of the Exchequer if he will make a statement on his assessment of the possible security threats posed by the importation of firearms, drugs and other dangerous goods into the UK by post. [183498]

John Healey: HM Customs and Excise are responsible for the detection of prohibited and restricted goods into the United Kingdom. With other agencies, they keep possible security threats under constant review and align their deployment of resources according to the level of assessed risk.

Public Sector Employees

Mr. Collins: To ask the Chancellor of the Exchequer what roles education employees counted in the Office for National Statistics survey of public sector employees published in May fulfilled, broken down by *(a)* job title and *(b)* salary. [183155]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Tim Collins, dated 19 July 2004:

As National Statistician I have been asked to reply to your Parliamentary Question about public sector employees. (183155)

The estimates of public sector employees in the UK published by the Office for National Statistics (ONS) are based on survey sources that do not capture information on job title or salary, and so the ONS is unable to provide the data requested. The Department for Education and Skills (DfES) publishes information on the school workforce in England, and provisional data for January 2004 were published in a DfES statistical First Release on 29 April 2004. The ONS and DfES data sets are not directly comparable due to differences in geographical coverage,

and the fact that ONS estimates are headcounts while DfES estimates are calculated in terms of full-time equivalents. Additionally, DfES publishes information on teachers' pay, for both England and Wales, in a document "School Workforce in England". Information on teachers' pay is given in tables 32 to 38 in the most recent edition, which relates to 2003. It can be accessed via the DfES website at: http://www.dfes.gov.uk/rsgateway/DB/VOL/v000443/index.shtml.

Information on the school workforces in Scotland, Wales and Northern Ireland is published by the relevant devolved administration.

Public Service Agreements

Mr. Hammond: To ask the Chancellor of the Exchequer how many of the public service agreements negotiated for the current spending review period are on course for all targets contained in them to be met in their original form; how many have seen targets set in them amended since the original agreement; and in the case of how many he does not expect all targets originally set within them to be achieved during the spending review period. [184200]

Mr. Boateng: Departments' performance against the PSA targets agreed in the 2002 Spending Review is reported in Departmental Reports, Autumn Performance Reports and on the PSA performance website. Departments will continue to report their performance against these targets until the targets have reached their outturn dates.

The full details of how PSA targets have evolved between the 2002 and 2004 Spending Reviews will be published on the HM Treasury website on 31 July 2004.

State Pension/Average Weekly Earnings

Mr. Hurst: To ask the Chancellor of the Exchequer how much the *(a)* state pension for a single person and *(b)* average weekly earnings were in each year from 1974 to 2003. [184495]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Alan Hurst, dated 19 July 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how much the *(a)* state pension for a single person and *(b)* the average weekly wage earnings were in each year from 1974 to 2003. (184495)

Average earnings are estimated from the New Earnings Survey (NES) and are provided for full-time employees on adult rates of pay whose pay was unaffected by absence during the pay period, by their place of work. This is the standard definition used for NES tables. The NES does not collect data on the self employed and people who do unpaid work.

The attached table shows the average gross weekly wage and basic pension for a single person from 1974 to 2003.

The NES, carried out in April of each year, is the most comprehensive source of earnings information in Great Britain. It is a one per cent sample of all employees who are members of pay-as-you-earn (PAYE) schemes, but because of its sampling frame, it has difficulty capturing data on people with very low pay. It is therefore likely to under-represent relatively low paid staff earning below the tax threshold.

Average gross weekly earnings, and the basic state pension for a single person, Great Britain, 1974 to 2003

£

	Average gross weekly earnings	Basic state pension
1974	41.7	10.0
1975	54.0	[1]11.6
		[2]13.3
1976	64.2	15.3
1977	70.2	17.5
1978	79.1	19.5
1979	89.6	23.3
1980	110.2	27.2
1981	124.9	29.6
1982	136.5	32.9
1983	147.4	34.1
1984	159.3	35.8
1985	171.0	38.3
1986	184.7	38.7
1987	198.9	39.5
1988	218.4	41.2
1989	239.7	43.6
1990	263.1	46.9
1991	284.7	52.0
1992	304.8	54.2
1993	317.3	56.1
1994	325.7	57.6
1995	337.6	58.9
1996	351.6	61.2
1997	367.6	62.5
1998	385.8	64.7
1999	401.5	66.8
2000	419.7	67.5
2001	444.2	72.5
2002	464.7	75.5
2003	475.8	77.5

Notes:

1. Average gross weekly earnings are for adult full-time employees whose pay for the survey period was unaffected by absence. For the years 1974 to 1982 the estimates shown are for men aged 21 and over, and women aged 18 and over.
2. The basic state pension was increased in the following months
1974—July
1975—[1] April and [2] November
1976—1985 November
1986—July
1987—2003 April.

ONS New Earnings Survey.

STEPS Agreement

Denzil Davies: To ask the Chancellor of the Exchequer pursuant to his answer of 15 June 2004, *Official Report*, column 835W, on the STEPS agreement, in respect of what costs were the payments in excess of the annual charge of £170 million made to Mapeley STEPS Ltd. in each year to April *(a)* 2002, *(b)* 2003 and *(c)* 2004. [184334]

Dawn Primarolo: The £170 million, mentioned within the NAO report, relates to Facility price only and is an estimated annual charge only. The difference in the actual Facility Price payments and the total payments to Mapeley STEPS Contractor are for services and pass through costs provided for in the contract such as major works, minor works and utilities.

The data for years to April 2002 and 2003 have been routinely archived and therefore cannot be obtained without disproportionate cost. However, for the year to April 2004 the data are available for the Inland

Revenue. The amounts that account for contract expenditure in addition to the Facility Prices are as follows:

2003–04

	Amount (£000)
Major works	25,378
Utilities	12,728
Minor works and services	12,536
VAT on rent	10,163
New services for existing facilities	2,244
Total	63,049

Denzil Davies: To ask the Chancellor of the Exchequer pursuant to his answer of 15 June, *Official Report*, column 835W, on the STEPS agreement, what his present estimate is of the total payments over the 20 years' contract that will be paid to Mapeley STEPS Ltd. for the Chancellor's departments. [184339]

Dawn Primarolo: In their report on the STEPS deal, the NAO estimated that the Departments would pay Mapeley STEPS Contractor Ltd. some £1,500 million over the 20 years of the contract. This relates to the major contract price element (the facility price) for serviced accommodation. The NAO noted that this cost reflected the Departments anticipated requirements which may vary over time.

Taking this uncertainty into account, the figure contained in the NAOs report remains a reasonable estimate of the likely total Facility Price payments due to Mapeley over 20 years.

In addition to this the contract provides a flexible framework in which we are able to transact with Mapeley to provide a range of services including, utilities, business rates, and major and minor building works. Under the contract the cost of these additional services are charged on to the departments separately and will vary according to demand.

Denzil Davies: To ask the Chancellor of the Exchequer pursuant to his answer of 15 June 2004, *Official Report*, column 835W, on the STEPS agreement, whether the payments made to Mapeley STEPS Ltd. in each year to April *(a)* 2002, *(b)* 2003 and *(c)* 2004 were provided for in the contract which commenced on 2 April 2001. [184340]

Dawn Primarolo: The Departments made payments that were provided for in the contract and due to Mapeley STEPS Contractor Ltd. in each of the years 2002, 2003 and 2004. By its nature any serviced accommodation contract provides a flexible framework for provision of a variety of services. In the case of the STEPS contract the Departments are able to transact with Mapeley to call off services including the provision of Major and Minor change works and the payment of Utilities. These are in addition to the fixed facility payment element due under the contract for serviced accommodation.

Tax Credits

Mr. Goodman: To ask the Chancellor of the Exchequer what his latest estimate is of the cost in this financial year of disregarding maintenance payments for the purposes of calculating working tax credit and child tax credit. [180985]

Dawn Primarolo *[holding answer 28 June 2004]:* Maintenance payments are disregarded from income for the purposes of calculating tax credit awards. The cost of the child and working tax credit is given in tabled C8 and C11 of the Financial Statement and Budget Report 2004 (HC 301).

Tax Credits (Civil Partnerships Bill)

Mr. Chris Smith: To ask the Chancellor of the Exchequer what savings on tax credits he anticipates making once the Civil Partnership Bill is introduced for, and the living together test is extended to, same-sex couples. [184729]

Dawn Primarolo: The Civil Partnerships Bill is expected to have a negligible effect on the cost of tax credits.

Travel Costs

Dr. Cable: To ask the Chancellor of the Exchequer what the travel costs were of civil servants in *(a)* his Department and *(b)* its related agencies in each year since 1997. [183906]

Ruth Kelly: The figures are presented in the following table. All travel is conducted in accordance with the requirements of the Civil Service Ministerial Code.

£000

Departments/Agencies	*1997–98*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*
HM Treasury[1]	1,069	1,455	1,619	1,718	1,340	1,839	1,944
Debt Management Office[1, 2]	—	9	26	9	17	25	36
Office of Government Commerce[3]	—	—	—	1,110	1,106	1,047	1,171
OGCBuying. Solutions[4]	—	—	—	—	413	494	644
Valuation Office Agency[1]	3,700	3,320	3,580	3,530	3,300	3,550	3,750
HM Customs and Excise[5]	3,000	3,000	3,000	3,000	4,005	5,002	6,200
Inland Revenue[1]	14,509	17,506	26,489	28,077	31,941	35,230	37,335
Royal Mint[1]	456	380	455	503	490	466	536
National Savings and Investments	805	755	191	259	295	311	273
Office of National Statistics	1,671	1,784	2,425	2,661	2,550	2,846	3,314
Government Actuary's Department	80	71	95	89	88	97	92

[1] Figures include subsistence, as travel could only be disaggregated at disproportionate cost.
[2] The DMO did not exist as a separate body prior to 1998–99.
[3] OGC have provided figures from their date of inception—2000.
[4] OGCBuying.Solutions have provided figures from their date of inception—2001.
[5] Figures between 1997–2000 show approximate spend on Rail, Air and Ferry prior to external Contract. Other figures reflect spend on Contract, as off-Contract spend or business mileage could be disaggregated only at disproportionate cost.

Unemployment Rates (Havering)

Mr. Rosindell: To ask the Chancellor of the Exchequer how many people were unemployed in Havering in *(a)* 1997, *(b)* 1999, *(c)* 2001 and *(d)* 2003. [184253]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mr. Andrew Rosindell, dated 19 July 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question about unemployment in Havering. I am replying in his absence. (184253)

The Office for National Statistics (ONS) compiles statistics of unemployment from the Labour Force Survey (LFS) following International Labour Organisation definitions.

The attached Table 1 gives the LFS estimates of the number of people unemployed in the Havering Local Authority area in the twelve months ending in February of the years 1997, 1999,2001 and 2003.

As with any statistical sample survey, estimates from the LFS are subject to sampling variability.

ONS also compiles statistics of those claiming Jobseeker's Allowance (JSA) for local areas. The attached Table 2 gives the annual average number of JSA claimants who are resident in the Havering Local Authority area for the years 1997, 1999, 2001 and 2003.

Table 1: Number of unemployed people, Havering local authority, years as shown

Year[1]	*Thousand*
1997	7
1999[2]	5
2001	2
2003	3

[1] 12-month period ending in February of the year shown.
[2] Figures not yet adjusted to take account of 2001 Census data.
Sources:
1. ONS Labour Force Survey.
2. Local Area Datasets.

Table 2: Annual average number of jobseekers' allowance (JSA) claimants, Havering local authority, years as shown

	Number
1997	4,286
1999	3,329
2001	2,315
2003	2,518

Jobcentre Plus Administrative system.

CULTURE, MEDIA AND SPORT

Advertising

Dr. Cable: To ask the Secretary of State for Culture, Media and Sport how much money was spent on advertising and promotional literature for her Department's initiatives, broken down by year since 1997. [183806]

Mr. Caborn: The Department has not spent any money on promotional advertising in this period. The spend on departmental publications and events since 1997 broken down by year is as follows:

	Amount (£)
1997–98	252,766
1998–99	345,800
1999–2000	522,399
2000–01	532,609
2001–02	324,768
2002–03	392,963
2003–04	[1]537,743

[1] Provisional pending final annual accounts

Ancient Monument Damage

Mr. Flook: To ask the Secretary of State for Culture, Media and Sport what estimate the Department has made of the number of scheduled ancient monuments that have been damaged by *(a)* illicit metal-detecting and *(b)* looting in each of the last five years. [184647]

Estelle Morris: The DCMS does not keep statistics of this nature centrally. However, English Heritage is in the process of designing a system that will compile and record this type of information.

Archaeological Thefts

Mr. Flook: To ask the Secretary of State for Culture, Media and Sport how many prosecutions there have been for theft of artefacts from archaeological sites in each of the last five years. [184646]

Estelle Morris: This information is not currently available. English Heritage, however, is in the process of designing a data system that will compile and record these statistics centrally.

Departmental Administration Costs

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport what the cost was of printing her Department's headed notepaper in *(a)* 1997–98 and *(b)* the last year for which figures are available. [184373]

Mr. Caborn: A record of expenditure at this level of detail within the overall stationery budget for 1997–98 is no longer available. The expenditure on headed notepaper in 2003–04, the last full year for which information is available, was £3,500.

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for Culture, Media and Sport how many copies of her Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183877]

Mr. Caborn: The costs relating to DCMS annual reports since 1997 are set out in the table. Sales revenues are a matter for TSO and do not fall to the Department.

£

	1997	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*
Design, typesetting and pdfs etc.	n/a	38,664	46,142	40,212	45,144	56,105	45,524	40,813
Print (buy back copies from TSO)	n/a	16,800	25,000	18,310	24,648	24,774	[1]18,140	[1]16,187

£

	1997	1998	1999	2000	2001	2002	2003	2004
Number of copies sold	n/a	687	592	531	576	483	700	500
Number of copies printed	n/a	1,600	1,600	2,000	2,000	2,000	1,500	1,500
Total	—	55,464	71,142	59,170	70,325	[2]81,449	63,744	57,000

[1] DCMS was responsible for the print for the 2003 and 2004 annual reports as this was found to be a more cost effective option than using TSO.
[2] The costs for the 2002 annual report included the development of a new design template which the Department has followed for three years.

Departmental Publications (Storage)

Dr. Cable: To ask the Secretary of State for Culture, Media and Sport how many departmental publications are in storage; and where they are located. [183865]

Mr. Caborn: DCMS does not hold any publications in storage. Departmental policy is to print sufficient copies for the identified audience for each publication in order to be as cost effective as possible. Wherever possible we also refer people to the DCMS website where all publications are available free.

The retention and storage of any DCMS publications produced by TSO are a matter for the publisher.

Employment Tribunals

Malcolm Bruce: To ask the Secretary of State for Culture, Media and Sport how many cases against her Department, the agencies for which it is responsible and its predecessor organisations have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent (A) settling and (B) contesting claims. [181470]

Mr. Caborn: The Department for Culture, Media and Sport and the Royal Parks Agency have had a total of eight claims issued against them since 1997. Three of these claims were withdrawn before the case was heard by an employment tribunal. There were no costs awarded against (i) respondents or (ii) applicants. Details of the nature of each claim are set out in the table. The total legal costs incurred by the Department and agency of contesting the claims were £166,714.13. Claims brought by one applicant were settled, but the amount of the settlement has been withheld under Exemption 4 of the Code of Practice on Access to Government Information.

	Nature of claim
1997	Unfair dismissal
1997	Race discrimination
2000	Sex discrimination
2000	Race discrimination
2001	Victimisation (contrary to the Race Relations Act)
2001	Sex discrimination/victimisation
2002	Sex discrimination
2002	Victimisation (contrary to the Sex Discrimination Act)

Government Art Collection

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport if she will publish the latest valuation of the Government's art collection. [184375]

Estelle Morris: It is not possible to give an accurate estimate of the value of the Government art collection, which has no current market valuation. The current monetary value of a work of art can be accurately assessed only at the time of purchase or sale or by professional valuation. In the former case, the collection is not actively traded; in the latter, it would not be justifiable expenditure of public funds to have the whole collection valued professionally.

Healthy Eating in Schools

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport if she will list Lottery-funded projects which promote healthy eating in schools. [184447]

Estelle Morris: National Lottery funding has been made available through The School Fruit Pilot Programme to support the promotion of healthy eating in schools. This £42 million New Opportunities Fund programme has been rolled out to five regions. The aim of the programme is to help improve the diet of children and to reduce their risk of heart disease and cancer later in life.

Heritage Bodies

Ann Keen: To ask the Secretary of State for Culture, Media and Sport what discussions her Department has had with heritage organisations on their educational programmes and initiatives. [183435]

Estelle Morris: DCMS has been working on a range of different projects with various Heritage organisations in order to embed core policies at the heart of their activity to increase access and engagement, especially to children and young people, and to those who feel excluded from enjoying the historic environment.

English Heritage's (EH's) educational programmes and initiatives are included within its Funding Agreement with DCMS, which includes agreement to:

- implement a new Education, Events and Outreach Strategy
- increase the number of educational visits to EH sites from 478.5k to 508k per annum
- increase the resources available to schools and to independent learners
- assess the extent of informal learning currently achieved and inform future activity
- initiate with others the national coordination of traditional building skills training

EH has set up a new outreach team to engage audiences who have traditionally felt excluded from visiting the historic environment. This will include working with the Civic Trust to develop Heritage Open Days.

In August 2003 DCMS/DfES set up a Joint Advisory Committee on Built Environment Education (JACBEE) to improve the profile and use of the built environment as a learning resource for all. JACBEE will be making its recommendations to Ministers later this summer.

The Department has also supported the Attingham Trust's project to assess the provision of learning opportunities in the historic environment sector. The report titled Opening Doors: Learning in the Historic Environment was published in June and surveys education and interpretation in historic buildings and sites today in the UK and the Republic of Ireland.

In partnership with DfES we have also been developing a new Museums and Galleries Strategy to unlock the full potential of museums and galleries to support education and learning. This process has involved discussion and consultation with the museums and galleries sector on the content and priorities for the strategy. The strategy is due to be published later this year.

On 25 March 2004 we hosted a World Heritage Site Education Conference at Kew Gardens to provide a forum for site managers and education officers at UK World Heritage Sites to share best practice and experiences. We are currently developing an action plan for an overall World Heritage Site Education programme.

Licence Holders Database

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport what plans she has to introduce a national electronic database for individual pub licence holders. [184735]

Mr. Caborn: The Licensing Act 2003 requires each licensing authority to keep a register containing, among other things, a record of each personal licence, club premises certificate and premises licence issued by it and each temporary event notice received by it. The Act allows the Secretary of State to arrange for these duties conferred on licensing authorities to be discharged by means of one or more central registers. Officials are currently working with local authorities and their representatives to examine ways in which a central register might be developed.

Metal-detecting

Mr. Flook: To ask the Secretary of State for Culture, Media and Sport what estimate her Department has made of the extent of illicit metal-detecting; and if she will make a statement. [185186]

Estelle Morris: The DCMS does not keep statistics like this centrally. However, through the excellent work of both the Portable Antiquities Scheme and the Treasure Valuation Committee, metal detectorists and archaeologists are working more closely together than ever before.

Ministerial Travel

Mr. Beggs: To ask the Secretary of State for Culture, Media and Sport what the total cost of air travel between Northern Ireland and Great Britain was for *(a)* Ministers and *(b)* officials in the Department in the latest year for which figures are available. [184532]

Mr. Caborn: Departmental expenditure on air travel between Northern Ireland and Great Britain for the financial year 2003–04 was *(a)* £683 for Ministers and *(b)* £3,269 for officials.

Museums/Heritage Bodies Review

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what plans she has to undertake a review of heritage and museum organisations reporting to her Department; and if she will make a statement. [183282]

Estelle Morris: We have no current plans to review museum organisations, but we are planning to consult the museum sector later this year on a range of museum policy issues.

On heritage organisations, I refer the hon. Member to the answer given to him on 12 July 2004, *Official Report*, columns 897–98W, by my right hon. Friend the Secretary of State.

National Lottery

Bob Spink: To ask the Secretary of State for Culture, Media and Sport what percentage of total National Lottery income has been distributed to good causes in each year of the Lottery's existence. [184228]

Estelle Morris: The information requested is as follows.

	Total good cause income (£000)	*Total annual good drawdown (£000)*	*Drawdown as a percentage of good cause income*
1994–95	298,580	6,238	2.09
1995–96	1,535,966	165,212	10.76
1996–97	1,587,759	527,387	33.22
1997–98	1,952,219	1,087,067	55.68
1998–99	1,918,906	1,830,548	95.40
1999–2000	1,766,394	1,908,458	108.04
2000–01	1,772,839	1,855,091	104.64
2001–02	1,842,233	1,709,559	92.80
2002–03	1,591,781	1,892,798	118.91
2003–04[1]	1,390,236	1,910,472	137.42
2004–05[1,2]	195,327	309,263	158.33

[1] These figures have not been subject to final audit.
[2] YTD

The figure for total income includes income from the Lottery games and also investment returns on balances held.

Policies (Environmental Impact)

Mr. Horam: To ask the Secretary of State for Culture, Media and Sport how many new policy proposals or significant changes in policy were produced in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185109]

Estelle Morris: The information requested could be provided only at disproportionate cost.

Regional Cultural Consortiums

Mrs. Spelman: To ask the Secretary of State for Culture, Media and Sport what the *(a)* running costs and *(b)* total expenditure of each regional cultural consortium has been in each year since its creation. [184981]

Mr. Caborn: The total annual expenditure from DCMS funds of each regional cultural consortium since their creation is given in the table. These advisory non-departmental public bodies do not at present directly employ any staff and the Department does not currently distinguish between running costs and other expenditure. Most consortium expenditure is allocated on research and projects designed to enhance cultural co-operation and services in the regions. Consortiums may also receive some support from other regional cultural partners.

Regional cultural consortiums annual expenditure, from DCMS funds

£

Regional cultural consortium	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*[2]
Eastern	388	26,358	31,621	110,150	180,641
East Midlands	857	34,366	15,927	108,880	141,267
North East	1,355	41,855	32,415	92,952	197,326
North West	230	21,995	32,890	93,686	207,915
South East	968	20,229	36,929	30,242	204,862
South West	4,823	33,609	22,043	152,725	205,988
West Midlands	1,613	31,089	6,097	120,100	223,217
Yorkshire	829	29,800	17,326	131,450	208,324

[1] The regional cultural consortiums were established in October 1999
[2] latest available figures with some amounts still to accrue

Subtitling

Mr. Jim Cunningham: To ask the Secretary of State for Culture, Media and Sport what plans her Department has to increase the number of television channels which are regulated for subtitling. [184465]

Estelle Morris: None. Section 303 of the Communications Act 2003 establishes a duty on Ofcom to draw up a code relating to the provision for deaf and visually impaired people. Section 303 applies to all digital terrestrial, digital satellite and digital cable channels except the BBC, which is instead brought within the scope of the code by way of the BBC Agreement. Exclusions from the application of the code are a matter for Ofcom, taking into account in particular certain matters specified in the Act designed to balance the costs and difficulty of provision with the extent of the benefit to those with sensory impairments. Ofcom have consulted on their code, including proposed exemptions, and I understand that they propose to announce their conclusions shortly.

Mr. Jim Cunningham: To ask the Secretary of State for Culture, Media and Sport what the yearly interim targets are for subtitling for the coming years that have been set by the Office of Communications. [184466]

Estelle Morris: The matter raised is the responsibility of Ofcom, as independent regulator. Accordingly, DCMS officials have asked the Chief Executive of Ofcom to respond directly to the hon. Member. Copies of the Chief Executive's letter will be placed in the Libraries of both Houses.

Tourism

Mr. Flook: To ask the Secretary of State for Culture, Media and Sport how much revenue she estimates tourism has generated for *(a)* Somerset and *(b)* the South West region in the last five years for which figures are available. [184649]

Mr. Caborn: The information is as follows.

(a) The available figures for tourism expenditure in Somerset are shown in the table. Figures for tourism day trips are only available at regional level.

Tourism expenditure in Somerset by year[1]

£ million

Type of tourism	*1999*	*2000*	*2001*	*2002*	*2003*
Overnight stays by overseas residents	113	125	108	113	87
Overnight stays by domestic residents	[2]n/a	293	416	357	nya
Tourism day trips by domestic residents	n/a	n/a	n/a	n/a	n/a
Total	n/a	n/a	n/a	n/a	n/a

n/a = not available
nya = not yet available
[1] Sample sizes at this level of detail will be small which means that the estimates will be subject to a high margin of error. Particular caution should therefore be exercised when comparing any two of the estimates.
[2] Figures for overnight stays by domestic tourists are taken from the UK Tourism Survey. Comparable figures at regional level prior to 2000 are not available due to a major change in survey methodology.
Sources:
International Passenger Survey
UK Tourism Survey.

(b) The available figures for tourism expenditure in the South West region are shown in the second table.

Tourism expenditure in the South West region by year[1]

£ million

Type of tourism	*1999*	*2000*	*2001*	*2002*	*2003*
Overnight stays by overseas residents	694	734	634	741	663
Overnight stays by domestic residents	[2]n/a	3,122	3,291	3,901	nya
Tourism day trips by domestic residents	n/a	n/a	n/a	2,100	n/a
Total	n/a	n/a	n/a	6,742	n/a

n/a = not available
nya = not yet available
[1] Sample sizes at this level of detail will be small which means that the estimates will be subject to a high margin of error. Particular caution should therefore be exercised when comparing any two of the estimates.
[2] Figures for overnight stays by domestic tourists are taken from the UK Tourism Survey. Comparable figures at regional level prior to 2000 are not available due to a major change in survey methodology.

TRADE AND INDUSTRY

Fireworks Act

Mr. Wood: To ask the Secretary of State for Trade and Industry what progress has been made introducing the provisions contained in the Fireworks Act 2003; and what the time scale is for introduction of the outstanding provisions. [184793]

Mr. Sutcliffe: Following the close of the consultation on 2 July 2004, Regulations were laid before Parliament on 16 July 2004 and introduce, with some minor amendments, the Regulations that were originally proposed in the consultation document.

The Regulations will come into force on 7 August 2004—with the exception of regulation 9 (licensing of suppliers) and regulation 11 (importation of fireworks). These latter two measures will come into force on 1 January 2005 to allow time for enforcement bodies to set up an effective system of administration and enforcement.

Nuclear Power

Llew Smith: To ask the Secretary of State for Trade and Industry if she will make a statement on the reasons for the difficulties encountered by the Office for Civil Nuclear Security in security clearing United States nationals brought over by British Nuclear Fuels; and what steps have been taken to ameliorate the problem. [184404]

Mr. Timms: There is no central agency in the United States to which the Office for Civil Nuclear Security (OCNS) can turn to establish if an individual has security clearance. British Nuclear Fuels are aware that the devolved administrative arrangements in the US can make the verification process difficult and time-consuming.

Public Relations

Dr. Cable: To ask the Secretary of State for Trade and Industry what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183848]

Ms Hewitt: The information required is not held in the format requested and could be answered only at disproportionate cost.

Retread Tyre Industry

Norman Baker: To ask the Secretary of State for Trade and Industry if she will make a statement on recent discussions her Department has had with the retread tyre industry. [184857]

Mr. Timms: Officials regularly meet representatives of the retread tyre industry at which a broad range of issues are discussed, both specific to that industry and in respect of used tyre disposal and recovery more generally.

Earlier this year, a study commissioned and funded by DTI, and taken forward in partnership with the Retread Manufacturers Association, was completed. This examined market barriers for key stakeholders in retread tyre markets, and is intended to provide a tool that retreaders can draw on to help promote their product. I will arrange for a copy to be sent to the hon. Member and for a copy to be placed in the Libraries of the House.

Small Business

Mr. Hepburn: To ask the Secretary of State for Trade and Industry what recent steps her Department has taken to help people start their own business. [184518]

Nigel Griffiths: The Government Action Plan for Small Business published in January 2004 sets out a series of actions government is taking to help people start their own businesses. This builds upon the provision from the Business Link network of high quality information advice and support. The Business Link Network assisted 170,000 people last year (in England) to start businesses. New actions being taken include:

A programme of Enterprise Show activities: The objective is to encourage higher levels of entrepreneurship particularly among under-represented groups and people from disadvantaged areas. These activities taking place across England are being co-ordinated by the Regional Development Agencies.

The establishment of the National Council for Graduate Entrepreneurship. This has been established to raise the profile of entrepreneurship and starting a business as a viable career option for graduates. The objective is to increase the number of graduates who consider starting their own businesses.

Travel Costs

Dr. Cable: To ask the Secretary of State for Trade and Industry what the travel costs were of civil servants in *(a)* her Department and *(b)* its related agencies in each year since 1997. [183898]

Ms Hewitt: The costs of travel and travel related expenditure for civil servants in the Department of Trade and Industry and its Agencies were as follows:

Financial Year	*Core Department (£000s)*	*Agencies (£000s)*
1998–99	10,498	3,588
1999–00	10,201	3,926
2000–01	11,466	3,762
2001–02	10,526	4,305
2002–03	11,815	4,806
2003–04 (provisional)	12,135	4,884

All travel complied with the requirements of the Civil Service Management Code. Data for 1997–98 are archived and so are only available at disproportionate cost.

FOREIGN AND COMMONWEALTH AFFAIRS

Afghanistan

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Afghan Government on stopping violence against women registering to vote in their country's elections; and what military assistance the UK is providing to help prevent violence. [184053]

Mr. Mike O'Brien: It is important to the UK and the rest of the international community to support the Afghan Government's efforts to provide security so both men and women can freely exercise their vote. To date over six million people have registered to vote, out of some nine million who are eligible. Around 38 per cent. of those registered are women. The provision of adequate security to enable women to exercise their political, social and economic rights is an important component of the FCO-DFID Gender Strategy for Afghanistan, a copy of which has been placed in the Library of the House.

The International Security Assistance Force (ISAF) is assisting the voter registration process and will provide enhanced support to the Afghan authorities in providing security during the election period. The UK provides around 320 personnel to ISAF in Kabul. The two UK-led Provincial Reconstruction Teams and associated Forward Support Base in northern Afghanistan transferred to ISAF authority on 1 July 2004. This will bring a further 260 UK troops into ISAF. UK troops serving with ISAF are also involved in training the new Afghan National Army, units of which will be used to provide election security.

Brazil

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans the Government have to host events with the aim of promoting bilateral relations with Brazil. [184180]

Mr. Rammell: In the course of our frequent exchanges with Brazil, we become involved in a range of events, both in the UK and in Brazil, which promote the bilateral relationship. A recent such event was the joint visit to London on 17 and 18 March of the Brazilian Ministers of Foreign Affairs and of Finance. My right hon. Friend the Foreign Secretary and the Chancellor of the Exchequer met their Brazilian counterparts on this occasion for talks, and my right hon. Friend the Secretary of State for Trade and Industry represented the Government at a dinner for the visitors offered by the Brazilian Chamber of Commerce. We fully expect beneficial events such as these to continue regularly and in many different forms.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans there are for senior members of *(a)* the Government and *(b)* the Royal family to visit Brazil in the near future. [184181]

Mr. Rammell: Foreign engagements for my right hon. Friend the Foreign Secretary and other Foreign and Commonwealth Office Ministers are kept under constant review. It is not our practice to announce such visits until they are firm. Because of the unpredictable nature of world events, final decisions on overseas visits are often not possible until very shortly before the day of travel and occasionally not until they are under way.

There are currently no plans for a senior member of the Royal family to visit Brazil.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions the Government have had with the Brazilian Government about ways to preserve the remaining parts of the Amazon rainforest. [184182]

Mr. Rammell: We follow closely the issue of environmental protection in Brazil, and discuss it regularly with the Brazilian Government. I met the Brazilian Environment Minister in December 2002 during my first visit to Brazil. The Foreign and Commonwealth Office also supports a number of practical projects in Brazil totalling over £350,000 aimed specifically at preserving the Amazon rainforest and which enjoy the full support of the Brazilian Government.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what precautions the Government take to reduce illegal imports from Brazil into the UK. [184184]

Mr. Rammell: We work closely with the Brazilian Government to combat all forms of illegal trafficking. As part of this effort, we have two Drug Liaison Officers based permanently in Brazil and have also provided equipment and training for Brazilian law enforcement from the Foreign and Commonwealth Office Drugs and Crime Fund.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what level of military co-operation there is between the UK and Brazil. [184186]

Mr. Ingram: I have been asked to reply.

We engage in a series of armed forces visits, exchanges, joint training and defence staff talks within the framework of the Memorandum of Understanding on Co-operation on Defence Matters, signed by my right hon. Friend the Secretary of State for Defence in September 2000, and the Joint Action Plan, signed in 1997 by my right hon. Friend the Prime Minister and the President of Brazil.

Chagos Islands

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what consultation took place prior to the announcement of the two Orders in Council on 10 June 2004, announced in the written statement of 15 June 2004, *Official Report*, columns 32–4WS, with *(a)* Chagossians resident in the United Kingdom and *(b)* Chagossians resident in Mauritius; and what response he has had from Chagossians following the Orders in Council being made. [184387]

Mr. Rammell: Before the British Indian Ocean Territory (Constitution) Order 2004 and the British Indian Ocean Territory (Immigration) Order 2004 were submitted to Her Majesty the Queen in Council, I and my right hon. Friend the Foreign Secretary gave very careful consideration to all relevant interests and concerns. There was no prior consultation with Chagossians resident in the United Kingdom or Mauritius.

A petition by a number of Chagossians in the United Kingdom, raising various points including their wish to resettle in the Chagos islands, was handed in to the Foreign and Commonwealth Office on 6 July 2004, and a petition by Chagossians resident in Mauritius was handed in to the British High Commission in Port Louis on 13 July 2004.

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what rights Ilois islanders have to visit Diego Garcia to care for the graves of their ancestors; and what financial support is provided to help their passage from Mauritius for such visits. [184382]

Mr. Rammell: Following the restoration of full immigration control over the whole of the British Indian Ocean Territory, the Chagossians would need a permit in order to visit any part of the Territory. We have made clear that we remain prepared, as we always have been, to assist and finance a visit by a party of Chagossians to the outer islands of the Territory to enable them to visit the graves there of their parents and grandparents. We have further made clear that if there is a request that the itinerary of any such visit should also include the graves on Diego Garcia, we are prepared to make representations to the US authorities about that.

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs whether there is a prison or controlled area for holding detainees on Diego Garcia. [184390]

Mr. Rammell: I refer my hon. Friend to the reply my right hon. Friend the Foreign Secretary gave to the right hon. and learned Member for North-East Fife (Sir Menzies Campbell) on 21 June 2004, *Official Report*, column 1221W.

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what requirement has been placed upon the United States military as a result of the leasing agreement for Diego Garcia, to ensure the land and aquatic environment of Diego Garcia and other Chagos islands are not damaged by the military activities of the United States; what arrangements are in place to remove military and commercial wastes from the islands; and what consultation he has had with the United States Administration over the adequacy of emergency plans to clean up pollution. [184394]

Mr. Rammell: There is no leasing agreement in respect of Diego Garcia but, under the relevant treaties concluded with the US Government, the whole of the British Indian Ocean Territory (BIOT) is set aside for the defence purposes of the United Kingdom and the United States of America, and the US Government is entitled to establish and maintain a defence facility on Diego Garcia. The BIOT Government and the US authorities collaborate on all aspects of the conservation and protection of the natural environment of Diego Garcia and, where appropriate, of the outer islands of the Territory. In this context, the US authorities on Diego Garcia have established a Natural Resources Management Plan and they expend considerable resources on environmental conservation. The UK Government attaches considerable importance to the conservation of the natural environment of the Chagos islands and the BIOT Government have ensured that the necessary legislation for this purpose is in place and is enforced, and that relevant international conventions are observed.

Chechnya

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Government's policy is on the situation in Chechnya. [184243]

Mr. Rammell: We continue to be concerned by the situation in Chechnya. The assassination of Chechen President Kadyrov in May, and the 21 June raids into neighbouring Ingushetia underline the fragility of the situation in the Russian North Caucasus.

We recognise the genuine security problems Russia faces in Chechnya and the North Caucasus. We support Russia's territorial integrity. Separatist forces carry out many human rights abuses in Chechnya. We have been clear in our condemnation of the appalling terrorist attacks across Russia, which have killed many innocent victims.

However, these problems can only be resolved through a political rather than military solution. Continuing human rights abuses in Chechnya by federal and local forces can only undermine attempts to advance a genuine political process and reconciliation. Our policy is to regularly raise our concerns over Chechnya with the Russian authorities. My right hon. Friend the Foreign Secretary did so recently with Foreign Minister Lavrov, during his visit to Moscow on

6–7 July. I raised similar concerns during my visit to Russia on 6–7 April. In addition, we raise these concerns multilaterally through the EU, OSCE, Council of Europe and UN. We also give significant funding to international organisations and NGOs that provide humanitarian aid in the region.

The new Chechen presidential elections planned for August will be a fresh opportunity to build up the political process and aid efforts to bring stability to the Republic. We therefore hope the election will be genuinely open and inclusive, a hope we have expressed repeatedly to the Russians.

China

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what action he has taken to improve the UK's relationship with China. [184240]

Mr. Rammell: We currently enjoy good relations with China.

A Task Force was set up in September 2003 under my right hon. Friend the Deputy Prime Minister's leadership to make firm recommendations for action to increase practical co-operation. My right hon. Friend the Prime Minister met Chinese Premier Wen Jiabao in London in May. They issued a joint statement afterwards setting out plans for developing co-operation between the two countries on areas including trade, education, science and technology and the environment. The joint statement also included a commitment to annual summits between the two countries.

The strength of our relationship allows us to raise sensitive issues of concern, such as human rights, with the Chinese authorities.

I plan to visit Beijing later this month.

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government have made to the Chinese Government on the police treatment of Christians in custody. [184319]

Mr. Rammell: We are very concerned about religious freedom in China. We made clear at the last round of the UK-China Human Rights Dialogue in May that the prohibition of some religious/spiritual groups, and the legal restrictions placed upon members of others, are tantamount to a denial of their members' freedom of religious belief.

We also raised our concerns about torture by the Police and prison authorities at the same dialogue round.

My right hon. Friend the Prime Minister raised human rights issues with Chinese Premier Wen Jiabao during his visit to the UK in May and I raised human rights issues with the Vice-Minister of the International Department of the Chinese Communist Party, Zhang Zhijun during his visit to the UK in March. We will continue to raise human rights issues with the Chinese Government at every appropriate opportunity.

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government has made to the Chinese Government on *(a)* the detention of house church leader Xu Shaungfu and *(b)* the recent beating to death by Chinese police of two Christians, Gu Xianggao and Jiang Zongxiu; and if he will make a statement. [184320]

Mr. Rammell: We are aware of reports of the detention of Xu Shaungfu and the deaths in custody of Gu Xianggao and Jiang Zongxiu. We are monitoring the situation and note reports that the Chinese authorities are investigating the death of Jiang Zongxiu.

We are very concerned about religious freedom in China. We made clear at the last round of the UK-China Human Rights Dialogue in May that the prohibition of some religious/spiritual groups, and the legal restrictions placed upon members of others, are tantamount to a denial of their members' freedom of religious belief. We also raised our concerns about torture and the treatment of prisoners at the same dialogue round.

My right hon. Friend the Prime Minister raised human rights issues with Chinese Premier Wen Jiabao during his visit to the UK in May and I raised human rights issues with the Vice-Minister of the International Department of the Chinese Communist Party, Zhang Zhijun during his visit to the UK in March.

Cyprus

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of how the proposed EU package of trade and air links to northern Cyprus will assist in achieving a settlement. [185157]

Mr. MacShane: The EU package of measures for northern Cyprus is designed to put an end to the isolation of the Turkish Cypriot community by facilitating economic growth. We believe that enabling direct trade between northern Cyprus and the rest of the EU is an essential element of that strategy. Furthermore, direct trade will reduce the economic disparity between the north and south of the island and will help to bring the Turkish Cypriots in to line with the EU acquis. Narrowing the economic divide between the north and south will remove a major obstacle to a future settlement to the Cyprus problem.

Direct air links with northern Cyprus are not covered by the Commission proposals. We are actively looking at this issue.

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about his recent discussions with Mr. Talat, leader of the Turkish Cypriots and Mr. Iakovou, Foreign Minister of the Republic of Cyprus. [185158]

Mr. MacShane: My right hon. Friend the Foreign Secretary and I met Mr. Talat on 1 July. We discussed a number of Cyprus related issues and encouraged Mr. Talat to continue to pursue a pro-EU policy. Mr. Talat assured us that he would continue to work for a comprehensive settlement to the Cyprus problem.

I met the Foreign Minister of the Republic of Cyprus at the General Affairs and External Relations Council on 12 July. I briefed him on the recent debates on Cyprus in this House. We also discussed Mr. Talat's recent visit to the UK.

Democratic Republic of the Congo

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the exclusion of the Democratic Republic of the Congo from the Kimberley process. [184225]

Mr. Rammell: The expulsion of the Republic of Congo from the Kimberley Process followed a report by a visiting team drawn from others in the Process on the discrepancy between the Republic of Congo's substantial exports of rough diamonds and its limited production. The report concluded that the Republic of Congo failed to meet agreed minimum common standards and was therefore undermining the credibility of the Kimberley Process. We support the decision to expel and stand ready to consider any request from the Republic of Congo for technical assistance to help it meet the standard required and thereby eventually re-join the Process.

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for Foreign and Commonwealth Affairs how many copies of his Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183885]

Mr. Straw: Production of the Foreign and Commonwealth Office's Departmental Report 1 April 2003 to 31 March 2004 cost the Department £24,453. Due to new printing arrangements, these costs to the Department are 25 per cent. lower than for the 2003 Report. Other costs are met by the publisher, The Stationery Office Ltd. (TSO).

1,900 copies of this year's report were printed of which 1,350 are distributed internally at a price which covers printing costs and 550 copies are retained by TSO. The report is also available free of charge on the FCO website: www.fco.gov.uk. I refer the hon. Member to the reply I gave to the hon. Member for North Norfolk (Norman Lamb) on 6 May 2004, *Official Report*, column 1731W, for further details.

TSO does not divulge its sales revenues, which depend on the extent to which it chooses to sell copies at a discount. Nor does TSO provide the total number of copies printed in previous years. However, the number of copies sold by TSO, and the number supplied to the FCO for internal use, is listed in the table. Statistics for the 1997 edition are not available.

Edition	*Copies sold by TSO*	*Copies supplied to FCO*
1998	626	1,682
1999	542	1,527
2000	513	1,438
2001	564	1,447
2002	525	1,412
2003	426	1,340
2004	[1]315	1,350

[1] Interim figure. The sales profile for previous years indicates that TSO can expect to sell a further 95 copies, bringing the total for the year to approximately 410.

EU-Israel Association Agreement

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the effect of a suspension of the EU-Israel Association Agreement on *(a)* the Israeli and *(b)* the Palestinian economy. [184057]

Mr. MacShane: The Government do not believe that suspension of the EU-Israel Association Agreement would help bring Israel and the Palestinians nearer to a just and lasting negotiated settlement. The Government have therefore made no detailed assessment of the implications of a suspension of the Agreement.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his counterparts in the EU concerning suspension of the EU-Israel Association Agreement. [184058]

Mr. MacShane: The Government do not believe that suspension of the EU-Israel Association Agreement would help bring Israel and the Palestinians nearer to a just and lasting negotiated settlement. My right hon. Friend the Foreign Secretary has therefore had no recent discussions with his EU counterparts concerning the suspension of the EU-Israel Association Agreement.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what estimate he has made of the value in euros of the EU-Israel Association Agreement to the economies of *(a)* the EU, *(b)* UK, *(c)* Israel and *(d)* Palestine in the last year for which figures are available. [184059]

Mr. MacShane: The Government do not have estimates of the monetary value of the EU/Israel Association Agreement to any of its parties. A large part of the Agreement's benefit to Israel lies in the confidence and sense of normality it provides to domestic business and foreign workers. In other circumstances the economic benefit the Agreement brings to Israel would also benefit the Palestinian economy. At present, the effects of the conflict more than nullify that benefit.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with members of the Quartet concerning the effects of suspension of the EU-Israel Association Agreement. [184061]

Mr. MacShane: The Government supports the work of the Quartet (UN, US, Russia, EU) in supporting Israel and the Palestinians to return to a political process in order to reach a just and lasting negotiated settlement. We do not believe that suspension of the EU-Israel Association Agreement would help in this regard. My right hon. Friend the Foreign Secretary has therefore not discussed the effects of suspension of the EU/Israel Association Agreement with other Quartet members.

Hong Kong

Mr. Wiggin: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on his policy on universal suffrage for the people of Hong Kong. [184027]

Mr. Rammell: We have consistently said that we would hope to see early progress towards the Basic Law's ultimate aim of universal suffrage for the election

of the Chief Executive and Legislative Council at a pace in line with the wishes of the people of Hong Kong. We have made this position clear on many occasions to the Chinese authorities and the Hong Kong Special Administrative Region Government.

Iran

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government have made to the Government of Iran on the imprisonment of Ebrahim Khodabandeh and Jamil Bassam who had previously been granted asylum in the UK. [184316]

Mr. Rammell: We have raised the imprisonment of Ebrahim Khodabandeh and Jamil Bassam with the Iranian Government many times, on human rights grounds. We have urged the Iranian authorities to ensure that the men are well treated and, if charged, given a fair and open trial with recourse to proper legal representation. We have no right of consular access to the two men, who are not British nationals. But we have encouraged the Iranian authorities to allow international monitoring visits.

Iraq

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the bounty payment in respect of the capture of Saddam Hussein; what the source of the bounty money was; what advice Coalition partners received about the legality of the bounty; and if he will make a statement. [183437]

Mr. Rammell: The US Government offered a reward for information leading to the capture of Saddam Hussein under the State Department Rewards for Justice programme. Details of this programme are on the US State Department website: www.state.gov. The legal basis of these rewards is a matter for the US Government.

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions the United Kingdom's representative in Iraq has had about the bounty for the capture of the Jordanian militant, Zarqawi; what the sources of the money for the bounty is; what advice was taken by Coalition partners about the legality of any such bounty; and if he will make a statement. [183439]

Mr. Rammell: The US Government offered rewards for information leading to the capture of Saddam and Zarqawi under the State Department's Rewards for Justice programme. Details of this programme are on the US State Department website: www.state.gov. The legal basis of these rewards is a matter for the US Government. Our ambassador to Iraq regularly discusses a wide range of issues on Iraq with his interlocutors.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on terrorist attacks in Iraq. [184123]

Mr. Rammell: Terrorism has not derailed the transition of power to the new Iraqi Interim Government which took office on 28 June, although attacks have continued. The most significant of these in recent days was on 14 July when a terrorist car bomb killed nine Iraqis queuing to enter the international zone, and there has also been an increase in terrorist activity in Samarra. Internal security is now the responsibility of the IIG supported by the Multinational *Force (MNF) in accordance with UNSCR 1546. The* IIG is determined to tackle terrorism, and Iraqi security forces have been engaged in a number of successful operations in Baghdad and elsewhere. The Iraqi authorities are also committed to building up its counter-terrorist and counter-insurgency forces. We continue to be engaged in supporting these efforts.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what the projected daily output of Iraqi oil is *(a)* for the rest of 2004 and *(b)* for 2005. [184266]

Mr. Rammell: The Iraqi authorities have responsibility for setting their own oil production targets. Iraq has a target of increasing its daily output of oil to 2.8–3.0 million barrels by the end of 2004. The Iraqi authorities will aim to ensure sustainable increases in production for 2005 and for subsequent years, to a level that is commensurate with their economic and other developmental needs.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what Iraq's latest daily oil output is. [184267]

Mr. Rammell: Over the period 2–8 July, the most recent for which data is available, Iraq's daily average oil production was 2.122 million barrels per day.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what the current size is of the Iraqi army; and what the forecast size is for July 2005. [184273]

Mr. Rammell: According to statistics provided by the Multinational Security Transition Command-Iraq (MNSTC-I) the projected strength for the Iraqi Army is 36,000 personnel. At present, it numbers 7,116 with a further 2,638 currently under training. The aim is for the army to reach full operational capability by January 2005.

These figures do not include the Iraqi National Guard (ING), formerly the Iraq Civil Defence Corps. It currently numbers 38,000 and is due to reach 50,000 by December 2004. The ING has officially been subsumed into the Iraqi armed forces but is a distinct entity from the regular army.

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress is being made in negotiations with other countries to which Iraq owes money on the Iraqi debt. [184338]

Mr. Rammell: The UK's objective is a fair and sustainable solution to Iraq's debt problems. The G7 is united in agreeing that Iraq's debt is unsustainable and that Iraq needs substantial debt reduction. Many other creditors have associated themselves with this analysis. The Government are continuing to discuss this issue with creditors, including with those in the Paris Club.

Iraq Survey Group

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what arrangements he is putting in place *(a)* to make available paper copies of the final report of the Iraq Survey Group on its publication and *(b)* to place the text on a Government website; and what plans he has to publicise its publication. [184392]

Mr. Rammell: There is no set timetable for reporting by the Iraq Survey Group, nor is there any deadline for the completion of the Group's task.

At present, the Government have not drawn up any plans for publication of the Group's final report but, as with the Group's interim reports, the Government intend to publish as much of the final report as is consistent with the need to protect any operationally-sensitive material.

Israel/Palestine

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli Government concerning *(a)* the killing of Dr. Khaled Saled and his son and *(b)* the destruction by shelling of a residential block in Nablus on 6 July. [184054]

Mr. Rammell: Israel is entitled to take steps to protect itself from terrorist attack, but these should be within international law and neither disproportionate nor excessive. Actions which result in the death or injury of civilians and the demolition of Palestinian homes and property are deeply disturbing. We have frequently called on the Israeli government to stop such action. We have made representations to the Israeli Government at every level about its actions in the occupied territories. We have not made specific representations concerning the killing of Dr Saled and his son, or the 6 July shelling in Nablus.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answers of 28 June 2004, *Official Report*, columns 129–30W, on Israel/Palestine, what steps he will take to ensure that Israel complies with the UK Government's policies. [184060]

Mr. Rammell: The UK will continue to pursue its policy towards Israel in the areas raised, through bilateral dialogue with the Israelis and through the activities of the European Union, the Quartet (UN, US, Russia, EU) and the United Nations Security Council and General Assembly.

Clare Short: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Government's response is to the ruling of the International Court on the route of the Israeli wall; and if he will make a statement. [184757]

Mr. Rammell *[holding answer 16 July 2004]*: My right hon. Friend the Foreign Secretary discussed the International Court of Justice's Advisory Opinion with his EU counterparts on 12 July. We have repeatedly said that we recognise Israel's legitimate security concerns. But we consider the building of the barrier on Occupied Territory to be illegal. The EU has said the same; so has the UN General Assembly. We continue to call upon the Israeli Government to re-route the barrier away from Occupied Territory. Similarly we call on the Palestinian Authority to meet their commitments on security. A draft resolution is being considered by the UN General Assembly. If it is put to a vote we shall vote according to the merits of the resolution.

Maritime Archaeology

Mr. Hawkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to assist the maritime archaeology of sunken British vessels in the waters off Commonwealth countries, with particular reference to wrecks off St. Kitts being researched by the St. Kitts Maritime Archaeological Project. [185001]

Mr. Rammell: We have no current plans to assist the St. Kitts Maritime Archaeological Project.

Milosevic Trial

Mr. Wiggin: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the progress of the Milosevic trial at The Hague; and if he will make it his policy to press for the trial to be completed. [184024]

Mr. Rammell: The Prosecution finished presenting its case in the Milosevic trial on 25 February.

The defence stage of the trial began on 5 July. Milosevic wishes to undertake his own defence, but there are concerns about his health. Given these concerns the trial chamber has decided to adjourn until 19 July with a further adjournment from 21 July until 31 August in order to allow the defendant additional time to prepare his case. The trial chamber has indicated it may be necessary to assign defence counsel to assist or represent Milosevic should he be unfit to do so himself. Full details can be found on the ICTY website at http://www.un.org/icty/milosevic/trialc/order-e/040706.htm.

The UK continues to believe it is important that Milosevic, like others indicted by the ICTY, must stand trial for the crimes of which he is accused. We trust the Tribunal will find a fair and satisfactory solution to allow the completion of this trial.

North Cyprus

Tom Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Turkish Government on a reduction in the number of Turkish troops based in northern Cyprus; and if he will make a statement. [184132]

Mr. MacShane: Our ambassador in Ankara has a close working relationship with the Turkish Government. During his dialogue with the Turkish Government on the UN Secretary General's settlement plan the issue of Turkish troops was discussed.

Our fundamental goal remains to work for a Cyprus settlement. The Turkish Government gave its full support to the UN Secretary General's settlement plan. This included provision for the phased withdrawal of Turkish troops down to a militarily insignificant level.

Tom Cox: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he had at his recent meeting in London with the Turkish Cypriot

Prime Minister of the occupied area of northern Cyprus, as to a reduction in the number of Turkish troops based in Northern Cyprus; and if he will make a statement. [184134]

Mr. MacShane: My right hon. Friend the Foreign Secretary and I discussed a wide range of issues with Mr. Talat, including Turkish troops in northern Cyprus. Mr. Talat assured us that he would continue to work for a settlement to the Cyprus problem. As my hon. Friend knows, the UN Secretary General's proposals for a comprehensive solution to the Cyprus problem included a provision for a substantial phased withdrawal of Turkish troops.

It is a matter of regret that those proposals were not accepted by the Greek Cypriots and troops remain. It remains the view of the Government that a comprehensive settlement as set out by the UN Secretary General offers the best means of addressing all aspects of the Cyprus problem, including the presence of Turkish troops.

North Korea

Mr. Wiggin: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of the potential threat posed to international security by North Korea. [184023]

Mr. Rammell: We believe that the Democratic People's Republic of Korea (DPRK) has been pursuing two separate programmes for the production of fissile material, through the enrichment of uranium and the processing of plutonium. We view this as a serious potential threat to international security. We also remain very concerned at the threat to international security posed by DPRK's willingness to transfer ballistic missile technology and systems to other states. We support the objective of the continuing six-party talks: a Korean peninsula free of nuclear weapons, and believe that the comprehensive, verifiable and irreversible dismantling of North Korea's nuclear weapons programmes is necessary to assure this objective.

Saddam Hussein

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the United Kingdom was consulted by *(a)* the United States Administration and *(b)* the interim Iraqi Government in respect of the arrangements made for the first appearance in court of Saddam Hussein; whether he was made aware in advance that only US media would be permitted in the court for the former President of Iraq's appearance; and whether he plans to consult the interim Iraqi Government over the access to the court by other than US media companies in future hearings of former members of the Iraq Government. [184396]

Mr. Rammell: UK, US and Iraqi officials discussed in advance the media arrangements for the arraignment of Saddam Hussein. The media representatives present in the courtroom were there as a press pool. They included representatives of Al-Jazeera (pan-Arab satellite television) and Al-Iraqiya (Iraqi satellite television).

We have also been consulted on the arrangements for the next court appearance. The Baghdad press corps have themselves selected the proposed media pool.

Terrorism

Mr. Wiggin: To ask the Secretary of State for Foreign and Commonwealth Affairs what guidance he has issued to British citizens working in countries where there is a high risk of terrorist attacks, concerning their personal safety. [184028]

Mr. MacShane: Travel advice for 217 countries, including those where there is a high threat from terrorism, is available on the Foreign and Commonwealth Office (FCO) website: www.fco.gov.uk. This provides practical objective, accurate and up-to-date information including on personal safety, so that British nationals can make informed decisions about travelling abroad. Our diplomatic missions also communicate such advice to British expatriates through wardens' networks overseas. In October 2003 the FCO and the Confederation of British Industry launched the Security Information Service for Businesses Overseas (SISBO), which provides British companies with information on political and security risks in overseas markets.

Visas

Keith Vaz: To ask the Secretary of State for Foreign and Commonwealth Affairs how many visas were granted in *(a)* Romania and *(b)* Bulgaria between January and July 2004. [183272]

Mr. Mullin: The figures requested are only available for the period from 1 January to 30 June 2004. Between these dates 15,874 visas were issued at our embassy in Bucharest, Romania and 13,496 visas were issued at our embassy in Sofia, Bulgaria.

West Bank/Gaza Strip

Mr. Wiggin: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on bilateral relations with the Palestinian authorities in the West Bank and Gaza Strip. [184026]

Mr. Rammell: Through our Consulate-General in Jerusalem and the British Information Service Office in Gaza we conduct discussions with the Palestinian Authority on a range of issues. These crucially include how the UK can support the Palestinian Authority in meeting its obligations under the Roadmap; work with the Palestinian Authority to build its capacity on security is one such example. My noble Friend Baroness Symons of Vernham Dean last visited the Palestinian Authority in January 2004. The Consulate-General offers a full visa and consular service in Jerusalem and the Occupied Territories.

The UK is a significant bilateral donor of development assistance in the Occupied Territories. The Department for International Development has planned expenditure of £16.15 million on assistance to the Palestinian Authority and Palestinian civil society, and a further £12.35 million for the United Nations Relief and Works Agency for Palestinian refugees in the current financial year.

Zimbabwe

Mr. Best: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had about the *(a)* political and *(b)* economic situation in Zimbabwe with other southern African countries. [183336]

Mr. Mullin: We regularly make our views on Zimbabwe clear to southern African countries. Most recently I discussed Zimbabwe with representatives of a number of African leaders during the African Union Summit from 6 to 8 July in Addis Ababa.

LEADER OF THE HOUSE

Orders in Council

Llew Smith: To ask the Leader of the House if he will list each occasion when Her Majesty's Government has legislated by way of an Order in Council since 1 May 1997; and what the reason for deciding on this way to legislate was in each case. [184395]

Mr. Leslie: I have been asked to reply.

Her Majesty's Government legislates through Orders in Council either because Parliament has provided for delegated legislation under a particular Act to be made in that way, or because a Prerogative power is being exercised which can be given legislative force in no other way. Not all Orders in Council represent "legislation by Her Majesty's Government", and the task of listing those that do could be carried out only at disproportionate cost. A list of all Orders in Council made since October 2000 can be found, however, on the Privy Council Office website at www.pco.gov.uk.

CONSTITUTIONAL AFFAIRS

Civil Emergencies (Voting Arrangements)

Mr. Wiggin: To ask the Parliamentary Secretary, Department for Constitutional Affairs what contingency arrangements have been made for casting votes at an election in the event of there being a civil emergency such as a foot and mouth outbreak. [185207]

Mr. Leslie: The arrangements for counting votes are the responsibility of the relevant Returning Officer. Guidance on appropriate actions in the event of various emergencies (such as security threats, riot, flood, fire, etc) is issued to Returning Officers before each parliamentary election. Special guidance related to the foot and mouth outbreak was issued before the last general election. An assessment of the need for further advice would be made in the light of the circumstances and the nature of the emergency.

Electoral Fraud

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will set up a committee to investigate allegations of corruption, vote tampering and voter manipulation in the June elections. [185076]

Mr. Leslie: The Government have no plan to do so. Some allegations of electoral fraud are already under criminal investigation. In addition, five electoral petitions are before the courts. More generally, the independent Electoral Commission has a statutory duty to report on the European Parliamentary elections. It is also statutorily required to evaluate the operation of the all-postal voting electoral pilots. I understand that the Commission's reports will consider electoral fraud issues.

Travel Costs

Dr. Cable: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the travel costs were of civil servants in *(a)* his Department, *(b)* its predecessor Department and *(c)* its related agencies in each year since 1997. [183894]

Mr. Lammy: Total travel costs, which includes domestic and overseas travel for the Department and covers costs for the Court Service (CS), the Public Guardianship Office (PGO) and the Department for Constitutional Affairs, Headquarters (DCA HQ) are set out in the following table.

Period	*DCA HQ*	*CS*	*PGO*	*Total DCA*
2004–05[1]	556,356	720,660	7,570	1,284,586
2003–04	2,389,149	3,664,272	34,639	6,088,060
2002–03	1,174,209	3,964,961	41,783	5,180,953
2001–02	1,179,355	3,377,593	61,480	4,618,428
2000–01	1,307,772	2,972,788	43,082	4,323,642
1999–2000	1,096,679	3,215,919	28,751	4,341,349
1998–99	903,983	2,696,618	16,934	3,617,535

[1] To 30 June.

There has been an increase in travel costs for the DCA HQ between 2002–03 and 2003–04, which is mainly due to a change in attribution of costs between the Court Service, PGO and DCA HQ and due to an increase in responsibilities for the Department.

Information on the previous year is not readily available.

HOME DEPARTMENT

Alcohol Promotions

Helen Southworth: To ask the Secretary of State for the Home Department if he will hold discussions with the alcohol industry and licensed trade, in particular the large pub chains, to encourage the stocking of a range of non-alcoholic beers, lagers and ciders on licensed premises. [183657]

Caroline Flint: We are currently having discussions with the industry around the development of the social responsibility scheme for retailers, which was one of the recommendations of the Alcohol Harm Reduction Strategy for England. This scheme is likely to contain a pledge to consider the pricing policy on non-alcoholic drinks, and to encourage discounting of them. The scheme will also be likely to include a commitment to offering free water and reasonably priced soft drinks in all pubs and clubs.

Asylum Seekers

Annabelle Ewing: To ask the Secretary of State for the Home Department (1) on what date his Department agreed a contract with Reliance Monitoring Service to provide a system for tagging individuals seeking asylum; if he will publish a copy of the contract; and if he will make a statement; [183918]

(2) what the value of the contract with Reliance Monitoring Service to provide a system for tagging individuals seeking asylum is. [183920]

Mr. Browne: The Secretary of State has not let a contract with Reliance Monitoring Services for tagging individuals seeking asylum and residing in Scotland.

Reliance Monitoring Services Ltd. have been providing electronic monitoring services in the South of England since 1 October 2001 under the terms of a contract with the Home Office and electronic tagging services within the Scottish criminal justice system since 1 May 2002 under the terms of a contact with the Scottish Executive.

IND plans to pilot the use of electronic monitoring for immigration purposes from the autumn in accordance with clause 36 of the Asylum and Immigration (Treatment of Claimants etc.) Bill.

The pilot in England and Wales will be run under the existing Home Office contract. A separate procurement exercise is under way to provide services for use by IND in Scotland.

Annabelle Ewing: To ask the Secretary of State for the Home Department how many individuals seeking asylum in the UK and residing in *(a)* Scotland, *(b)* England, *(c)* Wales and *(d)* Northern Ireland will be involved in his Department's pilot scheme to provide a system for tagging individuals seeking asylum. [183922]

Mr. Browne: The pilot will cover up to 200 people for voice recognition and up to 50 people for tagging (including up to 10 on satellite tracking). Numbers will be divided between the three contractors operating under the existing Home Office contract for England and Wales and an interim contractor in Scotland.

The Immigration and Nationality Directorate has no plans to pilot tagging in Northern Ireland, but will consider the use of electronic monitoring through voice recognition depending on the outcome of the pilots in England and Wales and Scotland.

Annabelle Ewing: To ask the Secretary of State for the Home Department whether his Department consulted the Scottish Executive prior to the awarding of the contract with Reliance Monitoring Service to provide a system for tagging persons seeking asylum. [183923]

Mr. Browne: The Secretary of State has not awarded a contract to Reliance Monitoring Services for the electronic monitoring of individuals seeking asylum and residing in Scotland.

Home Office officials met officials from the Scottish Executive in Glasgow in January and have kept them fully informed of plans to procure electronic monitoring services in Scotland.

Child Trafficking

Ms Keeble: To ask the Secretary of State for the Home Department when the first inter-ministerial meeting on child trafficking will be held. [182840]

Mr. Browne: There is close co-operation across Government to tackle the crime of human trafficking. For example, Reflex the multi-agency task force set up to co-ordinate intelligence and law enforcement in a response to organised immigration crime, including human trafficking, brings together all the key agencies and Departments. The Government Departments represented on Reflex include the Foreign and Commonwealth Office, the Crown Prosecution Service, and the Home Office.

The Home Office and the Department for Education and Skills work closely on the subject of child trafficking. We are jointly considering the results from the Reflex funded multi-agency operation, Paladin Child. This involved the Metropolitan police, the Immigration Service, social workers from Hillingdon Social Services and secondees from NSPCC. The operation risk assessed children arriving at Heathrow airport without their parents or legal guardians and social services followed up those considered to be at risk. The operation did not uncover any evidence of child trafficking. However, the report did make a number of recommendations related to child protection.

This issue of human trafficking is currently within the remit of a number of ministerial groups. Ministers are currently considering whether a ministerial group focussing specifically on human trafficking would be of benefit in taking forward the agenda in this area.

Unaccompanied[1,2,3] children, aged 17 or under, applying for asylum in the United Kingdom, by nationality, 1999 to 2003

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department when he intends to reply to the letter to him dated 24 May from the right hon. Member for Manchester, Gorton with regard to Mr. P. Cookson. [183687]

Mr. Blunkett: I replied to my right hon. Friend on 13 July 2004.

Data Collection/Sharing (Children)

Mrs. Brooke: To ask the Secretary of State for the Home Department what steps he has taken recently to improve the collection of data on children entering the country. [183311]

Mr. Browne *[holding answer 15 July 2004]:* The Immigration Service does not routinely collect data on children arriving in the United Kingdom. It does however act as the first information point to identify children who may be at risk when they arrive in the United Kingdom.

The overwhelming majority of children arriving in the UK do so legitimately and safely and give no cause for concern. However, if an immigration officer had concerns about a child arriving in the UK, mechanisms are in place to ensure that such information is collected and shared with relevant agencies, such as social services.

Mrs. Brooke: To ask the Secretary of State for the Home Department how the data collected on children entering the country are shared with other relevant agencies. [183308]

Mr. Browne *[holding answer 14 July 2004]:* The Immigration Service does not routinely collect data on children arriving in the United Kingdom. But it has recently introduced a number of measures aimed at ensuring that children at risk are identified on arrival and, where appropriate, other agencies informed.

Child Protection Officers are based at Heathrow Airport and at the Croydon Asylum Screening Unit in order to strengthen the links between the police and the Immigration Service to counter child trafficking and problems associated with unaccompanied minors. In addition social services have recently placed staff at the Croydon Asylum Screening Unit to work alongside Immigration Service staff advising them on child welfare issues. A scoping study is also being undertaken to examine the feasibility of social work teams being based at the major ports of entry.

The Immigration Service also participated in Operation Paladin Child, initiated by the Metropolitan Police Child Protection Command to define the nature of child migration from non-EU countries to the UK via Heathrow, and which also involved the NSPCC and Hillingdon Social Services. The report into the operation's findings made a number of recommendations, including the creation of multi-agency partnership teams at major ports. The Immigration Service will work with the police and other agencies involved to help implement those recommendations.

Identity Cards

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what assessment has been made of the effect on the prevention of terrorism of not requiring foreign nationals coming to the UK for less than three months to have an identity card. [182297]

Mr. Browne: It is well known that terrorists use false and multiple identities to help undertake and finance their activities in the UK and abroad. An identity card scheme would disrupt the use of false identities by terrorist organisations, for example in the money laundering and organised crime, which support their terrorist activities. Such operations are generally perpetrated over long periods of time.

The Government agrees with Sir John Stevens, the Commissioner of the Metropolitan Police, who has said that he has absolutely no doubt that a card scheme would have a significant effect in the war against terrorism.

Immigration Removals

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many detainees under immigration service control have signed forms for return to their home country and are awaiting removal. [183832]

Mr. Browne: Information on the number of detainees awaiting removal to their home country following a request to make a voluntary departure is not recorded by the Home Office. This information could be obtained only by examination of individual case files at disproportionate cost.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what the average waiting time was for detainees under immigration service control who have signed forms to return to their home country, in the last period for which figures are available. [183833]

Mr. Browne: Information on the average waiting time for the removal of detainees to their home country following a request to make a voluntary departure is not recorded by the Home Office. This information could be obtained by examination of individual cases files only at disproportionate cost.

Passports

Mr. Gordon Prentice: To ask the Secretary of State for the Home Department how many people are to participate in the UK Passport Service biometrics enrolment trial; and if he will make a statement. [183042]

Mr. Browne: The trial began in April and is fully rolled out, functioning at four fixed sites and a mobile unit. It is expected to run for around six months until September when the United Kingdom Passport Service (UKPS) will have enrolled 10,000 people. Up to 2 July, 3,675 people have participated.

The trial is testing the recording of biometrics and public perceptions.

Police

Ms Keeble: To ask the Secretary of State for the Home Department how many police officers were employed by Northamptonshire police at *(a)* 1 April 1997 and *(b)* 1 April 2004. [183752]

Ms Blears: The Northamptonshire police had 1,177 police officers on 31 March 1997. This had increased to 1,234 on 31 December 2003 (the latest published figure). In addition the force had 812 police support staff on 31 March 2003 compared with 554 in March 1997. At the end of March 2004 the force also had 12 Community Support Officers.

Refugee Women (Employment)

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department if he will make a statement on the efforts made by *(a)* the Community Integration Partnership project in the West Midlands and *(b)* other similar projects to address barriers refugee women face when trying to find employment. [183309]

Mr. Browne *[holding answer 14 July 2004]:* The Community Integration Partnership (CIP), which was formed as a direct result of a joint partnership between West Midlands Consortium for Asylum Support (WMCARS) and Roselodge Group in March 2003, is currently funded under the Home Office's Refugee Integration Challenge Fund to help refugee women to access training, education and employment. Their main objectives are to address the barriers that many refugee women face in doing so, for instance by obtaining relevant information, confidence building, arranging childcare, and enhancing language skills. It works in close partnership with a range of Government and non-government bodies across the West Midlands which share its commitment to the provision of services to refugee women.

Security Officers (Crime)

Mr. Keith Simpson: To ask the Secretary of State for the Home Department how many British Security Industry Association security officers have been convicted of criminal offences when carrying out their duties in each of the last five years. [184535]

Ms Blears *[holding answer 16 July 2004]:* The information requested is not available. The British Security Industry Association is a professional trade association for the security industry in the UK. Membership of the BSIA is at company rather than individual level.

WORK AND PENSIONS

Pensioner Households (Income)

Mr. Hurst: To ask the Secretary of State for Work and Pensions what the average income for pensioner households was in each year from 1993 to 2003. [184558]

Malcolm Wicks: The following table gives the mean net (after tax, in 2002–03 prices) Before and After Housing Cost income of pensioner units between 1994–95 and 2002–03. Information is based on the Family Resources Survey, which began in 1994–95.

Mean income

	Net BHC	*Net AHC*
1994–95	189	161
1995–96	188	160
1996–97	199	170
1997–98	202	174
1998–99	208	182
1999–2000	216	189
2000–01	225	202
2001–02	233	210
2002–03	237	214

Note:
Pensioner units are defined as single (non-cohabiting) people over state pension age (65 and over for men, 60 and over for women) and couples (married and cohabiting) where the man is over pension age.
Source:
Pensioners' Income Series 2002–03, in 2002–03 prices.

Child Support

Mrs. Anne Campbell: To ask the Secretary of State for Work and Pensions what factors underlie the decision not to reward parents coming off benefits and into full-time education with the child maintenance bonus under the old scheme and child maintenance premium under the new scheme. [181629]

Mr. Pond: The child maintenance bonus is a measure to provide an incentive for parents with care to go into work.

The child maintenance premium is a disregard of income for parents with care who are in receipt of either income support or income-based jobseeker's allowance. When a parent with care ceases to receive income-related benefit, she will receive all of the maintenance paid.

Child Support Agency

Mrs. Anne Campbell: To ask the Secretary of State for Work and Pensions when he expects Child Support Agency cases assessed under the old legislation to be transferred for assessment under the new legislation. [184734]

Mr. Pond: I refer the hon. Member to the written answer I gave the hon. Member for Castle Point (Bob Spink) on 18 December 2003, *Official Report*, column 1092W.

Mr. Hancock: To ask the Secretary of State for Work and Pensions for what reason maintenance from non-resident parents which is uncollected by the Child Support Agency will be disregarded and written off. [183286]

Mr. Pond: The Child Support Agency has no powers to write-off debt.

Legislation provides for a non-resident parent to cease to be liable for a proportion of his arrears in certain tightly defined circumstances. In such cases the Secretary of State may make a payment to the parent with care.

Compensation Recovery Unit

Mr. Dismore: To ask the Secretary of State for Work and Pensions how many claims were registered with the Compensation Recovery Unit in respect of accidents and illnesses at work; how many resulted in repayment of benefit in such cases; and what the total amount of benefit recovered was. [185163]

Jane Kennedy: The information is in the table.

Employer liability compensation cases and benefit recovered

Cause	*2002-03*	*2003-04*
Claims received via employer liability		
Accident	92,915	79,286
Disease	90,427	211,924
Claims resulting in repayment of benefit		
Accident	111,322	115,214
Disease	75,028	100,506
Amount recovered		
Accident (£)	65,121,648	65,934,190
Disease (£)	37,334,756	39,054,286

Note:
The figures of claims resulting in repayment of benefit include some received in, and carried forward from, the previous year.
Source:
Compensation Recovery Unit Database.

Hearing Loss

Ms Atherton: To ask the Secretary of State for Work and Pensions what assessment he has made of evidence about the cumulative effects of hearing loss occasioned by war-time noise combined with age related hearing loss. [183610]

Mr. Caplin: I have been asked to reply.

The current scientific understanding of noise-induced sensorineural hearing loss is that it does not get worse on removal from the noise giving rise to the injury and that, in the context of the War Pensions Scheme, hearing loss due to noise and that due to subsequent effects of age are not more than additive. This is the basis on which the Department considers claims for hearing loss due to service in the armed forces.

In terms of specific assessments of the effects of hearing loss, in 1997 Baroness Hollis, the Minister then responsible for war pensions, asked the then Government Chief Medical Officer, Sir Kenneth Calman, to chair an independent expert review of the assessment of hearing loss in the War Pensions Scheme. Both that independent review and a further departmental review in February 1999 confirmed that the Department's approach to the assessment of hearing loss in war pensions was in line with current scientific and medical understanding. Since early 1999 emerging evidence on the matter has continued to be monitored.

The Industrial Injuries Advisory Council, an independent non-governmental body which advises the Secretary of State for Work and Pensions on matters relating to the Industrial Injuries Scheme, published their review of occupational deafness in November 2002 (Cm 5672). This confirmed the War Pensions Scheme approach to assessment.

New Deal for Young People

Mr. Rosindell: To ask the Secretary of State for Work and Pensions how many school leavers joined the New Deal programme in Havering in *(a)* 1999, *(b)* 2002 and *(c)* 2003. [184244]

Jane Kennedy: Information on whether people joining New Deal are school leavers is not available.

Information on the numbers of young people joining New Deal for Young People in Havering, and their ages on joining, is in the table.

Starts to New Deal for Young People in Havering

Age on joining	*1999*	*2002*	*2003*
18	70	60	80
19	80	70	70
20	70	60	60
21	60	40	60
22	50	50	50
23	50	40	50
24	60	40	50
Total	450	360	430

Notes:
1. All figures are for January to December each year.
2. All figures are starts rather than individuals and may include people who have started New Deal more than once.
3. All figures are rounded to the nearest 10.
4. Totals may not sum due to rounding.
Source:
DWP Information and Analysis Directorate.

Mr. Willetts: To ask the Secretary of State for Work and Pensions pursuant to the answer of 10 February 2004, *Official Report*, columns 1341–42W, what the average cost per place on each of the four options in the New Deal for Young People was in the last 12 months. [182122]

Jane Kennedy: The information is not available.

It is intended that a unit cost system, capable of capturing this type of information, will be part of the system implementation of the Resource Management System. The system is currently still in the design and development stage and we anticipate that roll out will commence from late 2005.

Occupational/Personal Pensions

Mr. Cousins: To ask the Secretary of State for Work and Pensions if he will estimate the percentage of employees in each decile of employee incomes who do not contribute to an occupational or personal pension. [185168]

Malcolm Wicks: The proportion of employees of working age that have no pension provision by earnings deciles in 2002–03 is shown in the table.

Decile	*Percentage*
Low	81
2	62
3	59
4	48
5	42
6	36
7	27
8	22
9	16
High	13

Notes:

1. All figures are estimates derived from the Family Resources Survey (FRS) 2002–03, the latest year for which data is available. The coverage of the survey is the UK.
2. Estimates show the proportion of working age employees with no pension provision within the deciles of the overall working age gross earnings distribution.
3. People with no pension provision are defined as those who are not members of an occupational pension and not currently contributing to a personal or stakeholder pension scheme.
4. Employees have been defined as full-time and part-time employees.
5. Working age has been defined as 20–59 for women and 20–64 for men.
6. Earnings deciles have been defined in relation to working age gross earnings for employees.

Source:
Family Resources Survey 2002–03.

Post Office Card Accounts

Ian Lucas: To ask the Secretary of State for Work and Pensions how many benefit recipients have changed their method of payment from payment into a bank account to payment into a Post Office card account since the beginning of direct payment. [184630]

Mr. Pond: The information is not available in the format requested.

Figures supplied are for benefit accounts not benefit recipients. A benefit recipient may have more than one benefit account.

The Post Office card account has been available since April 2003.

The number of benefit accounts that have changed from a bank account to a Post Office card account from April 2003 to May 2004 is 12,625.

Ian Lucas: To ask the Secretary of State for Work and Pensions how many benefit recipients have changed their method of payment from payment into a Post Office card account to payment into a bank account since the beginning of direct payment. [184631]

Mr. Pond: The information is not available in the format requested.

Figures supplied are for benefit accounts not benefit recipients. A benefit recipient may have more than one benefit account.

The Post Office card account has been available since April 2003.

The number of benefit accounts that have changed from a Post Office card account to a bank account from April 2003 to May 2004 is 5,765.

Private Finance Initiative

Paul Holmes: To ask the Secretary of State for Work and Pensions how much *(a)* his Department and *(b)* agencies of the Department have spent on electricity use for each year from 1997 to date. [181395]

Mr. Pond: Since DWP came into being, its total spend on electricity was £10,097,555 and £11,394,575 in 2001–02 and 2002–03 respectively. Figures are not yet available for 2003–04.

It is not possible to provide an accurate breakdown of spend to Agency level, as invariably DWP buildings are occupied by a number of the Department's businesses.

Underfunded Pension Schemes

Mr. Waterson: To ask the Secretary of State for Work and Pensions pursuant to the written statement of 30 June 2004, *Official Report*, columns 15–16WS, on underfunded pension schemes (insolvency), what assessment he is undertaking of the number of people who lost pension rights when their scheme was wound up, where the sponsoring employer was solvent, but would have been insolvent had full pension rights been provided. [184355]

Malcolm Wicks: The data gathering exercise undertaken to inform the report published on 30 June focused on underfunded schemes sponsored by insolvent employers. The information requested is not available although we are seeking further information and consulting on the circumstances of schemes winding up underfunded with solvent employers prior to making final decisions on eligibility for the Financial Assistance Scheme.

Mr. Waterson: To ask the Secretary of State for Work and Pensions pursuant to the written statement of 30 June 2004, *Official Report*, columns 15–16WS, on underfunded pension schemes (insolvency), how many people have lost *(a)* any and *(b)* 10 per cent. or more of their expected pension benefits from underfunded schemes wound up by insolvent employers since 1997; and if he will list the schemes whose members were included in the research exercise. [184356]

Malcolm Wicks: It is estimated that *(a)* some 70,000 members may have lost any of their expected pension benefits and that *(b)* some 65,000 members face losses

of 10 per cent. or more of their expected pension benefits from underfunded schemes being wound up by insolvent employers since 1997. These estimates are consistent with those published on 30 June and exclude any non-pensioners' indexation offered by their schemes as well as excluding those with the very smallest cash losses of less than £5 a week. They are rounded to the nearest 5,000 members and so the estimates of the numbers losing 10 per cent. or more of their expected pension benefits are the same as those previously published for the numbers losing 20 per cent. or more.

We are unable to list the schemes whose members were included in the research exercise as this information was provided by scheme trustees in confidence.

Mr. Waterson: To ask the Secretary of State for Work and Pensions pursuant to the written statement of 30 June 2004, *Official Report*, columns 15–16WS, on underfunded pension schemes (insolvency), what steps he is taking to ensure that the data gathered covers all cases where companies sponsoring defined benefit schemes have become insolvent since 1997. [184357]

Malcolm Wicks: The report that was published on 30 June provides estimates of the numbers of people facing significant reductions in their expected pensions as a result of schemes starting to wind up underfunded with insolvent employers since 1997. Those estimates were based on a combination of new information collected, for the purpose of the estimates, from independent trustees, and information already available in the Occupational Pension Regulatory Authority's Pension Schemes Registry. While the new information collected did not itself cover all such schemes, the two sets of information combined provided a firm basis for the global estimates published.

We are, however, working with the pensions industry to collect more information on affected schemes to assist the development and implementation of the Financial Assistance Scheme.

EDUCATION AND SKILLS

Residential Accommodation

Tim Loughton: To ask the Secretary of State for Education and Skills how many and what percentage of establishments registered to provide residential accommodation for children were the subject of *(a)* scheduled and *(b)* unannounced inspections in each of the last three years. [178495]

Margaret Hodge: Data are only available for the years 2002–03 and 2003–04 and have been provided by the Commission for Social Care Inspection.

In 2002–03 a total number of 1,172 children's homes were registered. In that period there were 1,031 announced inspections (88 per cent. of all registered children's homes) and 639 unannounced inspections (54.5 per cent. of all registered children's homes).

In 2003–04 a total of 1,956 children's homes were registered. In that period there were 1,683 announced inspections (86 per cent. of all registered children's homes) and 1,678 unannounced inspections (85.8 per cent. of all registered children's homes).

It must be taken into account that homes that have not been registered until the latter part of the year might not achieve the second (unannounced) inspection within the same year, although it should occur within the annual timeframe.

Accountancy Costs

Mr. Collins: To ask the Secretary of State for Education and Skills how much his Department has spent on accountants in each year since 1997. [183972]

Mr. Charles Clarke: Information on spend on accountants is not collected separately from that of other expenditure. The number of accountants employed by the Department since 1997 is shown in the table. The figures for each year are not directly comparable because of machinery of government changes in 2001 and 2003.

Period	*Number*
1997–98	71
1998–99	64
1999–2000	66
2000–01	41
2001–02	56
2002–03	39
2003–04	36

Adult Skills

Mr. Willis: To ask the Secretary of State for Education and Skills what the average cost of *(a)* an A-level, *(b)* an Advanced GNVQ and *(c)* a NVQ level 3 or equivalent vocational qualification are; and how many people achieved each of these qualifications in 2003. [174370]

Mr. Miliband *[holding answer 25 May 2004]:* The cost of examination entry is set by the independent awarding bodies. The typical cost of entry and the number of people achieving *(a)* A-levels *(b)* Advanced GNVQs and *(c)* NVQ level 3 or equivalent in England in 2003 are as follows:

Qualification	*Typical cost of entry*[1] *(£)*	*Number of candidates achieving qualification*[2]
(a) GCE A-level	66.00	244,426
(b) VCE AS-level	42.00	10,622
VCE A-level	79.00	27,870
VCE Double Award	150.00	34,349

As part of the Curriculum 2000 reforms the Advanced GNVQ was replaced by the Vocational Certificate of Education (VCE) group of qualifications.

Using the most recent data available the number of level 3 NVQs (National Vocational Qualifications) and VRQs (Vocationally Related Qualifications) achieved in 2002/03 are shown in the following table.

Qualification	*Typical cost of entry*[1] *(£)*	*Number of qualifications achieved*[3]
(c) NVQ Level 3	110.00	85,196
VRQ Level 3	—	45,076

[1] Typical cost of entry is based on entry through Edexcel. These figures have been taken from information provided on the Edexcel website.

[2] Information on candidates attempting GCE A levels and VCE qualifications is taken from information collated for the 2003 Performance Tables.

[3] Information on achievements for level 3 NVQs and VRQs is taken from the 2002/03 National Information System for Vocational Qualifications (NISVQ).

Note:

For VRQs the cost is not shown as this would be dependent upon the exact qualification.

Building Schools for the Future Programme

Mr. Willis: To ask the Secretary of State for Education and Skills if he will list the private contractors participating in the Building Schools for the Future programme; and if he will make a statement. [184866]

Mr. Miliband: The first schemes to be procured under the Building Schools for the Future programme are not due to come to the market until later in the summer.

However, several contractors have been engaged in accordance with public procurement processes to assist in the creation and development of Partnerships for Schools (PfS), which is the non departmental public body established by the Department to manage and co-ordinate the Building Schools for the Future programme.

These contractors are Bevan Ashford, KPMG, Capita, Precept, Anders Elite and Fujitsu. In addition, the following have had engagements which have now been concluded; Augmentis, Bridge and Beyond.

PfS is also in the process of procuring framework contacts for the following range of services on behalf of itself, local authorities, schools and other stakeholders:

Legal advisory services

Financial advisory services

Programme Management

Communications

Technical advisory services

Education advisory services

Team Development.

Chief Mathematics Adviser

Dr. Iddon: To ask the Secretary of State for Education and Skills what *(a)* human and *(b)* financial resources he plans to make available to the post of chief mathematics adviser to enable the successful applicant to fulfil the responsibilities listed in the job description. [184108]

Mr. Charles Clarke: The post of Chief Adviser for Mathematics will be a highly influential and pivotal role and the successful candidate will work together with senior officials and Ministers to take forward the work detailed in our response to Professor Adrian Smith's report Making Mathematics Count, which I announced in the House on 28 June. Our response document contained a number of specific financial commitments and I am considering additional resources in the light of this week's Spending Review announcements.

Child Abuse

Mr. Jim Cunningham: To ask the Secretary of State for Education and Skills how his Department monitors parental child abuse cases in the UK. [184173]

Margaret Hodge: This Department does not monitor parental child abuse cases. Rather, the Department collects information relating to children who are listed on the child protection register.

Children are placed on the child protection register when a multi-agency child protection conference considers them to be at continuing risk of significant harm. That risk may arise from a number of factors, one of which may be parental abuse, but the register does not record the source of the risk.

Children should be registered under one or more of the categories of physical, emotional, or sexual abuse or neglect, according to a decision by the chair of the child protection conference. The categories used for registration help indicate to those consulting the register the nature of presenting concerns. Recording information in this way also allows for the collation and analysis of information locally and nationally.

The Department publishes, on an annual basis, information relating to registrations, de-registrations and re-registrations of children on the child protection register.

Children in Care

Tim Loughton: To ask the Secretary of State for Education and Skills how many children are residing in children's homes in West Sussex. [178491]

Margaret Hodge: Information on the total number of children residing in children's homes in West Sussex is not collected centrally.

At 31 March 2003, the latest date for which information is available, it is estimated that West Sussex County Council had responsibility for 20 looked after children residing in children's homes and hostels within their local authority. A further 30 are in children's homes outside their local authority boundary. Information on the number of looked after children from other councils who are residing in residential accommodation within West Sussex is not collected centrally.

Tim Loughton: To ask the Secretary of State for Education and Skills how many and what percentage of children's homes in West Sussex were subject to *(a)* scheduled and *(b)* unannounced inspections in each of the last three years. [178492]

Margaret Hodge: According to information provided by the Commission for Social Care Inspection there are 32 children's homes in West Sussex, of which nine are run by the Local Authority. Since 1 April 2002 all of the homes have been inspected twice a year (one announced and one unannounced inspection in each year).

Departmental Staffing

Mr. Collins: To ask the Secretary of State for Education and Skills how many non-Civil Service staff have worked on projects in the Department in each year since 1997. [183977]

Mr. Charles Clarke: The Department does not hold this information centrally and could be obtained only at disproportionate cost.

Disabled People (Services)

Mr. Goodman: To ask the Secretary of State for Education and Skills what assessment he has made of the efficacy and efficiency of services provided by his Department to disabled people; and if he will make a statement. [183253]

Mr. Charles Clarke *[holding answer 12 July 2004]*: The Government are committed to improving the position of disabled people in society and believe that public bodies should take the lead in promoting equal opportunities. That is why the draft Disability Discrimination Bill extends the DDA to the functions of public bodies and introduces a duty on public bodies to promote equality for disabled people.

Accordingly, my Department keeps the efficacy and efficiency of services provided to disabled people under constant review. The Sure Start Unit has published and disseminated guidance and training materials to Special Educational Needs Coordinators (SENCOs) in local authorities, which will guide and empower them to support early identification, intervention, develop inclusive early learning environments and existing

service provision. These materials will help them to support children in removing barriers to learning wherever these exist.

The Children Act Report 2002, published by DfES in June 2003, pulls together the latest information from statistical returns, inspections and research on social services support for children. This report includes a chapter on support for disabled children and their families. See the DfES website at http://www.dfes.gov.uk.Ofsted inspections of schools and LEAs include a requirement to look at and report on the inclusion of children with special educational needs (SEN) and disabilities. In addition, Ofsted also undertake reports on specific themes. It is due to report in September 2004 on the initial impact of the Special Educational Needs and Disability Act 2001 and will also be reporting at regular intervals on progress being made as a result of the Government's Strategy for SEN: Removing Barriers to Achievement. Ofsted also has the lead responsibility for inspecting Connexions partnerships. All Ofsted inspections focus on the experience of young people and evaluate and report on quality and effectiveness of the partnership. Ofsted's framework for inspection states that they should report on how responsive the partnership is to the range and diversity of young people in the area. In making their judgments, Ofsted report on the relevance of programmes provided and whether they provide for the diverse needs of young people within the target age group, taking into account such features as sex, link ethnicity and disability and ensuring equality and equity. See the Ofsted website at http://www.ofsted.gov.uk.

The Higher Education Funding Council for England (HEFCE) provides funding to the higher education institutions and further education colleges it funds to widen access and improve provision for disabled students. It publishes an annual series of performance indicators that cover access, progression, retention, research, graduate employment and disability. The allocation of funds reflects the proportion of students that each institution recruits who are in receipt of the disabled students allowance (DSA). See "Explanation of how the mainstream disability allocation for 2004–05 is calculated" at http://www.hefce.ac.uk/widen/sldd/allocat.asp

HEFCE also distributes special initiative funding in support of students with learning difficulties and disabilities. In the current round, they have funded 54 projects in two strands. Funding for this round of projects began in January 2003 and the programme ends in December 2005. See HEFCE's "2003–05 Special funding programme: Improving provision for disabled students" at http://www.hefce.ac.uk/widen/sldd/fund03-O5.asp

HEFCE also funds the National Disability Team to support projects and provide guidance to the higher education sector on disability issues and legislation. More details can be found at http://www.natdisteam.ac.uk/

In May 2003 HEFCE published "Project capital round three: invitation to apply for funds". Of the £494 million allocated to improve capital and IT infrastructure to support learning and teaching, £117 million is allocated to improve provision for disabled students, in line with the Disability Discrimination Act 1995 and its extension in the Special Educational Needs and Disability Act 2001. See http://www.hefce.ac.uk/pubs/circlets/2004/cl02_04/

In addition, the Department has published guidance on the additional student support that students with disabilities are entitled to. This guidance ("Bridging the Gap; A guide to the Disabled Students Allowances (DSAs) in higher education") can be downloaded from http://www.dfes.gov.uk/studentsupport/students/stu_students_with_d.shtml.

A review of the administration of disabled students allowances was carried out by SKILL: the National Bureau for Students with Disabilities at the request of DfES. A summary of SKILL'S findings and recommendations can be found on the Department's website at http://www.dfes.gov.uk/studentsupport/dsa_.shtml

The Learning and Skills Council (LSC) published its Annual Equality and Diversity Report for 2002–03 in November 2003, including an assessment of progress in providing equal access to Further Education and adult learning for disabled people. This publication is available in electronic form on the LSC's website: www.lsc.gov.uk

Sure Start

Mr. Chris Smith: To ask the Secretary of State for Education and Skills how much funding has been made available to Sure Start projects in the London borough of Islington for each year since the inception of Sure Start; and what the projected funding for future years is. [184723]

Margaret Hodge: The London borough of Islington has six Sure Start local programmes, two Early Excellence Centres and eight Neighbourhood nurseries, the first of which was approved in October 2000. The revenue funding for these initiatives is shown in the following table:

Table 1

£

	Amount (Revenue)
2000/01	448,250
2001/02	894,900
2002/03	2,277,208
2003/04	4,030,346
2004/05	4,910,149
2005/06	5,227,097
Total	17,837,950

The total amount of capital allocated to the Sure Start initiatives in Islington is £7,587,100. In addition Islington has been allocated £1,033,126 revenue and £3,149,773 capital to develop children's centres over the period of 2004–06.

These figures do not include local authority funding for child care and nursery education allocated to Islington.

The Chancellor announced in the Spending Review that the Sure Start Unit will be allocated £1,167 million,

£1,483 million and £1,667 million for 2005/06, 2006/07 and 2007/08 respectively for England. At this stage it is not possible to say how much will be allocated to individual local authorities.

Out-of-city Schools

Alan Simpson: To ask the Secretary of State for Education and Skills how many Nottingham pupils have gone to out of city schools in the last academic year; (ii) what funding was transferred out of the city as a result; and (iii) how many pupils in each of the last three years have been returned to city schools during the course of the year. [184662]

Mr. Miliband: The information is as follows:

(i) The information requested is shown in the following table.

Number and proportion of LEA resident pupils in maintained primary[1] and secondary[1] schools educated in other LEAs and the number and proportion of non-residents educated in schools located within the LEA—January 2003

	Nottingham	
	Primary	*Secondary*
Number of pupils resident within the LEA	25,615	16,451
Number of resident pupils educated in other LEAs	1,365	3,659
Percentage of resident pupils educated in other LEAs[2]	5.3	22.2
Number of pupils educated within the LEA	25,538	13,937
Number of pupils educated in the LEA that are resident in another LEA	1,288	1,145
Percentage of pupils educated in the LEA that are resident in another LEA[3]	5	8.2

[1] Includes middle schools as deemed.
[2] Percentage reported is calculated as a percentage of resident pupils living within the LEA.
[3] Percentage reported is calculated as a percentage of school population attending schools within the LEA.
Source:
NPD 2003.

(ii) Local education authorities are funded for the pupils attending schools within their authority irrespective of the area of residence of the individual pupils (with the exception of SEN pupils where recoupment is arranged locally). Therefore there is no need for funding transfers in respect of cross border movements.

(iii) Data of this type are not currently available.

St. Helens Schools

Mr. Watts: To ask the Secretary of State for Education and Skills how many *(a)* head teachers, *(b)* teachers and *(c)* support workers were employed in St. Helens schools in each year from 1997 to 2004. [184621]

Mr. Miliband: The following table gives the full-time equivalent number of head teachers, all regular teachers and support staff employed in the maintained sector in St. Helens local education authority for each year between 1997 and 2003, the latest information available.

	Head teachers[1]	*All teachers*[2]	*Support staff*[3]
2003	78	1,630	800
2002	78	1,580	790
2001	75	1,570	680
2000	77	1,570	570
1999	81	1,570	530
1998	84	1,570	500
1997	83	1,590	480

[1] Source: Annual Survey of Teachers in Service 2001 to 2003 and Database of Teachers Records (DTR) 1997 to 2000. The DTR is maintained primarily for pensions purposes. The figures include all teachers who are being paid as head teachers.
[2] *Source:* Annual Survey of Teachers in Service
[3] *Source:* Annual School Census. Support staff include teaching assistants, administrative staff, technicians and other medical, child care and education support staff.

Mr. Watts: To ask the Secretary of State for Education and Skills what the average pay was for teachers in St. Helens in each year from 1997 to 2004. [184623]

Mr. Miliband: The following table shows the average salary of full-time regular qualified teachers in the maintained schools sector in England and Wales as at March of each year. The latest information available is for 2002.

As at March	£
2002	28,720
2001	27,200
2000	25,390
1999	24,440
1998	23,540
1997	22,900

Source:
The Database of Teacher Records. Figures cover all grades and include all allowances.

Mr. Watts: To ask the Secretary of State for Education and Skills (1) what major development and spending projects *(a)* have taken place since 1997 and *(b)* are planned to take place over the next two years in St. Helens; [184626]

(2) what the level of *(a)* capital and *(b)* revenue spend was in St. Helens primary schools in each year from 1997 to 2004. [184622]

Mr. Miliband: The bulk of capital funding is allocated to local education authorities (LEAs) and schools by formula so that they can decide their priorities for investment in line with locally decided asset management plans. We do not, therefore, hold detailed information about school building developments and projects that have taken place, or are planned.

The following table shows the capital allocations made to St. Helens LEA and all its schools, both primary and secondary, from 1996–97 to 2003–04.

Capital allocations to St. Helens and its schools

	Allocation (£000)
1996–97	2,286
1997–98	1,818
1998–99	3,244
1999–2000	3,802
2000–01	6,603
2001–02	5,562
2002–03	10,234
2003–04	7,152

For revenue spend in primary schools in St. Helens, the figures are as follows:

St. Helen's: Net institutional expenditure (NIE)[1] (cash terms)

£

	NIE (pre-primary and primary)[2]	*NIE (pre-primary)[2]*	*NIE (primary)[2]*
1996–97	29,540,000	—	—
1997–98	27,484,000	—	—
1998–99	29,286,000	—	—
1999–2000	33,966,565	514,585	33,451,980
2000–01	37,197,870	828,287	36,369,583
2001–02	39,765,740	1,174,816	38,590,924
2002–03[3]			39,865,585

[1] Net institutional expenditure (NIE) includes all school-recurrent funding, including teaching staff and non-teaching staff salaries, school premises costs, equipment and supplies. It takes account of unspent balances held by schools at the year end. It does not include the cost of school meals, home to school transport, LEA central administration or the financing costs of capital expenditure.

[2] Prior to 1999–2000 figures are drawn from the RO1 return which collected combined information for pre-primary and primary. In 2002–03 the structure of the form changed to collect in-school expenditure information from the primary, secondary and special sectors only.

[3] The outturn 2002–03 tables captured the data in a fundamentally different way to the previous years. Categories were aligned with the Consistent Financial Reporting framework and the spending by LEAs was no longer split by school sector. Consequently the expenditure reported in 2002–03 is not strictly comparable with earlier years.

Source:

The expenditure data prior to 1999–2000 is drawn from the annual 'RO1' spending returns which local authorities submitted to the Department of Environment, Transport and the Regions. From 1999–2000 onwards, data is taken from local education authorities' Section 52 Outturn Statements submitted to the DfES.

Employment Tribunals

Malcolm Bruce: To ask the Secretary of State for Education and Skills how many cases against his Department, the agencies for which it is responsible and its predecessor organisations have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent (A) settling and (B) contesting claims. [181473]

Mr. Charles Clarke: My Department is committed to embedding diversity and equality into its employment policies and practices.

The number of employment tribunal cases against my Department is set out as follows:

	Equal pay	*Sex discrimination*	*Race discrimination*	*Disability discrimination*	*Unfair dismissal*
2002		1	1	—	—
2003		—	1	[1]3	2
2004		3	—	1	1
Total		4	2	4	3

[1] Two cases included unfair dismissal.

Information before these years in the form requested is not held centrally and could be obtained only at disproportionate cost.

There were no awards made against my Department during the years quoted, however, applicants did receive out of court settlements totalling £26,356. The cost for contesting claims during the years quoted totalled just over £99,500.

Fair Admissions Taskforce

Mr. Hoban: To ask the Secretary of State for Education and Skills what the cost of recruitment of the Head of the Fair Admissions Taskforce was; and what his *(a)* salary and *(b)* other employment costs for the next three years are estimated to be. [184321]

Mr. Charles Clarke *[holding answer 15 July 2004]*: Professor Schwartz receives no remuneration as Chair of the Admissions to Higher Education Review, other than expenses. There were no costs of recruitment.

As Vice-Chancellor of Brunel University, Professor Schwartz's salary is a matter for Brunel University. All Vice-Chancellors' salaries are in the public domain, and the THES of 20 February 2004 listed his pay for the year 2002–03 as £174,000.

Fieldwork

Mr. Collins: To ask the Secretary of State for Education and Skills (1) what assessment he has made of a possible link between falling numbers of science graduates and the availability of fieldwork and out-of-classroom activity in schools; and if he will make a statement; [183157]

(2) if he will make fieldwork and out-of-classroom learning part of the core science curriculum; what assessment he has made of the obstacles to biology fieldwork; and if he will make a statement; [183158]

(3) what assessment he has made of the benefits of fieldwork and out-of-classroom activity in developing practical skills for use *(a)* at undergraduate level, *(b)* at postgraduate level and *(c)* in employment; and if he will make a statement. [183159]

Mr. Ivan Lewis: No assessment has been made of the impact that the availability of fieldwork in school science has on science graduate numbers. We will set out measures to increase the number of students studying the physical sciences and engineering through the Government's 10 year investment framework for science and innovation, published alongside the 2004 spending review.

Out of classroom learning is already a statutory requirement in National Curriculum Geography and we will continue to encourage schools to provide fieldwork opportunities in science. We are developing training and guidance for science teachers in fieldwork, including risk assessment, through our new network of Science Learning Centres.

The Field Studies Council's recent 'Review of Outdoor Learning', which the Department part funded, pointed to the potential learning, attitudinal, interpersonal and social outcomes of fieldwork and out of classroom activity such as leadership, team working, enquiry and self-reliance.

Formula Spending Share

Michael Fabricant: To ask the Secretary of State for Education and Skills what the average *(a)* primary formula spending share per pupil and *(b)* secondary formula spending share per pupil is for each local education authority for 2005–06 listed in descending order of secondary formula spending share. [184955]

Mr. Miliband: Figures for 2005–06 will not be available until the provisional Local Government Finance Settlement is announced in the autumn.

Foundation Schools

Glenda Jackson: To ask the Secretary of State for Education and Skills with whom a school must consult should it wish to adopt foundation status; and how such consultations are funded. [184704]

Mr. Miliband: The Secretary of State's statutory guidance currently says that those bringing forward proposals for a change in the category of a school should consult all interested parties. These include:

any local education authority likely to be affected by the proposals;

other schools in the area;

parents and teachers in the area who may be affected by the proposals;

if proposals involve, or are likely to affect, a school which has a particular religious foundation, the appropriate religious body;

if the proposals affect the provision of full-time 16–19 education, the Learning and Skills Council.

Funding of consultations is the responsibility of those bringing forward the proposals.

The Five Year Strategy document proposes a simpler and quicker procedure for schools to change category. We intend that the new procedures should retain a requirement for consultation.

Free School Transport

Brian Cotter: To ask the Secretary of State for Education and Skills how many children in Weston-Super-Mare constituency he estimates would lose the right to free school transport under the proposals contained in the Draft School Transport Bill. [183819]

Mr. Charles Clarke: This would be a matter for the LEA. The School transport Bill (which has been published for prelegislative scrutiny) allows local education authorities to apply to the Secretary of State to run pilot schemes which will cater for ALL pupils, not just those currently qualifying for free school transport. Pilot authorities may charge for transport, except for pupils eligible for free school meals, but charges must be set at a level that does not encourage car use and caters for the needs of large and low income families.

The Local Government Association, the Audit Commission and the Social Exclusion Unit have all asked us to trial alternatives to the current regime. No authority will be forced to run a trial, and we have no plans to require all authorities to change their existing arrangements.

Higher Education

Chris Grayling: To ask the Secretary of State for Education and Skills what proportion of higher education students studied *(a)* physical sciences, *(b)* medicine, *(c)* dentistry, *(d)* engineering and technology and *(e)* architecture, building and planning in (i) 1996–97 and (ii) 2002–03. [183268]

Alan Johnson: The available information is given in the table. A new method of allocating students to subject groups was introduced in 2002/03, the effect of which was to decrease the number of students in the 'combined' category and increase those who were allocated to specific subjects. This means that the figures for 2002/03 are not directly comparable with those for earlier years so the comparisons in the table have been made with 2001/02 instead.

Proportion of all HE Enrolments at UK HEIs studying specific subjects

Percentage

Subject group	1996/97	2001/02	2002/03
Physical Sciences	4.1	3.2	3.3
Pre-clinical/Clinical Medicine	1.9	2.0	2.0
Pre-clinical/Clinical Dentistry	0.3	0.3	0.3
Engineering and Technology	7.5	6.4	6.0
Architecture, Building and Planning	2.7	2.2	2.1

Source:
Higher Education Statistics Agency (HESA)

Chris Grayling: To ask the Secretary of State for Education and Skills in which academic areas the percentage of higher education students studying a particular subject has fallen since 1997; and by what amounts. [183312]

Alan Johnson: The available information is given in the table. A new method of allocating students to subject groups was introduced in 2002/03, the effect of which was to decrease the number of students in the 'combined' category and increase those who were allocated to specific subjects. This means that the figures for 2002/03 are not directly comparable with those for earlier years so the comparisons in the table have been made with 2001/02 instead.

Distribution of higher education students at UK HE institutions by subject of study

Subject	Percentage of all HE enrolments		
	1997/98	2001/02	Change
Medicine and Dentistry	2.2	2.3	0.0
Subjects Allied to Medicine	9.2	11.0	1.7
Biological Sciences	4.8	4.6	-0.2
Veterinary Science	0.2	0.2	0.0
Agriculture and Related Subjects	0.8	0.8	-0.0

Distribution of higher education students at UK HE institutions by subject of study

Subject	Percentage of all HE enrolments 1997/98	2001/02	Change
Physical Sciences	3.9	3.2	-0.7
Mathematical Sciences	1.1	1.1	0.0
Computer Science	4.3	5.7	1.4
Engineering and Technology	7.1	6.4	-0.8
Architecture, Building and Planning	2.5	2.2	-0.3
Social, Economic and Political Science	7.2	7.0	-0.2
Law	3.2	3.2	0.0
Business and Administrative Studies	12.4	11.7	-0.7
Librarianship and Information Science	—	—	—
Languages	5.1	4.7	-0.4
Humanities	3.4	3.2	-0.2
Creative Arts and Design	5.3	5.7	0.4
Education	7.5	7.4	-0.1
Combined	18.5	18.2	-0.3
Total	100.0	100.0	n/a

n/a = Not applicable.

Higher Education Statistics Agency.

London Admissions System

Glenda Jackson: To ask the Secretary of State for Education and Skills if he will set out details of the London admissions system referred to in page 52 of his five year strategy for children and learners. [184703]

Mr. Miliband: The London Schools Admissions System (LSAS) has been developed by the Local Education Authorities (LEAs) in London to create an infrastructure which will simplify the secondary school admissions process for London parents. From September 2005, all 33 London boroughs and eight adjoining LEAs will co-operate to process applications for secondary schools. Parents will be able to apply for up to six maintained secondary schools on a single application form. Individual admission authorities will continue to consider applications under their published arrangements, but where an applicant is eligible for a place at more than one school the LSAS will offer the applicant the available school ranked highest on their application form. This will ensure that no child gets more than one offer and that more children are offered a school place on the national offer date of 1 March. We are confident that because fewer children will be left with no offer of a school place, the LSAS will help to reduce the anxiety and frustration which many parents, pupils and schools feel under the current application system.

Means-tested Benefits

Mr. Viggers: To ask the Secretary of State for Education and Skills if he will list the means-tested benefits available through his Department and the agencies for which it is responsible *(a)* in May 1997 and *(b)* now. [182594]

Mr. Charles Clarke: The following table sets out means-tested benefits that applied on May 1997 and those that apply in July 2004. Further changes will be implemented for the 2004/05 academic year as a result of the Higher Education Act.

	May 1997	July 2004
Higher Education		
Full-time students	Student grant (mandatory awards from LEAs). Grants for dependants—adults and children. Travelling expenses. Disabled students allowances. Discretionary access funds.	Grants for fees. Grants for dependants—adults and children. Travel grant. Student loan (25 per cent. means-tested). Discretionary hardship fund. Hardship loan.
Part-time Students	No means-tested benefits available.	Part-time student loan.
Further Education	Learner support funds.	Learner support funds. Education maintenance allowance. Adult learning grants.
School Age	Free school meals. Free school milk. Remission of charges for the cost of board and lodging while attending residential school trips.	Free school meals. Free school milk. Remission of charges for the cost of board and lodging while attending residential school trips.

Non-departmental Public Bodies

Mr. Stephen O'Brien: To ask the Secretary of State for Education and Skills how many non-departmental public bodies for which his Department is responsible have been *(a)* established and *(b)* abolished since 1997. [182942]

Mr. Charles Clarke: Since 1997,14 Executive, Advisory and Tribunal NDPBs have been established, 11 have been abolished and one ceased to be an NDPB and was de-classified as an NDPB.

Pupil Funding (Harwich)

Mr. Ivan Henderson: To ask the Secretary of State for Education and Skills how much funding per pupil was spent in the Harwich constituency in each year since 1997. [184997]

Mr. Miliband: The information requested is submitted to the Department according to local education authority areas rather than constituency level. The figures provided are for Essex LEA and are shown in the following table.

Net current expenditure (after recharges) per pupil—Cash terms

	Total
1997–98	2,410
1998–99	2,640
1999–00	2,650
2000–01	2,880
2001–02	3,200
2002–03	*3,410*

Notes:

1. The financial data are taken from Essex LEAs' Section 52 Outturn Statement submitted to the DfES from 1999–2000 onwards and the ODPM's RO1 statement previously. 2002–03 data are subject to change by the LEA. Section 52 is collected at local authority level, not constituency level, so the figures provided are for Essex LEA. 1997–98 figures are for Essex LEA prior to local government reorganisation. From 1998–99 onwards parts of Essex LEA became Southend and Thurrock LEAs. 1999–2000 figures reflect the return of GM schools to local authority maintenance.
2. The outturn 2002–03 tables captured the data in a fundamentally different way to the previous years. Categories were aligned with the Consistent Financial Reporting framework and the spending by LEAs was no longer split by school sector. This change in calculation is identified by the use of italics. The 2002–03 figure is calculated by taking all the LEA expenditure, excluding CERA and Youth and Community, and dividing it by the FTE pupil numbers in maintained pre-primary, primary, secondary and special schools.
3. The figures shown are calculated by dividing the LEA expenditure by the number of pupils in maintained establishments. Essex has a large proportion of its pre-primary pupils educated outside mainstream establishments. If these are taken into account then the unit cost in 2001–02 reduces to approximately £3,110 and in 2002–03 to £3,300.
4. Net current expenditure (NCE) includes expenditure within schools and also that incurred centrally by the LEA.
5. Pupil data are drawn from the Annual Schools Census adjusted to be on a financial year basis. Figures are rounded to the nearest £10.

School Halls (East Sussex)

Charles Hendry: To ask the Secretary of State for Education and Skills how many new school halls have been approved for primary schools in East Sussex in each of the last 10 years; and how many applications for new school halls for primary schools in East Sussex have been rejected in each of the last 10 years. [185071]

Mr. Miliband: We do not hold the information requested. The majority of capital support is allocated to schools and local education authorities by formula, and they decide how to invest it in line with their asset management plans.

In 2001–02 there were five projects in East Sussex awarded funding under the Spaces for Sports and Arts programme operated by Sport England. This programme was intended to increase community and curricula use in primary schools.

School Leaving Age

Mr. Rosindell: To ask the Secretary of State for Education and Skills what the average age of school leavers in *(a)* Great Britain and *(b)* Havering was in (i) 1999, (ii) 2001 and (iii) 2003. [184252]

Mr. Miliband: The data are not collected centrally. In England, a pupil ceases to be of compulsory school age on the last Friday in June in the school year in which he reaches the age of sixteen. This means that pupils will be aged between around sixteen years and ten months and fifteen years and ten months when they leave school.

School Workload Agreement

Alan Simpson: To ask the Secretary of State for Education and Skills (1) what assessment he has made of the number of schools that will be able to fund the implementation of the School Workload Agreement in 2005–06 and 2006–07; [184660]

(2) what options head teachers can follow in order to release funds to implement the requirements of the schools remodelling agreement; [184658]

(3) what mechanisms are in place to ensure the successful implementation of the School Workforce Agreement in all schools for 2005–06; [184659]

(4) what assessment he has made of the impact of reductions in numbers of teachers and teaching assistants on the introduction of planning, preparation and assessment time for all teachers. [184661]

Mr. Miliband: I refer the hon. Member to the written statement I laid before the House on Tuesday 3 July on school funding for 2005–06, *Official Report*, column 55WS. On the same day there was also a press notice issued by the Department (DfES press notice 2004/0137) which included a statement welcoming the school funding settlement by the Workforce Agreement Monitoring Group (made up of the majority of the school workforce unions and other partners).

The written statement to the House sets out how we have considered, with our partner signatories, the costs of implementation of the National Agreement. It announces what funds will be available to schools to implement the Agreement in 2005–06.

From 2006 we will provide guaranteed three-year budgets for every school, which will give head teachers and governors unprecedented financial security and confidence, and the ability to plan for the future.

Practical advice and support is available to assist successful implementation at school level, from the national network of LEA remodelling advisers and from the National Remodelling Team—NRT (part of National College for School Leadership). The NRT website, www.remodelling.org, contains a range of strategies and models based on real school level case studies on managing in the changes and will include shortly, a toolkit and resources pack specifically on guaranteeing planning, preparation and assessment time for teachers.

In addition, from September, up to 10,000 schools will have access to workshops and consultancy as part of the second year of the Financial Management in Schools programme. This builds on the first year of this programme which saw thousands of schools benefit from the programme.

We will continue to monitor trends in the schools workforce through the Annual Schools Census each January. There are now 427,800 full-time equivalent teachers—28,600 more than in 1997 and the highest number since 1981—and the number of support staff has increased to 241,700, having more than doubled since 1997. These figures illustrate the trend of the significant increases in teachers and support staff since 1997. The next School Workforce Volume will be available in the autumn.

Schools (Foundation Status)

Glenda Jackson: To ask the Secretary of State for Education and Skills whether there will be an appeals system *(a)* against a school's decision to apply for and *(b)* against a decision to grant a school foundation status. [184890]

Mr. Miliband: The decision on whether to proceed to and adopt Foundation status will be for the governing body of a school alone, though they will be obliged to publish proposal of their intention to make the change of status.

Glenda Jackson: To ask the Secretary of State for Education and Skills whether the enablement of a foundation school to appoint a majority of governors from *(a)* a charitable foundation and *(b)* a faith sponsor referred to in chapter 4, page 49 of his five-year strategy for children and learners will be subject to (i) consultation with and (ii) the agreement of all parents in the locality. [184891]

Mr. Miliband: We shall be consulting in due course on the proposals for foundation schools set out in the Department's five-year strategy. At that point we will set out in more detail our plans for ensuring that stakeholders, including local parents, are consulted and have the opportunity to make representations about proposed changes to the constitution of schools.

Solvent Abuse

Mr. Gray: To ask the Secretary of State for Education and Skills what funding the Government have provided for education on solvent abuse in each of the last five years; and if he will make a statement. [184579]

Mr. Stephen Twigg: The funding that the Department has allocated to local education authorities to support drug education and prevention in all schools in England since 1999 is provided in the table. This would include education about the effects of solvents; a statutory requirement of the National Curriculum. We have not directed the proportion of this funding that should be spent on education about solvent abuse.

£ million

	Funding
1999–2000	7.4
2000–01	[1]7.4
2001–02	13.1
2002–03	15.2
2003–04	14.3
Total	57.4

[1] Allocated as part of social inclusion grant

Since April 2004, the level of support for drug education in schools is for local education authorities and schools to decide.

"Drugs: Guidance to Schools" issued by DfES to all schools this year made clear that volatile substance abuse should be addressed at an early stage in the curriculum. We are also supporting teachers' professional development through the PSHE certification programme which will support teaching of drug education, including volatile substance abuse, in schools. 3,000 teachers are set the benefit this year.

The Department of Health is leading the development of a strategy for volatile substance abuse which will include measurable and achievable targets.

Specialist Schools

Glenda Jackson: To ask the Secretary of State for Education and Skills whether a specialist school, applying for an additional specialism, will be required to undergo all the procedures inherent in its original application for specialist status. [184702]

Mr. Miliband: As set out in the Department's Five Year Strategy, the opportunity to develop a second specialism will be offered at re-designation (when specialist schools apply to retain the status for a further four year phase). This year, schools qualifying for the simplified re-designation procedure will be eligible. In recognition of what these schools have already achieved, on both exam performance and value added bases, the application process will be light touch—with short guidance asking for summary plans to be annexed to the main re-designation application. This light touch approach reflects wider policy moves towards a new relationship with schools. Applicants will also need to consult their LEAs, the Specialist Schools Trust and the Youth Sport Trust, including to ensure their choice of second specialism enhances the existing local specialist balance.

Students (Means-Testing)

Chris Grayling: To ask the Secretary of State for Education and Skills what effect university bursaries and grants will have on students in receipt of means-tested bursaries from 2006. [184878]

Alan Johnson: Bursaries are not treated as part of taxable income and so are not taken into account in the Government means test that determines entitlement to our grants.

Teachers' Salaries

Mr. Collins: To ask the Secretary of State for Education and Skills what his Department estimates to be the average salary cost in 2004 to *(a)* schools, *(b)* his Department and *(c)* local education authorities of (i) a newly qualified teacher, (ii) a teacher with five years' experience in teaching and (iii) a teacher nearing retirement. [183156]

Mr. Miliband: The salary costs of the majority of teachers in schools are met by school budgets. There are no additional costs to local authorities. The Department for Education and Skills provides special grants to meet the cost of teachers who pass the performance threshold and contributes to the cost of performance pay awards. In the financial year 2001/02 the performance threshold grant totalled £436,703, 000 and the performance pay grant totalled £19,887,000.

At 31 March 2002, the latest information available, the average salary of a newly qualified full-time entrant to the maintained school sector in England and Wales was £17,870. The salary for full-time qualified teachers with five years service was £25,310 and for full-time qualified teachers aged 55 to £59, 32,890. These figures are for all grades and include all allowances. Employer national insurance and pension contributions are excluded: for the average salaries above the contribution rates are 13.9 per cent. for new entrants, 14.6 per cent. for those with five years experience and 15.3 per cent. for those aged 55 to 59. The normal age for the retirement of teachers is 60.

This information is based on data from the Database of Teachers Records which is maintained primarily for pensions purposes.

University Attendance (Havering)

Mr. Rosindell: To ask the Secretary of State for Education and Skills what percentage of 18 year olds *(a)* in Great Britain and *(b)* from Havering chose to go to university in (i) 1997, (ii) 1999, (iii) 2001 and (iv) 2003. [184251]

Alan Johnson: The available information is taken from the Universities and Colleges Admissions service (UCAS) and covers 18 year old, English domiciled applicants accepted through UCAS to full time first degree and HMD courses. Figures are given in the table.

Percentage of 18 year olds accepted through UCAS to HE courses

Year of Entry	*Havering LEA*	*England*
1997	16.2	20.5
1999	16.9	20.0
2001	19.0	21.5
2003	16.8	21.4

University Entrants

Mr. Flook: To ask the Secretary of State for Education and Skills what percentage of 18 year olds in *(a)* England and *(b)* Somerset chose to go to university in (i) 1997, (ii) 2001 and (iii) 2003. [184642]

Alan Johnson: The available information is taken from the Universities and Colleges Admissions service (UCAS) and covers 18 year old, English domiciled applicants accepted through UCAS to full time first degree and HND courses. Figures are given in the table.

Percentage of 18 year olds accepted through UCAS to HE courses

Year of Entry	*Somerset LEA*	*England*
1997	21.6	20.5
2001	21.4	21.5
2003	19.9	21.4

NORTHERN IRELAND

Athletics Tracks

Lady Hermon: To ask the Secretary of State for Northern Ireland what plans the Government have to develop an eight lane athletics track for international athletics meetings in Northern Ireland. [182617]

Angela Smith: Northern Ireland currently has three eight lane athletics tracks with facilities of the standard required to hold minor international athletic events. These are at Antrim Stadium, Ballykillaire Sports Centre in Bangor and Templemore Stadium in Londonderry. However, the facilities at these venues are not of a standard which would allow major international athletic events to be hosted.

Provision for an eight lane athletics track for major international athletic meetings in Northern Ireland is a matter in the first instance for the Governing body of athletics in Northern Ireland, the Northern Ireland Athletics Federation. To date I have received no proposals from them for such a facility.

Care Homes (South Down)

Mr. McGrady: To ask the Secretary of State for Northern Ireland (1) what action will be taken to resolve the shortage of home care staff in the South Down area; [183058]

(2) if he will make a statement on the shortage in home care staff in the South Down area. [183064]

Angela Smith: The Department of Health, Social Services and Public Safety (DHSSPS) recognises the recruitment and retention difficulties faced by domiciliary care providers, not only in the South Down area but across the region as a whole. Research has been commissioned, which includes exploring with Health and Social Services Trusts and independent domiciliary care providers, the key issues affecting their ability to commission or deliver such services in the future. The outcome of this research will help to inform decisions on future funding for domiciliary care services.

DHSSPS is committed to securing additional resources for community care services. This year I have allocated an additional £4 million for community care,

which will include domiciliary care. These funds have been allocated to boards on the basis of their capitation shares of overall resources.

Chlamydia

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will establish a chlamydia screening programme in Northern Ireland. [183028]

Angela Smith: The Department is in the process of establishing a Working Group to consider the evidence and the feasibility of introducing a Chlamydia screening programme in Northern Ireland.

Civil Servants (Industrial Action)

Mr. Lidington: To ask the Secretary of State for Northern Ireland if he will make a statement on the impact of the current industrial action of civil servants on the payment of rates. [180791]

Mr. Pearson: While the ongoing industrial action is causing some disruption to services the Rates Collection Agency has deployed contingency measures and performance at the end of May 2004 was on a par with that at the end of May 2003.

Diabetic Retinopathy Screening

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what funding has been made available in the last year to roll-out a regional diabetic retinopathy screening programme in Northern Ireland; and *(a)* how and *(b)* where this funding has been spent. [183451]

Angela Smith: In the financial year 2003–04 £175,000 was allocated to the four Health and Social Services Boards, on a capitation basis, to begin the development of a regional diabetic retinopathy screening programme. This year (2004–05) £300,000 has been provided to the boards towards the extension of the programme. These resources will allow the boards to commence recruitment and training of staff for photography and grading, and certain aspects of IT. £100,000 has been set aside to support the development of central elements of the programme including a regional co-ordinator, clerical support, and a quality assurance framework. A further £300,000 capital funding is available this year for the purchase of essential equipment.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what the implementation strategy is for rolling out regional diabetic retinopathy screening in Northern Ireland; and what the *(a)* timescales and *(b)* targets for the future roll-out are. [183452]

Angela Smith: Introduction of a comprehensive regional diabetic retinopathy screening programme with its different methodologies and complex IT and operational aspects is expected to take a number of years. Boards are developing local implementation plans which take account of local needs and existing arrangements. They are being guided by the Department's Diabetic Retinopathy Screening Working Group. The aim is to screen around 20,000 people with diabetes in the current year, subject to recruitment of appropriate staff.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland what the progress is of the Regional Diabetic Retinopathy Steering Group since January in taking forward the proposals outlined in the Report of the Working Group to the Chief Medical Officer, October 2002, entitled Proposal for the Introduction of a Comprehensive Diabetic Retinopathy Screening Programme in Northern Ireland. [183453]

Angela Smith: Following the Report of the Working Group, money was made available in April 2003 to develop diabetic retinopathy screening. Since then the Department's Diabetic Retinopathy Working Group has been overseeing developmental work required for the extension of the Diabetic Retinopathy Screening Programme. This includes work with Health Board staff, and other health professionals involved in screening, in progressing local implementation plans. Work is also on-going on issues including regional co-ordination, a quality assurance framework, datasets and IT support. The capacity of the treatment services is also being assessed.

Drugs

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what his Department is doing to limit mortality and morbidity from adverse drug reactions in Northern Ireland. [183415]

Angela Smith: The Department of Health, Social Services and Public Safety is actively supporting the introduction of medicines management services in Northern Ireland. These are specifically targeted to reduce morbidity and mortality associated with medicine use. Such services include prescribing support, medication review, managing your medicines schemes, repeat dispensing, patient education and interface management between primary and secondary care.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will provide mainstream funding for the Stopping Them Starting drugs prevention campaign through education projects in primary schools. [184063]

Mr. Gardiner: The Department for Education does not directly fund or prescribe the use of any particular programmes or materials that schools should use. It is entirely a matter for individual schools to select the resources and materials they consider necessary to deliver the curriculum, including drugs education.

Education Budget

David Burnside: To ask the Secretary of State for Northern Ireland (1) how much of the projected budget for schools in 2005–06 will go to *(a)* primary and *(b)* secondary education; [184214]

(2) what special funding has been allocated to schools in socially deprived areas in the 2005–06 budget. [184294]

Mr. Gardiner: Specific budgets for the 2005–06 financial year will be determined in light of the outcome of the Budget 2004 Spending Review.

David Burnside: To ask the Secretary of State for Northern Ireland what additional funding for education in Northern Ireland was received from the Exchequer following the Chancellor's funding statement in March. [184216]

Mr. Gardiner: The Chancellor of the Exchequer's statement provided for increased allocations for the Department for Education and Skills in 2006–07 and 2007–08. Northern Ireland received a proportion of these increases but, under the standard funding arrangements, such additions are not hypothecated as the allocation of the overall Northern Ireland budget is a matter for local decision.

Equality Commission

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how much has been paid in legal aid for cases supported by the Equality Commission in the last three years. [171541]

Mr. Spellar: The Equality Commission for Northern Ireland (ECNI) is not responsible for legal aid but does support a range of discrimination cases of strategic value through its legal and financial resources. ECNI's published Annual Reports and Accounts for 2000–01, 2001–02 and 2002–03 report spending on legal cases supported by the Commission as:

	£
2000–01	653,890
2001–02	1,046,561
2002–03	2,750,825

As stated in the Audited Accounts, the total for 2002–03 includes a contingent liability of legal fees of £605,000 anticipated over the next three years in respect of 287 closed cases.

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many cases the Equality Commission has supported in the last three years, broken down by *(a)* gender, *(b)* disability and *(c)* religion; and how many succeeded. [171542]

Mr. Spellar: The information requested is as follows.

Area	*2000–01*	*2001–02*	*2002–03*
Gender	141	160	52
Disability	68	112	43
Religion/Political Opinion	142	289	37

Applications Granted Assistance 2000–01 to 2002–03

On the basis of information supplied by the Equality Commission, in the same period the following numbers of cases were either settled or heard and upheld[1].

[1] The year in which applications were granted support and the year when settlements or hearings were completed are unlikely to be the same.

	Number of cases
2000–01	108
2001–02	124
2002–03	196

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many cases are before the Equality Commission; and how long each has been awaiting a decision. [171543]

Mr. Spellar: There are currently 176 applications for assistance being considered by the Equality Commission of which 120 have been received within the past four months and 56, four months or more.

The target processing period is four months and a number of those applications currently requiring longer are dependent on responses from respondents.

Foster Carers

Rev. Martin Smyth: To ask the Secretary of State for Northern Ireland how many foster carers in each health trust area in Northern Ireland receive fee pay for children in their care; what the average amount of money paid to foster carers for fee pay is; and whether the criteria for fee paying to foster carers is the same in each health trust area in Northern Ireland. [183489]

Angela Smith: The number of foster carers in receipt of fee pay in each Health and Social Services Trust area in Northern Ireland as of quarter ending 31st March 2004 is as follows:

Health and Social Services Trust	*Number of Fee Paid Foster Carers*
Armagh and Dungannon HSS Trust	7
Causeway HSS Trust	6
Craigavon and Banbridge HSS Trust	3
Down Lisbum HSS Trust	28
Foyle HSS Trust	11
Homefirst HSS Trust	23
Newry and Moume HSS Trust	2
North and West Belfast HSS Trust	50
South and East Belfast HSS Trust	78
Sperrin Lakeland HSS Trust	5
Ulster Community Hospitals HSS Trust	20

The average amount of money paid to foster carers for fee pay and the criteria for fee paying to foster carers in Northern Ireland is not centrally available.

Genitourinary Medicine

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what plans he has to increase the number of hospital sites offering genitourinary medicine outpost clinics. [183416]

Angela Smith: The Department recently consulted on "A Five Year Sexual Health Promotion Strategy and Action Plan". Rather than increasing the number of hospital sites that currently offer genitourinary medicine services, the strategy recommended that a more holistic approach should be adopted. Many people wish to access the wide range of sexual health services in one setting, and for some this will be a community setting such as a GP surgery. The Department is currently considering the results of the consultation exercise and in October will host a major conference on sexually transmitted infections and sexual health services.

Health Service Projects

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will list the health service projects funded fully or partly by private finance initiatives. [166698]

Angela Smith: The following projects are fully funded by Private Finance Initiative:

Commissioning Body	*Project Title*
Royal Group of Hospitals and Dental Hospital HSS Trust	Car Parking
Homefirst Community HSS Trust	Holywell Hospital Energy Management System
Craigavon Area Hospital HSS Trust	Energy Management System
Belfast City Hospital HSS Trust	Renal Unit
Health and Personal Social Services (HPSS)	Regional Clinical Waste Disposal Facilities
United Hospitals HSS Trust	Antrim Hospital Renal Unit
Royal Group of Hospitals and Dental Hospital HSS Trust and Belfast City Hospital HSS Trust	Link Laboratories
Various HSS Trusts/Boards	All Equipment Leases
Belfast City Hospital HSS Trust	Cancer Centre Equipment

The 'Equipment Leases' project consists of a variety of 46 leases. The major leases are:

Commissioning Body	*Lease*
Royal Group of Hospitals and Dental Hospital HSS Trust	Anaesthetics, Theatres and Intensive Care Services
Royal Group of Hospitals and Dental Hospital HSS Trust	Fractures/Accident and Emergency Centralisation
Royal Group of Hospitals and Dental Hospital HSS Trust	Redevelopment Scheme
Causeway Hospital HSS Trust	PACS X-Ray Equipment

There are no projects that have been partly funded by PFI.

Housing Executive

Mr. Beggs: To ask the Secretary of State for Northern Ireland how many Northern Ireland Housing Executive properties were sold in each of the past five years to tenants who were *(a)* in full receipt of housing benefit, *(b)* in partial receipt of housing benefit and *(c)* not in receipt of housing benefit. [183508]

Mr. Spellar: Historical information is not readily available in the form requested. However, since the Northern Ireland Housing Executive began to collect this information in July 2003, the figures are as follows:

Of a total of 4,752 house sales:

1,823 applicants were in receipt of full housing benefit

492 were in receipt of partial housing benefit

2,437 were not in receipt of housing benefit.

Mr. Beggs: To ask the Secretary of State for Northern Ireland how many Northern Ireland Housing Executive properties have been sold in each year since 1998 to joint tenancy of more than two joint tenants. [183509]

Mr. Spellar: This information is not available.

Mr. Beggs: To ask the Secretary of State for Northern Ireland how many Northern Ireland Housing Executive properties have been bought by their occupiers with a discount. [183510]

Mr. Spellar: The information requested is not readily available. However, the Housing Executive estimates that approximately 97 per cent. of the 109,245 houses sold from the introduction of the house sales scheme in March 1981 would have been sold with a discount.

Mr. McGrady: To ask the Secretary of State for Northern Ireland what action will be taken to resolve the problem of waiting times for Housing Executive grant assessments. [183059]

Mr. Spellar: Preliminary work has been undertaken on the 'Modernising the Private Sector Improvement Services' project, the main aim of which is to streamline the grants process and make the process easier for applicants. Detailed work is planned to start as soon as possible following the approval of the Housing Executive's overall Modernising Services Business Plan. This is expected to take place within the next few months and it is anticipated the Grants Project will be complete two years after that.

In the meantime, work is continuing on streamlining procedures particularly in relation to Disabled Facilities Grants. In addition the Grants Service is engaged in a Charter Mark strategy with the aim of having all Grants Offices meeting the standard by early 2006. This follows the success of the Craigavon office in achieving a Charter Mark in 2003.

Mr. McGrady: To ask the Secretary of State for Northern Ireland if he will give details of the weaknesses identified in the Auditor General's Report, NIA 41/03, HC 673 on the financial control and monitoring of grants paid to registered housing associations. [183061]

Mr. Spellar: In summary, the Auditor General's report identified weaknesses relating mainly to certifications submitted by Housing Associations, procedural issues, supporting evidence, control and monitoring arrangements by both the Department and Housing Associations.

The Report however also acknowledged the work that had been and was being done to address these issues.

The Department for Social Development is continuing to implement the full range of measures agreed with the Auditor General.

Full details of the Auditor General's findings are contained in his Report which was laid before Parliament in November last year and a copy of which is available in the Library.

MOT Certificates

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland whether cars registered in Northern Ireland but whose MOT vehicle test certificate has expired due to industrial action by Civil Servants in Northern Ireland will be exempt from prosecution whilst travelling in England; and if he will make a statement. [184761]

Angela Smith: The Driver and Vehicle Testing Agency (DVTA), which is responsible for vehicle testing, has been keeping in contact with the Police Service of Northern Ireland (PSNI) regarding the legal obligations for motorists during the current period of industrial action.

The PSNI has advised that it will not prosecute a motorist whose MOT certificate has expired provided they have evidence to show that they have maintained their vehicle in a roadworthy condition and have applied to the DVTA for a vehicle test. The PSNI remind motorists of the need to keep their vehicles in a roadworthy condition at all times and have indicated that they may prosecute in cases where this has not been done. However, all relevant circumstances will be taken into account before deciding whether to prosecute.

Police forces throughout GB are being kept informed of the situation in NI, and it is expected that they will adopt a similar approach.

A vehicle does not require a certificate when it is being driven to an MOT centre for a pre-arranged test.

In the meantime the legislative process is now under way to provide temporary exemption for cars and motorcycles to allow these vehicles to be taxed and registered in Northern Ireland and to be driven legally anywhere in the United Kingdom. It is anticipated that certificates of temporary exemption, valid for up to six months, will be available from mid August 2004.

Museums and Heritage Review

Mr. McGrady: To ask the Secretary of State for Northern Ireland what progress has been made on the recommendations contained in the Northern Ireland Museums and Heritage Review. [183065]

Angela Smith: Since the publication of the Joint Departmental Response to the Local Museum and Heritage Review there have been three liaison meetings between representatives of DCAL and EHS, as recommended in the Response. A Heritage Sub-Group of the Cultural Forum was formed in December 2003 to take forward the recommendations of the Review and there have been three meetings held to date. The Sub-Group is currently working its way through the recommendations and has agreed to hold a planning day, focusing on the priorities and outcomes required, in the autumn. In addition, work is ongoing to develop a comprehensive statistical picture of the sector.

Nexus Institute

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland how much funding has been provided to the Nexus Institute in each of the last 10 years. [183024]

Angela Smith: A full and complete breakdown of all sources of funding (for example, funding from individual Health and Social Services Boards and Trusts and Education and Library Boards) over the period of 10 years, could be obtained only at disproportionate cost. However, the Department of Health, Social Services and Public Safety has awarded the Nexus Institute recurrent core funding in the support of central administration costs over the last 10 years. This is shown in the following table:

	£
1994–95	34,556
1995–96	50,668
1996–97	52,000
1997–98	52,304
1998–99	55,794
1999–2000	57,244
2000–01	58,672
2001–02	60,140
2002–03	61,644
2003–04	64,085

In addition, the organisation has been awarded several one off payments to assist in the purchase of office equipment, development of business plans and conference expenses etc. This amounts to £96,360.

In April 2002 the Department awarded the Nexus Institute a further £104,718 over a three year period, towards a Double Trauma project assisting those affected by sexual abuse.

The Northern Ireland Office began funding the Nexus Institute in August 2000 and the amounts of award are shown in the following table:

	£
2000–01	39,256
2001–02	56,830
2002–03	58,494
2003–04	65,290

Sexual Abuse Victims

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what assessment has been made of the *(a)* availability of services for and *(b)* level of need of victims of sexual abuse in Northern Ireland. [183016]

Angela Smith: No such assessment has been completed to date in relation to services provided directly, or funded by, HSS boards and trusts. However, key preliminary research to inform the development of a regional strategy to address sexual abuse is now under way. This will include compiling baseline information

on the current availability of services for victims and work on assessing the level of need. In co-operation with other Departments and agencies whose responsibilities also encompass matters relating to sexual abuse, it is the Department of Health, Social Service's and Public Safety's intention to develop and publish the draft strategy for consultation by late summer 2005. In terms of services provided by the PSNI, there are currently 11 Child Abuse and Rape Enquiry (CARE) units and four CARE suites. Each CARE unit is staffed by five to eight Detective Constables and one Detective Sergeant, with one Detective Inspector responsible for two to three CARE units.

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what research he has collated on the percentage of those with mental illness who report having suffered sexual abuse. [183025]

Angela Smith: The information requested is not available.

Terrorism Victims

Mr. Lidington: To ask the Secretary of State for Northern Ireland how much public money has been spent in each of the last five years on organisations to help the victims of terrorism in Northern Ireland. [166642]

Angela Smith: There is no definitive list of organisations that help the victims of terrorism in Northern Ireland. Any organisation may help victims of terrorism as part of its own aims and objectives.

The following table shows details of how much money has been spent by the 11 Northern Ireland Departments and Northern Ireland Office in each of the last five years on organisations whose primary aim is to help the victims of terrorism in Northern Ireland.

	Total (£)
1999–2000	2,777,939
2000–01	2,662,617
2001–02	3,035,359
2002–03	5,504,884
2003–04[1]	[1]5,691,585

[1] These figures are only provisional spending totals for the year, as final outturn figures for 2003–04 are not yet available.

Waiting Times

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland if he will estimate how many patients with trigeminal neuralgia are awaiting surgery at the Royal Victoria Hospital, Belfast. [182627]

Angela Smith: A total of seven patients with trigeminal neuralgia are currently waiting for surgery at the Royal Victoria hospital, Belfast.

HEALTH

Anti-cancer Drugs

Mr. Bailey: To ask the Secretary of State for Health (1) what assessment he has made of the take up of new anti-cancer drugs authorised by the National Institute for Clinical Excellence; [180496]

(2) what measures may be taken by the National Institute for Clinical Excellence to encourage a more uniform use of anti-cancer drugs across the country. [180497]

Ms Rosie Winterton: Last autumn, we asked Professor Mike Richards, the national cancer director, to report on the implementation of National Institute for Clinical Excellence (NICE) guidance on drugs for cancer.

Professor Richards' report was published on 14 June. It shows that NICE guidance has been effective in increasing the uptake of recommended new treatments and in reducing variations. Nevertheless, the report finds that there are still unacceptable variations in uptake. The reasons are complex but do not appear to be associated with restrictions in funding. A copy of the report is available in the Library.

In parallel with the publication of this report, my noble Friend, the Parliamentary Under-Secretary of State (Lord Warner) issued a statement setting out the responsibilities of the national health service in responding to guidance from NICE and a range of actions to support the NHS in these tasks. NICE can play a key part in promoting its guidance and in providing costing templates and other tools to help the NHS with implementation.

Bed Occupancy

Mr. Burstow: To ask the Secretary of State for Health (1) if he will estimate the number of extra hospital beds required to reduce bed occupancy rates to 85 per cent. of their current level in *(a)* England and *(b)* each strategic health authority; and if he will make a statement; [184099]

(2) what plans he has to reduce bed occupancy in NHS hospitals. [184224]

Ms Rosie Winterton: It is not possible to make an estimate of this kind at either a national or strategic health authority level. Bed occupancy depends not only on the number of beds provided, but on the level of demand for those beds and the way flow through beds is managed.

Average or snap shot weekly bed occupancy is often not the critical factor for bed availability: rather it is the hourly levels of bed occupancy and the temporary mismatch between admissions and discharges that influence the ability of trusts to admit emergency patients without delay and avoid the cancellation of electives. Much bed capacity can be released through simply reducing the current, often substantial, temporary peaks and troughs in bed occupancy.

Trusts have identified improving the way they use their bed capacity as a top priority and significant support is being delivered through the national programme to improve throughput in accident and emergency. Improved use of beds is critical to delivering this priority alongside the priorities on electives.

Branded Medicine Prices

Siobhain McDonagh: To ask the Secretary of State for Health which country in Europe has the highest prices for branded medicines; and what the range of prices is. [183665]

Ms Rosie Winterton: Each year, the Department publishes a comparison of branded medicine prices in the United Kingdom with a range of European countries and the United States. The latest published figures for 2002 show that the UK is the highest among these European comparator countries. The range of prices is shown in the table.

Bilateral comparisons of ex-manufacturer prices

Country	*1998*	*1999*	*2000*	*2001*	*2002*	*Five year[1] average*
France	85	84	80	81	81	81
Germany	108	97	91	94	95	95
Italy	81	83	79	82	86	86
Netherlands	n/a	n/a	81	84	88	89
Spain	71	67	64	67	75	75
UK	100	100	100	100	100	100
USA	174	184	209	217	201	204
Austria	81	83	77	81	86	86
Belgium	86	84	78	81	86	86
Finland	86	85	83	84	88	89
Ireland	90	88	83	88	93	93

[1] This is based on bilateral comparisons, i.e. the form and strength matches occurred between the UK and another country, using average annual exchange rates.

Dentistry

Mr. Challen: To ask the Secretary of State for Health how many dentists in Morley and Rothwell constituency have taken commitment payments to devote more time to NHS dentistry. [179682]

Miss Melanie Johnson: 18 general dental service (CDS) dentists in the Morley and Rothwell constituency received commitment payments in April 2004 for the quarter ending March 2004.

Commitment payments are based on dentists' gross fees, together with a patient registration requirement for the higher payments and are based on previous years, so do not require additional time in the future to be devoted to national health service dentistry. Commitment payments will be increased, up to a maximum threshold, if a dentist takes on additional CDS work.

Departmental Accounting Practice

Mr. Bacon: To ask the Secretary of State for Health who the Finance Director of *(a)* the Department, *(b)* the NHS Appointments Commission and *(c)* the Food Standards Agency is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts of each in the last five years. [183424]

Ms Rosie Winterton: The finance directors/managers of the three bodies and their qualifications are:

Body	*Name and position*	*Qualification*
Department of Health	Mr. Richard Douglas (Finance Director)	CIPFA
National Health Service Appointments Commission	Ms Lynn Shadford (Finance Manager)	ICAEW
Food Standards Agency	Mr. Allan Hutton (Finance Director)	CIMA, CIPFA

In the five year period starting 1999–2000, the Department has prepared resource accounts in each year. The resource accounts were qualified in 1999–2000 arising from limitation in audit scope.

The Food Standards Agency has prepared three sets of resource accounts from 2000–01.

Apart from the above qualified opinion on the Department's resource account, all accounts have been given a true and fair opinion by the comptroller and auditor general.

The first summarised account of the NHS Appointments Commission was qualified in 2001–02 arising from limitation in audit scope. The 2002–03 account was unqualified.

The audit opinions for 2003–04 will be available later in the year.

Departmental Contracts

Mr. Oaten: To ask the Secretary of State for Health if he will list the *(a)* number, *(b)* value and *(c)* purpose of contracts his Department holds with (i) A. T. Kearney, (ii) PricewaterhouseCoopers and (iii) Atos KPMG. [180440]

Ms Rosie Winterton *[holding answer 28 June 2004]:* The Department does not centrally hold a record of the number or the purpose of individual contracts. Only payments made are recorded.

Departmental Expenditure

Mr. Burns: To ask the Secretary of State for Health what departmental expenditure was on *(a)* mobile telephones, *(b)* hospitality and *(c)* taxis in (i) 1996–97 and (ii) the latest accounting period for which figures are available. [184552]

Ms Rosie Winterton: The information requested is shown in the table.

£000

	1996–97	*2003–04*
Mobile telephones	[1]33	222
Taxis	[2]—	403
Hospitality	105	109

[1] This figure relates to national health service regional offices only. Mobile phone costs were not identified separately from other telecommunications expenditure in the rest of the Department.
[2] Not available—taxi costs were not separately identified in 1996–97.

Departmental Legal Costs

Mr. Lansley: To ask the Secretary of State for Health what the cost to the Department of external legal advice was in the last 12 months. [180324]

Ms Rosie Winterton: The Department has a service level agreement with the legal division of the Department of Work and Pensions for the provision of legal services, including advice. The value of the agreement was £4.5 million in 2003–04. External legal services are used, often on commercial matters, but the specific costs of this advice cannot be dis-aggregated from the overall cost of consultancy services without incurring disproportionate costs.

Diabetes

Mr. David Stewart: To ask the Secretary of State for Health what estimate he has made of the numbers of *(a)* type 1 and *(b)* type 2 diabetics. [R] [183715]

Ms Rosie Winterton: An estimated 1.3 million people in England have diabetes. About 15 per cent. of these have type 1 diabetes.

Mr. David Stewart: To ask the Secretary of State for Health (1) when he expects the UK Scrutiny Committee to report on the future provision of screening for type 2 diabetes; [183717]

(2) what evidence he has *(a)* commissioned and *(b)* evaluated on the number of individuals suffering from diabetes who have not yet been formally diagnosed. [183718]

Ms Rosie Winterton: The United Kingdom national screening committee (NSC) is undertaking a development project on the feasibility and impact of screening patients at greatest risk of diabetes in disadvantaged areas, reaching high risk groups through primary care. The Department has also commissioned some additional research to look at the prevalence of type 2 diabetes in the population.

This work will inform the advice the NSC has been asked to give on the most effective policy for screening for type 2 diabetes. It will report to the Department in 2005.

Environmental Sustainability

Mrs. Calton: To ask the Secretary of State for Health how much *(a)* his Department and *(b)* its agencies spent on (i) electricity use and (ii) water and sewerage services in each year since 1997. [181726]

Ms Rosie Winterton: Costs for the principal buildings on the Department's London estate are as follows.

Electricity

Year	*(£000s)*
1997–98	615,007
1998–99	614,783
1999–2000	634,859
2000–01	545,079
2001–02	579,102
2002–03	551,938
2003–04	572,782

Water and Sewerage

Year	*(£000s)*
1997–98	36,396
1998–99	33,614
1999–2000	32,607
2000–01	32,224
2001–02	29,009
2002–03	34,684
2003–04	29,372

London staff of the Medicines and Healthcare Products Regulatory Agency (MHRA) occupy buildings that are rented and most of the utilities are included within the service charge. However, figures for electricity costs only are available for Hannibal House, which is shared between MHRA and Departmental staff. Expenditure is as follows.

Electricity

Year	*(£000s)*
1997–98	58,654
1998–99	53,124
1999–2000	48,124
2000–01	49,219
2001–02	53,689
2002–03	50,382
2003–04	57,855

Expenditure for the wheelchair evaluation centre at Blackpool, part of MHRA, is as follows. Figures are for electricity and gas combined.

Electricity and Gas

Year	*(£000s)*
1997–98	6,074
1998–99	6,118
1999–2000	4,835
2000–01	5,029
2001–02	6,522
2002–03	5,275
2003–04	6,009

Water and Sewerage

Year	*(£000s)*
1997–98	1,407
1998–99	1,478
1999–2000	1,527
2000–01	1,754
2001–02	2,013
2002–03	1,922
2003–04	1,466

The National Health Service Purchasing and Supplies Agency became an agency of the Department in April 2000. Figures for the years following are as follows.

Electricity

Year	*(£000s)*
2000–01	23,591
2001–02	32,901
2002–03	38,570
2003–04	30,122

Water and Sewerage

Year	*(£000s)*
2000–01	3,704
2001–02	2,576
2002–03	2,476
2003–04	2,292

Figures for the NHS Pensions Agency are as follows.

Electricity

Year	*(£000s)*
1997–98	60,554
1998–99	61,333
1999–2000	55,326

Electricity

Year	*(£000s)*
2000–01	50,678
2001–02	52,919
2002–03	46,787
2003–04	56,309

Water and Sewerage

Year	*(£000s)*
1997–98	26,237
1998–99	27,459
1999–2000	30,675
2000–01	13,542
2001–02	23,026
2002–03	24,218
2003–04	27,003

The NHS Estates Agency (NHSE) occupies rented office space in Leeds city centre. NHSE is not billed separately for its energy and water; these are included in its service charge.

Instrument Sterilisation

Mr. Paice: To ask the Secretary of State for Health if he will list the contracts let or in the process of tendering for the provision of instrument sterilisation services to NHS trust hospitals giving the *(a)* location of each service, *(b)* the hospitals for which it will provide the service and *(c)* the dates of the period of contract; and what further contracts for similar services he intends to let in each of the next three years. [184756]

Mr. Hutton *[holding answer 16 July 2004]:* Contracts for the provision of sterile services may arise as a result of an individual outsourcing procurement, as part of a large private finance initiative or public private partnership or where one national health service trust provides such services for others.

Decisions on whether to let contracts and to whom are for individual NHS trusts to take, within the rules relating to such procurements and details are not held centrally.

As part of their strategies for modernising sterile services, strategic health authorities are encouraging the setting up of joint ventures, which entails a number of NHS trusts pooling their demand, and advertising jointly for a private sector partner. Information about the joint ventures established so far is set out in the table. The details of these contracts have not yet been agreed.

Trusts	*Date of advertisement*
The Bradford Teaching Hospitals NHS Foundation Trust and Leeds Teaching Hospitals NHS Trust	June 2003

Internet Drug Sales

Clive Efford: To ask the Secretary of State for Health what action he is taking to prevent the advertising and selling of drugs via the internet that are only available in the UK with a general practitioner's prescription. [183492]

Ms Rosie Winterton: The responsibility for regulating medicines on the United Kingdom market lies with the Medicines and Healthcare Products Regulatory Agency (MHRA), an executive agency of the Department. The MHRA takes the view that internet and mail order sale and supply of medicines is acceptable, provided the legislative requirements are met. There are perfectly legitimate internet-based dispensing pharmacies, where patients can sign their prescriptions and post them to the pharmacist to be filled. Medicines are then sent back to the patient by post. The law allows for this.

The MHRA is also responsible for the enforcement of these requirements and any website brought to its attention for breaching regulations regarding advertising, sale and supply of medicines will be investigated. Such sites will be contacted, initially in order to seek compliance and although the MHRA has no powers to force closures of websites, it seeks to achieve compliance through internet service providers (ISPs), which are advised on UK law.

The MHRA recognises that, in order to deal with the risks posed by the internet, it is impossible to act unilaterally. To this end, the MHRA's enforcement group works closely with other Government Departments and law enforcement authorities, both in the European Community and elsewhere, in an effort to address possible courses of action.

Less-invasive Technologies

Andy King: To ask the Secretary of State for Health if he will make a statement on the use of less-invasive technologies in the NHS. [174965]

Mr. Hutton: Many diseases and illnesses which have been routinely treated with surgical intervention are now being successfully managed or cured with less invasive forms of treatment. Last year the Department issued guidelines to the national health service governing the use of new interventional procedures. The guidelines are supported by the work of the National Institute for Clinical Excellence (NICE).

NICE is responsible for assessing the safety and efficacy of new technologies to protect the safety of patients. It also supports clinicians in the process of managing and introducing new procedures.

Myasthenia Gravis

Mr. Baron: To ask the Secretary of State for Health if he will make a statement on support available for those suffering from myasthenia gravis; and what steps he is taking to raise awareness of myasthenia gravis among the medical profession. [184213]

Dr. Ladyman *[holding answer 15 July 2004]*: Patients with myasthenia gravis are able to access a range of national health service services. Although there is no cure for this condition, there are a number of treatments available to help control it. These include medication, surgery, and palliation.

We have no specific plans to raise awareness of the condition among the medical profession. However, we are committed to improving services for patients with neurological diseases. The national service framework for long term conditions will focus on improving services for people with neurological conditions. While the framework will not cover myasthenia gravis specifically, it will recommend improvements in standards, care and support that will benefit everyone with a neurological condition.

Non NICE-appraised Treatments

Andy King: To ask the Secretary of State for Health how many primary care trusts in England do not fund non-National Institute for Clinical Excellence appraised products and treatments. [183988]

Ms Rosie Winterton: This information is not collected centrally.

Andy King: To ask the Secretary of State for Health on what grounds primary care trusts may refuse to fund non-National Institute for Clinical Excellence appraised products if a clinician wishes to prescribe them. [183989]

Ms Rosie Winterton: It is for primary care trusts (PCTs) to determine what criteria they use in deciding whether to fund a treatment or therapy which has not been appraised by the National Institute for Clinical Excellence. However, we would expect PCTs to consider the available evidence on clinical and cost effectiveness of treatments.

Critical Care Networks (Transfers)

Mr. Burstow: To ask the Secretary of State for Health pursuant to the answer of 5 July 2004, *Official Report*, column 580W, on critical care networks (transfers), for what reasons patients are transferred between hospitals for non-clinical reasons; and if he will make a statement. [184206]

Ms Rosie Winterton: Critical care transfers between hospitals occur for non-clinical reasons where critical care beds or other necessary resources are not immediately available. There are 29 critical care networks that work with commissioners and providers to assess the needs of the critically ill, plan services to meet those needs, agree standards and monitor the delivery of critical care. It is their role to ensure transfers for non-clinical reasons occur only within the network and only occur following consultant-to-consultant discussion and agreement.

Pharmaceutical Price Regulation

Andy Burnham: To ask the Secretary of State for Health what negotiations have been held with the pharmaceutical industry following the consultation on the future of the Pharmaceutical Price Regulation Scheme; and when they will be completed. [183533]

Ms Rosie Winterton: Following consultation on the future of the pharmaceutical price regulation scheme (PPRS), the Department started confidential bilateral negotiations with the Association of the British Pharmaceutical Industry on new arrangements. These negotiations started in February 2004 and are continuing. It remains the Government's preference to include another voluntary PPRS agreement with the research-based pharmaceutical industry and to do this as speedily as possible commensurate with a satisfactory outcome for the taxpayer and the national health service.

Prescription Medicines Prices

Jim Dowd: To ask the Secretary of State for Health what action he is taking to ensure that the prices paid in the UK for branded prescription medicines are comparable with those in other countries in Europe; and if he will make a statement. [183666]

Ms Rosie Winterton: The Department, on behalf of the United Kingdom Government, is currently negotiating with the Association of the British Pharmaceutical Industry (ABPI) on a new Pharmaceutical Price Regulation Scheme. It is seeking to negotiate another voluntary agreement that delivers prices that represent value for money for the taxpayer and the national health service as well as reasonable returns for the research-based pharmaceutical industry.

Restraint Procedures

Tom Cox: To ask the Secretary of State for Health what restraint procedures are allowed to be used within a psychiatric hospital when a patient becomes violent or aggressive to ensure that the patient or members of staff are not physically injured; and if he will make a statement. [184133]

Ms Rosie Winterton: Guidance on the use of restraint, for those detained under section of the Mental Health Act 1983, is laid out in the Mental Health Act Code of Practice.

Section 19.12 of the Code of Practice states that:

"Any restraint used should:

be reasonable in the circumstance;

apply the minimum force necessary to prevent harm to the patient or others;

be used for only as long as is necessary;

be sensitive to gender and race issues."

Trusts should regularly audit their control and restraint procedures consistent with the framework of clinical governance.

The National Institute for Clinical Excellence is currently carrying out its final consultation on its guidance, "Disturbed (violent) behaviour: the short-term management of disturbed (violent) behaviour in in-patient psychiatric settings", which is scheduled for publication later in the year.

In February this year, "Developing Positive Practice to Support the Safe and Therapeutic Management of Aggression and Violence in Mental Health In-patient Settings" was issued to assist services by the National Institute for Mental Health in England (NIMHE) programme on the management of violence.

The NIMHE programme is also developing a scheme for regulation and accreditation for trainers and training in the prevention and management of aggression and violence in mental health services.

Salary and Recruitment Costs

Mr. Burns: To ask the Secretary of State for Health what *(a)* the cost of recruitment and *(b)* the total cumulative salary bill are for the (i) national cancer director, (ii) national director for heart disease, (iii) chairman of the better hospital food panel, (iv) national director of mental health, (v) national director for older people's services and (vi) alliance development manager at the tobacco policy unit. [184551]

Ms Rosie Winterton: The four national clinical directors are each employed on a national health service consultant contract and the Department reimburses the costs of their time. The alliance development manager, which has been renamed regional liaison manager, is a secondment from the voluntary sector.

Because these posts were filled through secondment arrangements as permitted by the Civil Service Commissioners, there were no recruitment costs incurred in these appointments.

The chairman of the better hospital food panel receives no remuneration and there were no recruitment costs associated with his appointment.

TNF Blockade

John Austin: To ask the Secretary of State for Health what representations he has received from consultant rheumatologists regarding the prescribing of TNF blockade; whether the obligation to fund it includes funding the nursing and administrative infrastructure necessary to facilitate and enable funding the administration of the drug; what guidance he has issued to primary care trusts and acute trusts; and if he will make a statement. [184875]

Dr. Ladyman: We are not aware of having received any representations from consultant rheumatologists on this subject. The National Institute for Clinical Excellence (NICE) reported on these drugs in 2002, so we would expect that any representations would have been received by them. There has, however, been correspondence from hon. and right hon. Members and the public, as well as several parliamentary questions, on anti-TNF therapy.

National health service bodies are under a statutory obligation to fund treatments recommended in NICE technology appraisals. We expect primary care trusts (PCTs) to meet their statutory obligations, and strategic health authorities to follow up any allegations of non-compliance.

The NHS has three months from the date of publication of guidance on technology appraisals to provide funding, so that clinical decisions made by doctors involving NICE recommended treatments or drugs can be funded. We last reminded PCTs of these obligations in guidance published in January 2003.

The Department has not issued guidelines on the dispensing of anti-TNF drugs. NICE issued guidance on these drugs in March 2002. They recommended that consultant rheumatologists, or consultant paediatric rheumatologists in the case of juvenile idiopathic arthritis, should prescribe these drugs, in accordance with the guidelines set out by the British Society for Rheumatology or British Paediatric Rheumatology Group.

Wiltshire Ambulance Trust

Mr. Drew: To ask the Secretary of State for Health what the criteria are for the Wiltshire Project for evaluation of the Wiltshire Ambulance Trust. [184230]

Ms Rosie Winterton: In April 2004 Avon, Gloucestershire and Wiltshire Strategic Health Authority (SHA), in partnership with Wiltshire Ambulance National Health Service Trust, embarked on a project to consider how emergency services could be better shaped to meet the demands of the future.

The criteria for the project are a matter for the SHA and trust.

Written Answers to Questions

Tuesday 20 July 2004

LEADER OF THE HOUSE

Job Losses (Civil Servants)

Mr. Evans: To ask the Leader of the House how many of the reductions in the numbers of civil servants in his Office announced in the comprehensive spending review will be of special advisers. [185467]

Mr. Hain: I refer the hon. Member to the answer which my right hon. Friend the Chief Secretary to the Treasury gave today.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Climate Change

Mr. Chaytor: To ask the Secretary of State for Environment, Food and Rural Affairs what the terms of reference are for the review of the Government's climate change strategy; what procedures she has established for the conduct of the review; and when she expects to publish the final report. [183680]

Mr. Morley: The Government remain committed to reviewing the UK climate change programme this year. We will be making an announcement shortly on our plans for the review.

Common Agricultural Policy

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what research her Department has commissioned on the implications of Common Agricultural Policy reform; and when she next plans to meet her European Union counterparts to discuss Common Agricultural Policy reform. [184007]

Alun Michael: Defra commissioned several analyses of the likely impacts of the reform proposals before they were agreed, to help inform the Government's negotiating position. In addition analysis of the redistribution of subsidy and other effects arising from implementation of the Single Payment Scheme in England was carried out in-house. These studies are all published on Defra's website. A programme to monitor and evaluate the CAP reforms is also being put in place. This will include a CAP Environmental Observatory to monitor the environmental impacts of changing farm practices and production levels, and a project to analyse the economic linkages of the agricultural industry, including the Single Payment Scheme, with the wider rural economy.

My right hon. Friend, the Secretary of State, met her European counterparts at the EU Agriculture and Fisheries Council on 19 July, where she set out the UK's views on reform of the CAP sugar regime and on proposals to review the EU's Rural Development Regulation—an increasingly important element of the CAP.

Health and Pesticide Exposure

Mr. Tyler: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects the report of the survey of Health and Pesticide Exposure, undertaken by the London School of Hygiene and Tropical Medicine to be published; and if she will make a statement. [184612]

Alun Michael: The London School of Hygiene and Tropical Medicine sent a preliminary report to Defra on the afternoon of Tuesday 13 July 2004.

This is a preliminary draft that has not yet been subject to peer review, as is usual prior to the publication of any scientific report. We are currently seeking independent experts to carry out such a review. We will send their comments to the researcher at London School of Hygiene and Tropical Medicine, inviting him to address them in his final report. This may necessitate redrafting the report. We hope that this process will be completed by the end of October.

Defra is also continuing to seek the contractor's co-operation with an independent audit of the clinical phase of the study. This was described in my answer to the hon. Member's previous question given on 26 May 2004. It is hoped that this will be completed by late autumn this year.

Landfill Gas

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs how many megawatts of renewable energy were generated from landfill gas in each year since 1998; and what projections she has made of how much renewable energy will be generated from landfill gas in each year from 2005 to 2010. [181223]

Mr. Timms: I have been asked to reply.

Electricity generation from landfill gas in the UK in each year since 1998 is as follows:

	MWh
1998	1,185,000
1999	1,703,000
2000	2,188,000
2001	2,507,000
2002	2,679,000
2003	3,276,000

Source:
Digest of UK Energy Statistics 2004

Forecasts of renewables are not giving for individual technologies because the Renewables Obligation is market led and therefore the precise make up in the future will be decided by the market.

Milk

Mr. Steen: To ask the Secretary of State for Environment, Food and Rural Affairs how many litres

of liquid milk were imported into the UK from EU countries in each of the last five years, broken down by country of origin. [172935]

Alun Michael *[pursuant to his reply, 20 May 2004, c. 1110W]*: My answer referred to a table showing UK imports of liquid milk from the EU 15 member states in each of the last five years to 2003, broken down by country of despatch and a footnote made clear that the figures were provisional and subject to amendment. It has since been established that a figure under the 2003 entry for the Irish Republic was incorrect. The figure should have read 19,494 thousand litres. The rest of the answer remains correct and the amended table is as follows:

UK imports of liquid milk from EU15 countries, 1999–2003

Thousand litres

Country	*1999*	*2000*	*2001*	*2002*	*2003*	*Grand total*
Irish Republic	60,342	60,199	54,835	26,233	19,494	221,103
Denmark	30,334	25,166	9,421	795	425	66,140
Germany	17,078	19,531	11,196	5,629	3,888	57,323
France	13,288	8,514	9,667	10,299	8,600	50,368
Belgium	6,786	6,922	3,811	2,345	3,759	23,624
Netherlands	3,620	462	919	2,198	1,027	8,227
Austria	2,844	1,355	—	—	—	4,200
Italy	114	214	91	101	70	590
Portugal	—	0	—	—	40	40
Spain	23	14	—	—	—	37
Sweden	1	—	—	—	—	1
EU 15 total	134,431	122,378	89,940	47,600	37,303	

Single Farm Payments

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what conclusions she has reached about the future prospects for *(a)* tenant farmers, *(b)* livestock farmers, *(c)* arable farmers, *(d)* horticulture producers, *(e)* moorland farmers, *(f)* non-moorland, severely disadvantaged area farmers, *(g)* traditional family farms and *(h)* all other farms following her Department's published assessment of the likely impact of her plans for the future disbursement of single farm payments. [184759]

Alun Michael: By decoupling subsidy and implementing the Single Payment Scheme in England, as announced on 22 April, the Government are providing a policy framework conducive to encouraging enterprise and market orientation in line with the Strategy for Sustainable Food and Farming. Future prospects for agriculture depend on various factors but the Government are optimistic that farmers and growers will rise to the challenges and opportunities that present themselves.

HOUSE OF COMMONS COMMISSION

House of Commons (Administration) Act 1978

Dr. Whitehead: To ask the hon. Member for Roxburgh and Berwickshire representing the House of Commons Commission if he will review the workings of the House of Commons (Administration) Act 1978 in the light of progress with the implementation of the Braithwaite Report on the structures and procedures of the House, with particular reference to the recommendation contained in it that there should be a further review in about five years from July 1999. [184408]

Sir Archy Kirkwood: Almost all the recommendations of the 1999 Braithwaite Report have been implemented by the House of Commons Commission. There has been continuing follow-up, including review of estates and works, and reporting services. The Commission frequently discusses House governance issues; most recently, at its June and July meetings, considering the recommendations of a major review of IS/IT governance, which will be taken forward in consultation with the Information Committee and the authorities of the House of Lords. In the circumstances, I see no current need for a broader review.

INTERNATIONAL DEVELOPMENT

AIDS

Mr. Rosindell: To ask the Secretary of State for International Development what action the Government are taking to tackle the problem of AIDS worldwide. [184317]

Mr. Gareth Thomas: I refer my hon. Friend to the written statement made by the Secretary of State to the House earlier today and to the Government's new Strategy 'Taking Action: The UK's Strategy for Tackling HIV/AIDS in the Developing World' copies of which have been placed in the Libraries of both Houses.

Empty Houses

Mr. Webb: To ask the Secretary of State for International Development for how many empty houses his Department is responsible; and if he will make a statement. [182143]

Mr. Gareth Thomas: DFID is not responsible for any empty houses

Haiti

Mr. Steen: To ask the Secretary of State for International Development what action he is taking to address the long-term causes of environmental vulnerability of poor communities in Haiti and the

Dominican Republic following the recent flooding and landslides in the border region between the two countries. [184328]

Mr. Gareth Thomas: DFID responded swiftly to the recent floods in Hispaniola providing £0.5 million of immediate humanitarian support to the relief operation in Haiti through the United Nations and non-governmental organisations. £259,400 of this money will go in support of emergency programmes to re-launch agricultural production and help provide food security, water and sanitation, distribution of non-food items and interventions in emergency education.

The longer-term reconstruction and development needs of Haiti have recently been assessed, costed and set out in a two-year Interim Co-operation Framework covering the period July 2004 to September 2006. One of its specific priority sectors is environmental protection and rehabilitation. An International Donor Conference will take place on 19–20 July in Washington DC at which donors will pledge financial support to Haiti. The UK will participate in this Conference. DFID's financial contribution will be through the EU and shareholdings in the World Bank and Inter-American Development Bank.

In the Dominican Republic, DFID provides support through a small grants scheme, which assists non-government organisations to target poverty reduction.

Mr. Steen: To ask the Secretary of State for International Development what steps he is taking to measure the criterion the Department set itself in its current Regional Assistance Plan for the Caribbean of improved understanding of Haiti's situation and options for recovery. [184329]

Mr. Gareth Thomas: DFID undertook a fact-finding mission to Haiti in June 2003, in order to become familiar with the situation on the ground. In 2004 DFID sent two missions to Haiti to assess the humanitarian situation, following the political violence and instability in the first quarter of 2004, and the floods in May.

DFID works closely with an international network of bilateral and multilateral institutions working to support Haiti, including the Haiti Contact Group co-ordinated by the World Bank. The UK will be represented at the upcoming International Donors Conference on Haiti, to be held in Washington on July 19 and 20, which will focus on securing donor support for the Interim Co-operation Framework.

DFID also maintains contact with civil society organisations in order to get their perspective on the situation in Haiti. DFID officials met with UK NGOs working in Haiti in May 2004 and DFID receives regular information from civil society organisations through various channels, including the Haiti Support Group.

Mr. Steen: To ask the Secretary of State for International Development how he will work with the EU to ensure that EU aid to the interim Haitian Government is conditional on ensuring that the aid is directed towards those most in need. [184331]

Mr. Gareth Thomas: The provision of EU aid to Haiti under the European Development Fund (EOF) has been subject to constraints applied by member states within the Common Position since January 2001. EOF 8 funds have only been available for civil society projects and electoral support. On 16 July, the appropriate measures put in place by the EU in relation to Haiti under Article 96 of the Cotonou agreement were amended and the European Commission will notify the interim Haitian Government of the funds available under EOF 9.

EU development assistance can be provided only after free and fair elections have been held. Once funds start to flow, DFID will monitor how these are spent as part of our continuing watching brief on Haiti. DFID will be particularly keen to ensure that poverty reduction is the principal focus of this assistance.

Mr. Steen: To ask the Secretary of State for International Development what steps he is taking for immediate release of funds for Haiti under the European Development Fund (EDF 9). [184332]

Mr. Gareth Thomas: €27 million from EDF 8 will continue to support programmes of direct benefit to the population of Haiti through civil society organisation and the electoral process.

On 16 July, the European Council agreed that the appropriate measures, which had been in place by the EU in relation to Haiti under Article 96 of the Cotonou Agreement, should be amended. This decision means that the European Commission will now notify the interim Haitian Government of the level of funding under EOF 9 which is available to Haiti, and will proceed to draft the new Country Strategy Paper.

Under EOF 9, €95 million is available to Haiti. Of this €72 million cannot be disbursed until the Country Strategy Paper is developed, and free and fair elections have been held. At this point the National Indicative Programme will be prepared which sets out how the detail of these funds will be used. The other €23 million, under EOF 9, can be released prior to the signing of the National Indicative Programme.

Kenya

Tom Cox: To ask the Secretary of State for International Development what discussions he has had with the Kenyan Government on assistance on their current budget deficits; and if he will make a statement. [185020]

Hilary Benn: DFID is in regular contact with the Kenyan Government on this issue. DFID's Kenya Country Assistance Plan recognises that budget support is Kenya's preferred form of aid. It also makes clear that the level of British aid to Kenya, and whether or not DFID will provide bilateral poverty reduction budget support, will depend on the pace with which the Kenyan Government implements its Economic Recovery Strategy, especially in tackling corruption, preparing and implementing budgets that benefit the poor, and strengthening public financial management.

Progress is not yet sufficient to enable us to provide such support. DFID is particularly concerned about recent reports of corruption allegedly involving senior members of the Kenyan Government and we have urged President Kibaki to ensure that appropriate and firm action is taken to investigate these reports, make the

results public and take action against all those found to have acted corruptly. However, DFID will continue to use sectoral support and project aid where we believe that it can have a sustainable impact on poverty reduction and progress towards the Millennium Development Goals in Kenya.

TRANSPORT

Rail Services (Southampton)

5. **Mr. Denham:** To ask the Secretary of State for Transport what discussions he has had with the Strategic Rail Authority regarding rail routes from Southampton to the midlands; and if he will make a statement. [184919]

Dr. Howells: Ministers and officials in my Department meet regularly with the Strategic Rail Authority about a wide range of issues.

The Government have set out their long-term proposals for passenger and freight services in the "Future of Rail" White Paper.

West Coast Main Line

14. **John Robertson:** To ask the Secretary of State for Transport if he will make a statement on improvements to the west coast main line. [184928]

Dr. Howells: The West Coast Upgrade is being delivered in line with the Strategy published by the Strategic Rail Authority in June 2003. New tilting trains have entered service, and a new timetable will be introduced in September this year with enhanced service frequencies and reduced journey times. Further improvements will follow in 2005 and 2008.

Community Transport

15. **Mr. Todd:** To ask the Secretary of State for Transport support he has given to community transport in South Derbyshire. [184929]

Mr. McNulty: Most of the capital funding for local transport provided by the Department is allocated through Local Transport Plans, and so it is for the Local Transport Authorities to determine how these resources are best used to serve local priorities. This year we have, however, made £465,750 available through the Rural Bus Challenge Programme to support the Southern Derbyshire Rural Access Initiative

National Railcard

16. **Lawrie Quinn**: To ask the Secretary of State for Transport if he will make a statement on the proposed introduction of a national railcard. [184930]

Mr. McNulty: My right hon. Friend has asked the Strategic Rail Authority and the industry to work up proposals for a national railcard. The SRA is currently taking this forward and I expect to receive advice later this year.

Road Safety

17. **Bob Russell**: To ask the Secretary of State for Transport how many crashes involving vehicles on the hard shoulder of motorways occurred in the last year for which figures are available. [184931]

Mr. Jamieson: The number of personal injury accidents that occurred on hard shoulders of English trunk motorways in 2002, the latest year for which validated data is available, was 104.

The provisional number of personal injury accidents that occurred on these motorway hard shoulders in 2003 was 73.

No records are kept of non-injury accidents.

Seafaring Ratings

18. **Mr. Austin Mitchell**: To ask the Secretary of State for Transport, when he expects to make a decision on whether to introduce an employment and training link for UK seafaring ratings and officers as part of the tonnage tax regime. [184932]

Mr. Jamieson: The tonnage tax regime is under review and representations have been invited by the end of September. The possibility of an employment link is one of the issues that has already been raised. We will announce our conclusions when all of the representations have been carefully considered.

Airport Noise

19. **David Taylor**: To ask the Secretary of State for Transport, what recent representations he has received about the need for noise controls near regional airports. [184933]

Mr. McNulty: Although from time to time the Department receives representations about noise control measures at various regional airports, recent representations have mostly been about Nottingham East Midlands Airport. The Government's conclusions on proposals to tackle operational aircraft noise from civil aircraft were published in December 2003.

Camera Safety Partnerships

Mr. Greg Knight: To ask the Secretary of State for Transport if he will take steps to publicise his Department's guidelines for the operation of camera safety partnerships. [184613]

Mr. Jamieson: The current handbook of rules and guidelines for the operation of the safety camera cost recovery programme was placed in the Library of the House on 5 December 2003. The handbook is currently being updated for 2005–06. The new handbook will be placed in the House Library and published on the DfT website.

Mr. Greg Knight: To ask the Secretary of State for Transport what monitoring processes are in place to ensure that his Department's guidelines for the operation of camera safety partnerships are observed. [184614]

Dr. Howells: The programme rules require the safety camera partnerships' accounts to be audited annually by the audit commission. Partnerships must also provide regular data to the Department on numbers of

collisions and casualties. An independent report on the first three years of the operation of the safety camera programme by University College London and PA Consulting Group was published on 15 June, confirming the major reduction in collisions, deaths and casualties achieved at camera sites.

Mr. Greg Knight: To ask the Secretary of State for Transport what assessment he has made of the level of public awareness of the guidelines that are in force for the operation of camera safety partnerships. [184615]

Mr. Jamieson: *The criteria for the deployment of* safety camera and the rules on camera conspicuity and visibility rules have been placed on the DfT website. The University College London and PA Consulting Group report on the first three years of the safety camera programme, published on 15 June, includes a description of the programme and the key rules and guidelines, and this is also available on the DfT website.

Mr. Alan Duncan: To ask the Secretary of State for Transport how much money was received by central Government in 2003 in fines paid by motorists who were prosecuted for speeding as a result of the evidence of fixed cameras. [179818]

Mr. Jamieson *[holding answer 21 June 2004]*: During the financial year 2002–03, the latest year for which figures are available, the amount of conditional offer fixed penalty fines relating to speed and red light safety cameras within the safety camera programme was £68,872,320. From this amount, £54,256,502 was returned to the Safety Camera Partnerships to cover their costs. We do not hold information centrally for camera operations other than those operated within the Safety Camera Partnerships. Neither is information held centrally on the amount of fines raised as a result of court proceedings.

Figures for fixed cameras alone are not separately available.

Commercial Vehicles (Safety)

Mr. Drew: To ask the Secretary of State for Transport when he expects the Highways Agency to publish its report on safety of commercial vehicles; and if he will make a statement. [184301]

Mr. Jamieson: The Highways Agency intends to publish a report on its Study of Trunk Road Accidents Involving Goods Vehicles early in 2005.

The Highways Agency is currently undertaking research into accidents involving Heavy Goods Vehicles (HGVs). The work is not yet complete but the initial findings suggest that there are a number of complex and interrelated issues involved with HGV accidents.

Diesel Deposits (Prosecutions)

Vera Baird: To ask the Secretary of State for Transport how many prosecutions there have been in each of the last five years as a direct result of a vehicle depositing diesel on the road. [185552]

Mr. Jamieson: The information requested is not collected by my Department in this format.

In 2002–03 the Vehicle and Operator Services Agency tested 466,000 heavy goods vehicles, 4,673 of which failed due to faults with the fuel system and also with oil leaks. During the same period 2,031 HGVs were given a prohibition for faults to the fuel system or for oil leaks at the roadside.

Harwich

Mr. Ivan Henderson: To ask the Secretary of State for Transport how much funding has been spent in the Harwich constituency from the Local Transport Plan. [184998]

Mr. McNulty: The constituency of Harwich falls within the Essex Local Transport Plan area. Essex has been allocated £109 million of local transport plan funding since 2000.

Decisions on how much of this funding is spent in Harwich are a matter for the authorities concerned.

Infrastructure/Services (Storm Damage)

Mr. Wiggin: To ask the Secretary of State for Transport what research his Department has commissioned on preventative measures to restrict damage to transport *(a)* infrastructure and *(b)* services caused by adverse weather conditions. [184037]

Mr. Jamieson: The Department has commissioned a number of projects addressing the impact of adverse weather conditions on transport infrastructure and services. This includes the following recent projects:

(a) Infrastructure

- Investigation of the value for money of winter maintenance
- Prevention and removal of snow and ice on roads
- De-icing of modern surfaces
- Salt spread rates for thin surfacings
- Low humidity salting
- New de-icers for Midland Links
- Review of flooding incidents on the (HA) network
- Slope stability and establishment of vegetation
- Revision of wind data for BS5400
- The Changing Climate: Impact on the DfT

(b) Services

- Performance of variable message signs in adverse weather conditions
- High Speed Craft Wind Heeling Moment Methodology
- Integrated Safety Guards and Spray Suppression for Heavy Goods Vehicles

The majority of the projects are funded by the Highways Agency and further information can be obtained from their website www.highways.gov.uk. The remaining projects are funded by the Maritime and Coastguard Agency and DfT(C) with further information available at www.mcga.gov.uk and www.dft.gov.uk respectively.

MOT Certificates

Andrew Mackinlay: To ask the Secretary of State for Transport whether cars registered in England, but whose MOT vehicle test certificate expires during their stay in Northern Ireland, will be exempt from prosecution *(a)* while in Northern Ireland and *(b)* immediately on their return to England where the

vehicle owner can demonstrate that the reason for not having their vehicle examined was due to the industrial action of Northern Ireland civil servants; and if he will make a statement. [184763]

Mr. Jamieson *[holding answer 16 July 2004]*: The industrial action in Northern Ireland would have no impact on cars registered in Great Britain as such vehicles can only be MOT tested here. If the MOT certificate expires during a stay in Northern Ireland, the driver of the vehicle could face prosecution in the Province. On returning to GB, the vehicle would be exempt from the requirement to hold a MOT certificate provided it was driven directly to a pre-arranged MOT test.

Motorways (Traffic Officers)

Mr. Wood: To ask the Secretary of State for Transport how many traffic officers have been deployed on motorways in England; and where they have been deployed. [184791]

Mr. Jamieson: There are currently 92 traffic officers, both on the road and in the control room, responsible for motorway patrols in the West Midlands. This will increase to 180 by the end of the year.

Nottingham East Midlands Airport

Mr. Kenneth Clarke: To ask the Secretary of State for Transport (1) whether an assessment has been made of the environmental impact of the proposed new noise preference routing *(a)* pole and *(b)* Trent 2 over southern and western Nottinghamshire for aircraft using Nottingham East Midlands Airport; [183978]

(2) whether the proposed flight path *(a)* pole and *(b)* Trent 2 over southern and western Nottinghamshire for aircraft using Nottingham East Midlands Airport has been agreed; [183979]

(3) whether he will impose time restrictions on using the flight path *(a)* pole and *(b)* Trent 2 over south west Nottinghamshire for aircraft using Nottingham East Midlands Airport to ban night flights between 11 pm and 6 am. [183980]

Dr. Howells: These proposed airspace changes have been the subject of an environmental assessment by Nottingham East Midlands Airport (NEMA). After careful examination of the proposals, the Department is satisfied that they provide a safe and effective solution for all airspace users in the East Midlands, while mitigating the environmental impact to the greatest extent possible. Officials have conveyed this response to the Civil Aviation Authority (CAA). It will then be for the CAA to agree the changes with NEMA.

In order to mitigate the environmental impact of the new POLE Standard Instrument Departure route and following consultation, NEMA have given an undertaking that the route will not be used between the hours of 2200 and 0600. The Northwest bound Trent route has been realigned to avoid over-flight of Derby, which would represent a significant net environmental benefit.

Mr. Kenneth Clarke: To ask the Secretary of State for Transport what representations have been made to him from councils in Nottinghamshire about the proposed new flight paths over southern and western Nottinghamshire for aircraft using Nottingham East Midlands Airport. [183981]

Dr. Howells: None directly, though I am aware of representations made to the Civil Aviation Authority and Nottingham East Midlands Airport (NEMA) by various local authorities in this connection.

Road Congestion

Mr. Kidney: To ask the Secretary of State for Transport what methods of tackling road congestion between Manchester and Birmingham he has considered since 10 December 2002 in addition to widening the M6 motorway between junctions 11 and 20. [181667]

Mr. Jamieson: The document "Managing our Roads" published in July 2003 set out the Government's approach to tackling congestion and the various approaches which are being considered in addition to widening motorways. However, the Secretary of State for Transport has published a consultation paper "M6: giving motorists a choice", which invites views on a new expressway to run parallel with the M6 between Birmingham and Manchester as an alternative to widening the existing M6.

Bob Spink: To ask the Secretary of State for Transport what estimate he has made of the cost of road congestion in Essex in each of the last 10 years. [183599]

Mr. Jamieson: The Department does not make estimates of the costs of road congestion in Essex. Detailed information on traffic flows on all roads in the county would be needed for such an estimate. The cost of its collection to the highway authorities in the county would exceed the value of the information to decision-makers.

Road Contractors

John Thurso: To ask the Secretary of State for Transport how many vehicles used each of the roads built using the design, build, finance and operate contracting method, in each month of operation; who the contractor was in each case; how much was paid under each contract; and if he will make a statement. [180846]

Mr. Jamieson: The table shows the traffic figure (in vehicle kilometres) for each financial year for each of my Department's Design Build Finance and Operate projects since these were opened to traffic. Providing figures for each month would be disproportionately expensive.

Project	*Company*	*Length of Road (km)*	*1998–99*	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*
M1-A1	Yorkshire Link Ltd.	30	—	640	676	716	743	769
A69	Road Link (A69) Ltd.	34	489	494	488	505	526	537
A19	Autolink Concessionaires (A19)	118	—	1565	1611	1637	1698	1753

Project	Company	Length of Road (km)	1998–99	1999–2000	2000–01	2001–02	2002–03	2003–04
	Ltd.							
A50	Connect (A50) Ltd.	57	—	675	731	793	856	864
M40	UK Highways M40 Ltd.	122	—	3844	3859	3932	3944	3944
A1(M)	Road Management Services (Peterborough) Ltd.	21	—	405	416	429	439	449
A417/ A419	Road Management Services (Gloucester) Ltd.	52	544	574	582	604	617	641
A30/ A35	Connect (A30/A35) Ltd.	102	—	—	591	634	649	695

Figures are given in millions of vehicle kilometres.

The following table shows the total payments made under my Department's Design Build Finance and Operate Contracts.

Financial year	£ million
1998–99	105
1999–2000	119
2000–01	142
2001–02	130
2002–03	128

CABINET OFFICE

Public Services

24. **Ms Keeble:** To ask the Minister for the Cabinet Office what steps he is taking to co-ordinate the improvement of public service delivery across Government. [184911]

Mr. Alexander: The Delivery and Reform Team, chaired by the Cabinet Secretary, brings together those Heads of Units from the Cabinet Office, HM Treasury and No. 10 that are concerned with the delivery of better public services and civil service reform. The Delivery and Reform Team ensures co-ordination from the centre of the overall strategy and key strands of the Government's agenda.

CULTURE, MEDIA AND SPORT

Analogue Radio

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport (1) what plans she has made for switching off analogue radio signals; what the likely timescale is; what criteria will be applied; what target she has set for the proportion of households with access to digital technology before the analogue signal is switched off; and if she will make a statement; [184127]

(2) what representations she has received regarding the switching off of analogue radio signals; and if she will make a statement. [184131]

Estelle Morris: Section 67 of the Broadcasting Act 1996 requires the Secretary of State to keep under review the development of digital radio for the purposes of considering how long it would be appropriate for sound broadcasting services to be provided in analogue form.

In particular, the Act requires her, on or before the fourth anniversary on which the first national digital multiplex is granted, to ask Ofcom and the BBC to report on the current position and future prospects for the provision of radio multiplex services; the availability of digital sound programme services and existing analogue services in digital form; and the ownership or possession of equipment capable of receiving digital sound services. These reports are to be submitted to the Secretary of State by 31 October. A number of other industry bodies have also been asked to submit any comments they wish to make. All contributions will be considered alongside the BBC and Ofcom reports, and the Government will publish their response.

Green Minister

Mr. Horam: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the activities of the Green Minister in the Department in financial year 2003–04. [185113]

Estelle Morris: Since my appointment as Green Minister for DCMS in July 2003, the Department has published its comprehensive Sustainable Development Strategy and a copy is in the Library of the House. I have encouraged collaboration at ministerial and official level with the Department for Education and Skills in connection with education for sustainable development. I have also had a bilateral meeting with the Minister of State for the Environment.

Publicly Owned Collections

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport pursuant to her answer of 28 June 2004, what initiatives the Government have introduced to improve public access to items in publicly owned collections of museums, galleries and other civic buildings that are permanently in storage; and if she will make a statement. [185657]

Estelle Morris: DCMS encourages each of its sponsored museums and galleries to improve both intellectual and physical access to those collection items not on open display. Examples include the Natural History Museum Darwin Phase 1 Project which contains the Museum's remarkable collection of 22 million zoological items collected over the last 200 years and the Museum of Science and Industry in Manchester's Collection Centre which opened up 70 per cent. of the Museum's collection to the public when it opened in 2001. The National Museum of Science and Industry will be opening a new branch of the National Railway Museum (Locomotion) at Shildon in September of this year. It will enable visitors to view up to 60 vehicles that they might not have been able to see previously. In each case the Department has contributed funding to these developments. We also encourage the development of virtual access. A recent example of this is 'Ingenious', the new website of the National Museum

of Science and Industry which allows access to 30,000 images from its collections, which might not otherwise be seen.

Wembley Stadium

Bob Spink: To ask the Secretary of State for Culture, Media and Sport what recent representations she has received on progress on the new Wembley Stadium development; and what the latest estimated date is for completion. [183595]

Mr. Caborn: In the period since 1 April 2004 we have received no representations asking about progress towards completion of the Wembley Stadium development.

A key milestone for Wembley National Stadium Ltd. was the successful raising of the Stadium arch in June 2004. The Stadium remains on target for completion in January 2006 and to be built within budget.

We continue to work with all those involved in the development to ensure that public contributions are protected and used in the most efficient and effective ways possible.

Bob Spink: To ask the Secretary of State for Culture, Media and Sport what recent representations she has received on the costs of the new Wembley Stadium development. [183596]

Mr. Caborn: Since 1 April 2004 we have received letters from the right hon. Sir George Young and from Mr. Stuart Sutherland of Dornoch, Scotland, about the cost of the Wembley Stadium development.

The stadium remains on target for completion in January 2006 and to be built within budget.

We continue to work with all those involved in the Wembley National Stadium development to ensure that public contributions are protected and used in the most efficient and effective ways possible.

MINISTER FOR WOMEN

Access to Universities

Mr. Jim Cunningham: To ask the Minister for Women what discussions she has had with the Secretary of State for Education and Skills regarding *(a)* the opportunities available for older women to attend universities and *(b)* how to increase opportunities for women to attend universities. [183712]

Ms Hewitt *[holding answer 15 July 2004]:* We have regular bilaterals on the cross-Government skills agenda. These bilaterals cover a host of skills related items including, where relevant, issues relating to gender and age in industry and academia. Women returners will be helped by reforms in the Government's Skills Strategy, including the new learner entitlement for those without qualifications, better learner support, and better Information Advice and Guidance. Steps have already been taken to improve services for adults such as the University for Industry (Ufi)/learndirect national advice service. DTI is also taking forward a strategy to improve women's representation in science, engineering and technology, including a resource centre with a specific women returners project.

The Government are keen to ensure that everybody can access learning and qualifications and this is why the Access to Learning funds prioritise groups of students, like mature students who may have existing financial commitments, when allocating the funding. Other forms of financial support available are Career Development Loans, Parents Learning Allowance and the Adult Dependents Grant, which support students who have a financially dependent adult family member.

EDUCATION AND SKILLS

Apprenticeships

Tom Cox: To ask the Secretary of State for Education and Skills what policies are followed by his Department to encourage young people to enter apprenticeship schemes within the construction industry. [185339]

Mr. Ivan Lewis: Changes to the Apprenticeship programme recently announced will benefit all sectors including construction. We want to put in place a coherent ladder of high quality vocational opportunities responsive to the needs of young people, older workers and business. We intend to build a family of apprenticeship programmes to suit a variety of needs from aged 14 upwards. These will include: Young Apprenticeships for 14 to 16-year-olds, a pre-apprenticeship route within the existing Entry to Employment programme, Apprenticeships at NVQ Level 2, Advanced Apprenticeships at NVQ Level 3 and a strengthened progression route into higher education, including vocational Foundation Degrees.

In addition we have set up a new network of employer-led Sector Skills Councils to work with government to meet the skill needs of their sectors. Construction Skills—the SSC for construction—was licensed in September 2003. A key role for SSCs is to encourage take up of apprenticeship places by young people and others.

The number of new entrants to the sector rose by 4 per cent. between 2001/02 and 2002/03 and the construction sector is the second most popular Apprenticeship framework with over 23,000 young people in training. Construction was also the most popular sector for both young people and employers responding to the recent Apprenticeship marketing campaign.

Family Support

Andrew Selous: To ask the Secretary of State for Education and Skills pursuant to the answer of the Secretary of State for Work and Pensions of 15 March 2004, *Official Report*, column 12, on child poverty, if he will list for each year since 1997 for which data is available the resources that the Government has put into counselling and encouraging people to resolve their relationship difficulties in the interests of their children. [184445]

Margaret Hodge: There are a number of ways in which the Government encourage people to resolve relationship difficulties in the interests of the child. The Marriage and Relationship Support (MARS) grant funds activities aimed at helping people establish, maintain and develop successful relationships with their partners. This includes encouraging people to resolve

relationship difficulties in the interests of their children and meeting the needs of socially and commonly excluded groups.

The MARS programme (since 1997) provided grants as follows: 1997–98: £3.4 million; 1998–99: £3.0 million; 1999–2000: £3.2 million. Following Sir Graham Hart's recommendations in his report to the Lord Chancellor on Marriage Support Funding (published in November 1999), the allocation was increased as follows: 2000–01: £4 million; 2001–02: £4.5 million; 2002–03 and 2003–04: £5 million.

Additionally, Sure Start local programmes and Children's Centres provide a range of family support and counselling services and opportunities for couples to discuss relationship issues. Similarly, a Children and Family Court Advisory and Support Service (CAFCASS) officer might be involved at court directions hearings in providing assistance to children and their families to help them reach agreement on arrangements for their children, primarily in respect of contact and residence.

Children's Centres

Mr. Willis: To ask the Secretary of State for Education and Skills what the running costs of each children's centre have been since each was established, broken down by region. [185155]

Margaret Hodge *[holding answer 19 July 2004]*: The Sure Start Unit does not hold details on the running costs for individual children's centres—this is a matter for local authorities.

Connexions

Charles Hendry: To ask the Secretary of State for Education and Skills what recent discussions he has had with HM Customs and Excise concerning the ability of local authorities acting as Connexions partnership lead bodies to reclaim VAT charged on services subcontracted to private providers; and if he will make a statement. [185070]

Margaret Hodge *[holding answer 16 July 2004]*: Guidance on the ability of local authorities acting as Connexions Partnership lead bodies to reclaim VAT on services subcontracted to private providers was given at a workshop for Connexions Partnerships provided jointly with HM Customs and Excise on 20 April. Written guidance was issued to Partnerships on 12 May. We continue to work with HM Customs and Excise to consider, and advise on, individual Partnership proposals.

Mr. Willis: To ask the Secretary of State for Education and Skills what programmes are being implemented by the Connexions Service to engage young people during the summer holiday period. [185357]

Margaret Hodge: The majority of Connexions Partnerships (40 out of 47) are the Lead Delivery Agents for the Positive Activities for Young People (PAYP) programme. This provides diversionary and developmental activities for 8 to 19 year olds in school holiday periods. In addition 17 partnerships are involved with the delivery of the Big Lottery Fund's Uproject. This offers a similar range of activities and is aimed at 16 year olds who have no firm plans for their future. The Connexions Service is also responsible for signposting young people to a range of other activities provided by partner organisations.

The programmes comprise quality arts, sports and cultural activities which include an element of learning and self development.

Nursery Education (St. Helens)

Mr. Watts: To ask the Secretary of State for Education and Skills how many nursery places there were in St. Helens in each year from 1997 to 2004. [184624]

Margaret Hodge: The information is not available in the form requested.

Figures on the number of free nursery education places taken up by three and four-year-olds in St. Helens local education authority area are shown in the table.

Number of free nursery education places[1,2] taken up by three and four-year-old children in St. Helens local education authority area 1997–2003

Position in January each year	*Number*
1997	3,300
1998	3,200
1999	3,200
2000	3,600
2001	3,700
2002	3,900
2003	3,900

[1] Part-time equivalent number of free nursery education places taken up by three and four-year-old children.

[2] A free nursery education place comprises five two and a half hour sessions of early years education per week, for 33 weeks of the year, usually three terms of 11 weeks.

The latest figures on provision for three and four year olds in England were published in a Statistical Bulletin Provision for children under five years of age in England–January 2003' which is available on the Department's website www.dfes.gov.uk/rsgateway/.

Mr. Watts: To ask the Secretary of State for Education and Skills how many St. Helens families have been involved in Sure Start schemes. [184625]

Margaret Hodge: Around 2,100 families were seen by the five Sure Start local programmes in the St. Helens local authority area in 2003–04. We expect around 600 families to use the nine neighbourhood nurseries in the area. They offer 370 child care places and we are expecting some 900 children to use these.

Finance and Analytical Services Directorate

Mr. Collins: To ask the Secretary of State for Education and Skills what funding was made available to, and how many full-time equivalent staff were employed by, the Finance and Analytical Services Directorate in 2004–05. [182601]

Mr. Charles Clarke: As at 1 April 2004, 472 staff worked in the Finance and Analytical Services Directorate. The administrative costs allocated to the Directorate for 2004–05 were £19.268 million.

Mr. Collins: To ask the Secretary of State for Education and Skills what funding was made available to, and how many full-time equivalent staff were employed by, the *(a)* Analytical Services Directorate, *(b)* Secondary Education Group and *(c)* Standards and Effectiveness Unit in 2004–05, broken down by their constituent parts. [182602]

Mr. Charles Clarke: As at 1 April 2004, 293 staff worked in Analytical Services Directorate (ASD), 179 staff worked in the Secondary Education Group (SEG), and 143 staff worked in the Standards and Effectiveness Unit (SEU). However, as part of the Department's intention to create a stronger strategic capacity, ASD has recently restructured so that around 50 per cent. of analysts are based in the Department's Schools, Children Young People and Families, Lifelong Learning and Higher Education Directorates.

The administrative costs allocated for 2004–05 were:

(a) ASD, £11.444 million (of which £5.984 million has been transferred to other Directorates);

(b) SEG, £7.38 million and

(c) SEU, £3.62 million.

Learning and Skills Council (London East)

John Austin: To ask the Secretary of State for Education and Skills whether all people in the London East Learning and Skills Council region who wish to study for a basic skills qualification in a further education college in the academic year 2004–05 are guaranteed a place; and if he will make a statement. [184293]

Mr. Ivan Lewis: These are matters for the Learning and Skills Council. Mark Haysom, the Council's Chief Executive, will write to my hon. Friend with this information and a copy of his reply will be placed in the Library.

Literacy and Numeracy

Mr. Wiggin: To ask the Secretary of State for Education and Skills what recent discussions he has had with business representatives on levels of literacy and numeracy skills of school-leavers. [185214]

Mr. Ivan Lewis: I have many discussions with a range of business leaders about skills needs at all levels, including regular meetings with the CBI (Confederation of British Industry) and the Sector Skills Councils. I visit bursaries of all subjects on a regular basis.

At the Skills Strategy One Year on Conference on the 7 July, I welcomed the shared statement by the CBI, TUC (Trades Union Congress) and Small Business Council which emphasised the importance of ensuring employers, unions, employees, Government and training providers support the development of skills at basic level and Level 2 to improve employability.

Pupil Referral Units

Mr. Brady: To ask the Secretary of State for Education and Skills what estimate he has made of the rate of unauthorised absence from pupil referral units. [184434]

Mr. Ivan Lewis: The Department does not collect absence data from pupil referral units.

Youth Services

Charles Hendry: To ask the Secretary of State for Education and Skills when he will publish the Green Paper on the reform of services for young people; which specific services he is seeking to reform; and what recommendations for reform will be included. [185069]

Margaret Hodge *[holding answer 19 July 2004]*: We plan to work across Government to develop and publish a Green Paper for young people in autumn 2004. The types of service and issues it will address are set out in the Department for Education and Skills: Five Year Strategy for Children and Learners. It is too early to say what recommendations for reform will be included.

Students (Wandsworth)

Tom Cox: To ask the Secretary of State for Education and Skills what percentage of full-time students resident in the London borough of Wandsworth stayed in education after the age of *(a)* 16 and *(b)* 18 years in each of the last three years. [184118]

Mr. Ivan Lewis: For Inner London, participation in education and training is only shown as a total because participation estimates for individual Inner London LEAs cannot be estimated reliably. This is due to considerable numbers of pupils who attend independent schools in an LEA other than the one in which they reside and residence information for independent school pupils is not available. The percentage of 16-year-olds participating in full-time education in Inner London at end 2001 (the latest available year) was 73 per cent.

There are also figures published for local Learning and Skills Council (LSC) areas, which cover Inner London. These will be affected by the cross-boundary movement, though to a lesser extent due to their larger size. The London Central LSC area includes Wandsworth LEA. The percentage of 16-year-olds participating in full-time education in London Central LSC area at end 2001 (the latest available year) was 74 per cent.

These figures are taken from the Statistical Bulletin 01/2004 and have been produced using post-Census population estimates. Historic population estimates are not currently available on a comparable basis; and therefore, comparable participation rates for earlier years prior to 2001 cannot be produced.

The percentages of 18-year-olds participating in full-time undergraduate courses in Wandsworth LEA for the last three years are given in Table 1. The higher education (HE) figures show the proportion of students who gain places in HE courses at age 18, and so will not include those who enter at 19 or over.

Table 1: Proportion of English domiciled students aged 18 accepted through UCAS to full-time undergraduate courses in the UK, by LEA of domicile

As at autumn	*Percentage*
2001	23.9
2002	23.6
2003	23.4

Sure Start

Mr. Ivan Henderson: To ask the Secretary of State for Education and Skills what plans he has to support disadvantaged children and families who do not live in wards covered by the Sure Start programme. [184996]

Margaret Hodge: Children's centres are the focus of the Government's plans to expand high quality integrated service provision to young children and families. By 2008 we will have developed up to 2,500 children's centres. In areas not currently covered by Sure Start programmes, centres will develop from a wide range of settings in the maintained, private and voluntary sectors. In the long term the Government aim to develop a children's centre in every community.

Vending Machines

Tim Loughton: To ask the Secretary of State for Education and Skills (1) what assessment his Department has made of the distribution cost of installing vending machines in schools selling only water, fresh milk, juice and fruit; and if he will make a statement; [184541]

(2) whether his Department has conducted research into installing healthy vending machines in schools; and if he will study the example of the Green Machine when conducting work in this area; [184542]

(3) what correspondence his Department has had from *(a)* the National Association of Head Teachers and *(b)* the National Association of Schoolmasters/ Union of Women Teachers on vending machines in schools; and if he will make a statement. [184543]

Mr. Stephen Twigg: The provision of vending machines in schools is determined by individual school governing bodies.

The Department for Education and Skills (DfES) has not carried out any assessment of the distribution cost of installing vending machines which offer healthy food and drink, nor conducted research into installing healthy vending machines in schools. However, DfES and Department of Health are jointly funding the 'Food in Schools' (FiS) initiative, which includes an investigation of how healthy food and drink can be offered in vending machines in schools.

In addition, the Food Standards Agency (FSA) recently investigated the economic viability of healthier drinks vending provision in schools, and their findings are published in "A Feasibility Study into Healthier Drinks Vending in Schools" which can be found on the FSA's website: www.foodstandards.gov.uk/news/newsarchive/2004/apr/vending

Information about the Green Machine has been forwarded to officials in DoH and FSA who lead on vending machine projects.

We have not received correspondence about vending machines from the National Association of Head Teachers or the National Association of Schoolmasters/ Union of Women Teachers.

WORK AND PENSIONS

Students (Means-tested Benefits)

Chris Grayling: To ask the Secretary of State for Work and Pensions how much money was paid to students on means-tested benefits in the last year for which figures are available. [184877]

Mr. Pond: The information is not available.

Appointees

Mr. Burstow: To ask the Secretary of State for Work and Pensions how many claimants have an appointee to act on the claimant's behalf in respect of benefit claims and payments; and in how many cases the appointee is *(a)* a family member or friend, *(b)* a member of staff of a public body, *(c)* an independent care home owner or manager and *(d)* another person acting in their professional capacity. [182728]

Maria Eagle: The information is not available in the format requested as details on appointees are not collected centrally.

At the end of February 2004 there were 174,700 pensions credit claims where there was an appointee and 118,200 in respect of income support claims.

Mr. Burstow: To ask the Secretary of State for Work and Pensions how many representations have been received about appointeeship in connection with the proposed mental capacity legislation; and from whom. [182729]

Maria Eagle: The Department received correspondence from the Making Decisions Alliance after the pre-legislative scrutiny of the Draft Mental Incapacity Bill.

In addition, a number of organisations, including the Making Decisions Alliance, referred to the Department's appointee procedures when giving evidence to the Joint Committee on the Draft Mental Incapacity Bill.

Mr. Burstow: To ask the Secretary of State for Work and Pensions (1) what changes are planned on the information for *(a)* staff undertaking assessments of capacity and *(b)* appointees following the implementation of the mental capacity legislation; [182730]

(2) whether there will be a requirement for staff of his Department undertaking assessments of claimant's capacity to manage his or her affairs to have regard to the Code of Practice under the mental capacity legislation. [182731]

Maria Eagle: We are currently looking at the potential impact of this Bill on our appointee arrangements. We will finalise the review in the event that the Bill receives Royal Assent and the Code of Practice is completed.

Benefit Fraud

Steve Webb: To ask the Secretary of State for Work and Pensions what the weekly multiplier is that is used to estimate the average amount of housing and council tax benefit fraud run-on in cases where a fraudulent claim has been detected. [183161]

Mr. Pond: For local authorities, the Weekly Benefit Saving (WBS) scheme was replaced by the Security Against Fraud and Error (SAFE) scheme on 1 April 2002. Unlike WBS, where a 32 week multiplier was used when calculating savings from anti fraud activity, no such multiplier is used for SAFE.

Under SAFE, local authorities earn a fixed monetary reward based on the amount of reduction in benefit for each overpayment which they detect that is a result of fraud or claimant error. In addition, local authorities are partly compensated for the costs incurred in bringing forward sanctions and prosecutions.

Steve Webb: To ask the Secretary of State for Work and Pensions pursuant to his written answer of 17 May 2004, *Official Report*, column 731W, on benefit fraud, what the average *(a)* weekly incorrect benefit reward and *(b)* security against fraud and error subsidy was as a proportion of expenditure. [183261]

Mr. Pond: Local authorities earn Weekly Incorrect Benefit (WIB) rewards for overpayments they recover which have arisen as a result of fraud and claimant error. The average total WIB reward across all local authorities as a proportion of expenditure was 0.2 per cent. in 2002–03. The average total Security Against Fraud and Error subsidy across all local authorities as a proportion of expenditure was 0.3 per cent. in 2002–03.

Mr. Webb: To ask the Secretary of State for Work and Pensions how many staff in his Department have been *(a)* investigated, *(b)* suspended, *(c)* dismissed, *(d)* prosecuted and *(e)* convicted for involvement in benefit fraud in each of the last six months; and what amounts were involved in each case. [184688]

Mr. Pond: Information is not available in the exact format requested. Such information as is available is shown in the table and accompanying text.

32 cases of staff suspected of involvement in benefit fraud have been investigated during the period 1 January 2004 to 30 June 2004. These cases include both fraudulent personal claims to benefit and assisting third parties to commit benefit fraud.

In the same period, 10 members of staff were given either a disciplinary penalty and/or were prosecuted and convicted of an offence. Some of these will have resulted from investigations in earlier periods. Details, including the amount of benefit involved in each case, are shown in the following table. Where an amount is not shown in the table, either it has not been possible to determine a value or the overpayment is still being calculated.

Number	*Outcome*	*Value*
1	Officer prosecuted and sentenced to a 12 month conditional discharge and £75 costs. The officer continues in post pending a decision about his employment status	£979
2	Officer prosecuted for offences committed in 2000 and sentenced to 11 months imprisonment.	£38,938
3	Officer prosecuted and sentenced to two months imprisonment. The officer was initially suspended on full pay, which changed to suspension without pay from the date formal charges were made. They have since been dismissed.	£4,180 plus an additional potential overpayment of £2,013
4	Officer prosecuted and sentenced to an 18 month Community Rehabilitation Order and ordered to pay £1,510, the amount to be repaid in full by 18 December 2004. The officer was initially suspended from duty and subsequently resigned.	£410
5	Officer found guilty of benefit fraud and will be sentenced on 16 July 2004. The officer was suspended from duty and subsequently dismissed.	£1,327 plus an additional potential overpayment of £2,600
6	Officer sentenced to a 200 hour community service order and has been dismissed	£3,112
7	Officer prosecuted and fined £120 costs and ordered to pay £628. The overpayment has been repaid in full	£2,599
8	Officer Dismissed	£5,280
9	Officer Dismissed. Prosecution pending.	£660
10	Officer Dismissed	—

In addition to the cases listed in the table four officers resigned prior to a penalty being imposed.

Details of staff suspensions are not routinely captured. Where appropriate, staff are suspended from duty pending the outcome of any action.

Benefits (Electronic Claims Facility)

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will list the benefits that can be claimed using an electronic claims facility. [185057]

Mr. Pond: At present, only Carers Allowance can be claimed using an electronic claims facility; however, we are working to extend this provision to other benefits as soon as it is practical to do so. In addition, electronic claim forms are available on the internet for many of our benefits; these can be completed before being printed off, signed and forwarded to the appropriate office.

Child Support Agency

Steve Webb: To ask the Secretary of State for Work and Pensions how many prosecutions resulting from the criminal offence of non-co-operation with the Child Support Agency there have been since January 2001. [184670]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Webb dated 20 July 2004:

In reply to your recent parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how many prosecutions resulting from the criminal offence of non-co-operations with the Child Support Agency there have been since January 2001. As at 30 June 2004, 319 people have been prosecuted under the Child Support Pensions and Social Security Act 2000 for failing to provide information to the Child Support Agency. Of these, 317 have been found guilty.

Mr. Webb: To ask the Secretary of State for Work and Pensions how much the Child Support Agency has been owed in outstanding maintenance payments in each of the last seven years. [184671]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Webb, dated 20 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how much the CSA has been owed in outstanding maintenance payments in each of the last 7 years.

The annual accounts of the Agency indicate that the recoverable balance outstanding on full maintenance assessments, as at 31 March each year, is as follows:

	£million
31 March 1998	412
31 March 1999	512
31 March 2000	521
31 March 2001	528
31 March 2002	509
31 March 2003	664

The accounts to 31 March 2004 will be published shortly.

Mr. Webb: To ask the Secretary of State for Work and Pensions how many non-resident parents have had their driving licences removed by the courts since April 2001 as a result of the provisions introduced under the Child Support, Pensions and Social Security Act 2000. [184673]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Webb, dated 20 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, how many non-resident parents have had their driving licences removed by the courts since April 2001 as a result of the provisions introduced under the Child Support, Pensions and Social Security Act 2000.

Disqualification from driving (and committal to prison) is only considered after all other enforcement options have been attempted or discounted. Since the power to withdraw driving licences was brought into effect on 2 April 2001 20 licences have been suspended and 2 licences have been removed.

Departmental Staff

Mr. Dorrell: To ask the Secretary of State for Work and Pensions how many full-time equivalent employees of his Department there were in the East Midlands in each year since 1997. [185495]

Maria Eagle: Information on staff numbers by Government Office Region was not collected prior to September 2001. Information at that date and each year thereafter is in the table.

DWP staff numbers in East Midlands Government Office Region

	Staff numbers
30 September 2001	5,730
30 September 2002	6,126
30 September 2003	6,245

Notes:

1. Numbers are Whole Time Equivalent (rounded to the nearest whole number).
2. Numbers are consistent with Cabinet Office definitions other than the inclusion of staff on paid maternity leave.
3. Numbers are point in time at the dates shown.

Lynne Jones: To ask the Secretary of State for Work and Pensions what co-ordination is taking place across agencies and sections of his Department to minimise the loss of experienced staff in offices subject to plans for closure. [185148]

Maria Eagle: Following the Budget and Spending Review announcements detailed business and staffing plans are currently being developed across the Department in order to manage the reduction of 30,000 posts by March 2008.

This planning activity is being undertaken through co-ordinated activity across all agencies and sections of the Department. In taking the programme of change forward staff deployment will be managed to ensure the Department retains and utilises the skills and experience of staff in each of its businesses.

Havering (Employment)

Mr. Rosindell: To ask the Secretary of State for Work and Pensions what plans he has to help those seeking employment in Havering. [184254]

Jane Kennedy: The administration of Jobcentre Plus is a matter for the Chief Executive of Jobcentre Plus, David Anderson. He will write to the hon. Member.

Letter from David Anderson to Mr. Rosindell dated 20 July 2004:

The Secretary of State has asked me to reply direct to your question about the help available to those seeking employment in Havering. This is something which falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

There are two Jobcentre Plus offices delivering services to the people of Havering.

1. Romford Jobcentre Plus, 30 Main Road, Romford. Opened on 7 June 2004.
2. Hornchurch Jobcentre Plus, North Street, Hornchurch. Opened on 24 March 2004.

Both offices provide a range of services to customers seeking employment, including:

access to a personal adviser to assist finding suitable employment;

access to touch screen Jobpoints or the internet;

entry to the New Deal programme;

work trials, for customers to show employers what they can do or to try out a job.

Depending on personal circumstances there is other help available to help customers find employment. For example, lone parents may be able to get help with childcare costs. People with disabilities can get help from specialist Disability Employment Advisers or join New Deal for Disabled People. A range of training programmes is also available to provide extra support and help in getting, and keeping, a job. Further details on the services available are contained in leaflet PFL 2, available in Jobcentre Plus offices, or by visiting www.jobcentreplus.gov.uk.

Although these services are common to Jobcentre Plus offices, there are a range of local initiatives, specific to Havering, to help local people into work.

The Oldchurch Recruitment Centre, for example, opened in May 2004 and initially targeted the construction workers for the first phase of the development of the new Oldchurch Hospital. This positive partnership working with local employers has resulted in over 30 customers gaining employment at the site. To expand this scheme we are developing working agreements with the local Health trusts and have begun to match Jobcentre Plus customers with vacancies as they arise in local Hospitals.

Another initiative is with the new Asda supermarket, due to open in Romford in the autumn of 2005. Work is to begin on clearing the site in the autumn 2004 and we are in discussion to use our services to recruit people for the demolition and construction phases of the new store. Furthermore, we aim to undertake the entire recruitment of staff for this new supermarket.

We have also planned a number of events for the summer to specifically address the employment needs of customers in Havering. In partnership with the London Borough of Havering, Jobcentre Plus will be running a stand at the Havering Town Show on 29 and 30 August. This will promote the services of Jobcentre Plus and assist customers in finding employment. Furthermore there will be a seasonal vacancy promotion in the Romford area on 21 and 22 September 2004 designed to match customers to upcoming Christmas vacancies.

The District Manager for North East London, has written to all local MPs offering to meet on a regular basis to discuss developments in the District.

I hope this is helpful.

Jobseeker's Allowance (Havering)

Mr. Rosindell: To ask the Secretary of State for Work and Pensions how many people were claiming Jobseeker's Allowance in Havering in each year since 2000. [184249]

Mr. Pond: The information is in the table.

People claiming Job Seekers Allowance in Havering local authority area

	Number of people claiming
May 2000	2,934
May 2001	2,241
May 2002	2,346
May 2003	2,593
May 2004	2,444

Notes:
1. Information related to all Job Seekers Allowance (JSA) claimants, and will include both those receiving contribution-based JSA, income-based JSA, and claimants not receiving JSA but signing for national insurance credits only.
2. Information is based on a 100 per cent. count of claimants of unemployment-related benefits.

Source:
Count of unemployment-related benefits, Jobcentre Plus computer systems.

Employment Tribunals

Malcolm Bruce: To ask the Secretary of State for Work and Pensions how many cases against his Department, the agencies for which it is responsible and its predecessor organisations have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent (A) settling and (B) contesting claims. [181469]

Maria Eagle: The available information is in the tables.

Table A—legal services provided to the former Employment Service and Jobcentre Plus by private sector law firm

	1997	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*
Number of cases								
Equal pay	1	0	0	0	1	1	1	0
Sex discrimination	6	12	9	8	6	4	4	1
Race discrimination	5	2	8	10	5	2	3	0
Disability discrimination	9	14	14	27	20	22	18	7
Unfair dismissal	0	0	6	10	7	13	11	8
Number of cost awards								
Against respondent	—	—	—	—	2	4	11	14
Against applicant	—	—	—	—	—	—	—	—
Costs								
Settling	—	—	—	—	121,500.00	43,580.00	94,291.00	96,277.95
Contesting	114,728.26	219,312.39	190,883.69	284,339.38	460,693.75	290,394.51	334,085.94	131,064.09

Table B—legal services provided to DWP by Government Solicitors

	2000-01	2001-02	2002-03	2003-04
Number of cases				
Disability discrimination	—	—	—	42
Race discrimination	—	—	—	26
Sex discrimination	—	—	—	32
Unfair dismissal	—	—	—	63
Other	—	—	—	33
Total number of cases	109	81	104	196
Counsel fees	162,315	104,493	267,303	247,603

Two sets of figures are provided above due to the merger in 2002 of the Employment Service with the Benefits Agency to form Jobcentre Plus, a business unit of the Department for Work and Pensions. Prior to the merger, legal services on employment law matters were provided to the Employment Service by a private firm of solicitors—who remain the legal service provider for Jobcentre Plus. These figures are provided in Table A.

Table B represents the employment law statistics for cases conducted by departmental solicitors, who dealt with all employment litigation cases on behalf of the former BA, CSA, Pensions Service and DCS and other DWP agencies. Where the table is incomplete, information is not readily available and it would involve disproportionate cost to the Department to collate these figures. In particular, information on the costs of settling cases was not collected by the Department, nor was information collated, prior to 2003, on the specific types of case against the Department.

Hospital Downrating Rules

Mr. Webb: To ask the Secretary of State for Work and Pensions what the value in cash terms was of reducing each benefit affected by the hospital downrating rules in each of the last seven years. [184672]

Mr. Pond: The information requested is not available.

Jobcentre Plus

Mr. Simmonds: To ask the Secretary of State for Work and Pensions what the running costs, including staffing costs, of Jobcentre Plus centres were in each year since 1997; and how many people were employed in centres in each year. [182164]

Jane Kennedy: The administration of Jobcentre Plus is a matter for the Chief Executive of the Jobcentre Plus, David Anderson. He will write to the hon. Member.

Letter from David Anderson to Mr. Simmonds, dated 20 July 2004:

The Secretary of State for Work and Pensions has asked me to reply direct to your question concerning the running costs and staff costs of Jobcentre Plus centres each year since 1997, and how many people were employed in centres in each year. This is something which falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

The information you have asked for can be found in the table below.

Year ended 31 March (for financial figures)	*Total staff at 30 April (WTE)*	*Staff costs (£000)*	*Other administration costs (£000)*	*Total gross administration costs (£000)*
1997	31,550	—	—	—
1998	30,796	—	—	—
1999	32,675	—	—	—
2000	32,620	—	—	—
2001	34,110	—	—	—
2002	[1]85,020	—	—	—
2003	80,170	1,712,111	1,254,131	2,996,242
2004	79,234	1,669,766	1,384,015	3,023,303

[1] Staff numbers increase from 2001 to 2002 due to the merger of the Benefits Agency and the Employment Service

Source:

Cabinet Office Statistics website for Headcount.

Latest draft of the 31 March 2004 accounts for financial figures.

It may be helpful if I explain that Jobcentre Plus came into existence in April 2002, bringing together staff from the Employment Service and part of the Benefits Agency. It deals with both claims to, and payments of, all working age benefits as well as job-finding activities. Data on staff is collected by grade rather than job role and it is not possible to identify accurately the number of staff working in front facing customer service centres from this information. The financial figures shown are only available since the introduction of Jobcentre Plus.

As these figures show, there has been a reduction in staff numbers from 2003 to 2004 and, as would be expected, the staff costs for 2004 have also decreased. However, the gross administration costs for the agency have increased. This is due to higher costs falling under the heading "Other Administration Costs". There are a number of different categories of expenditure that come under this section of the accounts, although the majority are not directly related to the number of staff employed. The main variances relate to the following:

	£ million
Areas of expenditure impacted by Jobcentre Plus Implementation Project	+ 71
Increased accommodation costs	+ 22
Increased use of corporate IT services	+ 22
Reduced income from other agencies as less project/ non-project work carried out on their behalf	+ 59
Expenditure relating to a contract for provision of IT services has been absorbed by DWP	-40
Total	+ 134

I hope this is helpful.

Attendance Allowance

John Thurso: To ask the Secretary of State for Work and Pensions pursuant to his answer of 16 June 2004, *Official Report*, column 1018W, on attendance allowance, how many attendance allowance claims in Scotland have been subject to appeal since February 2002, broken down by *(a)* disability benefit centre and *(b)* month. [183264]

Maria Eagle: The information required is set out in the following tables. Total numbers of attendance allowance cases in payment in Scotland, at February 2004 and February 2004 are included in a subsequent table.

Attendance allowance appeals in Scotland, for Glasgow Disability Benefit Centre and the period February 2002 to May 2004 by month

Month	Lodged[1]	Received[2]	Cleared at hearing	Cleared in favour	Cleared against	Cleared upheld	Cleared others	Adjourned	Postponed

Attendance allowance appeals in Scotland, for Edinburgh Disability Benefit Centre and the period February 2002 to May 2004 by month

Month	Lodged[1]	Received[2]	Cleared at hearing	Cleared in favour	Cleared against	Cleared upheld	Cleared others	Adjourned	Postponed
March	30	20	40	20	—	20	—	5	10
April	25	15	30	15	—	15	—	10	—
May	—	75	20	5	—	15	—	10	5
Total	1,150	1,175	905	390	—	495	20	140	120

'—' denotes data equal to nil or negligible.
[1] An appeal is lodged with the first tier agency. This may bring about a reconsideration by the decision maker. When the first tier agency receives this application, this is called the lodgement date.
[2] When an appeal is sent to the Appeals Service for them to action, this is the received date.
Appeals data notes:
1. All figures are subject to change as more up to date data becomes available.
2. The whole of Scotland is covered by Glasgow and Edinburgh Disability Benefits Centres figures for the latest months may rise significantly as information feeds through to the Appeals Service.
3. Figures are rounded to the nearest five and may not sum.

Attendance allowance in payment within Scotland, February 2002 and 2004

	Attendance allowance in payment
February 2002	129,200
February 2004	134,600

Attendance allowance data notes:
1. Cases where payment of benefit has been suspended are excluded.
2. February 2002 figure taken from a 5 per cent. sample at 28 February 2004.
February 2004 figure taken from a 5 per cent. sample at 29 February 2004.
3. From November 2002, the methodology for producing these figures was changed to allow statistics to be published much sooner. This has resulted in a small increase in the reported case load. This is because some cases which have actually terminated but have not yet been updated on the computer system are now included.
4. May 2004 are unavailable, as yet unreleased.

IAD Information Centre, 100 per cent. sample.

Pension Protection Fund

Mr. Laws: To ask the Secretary of State for Work and Pensions whether his proposed fund to offer financial assistance to workers who have lost their pension rights in private schemes will cover employees of foreign owned entities; and if he will make a statement. [184749]

Malcolm Wicks: The details of the financial assistance scheme, including the eligibility of employees of foreign owned entities, will be developed through consultation with stakeholders such as pension scheme trustees, trades unions and key business representatives. Until this work has been completed we will not be in a position to give any scheme members assurances that they will be covered. To do otherwise could be misleading.

Pensioners (Domiciled Abroad)

Mr. Ian Taylor: To ask the Secretary of State for Work and Pensions what arrangements are in place for the payment of *(a)* state pension and *(b)* other benefits to UK senior citizens who retire to (i) another EU state, (ii) Norway, (iii) Switzerland, (iv) the USA and (v) Australia; what the current value is of a UK state pension paid to an individual who retired to each of these countries in (A) 1985, (B) 1995 and (C) 2000; and if he will estimate the cumulative difference in the total value of pensions such an individual would have received in each of the stated areas compared to an individual who retired in the UK. [184368]

Malcolm Wicks: The Information is not available in the format requested. Such information as is available is as follows:

Payment of a UK State Pension is not affected by a person's country of residence during retirement. However, where a pensioner lives outside the UK, the State Pension is not uprated unless he or she is living in a country in respect of which EC legislation or a reciprocal agreement provides for uprating.

The European social security co-ordinating regulations contain rules which set out whether UK benefits are paid in another Member State (Regulation 1408/71). From June 2002 Switzerland is also covered by these regulations. UK pensioners who live in another Member State or Norway, Liechtenstein, Iceland or Switzerland may receive UK benefits there. This will depend on whether the benefits are covered by the coordinating regulations, the nationality of the person and which state they are living in.

The table shows the cumulative value, from 1 April 1985, 1995 and 2000 respectively to the end of the 2003/04 financial year, of upratings of a full basic State Pension (excluding age additions) which a person would have received if:

a) he remained entitled to a full basic State Pension; and

b) he was continuously resident in a country in respect of which either legislation or a reciprocal agreement provided for the uprating of State Pension.

£

Date	Rate of full basic State Pension per week	Cumulative value of year on basic State Pension
1 April 1985	35.80	20,467.95
1 April 1995	57.60	4,626.35
1 April 2000	66.75	1,360.10

Polygamous Spouses

Mr. Tynan: To ask the Secretary of State for Work and Pensions (1) what the total value of benefits paid to polygamous spouses was in each of the last five years; [185671]

(2) how many polygamous spouses are in receipt of benefits from his Department. [185672]

Mr. Pond: The information is not recorded centrally and could be obtained only at disproportionate costs.

Post Office Card Accounts

Ian Lucas: To ask the Secretary of State for Work and Pensions (1) whether staff in the Department are permitted to dissuade benefit recipients from opening Post Office Card Accounts; [184628]

(2) how many people who are not in receipt of benefits have opened a Post Office Card Account. [184629]

Mr. Pond: Staff in the Department for Work and Pensions do not in any way discourage customers from opening Post Office card accounts.

All Department for Work and Pensions staff have been provided with information on all of the account options available to the customer. The role of our staff is to provide factual information on the features of the different account options available to the customer. The customer can then decide which type of account they choose to have their money paid into based on their individual needs and circumstances.

Many customers are choosing the Post Office card account option, with 2.8 million having opened one so far.

The Post Office card account is available only to those in receipt of benefits, state pensions and tax credits.

However, it is important that customers are made aware that the Post Office card account is not the only account that can be used at post offices.

Renewable Energy

Paul Holmes: To ask the Secretary of State for Work and Pensions what proportion of electricity used by buildings in *(a)* his Department and *(b)* its agencies has come from renewable sources for each year from 1997 to date. [181394]

Mr. Pond: DWP was set up in June 2001. The proportion of electricity it has obtained from renewable sources has been 25 per cent. and 21.4 per cent. in 2001–02 and 2002–03 respectively.

It is not possible to provide an accurate breakdown of consumption to Agency level, as invariably DWP buildings are occupied by a number of the Department's businesses.

Information for 2003–04 will be reported in the next Sustainable Development in Government report in November 2004.

The Department continues to exceed the target for sourcing 10 per cent. of its electricity from renewable sources, as set out in the "Framework for Sustainable Development on the Government Estate". The framework can be found on the Sustainable Development in Government website.

Referrals for Medical Advice (Claimants)

Mr. Burstow: To ask the Secretary of State for Work and Pensions how many referrals for medical advice were made by staff of his Department when assessing the capacity of a claimant to manage his/her financial affairs in 2002–03. [182700]

Maria Eagle: The Department does not normally require a report by a qualified medical officer before granting an appointeeship. A visiting officer will make an independent assessment of a customer's ability to manage his or her own affairs based on Department guidelines. In cases where there is some doubt the opinion of a suitably qualified professional may be sought, for example a social worker, community psychiatric nurse or general practitioner.

Information is not available on of the number of interviews that are undertaken.

Mr. Burstow: To ask the Secretary of State for Work and Pensions (1) what training staff of his Department receive prior to undertaking assessments of a claimant's capacity to manage their own financial affairs; [182698]

(2) what guidance is given to staff of his Department on appointeeship; when this guidance was last updated; and whether it is available to the public *(a)* through the Department's website and *(b)* from local offices. [182727]

Maria Eagle: A wide range of training is available to staff undertaking assessments of a person's capacity to manage their own affairs, including training on disability awareness, and working with vulnerable groups, which contains specific training regarding dealing with people with mental health problems. In addition new visiting officers will spend time accompanying more experienced members of staff as part of their training.

All staff have access to guidance in the Agents, Attorneys, Appointees and Receivers Guide, which is currently being updated. While there is currently no specific training about undertaking an assessment of a person's capacity to manage their own financial affairs, a new training product is currently being developed which will help staff identify who may need an appointee.

The Department's internal guidance is not available to members of the public.

Sickness Absence

Mr. Webb: To ask the Secretary of State for Work and Pensions what the average number of working days lost per person due to sickness absence in *(a)* his Department and *(b)* each of its business areas was in 2003–04. [184674]

Maria Eagle: The information required for 2003–04 is in the table.

	Average working days lost
DWP	12.6
Jobcentre Plus	12.7
The Pension Service	12.1
Child Support Agency	15.6
Disability and Carers	11.9
The Appeals Service	11.2
Corporate centre	10.2

Civil Servants (Staffing Plans)

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will provide a breakdown of the estimated civil service staff *(a)* reductions and *(b)* relocations within his Department and its business units in each of the next four years, as set out in the Spending Review. [185060]

Maria Eagle: Following the Spending Review announcement, detailed business and staffing plans continue to be developed across all parts of the Department in order to manage the reduction of 30,000 posts by March 2008, and the planned relocation of work from London and the south east. My right hon. Friend the Secretary of State made a written statement to the House on 29 June outlining the first phase of this transformation. We will inform the House as further planning decisions are made.

Unemployment Statistics (Over-50s)

Paul Holmes: To ask the Secretary of State for Work and Pensions how many and what proportion of people between the age of 50 and state pension age who are not working are claiming benefit, broken down by gender; how many of these rely on benefits to make up more than half of their income, broken down by gender; how much is being spent on benefits for this group; and if he will make a statement. [172532]

Mr. Pond: The estimated expenditure on incapacity related benefits, Jobseekers Allowance, other income-related benefits and disability or carer benefits for claimants aged 50 to state pension age is estimated to be £11.6 billion in 2003–04. Total expenditure on all claimants aged 50 to state pension age in 2003–04 is estimated to be £12.5 billion.

In 2001–02, the latest year for which information is available, benefits made up over half of individual income for 82 per cent. of men and 89 per cent. of women, overall 86 per cent. of people, aged 50 to state pension age receiving any benefit other than those with just Child Benefit or Winter Fuel Payment[1] and not working.

The available information on the number of people aged 50 to state pension age claiming benefits, and the number in this age group who are not in work is in the table.

[1] Individual incomes data 2001–02. Housing Benefit and Council Tax Benefit are not considered as benefit income or part of total income.

People aged 50 to State pension age claiming key benefits and estimated numbers not in work

	Men	*Women*	*All*
People claiming key benefits other than Disability Living Allowance November 2003[1]	1,015,600	545,500	1,561,100
As above but excluding cases identified as in work or Income Support cases in residential care	1,002,100	533,800	1,535,900
Estimated number of individuals in private households not in work autumn/winter 2003	1,410,000	1,231,000	2,641,000

[1] Figures include people claiming Incapacity Benefit, Severe Disablement Allowance, Income Support or Jobseeker's Allowance.

Source:

Number of people claiming benefits—5 per cent. sample of administrative data. Estimated numbers not in work—Labour Force Survey.

Income Thresholds

Andy King: To ask the Secretary of State for Work and Pensions what the income thresholds used in paragraph 7 of the reply by the Government to the Second Report of the Work and Pensions Committee of Session 2003–04, Cm 6200 are in weekly cash amounts of income *(a)* before housing costs, (i) for the relative low income and (ii) for the absolute low income and *(b)* after housing costs (A) for the relative low income and (B) for the absolute low income. [183821]

Mr. Pond: The information is in the tables.

Weekly cash values for the relative low income threshold by illustrative household type at 2002–03 prices

Household type	*Before housing costs*	*After housing costs*
Couple with no children (equivalised income benchmark)	194	172
Couple with two children aged 5 and 11	283	253
Single with two children aged 5 and 11	207	175
Couple with one child aged 5	235	208
Single with one child aged 5	159	131

Weekly cash values for the absolute low income threshold by illustrative household type at 2002–03 prices

Household type	*Before housing costs*	*After housing costs*
Couple with no children (equivalised income benchmark)	166	140
Couple with two children aged 5 and 11	242	206
Single with two children aged 5 and 11	178	143
Couple with one child aged 5	201	170
Single with one child aged 5	136	107

Notes:

1. Estimates relate to the household's status at the time they were interviewed for the FRS.

2. The threshold '60 per cent. of median' (equivalised weekly household income) is the most commonly used in reporting absolute and relative trends in low income.

3. The estimates are based on sample counts, which have been adjusted for non-response using multipurpose grossing factors that control for tenure, council tax band and a number of other variables. Estimates are subject to both sampling error, and to remaining variability in non-response which is not corrected by the grossing regime.

4. Equivalised incomes use the McClements equalisation scale.

5. When reporting numbers of individuals in 'relative low income', we apply 60 per cent. of the median income for the year in question; therefore, this threshold changes from one year to the next.

6. When reporting numbers of individuals in 'absolute low income', we take a single level of real equivalised income, which is set at 60 per cent. of the 1996–97 median income, which is £166 before housing costs and £140 after housing costs, at 2002–03 prices. Equivalised income adjusts household income for household size and composition. The corresponding cash values for this absolute threshold, for different family types are shown in the table.

7. All figures are in pounds per week, in 2002–03 prices, rounded to the nearest pound, and are consistent with current National Statistics conventions.

8. The figures relating to absolute and relative low income were derived from "Households Below Average Income—An analysis of the income distribution for 1994–95—2002–03" (HBAI). Copies are available in the Library.

Source:
Family Resources Survey (FRS).

New Deal

Mr. Rosindell: To ask the Secretary of State for Work and Pensions how many young people have joined the Young New Deal scheme in each year since its inception. [184308]

Jane Kennedy: The information is in the table.

New Deal for Young People

	Number
1998	212,930
1999	192,290
2000	174,770
2001	162,700

New Deal for Young People

	Number
2002	164,230
2003	171,900
2004	45,120
Total	1,123,930

Notes:
1. All figures are for January to December except 2004 which is January to March.
2. All figures are starts rather than individuals and include people who may have started New Deal more than once.
3. Figures are rounded to the nearest 10.
4. Totals may not sum due to rounding.

DWP Information and Analysis Directorate

HEALTH

Agenda for Change

Mr. Burstow: To ask the Secretary of State for Health pursuant to the Answer of 6 July 2004, *Official Report*, column 606W, on Agenda for Change, which of the early implementer-sites are testing the new system for *(a)* community nurses and *(b)* allied health professionals; and if he will make a statement. [184205]

Mr. Hutton: Community nurses are employed in eight of the 12 early implementer sites. Allied health professions are employed in 10 sites.

A list of the sites who are currently testing the system for these staff groups is shown in the table.

Community nurses	*Allied health professions*
Avon and Wiltshire Mental Health Partnership	Aintree Hospitals NHS Trust
Central Cheshire Primary Care Trust	Avon and Wiltshire Mental Health Partnership
City Hospitals Sunderland	Central Cheshire Primary Care Trust
Guy's and St. Thomas' Hospital National Health Service Trust	City Hospitals Sunderland
Herefordshire NHS Primary Care Trust	Guy's and St. Thomas' Hospital NHS Trust
James Paget Healthcare NHS Trust	Herefordshire NHS Primary Care Trust
South West London and St. George's Mental Health NHS Trust	James Paget Healthcare NHS Trust
West Kent and Social Care Trust	Papworth Hospital NHS Trust
	South West London and St. George's Mental Health NHS Trust
	West Kent and Social Care Trust

Care Packages

Simon Hughes: To ask the Secretary of State for Health how many people have received care packages to enable them to stay in their homes in Greater London in each of the last five years. [179394]

Dr. Ladyman: The table shows the estimated number of clients who received a community based service following a community care assessment in Greater London for 2000–01 to 2002–03. Data for previous years are not available.

Estimated number of clients receiving a community based service[1] in Greater London[2]

Rounded data

	Number of clients[3]
2000–01	179,000
2001–02	186,000
2002–03	182,000

[1] Community based services includes day care, meals, respite care, direct payments, professional support, transport and equipment as well as home care.
[2] Includes councils with social services responsibilities in inner and outer London.
[3] Care should be taken when comparing data across the years as recording practices, level of completion and quality may have changed.

Chiropody Services (Access)

Mr. Rosindell: To ask the Secretary of State for Health what measures he is taking to improve access to chiropody services. [182821]

Mr. Hutton: The Government have taken action to increase numbers of chiropodists working in the national health service and entering training. Between 1997 and 2003, the number of qualified chiropodists employed in the NHS has increased by 16 per cent. and between 1999–2000 and 2003–04, the number of students entering training has increased by 33 per cent. Further increases in the NHS chiropody workforce are

expected as a result of the "Delivering the NHS Plan" forecast for 30,000 more therapists and scientists by 2008 than there were in 2001.

Consultancy Services

Mr. Burstow: To ask the Secretary of State for Health how much has been spent by *(a)* his Department and *(b)* the NHS on consultancy services in each year since 1996. [182412]

Mr. Hutton: Expenditure by the Department and the national health service on external consultancy services in each year from 1996–97 to 2003–04, is shown in the table. However, it is not possible to separate the figures for consultancy and contract staffing for NHS trusts and primary care trusts (PCTs).

£ million

Financial year	*Department*	*Strategic health authority*	*NHS trust*	*Primary care trust*
1996–97	14.699	[2]22.003	[2]107.152	[4]—
1997–98	12.694	[2]24.838	[2]10.722	[4]—
1998–99	7.332	[2]28.537	[2]93.072	[4]—
1999–2000	8.132	[2]35.056	[2]93.304	[4]—
2000–01	6.531	[2]42.097	[2]105.853	[2]0.948
2001–02	6.800	[2]66.855	[2]125.948	[2]16.090
2002–03	7.266	[2]19.648	[2]149.438	[2]59.154
2003–04	[1]10.031	[3]—	[3]—	[3]—

[1] This is the latest figure included in the accounts, but the accounts have yet to be authorised.
[2] Figures for NHS trusts and PCTs include both contract staffing and consultancy services.
[3] Figures for strategic health authority, NHS trusts and PCTs not yet available for this year.
[4] PCTs were not in existence for these years.

Data Protection

Mr. Randall: To ask the Secretary of State for Health what data protection rules apply to the transmission of UK health records to health authorities abroad. [184342]

Mr. Hutton: The Data Protection Act 1998 regulates disclosures, including transfers abroad, of health information about identifiable living individuals. Subject to specified exemptions the Act requires data controllers, including national health service organisations, to comply with the eight 'data protection principles' set out in schedule 1, part 1 to the Act. The first and eighth principles are particularly relevant to transfers abroad. Where the foreign transfer is to a 'data processor', for example, any person or organisation processing data on behalf of the United Kingdom data controller, the seventh principle will also be important.

Among other provisions, these three principles respectively provide that such transfers must be fair and lawful; ensure "an adequate level of protection for the rights and freedoms of data subjects in relation to the processing of personal data" and include "appropriate technical and organisational measures" to protect the information.

Deafblind Awareness Week

Mr. Win Griffiths: To ask the Secretary of State for Health what plans he has to be involved in and mark the celebration of Deafblind Awareness Week. [178618]

Dr. Ladyman: Although I was invited to an event organised by Sense to mark Deafblind Awareness Week, I was unfortunately unable to attend. I recognise the contributions of Sense, Deafblind UK and other organisations in the voluntary sector in raising awareness of the needs of deafblind people.

Dentistry

Mr. Nigel Jones: To ask the Secretary of State for Health how many dentists have retired from dentistry in each year since 1997 for which figures are available. [180640]

Ms Rosie Winterton: The available information in the table is from the National Health Service Pensions Agency for the number of pensions awarded in England and Wales where a NHS pension has been claimed prior to the scheme's normal retirement age and at the scheme's normal retirement age. These will include pensions paid on the grounds of ill health, premature retirements following redundancy and voluntary early retirement before age 60 (introduced from 6 March 1995).

All dentists' retirements

	Total dentist pension awards
1997	359
1998	333
1999	322
2000	314
2001	363
2002	375
2003	363

Digital Hearing Aids

Chris Ruane: To ask the Secretary of State for Health how many digital hearing aids were fitted in each of the past seven years in each region of England. [180034]

Dr. Ladyman: The national health service fitted very few, if any, digital hearing aids before September 2000. The modernising hearing aid services project began as a pilot project in September 2000, initially in only 20 sites. In the first 18 months of the project to April 2002, about 30,000 digital hearing aids were fitted. A further 42,000 aids were issued in the year to April 2003; and 80,000 were fitted in the year to April 2004. We are unable to give a breakdown of digital hearing aid provision by region.

Free NHS Treatment (Eligibility)

Mrs. Curtis-Thomas: To ask the Secretary of State for Health (1) whether there are systematic checks on eligibility for free NHS treatment; [177792]

(2) what assessment has been made of the level of abuse of the NHS by people who have no right to free treatment. [177793]

Mr. Hutton: General practitioner practices need to check details of an individual's residence or previous registration before deciding whether to accept the person as a registered patient, either on a permanent or temporary basis. This is set out in regulations and

guidance. For hospital services, regulations require the National Health Service Trust providing treatment to make

"such enquiries as it is satisfied are reasonable in all the circumstances, including the state of health of the overseas visitor"

to determine a patient's chargeable status. Guidance makes clear that all patients should be asked baseline residency questions and to produce supporting basic evidence.

Following the launch of the consultation on "Proposals to Exclude Overseas Visitors from Eligibility to Free NHS Primary Medical Services", a copy of which is available in the Library, we are undertaking an evidence gathering study that will seek to identify to what extent visitors to England are obtaining free NHS treatment inappropriately. We are proposing to publish the results of this in conjunction with the outcome of the consultation in autumn 2004. In addition, we have just started a study of 12 NHS trusts across the country, including monitoring impact of use by European Union accession countries.

General Practitioners (Night Calls)

Mr. Hurst: To ask the Secretary of State for Health what was the cost to the national health service in payments for general practitioners for maintaining a night call out service for patients in each year from 1974 to 2003. [173636]

Mr. Hutton: In 1974, £18.4 million is recorded has having been spent on payments to general medical service (QMS) general practitioners for out-of-hours responsibilities. In 2003, the total expenditure is recorded as £112.3 million. The full data is shown in the following tables.

Payments for out-of-hours services by general medical practitioners[1] England 1973–74 to 2002–03

	Amount (£000)
1973–74	16,080
1974–75	18,432
1975–76	23,918
1976–77	26,043
1977–78	26,160
1978–79	30,599
1979–80	36,348
1980–81	49,464
1981–82	56,052
1982–83	62,500
1983–84	65,762
1984–85	75,138
1985–86	81,251
1986–87	84,010
1987–88	92,255
1988–89	103,645
1989–90	112,980
1990–91	56,106

	Amount (£)
1991–92	60,399,212
1992–93	59,714,582
1993–94	67,390,011
1994–95	63,081,368
1995–96	82,604,687
1996–97	128,292,714
1997–98	126,587,811
1998–99	127,312,395
1999–2000	129,849,905
2000–01	128,869,310
2001–02	118,638,953
2002–03	112,315,234

Note:

[1] Data for QMS only.

Sources:

1. Figures are taken from the relevant summarised accounts for 1973–74 to 1990–91.
2. Annual financial returns of district and regional health authorities and the special health authorities for the London postgraduate teaching hospitals, 1991–92 to 1995–96.
3. Annual financial returns of health authorities, 1996–97 to 2001–02.
4. Annual financial returns of strategic health authorities, 2002–03.
5. Annual financial returns of primary care trusts, 2000–01 to 2002–03.

Health Care Related Infection

Mr. Ben Chapman: To ask the Secretary of State for Health if he will make a statement on progress in combating health care-related infection in England. [183039]

Miss Melanie Johnson: Infection control within the national health service is improving and there are some excellent examples of good practice in our hospitals. We are determined to bring everywhere up to the standards of the best and the wide range of work under way is set out in "Towards cleaner hospitals and lower rates of infection".

Islington Primary Care Trust

Mr. Chris Smith: To ask the Secretary of State for Health what funding has been made available to the Islington Primary Care Trust for each year of its existence to date; and what the projected amounts are for future years. [184724]

Mr. Hutton: Revenue allocations to Islington Primary Care Trust (PCT) from 2003–04 to 2005–06 were announced on 12 December 2002 as follows:

	Amount (£000)
2003–04	248,319
2004–05	272,794
2005–06	298,986

This was the first time allocations were made from the Department direct to PCTs. Prior to this, allocations were made direct to health authorities.

Leeds Community and Mental Health Trust

Mr. Best: To ask the Secretary of State for Health what targets have been set for bed capacity in the Leeds Community and Mental Health Trust; at what level of bed capacity the Trust is operating; and if he will make a statement. [184139]

Miss Melanie Johnson: In 2002–03, Leeds Mental Health Teaching National Health Service Trust had 608 beds, with an occupancy rate of 79.2 per cent.

Source:
Form KH03, Department of Health.

LIFT Projects

Mr. Gordon Prentice: To ask the Secretary of State for Health if he will make it his policy whenever possible to use local architects, builders and tradespeople in designing and building local investment finance trust (LIFT) projects in England; and if he will make a statement. [184291]

Mr. Hutton: There is no size limit on firms participating in national health service local investment finance trust. It is a legal requirement to evaluate all competing bids in a transparent manner. Advertising through the *Official Journal* of the European Community means that competition is fair and open and non-discriminatory for all bidders. Contracts will be awarded to the bidders offering best value for money.

Medical Data Exchange (Cuba)

Mr. Randall: To ask the Secretary of State for Health what provisions are in place for exchange of medical data on UK citizens with Cuba. [184341]

Mr. Hutton: The exchange of medical data between the United Kingdom and Cuba must be in accordance with the Data Protection Act 1998, the Human Rights Act 1998 and the common law duty of confidentiality. When these legal requirements are met, local organisations may establish provisions for exchanging medical data where this is a locally determined business requirement.

Ministerial Travel

Mr. Beggs: To ask the Secretary of State for Health what the total cost of air travel between Northern Ireland and Great Britain was for *(a)* Ministers and *(b)* officials in his Department in the last year for which figures are available. [184528]

Ms Rosie Winterton: The cost of air travel between Northern Ireland and Great Britain is not readily identifiable and could be provided only at disproportionate cost.

All ministerial and civil service travel is undertaken in accordance with the rules set out in the Ministerial Code, Travel by Ministers, and the Civil Service Management Code, copies of which are available in the Library.

Myalgic Encephalomyelitis

Mr. Burstow: To ask the Secretary of State for Health what the implications are for current NHS practice of the World Health Organisation's re-classification of myalgic encephalomyelitis/chronic fatigue syndrome as a neurological disorder. [184514]

Dr. Ladyman: The World Health Organisation's international classification of diseases, ICD 10, provides a system of categories for international systematic recording. They are not diagnostic criteria and are not used by clinicians as such. Patients benefit most from a holistic model of care and new services are being developed to provide this. Services have not been designed around the ICD 10 in the past, nor do we expect them to be in the future.

NHS Beds

Mr. Wiggin: To ask the Secretary of State for Health how many hospital beds there are in the national health service; and what plans he has to change the number. [184044]

Mr. Hutton: In 2002–03 the average daily number of available national health service beds in England was 183,826. This includes acute, geriatric, mental illness, learning disability and maternity beds.

The "NHS Improvement Plan" contains no targets for the total number of NHS beds. However, there is a major hospital building programme under way to deliver on commitments in the "NHS Plan" to improve NHS hospitals. The NHS is on course to exceed the two "NHS Plan" commitments of 100 new hospitals by 2010 and to reduce the age of hospitals such that over 40 per cent. of the NHS estate will be less than 15 years old by 2010.

NHS Posts (E-advertising)

Mr. Amess: To ask the Secretary of State for Health what research his Department conducted before deciding to introduce electronic recruitment of NHS job vacancies; and if he will place a copy of the conclusions in the Library. [183130]

Mr. Hutton: A copy of the strategic case prepared by the Department for the procurement of the national health service e-recruitment service has been placed in the Library.

Non NICE-appraised Treatments

Andy King: To ask the Secretary of State for Health whether the patient choice initiative will allow patients to be treated with non-National Institute for Clinical Excellence appraised treatments if it is their choice and their clinicians concur. [183987]

Mr. Hutton: From 2008, for planned hospital care, a patient will be able to choose any health care provider which meets the Government's standards for health care in England. The draft standards were published for consultation in the spring and will be published shortly.

The new standards will require any health care organisations providing national health service treatment to conform to nationally agreed best practice or nationally agreed guidance, including National Institute for Clinical Excellence technology appraisals.

Pain Management

Mr. Wiggin: To ask the Secretary of State for Health what guidance he gives to patients who are in severe pain while awaiting NHS treatment. [184042]

Mr. Hutton: The Department does not issue guidance to patients on clinical issues such as this. The patient's general practitioner or another health care professional

should provide guidance and advice on appropriate treatments or measures for reducing pain while waiting for further treatment.

Pharmaceutical Industry

Lawrie Quinn: To ask the Secretary of State for Health how many people are employed in the pharmaceutical industry in the UK; and what proportion are employed in *(a)* sales promotion and *(b)* research and development. [183532]

Ms Rosie Winterton: In 2002, the Office for National Statistics (ONS) annual business inquiry showed that there were 83,000 people employed in the manufacture of pharmaceuticals, medicinal chemicals, and botanic products. The ONS business enterprise research and development survey showed that 29,000 people, or 35 per cent., were employed in research and development in the pharmaceutical industry. The Government do not have figures for the percentage of people employed in sales in this sector.

Supporting People Report (Gloucestershire)

Mr. Drew: To ask the Secretary of State for Health what discussions he has had with *(a)* social services and *(b)* NHS bodies in Gloucestershire on the recent Supporting People Report. [184231]

Dr. Ladyman: I have not had any discussion specifically with Gloucestershire social services or national health service bodies, or with any other local social services or health bodies, about "Supporting People". But at the national level I remain in close contact with my ministerial colleagues in the Office of my right hon. Friend, the Deputy Prime Minister, who are in the lead on this important initiative. There is a considerable amount of work going on to take this initiative forward at both national and local levels and we will continue to involve stakeholders in this.

FOREIGN AND COMMONWEALTH AFFAIRS

Balkans

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the current security situation in *(a)* Kosovo and *(b)* the Former Yugoslav Republic of Macedonia. [184241]

Mr. MacShane: The overall security situation in Kosovo is currently stable but tense. Since March, there continue to be isolated incidents of violence which have been contained by local law enforcement. As a means to enhance the exchange of information on security issues a Kosovo Security Advisory Group has been set up with representatives of all the Kosovo communities, UNMIK and KFOR.

The security situation in Macedonia is stable, but fragile, particularly in the former crisis areas in the north west of the country. We judge that most violence is linked primarily to criminality. However, tensions could escalate as ongoing discussions on a number of issues, in particular the decentralisation process called for by the Ohrid Framework Agreement, come to a head.

We continue to monitor the situation in both Kosovo and Macedonia carefully.

Belarus

Mr. Trend: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made of *(a)* the political situation in Belarus and *(b)* whether the forthcoming elections will be free and fair. [184774]

Mr. MacShane: The failure of the Belarussian Government to adhere to European standards in respect of human rights, freedom of expression and democracy in Belarus remains a matter of concern to the Government. It is too early to assess the likely conduct of the elections. We have made clear to the Belarussian Government that we expect the authorities in Minsk to ensure that the elections are free and fair and that international observers will be invited.

Cameroon

Mr. Chaytor: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his counterpart in Cameroon concerning *(a)* the preparations of the electoral roll for this year's presidential elections and *(b)* the treatment by the security forces of members of the parliamentary opposition during the demonstration held in Yaounde on 6 July; and if he will make a statement. [183681]

Mr. Mullin: I emphasised the importance of a free, fair and transparent election with President Biya when he visited the UK in March 2004. The UK maintains a constant dialogue with the Government of Cameroon on preparations for the election, including preparation of the electoral roll. We are aware of the incident at the opposition coalition's demonstration in Yaounde on 6 July. We monitor such events carefully.

Correspondence

David Winnick: To ask the Secretary of State for Foreign and Commonwealth Affairs when a reply will be sent to the hon. Member for Walsall, North's letter of 9 June concerning the entry clearance application at the British High Commission in New Delhi of Mr. Vijay Kumar. [185287]

Mr. Mullin: UK visas replied to my hon. Friend on 14 July. I apologise for the delay.

Cyprus

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on de-mining operations in the buffer zone in Cyprus. [R] [185137]

Mr. MacShane: The Government are supportive of efforts to address this important issue and in our contacts with the Government of the Republic of Cyprus and Turkish Cypriot authorities we have urged them to move forward.

It should also be noted that the European Commission is funding a de-mining project in Cyprus. This project is drawing on UK expertise and is partly funded by a UK contribution.

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the number of Turkish troops in Cyprus. [185156]

Mr. MacShane *[holding answer 19 July 2004]:* We have no precise figures of our own. Current estimates are in the region of 25,000.

The UN Secretary General's settlement plan provided for a phased withdrawal that would ultimately have allowed for the presence of 950 Greek troops in the south and 650 Turkish troops in the north. The rejection of the plan by the Greek Cypriots means this will not now take place.

Any steps taken now to reduce existing troop levels would be welcome.

Mr. Dismore: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with Turkey concerning the extension of the Turkey/EU customs agreement to Cyprus; and if he will make a statement. [R] [185138]

Mr. MacShane: The British Government, through a combination of direct ministerial contact and exchanges between British and Turkish officials in London, Ankara and Brussels, maintains a close dialogue with the Turkish Government on a wide range of issues related to Cyprus. The extension of the EU-Turkey customs union to all those EU member states who joined the EU on 1 May is one such issue. Implementation of the customs union is important to the effective functioning of the single market.

I am glad to say that Turkish Foreign Minister Gul wrote on 10 June to the European Commission saying Turkey would take all measures to ensure functioning of the customs union from 1 May.

Departmental Expenditure

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs how much the Foreign Office spent on *(a)* advertising and *(b)* public relations consultants in (i) 1996–97 and (ii) the latest year for which figures are available. [184502]

Mr. Straw: In FY 2002–03—the most recent year for which audited figures are available—separately identifiable expenditure by the Foreign and Commonwealth Office (FCO) on UK advertising totalled £743,783. Of this, £716,234 related to media spend on advertising for recruitment purposes. The balance related to consular media advertisements which aimed to raise awareness among the British public of the importance of being properly prepared before travelling overseas and to advertising of the FCO's public open days. The total figure is based on the final accounts for FY 2002–03 and replaces the figure which I supplied to the right hon. Gentleman on 7 January 2004, *Official Report*, column 411W, which drew on provisional calculations. I apologise to the right hon. and learned Gentleman for the fact that this was not made clear in my previous answer.

The FCO's central expenditure on public relations consultancy in FY 2002–03 totalled £291,971. Of this, £268,862 was paid to a single agency for work on the Consular awareness-raising campaign, 'Know Before You Go'.

The FCO's overseas posts and its non-departmental public bodies also commission advertising and occasionally employ public relations consultants, but details are not recorded centrally. Information about the costs incurred by these activities could be provided only at disproportionate costs.

Records of expenditure by the FCO's expenditure on advertising and public relations consultants in FY 1996–97 are not held centrally. Figures for that year could be provided only at disproportionate costs.

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs what the cost was of running Foreign Office canteen facilities in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [184507]

Mr. Straw: In 1996–97, the cost of providing catering to the Foreign and Commonwealth Office was £160,258.31.pa In 2003–04, the latest year for which figures are available, the cost of providing catering to the Foreign and Commonwealth Office was £184,201.59.

The figures provided are based upon the subsidy paid to the catering contractor, in each of the years, for the provision of the service in London and Hanslope Park. During the period concerned, there have been changes to the nature of the service provided. In 1996–97, the service in London consisted of one restaurant, one shop and one snack bar. In the intervening years, the snack bar has become a cafeteria with a much wider variety of food on offer.

Diego Garcia

Tom Brake: To ask the Secretary of State for Foreign and Commonwealth Affairs when a representative of his Department last visited the US prison facilities on Diego Garcia. [184202]

Mr. Rammell: The only United States prison facilities on Diego Garcia are those established under United States Service law for the detention, as authorised by that law, of members of the United States armed forces and any accompanying civilian personnel and dependants. There is no record of any member of the Foreign and Commonwealth Office visiting those facilities. The US have made it clear that the British Indian Ocean Territory Commissioner's Representative on Diego Garcia would be permitted to visit at any time.

EU Presidency

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what the main issues are which the Government intend to focus on during the UK's presidency of the European Union. [184260]

Mr. MacShane: The overall Council Agenda for 2004–06 is set out clearly in the Multi-Annual Strategic Programme (MASP), copies of which have been placed in the Library of the House. The agenda for the UK

Presidency will be determined, to a large extent, by the agenda we inherit from preceding Presidencies and their progress on the dossiers identified in the MASP. The Government are in the process of detailed planning and discussion within and between Departments at ministerial and official level to identify detailed policy themes for the UK Presidency, within the context of that broader agenda.

General Affairs and External Relations Council

Mr. Hood: To ask the Secretary of State for Foreign and Commonwealth Affairs what the outcome was of the General Affairs and External Relations Council held on 12 to 13 July; what the Government's stance was on the issues discussed, including its voting record; and if he will make a statement. [184432]

Mr. MacShane: The information is as follows:

Outcome of the 12 July 2004 General Affairs and External Relations Council

My right hon. Friend the Foreign Secretary and I represented the UK at the General Affairs and External Relations Council (GAERC) in Brussels on 12 July.

Conclusions were agreed on Afghanistan, Western Balkans, Sudan, Iraq and Asia-Europe.

General Affairs Session

Presidency Work Programme

The Presidency presented its work programme for the second half of 2004. Five priorities are identified in the work programme:

Making a success of enlargement;

Strengthening the European economy and reducing the administrative burden;

The area of freedom, security and justice;

The Union's future financial and budgetary structure: Agenda 2007;

The EU's role in the world: an effective, coherent and committed external policy.

Constitutional Treaty

The Council decided that signature of the EU's Constitutional Treaty will take place in Rome on 29 October.

Progress of Work in Other Council Configurations

The Council took note of a progress report from the Presidency on work under way in the Council's other configurations (the Justice and Home Affairs Council, the Trade Council, Economic and Financial Affairs Council, the Transport and Communications Council and the Agriculture and Fisheries Council.)

Relations With Ukraine

The Council took note of the Presidency's work plan regarding implementation of the EU's Common Strategy on Ukraine.

The Commission is expected to submit a formal proposal for an action plan to the Council in September 2004. This should lead to a comprehensive plan, which at the same time identifies clearly a limited number of key priorities and offers real incentives for further reform.

The current Common Strategy on Ukraine expires in December 2004.

Visas—Russia

The Council decided to authorise the Commission to begin negotiations with the Russian Federation on facilitation of the issuance of short-stay visas to EU and Russian citizens.

United Nations

The Council approved a paper on the European Union's priorities for the 59th session of the United Nations General Assembly. The emphasis of these priorities is to uphold and develop international law, and to effective multilateralism.

External Relations Session

WTO/DOHA Development Agenda

The Council took note of the presentation made by Commissioner Lamy on the current state of the negotiations. The Council underlined the importance of reaching a satisfactory agreement at the WTO General Council at the end of July on the negotiating frameworks for agriculture, non-agricultural market access, the Singapore Issues, and development. The Council agreed to hold a special session of the Council in Brussels, which is foreseen for the 26 July 2004, with a view to establishing an EU position.

Iraq

The Council met the Iraqi Foreign Minister, Mr. Zebari, who indicated the areas in which he hoped the EU would be able to make a visible contribution to the political, economic and social reconstruction of his country. The Council welcomed this opportunity to discuss the future of Iraq with Mr. Zebari, and looked forward to deepening political engagement with Iraq. The Council warmly welcomed the restoration of sovereignty to the Iraqi Interim Government that took place on 28 June. It reaffirmed its support for the people of Iraq and the fully sovereign Iraqi Interim Government. Conclusions were agreed.

Middle East Peace Process

The Council examined the situation in relation with the Middle East Peace Process following in particular the Advisory Opinion rendered by the International Court of Justice on 9 July concerning

"Legal consequences of the construction of a wall in the occupied Palestinian Territory".

Asia-Europe

The Council discussed the way ahead on preparations for the ASEM Summit and adopted conclusions.

Sudan

The Council expressed grave concern at the situation in Darfur and continued to emphasise the importance of humanitarian access, human rights and security. The Council called upon member states and other actors of the international community to substantially increase their support to the humanitarian relief effort under way. The Council welcomed the active involvement of the international community. The Council welcomed the efforts to address this issue at the UN Security Council. Conclusions were agreed.

Western Balkans

Serbia and Montenegro: The Council welcomed the outcome of the recent presidential elections in Serbia. It encouraged all democratic forces to work together in order to accelerate political and economic reforms, to fulfil all international obligations, including full co-operation with ICTY.

Serbia and Montenegro/Kosovo: The Council confirmed that the new Special Representative of the UN Secretary General in Kosovo, Mr. Soren Jessen-Petersen, will have the full support of the European Union.

Bosnia and Herzegovina/ICTY: The Council strongly supported the measures announced on 30 June by EUSR and High Representative Paddy Ashdown to help ensure that Bosnia and Herzegovina co-operates fully with the International Criminal Tribunal for the former Yugoslavia (ICTY).

Former Yugoslav Republic of Macedonia: The Council expressed its gratitude to the outgoing EU Special Representative, Mr. Soren Jessen-Petersen, for his vital contribution to the consolidation of peace and stability in the former Yugoslav Republic of Macedonia. It appointed ambassador Michael Sahlin as his successor, who will take up the position of EUSR on 1 August 2004.

Conclusions were agreed.

Afghanistan

The Council welcomed the decision announced by the Joint Electoral Monitoring Body (JEMB) to hold presidential elections in Afghanistan on 9 October 2004. These elections are a key requirement under the Bonn Agreement of December 2001 and represent a new milestone in the process of constructing a democratic, stable and prosperous Afghanistan. Conclusions were agreed.

European Security and Defence Policy

EU military operation in Bosnia and Herzegovina

The Council adopted a Joint Action on the European Union Military Operation in Bosnia and Herzegovina. This follows the decision by NATO to conclude its successful SFOR-operation and the adoption by the United Nations Security Council of Resolution 1551. Major General A. David Leakey (UK) was appointed EU Force Commander.

European Union Special Representative in BiH

The Council adopted a Joint Action revising the mandate of the European Union Special Representative (EUSR) in Bosnia and Herzegovina, Paddy Ashdown.

European Defence Agency

The Council formally adopted a Joint Action establishing an Agency in the field of defence capabilities development, research, acquisition and armaments—to be known as the European Defence Agency.

Honduras

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government have made to the Government of Honduras on the murder in June this year of 29 Honduran children and young people. [184298]

Mr. Rammell: We have not made specific representations to the Honduran Government about the deaths of 29 children and young people in June as reported by Casa Alianza, the leading NGO in Central America dealing with child protection.

We have a regular and on-going dialogue with the Government of Honduras and with NGOs on the issue of child protection. We are currently co-funding an investigation into the juvenile justice system in Honduras, run by the University of Essex's Children's Legal Centre. The study, for which our Ambassador has secured the full support of the Honduran Government, will make recommendations to improve juvenile justice and child protection in line with Honduras's commitments to international human rights norms.

I also refer the hon. Member to the reply I gave him on 8 July 2004(*Official Report*, column 851W) which describes dialogue we have had with the Honduran Government bilaterally and with EU partners.

Iraq

Adam Price: To ask the Secretary of State for Foreign and Commonwealth Affairs when he was informed that SIS had withdrawn reporting from the source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable. [185655]

Mr. Straw: I became aware of the withdrawal of this reporting when I agreed, in response to a request from SIS on 8 September 2003, that the reports in question should be disclosed to the Intelligence and Security Committee.

Special Advisers

Mr. Evans: To ask the Secretary of State for Foreign and Commonwealth Affairs how many of the reductions in the numbers of civil servants in his Department announced in the comprehensive spending review will be of special advisers. [185461]

Mr. Straw: None. There are only two Special Advisers in post.

Marine Wildlife Conservation Bill

Mr. Dalyell: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his statement in the debate on European Affairs of 16 June 2004, *Official Report*, columns 786–7, what steps he has taken personally to pursue the substance of the Bill on Marine Wildlife Conservation put forward by the hon. Member for Uxbridge (Mr. Randall); and if he will make a statement. [184177]

Mr. Rammell: My right hon. Friend the Foreign Secretary has asked me to reply.

As my hon. friend knows, my right hon. Friend the Secretary of State for Environment, Food and Rural Affairs leads on this issue. We note, however, that the Private Members Bill on Marine Wildlife Conservation put forward by the hon. Member for Uxbridge (Mr. Randall) has been tabled for second Reading on Friday 15 October.

Regeneration Projects

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs how much money the European Union has provided to regeneration projects in each member state in *(a)* 1990, *(b)* 1995, *(c)* 2000 and *(d)* 2004. [184263]

Mr. MacShane: The Commission does not produce specific figures for funds spent on regeneration projects. However, figures for the overall spends on structural and cohesion funds across EU member states in 1990, 1995 and 2000 are set out in the following table. The figures for 2004 have yet to be released. Figures for 1990 and 1995 are in ECU millions and for 2000 in € millions.

Country	*1990*	*1995*	*2000*
Belgium	154.903	178.59	1,829
Denmark	76.66	104.40	745
Germany	511.261	3,039.76	28,156
Greece	1,171.523	2,714.68	20,961

Security Wall (Israel)

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with his EU counterparts concerning the Israeli High Court ruling on human rights breaches since the construction of the security wall in relation to the EU-Israel Association Agreement. [184296]

Mr. MacShane: My right hon. Friend the Foreign Secretary has had no discussions with his EU counterparts on the Israeli High Court ruling on human rights breaches since the construction of the security wall in relation to the EU-Israel Association Agreement.

Spending Review

Mr Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral statement by the Chancellor of the Exchequer of Monday 12 July 2004, *Official Report*, columns 1129–39, on the spending review, what percentage of the 1.4 per cent. spending increase allocated to his Department will be given back to the Chancellor of the Exchequer in the form of departmental assets to be sold off under his £30 billion Government asset sale. [185004]

Mr. Straw: None. We have an agreed asset-recycling programme with Her Majesty's Treasury which allows the Foreign and Commonwealth Office to reinvest estate sales receipts, primarily for the modernisation of the estate both overseas and in the UK.

Sri Lanka

Mr. Hancock: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations the Government has made to the Government of Sri Lanka regarding the break-in at the office of the National Christian Evangelical Alliance of Sri Lanka on 3 July 2004. [184318]

Mr. Mike O'Brien: We have not made representations to the Government of Sri Lanka regarding this specific incident. Our High Commission in Colombo continues to urge the Sri Lankan authorities to ensure that those responsible for attacks such as this are brought to justice, and that the rights of all religious minorities in Sri Lanka are respected.

UK Foreign Direct Investment

Andrew Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs how the UK's foreign direct investment has changed since the European Union enlargement. [184256]

Mr. Mike O'Brien: It is too early yet to draw any meaningful conclusions.

Vietnam

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the Government of Vietnam; and what representations he has made with regard to the treatment of Christians, with particular reference to evangelicals. [184226]

Mr. Mike O'Brien: We have regular discussions with the Vietnamese Government on a range of issues, including religious freedom and other human rights issues. We are deeply concerned at the severe restrictions on some Protestant groups in Vietnam, especially ethnic minority Protestants in the Central Highlands region.

We regularly raise our human rights concerns. I raised during my visit to Vietnam in March again the situation in the Central Highlands with the President of Vietnam during his official visit to the UK. My right hon. Friend the Foreign Secretary also raised our human rights concerns in Vietnam the same day with the Vietnamese Foreign Minister.

With EU partners, we also participate in a regular human rights dialogue with Vietnam. The most recent EU-Vietnam human rights dialogue meeting took place on 22 June and was attended by our Ambassador in Hanoi. We raised freedom of religion and the situation of the Protestants in Vietnam.

We will continue to raise our concerns at every suitable opportunity.

Visas

Clive Efford: To ask the Secretary of State for Foreign and Commonwealth Affairs what criteria are used by entry clearance officers overseas to assess the personal guarantee of an hon. Member that an applicant will abide by the terms of their visa and return to the country of origin. [183490]

Mr. Mullin: It is not our policy to ask hon. Members for personal guarantees as such personal guarantees are not enforceable in UK law. However, assurances given by an hon. Member reflecting close personal knowledge of a sponsor or applicant would be taken into account by the Entry Clearance Officer considering an application in conjunction with other available evidence.

Clive Efford: To ask the Secretary of State for Foreign and Commonwealth Affairs on what authority entry clearance officers offer to overturn a decision to refuse a visa in return for a personal guarantee from an hon. Member that the applicant will abide by the terms of the visa. [183491]

Mr. Mullin: Entry Clearance Officers have no authority to overturn a decision to refuse a visa in return for a personal guarantee from an hon. Member that the applicant will abide by the terms of the visa.

However, an Entry Clearance Officer or Entry Clearance Manager reviewing a decision to refuse a visa would take into account subsequent representations made by an hon. Member. These might, in a borderline case, help to satisfy him or her that the relevant requirements of the Immigration Rules were met and he might therefore be prepared to overturn the refusal.

TRADE AND INDUSTRY

Correspondence

David Winnick: To ask the Secretary of State for Trade and Industry when a reply will be sent to the hon. Member for Walsall North's letter of 3 June to the Department for Work and Pensions, which was transferred to her Department on 10 June. [185288]

Mr. Sutcliffe: My hon. Friend the Member for Walsall North was sent a reply to his letter on 19 July 2004.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry pursuant to the answer of 23 April 2004, *Official Report*, column 684W, on Royal Mail, when she expects Royal Mail to reply to the hon. Member for Gordon; and if she will make a statement on the average time taken for Post Office Ltd. and Royal Mail to write to hon. Members when her Department redirects parliamentary questions to them. [185353]

Mr. Timms: Royal Mail and Post Office Ltd. make every effort to issue replies to hon. Members within five working days of receiving our request for information.

It would appear that due to an administrative error the hon. Member's inquiry of 22 April 2004 was not passed on to Mr. Crozier's office at Royal Mail for a direct reply. This has now been done and a response will be sent direct to the hon. Member within the next few days.

Departmental Expenditure

Mr. Randall: To ask the Secretary of State for Trade and Industry how much her Department spent on *(a)* head-hunters and recruitment consultants and *(b)* management consultants in (i) 1996–97 and (ii) the latest year for which figures are available. [185376]

Ms Hewitt: In 2002–03, £0.9 million was spent on head-hunters and recruitment consultants and £19.4 million was spent on General Business consultants. Similar information for 1996–97 is not available and could be provided only at disproportionate cost.

Mr. Randall: To ask the Secretary of State for Trade and Industry what the cost of running the Department's canteen facilities was in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185378]

Ms Hewitt: The information is as follows:

(a) In financial year 1996–97 the direct cost of running the Department's staff restaurant facilities in its main HQ buildings was about £325,000.

(b) Since June 2000, the Department's staff restaurant facilities have operated on a zero (nil) cash subsidy basis.

EU Structural Funds

Mr. Cousins: To ask the Secretary of State for Trade and Industry pursuant to the answer of 15 March 2004, *Official Report*, column 64W, on European Union Standard Funds, what actual expenditure was against those allocations for each year between 2000 and 2003. [185595]

Jacqui Smith: European Structural Fund expenditure under the 2000–06 programmes is monitored on an annual basis. Under current regulations, each year's allocation has to be spent by the end of the second year following the year of allocation.

Due to the late start of the Objective 2 programmes, only the Objective 1 and 3 programmes were required to spend their 2000 allocations by the end of 2002. For the UK Objective 1 programmes a total of £622.3 million had to be spent and for Objective 3 the figure was £402.1 million. These overall targets were achieved. The targets for the end of 2003 included both the 2000 and 2001 allocations for the Objective 2 programmes. A total of £3,150 million had to be spent and this figure was surpassed by £308 million.

MOX Shipments

Llew Smith: To ask the Secretary of State for Trade and Industry what proportion of the time and person power of the Office for Civil Nuclear Security will be committed to overseeing the security of the British registered PNTL nuclear transport ships in their mission to transport plutonium-based MOX test assemblies from France to the United States. [185551]

Mr. Timms: Staff in the Office for Civil Nuclear Security will spend whatever proportion of their time is necessary to review the draft Transport Plan with a view to its approval and, if approved, to oversee its implementation. The resources required cannot be firmly estimated in advance but I would expect them to account for no more than a moderate proportion of total OCNS resources.

Regional State Aid

Mr. Cousins: To ask the Secretary of State for Trade and Industry if she will place the initial member state response to the EU Commission proposals on regional state aid in the Library. [185576]

Jacqui Smith: The Government's response to the Commission's proposals for reform of regional state aid is due to be issued imminently. We will be making our response public. It will be placed on the Department's website and copies will be placed in the Libraries of the House.

Renewable Energy

Mr. Ben Chapman: To ask the Secretary of State for Trade and Industry what estimates have been made of the costs of concrete production for the purpose of wind power generation. [184106]

Mr. Timms: A number of studies have estimated the overall environmental cost of building wind power generation. For example, the British Wind Energy Association states that the average wind farm in the UK will pay back the energy used in its manufacture within three to five months, and over its lifetime a wind turbine will produce over 30 times more energy than was used in its manufacture. This compares favourably with coal or nuclear power stations, which take about six months.

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what plans she has to increase the amount of renewable energy sources within London. [184285]

Mr. Timms: The Department and the Government Office for London are working closely with the GLA in taking forward the implementation of the Mayor of London's Energy Strategy, which the Government has welcomed.

London will benefit from the range of measures the Government has put in place to deliver its target of 10 per cent. of electricity supply from renewable sources by 2010: including Renewables Obligation on suppliers, grant support and exemption from climate change levy.

Mr. Meale: To ask the Secretary of State for Trade and Industry if she will list the range of the capital grant support available for renewable energy projects in the areas of *(a)* biomass, *(b)* photovoltaics and *(c)* solar water heating. [185398]

Mr. Timms: The information requested is as follows.

(a) Biomass—DTI and the Big Lottery Fund have allocated 66 million through the Bioenergy Capital Grants Scheme to encourage the efficient use of biomass, and particularly energy groups, for energy production by stimulating the early deployment of biomass fuelled heat and electricity generation projects.

(b) Photovoltaics—The £25 million Photovoltaic Major Demonstration Programme offers grants to householders, public bodies, small to medium enterprises and larger bodies for the installation of PV panels. Householders can get a grant of up to £3,000 and £4,250, dependent on size and type of installation. For public bodies, small to medium enterprises and larger bodies grants between 40 per cent. and 60 per cent. are available on a competitive basis, assessed independently at selection panels.

(c) Solar Water Heating—Grants are available through the Clear Skies initiative; householders can get a grant of £400 towards the cost of an installation. Community and not-for-profit groups can get a grant of 50 per cent., up to a maximum of £100,000, towards the cost of installation. This is done through a competitive application process, at independent assessment panels, on a round by round basis. The £10 million Clear Skies initiative was launched in January 2003 in order to promote the uptake of a number of renewable technologies including solar heating panels. Further details of the initiative, including grant levels for all the technologies supported, can be found on the website at www.clear-skies.org.

The Scottish Executive has its own parallel scheme, the £3.7 million Scottish Community and Household Renewables Initiative, which also offers grants for the installation of solar water heating panels. Householders can get a grant of 30 per cent. up to a maximum of £4,000 for a solar water heating installation. Community organisations can get a 100 per cent. grant up to a maximum of £100,000. Community applications are assessed on essential and desirable criteria and large-scale projects may also be subject to independent technical assessment.

Further details can be found on the website www.est.co.uk/schri.

Rural Post Offices

Mr. Bellingham: To ask the Secretary of State for Trade and Industry (1) how much money has been spent in the last year on supporting rural post offices; [185539]

(2) what plans she has for the funding of the rural post office network after 2006. [185476]

Mr. Timms: The Government have made available £450 million to maintain the rural network up in the first instance until April 2006.

The Cabinet Office Performance and Innovation Unit (PIU) report on the future of the post office network recommended that the Postal Services Commission should advise the Government on the main options for the policy framework after 2006. The Government are currently considering that policy advice and will take decisions on the shape of the rural post office network after 2006 in good time to allow for a smooth transition from the current support arrangements.

Scientific Research Funding

Mr. Jim Cunningham: To ask the Secretary of State for Trade and Industry what her Department's policy is on funding for scientific research bodies. [184577]

Ms Hewitt: My Department funds world-class research with the aim of making the UK one of the most competitive locations for science, research and development and for innovation in the world.

The Government's policy is set out in more detail in the "Science and Innovation Investment Framework 2004–14", published as part of this year's Spending Review. Spending for the current period is set out in the "Science Budget 2003–04 to 2005–06" copies of which are available in the Libraries of the House.

South-West Regional Development Agency

Diana Organ: To ask the Secretary of State for Trade and Industry what percentage of the South-West Regional Development Agency's budget has been spent on projects or programmes in Gloucestershire in the last three years. [181309]

Jacqui Smith: I understand that the South West of England Regional Development Agency incurred expenditure of £44 million for projects in Gloucestershire in the years 2001-04. This represents 13 per cent. of SWRDA's total programme budget for these years. This figure does not, of course, capture the total percentage of SWRDA's project and programme expenditure that benefits the county, as Gloucestershire also benefits substantially from a range of regional projects and programmes funded by SWRDA, where expenditure is not directly attributable to individual county areas.

Tyres

Norman Baker: To ask the Secretary of State for Trade and Industry how many tyres were *(a)* purchased, *(b)* reused and *(c)* disposed of by (i) landfill, (ii) incineration, (iii) illegal fly-tipping and (iv) other means in each year since 2001. [184854]

Mr. Timms: DTI compiles figures on behalf of the Used Tyre Working Group on used tyre recovery and disposal.

Statistics on replacement tyre sales are provided as follows by the British Rubber Manufacturers' Association and the Imported Tyre Manufacturers' Association. The figures for 2003 are expected to be received shortly. While these sources represent the majority of activity in this sector, there are other, diverse, routes to market and for this reason the figures should be viewed as indicative, rather than absolute. A similar caution applies to the information relating to used tyre disposal and recovery.

Replacement tyre sales	*2001*	*2002*
Units	24,870,298	25,485,101
Tonnes	234,250	240,000

A figure for total used tyres arisings also needs to take account of various reuse tyres, not included in the figures above, including retreads and part-worns, tyres on end of life vehicles and imports of used tyres.

Used tyre arisings	*2001*	*2002*
Units	52,832,000	47,169,500
Tonnes	481,500	447,000

Tonnes

	2001	*2002*
Reused	117,650	105,100
Energy recovery[1]	40,000	48,000
Other recovery	132,850	147,400
Total	290,500	300,500

[1] Figures relate solely to the use of tyres as fuel in cement kilns.

Not all industry returns have yet been received to enable presentation of the 2003 figures, but it is estimated that the use of tyres in cement kilns rose to almost 80,000 tonnes and other recovery approached 190,000 tonnes.

Tyres disposed of to landfill arise from two principal channels, retail outlets and end of life vehicles (ELVs). In the former case, figures show a sharp drop from over 87,000 tonnes in 2001 to around 42,000 tonnes in 2002. The 2003 figures are expected to show a further significant diversion of tyres away from landfill disposal. Tyres are also disposed of to landfill as part of automotive shredder residue. The figures for 2001 and 2002 are similar at around 57,000 tonnes, although it should be noted that this total derives from an assumption that all ELV tyres not reused as part-worns or retreads are disposed of in this way.

For both 2001 and 2002 this leaves around a 10 per cent. gap between estimated tyre arisings and stated recovery and disposal. The difference may be due to a number of factors including over-reporting of arisings and under-reporting of recovery and disposal, together with any tyres that are stored or are otherwise not consigned for immediate treatment.

Tyre fly-tipping takes a number of forms, including that dealt with by landowners and local authorities as well as those tyres that are dumped on the forecourts of tyre retail premises, and there are, as yet, no overall figures quantifying this illegal activity. However, The Environment Agency (EA) estimates that £1.65 million is spent annually by local authorities on tyre related fly-tipping. In addition, a joint Defra/EA report estimated that 8,700 tonnes of tyres were fly-tipped on agricultural land in 2001, equating to a cost of £1.3 million. There are a range of other affected landowners including British Waterways, Railtrack and the National Trust. In addition, there is fly-tipping on tyre retail premises where the retailer will subsequently meet the costs of disposal. A third of respondees to a 2003 survey by the representative body for tyre retailers reported that they had been subject to tyre fly-tipping. Since April 2004, Flycapture, a web-based fly-tipping database for England and Wales managed by the EA on behalf of Defra, has been operational. The database, populated with information provided by both the EA and local authorities, provides a systematic basis for the collection of information relating to all fly-tipped wastes, including tyres.

Working Time Directive

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what discussions she has had with Labour Members of the European Parliament about the Working Time Directive. [185541]

Mr. Sutcliffe: I have had several discussions on working time with Labour MEPs as well as those from the main parties both in person in Brussels and by telephone. I have also discussed working time with MEPs from other member states. My officials also have kept in contact with MEPs and provided written briefings on the Government's position.

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what discussions she has had with representatives of British industry about the Working Time Directive. [185542]

Mr. Sutcliffe: The Government regularly meet representatives from British industry to discuss a wide range of issues, including employment law and the operation of the Working Time Directive.

CONSTITUTIONAL AFFAIRS

Departmental Expenditure

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much his Department spent on *(a)* mobile telephone costs, *(b)* hospitality and *(c)* taxi costs in (i) 1996–97 and (ii) the latest year for which figures are available. [185553]

Mr. Lammy: The information requested is as follows.

(a) Total mobile telephone costs for the Department, which covers costs for the Court Service, the Public Guardianship Office and DCA Headquarters for 2003–04 is £295,742.

(b) Total hospitality (entertainment) costs for the Department, which covers costs for the Court Service, the Public Guardianship Office and DCA Headquarters for 2003–04 is £79,050.

Information on 1996–97 is not readily available.

(c) It is not possible for the Department to provide the full detailed information requested without incurring disproportionate cost.

The Department has published rules for official travel in its staff handbook and all travel complied with the requirements of the Civil Service Management Code.

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the total cost of printing departmental headed notepaper was in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185554]

Mr. Lammy: The Department for Constitutional Affairs also replies on behalf of its Associated Offices and the Court Service.

The Department's expenditure on departmental headed notepaper in 2003–04 was £7,738.

Expenditure on notepaper during 1996–97 is included in general stationery costs and cannot be separately identified.

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much his Department spent on *(a)* head-hunters and recruitment consultants and *(b)* management consultants in (i) 1996–97 and (ii) the latest year for which figures are available. [185556]

Mr. Lammy: The Department for Constitutional Affairs also replies on behalf of its Associated Offices and the Court Service.

(a) The term "head-hunters and recruitment consultants" is taken to refer to the use of specialist agencies in recruitment to key posts and public appointments.

(i) In 2003–04 the Department's expenditure on recruitment consultants was £414,827. The majority of this concerned the establishment of the new agency (HM Courts Service) and lay members of the 42 new local Courts Boards.

(ii) In 1996–97 information on the use of recruitment consultants was not collated centrally and could now be obtained only at disproportionate cost.

(b) The Department's net expenditure with management consultants in the financial years 1996–97 and 2002–03 was £1.09 million and £5.75 million respectively. (Expenditure is only collected on an annual basis and the figure for 2003–04 is not yet available.)

This increase in expenditure reflects the wide-ranging and fast-paced programme to modernise the Department's work, to increase efficiency, provide better customer service, and value for money for the taxpayer.

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the costs of running his Department's canteen facilities were in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185557]

Mr. Lammy: The Department for Constitutional Affairs also replies on behalf of its Associated Offices and the Court Service.

"Canteen Facilities" is taken to mean facilities provided primarily for use by the Department's staff. This approach is consistent with the definition used in previous questions.

(a) The Department operated several staff canteens at various locations during 1996–97 but the running cost of these facilities can only be separated out at disproportionate cost to the Department.

(b) At present the Department operates only one staff canteen, in its London headquarters where there is a concentration staff.

Visitors to the building also use the facility.

Income from sales is used to offset the cost to the Department. However, there is a need for a subsidy, the cost of which was £94,791 in 2003–04.

Departmental Staffing

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many staff are employed in the Department, broken down by work category. [185375]

Mr. Lammy: The Department does not hold information broken down by work category. However, data on staffing levels in the civil service are collected from Departments and agencies twice-yearly, in April and October. Headline figures are published under National Statistics guidelines via a press notice. Those for October 2003 were published on 22 April 2004. A copy of the press notice, accompanying media brief and supporting tables is available on the World Wide Web at http://www.cabinet-office.gov.uk/news/2004/040422_latest_asp/ these documents are also placed in the Libraries of both Houses.

More detailed information on the civil service is published annually in 'Civil Service Statistics', copies of which are laid in the Libraries of both Houses. The last edition, based on April 2002 data, was published in July 2003. The next edition, based on April 2003 data, is due to be published at the end of July 2004.

The Cabinet Office publishes information on non-departmental public bodies in its annual publication 'Public Bodies'. The information includes details of the number of staff employed by each NDPB at 31 March each year. 'Public Bodies 2003' was published in 16 July 2003. Copies of 'Public Bodies' published each year since 1997 are available in the Libraries of both Houses. http://www.cabinet-office.gov.uk/agencies-publicbodies.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the reasons are for changes in staff numbers in *(a)* the Department, *(b)* the National Archives and *(c)* the Northern Ireland Court Service between 1998–99 and 2003–04. [185373]

Mr. Lammy: The reasons for changes in staff numbers between 1998–99 and 2003–04 for the following are:

(a) The Department for Constitutional Affairs

During the period we recruited an extra 700 staff to support the Immigration Appellate Authority (IAA) and its work of processing asylum appeals.

We have also seen an increase in the Court Service due to an increase in workload including sitting days.

(b) The National Archives

Changes in staff numbers in the National Archives are due to the increase in service provision to the public and Government Departments.

(c) Northern Ireland Court Service

Staff numbers in the Northern Ireland Court Service have changed between 1998–99 (628 staff) and 2003–04 (757 staff) as a direct response to delivering the Government's agenda to modernise the delivery of justice. This included responding to the recommendations of the Northern Ireland Criminal Justice Review which significantly reforms criminal justice in Northern Ireland. Other influencing factors include the Court Service's modernisation programme which will enhance the delivery of frontline services.

Information Commissioner

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the costs of staff employed in the Office of the Information Commissioner were in the last year for which figures are available; and what the costs are of the new offices in *(a)* Wales, *(b)* Scotland and *(c)* Northern Ireland in this financial year. [185372]

Mr. Lammy: Staff costs for the year ended 31 March 2004 were:

£

	Amount
Salaries	3,804,953
Social security costs	278,965
Other pension costs	481,345
Temporary agency staff	114,241
Total	4,679,504

Costs for the new offices in *(a)* Wales, *(b)* Scotland and *(c)* Northern Ireland in 2004–05 are budgeted to be:

£

	(a)	*(b)*	*(c)*	Total
Staff cost	65,005	65,005	65,005	195,015
Travel and subsistence	20,500	20,500	20,500	61,500
Consultancy	5,000	5,000	5,000	15,000
Library and subscriptions	1,500	1,500	1,500	4,500
Stationery	1,000	1,000	1,000	3,000
Accommodation	20,000	20,000	20,000	60,000

TREASURY

Barnett Formula

Mr. Cousins: To ask the Chancellor of the Exchequer what the growth was in public expenditure between 2000–01 and 2003–04 *(a)* which was used as comparable spending with Scotland for the purposes of the Barnett Formula, *(b)* for Barnett comparable spending in Scotland and *(c)* in the North East for programmes which were comparable with the Barnett Formula compensation programmes in Scotland. [185594]

Mr. Boateng: Information on identifiable public spending in Scotland and the North East is published in Chapter 8 of Public Expenditure Spending Analyses (Cmd. 6201). The basis of the Barnett formula comparability factors used for the 2004 Spending Review was published in the Statement of Funding Policy in July 2004 and for the 2002 Spending Review in July 2002. The Barnett formula is used to determine increases in spending of the devolved administrations, rather than the levels of spending in English regions.

Civil Service Employment

Mr. Andrew Turner: To ask the Chancellor of the Exchequer what the net number is of civil service posts created since 1997 *(a)* in front-line services and *(b)* elsewhere (i) in each Government Department and agency and (ii) in total. [185368]

Mr. Boateng: Details of civil service statistics for each Government Department and agency can be found at the following website: http://www.civil-service.gov.uk/statistics/css.htm.

Mr. Andrew Turner: To ask the Chancellor of the Exchequer what his estimate is of the cost of early retirement and redundancy packages *(a)* in total and *(b)* in each Department for those civil servants whose posts are abolished pursuant to his announcement on 12 July 2004. [185370]

Mr. Boateng: All retirement and redundancy plans are developed and costed on a departmental basis—this is still being planned. The Efficiency Challenge Fund will help support departments, and Cabinet Office is providing a brokerage service to assist with the management of these workforce changes.

Education Maintenance Allowance (Benefit Entitlement)

Mr. Best: To ask the Chancellor of the Exchequer for what reasons *(a)* parents of A-Level students aged 16 to

19 years receiving education maintenance allowance are eligible for child benefit and child tax credits and *(b)* parents of children aged 16 to 19 years receiving education maintenance allowance studying for college-based vocational qualifications are not eligible for child benefit and child tax credit. [185388]

Dawn Primarolo: The parents of all students aged 16 to 19 who are undertaking courses of full-time, non-advanced education in respect of academic or vocational qualifications and who are receiving educational maintenance allowance will be eligible for child benefit and child tax credit.

However, the Government are aware of the disparity in support to parents of children in full time education and unwaged training and intend to extend entitlement to child benefit and child tax credit for these young people at the earliest opportunity.

I refer my hon. Friend to the answer I gave to my hon. Friend the Member for Newcastle upon Tyne, Central (Mr. Cousins) on 6 July 2004, *Official Report*, column 623W.

EU Withdrawal (Costs)

Mr. Ian Taylor: To ask the Chancellor of the Exchequer if he will commission and publish a study into the costs of UK withdrawal from the EU, which includes the economic and social impact on each region and nation of the UK. [184369]

Mr. Foulkes: To ask the Chancellor of the Exchequer what recent assessment he has made of the effects on the UK economy of membership of the European single market. [184526]

Ruth Kelly: The assessment of the five economic tests, published 9 June 2003, states,

> "With more than half the UK's trade with the EU and increasing integration of product, labour, and capital markets, the UK's economic interest is best pursued through a deepening cooperation with other European countries as part of the Government's commitment to strong EU and successful EMU."

The Treasury estimates that 3 million jobs in the UK are linked, directly and indirectly, to the export of goods and services to the European Union.

International Economy

Mrs. Lawrence: To ask the Chancellor of the Exchequer if he will make a statement on the international economy. [185981]

John Healey: On 3 June, in recognition of the pressures in the oil market and because of a shortage of oil supply to meet demand, the Chancellor of the Exchequer announced that we would be reviewing progress of the annual fuel duty increase planned for 1 September.

The Government's focus since 3 June has been on OPEC and oil producers and their responsibilities to meet their own targets on sustainable oil prices, and we have sought to await the outcome of this month's OPEC Ministers meeting before making a further statement. I will give further details of discussions and progress to Members of the House when I appear before the Treasury Select Committee tomorrow.

With the next meeting of OPEC Ministers now moved from July to September, and in light of the continuing uncertainty in the oil market, we have decided to keep the planned increase, including for sulphur-free fuel and rebated fuels, under review, and will report back further at the time of the pre-Budget report. Because of its environmental benefits the Government remain committed to the introduction of sulphur free fuel, and will be in discussion with the industry over its availability across the country. The Chancellor of the Exchequer will also report back on this issue at the time of the pre-Budget report.

Network Rail Debts

Mr. Luff: To ask the Chancellor of the Exchequer who will guarantee the debts of Network Rail after the abolition of the Strategic Rail Authority; and whether they will now count as part of the Government's borrowing requirement. [185431]

Mr. Boateng: When it is wound up, the SRA's duties and financial obligations, including those in support of Network Rail's borrowing, will transfer to the Department for Transport. This will not affect the classification of Network Rail or its debt.

Pay Systems

Malcolm Bruce: To ask the Chancellor of the Exchequer if he will place in the Library the most recent review of *(a)* his Department's pay systems, *(b)* the pay systems of the non-departmental public bodies for which he is responsible and *(c)* the departmental equal pay action plan. [181355]

Ruth Kelly: Information on the most recent reviews of pay systems of the Chancellor's Departments and of their equal pay action plans has been deposited in the Library. The Chancellor is not responsible for any non-departmental public bodies.

Special Advisers

Mr. Evans: To ask the Chancellor of the Exchequer how many of the reductions in the numbers of civil servants in his Department announced in the spending review will be of special advisers. [185481]

Mr. Boateng: Special advisers are appointed by Ministers, with the approval of the Prime Minister, in accordance with Article 3(2) of the Civil Service Order in Council 1995 (as amended).

Spending Review 2004 published planned reductions in civil service and public administration posts of 84,150 by 2008, including the redeployment of 13,550 to front line posts/activities. Details of these reductions are a matter for individual Departments. Progress on meeting the efficiency targets will be publicly reported so that the Government are accountable for the results. Departments will report progress through their departmental reports and on their website.

Spending Review

Sir Patrick Cormack: To ask the Chancellor of the Exchequer pursuant to his Statement of 12 July 2004, *Official Report*, column 1131, on Spending Review, if he

will list the £30 billion worth of asset sales included in the objective; and when he expects the sales to be completed. [184867]

Mr. Boateng: The £30 billion objective for asset sales covers the period to 2010 and relates to the public sector as a whole. While decisions on specific asset disposals are for individual Government Departments and local authorities, these decisions will be informed by the work that Chancellor has commissioned from Sir Michael Lyons.

Mr. Letwin: To ask the Chancellor of the Exchequer if he will make a statement on the differences between planned administration expenditure by department in Table 2.3 of the 2004 Spending Review Report and Table 5.1 of the Public Expenditure Statistical Analyses 2004. [184706]

Mr. Boateng: The administration budgets in table 2.3 of the 2004 Spending Review are net of all income departments generate through their administrative expenditure. The figures in Table 5.1 of the Public Expenditure Statistical Analyses 2004 are only net of the element of this income that forms part of other departments' administration costs.

Figures published in the Spending Review take account of reclassifications implemented in line with the recommendation of made by Sir Peter Gershon.

Tax Credits (Compensatory Payments)

Mr. Webb: To ask the Chancellor of the Exchequer how many tax credit compensation claims have been *(a)* submitted and *(b)* upheld since April 2003; and what the (i) average and (ii) total value is of compensation payments made. [185054]

Mr. Tynan: To ask the Chancellor of the Exchequer pursuant to his answer of 23 June 2004, *Official Report*, column 1411W, what the value of compensatory payments made to those receiving tax credits was in the last financial year. [185675]

Dawn Primarolo: A total of 10,800 compensation payments for tax credits were authorised in 2003–04. This represents about one eighth of one per cent of all claims received for tax credit awards. The total value of these payments was £370,000, and the average payment was £34. 255 claims were refused.

Tobacco Smuggling

David Taylor: To ask the Chancellor of the Exchequer (1) what discussions he has had on making the UK a co-signatory to the Anti-Contraband and Anti-Counterfeit Agreement and General Release reached on 19 July between the European Community, Philip Morris International and subsidiary companies; [185503]

(2) what recent discussions Her Majesty's Customs and Excise have had with *(a)* Philip Morris International, *(b)* British American Tobacco, *(c)* Imperial Tobacco and *(d)* Gallaher Group plc on the status of the Memorandum of Understanding on the smuggling of tobacco products which these companies have with the Government; [185483];

(3) what discussions he has had with OLAF, the European Anti-fraud Office, concerning the agreement on tobacco smuggling recently reached between the European Council and Philip Morris International. [185486]

John Healey: HM Customs and Excise have Memoranda of Understanding (MOUs) with British American Tobacco, Imperial Tobacco and Gallaher. As part of these, Customs meet regularly to discuss developments in the illicit market including the status of the MOUs.

Although Customs do not currently have an MOU with Philip Morris International (PMI), as their products have much less significance in either the licit or illicit UK tobacco market, they meet regularly to discuss developments in the illicit market.

The UK was not part of the European action taken against PMI in August 2001.

There have been no discussions on making the UK a co-signatory to the Anti-Contraband and Anti-Counterfeit Agreement.

David Taylor: To ask the Chancellor of the Exchequer what plans there are to bring the Memorandum of Understanding on tobacco smuggling in line with the terms of the Anti-Contraband and Anti-Counterfeit Agreement and General Release reached on 9 July between the European Council and Philip Morris International. [185485]

John Healey: HM Customs and Excise have Memoranda of Understanding (MOUs) in place with the main UK tobacco manufacturers, the first of which was agreed in July 2002. Since its peak in 2000–01, the illicit cigarette market has been successfully reduced by more than 2.5 billion sticks per annum and the incidence of UK manufactured cigarettes being smuggled into the UK has fallen markedly from about 75 per cent. of large seizures to 31 per cent. in 2002–03.

Customs regularly assess the size and composition of the illicit cigarette market in the UK and take the measures they consider will continue their successful strategy of reducing smuggling. We will assess the detail of the Anti-Contraband and Anti-Counterfeit Agreement and consider whether we would wish to become a co-signatory to the Agreement.

Working Tax Credits (Recovery of Overpayments)

Alan Simpson: To ask the Chancellor of the Exchequer what assessment his Department has made of the number of low paid workers who give up work due to inability to afford child care places consequent on the reclaiming of overpaid working tax credits; and what his assessment is of the impact on business. [184718]

Dawn Primarolo: The data available to the Inland Revenue do not include information about the reasons for individual tax credits recipients moving out of work.

NORTHERN IRELAND

Andersonstown News Group

Lady Hermon: To ask the Secretary of State for Northern Ireland if he will list the *(a)* nature and *(b)* extent of the application for funding made by the Andersonstown News Group to Invest NI. [185371]

Mr. Gardiner: The Andersonstown News Group approached Invest NI to request assistance for a project to publish a new national daily newspaper at an estimated investment cost of circa £3 million. The project anticipated the creation of up to 41 new jobs, 35 of which were to be based at the Group's offices in West Belfast and six in new offices to be established in Monaghan Town, in the Republic of Ireland. The company anticipated that 50 per cent. of the sales revenue would be generated in the Republic of Ireland.

A commercial appraisal of the project has been completed by independent consultants. In line with Part II, Paragraph 13 (Third party's commercial confidences) of the Code of Practice on Access to Government Information, it would be inappropriate to disclose further information.

Common Funding Formula

David Burnside: To ask the Secretary of State for Northern Ireland if he will make a statement on the common funding formula. [184215]

Mr. Gardiner: The Department plans to consult schools on the final proposals for the Common Funding Formula over the next few months, with the aim of implementing Common Funding in April 2005.

Consultancy Contracts

Mr. Lidington: To ask the Secretary of State for Northern Ireland if he will list in respect of each Department, agency and non-departmental public body in Northern Ireland the consultancy contracts that they have entered into in each of the last three financial years, together with a statement about the purpose of each contract and its cost to public funds. [181175]

Mr. Pearson: Information about all consultancy contracts entered into by Departments, agencies and non-departmental public bodies in Northern Ireland and related costs is not held centrally and could be obtained from individual bodies only at disproportionate cost. Information on consultancy contracts awarded by the Central Procurement Directorate on behalf of public bodies in Northern Ireland is held by that Directorate and a copy has been placed in the Library.

Domestic Violence, Crime and Victims Bill

Lady Hermon: To ask the Secretary of State for Northern Ireland what public consultation was undertaken in Northern Ireland by his Department in relation to the introduction in the Domestic Violence, Crime and Victims Bill of non-jury trials for those unfit to stand trial; and if he will make a statement. [183667]

Mr. Spellar: There are no measures in the Domestic Violence, Crime and Victims Bill that provide for non-jury trials for those unfit to stand trial. However, clauses 22 and 23 of that Bill relate to pre-trial hearings on fitness to plead and will give the judge, rather than jury, the responsibility for determining fitness to plead on mental health grounds.

Based on a recommendation of the Auld Review of the Criminal Courts, the opportunity arose through the Domestic Violence, Crime and Victims Bill to apply this valuable measure to Northern Ireland. Given the timetable of the Bill and the opportunity presented, a public consultation was not possible.

Lady Hermon: To ask the Secretary of State for Northern Ireland what consultations took place between his Department and the Home Office in relation to the introduction in the Domestic Violence, Crime and Victims Bill of non-jury trials for those unfit to stand trial in Northern Ireland; and if he will make a statement. [183606]

Mr. Spellar: There are no measures in the Domestic Violence, Crime and Victims Bill that provide for non-jury trials for those unfit to stand trial. However, clauses 22 and 23 of that Bill relate to pre-trial hearings on fitness to plead and will give the judge, rather than jury, the responsibility for determining fitness to plead on mental health grounds.

My officials have been and continue to be in close contact about provisions that fall within the Domestic Violence, Crime and Victims Bill, including those which relate to non-jury pre-trial hearings on fitness to plead.

Home Office officials have advised my officials of developments in relation to this measure and both Departments have worked closely together to keep the arrangements for Northern Ireland in line with those proposed for England and Wales and to ensure that this valuable provision is applied within Northern Ireland.

Lady Hermon: To ask the Secretary of State for Northern Ireland what public consultation was undertaken in Northern Ireland by his Department in relation to the introduction of the Domestic Violence, Crime and Victims Bill of restraining orders on acquittal; and if he will make a statement. [183604]

Mr. Spellar: The Government's proposal to improve restraining orders and extend their availability in Northern Ireland was included in the Northern Ireland domestic violence consultation paper "Tackling Violence at Home".

The public consultation period ran from mid October to mid December 2003 in addition to which my officials carried out 11 workshops across Northern Ireland on the proposals contained in the consultation document. The proposal to make restraining orders available on acquittal was highlighted at each of these workshops. In addition to comments made at these sessions some further 70 written consultation responses were received.

The responses were unanimously in agreement with extending the use of restraining orders, especially for offences of violence against the person. Respondents considered that this provided extra support and protection to victims.

Lady Hermon: To ask the Secretary of State for Northern Ireland what consultations took place between his Department and the Home Office in relation to the introduction in the Domestic Violence, Crime and Victims Bill of restraining orders on acquittal in Northern Ireland; and if he will make a statement. [183605]

Mr. Spellar: Officials from both the Home Office and Northern Ireland Office are represented on the UK-wide Domestic Violence Virtual Group which was established to shadow the Inter-Ministerial Group on Domestic Violence, of which my colleague, Angela Smith, MP (the Under-Secretary of State for Northern Ireland) is a member.

The work of the Domestic Violence Virtual Group has consequently ensured that consultation on domestic violence issues is continuous between officials of both the Northern Ireland Office and the Home Office.

In addition my officials continue to be in close contact with the Home Office about issues arising from and relating to the Domestic Violence, Crime and Victims Bill. Both Departments have been in consultation and discussion regarding the introduction of restraining orders on acquittal at each stage of the drafting and parliamentary processes.

Employer's Liability Insurance

Mr. Beggs: To ask the Secretary of State for Northern Ireland if he will assess the effects of the removal of employer's liability compulsory insurance requirements on Northern Ireland's smallest-owner-operated limited companies; and if he will make a statement. [184937]

Mr. Gardiner: At national level the Department for Work and Pensions is currently reviewing the Employer's Liability Compulsory Insurance regulations (ELCI) in respect of those limited companies in the UK where the owner is the only employee. If a decision is made to remove the requirement for ELCI from limited companies in the UK where the owner is the only employee, then a formal consultation will take place in the autumn with any legislative change expected in the UK early in 2005. The Department for Enterprise, Trade and Investment will be closely involved in implementing the process.

European Parliamentary Elections

Lady Hermon: To ask the Secretary of State for Northern Ireland, how many voters were turned away from polling stations in Northern Ireland at the recent European parliamentary elections for not having valid photographic identification. [179494]

Mr. Spellar: 2,622 electors were originally turned away having arrived at a polling station without valid photographic identification. 1,123 of those electors subsequently returned before the close of poll with an alternative, correct form of ID and were able to cast their vote. The remainder of this total—1,499 electors—were unable to vote because of a failure to produce valid identification.

The totals recorded are as follows.

Constituency	*Number originally turned away for invalid ID*	*Number of these not returning*
Belfast East	106	69
Belfast North	113	68
Belfast South	92	46
Belfast West	157	82
East Antrim	96	57
East Londonderry	143	86
Fermanagh and South Tyrone	200	108
Foyle	218	114
Lagan Valley	93	55
Mid Ulster	233	138
Newry and Armagh	200	108
North Antrim	224	134
North Down	81	54
South Antrim	124	74
South Down	145	86
Strangford	103	58
Upper Bann	151	71
West Tyrone	143	91
Total	2,622	1,499

Harassment

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what precise conduct of the employee of the Department of Education in Northern Ireland found guilty in May 2001 of harassing a colleague, was deemed by the Department to have constituted the harassment; and whether this information was made known to the employee at the time the charge was levelled. [185152]

Mr. Gardiner: Following a thorough and impartial investigation the individual to whom the hon. Member's question refers was found to have acted in an inappropriate manner during a meeting with a colleague that caused the individual to feel upset and intimidated.

The specific actions that were deemed to be inappropriate conduct were:

(a) To ignore a member of staff in a distressed condition, and

(b) To continue with a particular line of questioning and critical personal observations.

The person to whom the hon. Member's question refers was informed of the charge on 21 May 2001, when a formal written statement defining the disciplinary charge was issued, and subsequently on 24 February 2003 in a written response to correspondence from a Member of the Legislative Assembly in Northern Ireland.

Housing Executive Properties

Mr. Beggs: To ask the Secretary of State for Northern Ireland (1) what proportion of former Northern Ireland Housing Executive properties that are retained by the initial owner but are now privately rented were rented within *(a)* three years, *(b)* five years, *(c)* seven years and *(d)* 10 years of the purchase; [183507]

(2) what proportion of former Northern Ireland Housing Executive properties are retained by the initial owner but are now privately rented. [183512]

Mr. Spellar: The Housing Executive is unable to provide the information. The consultation document launched on 18 May 2004 proposing amendments to the House Sales Scheme and the extension of the statutory Right to Buy Scheme to Housing Associations tenants sets out a range of measures to encourage the retention of properties in the social rented sector.

Mr. Beggs: To ask the Secretary of State for Northern Ireland how many former Northern Ireland Housing Executive properties bought initially with a discount have been resold; and of these, what proportion were resold within *(a)* three, *(b)* five, *(c)* seven and *(d)* 10 years. [183511]

Mr. Spellar: The information is not readily available. The issue of discounts is covered in the consultation document launched on 18 May 2004 proposing amendments to the House Sales Scheme and extending the statutory Right to Buy Scheme to Housing Associations tenants.

Job Losses (Civil Servants)

Lady Hermon: To ask the Secretary of State for Northern Ireland how many civil servants in Northern Ireland, broken down by Department, he anticipates will lose their jobs as a consequence of the Comprehensive Spending Review; and how he expects frontline services will be affected. [185084]

Mr. Pearson: I am committed to delivering efficiency gains for public services that at least match the 2.5 per cent. a year figure announced by the Chancellor in the SR2004 Spending Review outcome. All the money released through greater efficiency will be retained in Northern Ireland for reinvestment in priority front line services to the public. There is scope in Northern Ireland, as elsewhere, to reduce the number of posts involved in back office and related areas, so that more people and money can be reallocated to front line services.

The detailed implications for Northern Ireland are being considered as part of our own efficiency review which is ongoing. The conclusions of this work, together with the implications for civil service posts, will be contained in our Draft Priorities and Budget, to be published in September 2004.

Lance Bombadier Restorick

Patrick Mercer: To ask the Secretary of State for Northern Ireland (1) what advice about IRA operations was given by the RUC's Tasking Control Group (South) to members of the security forces before Lance Bombadier Restorick's death in January 1997; [183674]

(2) what measures were taken by the security forces once it became known that an IRA operation was likely in the Bessbrook area in January 1997; [183675]

(3) what knowledge the RUC had of future IRA operations in the Bessbrook area before the death of Lance Bombadier Restorick in January 1997. [183676]

Mr. Pearson: The Police Ombudsman has agreed to investigate the issues surrounding the allegations, therefore, it would be inappropriate for me to comment further.

Public Transport (Disabled People)

Mrs. Iris Robinson: To ask the Secretary of State for Northern Ireland what estimate he has made of the cost of providing free public transport for the disabled in Northern Ireland. [184062]

Mr. Spellar: Free travel on scheduled public transport is available to people who are registered blind and to people in receipt of a War Disablement Pension who have been assessed as being more than 20 per cent. disabled. During the financial year 2004–05 it is estimated that the cost of providing such concessions will amount to £320,000.

In addition, free travel is available to all Northern Ireland residents aged over 65 years of age, 57 per cent. of whom consider themselves to have a limiting long-term illness. During the financial year 2004–05, I estimate that the cost of providing free travel to that proportion of older people will be around £7.8 million.

Since 1 April 2004, half fare concessions have been available under the Northern Ireland Concessionary Fares Scheme to people who:

are in receipt of either mobility component of Disability Living Allowance;

have had a driving licence refused or revoked for medical reasons;

are registered with a Health and Social Services Trust as being partially sighted;

are known to a Health and Social Services Trust as having a learning disability.

The Department for Regional Development has estimated that the operating costs for these four groups of people for the financial year 2004–05 will be £205,000, at current fare levels. The estimated cost of changing the Concessionary Fares Scheme to provide free-fare travel, rather than half fare concessions, to these groups would be likely to cost around £500,000 per annum in addition to set-up costs.

I therefore estimate that the cost of providing free travel on scheduled public transport to people with disabilities would be in the region of £8.62 million in the current financial year. However, there are currently no plans to further extend the Northern Ireland Concessionary Fares Scheme to provide free public transport for the four groups of people who have received half fare concessions since April 2004.

Translink

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland when Translink expects the first of its new trains to begin service. [185154]

Mr. Spellar: The first of the new trains is expected to be introduced to passenger service in October 2004.

Ulster Volunteer Force

Mr. Hancock: To ask the Secretary of State for Northern Ireland (1) if he will recognise the Ulster Volunteer Force as a Unionist paramilitary group; and if he will make a statement; [169174]

(2) when he will answer the question of 23 April from the hon. Member for Portsmouth South, ref 169174, about the Ulster Volunteer Force. [185216]

Mr. Pearson: I am sorry for the delay in replying.

There is no paramilitary group categorised as Unionist. The more accurate terminology is Loyalist. The Government's overall judgment is that the ceasefire of the Ulster Volunteer Force remains in place.

United States (Ministerial Representations)

David Burnside: To ask the Secretary of State for Northern Ireland (1) what representations he has made to the United States Administration to prevent Sinn Fein representatives entering the USA under the provisions of the Patriot Act following the first report of the Independent Monitoring Commission in April; [182970]

(2) what representations he has made to the State Department in the USA to place *(a)* the Provisional IRA, *(b)* Sinn Fein and *(c)* the Ulster Volunteer Force on the list of designated foreign terrorist organisations following the first report of the Independent Monitoring Commission in April. [182971]

Mr. Pearson: None.

DEPUTY PRIME MINISTER

Administration Fees

Mr. Edward Davey: To ask the Deputy Prime Minister how much has been *(a)* budgeted for and *(b)* spent on administration fees by his Department in the last three years. [184144]

Phil Hope: The Office of the Deputy Prime Minister (ODPM) was created following the Machinery of Government changes on 29 May 2002. The following table shows the Office's budget and expenditure for administration costs for the financial years 2002–03 and 2003–04 and the budgets for 2004–05.

£000

	2002–03[1]	2002–03[2]	2003–04[1]	2003–04[2]	2004–05[1]
ODPM(C)	180,011	171,648	177,075	173,737	181,352
Government offices	110,534	109,507	135,205	133,835	115,020
Executive agencies	43,593	42,584	37,505	35,510	39,475
Total	334,138	323,739	349,785	343,082	335,847

[1] Budget
[2] Expenditure

The budget figure in 2004–05 for the Government Offices is lower than in previous years, as additional work undertaken for Other Government Departments is agreed on an annual basis and the budgets transferred in year.

Arm's Length Management Organisations

Mr. David Drew: To ask the Deputy Prime Minister if he will list arm's length management organisations which have achieved 3-star status. [184236]

Keith Hill: Five arms length management organisations have achieved 3-star status. These are Ashfield Homes, Brent Housing Partnership, Carrick Housing, Derby Homes and City West Homes (Westminster).

Audit Commission

Mrs. Spelman: To ask the Deputy Prime Minister what the *(a)* estimated running costs and *(b)* total expenditure of the Audit Commission (i) has been in each year since its creation and (ii) is expected to be in (A) 2004–05 and (B) 2005–06. [184980]

Mr. Raynsford: This is an operational matter for the Audit Commission and I will ask the Chief Executive to reply.

Council Tax

Mr. Hurst: To ask the Deputy Prime Minister what proportion of pensioner households in England paid the full council tax in 2002–03. [184494]

Mr. Raynsford: The requested information is not collected centrally and could be provided only at disproportionate cost.

Mr. Hurst: To ask the Deputy Prime Minister what the average council tax was in England in each year from 1993 to 2003. [184559]

Mr. Raynsford: The requested information is in the table.

£

	Average band D area council tax	Average council tax per dwelling
1993–94	568	456
1994–95	580	473
1995–96	609	498
1996–97	646	525
1997–98	688	564
1998–99	747	614
1999–2000	798	656
2000–01	847	697
2001–02	901	741
2002–03	976	804
2003–04	1,102	908

Departmental Accounting Practice

Mr. Bacon: To ask the Deputy Prime Minister who the Finance Director of *(a)* his Office and *(b)* Ordnance Survey is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts of each in the last five years. [183430]

Phil Hope: Andrew Lean is the Finance Director for the Office of the Deputy Prime Minister. He is currently studying for an Association of Chartered Certified Accountants (ACCA) Diploma in Financial Management. The Office's first resource accounts for 2002–03 were not qualified.

Alastair Matthews has been the Finance Director of Ordnance Survey since July 2003. He is a Fellow of the Institute of Chartered Accountants in England and Wales. The Ordnance Survey's Annual Accounts have been qualified on the same basis in each of the five years up to and including 31 March 2004. The qualification relates to a difference of opinion between the National Audit Office and Ordnance Survey as to whether the National Geographic Database should be capitalised on Ordnance Survey's Balance Sheet.

Departmental Annual Reports

Dr. Cable: To ask the Deputy Prime Minister how many copies of his Department's, and predecessor Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183841]

Phil Hope: The Office of the Deputy Prime Minister and its executive agencies were created on 29 May 2002. Both Annual Reports issued since this date have been published by The Stationery Office (TSO Ltd.). The number of copies they printed and sold, and the revenue they made is commercial in confidence and hence the Office of the Deputy Prime Minister does not know these details.

The costs to the Office of the Deputy Prime Minister—and its principal predecessor Departments—for the past four financial years are set out as follows. Given Departmental changes, the costs of publication for the years 1997–2000 could be identified only at disproportionate cost.

The Department for Environment, Transport and Regions Annual Report cost circa £52,000 in 2000–01;

The Department for Transport, Local Government and Regions's Annual Report cost circa £38,000 in 2001–02; and

the first annual report for the Office of the Deputy prime Minister, publishing in May 2003, cost circa £17,000;

the second annual report for the Office of the Deputy Prime Minister, publishing in April 2004, cost circa £49,000.

Departmental Travel Costs

Dr. Cable: To ask the Deputy Prime Minister what the travel costs were of civil servants in *(a)* his Department, *(b)* its predecessor Department and *(c)* its related agencies in each year since 1997. [183907]

Phil Hope: The Office of the Deputy Prime Minister was formed on 29 May 2002.

(a) The travel and subsistence costs incurred by civil servants in the Office of the Deputy Prime Minister in each financial year are as follows:

	£
2002–03	3,156,223
2003–04	3,187,321

(b) Information for the predecessor Department could only be obtained at disproportionate cost.

(c) In the Office of the Deputy Prime Minister's three executive agencies, (i) the Fire Service College, (ii) the Planning Inspectorate and (iii) the Queen Elizabeth II Conference Centre, travel and subsistence costs were as follows:

(i) The Fire Service College:

	£
1999–2000	181,291
2000–01	176,313
2001–02	121,095
2002–03	120,127
2003–04	150,352

Figures for 1997–98 and 1998–99 are not readily available and could be obtained only at disproportionate cost.

(ii) The Planning Inspectorate (figures rounded to the nearest £100,000):

	£
1997–98	2,200,000
1998–99	1,900,000
1999–2000	2,100,000
2000–01	2,400,000
2001–02	2,400,000
2002–03	2,700,000
2003–04	2,600,000

(iii) The Queen Elizabeth II Conference Centre (figures rounded to the nearest £1,000):

	£
1997–98	39,000
1998–99	39,000
1999–2000	46,000
2000–01	57,000
2001–02	48,000
2002–03	46,000
2003–04	42,000

All travel is undertaken fully in accordance with the rules set out in the Civil Service Management Code.

East End of London (Development)

Mr. Rosindell: To ask the Deputy Prime Minister how much will be spent on the development of east end areas in London in 2004–05. [184286]

Keith Hill: Through projects approved to date under the Office of the Deputy Prime Minister Thames Gateway Programme it is expected that some

£40 million will be spent in the east end of London during 2004–5. This funding will help to regenerate existing communities and open up new opportunities for housing and employment.

In addition to this there will be further investment by the Housing Corporation. I have asked, the Chief Executive, Jon Rouse to write to the hon. Member separately on this.

Homelessness

Mr. Tony Clarke: To ask the Deputy Prime Minister how many homelessness applications have been accepted in Northampton in each of the last five years. [184842]

Phil Hope: Information about English local authorities' activities under homelessness legislation is reported to the Office of the Deputy Prime Minister on quarterly P1E housing activity returns. The total number of decisions made and the number of these accepted as unintentionally homeless and in priority need, as reported by Northampton borough council during the past five years, is tabled as follows.

Decisions taken by Northampton borough council in respect of applications by homeless households

	Decisions	*Acceptances*[1]
1999–2000	1,146	369
2000–01	1,120	430
2001–02	849	286
2002–03	1,066	414
2003–04	1,028	420

[1] Acceptances refer to eligible households found to be unintentionally homeless and in a priority need category

Source:

ODPM quarterly P1E homelessness returns

Mr. Hancock: To ask the Deputy Prime Minister how many homelessness applications have been accepted in Portsmouth in each of the last five years. [184315]

Phil Hope: Information about English local authorities' activities under homelessness legislation is reported to the Office of the Deputy Prime Minister on quarterly P1E housing activity returns. The total number of decisions made and the number of these accepted as unintentionally homeless and in priority need, as reported by Portsmouth City Council during the past five years, is tabled.

Decisions taken by Portsmouth City Council in respect of applications by homeless households

	Decisions	*Acceptances*[1]
1999–2000	1,871	547
2000–01	1,906	529
2001–02	2,500	655
2002–03	2,826	804
2003–04	2,040	760

ODPM quarterly P1E homelessness returns

House Prices/Incomes Ratio

Mr. Gray: To ask the Deputy Prime Minister what the house price to incomes ratio is in each region; and what plans he has to boost affordable housing investment in the South West. [185182]

Keith Hill: The latest data on property prices to earnings ratios are set out in the following table. The substantially increased funding for affordable housing announced in the Spending Review will, along with significant improvements in efficiency, provide 10,000 (50 per cent.) more social rented homes a year by 2007–08. More than 40,000 homes will also be provided in the next three years for essential public sector workers and through other low cost home ownership schemes. The Office of the Deputy Prime Minister is looking at how funding will be split between regions to reflect housing needs and our national housing priorities and targets.

	Average property price (£)[1]	*Average annual earnings (£)*[2]	*Ratio of property prices to earnings*
East of England	166,103	26,545	6.26
East Midlands	117,228	22,932	5.11
London	242,782	31,532	7.70
North East	85,702	21,017	4.08
North West	96,405	22,964	4.20
South East	196,027	28,037	6.99
South West	162,587	23,400	6.95
West Midlands	123,313	22,879	5.39
Yorkshire and the Humber	98,109	22,304	4.40
England	150,947	25,297	5.97

[1] January–June 2003.

[2] April 2003.

Housing Corporation Rural Programme

Mr. Gray: To ask the Deputy Prime Minister whether he plans to retain the ring-fenced rural programme of the Housing Corporation available to new starts in settlements of fewer than 3,000 people. [185194]

Keith Hill: The Office of the Deputy Prime Minister current target—to provide at least 3,500 new affordable homes in communities with fewer than 3,000 people—covers the period 2004–06 (and early indications show that this is likely to be exceeded). From 2006–07 targets will be determined regionally based on advice from the Regional Housing Boards.

Housing Stock Transfers

Dr. Iddon: To ask the Deputy Prime Minister what evidence his Department has collated to support its conclusions that *(a)* it is more cost effective to improve a house when the improvements are conducted by a housing association or an arm's length management organisation rather than by a local housing authority and *(b)* the transfer of local authority housing stock into alternative management and/or ownership results in higher levels of tenant satisfaction. [184121]

Keith Hill: The information is as follows.

(a) The Public Accounts Committee's 40th report: Improving Social Housing through Transfer published in July 2003 contains supplementary evidence provided by the office on the value for money of stock transfer. This assessment carried out in April 2003 used guidance in the 2003 Treasury Green Book "Appraisal and Evaluation in Central Government" which took effect on 1 April 2003. As stated in our response to ODPM: Housing, Planning, Local Government and the Regions Committee's Report on Decent Homes, evidence is also available on inspection ratings of ALMOs following their first six months of operation compared with their previous inspections as local authority managed housing departments.

Together with the Housing Corporation, we are currently considering the most appropriate approach for future monitoring and evaluating the transfer programme, and parallel work is underway for the ALMO programme. Each monitoring/evaluation system will be tailored to the particular circumstances of each programme, but will also collect consistent data so that it is possible, in the longer term, to provide a comparative assessment of decent homes delivery, value for money, and tenant satisfaction across the different programmes.

(b) Housemark's January 2004 report showed 79 per cent. of transfer tenants were satisfied with their landlord compared to 74 per cent. for council tenants.

As the ALMO programme did not start until 2002, there are no reliable data available to demonstrate whether levels of participation and satisfaction are improving.

Housing Investment

Dr. Naysmith: To ask the Deputy Prime Minister when he expects to meet Regional Planning Guidance targets of 6,000 to 10,000 new affordable homes per year established in 2001 for the South West. [183990]

Keith Hill: Policy of the Office Deputy Prime Minister—as set out in Planning Policy Guidance Note 3—is not to set region-wide targets or quotas for affordable housing. Targets are more appropriately set at the local level as they are, necessarily, derived from local circumstances and assessments. The figures set out in Regional Planning Guidance for the South West (RPG10) are, therefore, not a target but an indicator against which the provision of affordable housing can be monitored. Better quality information than currently available is needed to assess how we are progressing against this indicator. However, the Office of the Deputy Prime Minister does know that we are not yet providing sufficient affordable homes. That is why the Office of the Deputy Prime Minister has accepted Kate Barker's recommendation that there should be a step-change in housing supply. Over the coming months, we will be consulting on a package of proposals designed to achieve this, including the provision of independent advice to the Regions, which should improve significantly our ability to deliver and monitor the provision of affordable homes. The Office of the Deputy Prime Minister is also committing more resources to the delivery of affordable homes—the 2004 Spending Review will allow us to increase new social house building by 50 per cent.

Mr. Edward Davey: To ask the Deputy Prime Minister what the departmental expenditure limit for housing was in 2003–04. [184124]

Phil Hope: Housing programmes, including the growth areas, comprised £4.022 billion of the Office of the Deputy prime Minister's final departmental expenditure limit for 2003–04.

Mr. Drew: To ask the Deputy Prime Minister what plans he has to allow arm's length management organisations access to borrowing to meet the decent homes standard. [184568]

Keith Hill: The Office of the Deputy Prime Minister has no current plans to change the current arrangements under which local authorities carry out the borrowing necessary for their Arms Length Management Organisations (ALMOs) to meet the decent homes standard. ALMOs are unable to borrow direct because, as managers of the local authority's stock, they have no assets on which to secure a loan.

Mr. Flook: To ask the Deputy Prime Minister how much funding has been made available in each of the last three years under the Supporting People programme to each of the housing authorities in Somerset. [184636]

Phil Hope: The Supporting People programme went live in April 2003. Prior to this date the Government contributed towards the administration costs of administering authorities in establishing the programme.

For 2003–04 and 2004–05 Supporting People grants have been given for both administration and programme costs. Budgets for 2005–06 to 2007–08 have not yet been finalised. The Office of the Deputy Prime Minister plans to announce individual allocations to administering authorities for 2005–06 to 2007–08 in the autumn. Supporting People grants are paid direct to county councils and unitary authorities not district authorities.

The following table sets out the Supporting People grant funding over the last three years for each of the housing authorities in Somerset:

£

Grants	*Bath and North East Somerset*	*North Somerset District*	*Somerset*
2002–03			
Administration	190,412	170,885	369,694
Programme	—	—	—
2003–04			
Administration	211,383	198,798	455,878
Programme	4,389,642	6,437,692	21,430,845
2004–05			
Allocated Administration	185,000	174,217	472,697
Programme	4,299,069	6,294,582	21,133,324

Mr. Flook: To ask the Deputy Prime Minister how many *(a)* affordable homes and *(b)* homes for rent have been built by (i) Taunton Deane borough council and (ii) housing associations in Taunton Deane in each of the last seven years. [184639]

Keith Hill: Figures for affordable homes built are not held centrally and could be provided only at disproportionate cost.

Based on data reported by Taunton Deane council and the National House-Building Council, the number of council and registered social landlord dwellings that have been built within Taunton Deane in the last seven financial years are shown in the following table:

	(i) Taunton Deane	*(ii) Registered Social Landlords*
1997–98	0	20
1998–99	0	111
1999–2000	0	79
2000–01	0	44
2001–02	0	34
2002–03	4	51
2003–04	0	23

Ms Keeble: To ask the Deputy Prime Minister (1) how many social housing units he expects to be built in the south Midlands growth area as a result of the extra finance for housing announced as part of the Government's three-year spending plans; [184696]

(2) what proportion of funds for affordable housing announced as part of the spending review will go to the south Midlands growth area. [184697]

Keith Hill: The additional funding provided in the Spending Review will, along with efficiency improvements, produce 10,000 extra social rented homes a year by 2007–08. Decisions have not yet been taken on how Regional Housing Pot funding for 2006–07 and 2007–08, including the additional funding for affordable housing, is split between regions. This needs to reflect the different pattern of needs across regions and the Government's national housing priorities, including development of the growth areas, and targets. The Office of the Deputy Prime Minister is aiming to complete this work, which raises some complex issues, by the end of the year. The Office of the Deputy Prime Minister will announce decisions on allocation of funding within regions next summer in the light of recommendations from Regional Housing Boards, which are due in May next year.

Mr. Chris Smith: To ask the Deputy Prime Minister what funding was made available to the London Borough of Islington for each year since 1997 for housing capital work, broken down by *(a)* housing capital authorisation, *(b)* authority to use capital receipts for housing capital work, *(c)* authority for stock-transferred estates to undertake capital work, *(d)* allocations to housing associations for work within the borough, *(e)* authority for work to be carried out by the arm's length management organisation; and *(f)* what projected funding in future years is in each of these categories. [184725]

Keith Hill: The information is as follows:

(a) is comprised of a number of different elements as shown in the following table.

£000

	Housing Supported Capital Expenditure[1]	*Major Repairs Allowance*	*Disabled Facilities Grant*	*Cash Incentive Scheme*
1997–98	12,708	—	136	2,240
1998–99	17,214	—	124	1,524
1999–2000	18,019	—	131	—
2000–01	28,415	—	142	—
2001–02	12,651	25,434	212	—
2002–03	14,970	25,030	237	—
2003–04	13,607	25,477	360	—
2004–05	13,843	23,966	389	—

[1] Previously known as Annual Capital Guideline, includes private sector renewal and capital receipts initiative allocations; figures up to 2002–03 include an allowance for spending financed from the authorities' capital receipts.

(b) As a with-debt authority, Islington were allowed to use the useable part of the capital receipts they generated for any capital purpose they saw fit, including housing capital work.

(c) Islington received £22.69 million of Estates Renewal Challenge Fund funding after the transfer of two schemes in September 1999.

(d) is comprised of three different elements, as detailed in the following table.

£000

	Approved Development Programme	*Starter Home Initiative*	*Local Authority Social Housing Grant*
1997–98	9,130	—	9,192
1998–99	14,318	—	200
1999–2000	5,800	—	223
2000–01	9,815	—	1,048
2001–02	10,313	—	2,761
2002–03	24,906	597	1,541
2003–04	34,187	3,183	[1]—
2004–05	[2]56,696	[3]—	—

[1] Local Authority Social Housing Grant abolished with effect from 1 April 2003.

[2] 1997–98 to 2003–04 is spend, 2004–05 is allocation.

[3] No figures for 2004–05 available yet.

(e) Islington has been awarded provisional ALMO funding of £24.9 million for 2004–06. Release of this funding is conditional on the ALMO achieving at least a two star rating from the Housing Inspectorate when it is inspected later this year.

(f) A provisional allocation of £16,273,000 has been made for 2005–2006. No other indications for projected funding in future years exist at this time.

Llew Smith: To ask the Deputy Prime Minister what plans he has to order an environmental impact assessment of the additional home construction he announced on 13 July 2004. [184821]

Keith Hill: Proposals for new housing development projects are subject to the requirements of the planning system. Decisions on the need for environmental impact assessment for such proposals will be taken at the appropriate by the relevant local planning authority in accordance with the requirements of Directive 85/337/EEC (as amended) on the effects on the environment of certain public and private project which is given

effect in England by the Town and Country Planning (Environmental Impact Assessment) Regulations (England and Wales) 1999.

Mr. Tony Clarke: To ask the Deputy Prime Minister how many *(a)* affordable homes and *(b)* homes for rent have been built in Northampton in each of the last five years. [184865]

Keith Hill: Figures for affordable homes built and homes for rent built are not held centrally and could be provided only at disproportionate cost.

Based on data reported by Northampton council and the National House-Building Council, the number of registered social landlord and council dwellings that have been built within Northampton in the last five financial years are shown in the following table:

	Number
1999–2000	26
2000–01	51
2001–02	0
2002–03	0
2003–04	83

Dr. Naysmith: To ask the Deputy Prime Minister what account he will take of the information on housing in the South West in the National Housing Federation's booklet, "The Evidence Update", when making future housing investment decisions about the South West region. [185387]

Keith Hill: The Office of the Deputy Prime Minister welcomes the work that the National Housing Federation (NHF) have done for their recent reports on housing needs in the South East and South West. The general picture on housing pressures and the affordability of home ownership is in line with our analysis which under-pinned discussions of funding for affordable housing in the 2004 Spending Review. Officials from the Office of the Deputy Prime will be meeting with the NHF shortly to discuss these reports.

The NHF South West is represented on the South West Housing Body Steering Group and as such they will play a key role in the development of the region's new Regional Housing Strategy (RHS) due for publication in early 2005. The RHS will reflect all relevant evidence from a variety of sources and will form the basis for the housing body's recommendations to Minister's on the distribution of housing resources within the region.

Local Authority Building Control

Mr. Chaytor: To ask the Deputy Prime Minister if he will place in the Library a copy of the 2003 annual monitoring report on the costs of local authority building control functions. [183682]

Phil Hope: No. The Office of the Deputy Prime Minister and the Welsh Assembly Government carry out an annual monitoring exercise whereby local authorities in England and Wales are asked voluntarily to provide a return stating their total charges income and costs in carrying out their prescribed building control functions under the Building (Local Authority Charges) Regulations 1998, but formal 'annual monitoring reports' are not prepared. The information derived from the annual returns is primarily used for internal monitoring purposes, although it is shared with the Local Government Association (LGA). Moreover, a commitment has been given to individual local authorities and the LGA that the annual monitoring exercise will be carried out on an in-confidence basis. This arrangement is currently being reviewed in the light of the Freedom of Information Act 2000 which comes fully into force on 1 January 2005.

Market Towns Initiative (Harwich)

Mr. Ivan Henderson: To ask the Deputy Prime Minister how much funding has been spent in the Harwich constituency from the Market Towns Initiative. [185000]

Keith Hill: Expenditure in Harwich under the Market Towns Initiative for the period 2002–05 was forecast to be £288,884; actual expenditure to date stands at £254,157.

These figures relate to investment delivered through the Regional Development Agency. The amount of additional funding and resources estimated to have been levered into Harwich to supplement market towns investment through the RDA is £1.5 million, derived from supporting partners including English Heritage (HERS fund); Countryside Agency; Sport England and Lottery.

Mobile Phone Masts

Mr. Amess: To ask the Deputy Prime Minister what recent representations he has received regarding the placing of mobile phone masts near schools and hospitals. [185421]

Keith Hill: The information requested could be provided only at disproportionate cost as it is not possible from the central recording systems to accurately identify all of representations received that included the issues of the placing of mobile phone masts near schools and/or near hospitals.

Multi-occupancy Housing

Mr. Simmonds: To ask the Deputy Prime Minister what steps his Department is taking to combat *(a)* overcrowded and *(b)* dangerous multi-occupancy housing. [182162]

Keith Hill: Local authorities have powers in the Housing Act 1985 to deal with overcrowded or unfit Houses in Multiple Occupation (HMOs). Section 352 of the Act gives local authorities powers- to require works to be carried out to render an HMO suitable for the number of occupants. In addition section 354 permits local authorities to limit the number of occupants in an HMO to the number which the authority considers it to be suitable for. A failure to comply with a direction or notice under these sections is a criminal offence. These provisions are to be replaced by new measures in the Housing Bill.

The Bill includes provisions for a new Housing Health and Safety Rating System which will replace the current fitness standard and will enable authorities to take action to deal with health and safety hazards in all

housing including HMOs. The Bill also includes provision for mandatory licensing of large HMOs, and local authorities will have powers to introduce additional licensing to tackle the smaller HMOs. In order to obtain a licence, the landlord will be required to satisfy the local authority that he, or the manager of the property, is a fit and proper person and the house is reasonably suitable for the permitted number of occupants. It will be a criminal offence to operate an HMO without a licence if it is required to be licensed or to permit such an HMO to be occupied by more persons than are permitted under the licence. In addition, local authorities will have powers to make management orders on individual HMOs that are not subject to licensing, if a tribunal agrees that it is necessary to make the order to protect the health, safety and welfare of the residents or other persons occupying properties in the vicinity.

Under the Housing Bill, the Secretary of State and the National Assembly for Wales will have power to amend by Order the statutory overcrowding standards in Part 10 of the 1985 Act and also the provisions in Part 4 of the Bill under which local authorities may serve notices to tackle overcrowding in HMOs. I will be consulting later this year on the ways in which this power might be used.

Northern Way Growth Strategy

Mr. George Howarth: To ask the Deputy Prime Minister what assessment he has made of the number of new houses need to fulfil the Northern Way growth strategy. [185282]

Keith Hill: My right hon. Friend the Deputy Prime Minister has asked the three northern Regional Development Agencies to produce a joint plan for driving sustainable economic growth in the north and that will be published shortly. This plan will also examine the links between housing and economic growth in the north. Until we have sight of this it will be premature to speculate on the number of new houses needed to fulfil the Northern Way growth strategy.

Regional Assembly Referendums

Mr. Jenkin: To ask the Deputy Prime Minister what *(a)* meetings and *(b)* correspondence his Department has had since 10 June with the Electoral Commission concerning the regional assembly referendums; and if he will place copies of such correspondence in the Library. [182347]

Mr. Raynsford: As part of a regular series of meetings, officials from the Office of the Deputy Prime Minister met with officials from the Department of Constitutional Affairs and the Electoral Commission on 28 June to discuss the regional assembly referendums.

Since 10 June, officials from the Office of the Deputy Prime Minister and those at the Electoral Commission have continued to exchange e-mails on technical issues related to the referendums orders, notably about counting officers' fees and charges, due to changes in the number of assistance and delivery points.

There was also a meeting and some correspondence between an official from the Office of the Deputy Prime Minister and the Chief Executive of the Electoral Commission on when the referendums orders should be laid and consequently the timing of the referendums. The Office of the Deputy Prime Minister side of that correspondence has been placed in the Library of the House.

In addition, I wrote to Sam Younger on 15 June, and an official from the Office of the Deputy Prime Minister wrote to the Chief Executive of the Electoral Commission on 6 July, with regard to the text of the ballot paper and the explanatory material for the local government options in the forthcoming referendums. Again, the Office of the Deputy Prime Minister's side of that correspondence has been placed in the Library of the House.

Solar Panels

Mr. Anthony D. Wright: To ask the Deputy Prime Minister what plans he has to reduce the UK's carbon emissions through the introduction of a requirement in building regulations to fit solar panels to all new developments. [185439]

Phil Hope: The Building Regulations set functional requirements rather than specifying particular ways of showing compliance. This enables builders to develop their own ways of complying with the requirements, using conventional or new technologies as appropriate. The Office of the Deputy Prime Minister is reviewing the energy efficiency provisions in line with the commitments made in the Energy White Paper and the prospective higher standards that we aim to bring into effect in 2005 will make systems like solar panels more attractive. The Office of the Deputy Prime Minister shall be announcing consultations on the proposed amendments on 21 July.

Special Advisers

Mr. Evans: To ask the Deputy Prime Minister how many of the reductions in the numbers of civil servants in his Department announced in the spending review will be of special advisers. [185479]

Phil Hope: I refer the hon. Member to the answer given by my right hon. Friend the Member for Brent South (Mr. Boateng) today at column 190W.

Supporting People

Mr. Hancock: To ask the Deputy Prime Minister how much funding has been made available in each of the last three years under the Supporting People programme to *(a)* Portsmouth City Council, *(b)* Southampton City Council and *(c)* Hampshire County Council; and what the projected funding is for each of the next three years. [184309]

Phil Hope: The Supporting People programme went live in April 2003. Prior to this date the Government contributed towards the administration costs of Administering Authorities in establishing the programme. For 2003–04 and 2004–05 Supporting People grants have been given for both administration and programme costs. Budgets for 2005–06 to 2007–08 have not yet been finalised. The Office of the Deputy Prime Minister plans to announce individual allocations to Administering Authorities for 2005–06 to 2007–08 in the autumn.

£

Grants	Portsmouth city council	Southampton city council	Hampshire county council
2002-03			
Administration	202,412	195,805	619,499
Programme	—	—	—
2003-04			
Administration	237,195	274,415	815,418
Programme	9,744,076	11,521,802	33,634,572
2004-05			
Allocated administration	225,105	253,267	888,620
Programme	9,570,871	11,436,573	33,506,365

Mr. Hancock: To ask the Deputy Prime Minister what research he has *(a)* commissioned and *(b)* evaluated on the impact of the Supporting People programme in (i) Portsmouth and (ii) the rest of Hampshire; and if he will make a statement. [184310]

Keith Hill: The Office of the Deputy Prime Minister has not commissioned any research to evaluate the impact of Supporting People in Portsmouth and Hampshire.

Surplus Land

Mr. Edward Davey: To ask the Deputy Prime Minister (1) what plans *(a)* he and *(b)* English Partnerships have to (i) publish, (ii) make available for public inspection, (iii) place in the Library and (iv) place on line with full public access English Partnership's register of surplus public sector land; [183838]

(2) if he will list the *(a)* location and *(b)* size in hectares of each site in the register of surplus public sector land; and what the total (i) size in hectares of all such sites and (ii) number of sites is in each Government office region. [183839]

Keith Hill: The Register of Surplus Public Sector Land has been set up to enable Government Departments and their sponsored bodies to share information about the availability of land before it is released on the open market for disposal. The Register is part of new arrangements introduced to make better use of, and to deal with the disposal of, public sector land. This followed a review by the Office of the Deputy Prime Minister and HM Treasury. The Register is operated by English Partnerships.

The Register provides a mechanism for Government Bodies to ensure that public assets surplus to their individual needs can be put to effective use within the public sector and to identify suitable sites to meet their own operational requirements. It is helping to deliver the policies set out in the Governments Plan for Sustainable Communities (February 2003).

There are no plans for the Office of the Deputy Prime Minister or English Partnerships to publish or make publicly available information about individual sites on the Register. In many cases the information provided for the Register is confidential for commercial reasons. It is for the owners of individual sites to determine if information is made publicly available.

CBRN Training

Patrick Mercer: To ask the Deputy Prime Minister what training has been given to emergency services personnel in respect of coping with a potential chemical biological radiological nuclear incident. [184605]

Mr. Raynsford: Primary responsibility for mass decontamination in the event of a CBRN incident has been given to the fire and rescue service, through the New Dimension programme of the Office of the Deputy Prime Minister. The Government have provided a range of equipment to the fire and rescue service to improve its ability to cope with such an event, and are fully funding training to use this equipment.

Every firefighter has received basic CBRN training, which is now being followed by continuance training. Training has been provided by the Fire Service College and is complemented by a range of interactive training CDs and hard copy materials. Firefighters have also joined with the other emergency services in a range of local, regional and national exercises, such as that at Bank Underground station in September 2003, and the National Exhibition Centre, Birmingham in July 2004. Responsibility for training the other emergency services lies with their sponsoring departments.

Your Say Event (Sunderland)

Mr. Jenkin: To ask the Deputy Prime Minister what the total cost of the Your Say event held in Sunderland on 30 June was; how many invitees attended; how many members of the public attended; and what the cost per member of the public was. [185484]

Mr. Raynsford: The total cost of the Your Say event held in Sunderland on the 30 June was £4,400.

45 members of the public attended, including 29 invitees.

The cost per member of the public, including invitees, was £98.

Mr. Hammond: To ask the Deputy Prime Minister what the total cost to public funds was, including publicity, of the regional hearing held at the Crowtree Leisure Centre in Sunderland on 30 June. [184178]

Mr. Raynsford: The total cost to public funds was £4,400.

HOME DEPARTMENT

Antisocial Behaviour Orders

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many alcohol-related antisocial behaviour incidents there have been since 1997. [182295]

Ms Blears: Statistics on alcohol related antisocial behaviour are not collected. However the table shows British Crime Survey statistics (in percentages) from 1996–2003 taken from people who believe their assailants were under the influence of alcohol when they were assaulted.

All violence (percentage)

	Under influence of drink		
	Yes	*No*	*Don't know*
1996	40	53	6
1998	42	48	10
2000	40	50	9
2001–02	47	44	9
2002–03	44	45	11

Mr. Flook: To ask the Secretary of State for the Home Department how many *(a)* acceptable behaviour contracts and *(b)* antisocial behaviour orders have been issued in the Avon and Somerset police force area, broken down by basic command unit. [184650]

Ms Blears: Data on the number of acceptable behaviour contracts agreed are not collected centrally.

The available information is given in the table, up to 31 March 2004 (latest available), on the number of antisocial behaviour orders (ASBOs) issued, as notified to the Home Office, within the Avon and Somerset police force area, by local authority area. The data collected are not identifiable by basic command unit area but by the local authority area within which the prohibitions apply.

Alan Simpson: To ask the Secretary of State for the Home Department how many anti-social behaviour orders (ASBOs) have been issued in Nottingham in the last year; and if he will list the 10 cities that have issued the most ASBOs during this period. [182662]

Ms Blears: The available information is given in the table.

Number of ASBOs issued, as notified to the Home Office by all courts, where prohibitions apply to the Nottingham city council area and to the top 11 local authority areas within England and Wales, from 1 April 2003 to 31 March 2004

Local authority area	*Number issued*
Nottingham city council	16
Manchester city council	108
Leeds city council	99
Salford metropolitan borough council	34
Oldham metropolitan borough council	37
Liverpool city council	34
Birmingham city council	34
London borough of Camden	31
Bolton metropolitan borough council	30
Trafford metropolitan borough council	18
Burnley borough council	18
Brighton and Hove council	18

Bichard Inquiry Report

Ms Shipley: To ask the Secretary of State for the Home Department what the timescale is for the implementation of each of the Bichard Report recommendations, with particular reference to *(a)* departments retaining records of cases not referred to the police, *(b)* all posts in schools being subject to the enhanced disclosure requirement, *(c)* head teachers and school governors receiving training to ensure that interviews reflect the importance of safeguarding children, *(d)* interview panels to appoint staff working in schools requiring at least one trained member and *(e)* the introduction of a national IT intelligence system. [180583]

Mr. Blunkett: We are developing urgently a programme for implementing the recommendations in the Bichard Report. The Home Office is co-ordinating this programme, but it will involve all the Government Departments responsible for implementation agreeing a timetable and key milestones for the work. We are committed to achieving substantial progress across the range of recommendations by the time Sir Michael Bichard reconvenes his Inquiry in six months.

The current criteria of eligibility for Enhanced Disclosures have been under review. Proposals for revised criteria have been the subject of consultation and the results are being analysed. The recommendation that all posts working with children and vulnerable adults, including posts in schools, should be eligible for Enhanced Disclosures is being taken forward in the context of this review. Our aim is that new criteria should be in place by the end of the year.

Work to develop a national IT system for police intelligence is being undertaken as a key priority. It may well be two years before such a system is fully up and running. However, the work we have done with the police service to develop a strategic approach to the delivery of national IT infrastructure is already producing great progress. The Police Local Exchange (PLX) system, which indicates where forces hold intelligence on specific individuals, will be introduced as an interim solution by spring 2005. Taking into account projects such as the £500 million Airwave communication system, the new national DMA database and the investment we have put into the Criminal Records Bureau over the past three years, we have invested more than ever before. This commitment is further reinforced by the £600 million that we allocated from 2002 to the whole criminal justice IT system to improve links between the courts, policing and social services.

The other specific recommendations referred to are the responsibility of my right hon. Friend the Secretary of State for Education and Skills. Officials in his Department are already in discussion with the National College for School Leadership about ways in which appropriate training might be developed for head teachers and governors to enable them to reflect the importance of safeguarding children when interviewing for staff appointments. It will be necessary to consider the practical issues associated with delivering additional training to many of the approximately 22,100 head teachers and a proportion of the estimated 350,000 school governors before making a commitment to a timescale for this to happen.

As regards handling information about cases involving known or suspected offences against children, the Department for Education and Skills will be writing to local authorities very shortly to reaffirm the existing guidance in "Working Together to Safeguard Children" and will set out how the relevant recommendations will be taken forward in the longer term.

Community Safety (Islington)

Mr. Chris Smith: To ask the Secretary of State for the Home Department what funding he has made available

in each year since 1997 for anti-crime and community safety initiatives in the London borough of Islington; and what funding is projected for future years. [184721]

Ms Blears: The Home Office has to date provided a total of £2,948,779 to the London borough of Islington for anti-crime and community safety initiatives. Funding commenced in 2000–01. In addition, a total of £732,872 has been provided to Islington police under the Basic Command Unit (BCU) Fund in 2003–04 and 2004–05. The table shows the annual breakdown for each funding stream, giving a total figure of £3,681,651. Fufure crime reduction funding for individual authorities will be announced in due course.

Anti-crime/community safety funding in London borough of Islington from 1997

£

Financial year	*2000–01*	*2001–02*	*2002–03*	*2003–04*	*2004–05*	*Total*
Crime Reduction Programme (CRP)	222,227	371,809	125,500	—	—	719,536
Partnership Development Fund (PDF)	59,570	50,000	50,000	—	—	159,570
Communities Against Drugs (CAD)	—	262,200	594,218	—	—	856,418
Safer Communities Initiative (SCI)	—	—	137,255	—	—	137,255
Small Retailers in Deprived Areas (SRDA)	—	26,419	66,236	66,236	—	158,891
Building Safer Communities Fund	—	—	—	412,195	422,500	834,695

Vehicle Crime	—	—	—	15,000	—	15,000
Total	281,797	710,428	973,209	902,281	813,936	3,681,651

Community Sentences

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what assessment has been made of the general population's attitude towards *(a)* prisons and *(b)* alternatives to prison as a means of punishment and rehabilitation. [182283]

Paul Goggins: The most recent assessment was made as part of the Review of the Sentencing Framework for England and Wales "Making Punishments Work", released in July 2001. This assessment is based on a review of the literature on attitudes to sentencing as well as a survey of public attitudes (conducted in October 2000). Full details can be found in Appendix 5 to the report.

Further information on public attitudes is also available in Home Office Research Study 245 (Improving public attitudes to the Criminal Justice System: The impact of information, Chapman et al, 2002). This includes details from a nationally representative sample on knowledge and attitudes to crime and sentencing.

In addition, information will be available in future as a result the Crime and Justice Survey. Results from this are currently being analysed and will provide information on offending, and people's attitudes towards the Criminal Justice System and sentences.

Corporate Manslaughter Bill

Annabelle Ewing: To ask the Secretary of State for the Home Department whether the forthcoming draft Bill on Corporate Manslaughter is to extend to Scotland. [185162]

Paul Goggins *[holding answer 19 July 2004]:* The Government are currently developing their proposals for reforming the law on corporate manslaughter.

We plan to issue a draft Bill before the end of the current session.

Correspondence

Sir Gerald Kaufman: To ask the Secretary of State for the Home Department (1) when he will reply to the letter to him dated 24 May 2004 from the right hon. Member for Manchester, Gorton with regard to Manchester council for Community Relations; [182490]

(2) when he intends to reply to the letter to him dated 24 May 2004 from the right hon. Member for Manchester, Gorton with regard to Mr. N Khan Moghal. [183686]

Fiona Mactaggart: I replied to my right hon. Friend's letter on 9 July 2004 on behalf of my right hon. Friend the Secretary of State for the Home Department.

Diversity and Equality (Prison Service)

Mr. Goodman: To ask the Secretary of State for the Home Department what changes there have been to the name of the Prison Service's Diversity and Equality Group within the last two months; and if he will make a statement. [184608]

Paul Goggins *[holding answer 16 July 2004]:* The Prison Service has reviewed the role of the Diversity and Equality Group, which has led to the formation of a new Race and Equalities Action Group. The new group will have three key teams:

Delivery Team;

Community Links Team; and

Policy and Programme Team.

The change reflects the Prison Service's commitment to ensuring that significant improvements continue to be made to race and diversity issues, and that responsibilities and obligations under the Race Relations (Amendment) Act 2000, are implemented fully in every prison. The new group will take effect from 19 July 2004.

Drug Treatment

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how many people have received

drug treatment in prison in each year since 1997 as a percentage of *(a)* the prison population and *(b)* the total demand. [182303]

Paul Goggins: The information requested is as follows:

(a) People in prison receiving drug treatment as a percentage of those received into prison annually since 2001 (the first year in which drug treatment figures were collected) is given in the following table.

Percentage of the prison population that have received drug treatment since 2001 based on estimated annual receptions into custody

	2001[1]	*2002*	*2003*
Clinical Services (Detoxification)	21	36	42
CARATs	21	35	40
Treatment programmes	2	3	3

[1] Excluding January—March 2001 from which data is not collated.

Note:
Population figures for 2003 are provisional

(b) The Prison Service does not collate figures centrally on the demand for drug treatment.

Drug Treatment and Testing Orders

Mr. Clifton-Brown: To ask the Secretary of State for the Home Department how many drug treatment and testing orders were made in Gloucestershire in the last year for which figures are available; and what the re-offending rate was for those subject to such orders *(a)* in Gloucestershire and *(b)* in England and Wales in that year. [182953]

Paul Goggins: 58 drug treatment and testing orders (DTTOs) were made in Gloucestershire in 2003–04.

No offenders subject to DTTOs in Gloucestershire in 2003–04 had their orders revoked because of a conviction for another offence.

Validated information about re-offending for those subject to DTTOs in England and Wales in 2003–04 is not centrally available.

Drunkenness (Prosecutions)

Mr. Alan Duncan: To ask the Secretary of State for the Home Department (1) how many people were prosecuted for buying drink for people who were incapable as a result of alcohol in 2003; [185077]

(2) how many people were prosecuted for allowing drunken or riotous conduct on their premises in 2003. [185078]

Ms Blears: Statistics on court proceedings for 2003 will be published in the autumn.

Environmental Sustainability

Mr. Oaten: To ask the Secretary of State for the Home Department what have been identified as the most significant sustainable development impacts in relation to the operation of his Department's estate. [182221]

Fiona Mactaggart: The sustainable development impacts of the Department's estate varies according to the nature of the business carried out by its constituent parts. For the purposes of the Framework for Sustainable Development on the Government Estate, we have divided the Home Office estate into seven areas. These are listed as follows with the key sustainable development impacts for each area

(i) Non Agency Home Office—Office Estate

Key impacts: Energy consumption, waste generation, procurement of goods and services, water consumption and vehicle emissions as a result of commuting (sites outside London only).

(ii) Immigration Removals Estate

Key impacts: Energy consumption, waste generation, procurement of goods and services, water consumption, vehicle emissions as a result of business travel and potential to affect biodiversity.

(iii) National Probation Service

Key impacts: Energy consumption, waste generation, water consumption and procurement of goods and services.

(iv) Her Majesty's Prison Service

Key impacts: Energy consumption, waste generation (including hazardous waste), procurement of goods and services, water consumption, vehicle emissions as a result of commuting and business travel and conservation of biodiversity.

(v) UK Passport Agency

Key impacts: Energy consumption, waste generation, water consumption and procurement of good and services.

(vi) Forensic Science Service

Key impacts: Energy consumption, waste generation (including hazardous waste), procurement of goods and services, water consumption, vehicle emissions as a result of commuting.

(vii) Contracted Out Prisons

Key impacts: Energy consumption, waste generation, procurement of goods and services, water consumption, vehicle emissions as a result of business travel and potential to affect biodiversity.

Facilitation Charge

David Davis: To ask the Secretary of State for the Home Department how many times the charge of facilitation has been used since 1997, broken down by *(a)* police force and *(b)* year. [183817]

Ms Blears *[holding answer 14 July 2004]:* The term 'facilitation' is not one that is used in connection with recorded crime.

Fraud Crimes

Mr. Wiggin: To ask the Secretary of State for the Home Department what estimate he has made of the percentage of fraud crimes perpetrated against elderly people in England and Wales in each of the last five years. [185215]

Ms Blears: No estimates have been made of fraud crime against the elderly. Statistics on fraud and forgery offences recorded by the police in England and Wales are published annually in "Crime in England and Wales". The latest volume covering 2003–04 is due to be published on 22 July.

National Offender Management Service

Julie Morgan: To ask the Secretary of State for the Home Department what the estimated cost is of future market test under the National Offender Management Service. [179473]

Paul Goggins: It has not yet been decided how many or which prisons will be market tested in the first year. Work is under way to decide how the competition will be structured and what criteria will be used to select prisons to be market tested.

Offender Behaviour Programmes

John McDonnell: To ask the Secretary of State for the Home Department what the estimated developmental cost has been of each accredited offender behaviour programme. [183998]

Paul Goggins: It is not possible to provide the information in the form requested. Accredited offender behaviour programmes have a number of sources. Some are adaptations of programmes developed overseas, some have been developed by the independent and voluntary sectors, some began as local initiatives and others have been developed centrally by the Prison and Probation Services.

The costs are, therefore, varied. We estimate, for example, that the cost of adapting and piloting the existing Think First programme was £50,000, while developing the Women's Acquisitive Crime Programme from scratch, including the costs of piloting and accreditation, was in the region of £115,000.

Police (Jury Service)

Bob Russell: To ask the Secretary of State for the Home Department what representations he received prior to the inclusion in the Criminal Justice Act 2003 of the provision that police officers would no longer be exempt from jury service. [181751]

Ms Blears: The Government consulted on the new jury service provisions contained in the Criminal Justice Act 2003 as part of the wider consultation on Lord Justice Auld's Review on the Criminal Courts of England and Wales.

The Department for Constitutional Affairs also consulted on the guidance that was issued to the Jury Central Summoning Bureau prior to the commencement of these provisions.

Deepcut Investigation

Mr. McNamara: To ask the Secretary of State for the Home Department what assessment has been made by the Devon and Cornwall police of the number of potential witnesses *(a)* contacted and *(b)* interviewed by the Ministry of Defence's police detective constables in the course of their involvement in the Deepcut investigation. [183380]

Ms Blears: I am not currently able to provide the information requested. Surrey police have advised that they commissioned Devon and Cornwall police to undertake a review into the Surrey police investigation into the deaths of four young soldiers at Deepcut barracks but this has not yet been completed. It is understood that the review will consider the use made by Surrey police of Ministry of Defence police detective constables during the course of the investigation. It will be for Devon and Cornwall police to consider whether an assessment of the numbers of potential witnesses contacted or interviewed by the Ministry of Defence police detective constables is needed as part of the review.

Police Pensions

Adam Price: To ask the Secretary of State for the Home Department what proportion of each police authority budget in England and Wales was spent on pensions in *(a)* 1997–98 and *(b)* the latest year for which figures are available. [184752]

Ms Blears *[holding answer 16 July 2004]:* The information is set out in the table.

Proportion of net expenditure spent on pensions

Percentage

	1997–98	*2003–04*
Avon and Somerset	15.6	16.7
Bedfordshire	11.5	11.8
Cambridgeshire	11.9	12.9
Cheshire	11.1	12.6
City of London	12.7	16.0
Cleveland	10.9	15.8
Cumbria	12.8	15.8
Derbyshire	12.8	13.0
Devon and Cornwall	13.5	14.0
Dorset	13.0	13.2
Durham	16.5	13.6
Dyfed-Powys	12.0	13.5
Essex	10.6	14.0
Gloucestershire	13.2	14.6
Greater Manchester	16.5	14.1
Gwent	11.6	14.4
Hampshire	9.6	12.4
Hertfordshire	9.5	10.8
Humberside	13.2	13.7
Kent	11.3	13.2
Lancashire	14.2	14.9
Leicestershire	11.9	12.1
Lincolnshire	13.8	15.7
Merseyside	14.9	17.8
Metropolitan	11.4	12.2
Norfolk	13.2	12.8
Northamptonshire	12.4	9.0
Northumbria	15.4	15.5
North Wales	13.6	14.7
North Yorkshire	14.5	13.9
Nottinghamshire	13.7	16.7
South Wales	17.6	16.1
South Yorkshire	12.1	13.1
Staffordshire	17.3	14.4
Suffolk	13.3	14.5
Surrey	13.7	10.3
Sussex	13.3	14.6
Thames Valley	9.8	9.8
Warwickshire	13.9	16.4
West Mercia	11.0	13.4
West Midlands	12.2	12.5
West Yorkshire	13.0	15.6
Wiltshire	10.4	12.5

Note:
Leicestershire's 1997–98 figures were not available in the CIPFA Actuals 1997–98. The force estimates have therefore been used.
Source:
Chartered Institute of Public Finance and Accountancy Police Statistics—Actuals 1997–98 and Estimates 2003–04.

Police Sickness

Mr. Wood: To ask the Secretary of State for the Home Department which police forces in England operate sickness reduction schemes; and what change has been recorded in sickness levels since their introduction. [167051]

Ms Blears: All police forces have been set the objective of reducing sickness absence levels.

The Strategy for a Healthy Police, which was launched in October 2002 supports this objective through funding, guidance and best practice in managing sickness absence and attendance.

All forces in England and Wales were allocated a share of £4 million in 2002–03, and then £5 million in 2003–04 and the current financial year. They have been able to focus this extra resource on projects aimed at reducing sickness absence.

Sickness absence figures have improved since the launch of the Strategy, with overall sickness absence now at a national average of 10.4 days per officer per year, and 11.7 per support staff member. This has decreased from 12.2 days per officer and 12.6 days per support staff member when the Strategy was launched. The best performing forces have continued to make improvements, but the gap between best and worst performers has also significantly narrowed.

The Her Majesty's Inspectorate of Constabulary annual report for 2003/2004 sets out the national and force rates for sickness absence per force.

Prison Service

Mrs. Helen Clark: To ask the Secretary of State for the Home Department how many qualified craftsmen were employed by the Prison Service in each prison in each of the last five years; and how many of these were in the prison officer grades. [184289]

Paul Goggins: The Prison Service does not currently collect data on the qualifications held by its employees. Craftsmen are a sub-grade of industrial staff. While data are available on overall staffing levels within the industrial grades, specific data on the number of craftsmen employed are not collected centrally and could be obtained only at disproportionate cost.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how the levels of prison front-line staff have changed since 1997. [182305]

Paul Goggins: Since 1997 the number of staff in front line and delivery support functions has increased by 6164 (19 per cent.).

During this period, the Prison Service has introduced a number of measures to improve overall efficiency, including identifying a number of tasks within establishments previously undertaken by Prison Officers that can more efficiently be undertaken by Operational Support Grade staff. A programme has also been implemented to use industrial grade staff to undertake activities within works departments, which had previously been undertaken by specialist officers. As a result, Prison Officer numbers have not increased as much as overall staffing increases.

Staffing levels in the healthcare and psychology functional areas have increased at a higher rate than the growth in the prisoner population.

Mrs. Gillan: To ask the Secretary of State for the Home Department (1) pursuant to the answer of 8 June 2004, *Official Report*, column 330W, on offender management, when decisions will be made as to how many prisons will be market-tested in the first year; and how the competitions will be structured; [184691]

(2) what criteria will be used for selecting which establishments to market test. [184692]

Paul Goggins: It has not yet been decided how many or which prisons will be market tested in the first year. Work is under way to decide how the competition will be structured and what criteria will be used to select prisons to be market tested.

Probationary Police Constables

Dr. Cable: To ask the Secretary of State for the Home Department what estimate he has made of the average annual cost of employing, training and developing a probationary police constable in the last year for which figures are available. [183993]

Ms Blears: Her Majesty's Inspectorate of Constabulary have estimated that the average salary, training and development costs of a probationary police constable up to independent patrol (which is normally 31 weeks after joining a force) in 2003–04 were £27,048. This figure includes salary costs of £13,993 per probationary police constable for that period and training and development costs of £13,055.

There are of course, associated employment costs for recruitment, supervision, accommodation, information technology and so on. However, these are not collated centrally and could be obtained only at disproportionate cost.

Racial Equality

Mr. Prisk: To ask the Secretary of State for the Home Department what the total cost was of *(a)* publishing, *(b)* producing and *(c)* distributing the Racial Equality and the Smaller Business guide produced by the Commission for Racial Equality. [180500]

Fiona Mactaggart: HSBC sponsored the production of the guide and paid for the production of 100,000 CDs. The Post Office distributed it free of charge to small businesses. In addition, 44,417 PDF versions of the guide have been downloaded from the Commission for Racial Equality's website and 2,792 copies have been ordered from the stationary office. The Commission for Racial Equality paid for the Welsh version (£4,506). The only other cost to them was staff time.

Mr. Prisk: To ask the Secretary of State for the Home Department which other Government Departments were involved in producing the Racial Equality and the Smaller Business guide produced by the Commission for Racial Equality. [180501]

Fiona Mactaggart: The Department of Trade and Industry was the only other Government Department represented on the Commission for Racial Equality's advisory group.

Street Crime (London)

Mr. Rosindell: To ask the Secretary of State for the Home Department how many police officers in the London area work specifically in tackling street crime. [184283]

Ms Blears: Information on the number of police officers specifically tackling street crime is not collected centrally.

Statistics on police strength are published every six months. Data for 30 September 2003 appeared in on-line report number 13/04. The latest available figures for 31 December 2003 were issued in Home Office Press Release 095/2004 on 2 March 2004.

Victims' Code of Practice

Peter Bottomley: To ask the Secretary of State for the Home Department what consideration is being given to the inclusion of road crash and road crime victims in the Victims' Code of Practice. [183548]

Paul Goggins: The Victims' Code of Practice, provided for in the Domestic Violence Crime and Victims Bill currently before Parliament, will place national obligations on criminal justice agencies to deliver specific services to victims of crime. Those bereaved as a result of death on the road will be entitled to the relevant police obligations and, where a charge is considered or brought, the relevant Crown Prosecution Service and courts' obligations. They will not, at present, be entitled routinely to the Code's personal support services, to be offered by Victim Support, as practice in this area is still being determined.

Last year, at a cost of some £500,000, we established three pilot sites to test different ways of organising and delivering services to road traffic victims. These pilots are subject to independent evaluation with a full report on their effectiveness envisaged for Summer 2005. Following this, we will need to consider, with voluntary sector partners and others, the key outcomes from the evaluation programme and how we can best implement a support service to address the needs of all those victimised by incidents on the road.

The victims' legislation clearly sets out the procedures for making revisions to the Code of Practice and it is likely that, because it is statutory, there will be regular updates to reflect front line developments. So if, as seems likely, it is not possible to include obligations to provide personal support services for road traffic victims in the initial version of the Code, which is likely to become fully operational during 2005, then we should be in a position to do so when it is revised for the first time.

Witness Protection

David Davis: To ask the Secretary of State for the Home Department what assessment his Department has made of the amount of police time allocated to supervising witness protection schemes. [184958]

Ms Blears: This information is not currently available. The Home Office, in conjunction with the Scottish Executive, the Northern Ireland Office and the Association of Chief Police Officers, has appointed an independent consultant to carry out an assessment of witness protection arrangements nationally. The assessment is covering all cases where witness protection is afforded by UK law enforcement agencies including the police. It will provide us with valuable information about the numbers and circumstances in which witness protection is provided and the amount of police time allocated to it.

The assessment commenced on 2 January; it was announced in the White Paper 'One Step Ahead—a 21st century strategy to defeat organised crime' which I published on 29 March. The assessment is due to be completed over the summer, and a final report will be available in the autumn..

DEFENCE

Aircraft Carriers

Dr. Julian Lewis: To ask the Secretary of State for Defence (1) whether it remains his policy to acquire two British-built new aircraft carriers; and by what dates; [182002]

(2) what assessment his Department has made of the suitability of United States carriers to carry out each of the projected CVF tasks if purchased by the Royal Navy; [182004]

(3) what discussions his Department has held with United States counterparts concerning the possible purchase of US carriers for the Royal Navy. [182005]

Mr. Ingram *[holding answer 5 July 2004]:* We remain fully committed to buying two new aircraft carriers for the Royal Navy. There has been no change to our policy that Royal Navy warship hulls will be built in the United Kingdom. Given this position, we have not considered the possible purchase of United States carriers, nor have we therefore assessed the suitability of United States carriers to undertake projected CVF tasks. However, the Department regularly exchanges information with the US on our respective programmes, for example in areas such as the integration of the Joint Combat Aircraft. Our target in-service dates for the two carriers remain 2012 and 2015.

Dr. Julian Lewis: To ask the Secretary of State for Defence what his estimate is of the minimum *(a)* tonnage and *(b)* aircraft numbers to be operated from each future carrier to enable it to fulfil its strategic expeditionary role. [182003]

Mr. Ingram *[holding answer 5 July 2004]:* The Ministry of Defence has not sought to fix the dimensions of the aircraft carriers during the assessment phase. The design of the ships will continue to evolve as we seek to balance the overall performance, time and cost parameters of this complex project as part of normal assessment phase activity. Decisions on the capability to be provided by CVF, including the number of aircraft capable of being deployed, and hence on the design and dimensions for the ships, will be taken at the Main Gate investment point.

Iraq Medal

Mr. Luff: To ask the Secretary of State for Defence how many soldiers *(a)* are eligible for and *(b)* have received the Iraq Campaign Medal. [179022]

Mr. Caplin: It is estimated that 70,000 Service and civilian personnel are eligible for the Iraq Medal. As at 9 July, the Army Medal Office had received 18,728 applications for the Iraq Medal from Army personnel. Of these, some 1,600 applications have been approved and the majority of those medals have been issued.

Combat/Operational Clothing

Mr. Hoyle: To ask the Secretary of State for Defence whether appeal procedures apply to the contract for combat and operational clothing supplies DC4BESL/1002 Cut and Sew. [184360]

Mr. Ingram *[holding answer 15 July 2004]*: There is no formal appeals procedure applicable to this contract.

Mr. Hoyle: To ask the Secretary of State for Defence where the bleaching, dyeing and printing of the fabric for the contract DC4BESL/1002 Cut and Sew will be carried out. [184347]

Mr. Ingram: Due to the variety of products being supplied under this contract there are a number of locations chosen by the Prime Contractor for the bleaching, dyeing and printing of fabric, including China, the United Kingdom and mainland Europe.

Commercial Exportation Levy

Mr. Hancock: To ask the Secretary of State for Defence pursuant to his answer of 10 June 2004, *Official Report*, column 589W, on the Commercial Exportation Levy, what assessment he has made of the reasons for the change in the value of receipts collected; and if he will make a statement. [182548]

Mr. Ingram: Commercial Exploitation Levy is a form of royalty for any commercial sales of a design, use of special tooling or the granting of licences where the MOD has contributed wholly, or in part, to research and development costs. The level of receipts will consequently vary according to the levy arrangements agreed, the type of equipment involved (including software), the volume of sales and the extent to which its development was funded by the Ministry of Defence. From year to year the receipts generated for the MOD also depend upon the level of commercial sales achieved.

Defence Conferences

Mr. Gerald Howarth: To ask the Secretary of State for Defence (1) if he will place in the Library a copy of the presentations made to the IQPC Conference Future Artillery in May 2003 on *(a)* Developing the UK's Firepower Capability by Colonel Peter H.Tomlinson, Deputy Director Equipment Capability (Indirect Battlefield Engagement) and *(b)* Future Artillery Weapons Systems—An Acquisition Angle by Alan Nicholl, Integrated Project Team Leader, Future Artillery Weapons Systems, Defence Procurement Agency; [170381]

(2) if he will place in the Library a copy of the presentations made to the IQPC Conference Underwater Warfare and the Role of UUVS in January 2003 on Maritime Mine Countermeasures (MCM): A UK Perspective by Peter Evans, Technical Manager, Maritime Mine Warfare and Countermeasures, DSTL; [170382]

(3) if he will place in the Library a copy of the presentation made to the IQPC Conference Suppression of Enemy Air Defences in February 2003 on SEAD in Current and Future RAF Operations by Squadron Leader Brian James, Tactical Division Weapons, Air Warfare Centre, Royal Air Force Squadron Leader and Stuart F. Hulley, SO2 EW Tornado, Royal Air Force; [170383]

(4) if he will place in the Library a copy of the presentation made to the IQPC Conference Software Defined Radios in December 2003 on UK Digitisation: The Future Application of SDR by Colonel Phil Davies, Command Support Development Centre; [170384]

(5) if he will place in the Library a copy of the presentations made to the IQPC Conference Sensor-to-Shooter and Time Critical Targeting in February 2003 on *(a)* Sensor-To-Shooter: The Users Perspective by Squadron Leader Malcolm Rainier, SO2 Air Offensive 2 and *(b)* UK Sensor-To-Shooter Airborne Capabilities and Concepts by Squadron Leader Dheeraj Bhasin, TD-JAGUAR, Air Warfare Centre, RAF Waddington; [170385]

(6) if he will place in the Library a copy of the presentations made to the IQPC Conference Naval Air Warfare in December 2003 on *(a)* The Future of Maritime Strike in the Royal Navy by Captain David James, DACOS Strike, Commander-in-Chief Fleet Staff, Royal Navy, *(b)* UAVS in Future Maritime Operations by Lieutenant Trevor Steele, UAV TD, Maritime Warfare Centre, Royal Navy, *(c)* The 'Future Lynx': The UK's Surface Combatant Maritime Rotorcraft by Lieutenant Commander Neal Yates MBE; Requirements Manager-Surface Combatant Maritime Rotorcraft, DPA, *(d)* Royal Navy Commando Sea King by Lieutenant Commander Mark 'H' Hourigan, Commando Aviation TD, Maritime Warfare Centre, Royal Navy, *(e)* Royal Navy Merlin HM MK1 by Lieutenant Commander Gary Soar, Merlin TD, Maritime Warfare Centre, Royal Navy, *(f)* Integrating the JSF into the UK: The Future Joint Combat Aircraft by Wing Commander John Chapman, Requirements Manager, Joint Combat Aircraft IPT, DPA and *(g)* Maritime Patrol and the Future of Nimrod MRA4 Operations by Wing Commander Gordon Bruce, SO1 Maritime Capability Development, HQ3 Group, Royal Air Force; [170386]

(7) if he will place in the Library a copy of the presentation made to the IQPC Conference Military Flight Training Conference in February 2003 on *(a)* The Future UK Military Flight Training Programme by Air Commodore Peter Coker, MFTS IPT Leader, Defence Procurement Agency, *(b)* Nimrod-Multi-Crew Training in a Multirole Aircraft by Wing Commander Jerry Kessell, OC 42 (R) Squadron, RAF Kinloss, *(c)* C-130J Hercules Tactical Training by Group Captain Ray Lock,

Commanding Officer and Squadron Leader Mark Pearce, Flight Commander JTTF, RAF Lynham and *(d)* Future Helicopter Flying Training in the British Army by Lieutenant Colonel David Joyce, SO1 Training and Lieutenant Colonel Norman Ryan, SO1 Attack Helicopter Training, HQ Directorate of Army Aviation; [170387]

(8) if he will place in the Library a copy of the presentation made to the IQPC Conference Light Armoured Vehicles in February 2003 on *(a)* UK MoD Overview of Future Rapid Effects System (FRES) and key UK LAV programmes by Brigadier Ian Rodley, DEC (DBE), *(b)* Future Command and Liaison Vehicle (FCLV)-An Overview by Colonel Charles Hookey, Team Leader, Close Armour and Vehicle Mounted Weapons IPT, DPA, *(c)* The Bigger Picture—A UK military analysis of the future operating environment, emerging concepts and the shift of emphasis from platform performance to network effectiveness by Brigadier Geoff Sheldon, Director Land Digitisation, UK MoD (Army), *(d)* Future Force Structures—A UK MoD view by Lieutenant Colonel Crispian Beattie, SO1 Concepts, Director General Doctrine and Development and *(e)* Viking—An Overview by Major Jez Hermer, SO2 Viking, FLEET N7, HMS Excellent; [170388]

(9) if he will place in the Library a copy of the presentation made to the IQPC Conference Military Helicopter Conference in April 2003 on *(a)* New Developments in Air Manoeuvre Capability by Brigadier Nick Caplin, Deputy Commander and Chief of Staff, Joint Helicopter Command, *(b)* Future Modernisation of the UK Apache A.H.1 by Major Nigel Banks, Attack Helicopter Desk Officer, DEC Air and Littoral Manoeuvre, *(c)* Royal Navy Lynx HMA.8 and Future Development by Lieutenant Rob Taylor, Senior Observer, Lynx OEU, RNAS Yeovilton and *(d)* Merlin H.M. MK.1 by Lieutenant Commander Nick Dunn, Commanding Officer, 814 Squadron, RNAS Culdrose; [170389]

(10) if he will place in the Library a copy of the presentation made to the IQPC Conference Future Naval Plans and Requirements in May 2003 on *(a)* The Future of Maritime Strike in the Royal Navy by Commander David James, CD Strike, Maritime Warfare Centre, *(b)* The Royal Navy—Future Operational Concepts by Captain Simon Williams, Assistant Director of Strategy, *(c)* Maritime Combat Service Support To Forces Ashore by Brigadier Charlie Hobson, Director Equipment Capability (Deploy, Sustain and Recover) and The Future Surface Combatant and its Role as a Versatile Maritime Force by Commander Stuart Robinson, Project Leader, Future Surface Combatant and Chris Richards, Capability Definition and Programme Management (FSC), DEC (AWB); [170390]

(11) if he will place in the Library a copy of the presentation made to the IQPC Conference Fighter Conference in May 2003 on *(a)* Joint Force Harrier by Lieutenant Commander Nick Walker, Joint Force Harrier SO2 OPS FA2, HQ 3 Group, RAF Strike Command and *(b)* Typhoon Programme Update by Wing Commander Jonathan Hitchcock, Typhoon Requirements Manager (and Future Commander of the Typhoon OCU) Typhoon IPT; [170391]

(12) if he will place in the Library a copy of the presentation made to the IQPC Conference Defence Simulation and Training in October 2003 on *(a)* A UK Overview of Training Systems by Andy Fawkes, Deputy Director, Analysis, Experimentation and Simulation, and Head of Synthetic Environments Co-ordination Office, *(b)* Bringing Coherence To MoD Individual Training and Education by Commander Jim Hammersley, DGT and E, *(c)* The Long-Term Future of Individual Armoured Fighting Vehicle Training in the UK by Lieutenant Colonel K B L (Kestrel) Simson QRH Deputy Project Manager, Armoured Vehicle Training System Project, DPA, *(d)* Simulation Requirements Analysis by Lieutenant Commander Harry Hassall, Development Projects and Research Group, UK MoD, and *(e)* UK Battlegroup Command and Control Trainer (BC2T) by Paul Newman, Deputy Team Leader, Joint and Battlefield Trainers, Simulation and Synthetic Environments, Programme Manager for Joint and Constructive Simulation DPA; [170392]

(13) if he will place in the Library a copy of the presentation made to the IQPC Conference Air-Launched Weapons in September 2003 on *(a)* UK Air-Launched Weapons Capabilities and Concepts by Squadron Leader Dheeraj Bhasin, TD-JAGUAR, Air Warfare Centre, RAF Waddington, *(b)* Advanced Short-Range Air-To-Air Missile (ASRAAM) by Lieutenant Colonel Richard G Dixon, ASRAAM IPT Leader, Defence Procurement Agency, *(c)* Beyond Visual Range Air-To-Air Missile (BVRAAM)-METEOR by Mike Smith, BVRAAM IPT Leader, Defence Procurement Agency, and *(d)* Update On UK Precision-Guided Bomb by Wing Commander Peter Barker, Precision-Guided Bomb IPT Leader, Defence Procurement Agency; [170393]

(14) if he will place in the Library a copy of the presentation made to the IQPC Conference Air Surveillance and Reconnaissance in March 2003 on *(a)* Watchkeeper by Alan Baker, Tactical UAV IPT Leader, DPA, *(b)* Littoral ISTAR-UK Perspective by Squadron Leader Alan Skinner, HQ3 Group, RAF Strike Command and *(c)* Operational Tactical Reconnaissance by Squadron Leader Andrew White, OC Wing, Reconnaissance Intelligence Centre, RAF Marham; [170394]

(15) if he will place in the Library a copy of the presentation made to the IQPC Conference Air Defence Systems 2003 in May 2003 on *(a)* UK GBAD future requirements by Air Commodore Richard Moore, GBAD IPTL, DPA and *(b)* UK GBAD-Bridging capability and future requirements by Squadron Leader David Watkins, SO2 GBAD/OPS, RAF Strike Command and Squadron Leader John Derbyshire, XO RAF GBAD HQ; [170395]

(16) if he will place in the Library a copy of *(a)* Brigadier Andrew Stewart's presentation, Support to reflect the extended scope of operations and the more

strategically responsive, yet dominant force for the 21st Century, given at the SMI Conference Supporting Forward Deployment on 18 June 2003, *(b)* Colonel Nick Knudsen's presentation on Supporting Future Air Manoeuvre Forward Deployment given at the SMI Conference Supporting Forward Deployment on 18 June 2003, *(c)* Peter Jones's presentation, Processes to ensure effective medical support, given at the SMI Conference Supporting Forward Deployment on 18 June 2003, *(d)* Colonel Phil Naylor's presentation on Base Logistic Support to Deployed Operations, given at the SMI Conference Supporting Forward Deployment on 19th June 2003, *(e)* Wing Commander Simon Ruddock-West's presentation on Maritime Patrol Aircraft In Force Protection and his key note address given at the SMI Conference Naval Force Protection on 25 and 26 June 2003 respectively; [170396]

(17) if he will place in the Library a copy of *(a)* Commander Dickie Burston's presentation, Multi-National Submarine Rescue, given at the SMI Conference Underwater Systems on 2 April 2003, *(b)* Peter Evans's presentation Maritime Mine Countermeasures, given at the SMI Conference Underwater Systems on 3 April 2003, *(c)* Colonel David Hargreave's presentation, Paving The Way for Digitization: Allied Command Europe Rapid Reaction Corps, given at the SMI Conference Joint Battlespace Digitization on 19 May 2003, *(d)* Lieutenant Colonel Mark Faulkner's presentation on the UK Land Digitization Programme given at the SMI Conference Joint Battlespace Digitization on 19 May 2003 and *(e)* Major Jeremy Levine's presentation, The Challenges of Digitization in the Jungle, given at the SMI Conference Joint Battlespace Digitization on 19 May 2003; [170426]

(18) if he will place in the Library a copy of *(a)* Colonel Toby Mills's presentation, Transforming Engineering and Asset Management in the UK MoD: the DLO change programme given at the SMI Conference Defence Maintenance on 10 March 2003, *(b)* Wing Commander David Appleton's presentation, RCM: Intelligently deciding the user's maintenance requirements given at the SMI Conference Defence Maintenance on 10 March 2003, *(c)* Andy Worrall's presentation, Integrated Logistics Support: Reducing whole life cost of ownership given at the SMI Conference Defence Maintenance on 10 March 2003, *(d)* Group Captain Peter Gray's presentation, Implementing Joint Capabilities: Organising British Joint Rapid Reaction Forces, given at the SMI Conference Rapid Reaction Deployment on 12th March 2003 and *(e)* Colonel Neil Baverstock's presentation, A Joint Perspective, given at the SMI Conference Naval C4I on 24 March 2003; [170427]

(19) if he will place in the Library a copy of *(a)* Lieutenant Colonel Alistair Hamer-Philip's presentation, Low Level Ground Based Air Defence: a UK perspective, given at the SMI Conference Air Defence Systems on 16 January 2003; *(b)* Neil McCabe's presentation, The UK experience: Bringing mission rehearsal requirements and solutions together given at the SMI Conference Virtual Battlespace: Developments in Mission Rehearsal on 27 January 2003, *(c)* Neil McCabe's presentation on Training AFV (Armoured Fighting Vehicles) given at the SMI Conference Armour and Anti-Armour on 25 February 2003, *(d)* Lieutenant Colonel R. J. Laidler's presentation on the future of armour support given at the SMI Conference Armour and Anti-Armour on 25 February 2003 and *(e)* Squadron Leader Gary Morgan's presentation, Nimrod MRA4: Its role in littoral warfare and future capability given at the SMI Conference Intelligence Surveillance and Reconnaissance on 4th March 2003. [170428]

Mr. Ingram: Copies of presentations given to external conferences by Ministry of Defence employees or members of the Armed Forces are not held centrally. Where it is readily available within the Department, I am placing the information requested in the Library of the House. This covers the following presentations:

PQ	*Presentation*
170381	Developing the UK's Firepower Capability by Colonel Peter H. Tomlinson
170381	Future Artillery Weapons Systems—An Acquisition Angle by Alan Nicholl
170387	The Future UK Military Flight Training Programme by Air Commodore Peter Coker
170387	Nimrod-Multi-Crew Training in a Multirole Aircraft by Wing Commander Jerry Kessell
170387	C-130J Hercules Tactical Training by Group Captain Ray Lock
170387	Future Helicopter Flying Training in the British Army by Lieutenant Colonel David Joyce
170387	Future Helicopter Flying Training in the British Army by Lieutenant Colonel Norman Ryan
170389	Future Modernisation of the UK Apache A.H.1 by Major Nigel Banks
170389	New Developments in Air Manoeuvre Capability by Brigadier Nick Caplin
170390	Maritime Combat Service Support To Forces Ashore by Brigadier Charlie Hobson
170390	The Future Surface Combatant and its Role as a Versatile Maritime Force by Commander Stuart Robinson
170392	A UK Overview of Training Systems by Andy Fawkes
170392	Bringing Coherence To MoD Individual Training and Education by Commander Jim Hammersley
170392	Simulation Requirements Analysis by Lieutenant Commander Harry Hassall
170392	UK Battlegroup Command and Control Trainer (BC2T) by Paul Newman
170393	Advanced Short-Range Air-To-Air Missile (ASRAAM) by Lieutenant Colonel Richard G Dixon
170393	Beyond Visual Range Air-To-Air Missile (BVRAAM)-METEOR by Mike Smith
170426	Lieutenant Colonel Mark Faulkner's presentation on the UK Land Digitization Programme
170427	Andy Worrall's presentation, Integrated Logistics Support: Reducing whole life cost of ownership
170428	Lieutenant Colonel Alistair Hamer-Philip's presentation, Low Level Ground Based Air Defence: a UK perspective

The following presentations were either not in fact given at the conferences specified or have since been deleted by the presenters and are therefore now unobtainable.

PQ	Presentation
170386	Royal Navy Merlin HM MK1 by Lieutenant Commander Gary Soar
170388	UK MoD Overview of Future Rapid Effects System (FRES) and key UK LAV programmes by Brigadier Ian Rodley
170392	The Long-Term Future of Individual Armoured Fighting Vehicle Training in the UK by Lieutenant Colonel K B L (Kestrel) Simson
170393	Update On UK Precision-Guided Bomb by Wing Commander Peter Barker
170396	Wing Commander Simon Ruddock- West's presentation on Maritime Patrol Aircraft In Force Protection and his key note address given at the SMI Conference Naval Force Protection on 25 and 26 June 2003 respectively.
170426	Commander Dickie Burston's presentation, Multi-National Submarine Rescue
170426	Colonel David Hargreave's presentation, Paving The Way for Digitization: Allied Command Europe Rapid Reaction Corps

The Ministry of Defence is conducting a further trawl to locate the remaining presentations. These will be placed in the Library of the House subject to availability and resource constraints. Should it not be possible to provide all the information requested, copies of conference proceedings can usually be bought from the event organisers.

The content of these presentations will not have been specifically cleared with MOD Ministers and may therefore represent the views of the individual rather than that of the Department. It should also be noted that some of the content of these presentations is likely to have been overtaken by subsequent events.

Defence Projects (US Funding)

Mr. Godsiff: To ask the Secretary of State for Defence which defence-related projects in the UK are supported by *(a)* the US Defense Advanced Projects Agency and *(b)* the US Office for Naval Research; what funding is being made available in each case; and what the actual or intended benefit to the UK is in each case. [182013]

Mr. Ingram: In keeping with our strong defence relationship with the United States of America, the United Kingdom works closely with the US Government on a range of defence projects and has dealings with both the Defense Advanced Research Projects Agency and the Office of Naval Research.

Currently the Office of Naval Research is involved in collaborative programmes with the UK on anti-submarine warfare and unmanned underwater vehicle technologies. The Defense Advanced Research Projects Agency does not currently lead any of the collaborative programmes with the UK but may contribute indirectly through projects led by one of the US Armed Services.

These collaborative links are to our mutual benefit, enhancing the military capabilities of both our nations and improving our ability to operate alongside one another. Typically, such collaborative activities involve both parties pooling the outputs of respective national defence research activities, on an equitable basis.

It is unusual for the US Government to directly support or fund UK defence projects. The US does contract directly with UK companies and academia in support of their own defence programmes, but details of these contracts are a matter for the US Government.

End-to-end Review

Mr. Wiggin: To ask the Secretary of State for Defence if he will make a statement on the outcome of the end to end review. [183973]

Mr. Ingram: The original End to End Study reported its findings on 1 July 2003, leading to a six-month Demonstration Phase which has been a notable success. Many of the principles and recommendations put forward by the End to End Final Report have been proven through the pilot activities conducted thus far. It is the intention; therefore, to focus future activity on implementation and the early realisation of benefit.

As an example, the cost of delivering the first wave of End to End was far outweighed by the year-on-year savings. The MOD has invested £18 million in this programme over the last 15 months. End to End Demonstration has identified efficiency benefit of between £16 million to £19 million per annum and identification of realisable benefit of around £330 million. Potential exists for additional benefit, whilst at the same time preserving and in many cases improving, operational effectiveness.

The quick wins achieved by the End to End Programme and the ongoing and extremely successful DLO Change Programme, have been the catalysts for the launch of a defence-wide programme of logistics transformation.

Haiti

Mr. Rosindell: To ask the Secretary of State for Defence what support the UK has provided to the Brazilian and other UN forces in Haiti. [184188]

Mr. Rammell: I have been asked to reply.

The UK supports the work of the United Nations Stabilisation Mission in Haiti (MINUSTAH), and welcomes the work of the troops from Brazil, Canada and Chile, operating under Force Commander Lt. Gen. Heleno Ribeiro Pereira of Brazil. The UK is pleased that additional contingents from Argentina, Uruguay, Nepal and Sri Lanka and Peru should be deployed by the end of July.

The UK is not currently providing personnel contributions to Haiti as we have strong and emerging commitments elsewhere—particularly in Africa. We will be contributing an estimated £8.9 million in assessed contributions until October 2004. This contribution will support the UN troops in Haiti as well as other UN work set out in resolution 1542 (2004). Our financial support will continue beyond October, but the levels are dependent on operational needs which are not fully known as yet.

In addition to financial support for the forces in Haiti, the UK has contributed to related work. The Department for International Development (DfID) sent £1.9 million in bilateral support to Haiti to address civilian unrest. DfID also responded to the flooding in

Haiti, sending £250,000 to the World Food Programme (UN Programme), £150,000 to Save the Children and £109,400 to Action Aid.

The UK also has a continued interest in raising the standard of peacekeeping. The UK funds world-wide 'train the trainer' programmes to support countries in developing their peacekeeping capacity. These focus on police training, but some of the personnel in Haiti may have benefited from this.

Hearing Loss (Veterans)

Ms Atherton: To ask the Secretary of State for Defence what research he has conducted on the comparative levels of hearing loss suffered by *(a)* those suffering from age-related hearing loss and *(b)* veterans suffering from hearing loss which is both age-related and attributable to wartime noise. [184111]

Mr. Caplin: Neither the Ministry of Defence, which is now responsible for veterans' matters, nor the former Department of Social Security, has commissioned research on this specific comparison. However, we recognise that, particularly in the past, noise injury arising from service in the Armed Forces has been a significant contributor to hearing loss among service personnel. The Government have therefore taken a close interest in the medical understanding of the causes of and prognosis for hearing loss, including instigating the 1997 Caiman review. The current scientific understanding of noise-induced sensorineural hearing loss is that it does not get worse on removal from the noise giving rise to the injury and that, in the context of the War Pensions Scheme, hearing loss due to noise and that due to subsequent effects of age are not more than additive. The aim remains that policy and individual decisions should reflect the latest published peer reviewed scientific evidence and, to that end, we carry out a regular scrutiny of emerging relevant scientific literature.

Iraq

Adam Price: To ask the Secretary of State for Defence pursuant to his answer of 15 July 2004, *Official Report*, column 1235W, on Iraq, if he will give *(a)* the date of and, *(b)* if deceased, the name of the person alleged to have suffered harm during the incident to which he refers. [185599]

Mr. Ingram: I am withholding this information under Exemption 4 of the Code of Practice on Access to Government Information.

Manning Control Reviews

Mr. Keetch: To ask the Secretary of State for Defence what plans he has to conduct manning control reviews in the next 12 months; and if he will make a statement. [183827]

Mr. Caplin: The answer I gave on 19 January 2004, *Official Report*, column 919W to the hon. Gentlemen is still applicable today.

Military Exports

Harry Cohen: To ask the Secretary of State for Defence what percentage of military equipment produced in the UK was exported in each of the last 10 years. [182955]

Mr. Ingram: Figures for the value of military equipment that is produced in the UK in any year are not available. In deriving the following table, estimated MOD UK equipment expenditure (including MOD spend with UK industry on research and development, repair and maintenance and assets under construction) have been added to identified exports of military goods to provide an approximation to this figure.

Estimated percentage of military equipment produced in UK which are exported

Percentage

	Military equipment (goods) exported
1997–98	32
1998–99	20
1999–2000	12
2000–01	19
2001–02	17
2002–03	9

Non-departmental Public Bodies

Mr. Stephen O'Brien: To ask the Secretary of State for Defence how many non-departmental public bodies for which his Department is responsible have been *(a)* established and *(b)* abolished since 1997. [182941]

Mr. Caplin: The Ministry of Defence has seven executive and 12 advisory non-departmental public bodies (NDPB)s. The following advisory NDPBs have been established in MOD since 1997:

Animal Welfare Advisory Committee (1998)

Advisory Group on Medical Countermeasures (1998)

Nuclear Research Advisory Council (2001)

The Department also took on the sponsorship role of the Central Advisory Committee on War Pensions and the War Pensions Committees (a multiple body) following the transfer of the Veterans Agency (formerly known as the War Pensions Agency) from the Department for Work and Pensions in 2001.

The Royal College of Defence Studies Advisory Board and the Royal Military College of Science Advisory Council have been abolished since 1997. In addition the Nuclear Powered Warships Safety Committee and Nuclear Weapons Safety Committees merged in this period to form the Defence Nuclear Safety Committee.

The National Employers' Liaison Board, later renamed the National Employers' Advisory Board was relaunched in 2002 as "Supporting Britain's Reservists and Employers". Finally the Independent Board of Visitors for Military Corrective Training Centre has recently been re-categorised from an advisory NDPB to an independent monitoring board. Further details on MOD's NDPBs are in the Cabinet Office annual "Public Bodies" publications which can also be found on the Cabinet Office website.

Non-EU Defence Contractors

Mr. Gordon Prentice: To ask the Secretary of State for Defence what scope there is to amend the Public Procurement Regulations insofar as they relate to Ministry of Defence contracts to regulate the use by UK companies of sub-contractors outside the EU. [183782]

Mr. Ingram: The Public Procurement Regulations implement in the United Kingdom law the European Union Directives on the award of public sector contracts. They apply to Ministry of Defence procurement on non-warlike goods and services. Neither the Regulations or the Directives regulate the engagement of sub-contractors. As a matter of procurement policy, MOD places responsibility on its prime contractors for securing and demonstrating value for money in meeting defence requirements. To this end, MOD encourages the greatest application of open and fair competition by its prime contractors in the selection of sub-contractors.

Radioactive Waste

Mr. Alan Reid: To ask the Secretary of State for Defence when he expects to announce the short list of sites under consideration for storing radioactive waste as part of project ISOLUS; and if he will make a statement. [185083]

Mr. Ingram *[holding answer 19 July 2004]*: I expect to make an announcement shortly.

Support Vehicles

Mr. Laxton: To ask the Secretary of State for Defence what meetings Ministers in his Department have had with their US counterparts on the Support Vehicle contract; and if he will make a statement. [171577]

Mr. Ingram: No meetings have been held between Ministers and their US counterparts regarding the Support Vehicle contract.

Tanker Aircraft

Mr. Hancock: To ask the Secretary of State for Defence what the current forecast is for *(a)* the in-service date and *(b)* the final cost of the contract to provide new tanker aircraft; what the original projections were; and if he will make a statement. [183313]

Mr. Ingram: The Future Strategic Tanker Aircraft (FSTA) project is currently in its Assessment Phase and does not have a formally approved in-service date (ISD). At the commencement of the Assessment Phase, ISD was broadly forecast to fall in the period 2007–09. We now believe it will be achieved later than this, but endorsement of a firm planning date for ISD is subject to the outcome of negotiations with industry. The maximum whole life cost of the FSTA programme is currently estimated to be £13.1 billion, at Outturn prices, which compares to an estimate of £13.9 billion at the commencement of the Assessment Phase.

Tornado

Mr. Gerald Howarth: To ask the Secretary of State for Defence if he will make a statement on plans to upgrade the Tornado's anti-aircraft missile self-protection system to combat potential missile threats over the coming decade; whether there is a budget for such an upgrade; and what the in-service date is for this upgraded capability. [183406]

Mr. Ingram: We have recently completed the assessment phase for the Modular Defensive Aids Systems (MoDAS) project, which is the programme to upgrade the defensive aids system for the Tornado GR4, and we are evaluating the results. A decision on the next phase of the project will be taken as part of the Department's normal planning process.

PRIME MINISTER

Operation Mass Appeal

Adam Price: To ask the Prime Minister (1) whether he personally approved the setting up of Operation Mass Appeal; [185423]

(2) what the purpose was of Operation Mass Appeal. [185424]

The Prime Minister: I refer the hon. Member to Lord Butler's report, paragraphs 485 to 489 (House of Commons 898).

Special Advisers

Mr. Evans: To ask the Prime Minister how many of the reductions in the numbers of civil servants in his Office announced in the spending review will be of special advisers. [185480]

The Prime Minister: I refer the hon. Member to the answer my right hon. Friend, the Chief Secretary for the Treasury (Mr. Boateng), gave to him today at column 190W.

Sudan

Mr. Jim Cunningham: To ask the Prime Minister what discussions he has had with the Secretary of State for Foreign and Commonwealth Affairs on tackling the situation in Sudan. [184467]

The Prime Minister: I regularly discuss all aspects of foreign policy, including Sudan, with the Foreign Secretary. My right hon. Friend, the Secretary of State for International Development, also visited Sudan, including Darfur, between 6 and 8 June to assess the situation.

The UK is fully engaged in Darfur and we have held discussions with our UN, US and EU partners. We have made very clear to the Sudanese Government that they must now take significant steps to improve the security situation and humanitarian access. We have also allocated over £62 million for humanitarian assistance in Darfur.

Written Answers to Questions

Wednesday 21 July 2004

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Advertising

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs how much money was spent on advertising and promotional literature for her Department's initiatives, broken down by year since 1997. [183810]

Alun Michael: The Department does not maintain separate records of its expenditure for advertising and promotional literature. The expenditure for publicity by Defra's Communications Directorate, includes marketing, advertising, publications, events, shows and direct mailings, and is recorded for the financial years since Defra's creation in June 2001 as follows:

	£ million
2001–02	6.6
2002–03	4.7
2003–04	2.5

This includes communications on a wide range of matters, much of it necessary or beneficial to the public and the wide range of industries in which Defra has an interest, together with local government, voluntary organisations and other bodies.

Agricultural Wages Board

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the future of the Agricultural Wages Board, with specific reference to the launch of the consultation on its status; and what discussions she has had with *(a)* farming organisations and *(b)* the TGWU on this subject. [184436]

Alun Michael: I can confirm that Ministers at Defra are fully committed to the continued operation of the Agricultural Wages Board for England and Wales. The Board plays an important role in protecting the interests of agricultural workers including the migrant workers employed on farms.

The Agricultural Wages Board as a non-departmental public body was last reviewed in 1999. There is no longer a requirement to undertake reviews at regular intervals and further reviews will be undertaken by this Department as necessary to confirm that the Board is delivering high quality services efficiently and effectively.

Following the last review of the Board we announced that some aspects of the Board's operation would be modernised. We plan to introduce these changes through a Regulatory Reform Order. We do not intend to reduce the protection given to agricultural workers. However, one of our objectives will be to align the operation of the Agricultural Minimum Wage legislation and general employment law as closely as possible. This will lessen the burden on employers in agriculture and allow them to benefit from the more flexible approach available under the National Minimum Wage legislation (including the revised output work provisions that will be introduced in October).

The Food and Farming Minister Lord Whitty met representatives of the NFU and the Transport and General Workers Union to discuss detailed proposals in January 2003 and November/December 2004. This issue was also raised in a meeting with members of the Transport and General Workers Union on 24 June. A consensus on the way forward is now emerging and we hope to bring forward more detailed proposals for changes to the Agricultural Wages legislation before the end of the year.

Annual Report

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs how many copies of her Department's, and predecessor Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183842]

Alun Michael: Defra does not have the information on how many copies were printed as the departmental report is published by The Stationery Office Ltd. which determines the print quantities, based on a commercial judgment, and receives all revenues.

Defra is responsible for the design, editorial, typesetting and proofing of the document and the cost for these items since the formation of the department in 2001 are:

	£000
2002	17,512
2003	15,200
2004	16,993

The report is available, free of charge, on the Department's website.

Bottled Water

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what her estimate is of the number of litres of bottled *(a)* sparkling and *(b)* still water consumed in the United Kingdom in each year since 2002; and what percentage was supplied in (i) plastic, (ii) glass and (iii) other materials. [184859]

Alun Michael: Figures published by Zenith International in the 2004 Sucralose Soft Drinks Report estimate that bottled water consumption in 2002 was 1,760 million litres, of which 83 per cent. was still and

17 per cent. sparkling, and 2,070 million litres in 2003, of which 85 per cent. was still and 15 per cent. sparkling. Figures published by Mintel in its Bottled Water Report in June 2003 indicates that 79 per cent. of bottled water is packaged in plastic bottles, 20 per cent. in glass bottles and 1 per cent. in cans.

Business Fines

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what the average fine imposed on businesses prosecuted by the Environment Agency was in each financial year since 1999–2000; [184850]

(2) how many businesses were *(a)* successfully and *(b)* unsuccessfully prosecuted by the Environment Agency in each financial year since 1999–2000. [184851]

Mr. Morley: The following table gives figures relating to Environment Agency prosecutions of registered companies. It does not include sole traders, who cannot be distinguished from individuals on the agency's database.

Prosecutions of registered companies by the Environment Agency

Financial year	*Number of successful prosecutions*	*Number of unsuccessful prosecutions*	*Average fine (£)*
1999–2000	286	10	7,575
2000–01	307	12	6,737
2001–02	317	7	7,354
2002–03	325	5	8,356
2003–04	271	2	7,229

Cross Compliance

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs when she will make a decision on cross compliance; and if she will make a statement. [185143]

Alun Michael: We will be making an announcement shortly on cross compliance conditions.

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to delay the introduction of cross compliance; and if she will make a statement. [185144]

Alun Michael: We will be making an announcement shortly on cross compliance conditions.

Curry Report

Mr. Gray: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate Sir Don Curry made of the funding necessary to implement his Food and Farming Report; what funding she is making available for it; by what mechanism those funds are to be allocated among rural areas; how much will be paid to each region; how much will be used in urban areas; and if she will make a statement. [182561]

Alun Michael: Sir Don Curry estimated that implementation of the recommendations in the report of the Policy Commission on the Future of Farming and Food would cost in the region of an extra £500 million over the following three years.

The Government's Strategy for Sustainable Farming and Food (SSFF), which builds on the work of the Curry Commission, was launched in December 2002. As part of the 2002 Spending Review, the Government announced a sum of £500 million to implement the strategy. This is in addition to existing spending by Defra and other Government Departments which is already being used to deliver aspects of the strategy.

The additional funding provided covers a number of major aspects of the strategy. These include the new Environmental Stewardship Scheme (Entry Level and Higher Level) and the IT system to underpin all the England Rural Develop Programme (ERDP) schemes; improvements in livestock traceability and other major animal health and welfare measures; and new food chain initiatives such as the Food Chain Centre and English Farming and Food Partnerships.

Regional delivery of the strategy will be facilitated by many public body and industry representatives and these organisations will work together with both resource and funding support to deliver the vision set out in the strategy. They are making use of Government grants, industry support and the resources of Government Offices and Regional Development Agencies, as well as other Government bodies participating in regional steering groups. Existing support programmes, including the ERDP have been targeted to deliver SSFF regional action plans. Hitherto, land-based scheme budgets have not been managed on a regional basis, but they will be in future when the new ERDP IT system is rolled-out next year. Budgets for the three ERDP project-based schemes are managed on a regional basis, and the following table summarises expenditure on these schemes in 2003–04:

£000

	Processing and marketing grant	*Rural enterprise scheme*[1]	*Vocational training scheme*
East Midlands	3,021	3,541	297
East of England	998	2,297	303
North East	670	1,882	52
North West	1,264	2,477	453
South East	962	2,408	246
South West	1,255	3,948	451
West Midlands	1,090	3,112	367
Yorks and Humberside	758	2,318	211

[1] RES funds are also available to non-farming businesses.

Given the number of public and industry bodies contributing to regional delivery, it is not possible to quantify precisely the level of support available to fund regional delivery. Implementation of SSFF is one of the core tasks of the Government Offices and Regional Development Agencies, and their funding from Defra reflects this. Funding for the Government Offices is provided directly by Defra. The current Defra contribution to the RDA 'single pot', administered by DTI, is to enable RDAs to address rural productivity issues, which are a key factor in achieving the outcomes of the national Sustainable Food and Farming Strategy. In addition, Defra is making a further £1.5 million available to the RDAs in the current financial year to assist with the implementation of regional delivery plans. New tasking arrangements for RDAs, which will take effect from April 2005, will include specific reference to contributing to delivering a customer-focused, competitive and sustainable farming and food industry.

It is not possible to differentiate precisely between funds that will be spent in rural areas and funds that will be spent in urban areas, but it is clear that the vast bulk will be spent in rural areas.

Dairy Cattle

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total number of dairy cattle in England was for the last 10 years for which figures are available; and what the estimated figure is for 2004–05. [184819]

Alun Michael: The number of dairy cows and heifers that have calved in England is shown in the following table for 1994 to 2003. Provisional figures from the June 2004 census will be available in a statistics notice to be published on the 16 September 2004 on the Defra website.

Number of dairy cows and heifers that have calved in England 1994 to 2003

	Dairy cows (Thousand)
1994	1,897.0
1995	1,809.3
1996	1,783.3
1997	1,700.3
1998	1,642.6
1999	1,659.2
2000	1,575.3
2001	1,490.2
2002	1,462.2
2003	1,434.7

Note:
Figures prior to 2000 are for main holdings only, 2000 onwards include main and minor holdings.
Source:
June Agricultural Census.

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total number of dairy farms was in England for the last 10 years for which figures are available; and what the estimated figure is for 2004–05. [184820]

Alun Michael: The number of holdings in England whose predominant business is dairy is shown as follows. Equivalent figures from the June 2004 census will be published on the Defra website in early 2005.

Number of dairy type holdings in England 1994 to 2003

	Number (Thousand)
1994	20.6
1995	19.6
1996	18.9
1997	18.0
1998	17.0
1999	16.3
2000	15.2
2001	14.1
2002	14.3
2003	13.6

Note:
Figures prior to 2000 are for main holdings only, 2000 onwards include main and minor holdings.
Source:
June Agricultural Census.

Dairy Farm Workers

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what the total number of farm workers employed on dairy farms in England was for the last 10 years for which figures are available; and what the estimated number is for 2004–05. [184818]

Alun Michael: The number of employees on holdings in England whose predominant business is dairy is shown in the following table for 1994 to 2003. Equivalent figures from the June 2004 census will not be available until early 2005.

Number of employees on dairy type holdings in England 1994 to 2003

	Employees (Thousand)
1994	26.4
1995	25.6
1996	24.7
1997	23.4
1998	21.0
1999	18.8
2000	16.0
2001	14.7
2002	14.7
2003	13.4

Notes:
1. Employees exclude farmers, partners, directors and spouses if they work on the holding.
2. Figures prior to 2000 are for main holdings only, 2000 onwards include main and minor holdings.
Source:
June Agricultural Census.

Disposable Nappies

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs how many disposable nappies she estimates were *(a)* used and *(b)* disposed of by (i) landfill, (ii) incineration and (ii) other means in each year since 2001. [184853]

Mr. Morley: We do not collect information on the amount of disposable nappies used nor of the disposal route.

The Strategy Unit Report "Waste Not Want Not" estimated that in 2000–01 nappies comprised around 2 per cent. of household waste, equivalent to 350,000 tonnes. In 2002–03 75 per cent. of our household waste was sent to landfill and 7 per cent. to incineration.

Domestic Waste Sites

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs when she expects her Department to publish the criteria for the treatment expected at the domestic waste sites which are to be allowed to accept cells containing treated toxic waste. [183796]

Mr. Morley: I assume the hon. Member is referring to the provision in the Landfill (England and Wales) Regulations 2002 (as amended) that allows stable, non-reactive hazardous waste to be landfilled in a separate cell in a non-hazardous landfill site. The criteria for stabilised non-reactive granular hazardous waste are set out in part 3, paragraph 14 of Schedule 1 of the amended Regulations. Equivalent criteria for monolithic wastes are being developed and will shortly be issued for consultation.

Eggs

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the enforcement difficulties that led to the decision of the Council of Ministers to remove the derogation from marking for ungraded eggs. [184195]

Alun Michael: The Commission (supported by other member states, but not the UK), argued it was necessary to clamp down on fraudulent sales (eggs being sold other than by the producer) through markets. There is no evidence of any significant problems of this sort in this country.

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the impact upon *(a)* egg producers, *(b)* small markets and *(c)* consumers of her proposed requirement for ungraded eggs to be marked. [184197]

Alun Michael: Defra has received over 3,000 inquiries from small-scale egg producers on the Registration of Laying Flocks Order and the Egg Marketing Regulations. All producers must register with departments in order to obtain an identifying code. Currently small producers with less than 350 birds are exempt from this requirement, provided that the eggs are ungraded and sold direct to the final consumer.

Because of enforcement difficulties in other member states, it was agreed in November 2003 that part of the derogation from marking for ungraded eggs be removed. From 1 July 2005 farmers selling eggs from their own farms at local public markets will no longer be exempt from the requirement to mark their eggs, irrespective of the number of laying hens kept A Partial Regulatory Impact Assessment was prepared on this in November 2003.

The cost for small producers to purchase the necessary equipment is low. A hand stamp can be bought for around £30. The time required to register as a producer and then to stamp eggs is unlikely to be significant. The majority of small producers appear to be satisfied that the costs are reasonable and can be borne comfortably.

Some producers with fewer than 350 laying hens will therefore have to register for the first time, in order to obtain a distinguishing number. This measure had the support of the majority of other member states. Sales in farm shops and door-to-door do however remain exempt.

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs what penalties she plans to impose for a breach of the proposed requirement for ungraded eggs to be marked. [184198]

Alun Michael: If prosecution is required under the Egg Marketing Standards, then any person who fails to comply with any requirement properly made to him by an authorised officer of the Minister or of a food authority under these Regulations, or contravenes or fails to comply with any Community provision, will be guilty of an offence and liable on summary conviction to a fine not exceeding level 5 (currently £5,000) on the standard scale.

We will encourage producers to comply with the new Regulations and provide any necessary advice. Our Egg Marketing Inspectorate will take a sensible and proportionate approach to enforcement. Prosecution will be taken only as a last resort.

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 1 July 2004, *Official Report*, columns 361–62W, on egg stamping, what the *(a)* date and *(b)* nature was of the Council of Ministers meeting which agreed to remove the derogation from marking for ungraded eggs; and what legislation she plans to bring forward to implement the proposed requirement for ungraded eggs to be marked. [184199]

Alun Michael: The meeting at which the agreement was reached to remove the derogation from marking for ungraded eggs was an Agriculture and Fisheries Council which was held on 17 November 2003.

The legislation anticipated to implement the proposed requirement would be The Eggs and Poultrymeat Marketing Standards (Enforcement) (England) Regulations. We hope to bring these Regulations forward later this year, following formal consultation.

Energy Efficiency

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the external costs associated with waste disposal, with particular reference to the environmental costs. [184582]

Mr. Morley: The Review of Environmental and Health Effects of Waste Management, published in May 2004 identified and quantified the health and environmental impacts of different municipal waste management options. A second related report, to be published shortly, will identify the economic values for the impacts identified in the Health and Environmental Effects review. Combined, these studies will provide a range of external costs for each municipal waste management option.

These studies look at the direct impact of different waste management activities, but do not employ a full life cycle analysis to take account of, for example, the benefits of recycling.

Table C4 in Appendix B to Waste Strategy 2000 Part 2 provides estimates of the external costs and benefits of different waste management options (Source: adapted from Coopers and Lybrand (1997)).

Table C4: External costs and benefits of different waste management options

Waste management option	*External cost estimate, £ per tonne of waste, 1999 prices*
	1
Landfill	-17
Incineration (displacing electricity from coal-fired power stations)	10
Incineration (displacing average-mix electricity generation)	-161
Recycling	-297
Ferrous metal	-929
Non-ferrous metal	-196
Glass	-69
Paper	17
Plastic film	-48
Rigid plastic	-66
Textiles	

Fisheries

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of fisheries management schemes employing individual transferable quotas and effort control, based on days at sea. [184817]

Mr. Bradshaw: The most recent evaluation of various alternative fisheries management systems was carried out by the Prime Minister's Strategy Unit and set out in their "Net Benefits" report published on 25 March 2004. We will be examining the Strategy Unit's findings in detail with stakeholders before settling how to take them forward.

Flood Defences

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how much funding has been allocated for flood defences in *(a)* 2004–05 and *(b)* 2005–06. [184067]

Mr. Morley: The Government continue to recognise the importance of flood management and have agreed, as part of the recent Spending Review, to carry forward the significant increases in funding allocated in Spending Review 2002. Total Government funding of flood and coastal defence in England is planned to be £478 million in 2004–05 and at least £564 million in 2005–06.

Fly-tipping

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs if she will propose to the Environment Agency that it establish a national enforcement squad to specialise in detection and prosecution of incidences of fly-tipping, especially of hazardous waste. [183231]

Mr. Morley: Defra has been working closely with the Environment Agency on proposals to help tackle fly-tipping. The agency already has a national enforcement concordat and enforcement officers who deal primarily with tackling investigation of serious, larger incidents of fly-tipping.

Defra will work closely with the agency on efforts to increase the enforcement of illegally disposed waste by ensuring they have a comprehensive toolkit of powers to deal with fly-tipping.

The Anti-social Behaviour Act 2003 gave the Secretary of State power to issue statutory directions to the agency and local authorities on the division of responsibilities for using their clear up powers to tackle fly-tipping. Defra has recently consulted on the proposed directions, which will be issued shortly.

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what recent discussions she has had with the Environment Agency on fly-tipping; and what joint activities are being undertaken. [183707]

Mr. Morley *[holding answer 13 July 2004]*: Defra has been working very closely with the Environment Agency to tackle fly-tipping. Recent work has included bringing forward measures in the Anti-social Behaviour Act 2003, which allowed the Secretary of State to issue statutory directions to the Agency and local authorities to clarify the division of responsibility for dealing with fly-tipping.

The ASB Act also led to the development of the Flycapture database, which the Agency has developed on behalf of Defra. The system went live on 5 April 2004 and take-up has been encouraging, with around 90 per cent. of local authorities registered in the first month.

Defra are currently exploring with the Agency the possibility of developing a comprehensive training package tailored for local authorities. This will allow the Agency to pass on their experience in enforcement to local authorities ensuring fly-tipping is prevented and penalised accordingly.

The Department will carry on working closely with the Environment Agency to ensure that they have a suitable toolkit of powers to properly tackle the illegal disposal of waste or fly-tipping.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs if she will bring forward legislative proposals to amend the Anti-social Behaviour Act 2003 to extend the requirement to report fly-tipping to fly-tipping on private land. [183226]

Mr. Morley: Section 55 of the Anti-social Behaviour Act 2003 set up a requirement for waste collection authorities and the Environment Agency to submit data to Defra on incidents of fly-tipping. The new database went live in April.

Take up of the system has been excellent with over 90 per cent. of authorities registered but it is important to ensure that reliability and quality of current data sources is as good as possible before exploring extending the system. The requirements to report to Flycapture will be reviewed after the first year of operation.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs if she will bring forward legislative proposals to make fly-tipping an arrestable offence. [183232]

Mr. Morley: Under Section 33 of the Environmental Protection Act 1990 the illegal disposal of hazardous waste can incur imprisonment of up to five years on conviction on indictment. This automatically makes it an arrestable offence. Arrest without warrant can occur in relation to arrestable offences or in relation to non-arrestable offences in particular circumstances.

It is open to question however, whether it would be possible to justify, by reference to the level of seriousness, making any act of fly tipping by itself an arrestable offence or one attracting a custodial sentence. However, my right hon. Friend, the Home Secretary, has indicated his intention under the Police Reform Act 2002 to conduct a public consultation on modernising police powers, which includes the intention to rationalise the powers of arrest.

Hazardous Waste

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs how much additional expenditure the Environment Agency has allocated in 2004–05 to address unlawful depositing of hazardous waste. [183230]

Mr. Morley: The agency's expenditure on enforcement across all its activities amounts to £12 million per annum, funded through Grant in Aid. The Agency uses its judgment to prioritise its enforcement effort to deliver the best outcome to protect the environment and human health. Unlawful activity involving hazardous waste is an enforcement priority for the agency in 2004–5 and it will not hesitate to use its powers where evidence is obtained that may lead to prosecution in the courts.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* businesses, *(b)* trade associations and *(c)* trade publications her Department has contacted to provide information on changes in the way hazardous waste is treated and disposed of from 16 July onwards. [184770]

Mr. Morley *[holding answer 16 July 2004]:* The Department has taken, and will continue to take, a range of measures to inform businesses of incoming legislation and their legal obligations as producers of waste.

It is not possible to give a precise figure of how many individual businesses and trade bodies have been reached as a result of Defra and Environment Agency communications on this subject. A recent Defra survey, carried out among a cross-section of small businesses, showed a 78 per cent. awareness of the Landfill Regulations and an 84 per cent. awareness of the forthcoming Hazardous Waste Regulations.

The Department works closely with other organisations who are better placed to disseminate information to businesses on our behalf. For example, Envirowise has produced a Hazardous Waste Guide for Chief Executives of small businesses, which will be distributed to over 13,000 businesses.

The Department has also produced its own smaller leaflet called "Hazard Alert", which has been distributed to a wide stakeholder audience. In addition a dedicated hazardous waste web portal is available at www.hazardouswaste.org.uk.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what timetable *(a)* has operated until now and *(b)* has been set out for the future, for informing businesses of changes to the treatment and disposal of hazardous waste and the types of waste classified as hazardous, resulting from waste-related European Union Directives. [184771]

Mr. Morley *[holding answer 16 July 2004]:* The timetable for implementing changes resulting from European Union Directives usually takes several years, and businesses should expect and anticipate the regulatory changes from an early stage.

To date, businesses have been informed about these changes through the negotiation of the Directives, via the consultation exercises undertaken on the implementation and regulatory amendments and also by means of stakeholder forums, such as the Hazardous Waste Forum.

Since early 2004, a Defra communications strategy has been in place to inform businesses about the changes that are being introduced as a result of the Landfill and Hazardous Waste Directives over two years. As part of this function a dedicated website, widely distributed leaflet, a number of stakeholder events and relevant articles in the trade press have been produced.

Communicating with businesses about these changes will continue while the waste-related European Union Directives are implemented.

Home Energy Efficiency Scheme (Manchester)

Tony Lloyd: To ask the Secretary of State for Environment, Food and Rural Affairs how many homes in Manchester, Central have benefited from the Home Energy Efficiency Scheme. [184172]

Mr. Morley: The Home Energy Efficiency Scheme is now marketed as Warm Front. Between the launch of the scheme in June 2000 and the end of March 2004, approximately 2,889 households in Manchester, Central received assistance from the Scheme.

Human Pesticide Poisoning

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs if she will list the cases of human pesticide poisoning mentioned by the right hon. Member for Cardiff, South and Penarth (Alun Michael) in his broadcast comments on Farming Today of 17 June; in each case *(a)* who was the investigating agency and *(b)* what information from medical practitioners was obtained; and whose conclusion it was that illness was found not to be due to the effects of pesticides. [184435]

Alun Michael: It would be quite wrong for me to release the individual case details of the 60 incidents referred to in my broadcast. They were investigated by the Field Operations Directorate of the Health and Safety Executive (HSE) and detail of individual incidents is presented to the Advisory Committee on Pesticides to inform the pesticides approvals process.

Cases of alleged ill health caused by the use of a pesticide are investigated by the HSE or the Local Authorities. Reports are then submitted to the Pesticide Incidents Appraisal Panel (PIAP) for their assessment. The membership of PIAP includes medical practitioners and a representative from the Department of Health. PIAP considers individual incident and case reports to identify if there is a link between exposure and ill health which may indicate a trend to inform the regulatory system. Medical records are only obtained from GPs and hospital doctors with the consent of the subject. PIAP considers clinical information as it is recorded in medical files.

The details of the results and conclusions are available in the latest PIAP annual report available at: http://www.hse.gov.uk/fod/pir0203.pdf

Landfill

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs when she applied for a derogation from the EU Landfill Directive for the years *(a)* 2006, *(b)* 2008 and *(c)* 2018. [182988]

Mr. Morley: Article 5(2) of the EC Landfill Directive sets three target years 2006, 2009 and 2016 by which member states must reduce the amount of biodegradable municipal waste sent to landfills in proportion to the amount produced in 1995. Under the Directive there is a four-year derogation from these targets available to member states that sent to landfill more than 80 per cent. of their collected municipal waste in 1995. The UK qualifies for this derogation.

The UK does not need to apply to make use of the derogation. The Directive only requires member states to inform the Commission if it intends to make use of the derogation. The Government intend to make use of their derogation and will inform the Commission before each target year.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs why the targets in the Landfill (Scheme Year and Maximum Landfill Amount) Regulations 2004 are measured by weight instead of volume. [182989]

Mr. Morley: The Landfill (Scheme Year and Maximum Landfill Amount) Regulations 2004 divide the UK's targets under Article 5(2) of the EC Landfill Directive between the four countries of the UK. The Directive limits by weight the amount of biodegradable municipal waste allowed to be sent to landfill from member states. The Regulations set the targets consistently with the way the UK's performance will be measured under the Directive.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the delays to the Landfill Allowance Trading Scheme. [182990]

Mr. Morley: The decision to delay the implementation of the Landfill Allowance Trading Scheme until 2005, announced by the Minister of State for Local and Regional Government on 19 November 2003, was made as part of Defra's contribution to helping to reduce spending pressures on local government in 2004–05.

The decision reflected the views of local authorities, received through the consultation on implementing the Landfill Allowance Trading Scheme, that more time was needed to prepare for this new scheme which is a significant departure from the normal operations of local authorities. The delay in starting the scheme will mean that waste disposal authorities will have to make steeper annual reductions in the amount of biodegradable waste they landfill in order to meet the first target year of 2010 but they will have more time to plan how to do this.

The Government are using the additional time to raise awareness of the scheme within local authorities and to support those who plan to make use of its provisions. A series of regional events will be taking place later this month to explain the scheme to local authorities, waste management companies and other interested parties. In addition, workshops will be arranged early in 2005 to give local authority officers hands-on experience of operating a trading scheme. Written and electronic guidance material will also be made available.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's plans are to deal with biodegradable municipal waste which will not be permitted to be sent to landfill under the Landfill (Scheme Year and Maximum Landfill Amount) Regulations 2004; and whether she plans to permit an increase in the number of incinerators in the UK as a consequence of the regulations. [182991]

Mr. Morley: It is for individual waste disposal authorities to decide which waste management options to use to meet their statutory obligations in the light of local circumstances. The Government have no plans for the provision of any particular number of incinerators.

Defra's Waste Implementation Programme provides waste disposal authorities with a package of support measures designed to help them meet their share of the national target for the diversion of biodegradable municipal waste from landfill. In particular its new Technologies Demonstrator programme aims to establish five plants by the end of 2005 with a further five initiated by the end of 2006. The 10 plants will cover at least four different technologies either not currently available in this country or new to the industry, with a target of diverting at least 240,000 tonnes/annum of biodegradable municipal waste away from landfill. This should encourage the faster development and take up of new and innovative technologies.

The Statutory Instrument specifies the maximum amount of biodegradable municipal waste allowed to be sent to landfills; it does not impose a ban on land filling above these permitted levels. However, waste disposal authorities responsible for part or the whole of the UK exceeding the maximum amounts set out in the Instrument will be liable to a penalty.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what increased funding will be given to local authorities to cover their responsibilities under the Landfill Allowance Trading Scheme. [182992]

Mr. Morley: The cost to local authorities of meeting Landfill Directive obligations was addressed in the main in Spending Review 2002, which included increases to the Environmental, Protective and Cultural Services (EPCS) block and PFI credits for local authorities.

The Landfill Allowance Trading Scheme is designed specifically to enable local authorities to choose the most cost effective way to meet their Landfill Directive targets taking account of local circumstances.

The Spending Review settlement 2004 announced by my right hon. Friend the Chancellor of the Exchequer on 12 July incorporates additional targeted funding for waste management including an extra:

£275 million in PFI credits for local authorities in 2006–07 and 2007–08, and

£35 million in 2006–07 and 2007–08 for the new waste management Performance Reward Grant.

These additional funds will enable further investment in sustainable waste management and encourage local authorities to meet their targets efficiently.

Miss McIntosh: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the implications of the Landfill (scheme year and maximum landfill amount) Regulations on incineration in England. [183035]

Mr. Morley: The Landfill Allowance Trading Scheme requires local authorities progressively to reduce the amount of biodegradable municipal waste sent to landfill. Incineration, with or without energy recovery, provides an alternative to landfill, as does recycling. It is up to local authorities to develop and implement a strategy for implementing the scheme to match their local circumstances, taking into account statutory recycling and composting targets and planning guidance, among other things.

Waste Strategy 2000 provided five estimates of waste management options over the period 2000 to 2020. A 'base case' was modelled so that the additional cost of meeting the landfill targets for biodegradable waste and the waste strategy goals could be calculated. The other four models provided different mixes of recycling, composting and incineration and the additional capacity required for those facilities under each option.

The actual figures for additional capacity can be seen in annex C in Part Two of Waste Strategy 2000 (table C8 on page 194). A copy of the strategy is in the House of Commons Library and can also be accessed through the Defra website (www.defra.gov.uk)

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs how many waste landfill sites she expects to have received a permit to receive hazardous waste by 16 July. [183798]

Mr. Morley: Seven dedicated hazardous waste sites will have received a PPC permit to receive hazardous waste by 16 July. This figure comprises five merchant sites and two in-house sites.

In addition to these, 12 sites are awaiting the final decision on their PPC permit application, but currently hold Waste Management Licences to receive hazardous waste. This figure comprises six merchant sites and six in-house sites. These sites will continue to be able to receive those hazardous wastes allowed under their Waste Management Licence.

Landfill Tax Credit Scheme

Mr. Flook: To ask the Secretary of State for Environment, Food and Rural Affairs how much money raised under the Landfill Tax Credit Scheme has been diverted from local environmental trust distributors to the Treasury. [184644]

Mr. Morley: As part of the reform of the Landfill Tax Credit Scheme, approximately £84 million, £92 million and £92 million was allocated to a new public expenditure programme in England (the Waste Implementation Programme) for the financial years 2003–04, 2004–05 and 2005–06. The purpose of this programme is to take action to enable local authorities and others to meet the requirements of Article 5 of the EU Landfill Directive to reduce the amount of biodegradable municipal waste landfilled.

Under the reformed Landfill Tax Credit Scheme approximately £47 million a year continues to be available for spending on local community environmental projects in England.

Mobile Phones/Printer Cartridges

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* mobile phones and *(b)* printer cartridges were

(i) recycled, (ii) reused overseas and (iii) disposed of within the UK waste stream in the most recent year for which figures are available. [184858]

Mr. Morley: The Government do not currently collect data on the numbers of mobile phones and printer cartridges that have been recycled, reused or disposed of in the UK waste stream.

The Government will be collecting data on the amounts of waste electrical and electronic equipment (WEEE), including IT and telecoms equipment, reused and recycled to report to the European Commission when the producer responsibility obligations of the WEEE Directive come into force from August 2005.

National Trails

Mr. Jim Cunningham: To ask the Secretary of State for Environment, Food and Rural Affairs how many National Trails there are in the UK. [185095]

Alun Michael: There are 15 National Trails in England and Wales and four Long Distance Routes in Scotland.

Orchards

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what additional assistance will be available for orchards following the introduction of single farm payment; and if she will make a statement. [183830]

Alun Michael: The Commission has confirmed that it will carry over into the single payment scheme land in dual use such as traditional grazed orchards to be considered as forage rather than orchard land, subject to some conditions still to be clarified, and so that they qualify for payments. We are in the process of drafting detailed guidelines for the application of this guidance with the assistance of English Nature and the Forestry Commission.

Subject to approval by the European Commission, grants to farmers and other land managers for the conservation and restoration of traditional orchards will also be available under the new Environmental Stewardship Scheme, which is to replace the Countryside Stewardship and Environmentally Sensitive Areas Schemes in 2005.

Packaging Regulations

Dr. Whitehead: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to incorporate companies that fall below the minimum requirements only because of their franchise arrangements within the working of the packaging regulations. [183503]

Mr. Morley: This is a matter currently being considered by the Advisory Committee on Packaging (ACP) and subject to their advice, the Government may include proposals for amendments to the packaging Regulations in a packaging consultation document that we expect to issue next year.

Dr. Whitehead: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to ensure that free videos are incorporated into the working of the packaging regulations. [183504]

Mr. Morley: This is a matter currently being considered by the Advisory Committee on Packaging's (ACP) "Free Rider" Task Force. The Task Force will submit a best practice document for the identification and detection of free riders to the ACP later this year. Subject to the Committee's advice, the Government will consider what further action is needed.

Pay Systems

Malcolm Bruce: To ask the Secretary of State for Environment, Food and Rural Affairs if she will place in the Library the most recent review of *(a)* her Department's pay systems, *(b)* the pay systems of the non-departmental public bodies for which she is responsible and *(c)* the departmental equal pay action plan. [181346]

Alun Michael: Defra completed an Equal Pay Review and submitted this together with an action plan to Cabinet Office in April 2003. The review covered core-Defra and two of its agencies, Pesticides Safety Directorate and Veterinary Medicines Directorate, for which the core-department has pay remit negotiating responsibility.

The review found that there were no significant pay gaps within the department provided that Defra's multi-year pay settlement was fully rolled out for future years up to and including 2005–06. Defra is now entering the third year of the four-year settlement.

The Equal Pay Review has been published within Defra and has been accessible to staff via the departments' intranet, Defra Online. A copy will be placed in the House of Commons Library.

Senior managers will be considering the implications of Defra's Equal Pay Review Action Plan in conjunction with developing new pay arrangements for Defra for 2006 and beyond, following the end of the current multi-year pay settlement.

Agencies

Rural Payments Agency

The Rural Payments Agency (RPA) submitted an Equal Pay Review and action plan to Cabinet Office in 2003 in accordance with Cabinet Office guidelines. A further Equal Pay Review has now been completed together with a revised action plan. This review and implications of the action plan on RPA pay systems is currently being considered by senior managers and the Trade Unions. Senior managers will be asked to consider placing the review and action plan in the House of Commons Library when the action plan is agreed.

Central Science Laboratory

The Central Science Laboratory completed its Equal Pay Review in April 2003 and the resultant action plan was submitted to the Cabinet Office in May 2003. The contents continue to be subject to consultation with the Trade Unions.

Centre for Environment, Fisheries and Aquaculture Science

In line with Cabinet Office guidance, the Centre for Environment, Fisheries and Aquaculture Science (CEFAS) completed an Equal Pay Review and submitted this together with an action plan to Cabinet Office in April 2003.

The review found that there were no significant pay gaps as a result of gender difference. There were individual problems as a legacy from earlier pay arrangements; these were addressed in the action plan.

The Equal Pay Review has been published within CEFAS and the results made known to staff. Implementation of the action plan is the subject of on-going discussions with the Trade Unions.

A copy of the Review will be placed in the House of Commons Library.

Veterinary Laboratories Agency

The Veterinary Laboratories Agency completed its Equal Pay Review in April 2003 and the resultant action plan was submitted to Cabinet Office in May 2003. The review found that there were no significant pay gaps as a result of gender difference. Implementation of the action plan is the subject of ongoing discussion with the Trade Unions. A copy of the review will be placed in the House of Commons Library.

Non-departmental public bodies

Non-departmental public bodies were not included in the Government commitment to carry out equal pay reviews by April 2003, although several have done so.

Pesticides

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what plans the Government have to extend post-marketing surveillance to pesticide products in the same way as for new medicinal products. [184449]

Alun Michael: The pesticide approvals process requires all approval holders to report any adverse effects to the Pesticides Safety Directorate. In addition a range of monitoring activities are carried out to ensure that pesticide products are formulated and used correctly. These activities include formulation analysis of pesticide products, label checks, and the Wildlife Incident Investigation Scheme. In addition a number of investigations are carried out by the Health and Safety Executive and local authority Trading Standards officers. Therefore, the Government have no plans to extend the post marketing surveillance of pesticide products.

Recycling

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what her strategy is to encourage the use of recycled fibre in the private sector. [184954]

Mr. Morley: Government recognise that it is not only important to collect materials for recycling, but to make good use of them. The Waste and Resources Action Programme (WRAP) was set up by Government and the Devolved Administrations to help in this area. Their aim is to create stable and efficient markets for recycled materials and products and to remove the barriers to waste minimisation, re-use and recycling.

Over the past three years WRAP have been working with a wide variety of businesses to encourage the use of recycled materials and also to find new uses for recycled materials.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs what the total tonnage of waste collected by community recycling organisations was in England in each year since 2000. [183187]

Mr. Morley: According to Defra's latest annual Municipal Waste Management Survey of local authorities in England, the total tonnages of voluntary organisation recycling are:

	Thousand tonne
2001–01	35
2001–02	35
2002–03	37

However, these figures are likely to be an underestimate as not all recycling carried out by community organisations is reported to local authorities.

The results of the survey are based on information supplied by local authorities in England for the financial year 2002–03, the latest year for which data are available. A summary of the survey was published on the Defra website in April this year and can be accessed through this link: http://www.defra.gov.uk/news/2004/040429a.htm

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs what the total value of contracts between community recycling organisations and local authorities was in England in each year since 2000. [183188]

Mr. Morley: The Department does not collect this information.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs how many community recycling organisations were registered in England to collect waste in each year since 2000. [183189]

Mr. Morley: This information is not available. All organisations involved in waste collection are required to have a Waste Carrier's Licence or an Exemption to that requirement. The Environment Agency (EA) issues

and regulates the licensing system but its records do not differentiate between commercial organisations, charities, community groups or individuals.

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what steps her Department has taken to tackle false claims of recycling achievements by the packaging industry. [183703]

Mr. Morley *[holding answer 13 July 2004]*: The Department, in conjunction with the Department of Trade and Industry, the Scottish Executive, the Welsh Assembly Government, the Northern Ireland administration, the Environment Agency, the Scottish Environment Protection Agency and the Environment and Heritage Service in Northern Ireland has commissioned fact-finding exercises to establish whether there is any substance to the allegations of inappropriate issuing of Packaging Waste Recovery Notes (PRNs) and Packaging Waste Export Recovery Notes (PERNs) by some packaging waste reprocessors and exporters.

The first fact finding exercise took place last year and investigated the wood packaging waste sector. On completion of the exercise, the fact finding team presented their findings in a report which can be found on the Department's website at http://www.defra.gov.uk/environment/waste/topics/packaging/index.htm

During the course of the exercise the team established that there were no inappropriate operations of the kind that might warrant criminal proceedings. However, some assumptions were being made, for example about the tonnages of packaging waste in mixed loads, that were unrealistic or were made on the basis of insufficient evidence. The team therefore recommended that the amount of wood packaging waste recycled in 2002 should be reduced by 76,400 tonnes. This was done.

The second fact finding exercise is currently focusing on the plastic packaging waste sector and the findings will be announced shortly.

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to increase the amount of recycling in London. [184279]

Mr. Morley: In common with all local authorities in England, London boroughs were set statutory national recycling and composting targets for 2003–04 and 2005–06.

To help support achievement of these targets over the last two years, Defra has allocated £24.9 million from the National Waste Minimisation and Recycling Fund to the London Recycling Fund, for a range of sustainable waste management schemes in London. A further £20.55 million has been awarded for 2004–05 to 2005–06.

Twenty-two London boroughs included a sustainable waste management target in the first round of local Public Service Agreements (PSA). The second round of local PSA negotiation is now under way and four London boroughs have proposed sustainable waste management targets.

I have also written to all local authorities offering direct consultancy support on waste management projects up to the value of £20,000.

Set Aside

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs when she will advise farmers of the rules for *(a)* set aside, *(b)* uncultivated fields and *(c)* permanent pasture; and if she will make a statement. [185145]

Alun Michael: With regard to set-aside, we will be advising farmers before the 1 August deadline. We will be making an announcement shortly on cross compliance conditions.

Single Farm Payments

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make it her policy to allow farmers to receive single farm payment in Euros; and if she will make a statement. [185233]

Alun Michael: The Government are committed in principle to providing farmers with the option of receiving grants and subsidies in Euros. The computer systems at the Rural Payments Agency that will deliver the single payment are being developed with that in mind, and I will make an announcement in due course.

Stored Departmental Publications

Dr. Cable: To ask the Secretary of State for Environment, Food and Rural Affairs how many departmental publications are in storage; and where they are located. [183871]

Alun Michael: Defra regularly publishes reports, consultations and publicity material. The current list of titles published by the department and available to the public numbers 1,595, of which 438 are stored digitally and printed on demand. Publications are stored at Defra Publications, based in East Kilbride, Scotland.

Additionally, The Stationery Office publishes a number of publications on behalf of the department and for these publications retention and storage is a matter for the publisher.

The titles available are listed on the Defra website.

Toxic Waste Disposal

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate her Department has made of the cost to business of the stock-piling of toxic waste in the six month period following 16 July owing to the short-term shortfall of disposal capacity. [183797]

Mr. Morley: None. It is Government policy to ensure as smooth a transition as possible of the implementation of the requirements of the Landfill Directive and to avoid the need for storage of hazardous waste over and above that which normally occurs.

Waste

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs if her Department will launch a public information campaign alerting businesses to their legal obligations as producers of waste. [183197]

Mr. Morley: The Department is taking a range of measures to inform businesses of their legal obligations as producers of waste. Defra has issued a code of practice and information leaflet covering the duty of care requirements which are set out in Section 34 of the Environmental Protection Act 1990. We are currently reviewing the duty of care regime which will result in a consultation later in the year and should assist in raising public awareness.

With the forthcoming changes to the management of hazardous waste, a dedicated hazardous waste web portal will be available at www.hazardouswaste.org.uk from the 16 July 2004. Other measures to inform businesses of these changes include leaflets, updated and signposted Defra, Environment Agency and Envirowise websites, press releases, case study material and a communication network; established primarily through the Hazardous Waste Forum.

The Envirowise programme, which is partly funded by Defra, offers businesses in the UK advice on their legal obligations relating to waste, together with a range of support and guidance on waste minimisation.

Defra and the Department for Trade and Industry are informing businesses of their obligations under the Packaging Regulations and the forthcoming Waste Electrical and Electronic Equipment (WEEE) Regulations and End of Life Vehicles (ELV) Regulations. For example, during the implementation of the WEEE directive the Government have organised over 50 workshops to alert stakeholders to the regulations.

Defra also supports the Environment Agency-led NetRegs project, which provides businesses with an online plain English guide to the environmental legislation that applies to them, and how to comply with it.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs if *(a)* her Department and *(b)* the Environment Agency will establish an online database to monitor flows of wastes and other materials through the economy. [183229]

Mr. Morley: Good quality data on waste is vital to monitor and evaluate performance, underpin planning and investment decisions and formulate strategy and specific policy interventions. Defra's Waste Implementation Programme has established a data work-stream to ensure effective co-ordination, provision and dissemination of reliable data on different waste streams, through the development of a national three-year data strategy.

Already in place is the development of a web-based intranet and central database to provide quarterly data on municipal waste. Waste Dataflow (www.wastedataflow.org) has been established by Defra together with the Chartered Institution of Wastes Management, and is widely supported. The system will provide more timely, efficient and accessible data than is currently available, helping to monitor progress against landfill directive targets. The Environment Agency has played an important role in helping to steer this project.

Our medium-term aim is to develop an accessible central database of current (and where available historic) data on all waste streams, working closely with the Environment Agency.

Richard Ottaway: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance her Department issues to business producers of waste on how to discharge the statutory duty under section 34 of the 1990 Environmental Protection Act and the extent of due diligence required of such a producer in discharging its duty. [183228]

Mr. Morley: Defra has produced "Waste Management The Duty of Care Code of Practice" to offer guidance on complying with section 34 of the Environmental Protection Act 1990. This is available on the Defra website at: http://www.defra.gov.uk/environment/waste/management/doc/pdf/waste_man_duty_code.pdf

Defra has recently re-issued a leaflet entitled "Waste and Your Duty of Care" which can also be accessed online at: http://www.defra.gov.uk/environment/waste/management/doc/index.htm

A comprehensive review of the duty of care regime is currently under way which will result in a consultation and an updated code of practice.

WaterVoice Office (Exeter)

Linda Gilroy: To ask the Secretary of State for Environment, Food and Rural Affairs whether it is Government policy to close the WaterVoice office in Exeter; and if she will make a statement. [185276]

Mr. Morley *[holding answer 20 July 2004]:* The Government's policy in relation to WaterVoice regional offices is to take forward the recommendations made by PricewaterhouseCoopers (PwC) in its report on the organisational and regional structure of the Consumer Council for Water that was published in January 2004, and for an Implementation Steering Group, which includes representatives from Defra, WaterVoice and Ofwat, to decide on the location of merged regional offices for the new Consumer Council for Water.

PwC recommended that the offices in Exeter and Bristol currently serving the South West and Wessex should be merged into one office and located either in Exeter, Bristol or at a new site in Taunton. Following consultation with staff in Exeter and Bristol, the Steering Group agreed that the merged office should be located in Bristol.

Waterways

Mr. Bill O'Brien: To ask the Secretary of State for Environment, Food and Rural Affairs what plans does she have to ensure that the programme of investment on waterway infrastructure will meet the target of seven million tonnes of freight being transported on British Waterways navigations by 2010; and if she will make a statement. [183684]

Alun Michael: The target referred to is one set by British Waterways itself, rather than the Government. It is an ambitious target but that is greatly to the credit of British Waterways.

We encourage British Waterways to facilitate waterway transport by encouraging the transfer of freight from roads to water where this is practical, economic and environmentally desirable. The Government will continue to provide grant in aid to support British Waterways' Corporate Plan and in

particular to help it address its backlog of maintenance and so enable it to meet its freight and other objectives. British Waterways is also eligible for grants from the Department of Transport's freight facilities grant programme towards infrastructure investments that will lead to identifiable transfer of lorry movements from roads.

TRANSPORT

Aviation (State Aids)

Mr. Wilshire: To ask the Secretary of State for Transport what representations his Department has made to the US Administration about state aid for the US aviation industry; and if he will make a statement. [183294]

Mr. McNulty: The issue of state aid has been raised in the negotiations between the European Community and the United States over a transatlantic Open Aviation Area. The new EU regulation on protection against subsidisation and unfair pricing practices by third country carriers, which has recently entered force, is designed to address unfair competition arising from subsidies to non-EU airlines.

Canteen Facilities

Andrew Selous: To ask the Secretary of State for Transport what the cost of running the Department's canteen facilities was in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185244]

Mr. McNulty: In 1996–97 the Department's restaurant services were provided by an outside contractor and the contract attracted a subsidy of £25,000. The Department also paid the accommodation and utilities costs. These were borne within the overall costs for the building (so separate figures are not available). The contract was re-let in 2000, it was let on a self-financing basis. This gave the contractor freedom to operate commercially and it obviated the requirement for a cash subsidy. The Department still pays the accommodation and utilities costs. Another contract has recently been let still under the same self-financing principle.

Civil Aircraft (Safety)

Mr. Lazarowicz: To ask the Secretary of State for Transport how many *(a)* incidents and *(b)* complaints regarding the safety of civil aircraft the UK aviation authorities received in (i) 2004 to date, (ii) 2003 and (iii) 2002, broken down by (A) airline, (B) aircraft type and (C) country of registration. [184129]

Mr. McNulty: Neither we nor the CAA maintain a central record of complaints about the safety of particular airlines. We receive very few complaints from the public about the safety of airlines and these are dealt with as they arise. Appropriate action is taken if a complaint reveals any non-compliance with required standards.

Article 117 of the Air Navigation Order establishes a Mandatory Occurrence Reporting (MOR) scheme for safety related incidents. The purpose of the scheme is to ensure that the CAA is advised of hazardous or potentially hazardous incidents and defects, and that knowledge of these occurrences is disseminated so that other persons and organisations may learn from them. This enables an assessment to be made by those concerned of the safety implications of each occurrence.

Occurrence reports are an important part of our open reporting culture and the fact that an occurrence report has been made is not necessarily an adverse indication about the safety standards of an airline. The MOR scheme aims to ensure the safety of the UK industry but some reports, mainly relating to occurrences en route in UK airspace, do involve foreign aircraft.

The tables, which have been placed in the Libraries of the House, set out the number of aircraft the subject of mandatory occurrence reports by state of registry and aircraft type for the years 2002 to 2004. Slight discrepancies exist between the figures because of the way data is recorded. Section 23 of the Civil Aviation Act 1982 constrains the Civil Aviation Authority's ability to release information relating to individual companies that it receives under the MOR scheme. I therefore consider that it would be inappropriate for me to undermine those constraints by publishing a list of airlines whose aircraft have been the subject of mandatory occurrence reports.

Diabetic Retinopathy (Driving Licences)

Mr. Sanders: To ask the Secretary of State for Transport if he will publish the minutes of the Honorary Medical Advisory Panel on Driving and Visual Disorders' special forum on progressive and non-progressive retinopathy. [184634]

Mr. Jamieson: The minutes of the meetings of the Honorary Medical Advisory Panel on Driving and Visual Disorders are published regularly on the DVLA website. At the last meeting the Panel suggested that a useful area of research would be a workshop on retinopathy. We are currently considering whether this initiative should be included in the Department's research programme.

If approved the results of the workshop will be published.

Headed Notepaper

Mr. Wiggin: To ask the Secretary of State for Transport what the total cost of printing departmental headed notepaper was in *(a)* 1996–97 and *(b)* the last year for which figures are available. [185235]

Mr. McNulty *[holding answer 19 July 2004]:* The Department does not retain records of the former Department of Transport's expenditure, and to investigate the costs of printing its headed notepaper in 1996–97 could be done only at disproportionate cost.

The Department for Transport's expenditure on headed notepaper for 2003–04 was £1,424.

Network Rail

Mr. Fallon: To ask the Secretary of State for Transport how, under his proposals of 15 July, the borrowing of Network Rail is guaranteed. [185425]

Mr. McNulty *[holding answer 20 July 2004]*: Network Rail's borrowing benefits from support arrangements provided by the Strategic Rail Authority (SRA). As announced to the House by the Secretary of State for Transport on 15 July 2004, the SRA is to be closed. Its financial obligations, including those in support of Network Rail's borrowing, will be transferred to the Department for Transport, subject to the passage of the necessary legislation. In the meantime, the existing SRA support arrangements will continue.

Pay Systems

Malcolm Bruce: To ask the Secretary of State for Transport if he will place in the Library the most recent review of *(a)* his Department's pay systems, *(b)* the pay systems of the non-departmental public bodies for which he is responsible and *(c)* the departmental equal pay action plan. [181356]

Mr. McNulty: A copy of the Department's equal pay action plan will be placed in the Libraries of the House once it is finalised.

Transport Statistics

Norman Baker: To ask the Secretary of State for Transport what estimate he has made of the average journey time between central London and the centre of *(a)* Manchester, *(b)* Edinburgh, *(c)* Bristol and *(d)* Newcastle by (i) air, (ii) rail, (iii) lorry and (iv) car, including, in the case of air, check-in time at the airport. [182376]

Mr. McNulty: Data on journey times by mode between these cities are not held centrally.

Travel Costs

Dr. Cable: To ask the Secretary of State for Transport what the travel costs were of civil servants in *(a)* his Department, *(b)* its predecessor Department and *(c)* its related agencies in each year since 1997. [183892]

Mr. McNulty: The Department for Transport came into existence on 29 May 2002 following Machinery of Government changes. The total travel and subsistence costs for civil servants in the Department for fiscal year 2002–03 were £1,606,589, and for 2003–04 were £1,919,678. Information for earlier years can be obtained only at disproportionate cost.

The totals for the Department's agencies in the same years were £18,696,176 (2002–03), and £21,975,803 (2003–04).

All travel undertaken by civil servants in the Department for Transport complied with the requirements of the Civil Service Management Code.

DEFENCE

Iraq

Mr. Wiggin: To ask the Secretary of State for Defence whether British troops charged with torture or mistreatment of prisoners in Iraq could be tried in an Iraqi court under Iraqi law. [183244]

Mr. Ingram: I refer the hon. Member to the reply my right hon. Friend the Foreign Secretary gave on 1 July 2004, *Official Report*, column 432W, to the right hon. Member for Devizes (Mr. Ancram). British troops serving in Iraq have immunity under Coalition Provisional Authority Order 17.

United Kingdom armed forces, wherever they operate in the world, are subject to English criminal law. They can be tried by court martial for acts committed overseas if those acts would constitute a criminal offence if committed in the UK.

Sir Menzies Campbell: To ask the Secretary of State for Defence when and in what circumstances Ministers were first informed of the practice of hooding; what the nature of the practice was; and what the reasons were for its abandonment. [183944]

Mr. Ingram *[holding answer 20 July 2004]*: The hooding of detainees for the purposes of arrest or transit was a standard procedure for United Kingdom troops prior to Operation Telic and, as such, was not specifically brought to the attention of Ministers. The UK believes that hooding during arrest and transit is acceptable when there is a strong military reason, for example to offer security to our own forces and locations or to provide protection to the detainee (through the prevention of identification by other detainees).

Military commanders became aware that the practice of hooding could be harmful to prisoners, especially if it was applied inappropriately. They judged that these concerns outweighed the military justification for the continued use of hooding as a means of blindfolding, and that the most prudent, immediate response was to introduce a ban.

Mr. Pope: To ask the Secretary of State for Defence how many members of the Queen's Lancashire Regiment were *(a)* awarded medals and *(b)* mentioned in despatches following their recent deployment in Iraq. [184500]

Mr. Caplin: Following their recent deployment to Iraq (from June 2003 to November 2003), four personnel from the Queen's Lancashire Regiment were awarded medals and two were Mentioned in Despatches.

Adam Price: To ask the Secretary of State for Defence pursuant to his answer of 7 July 2004, *Official Report*, column 721W, on Iraq, why he decided to publish the extracts from the document. [185600]

Mr. Hoon *[holding answer 20 July 2004]*: The extract contained the relevant information.

Adam Price: To ask the Secretary of State for Defence (1) whether he was informed in July 2003 that the SIS had, in that month, withdrawn reporting from a source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable; [185656]

(2) when he was informed that SIS had withdrawn reporting from the source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable. [185691]

Mr. Hoon: I first became aware that SIS had withdrawn the reports as a result of the Butler Review.

European Rapid Reaction Force

Mr. Wiggin: To ask the Secretary of State for Defence what estimate he has made of the costs of participation in the European Rapid Reaction Force. [185202]

Mr. Hoon: There is no standing European Rapid Reaction Force. National forces declared under the Helsinki Headline Goal are made available to European Union operations on a voluntary, case-by-case basis, as for NATO or United Nations operations. United Kingdom contributions to such operations are provided from within existing forces.

Management Groups

Mr. Keith Simpson: To ask the Secretary of State for Defence if he will list the responsibilities of the *(a)* Defence Housing Executive, *(b)* Defence Medical Training Organisation, *(c)* Armed Forces Personnel Administration Agency, *(d)* Policy Director, *(e)* Deputy Chief Defence Staff (Equipment Capability), *(f)* Chief of Defence Intelligence, *(g)* Defence Intelligence and Security Centre, *(h)* Internal costs, *(i)* Programme Account and *(j)* Nuclear Management Groups. [181747]

Mr. Caplin: The responsibilities of the management groupings requested are listed as follows:

(a) This organisation ceased to exist on 31 March 2003 when it was absorbed into Defence Estates.

(b) This organisation ceased to exist on 31 March 2003 following the formation of Defence Medical Education and Training Agency (DMETA).

(c) This Agency, owned by the Deputy Chief of Defence Staff Personnel (DCDS(Pers)), contributes to operational effectiveness through the provision of pay and administration services to Service personnel. In addition, the Agency provides direct support to the mobilization of reservists and the deployment of improved Operational Manpower systems.

(d) The Policy Director is responsible for future defence policy and international security policy.

(e) The Deputy Chief of the Defence Staff (Equipment Capability) heads the Equipment Capability Customer organisation, whose role is to develop an integrated and affordable equipment programme that meets Defence capability requirements, and to drive the delivery of new and enhanced military capability.

(f) The Chief of Defence Intelligence is responsible for the provision of defence intelligence to the MOD, the armed forces, wider Government and allies. His areas of responsibility encompass the Defence Intelligence Staff (DIS) including its agencies, the Defence Geographic and Imagery Intelligence Agency and the Defence Intelligence and Security Centre.

(g) Training in security, languages, intelligence and photography takes place at the Defence Intelligence and Security Centre, who also provide advice on intelligence and security policy.

(h) This Management Group was discontinued with effect from 31 March 2004. It has been merged with (i) Programme Account.

(i) The responsibilities of the Programme Account Management Group are: the purchase of new equipment systems and associated weapons including major upgrade programmes and system procurement expenses such as studies and the management and funding of Defence Procurement Agency staff, accommodation and all related activities.

(j) The responsibilities of the Nuclear Management Group are; to sustain a safe and effective Nuclear Warhead capability and to discharge MOD's liabilities for waste management and decommissioning at the sites of BNFL and UKAEA.

Further information on individual defence agencies is available in the Library of the House of Commons.

Mr. Keith Simpson: To ask the Secretary of State for Defence if he will list the responsibilities of the *(a)* Fleet, *(b)* General Officer Commanding (Northern Ireland), *(c)* Field Army, *(d)* 1st (UK) Armoured Division, *(e)* 2nd Division, *(f)* 3rd Division, *(g)* 4th Division, *(h)* 5th Division, *(i)* UK Support Command (Germany), *(j)* Joint Helicopter Command and *(k)* Land Support management groups. [181779]

Mr. Caplin: The responsibilities of the management groupings requested are listed as follows:

(a) The Commander-in-Chief Fleet ensures the Royal Navy carries out its responsibilities by delivering an effective and capable Fleet based on flexible support, the continuous development of people, organisations and capability and through the most efficient use of resources.

(b) It is the responsibility of the GOC NI to implement policy in accordance with Chief of Defence Staff and Chief of General Staff Directives and to support the Chief Constable of the Police Service of Northern Ireland in the defeat of terrorism and in the maintenance of Public Order in order to assist HMG's objective of returning to normality.

(c) Exercising operational command of the Field Army and training designated forces for war and other operations in order to provide military capability in the right place, at the right time in the most cost effective manner.

(d) 1st (UK) Armoured Division is to maintain and where possible enhance the Division's capabilities with emphasis on war in order to set the conditions for future success on operations.

(e) 2nd Division is to provide the most effective regional command and infrastructure support to all formations and units within Scotland and the North of England in order to enable Commander Regional Forces to deliver the required military capability and infrastructure support to CinC LAND.

(f) 3rd (UK) Division is to exercise operational command, train designated forces for war and other operations, and conduct operations as directed in order to provide military capability within readiness.

(g) 4th Division is to deliver, and where possible enhance, both military capability and the provision of infrastructure support to designated formations and units.

(h) 5th Division is to provide the most effective regional command and infrastructure support to all formations and units within its geographical area in order to enable Commander Regional Forces to deliver and, where possible, enhance the required military capability and infrastructure support to CinC LAND.

(i) The mission of United Kingdom Support Command (Germany) is to deliver, and where possible enhance, both military capability and the provision of infrastructure support to designated formations and units.

(j) Commander Joint Helicopter Command's primary role is to deliver and sustain effective Battlefield Helicopter and Air Assault assets, operationally capable under all environmental conditions, in order to support UK's defence missions and tasks.

(k) Land Support Management Group exists to effectively manage the resources of Headquarters Land Command, and the overall Communication Information Systems requirement for Land Command.

Missiles

Mr. Cousins: To ask the Secretary of State for Defence how many nations he estimates have *(a)* air, *(b)* land and *(c)* submarine-launched (i) cruise and (ii) skim missiles with a range of more than 20 nautical miles. [185574]

Mr. Hoon: The Ministry of Defence does not hold the information requested on all countries.

The United Nations Register of Conventional Arms has seven categories of conventional arms for nations to report against, including Section VII—Missiles and Missile Launchers. However returns are made on a voluntary basis and the UN does not hold all this information either.

Prisons

Tom Cox: To ask the Secretary of State for Defence what training is given to police officers employed in British-run military and civilian prisons in Iraq; and how long it lasts. [177245]

Mr. Ingram: There are no British-run civilian prisons in Iraq. The only British detention facility in Iraq is the Divisional Temporary Detention Facility in Shaibah. Internees are guarded by soldiers of the Military Provost Staff who are trained to Home Office standards. No civilian prison or police officers are employed in Shaibah.

EDUCATION AND SKILLS

Basic Skills Agency Data

Mr. Cousins: To ask the Secretary of State for Education and Skills if he will update the data prepared for each English constituency by the Basic Skills Agency in 2000; and what the updated information is for each constituency in the North East Region. [185169]

Mr. Ivan Lewis: In May 2004 the DfES commissioned work to produce local level estimates of literacy and numeracy in England based on the results of the Skills for Life survey (published in October 2003). The survey mapped skill levels to the National Standards for Adult Literacy and Numeracy. These estimates will update those provided by the Basic Skills Agency and will be available via the DfES's website in autumn 2004.

At the current time, based on the Skills for Life survey findings, we can provide estimates of literacy and numeracy levels for the North East and its constituent Learning and Skills Council areas:

	Entry level 1 and 2 (%)	*Entry level 3 (%)*	*Level 1 (%)*	*Level 2+ (%)*	*Sample size*
Literacy					
England	5	11	40	44	7,874
North East	8	14	41	37	877
Northumberland	8	21	38	33	[1]82
Tyne and Wear	7	15	42	36	310
County Durham	5	10	39	46	191
Tees Valley	10	15	43	33	294
Numeracy					
England	21	26	28	25	8,040
North East	28	27	25	21	894
Northumberland	41	23	22	15	[1]82
Tyne and Wear	24	26	24	26	317
County Durham	23	24	28	25	192
Tees Valley	31	30	24	15	303

[1] please note the small sample size

Countryside Interpretation Centres

Llew Smith: To ask the Secretary of State for Education and Skills what programmes his Department has established for collaboration between schools and independent countryside interpretation centres. [185548]

Mr. Charles Clarke: We welcome collaboration between schools and independent countryside interpretation centres and would encourage schools to develop relationships with them.

More specifically, our Growing Schools programme has worked with 12,000 schools and 40 partner

organisations which specialise in the field of outdoor education to assist teaching about food, farming and the countryside both within and beyond the school grounds. The programme is now further developing an accreditation scheme for countryside centres such as estates, farms, woodlands, parks, gardens and outdoor museums.

Our London Challenge programme has commissioned the Field Studies Council to provide outdoor learning experiences for London pupils over a three year period.

Dentistry

Mr. Burstow: To ask the Secretary of State for Education and Skills how many dental clinical academics hold honorary consultant contracts. [181642]

Ms Rosie Winterton: I have been asked to reply.

Detailed information has been published by the Council of Heads of Medical Schools and the Council of Deans of Dental Schools in "Clinical Academic Staffing Levels in UK Medical and Dental Schools", May 2004. A copy has been placed in the Library.

Departmental Staff

John McDonnell: To ask the Secretary of State for Education and Skills (1) how many *(a)* consultants and *(b)* advisers his Department employs; and what the annual cost is of their employment; [184739]

(2) how many *(a)* consultants and *(b)* advisers his Department has employed for more than six months in the last year; and what projects they were assigned to; [184741]

(3) how many *(a)* consultants and *(b)* advisers are currently paid from departmental programme budgets; and what the total associated costs are; [184742]

(4) how many *(a)* consultants and *(b)* advisers have been taken out of schools to work on his Department's projects. [184743]

Mr. Charles Clarke: Working in partnership and involving front line practitioners in policy thinking and system change is fundamental to our vision for managing the transformation of the education system. We consult regularly with schools and take advice from headteachers and teachers to support the development of our policies.

Authority to use consultants and advisers is delegated to Directorates and data on numbers is not recorded centrally. The cost of consultants charged to administration budgets in 2003–04 was £4.7 million. The cost charged to programmes is not recorded centrally and could only be provided at disproportionate cost.

Education (Nottingham)

Alan Simpson: To ask the Secretary of State for Education and Skills (1) how many teachers and teaching assistants posts will be lost at the end of the current school year in Nottingham City maintained schools; [184654]

(2) how much money Nottingham local education authority lost from its formula allocation by the imposition of a funding ceiling; and how many of the lost teaching posts this could have saved; [184655]

(3) what assessment he has made of the change in teacher numbers in Nottingham on educational standards in city schools; [184656]

(4) if he will make a statement on the funding of primary and secondary schools in Nottingham in 2005–06. [184657]

Mr. Miliband: The Department collects statistics on numbers of teachers and support staff in January each year and will be publishing the figures for January 2004 by local education authority in the autumn. These show an increase in full-time equivalent regular teachers in Nottingham City between 1999 and 2003 of 210 (10 per cent.). Schools make changes in their staffing levels every year in response to a range of issues including changing pupil numbers, new school priorities and the resources available to them.

The calculation of the Education Formula Spending Share has a floor and ceiling component which ensures that all authorities see a minimum increase per pupil which is in part funded by having a ceiling which imposes a maximum increase per pupil. In 2004–05 Nottingham City local education authority received the ceiling increase (6.8 per cent. per pupil) which reduced its Education Formula Spending Share by £2.8 million.

The funding allocation for each local education authority for 2005–06 will be announced in the provisional local government finance settlement in the autumn. However, every authority will receive an increase in the Schools Formula Spending Share of at least 5.5 per cent. per pupil. [Primary and nursery schools will receive a minimum funding increase per pupil of 5 per cent. and secondary schools of 4 per cent. where pupil numbers do not change.]

Grammar Feeder Schools

Mr. Chaytor: To ask the Secretary of State for Education and Skills how many eligible feeder schools there were in each of the last five years in *(a)* the state sector and *(b)* the independent sector for grammar schools subject to the feeder school provisions of the grammar school ballot regulations, broken down by local education authority in England. [184748]

Mr. Miliband: Responsibility for identifying qualifying feeder schools for the purpose of petitions and ballots to decide the future admission arrangements of grammar schools falls to the designated ballot administration company, Electoral Reform Services. Consequently, the Department does not collect this data.

Oversubscribed Schools

Mr. Brady: To ask the Secretary of State for Education and Skills pursuant to the oral answer of 8 July 2004, *Official Report*, column 1022, if he will publish the guidance and regulations which require schools wishing to expand to take account of *(a)* the local situation, *(b)* other schools in the area, *(c)* the adjudicator and *(d)* other factors. [185598]

Mr. Miliband *[holding answer 20 July 2004]*: The current statutory guidance to decision-makers and those wishing to publish proposals is available on the Department's website and hard copies are sent to interested parties on request. In deciding proposals for the expansion of schools, School Organisation Committees and Adjudicators are required to consider a range of factors including relevant local issues, the impact on neighbouring schools and the effect on standards in the area, though there is a "strong presumption" in favour of popular and successful schools being able to expand.

The Five Year Strategy document announced plans for a new fast track process to enable popular and successful schools to expand more quickly. We will consult on amendments to regulations, procedures and guidance in September. We intend that the decision on proposals will continue to be for the School Organisation Committee (SOC) or, where they cannot agree unanimously, the schools adjudicator. Decision-makers will continue to decide proposals on their merits, taking into account all relevant factors. The current strong presumption that proposals should be approved will be reinforced in revised guidance.

Partnership for Schools

Mr. Hoban: To ask the Secretary of State for Education and Skills if he will list the Board Members of Partnership for Schools indicating the other public sector appointments each member holds. [182506]

Mr. Miliband: The Board Members of Partnerships for Schools are all officials of the Department:

Stephen Crowne

Peter Stanton-Ife

Lorraine Chapman

The first two are also directors of Partnerships for Church of England Schools.

Post-16 Education (Stalybridge and Hyde)

James Purnell: To ask the Secretary of State for Education and Skills how much will be spent per learner in Stalybridge and Hyde in *(a)* school sixth-forms and *(b)* further education colleges in 2004–05. [185364]

Alan Johnson: The Department does not collect information on the level of funding per pupil in school sixth-forms and further education colleges at the local level. Mark Haysom, the Learning and Skills Council's Chief Executive will write to the hon. Member with details of funding provided for *(a)* school sixth-forms and *(b)* further education colleges in 2004–05 in the local area covering Stalybridge and Hyde. A copy of his letter will be placed in the House Libraries.

James Purnell: To ask the Secretary of State for Education and Skills what plans he has to provide specific funding to help further education colleges in Stalybridge and Hyde refurbish and rebuild their estates. [185365]

Alan Johnson: All of the Department's post-16 learning and skills sector capital investment is allocated to the Learning and Skills Council (LSC). The Department does not provide a specific budget to the LSC for rebuilding and refurbishing property in further education colleges at either the local or regional levels. It is for the LSC to determine for itself the right level of capital investment in further education colleges. Mark Haysom, the Council's Chief Executive, will write to the hon. Member on this matter. A copy of his reply will be placed in the House Libraries.

Private Finance Initiatives

Mr. Wood: To ask the Secretary of State for Education and Skills what provision has been made to protect schools against the risk of financial failure on the part of a private finance initiative contractor. [185399]

Mr. Miliband: Most PFI deals involve stand-alone special purpose vehicles (SPVs) with other investors and contractors, plus bank financing. It is a usual feature of PFI projects that the banks have the opportunity to step in and find a new contractor in the event of insolvency and we would expect the banks to do this. The Department for Education and Skills is not party to schools PFI contracts; these are between the local authority and the relevant consortium. Officials are ready to assist and advise local authorities if this should prove necessary.

School Admissions

Mr. Andrew Turner: To ask the Secretary of State for Education and Skills what estimate he has made of the cost to the education budget of *(a)* school admissions and appeals, *(b)* the School Adjudicator and *(c)* school admissions policy staff in his Department in the last year for which figures are available. [185242]

Mr. Miliband *[holding answer 20 July 2004]*: The Department does not collect data on expenditure by each local authority on the administration of school admissions and appeals. However, for the financial year 2004–05, LEA net planned budgets to cover this expenditure totals £46 million, or approximately £307,000 per local authority. This includes budgets for funding delegated to governing bodies of schools that are their own admission authority and administer the system themselves.

For the financial year 2003–04, outturn figures showed the total cost of the Schools Adjudicators and their support staff to be £637,572 and the total cost of school admissions policy staff to be £530,287.

School Meals

Mr. Edwards: To ask the Secretary of State for Education and Skills what encouragement is given to *(a)* local education authorities and *(b)* schools to source locally grown produce for school meals; and if he will make a statement. [185281]

Mr. Stephen Twigg: In 2003 the Department produced a purchasing guide for schools and LEAs that encourages them to source locally grown produce for school meals. In addition, there are case studies of good practice available on the Teachernet website at http://www.teachernet.gov.uk/.

Surplus Places Rule

Mr. Gibb: To ask the Secretary of State for Education and Skills when the surplus places rule was abolished. [184632]

Mr. Miliband: There has been no formal surplus places rule. In the past, local authorities bid for capital support for new pupil places in areas where there was pupil growth, to meet their statutory duty to provide sufficient school places. In assessing the bids, my Department took account of places in surrounding schools in coming to a view on how many additional places to support each year. However, capital funding for school buildings can come from a number of sources, including other capital programmes, authorities' own resources and agreements with developers.

From 2004–05, against a background of rising capital investment in school buildings, and in order to simplify the process for allocating resources on pupil places criteria, we have moved to making allocations by formulae.

In addition, from 2003–04 we have set up a dedicated capital stream and issued guidance that has a strong presumption in favour of expansion to enable successful and popular schools to expand.

INTERNATIONAL DEVELOPMENT

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for International Development how many copies of his Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183883]

Gareth Thomas: DFID's first departmental report was produced in 1998.

Between 1998 and 2002 publication of DFID's departmental report was handled by The Stationery Office Limited (TSO). The cost of production was met by DFID. The cost of printing was met by TSO. TSO provided an agreed number of copies to DFID and retained revenue from sales.

The following table includes the number of copies supplied to DFID, the number of copies issued by TSO and the production costs met by DFID. The total number of reports produced is not available, nor is the revenue earned by TSO.

	Copies supplied to DFID	*Copies issued by TSO*	*Cost of production met by DFID (£)*
1998	1,500	605	33,672
1999	2,662	531	65,051
2000	3,842	509	98,000
2001	5,000	547	81,576
2002	3,500	531	61,235

From 2003 the arrangements with The Stationery Office Limited (TSO) were changed. DFID handled both the production and print of the report itself, providing the required number of copies to TSO. TSO retain the revenue of any copies sold. The report is also available to download, free of charge, from DFID's website.

This second table includes the number of copies produced, the additional number of copies issued by ISO, and the cost of printing and production met by DFID.

	Copies produced by DFID	*Copies issued by TSO*	*Cost of printing and production by DFID (£)*
2003	3,000	440	76,480
2004	3,050	[1]351	45,000

[1] To date.

Haiti

Mr. Steen: To ask the Secretary of State for International Development what plans he has to address the HIV/AIDS epidemic in Haiti. [184330]

Mr. Gareth Thomas *[holding answer 20 July 2004]*: DFID is addressing the HIV/AIDS epidemic in Haiti primarily through its contribution to the Global Fund for AIDS, Tuberculosis and Malaria, and through its shareholding in the World Bank. Both organisations provide grants to Haiti's National Programme for HIV/AIDS.

The Global Fund approved two grants to Haiti amounting to US $25 million in late 2002. As a result, the National Programme accelerated its delivery of treatment and care to a target group of 500,000 poor people. So far, US $17 million has been disbursed.

The World Bank agreed a US$ 2.9 million grant to Haiti in early 2003 for the prevention and control of infectious diseases including HIV/AIDS. The grant is being implemented with the support of the Pan-American Health Organisation (PAHO) and the World Health Organisation (WHO). In addition, DFID has provided support to WHO/PAHO to help kick-start the provision of affordable Anti-Retro-Viral medicines globally, from which Haiti will benefit.

HIV/AIDS

Mr. Bercow: To ask the Secretary of State for International Development what measures he proposes to cater for women affected by AIDS and their children. [185547]

Mr. Gareth Thomas: The UK Government's new strategy, 'Taking Action: The UK's Strategy for Tackling HIV and AIDS in the Developing World', launched by the Prime Minister on 20 July 2004, prioritises women and young people. Chiefly, the UK Government will:

Support comprehensive programmes for women that address not only their access to sexual and reproductive health and rights but also access to education, employment and social protection.

Support efforts to promote girls' education and work to support programmes tackling gender violence and stigma and discrimination.

Strengthen the links between AIDS and Sexual and Reproductive Health programmes.

Make support for orphans and vulnerable children a cornerstone of our response, by dedicating at least £150 million over the next three years to address their needs, including through:

securing international commitment to UNICEF's Strategic Framework;

reflecting our commitment in the Country Assistance Plans in all affected countries; and

working on a range of interventions to assist keeping children productively in school, secure access to health care and social protection.

Support prevention and treatment programmes that meet the needs of marginalised groups.

Promote the greater involvement of people with HIV and AIDS—including women, young people and marginalized groups—in planning and delivering programmes.

Ensure the human rights of marginalised and vulnerable groups, including women and children, are given proper attention, including:

- supporting legislative reform to improve the human rights environment—including anti discrimination legislation, legislation to regulate the conduct of public institutions like the police, and to guarantee individuals access to services.

Working with the formal justice sector to make justice systems more responsive to human rights concerns and more accessible to vulnerable groups.

The UK Government will also support research to build the evidence base and contribute to effective AIDS programmes worldwide. DFID will work to help co-ordination and information sharing between the various research initiatives concerned with the delivery and the impacts of HIV treatment. In particular DFID will support research efforts, which address access to treatment by the poorest and most vulnerable, including women and children.

Mr. Bercow: To ask the Secretary of State for International Development what measures he proposes to take to tackle AIDS in Asia. [185581]

Mr. Gareth Thomas: DFID currently funds major HIV and AIDS programmes in eight countries in Asia[1], and supports regional initiatives to reduce the spread of infection and provide services for vulnerable groups. Fuller details are set out in the table on page 20 of the recently launched "Taking Action, the UK's Strategy for Tackling HIV/AIDS in Developing Countries".

DFID will continue to strengthen political leadership and public support for action in all the Public Service Agreement countries in Asia. DFID will intensify its support to national programmes including through non-Government organisations, for example, by supporting India's National AIDS Control Organisation and targeting vulnerable groups in Vietnam and Bangladesh.

DFID will assist the Chinese Government to expand the delivery of services for high risk populations in the poorest provinces of China, and to replicate the approach on a national basis.

[1] Bangladesh, Burma, Cambodia, China, India, Pakistan, Nepal, Vietnam.

International Aid (Water and Sanitation)

Peter Bottomley: To ask the Secretary of State for International Development by how much and by what proportion UK international aid spending on water and sanitation will change in the next three years. [185473]

Mr. Gareth Thomas: Total bilateral expenditure on water and sanitation represents approximately 6 per cent. of the Department for International Development's (DFID's) total bilateral aid budget—about £85 million per year over the last three years. DFID channels a significant proportion of its assistance through multilateral channels such as the European Union, the World Bank and UN organisations (£1.3 billion in 2001–02): of this DFID's contribution to water and sanitation is estimated at around £40 million per annum. DFID supports international initiatives aimed at raising the profile of water and sanitation and achieving better coordination. These include the Water Supply and Sanitation Collaborative Council; the Water and Sanitation Programme (attached to the World Bank); and the Global Water Partnership.

DFID does not budget on a sectoral basis. DFID's work and resource allocation is shaped by developing country priorities, notably through support to their poverty reduction strategies; by what other donors are doing; and by our comparative advantage. It is therefore not possible to predict with accuracy water and sanitation sector expenditures for future years. DFID recently published a Water Action Plan that outlines our commitment to ensuring that the water and sanitation targets are given the same international priority as the other MDGs.

Kenya

Tom Cox: To ask the Secretary of State for International Development what financial assistance, health and medical advice is being given to Kenya to combat HIV/AIDS; and if he will make a statement. [185018]

Hilary Benn: DFID is planning to spend £7.1 million during the next financial year to tackle HIV/AIDS. Most of this is to support the Government of Kenya's National Strategic Plan for HIV/AIDS. This strategy will work alongside non-governmental agencies to ensure that HIV/AIDS concerns are considered in all relevant Government activity. Among other initiatives, DFID is supporting the equitable delivery of Anti Retroviral Treatment (ART), including a communication strategy to reduce misuse, and Home Based Care especially for orphans. Alongside the United States Agency for International Development (USAID), DFID is also funding the social marketing of condoms, especially in rural areas.

In education, DFID has been training teachers to teach children about HIV/AIDS. This programme was found to delay the age at which both girls and boys have sex and increased the use of condoms by girls. DFID is therefore increasing this activity and expects to cover 5,000 schools over the next year.

Tom Cox: To ask the Secretary of State for International Development what financial assistance is being given to Kenya; and for which projects. [185019]

Hilary Benn: Last year, DFID's development assistance to Kenya was £29 million. This year our allocation has increased to £37 million. DFID's Country Assistance Plan makes provision to increase our development assistance to £50 million by 2005–06, but final decisions will depend on progress on the Kenyan Government's Economic Recovery Strategy, including its efforts to tackling corruption.

The following is a list of projects in Kenya that have approved funding for this year through bilateral assistance. There are a number of additional programmes that are being developed.

£ million

Project description	Allocation	Forecast spend 2004-05
ABLH Smallholder Marketing	2,819,000	406,423
Smallholder Dairy Project	2,007,000	322,968
Farm Africa—Goat Project II	1,453,000	355,892
Farming Systems Kenya	433,000	86,008
Sustainable Rural Livelihoods	120,000	34,385
Support to Kenya Land Reform	472,000	114,150
Sabatia Food Security Project	462,289	33,801

Total		31,957,347

Mr. Gregory Campbell: To ask the Secretary of State for International Development if he will make a statement on the progress being made to assist Kenya in the provision of *(a)* the roads network and *(b)* water distribution in the North West of the country. [185122]

Hilary Benn: DFID supports development work in North West Kenya through partners such as Oxfam and Water Aid Kenya (locally known as Maji na Ufanisi). This work includes long-term development and short-term humanitarian assistance carried out in close collaboration with the Kenya authorities and with local communities. The long-term development approach involves strengthening local organisations to press the Government to provide basic services, including roads and water, and at the same time building community capacity to provide services such as bore hole maintenance at local level.

Part of Oxfam's current work in response to the famine in the North West (which is supported by DFID) is the provision of water for domestic use (construction and rehabilitation of bore holes and pan/dams, well protection and other water points) for both domestic and livestock use. As a result of this, the pressure on water in the North West has been reduced even during this period of drought and famine.

Mr. Tynan: To ask the Secretary of State for International Development if he will make a statement about the accounting, auditing and anti-corruption safeguards in place in respect of schemes run by his Department in Kenya. [185666]

Hilary Benn: DFID's programme in Kenya is subject to the same rigorous safeguards as all our development assistance. These are intended to ensure that funds are spent sensibly, in line with our objectives and with minimal risk of fraud or misappropriation. For this reason, DFID is unable at present to provide poverty reduction budget support to the Kenyan Government, since we are not yet convinced that the Government are seriously committed to fighting corruption and are making good progress on their overall reform programme. However, we can make progress on the Millennium Development Goals by supporting specific sectors and projects.

DFID is also supporting the central Government systems that are intended to ensure that public financial resources are monitored and used more effectively.

DFID, alongside other donors, are also working to strengthen key institutions that are directly involved in fighting corruption. There is to be increased support to the Director of Public Prosecution, Kenya Anti-Corruption Commission and civil society organisations, such as Transparency International, that work to improve the transparency of public resources.

In continued dialogue with the Government, the UK has made clear to the Kenyan Government that allegations about unsatisfactory tendering and contracting procedures are serious and need to be fully investigated. DFID has remained categorical that firm action should be taken against those found to have acted corruptly. DFID has continued to press the Government to pass important legislation including the Public Procurement Bill, the Public Financial Management Bill, and the appointment of a credible Head of the Kenya Anti-Corruption Authority.

Mr. Jenkins: To ask the Secretary of State for International Development what plans he has to suspend aid to the Kenyan Government. [185852]

Hilary Benn: I am keeping the situation under close review, but have no plans to suspend our assistance to Kenya. Our assistance is designed to support long term change in Kenya that will lead to improved governance, and to help Kenya to make sustainable progress towards the MDGs. The faster the pace of reform, and the more conducive the environment, the faster progress we will make.

DFID's Country Assistance Plan (CAP), launched with the Government of Kenya last month, makes clear that we want to support the implementation of Kenya's Economic Recovery Strategy (ERS). Tackling corruption is a major priority of the ERS. DFID's CAP makes provision to increase our development assistance to £50 million by 2005-06, but final decisions will depend on ERS progress, including tackling corruption.

Palestinian Authority (Funding)/Territories

Mr. Jim Cunningham: To ask the Secretary of State for International Development what measures his Department

is taking to ensure transparency and accountability of (*a*) European Union and (*b*) other international funding to the Palestinian Authority. [185093]

Hilary Benn: Substantial progress has been made since 2002 in improving the transparency and accountability of the Palestinian Authority's (PA) financial management systems. This has largely been driven by the Palestinian Finance Minister with donor encouragement.

DFID supported a World Bank Country Financial Accountability Assessment which endorsed the major improvements made. It also identified key actions needed to further improve the systems. The recently established World Bank Public Financial Management Reform Trust Fund will also encourage further financial reform.

Disbursement of funding is conditional on the PA's achievement of certain agreed benchmarks. DFID has contributed, and the EC plans to contribute, to the trust fund. The World Bank and donors will carefully monitor the use of donor funds. This benchmark approach was also successfully used by the EC in its earlier budget support to the PA. Allegations about the misuse of these funds have been looked at in great detail, but no evidence has been found that EC funds have been used for anything other than their original purpose.

Mr. Jim Cunningham: To ask the Secretary of State for International Development what steps his Department is taking to monitor the extent of poverty in the Palestinian Territories. [185092]

Hilary Benn: Poverty in the Palestinian Territory has increased dramatically since the intifada started in September 2000. According to the latest World Bank report approximately 50 per cent. of Palestinians are living in poverty on less than $2.1 per day. 16 per cent. of the total population currently live in deep or absolute poverty on less than $1.5 per day. DFID monitors the situation closely through our engagement with, and support to, Palestinian partners and like-minded donors who seek to analyse and find ways of addressing the deepening crisis.

Mr. Jim Cunningham: To ask the Secretary of State for International Development what aid his Department has given to the Palestinian Territories. [185094]

Hilary Benn: DFID provides technical and financial assistance to the Palestinian Authority, the United Nations Relief and Works Agency for Palestinian Refugees, and Palestinian civil society. It aims to enhance the prospects for peace, make Palestinian governance and institutions more effective and accountable, and encourage more harmonised delivery of humanitarian and development assistance. DFID plans to spend £28.5 million on support to Palestinians in the current financial year.

South America (Aid)

Tony Baldry: To ask the Secretary of State for International Development if he will restore development aid to South American countries, with particular reference to Peru. [184887]

Mr. Gareth Thomas: DFID will continue to provide development assistance to South America through our contributions to multilateral institutions; through a regional bilateral programme, which will include support for Brazil and the Andean region to be managed out of our office in La Paz (from which Peru will benefit); and through central DFID support for non-governmental organisations working in the region. DFID remains committed to supporting poverty reduction in Peru through all these channels.

Sudan

Mr. Bercow: To ask the Secretary of State for International Development what discussions he has had with the United States Agency for International Development about joint approaches to other nations to seek contributions to humanitarian relief in Darfur. [185583]

Hilary Benn: The Department For International Development has a good working relationship with the United States Agency for International Development (USAID) and is in frequent contact, both in-country and between capitals, to ensure a co-ordinated approach when encouraging other donors to contribute to the humanitarian relief effort in Darfur. DFID plans to continue working with USAID on a donor lobbying strategy.

Mr. Bercow: To ask the Secretary of State for International Development what estimate he has made of the number of displaced women in Darfur, Western Sudan. [185584]

Hilary Benn: The United Nations has estimated the total number of Internally Displaced Persons (IDPs) in Darfur, Western Sudan at 1.2 million. UN agencies and non-governmental organisations (NGOs) are currently on the ground assessing the food, shelter and sanitation needs of these people. However, at this time the exact ratio of male to female IDPs is unknown.

Mr. Bercow: To ask the Secretary of State for International Development what estimate he has made of the number of deaths resulting from bombing by Sudanese Government aircraft of locations in Darfur near Chadian border towns in the first three weeks of June. [185586]

Hilary Benn: At present there is no information to confirm the bombing by Government aircraft of locations in Darfur near Chadian border towns. The ongoing deployment of the African Union-led Ceasefire Commission, to which DFID has contributed £2 million, should help increase the information from the ground.

Mr. Bercow: To ask the Secretary of State for International Development what estimate he has made of the number of villages in Darfur, Western Sudan, that have been destroyed by Sudanese Government forces and Janjaweed militias. [185587]

Hilary Benn: DFID is not able to verify which settlements have been destroyed by the Government of Sudan, Janjaweed militias, Sudanese Liberation Army

(SLA) or Justice and Equality Movement (JEM) forces. The Humanitarian Information Unit of the United States Department of State currently estimates the total number of villages destroyed at approximately 347. A further 96 are estimated to have been damaged but not destroyed.

It is not possible at this stage to determine the ethnicity of the people that occupied destroyed or damaged settlements. The African Union has begun investigations into reported infringements of the ceasefire. These investigations will help determine who is responsible for such infrmgements.

Mr. Bercow: To ask the Secretary of State for International Development what *(a)* financial and *(b)* other support has been provided by his Department to Sudan in each year since 1997. [185588]

Hilary Benn: I refer the hon. Gentleman to the following table.

£000

	Project or sector aid	*Programme aid*	*Technical cooperation*	*Aid and trade provision*	*Grants and other aid in kind*	*Humanitarian assistance*
1997–98	137	—	369	—	491	4,337
1998–99	115	—	176	—	413	23,497
1999–2000	106	—	15	—	319	2,755
2000–01	97	—	14	—	309	4,491
2001–02	93	—	34	—	322	5,149
2002–03	87	—	407	—	2,696	16,032
2003–04	90	—	291	—	3,445	20,836

	DFID debt relief	*Total DFID programme*	*CDC investments*	*Other*	*Total gross public expenditure*
1997–98	342	5,677	—	—	5,677
1998–99	—	24,201	—	—	24,201
1999–2000	—	3,196	—	—	3,196
2000–01	—	4,912	—	—	4,912
2001–02	—	5,598	—	—	5,598
2002–03	—	19,222	—	—	19,222
2003–04	—	24,663	—	—	24,663

Mr. Bercow: To ask the Secretary of State for International Development what representations he has made to the Government of Sudan about *(a)* the ratification of the International Labour Organisation Convention on the Prohibition and Elimination of the Worst Form of Child Labour and *(b)* the reflection of that ratification in national legislation. [185592]

Hilary Benn: Sudan ratified the International Labour Organisation Convention on the Prohibition and Elimination of the Worst Form of Child Labour on 7 March 2002. DFID's embassy in Khartoum raises human rights issues on a regular basis both bilaterally and multilaterally as part of the EU-Sudan dialogue.

PRIME MINISTER

Honours

Andrew Mackinlay: To ask the Prime Minister whether *(a)* his Office and *(b)* members of the general public are able to identify numbers of honours recipients by postcode; and if he will make a statement. [185271]

The Prime Minister: Details of honours recipients, including postal addresses are held centrally for administration purposes. However, full postal addresses are not made publicly available.

Cabinet Secretary

Mr. Gordon Prentice: To ask the Prime Minister what future role in security and intelligence matters he intends to give the Cabinet Secretary. [185635]

The Prime Minister: The Butler Review makes no specific recommendation on this point. Existing arrangements will continue.

Cyprus

Tom Cox: To ask the Prime Minister when he last visited the Republic of Cyprus; and which Cypriot politicians he met during that visit. [185017]

The Prime Minister: I have not visited the Republic of Cyprus.

Iraq (Briefing Papers)

Mr. Gordon Prentice: To ask the Prime Minister who commissioned the briefing papers on Iraq, referred to in paragraph 610 of the Butler Report; who decided not to circulate them to Cabinet Ministers; and for what reason. [185634]

The Prime Minister: Material on a range of issues related to Iraq was commissioned by the Cabinet Office Overseas and Defence Secretariat. The resulting papers were circulated to the Departments involved.

Iraq (Intelligence)

Adam Price: To ask the Prime Minister (1) whether *(a)* the head of MI6 and *(b)* the Chairman of the Joint Intelligence Committee were informed that SIS had withdrawn reporting in July 2003 from a source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable; [185688]

(2) whether *(a)* members of the Cabinet Office and *(b)* the Intelligence and Security Committee was informed that SIS had withdrawn reporting in July 2003 from a source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable; [185689]

(3) whether members of *(a)* his and *(b)* Cabinet Office staff were informed in July 2003 that the Secret Intelligence Service in that month had withdrawn reporting from a source who claimed that the production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable. [185788]

The Prime Minister: We have nothing further to add to the remarks that were made in yesterday's debate on Iraq.

Adam Price: To ask the Prime Minister when he was informed that SIS had withdrawn reporting from the source who claimed that production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable. [185690]

The Prime Minister: As my Official Spokesman made clear on 16 July, it was as a result of the Butler Review.

TRADE AND INDUSTRY

Business Link

Mr. Bellingham: To ask the Secretary of State for Trade and Industry if she will make a statement on the market penetration of business link operators. [185454]

Nigel Griffiths: Business Link Operators were used by around 606,000 customers in 2003–04 comprising 435,000 existing firms (representing a 40 per cent. growth in use by existing firms between 2002–03 and 2003–04) and 171,000 pre-start businesses. Expressed as a ratio of the Inter-Departmental Business Register of around 1.8 million firms (the largest official count), this is a market penetration rate of 34 per cent. in 2003–04.

A more detailed table is provided:

BLO usage—all customers, in-year cumulative

Percentage

	2001–02	*2002–03*	*2003–04*
Existing Businesses[1]	14	17	24
Pre-starts[1]	[2]n/a	[2]n/a	10
Total customer usage	—	—	34

BLO usage—all customers, in-year cumulative

Number

	2001–02	*2002–03*	*2003–04*
Existing Businesses	245,342	309,665	435,293
Pre-starts	[2]n/a	[2]n/a	170,749
Total customer usage	—	—	606,042

[1] Rate per 100 VAT and/or PAYE registered businesses.
[2] Pre-start users not available as an annual figure prior to 2003–04.

Business Regulations

Mr. Bellingham: To ask the Secretary of State for Trade and Industry if she will make a statement on the levels and cost of regulations imposed on business by her Department since 1997. [185536]

Nigel Griffiths: I refer the hon. Member to the written answer given by my right hon. Friend the Secretary of State on 5 January 2004, *Official Report*, column 124W.

Mr. Bellingham: To ask the Secretary of State for Trade and Industry how many new regulations her Department has introduced in the last year. [185537]

Nigel Griffiths: The number of statutory instruments (Regulations, Orders and Rules) introduced by the Department in 2003 was 145. A listing of DTI statutory instruments produced between 1991 and 2003 has been placed in the Libraries of the House.

During 2003 they include: The Enterprise Act 2002 (Commencement No. 1) Order 2003, The Competition Appeal Tribunal Rules 2003 and The Insolvent Companies (Disqualification of Unfit Directors) Proceedings (Amendment) Rules 2003.

Business Start-ups

Mr. Norman: To ask the Secretary of State for Trade and Industry how many new business start-ups there were in each year since 1995, broken down by industry. [185331]

Nigel Griffiths: Barclays Bank's latest survey of business creation includes non-VAT registered firms and shows that there were 115,000 business start ups in England and Wales in the fourth quarter of 2003. The latest yearly figures show 465,000 business start ups in England and Wales in 2003. This represents a 19 per cent. increase on the year before.

DTI figures based solely on UK VAT registrations by main industry group are shown as follows for the period 1995 to 2002. Data for 2003 will be available in Autumn 2004.

VAT Registrations 1995–2002

Thousand

	1995	*1996*	*1997*	*1998*	*1999*	*2000*	*2001*	*2002*
All industries	165.8	171.0	187.7	187.5	181.4	184.0	174.6	175.8

Other services	17.4	15.6	16.3	15.3	14.9	15.7	15.5	15.0

Source:
Business Start-ups and closures: VAT Registrations and De-registrations 1994–2002, Small Business Service www.sbs.gov.uk/statistics/analytical/vatstats.php

VAT registrations do not capture all start-up activity. Businesses are unlikely to be registered if they fall below the compulsory VAT threshold, which has risen in each year since 1995. Similarly, businesses that de-register will not necessarily have closed. Only 1.8 million out of 3.8 million enterprises were registered for VAT at the start of 2002.

Business Support

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what steps she has taken to evaluate the impact on skills of each of the business support products her Department launched in April. [183685]

Ms Hewitt: As part of its Review of Business Support, DTI carried out a review of evaluations of previous schemes and identified key success factors. This included assessment of the impact on skills, and on other drivers of productivity growth. The successful elements of previous schemes have been incorporated into the new business support products.

The new products are also subject to rigorous monitoring and evaluation, which includes measurement of the impact on skills.

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what assessment she has made of the overlap between the provision of business support products administered *(a)* directly by the Department and *(b)* by regional development agencies. [185457]

Ms Hewitt: The complex array of more than 100 DTI business support schemes that existed at the time of the DTI Review in 2001 has been replaced with a tighter, more targeted package of support based on nine business support products. The Department's work to transform its support to business specifically looked at the issue of overlap and duplication and this was addressed so that the new product set are broad in their scope and avoid duplication. The Department's externally led Investment Committee continues to provide independent scrutiny to ensure our investments in business support products deliver the economic and customer benefits we intend, and that we take action to address any weaknesses identified through rigorous evaluation. This work extends to ensuring that there is no overlap or duplication in DTI's business support offering.

With regard to regional development agencies (RDAs), DTI and the RDAs are working together with the specific aim of avoiding any overlap on the provision of business support products. RDAs have committed themselves to ensure that any new business support schemes or initiative they create will not duplicate or overlap existing DTI business support products. RDAs will seek to build on national DTI products by co-funding and tailoring them to meet regional needs where possible.

Mr. Bellingham: To ask the Secretary of State for Trade and Industry how many business support schemes are currently supported by her Department. [185491]

Mr. Timms: DTI has a set of nine business support products.

These are:

Support area	*Products*
Succeeding through innovation	Knowledge transfer networks Collaborative research and development Grant for investigating an innovative idea Grant for research and development Knowledge transfer partnership
Achieving best practice in your business	Access to best business practice Support to implement best business practice
Raising finance	Small firms loan guarantee
Regional Investment	Selective finance for investment in England

Mr. Bellingham: To ask the Secretary of State for Trade and Industry how much public funding has been spent on business support agencies in the last year. [185475]

Nigel Griffiths: The main business support agencies funded directly by the DTI are the Business Link Operators (BLOs) who provide services to small businesses.

In 2003–04 BLOs received Core Services grants from the Small Business Service totalling £139.5 million.

Most BLOs sub-contract the delivery of some of their services to Enterprise Agencies and other service deliverers as do other Government Departments, RDAs, and local authorities. European funds are also available in certain areas. The level of funding varies from BLO to BLO based on local needs, priorities and access to additional funding streams. The SBS does not systematically collect information on the level of service provision sub-contracted by BLOs.

Coal

Tom Cox: To ask the Secretary of State for Trade and Industry what the total tonnage of coal mined in England and Wales was during the last 12 months for which figures are available. [185336]

Mr. Timms: The information available on the amount of coal produced in England and Wales for the 12 months ended March 2004, in millions of tonnes, is as follows:

Tonnes million

	Deep mine	*Opencast*
England	14.1	3.7
Wales	0.6	1.1

A further 6.8 million tonnes, all from opencast mines, was produced in Scotland in the same period.

Source:
Coal Authority data as published in the Digest of UK Energy Statistics, 2004 to be published on 29 July 2004 and accessible through the DTI website Output is the tonnage declared by operators to the Coal Authority, including estimated tonnages.

Corporate Environmental Engagement Index

Norman Baker: To ask the Secretary of State for Trade and Industry what assessment has been made of the findings of the corporate environmental engagement index published by Business in the Community. [184555]

Mr. Timms: The Department has not made an assessment of the findings of the Business in the Community (BITC) corporate environmental engagement index. However BITC have published a report on the main sector trends from both the Business in the Environment and Corporate Responsibility Indices as "Benchmarking Responsible Business Practice" (www.bitc.org.uk).

The department contributes financially to the work on the Corporate Responsibility Index.

Departmental Audit

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry (1) if she will commission an independent audit of the activities of her Department and its sponsored agencies and non-departmental bodies between 1997–98 and 2003–04 with the purpose of establishing what proportion of the total departmental spending was inefficient over that period; [185458]

(2) what proportion of the reductions in core civil service posts in her Department by 2007–08 will be relocated to sponsored agencies in the regions. [185500]

Ms Hewitt: Sir Peter Gershon's report on his review of public sector efficiency, "Releasing Resources to the Front Line", sets out agreed efficiency targets for all Government Departments including DTI.

Procurement

DTI will aim to achieve savings by improving procurement through a combination of developing and implementing better purchasing practice, making better use of resources within technical and economic research, centralising marketing operations and moving to e-procurement, and savings on rent increases and building service costs by rationalising DTI's estate. This rationalisation involves reducing headquarters in London from six to three buildings over the Spending Review period.

Back Office Rationalisation and Abolition of Posts

My Department has developed plans that will enable it to deliver more efficiently DTI's priorities and responsibilities, as reflected in the spending plans announced by the Chancellor of the Exchequer last week. These plans will drive forward efficiencies in all areas of my Department's work, including:

- the rationalisation and streamlining of all our 'back office' services, including the processing of routine financial and personnel work and a reduction in the number of office support service posts following rationalisation of the Department's London estate from six buildings to three; and
- the adoption of a new approach to policy work involving the more effective prioritisation of policy projects and the centralised handling of routine policy enquiries and correspondence.

In conjunction with our estate rationalisation strategy, staff will also operate within a flexible workspace arrangement whereby there will be eight desks available for every 10 staff.

Business Support

DTI has conducted a review of its Business Support schemes ahead of the Spending Review with a view to working to clear high-level strategic objectives, increasing value created through the investment of taxpayers' funds, rigorous monitoring and evaluation, and improving the customer experience in dealing with DTI. Over 100 schemes have been rationalised into 10 new products, the last one of which will be introduced in 2005. The effectiveness of the new products and resultant efficiency savings will be realised over the Spending Review period.

Savings in the order of £20 million are projected by the end of the Spending Review period, as a result of closing inefficient schemes.

In addition, DTI is rationalising its use of third party contractors to deliver the new Business Support products. By consolidation of the contractor portfolio and more effective procurement, further cost savings of approximately £4 million a year are anticipated over the Spending Review period as the DTI's commitment to legacy schemes is exhausted. The level of support provided to business is expected to remain unchanged at around £500 million per annum.

Agencies and NDPBs

All of DTI's agencies and non-departmental public bodies are tasked with delivering efficiency gains over the Spending Review 2004 period. Over the Spending Review period, DTI expects the agencies and NDPBs to achieve some £15 million savings, the majority of which is cashable. It is anticipated that these savings will be achieved through a combination of continued delivery and increased output within a climate of reduced funding, reduced estate expenditure and reduced unit cost.

As Companies House, Patent Office are trading funds, and NWML is a net funded agency, they do not appear on DTI's Expenditure Limit and their savings are not claimed against the Department's 2.5 per cent. annual efficiency savings target. These bodies are, however, still expected to generate efficiency gains which

they intend to achieve through a number of measures i.e. e-delivery, reduced staff costs, and increased output/ reduced processing times.

Other than a very small number of Office of Science and Technology posts moving to the Research Councils in Swindon, there are no plans to meet DTI staff reduction targets by relocating posts from the core Department to sponsored agencies.

Audit of inefficient spend

DTI is committed to ensuring that all aspects of the Department, including its agencies and non-departmental bodies operate efficiently both now and going forward. We have just completed an efficiency project, reviewing efficiency in DTI, which was scrutinised by the Gershon Review. We continually review our activities as part of annual business planning to deliver greater value for money. We therefore have no plan to commission an in-depth audit of past activities—to do so would be an inefficient use of resources.

Departmental Expenditure

Mr. Randall: To ask the Secretary of State for Trade and Industry how much her Department spent on *(a)* mobile phone costs, *(b)* hospitality and *(c)* taxi costs in (i) 1996–97 and (ii) the latest year for which figures are available. [185377]

Ms Hewitt *[holding answer 20 July 2004]:* Information on spend for 1996–97 would be available only at disproportionate cost.

The latest information available is for 2003–04. Against a Department Expenditure Limit of £5.6 billion, spend on mobile phone costs was £279,000; spend on hospitality and entertainment costs was £1,121,000 and spend on taxi costs was £171,000. These figures are taken from the Department's financial records, and are subject to audit.

Mr. Randall: To ask the Secretary of State for Trade and Industry what the total cost of refurbishments to the fabric of buildings owned by the Department has been since May 1997. [185379]

Ms Hewitt *[holding answer 20 July 2004]:* My Department undertakes a wide variety of projects as part of ongoing maintenance and improvements of its current stock. The total capital cost of minor works, maintenance, and renovation projects involving significant works to the building services and fabric, since 1997 are as follows:

Financial Year	*£ million*
1997–98	2.0
1998–99	2.0
1999–2000	2.15
2000–01	1.8
2001–02	4.75
2002–03	2.20
2003–04	2.30

The additional expenditure incurred in Financial Year 2001–02 was due to the project to extend the conference facilities and associated services at 1 Victoria Street.

Mr. Swayne: To ask the Secretary of State for Trade and Industry how much her Department spent on press officers in *(a)* 1996–97 and *(b)* the latest year for which figures are available, broken down by grade. [185383]

Ms Hewitt *[holding answer 20 July 2004]:* The information is not held in the form requested and could be recovered only at disproportionate cost.

Environmental Impact Assessments

Norman Baker: To ask the Secretary of State for Trade and Industry what requirements are *(a)* in place and *(b)* proposed for businesses to provide an account of the (i) environmental and (ii) social impact of their activities. [184556]

Mr. Timms: We encourage business to provide information to a wide range of stakeholder interests on their social and environmental performance. To help business report on their environmental impacts we have published a series of voluntary guidelines, which cover subjects including greenhouse gas emissions, waste and water. We also support the Business in the Community Corporate Responsibility Index and the ACCA Annual Sustainability Reporting Awards.

We published draft Regulations on the Operating and Financial Review for consultation in May 2004. These proposals will require quoted companies to provide a narrative report giving a discussion and analysis of the company's business and the main trends and factors underlying the results and financial position of the business and likely to affect performance in the future. Where necessary to an understanding of the business, directors will need to include information on employees, the environment and social and community issues.

Export Credits Guarantee Department

Malcolm Bruce: To ask the Secretary of State for Trade and Industry (1) pursuant to the statement of 1 July 2004, Official Report, column 22WS, regarding the Export Credits Guarantee Department, if she will make a statement on the *(a)* financial objectives and *(b)* aims of the Trading Fund's Realisations account; [182760]

(2) which unrecovered claims outstanding with the Export Credits Guarantee Department will be transferred to the Trading Funds Realisations account; who the debtor is in each case; what the amount of outstanding debt is in each case; and what the project type is in each case. [182761]

Mr. Mike O'Brien *[holding answer 12 July 2004]:* The objective of the Realisation Account will be to maximise the asset value of the Account consistent with Government strategy on international debt. Details will be worked out during the pilot Trading Fund.

The unrecovered claims to be vested in the Realisations Account are those currently reported under Account 1 of ECGD's Resource Accounts, except that Account 1 unrecovered claims on heavily indebted poor countries (HIPC) are to be omitted. These will be handled outside the Trading Fund under the auspices of the Government's strategy on international debt.

As explained in my recent answers of 15 June 2004, *Official Report*, column 818W and 13 January 2004, *Official Report*, columns 696W, it is not possible to provide all the details that have been requested. However, I am able to supply, as follows, a market-by-market breakdown of all the unrecovered claims that ECGD will transfer to its Realisations Account.

£ sterling[1]

Market	*Unrecovered claims*
Algeria	100,209,724.83
Antigua and Barbuda	2,745,763.44
Argentina	31,705,358.61
Bahrain	69,465.62
Bosnia and Herzegovina	902,966.24

United States	3,207,078.66
Zimbabwe	987,401.12

[1] As at 30 June 2004.

Capitalisation for ECGD's Trading Fund has been based upon data related to 31 March 2003 and will be updated prior to inception of the Trading Fund.

Gershon Review

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry (1) what processes she aims to use to achieve the savings through improved procurement as part of Sir Peter Gershon's efficiency review into public services; and what parts of her Department's estate she intends to rationalise; [185023]

(2) what the estimated recyclable savings are that she anticipates making from her Department's agencies and non-departmental public bodies as part of Sir Peter Gershon's efficiency review into public services; and through what mechanisms she intends to achieve those savings; [185024]

(3) which back office functions she intends to rationalise as part of the implementation plan agreed as part of Sir Peter Gershon's efficiency review into public services; [185025]

(4) what measures she has put in place to increase the effectiveness of her Department's business support products; and what savings she expects to make from this activity as a result of the Gershon review of public sector efficiency; [185026]

(5) if she will provide details of the present activities of the posts in her Department due to be abolished as a result of the Gershon review of public sector efficiency. [185027]

Ms Hewitt: Sir Peter Gershon's report on his review of public sector efficiency "Releasing resources to the front line" sets out agreed efficiency targets for all Government Departments including DTI.

Procurement

DTI will aim to achieve savings by improving procurement through a combination of developing and implementing better purchasing practice, making better use of resources within technical and economic research, centralising marketing operations and moving to e-procurement, and savings on rent increases and building service costs by rationalising DTI's estate. This rationalisation involves reducing headquarters in London from six to three buildings over the Spending Review period.

Back Office rationalisation and abolition of posts

My department has developed plans that will enable it to deliver more efficiently DTI's priorities and responsibilities, as reflected in the spending plans announced by the Chancellor of the Exchequer last week. These plans will drive forward efficiencies in all areas of my Department's work, including:

the rationalisation and streamlining of all our "back office" services, including the processing of routine financial and personnel work and a reduction in the number of office support service posts following rationalisation of the Department's London estate from six buildings to three; and

the adoption of a new approach to policy work involving the more effective prioritisation of policy projects and the centralised handling of routine policy inquiries and correspondence.

In conjunction with our estate rationalisation strategy, staff will also operate within a flexible workspace arrangement whereby there will be eight desks available for every 10 staff.

Business Support

DTI has conducted a review of its Business Support schemes ahead of the Spending Review with a view to working to clear high-level strategic objectives, increasing value created through the investment of taxpayers' funds, rigorous monitoring and evaluation, and improving the customer experience in dealing with DTI. Over 100 schemes have been rationalised into 10 new products, the last one of which will be introduced in 2005. The effectiveness of the new products and resultant efficiency savings will be realised over the Spending Review period.

Savings in the order of £20 million are projected by the end of the Spending Review period, as a result of closing inefficient schemes.

In addition, DTI is rationalising its use of third party contractors to deliver the new Business Support products. By consolidation of the contractor portfolio and more effective procurement, further cost savings of approximately £4 million a year are anticipated over the Spending Review period as the DTI's commitment to legacy schemes is exhausted. The level of support provided to business is expected to remain unchanged at around £500 million per annum.

Agencies and NDPBs

All of DTI's agencies and non-departmental public bodies are tasked with delivering efficiency gains over the Spending Review 2004 period. Over the Spending Review period, DTI expects the agencies and NDPBs to achieve some £15 million savings, the majority of which is cashable. It is anticipated that these savings will be achieved through a combination of continued delivery and increased output within a climate of reduced funding, reduced estate expenditure and reduced unit cost.

As Companies House, Patent Office are trading funds, and NWML is a net funded agency, they do not appear on DTI's Expenditure Limit and their savings are not claimed against the Department's 2.5 per cent. annual efficiency savings target. These bodies are however still expected to generate efficiency gains which they intend to achieve through a number of measures i.e. e-delivery, reduced staff costs, and increased output/ reduced processing times.

Other than a very small number of Office of Science and Technology posts moving to the Research Councils in Swindon, there are no plans to meet DTI staff reduction targets by relocating posts from the core Department to sponsored agencies.

Audit of inefficient spend

DTI is committed to ensuring that all aspects of the Department, including its agencies and non-departmental bodies operate efficiently both now and going forward. We have just completed an efficiency project, reviewing efficiency in DTI, which was scrutinised by the Gershon Review. We continually review our activities as part of annual business planning to deliver greater value for money. We therefore have no plan to commission an in-depth audit of past activities—to do so would be an inefficient use of resources.

Internet Drug Sales

Clive Efford: To ask the Secretary of State for Trade and Industry what action her Department has taken to prevent companies from abroad advertising via the internet drugs for sale that are only available in the UK with a prescription from a general practitioner. [183495]

Mr. Timms: The responsibility for regulating medicines lies with the Medicines and Healthcare products Regulatory Agency (MHRA), which is an Executive Agency of the Department of Health. Accordingly, my officials will write to the Chief Executive of MHRA Professor Kent Woods asking him to respond directly to the hon. Member. Copies of the Chief Executive's letter will be placed in the Libraries of the House.

Manufacturing

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what action the Government are taking to promote manufacturing sector jobs *(a)* in Havering and *(b)* in the UK. [184250]

Jacqui Smith: With the Government's Manufacturing Strategy—the first for over 30 years—which we developed in partnership with industry, trade unions, and other stakeholders, we are taking a range of actions to create a modern manufacturing sector with a highly skilled, highly paid workforce. We published a review of the Government's Manufacturing Strategy on 15 July 2004, highlighting what has been achieved since the Strategy was established in May 2002. Details of the review are available at http://www.dti.gov.uk/manufacturing .

Manufacturers in Havering benefit from the actions the London Development Agency is taking to ensure a strong and sustained manufacturing base through its support of the London Production Industries Commission, and the London Manufacturing Advisory Service which has handled over 2,200 enquiries and added value of nearly £3 million a year to manufacturing companies in London in its first two years. The Centre for Engineering and Manufacturing Excellence in Dagenham also provides educational and training opportunities for local industry, including that of Havering, with access to leading edge technology through links with Ford, their suppliers and other local and international companies.

Metric Standardisation

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what assessment she has made of the effects on the UK of metric standardisation in terms of trade with *(a)* Europe and *(b)* the rest of the world; and if she will make a statement on the impact on British competitiveness of the transition to metric standardisation. [182741]

Mr. Sutcliffe: It is Government's understanding that many business sectors undertook metric standardisation in the 1960s and 1970s. The Department has no recent information on the extent to which particular sectors may not have undertaken metric standardisation.

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what plans she has to promote the completion of the UK's transition to metric standardisation. [182742]

Mr. Sutcliffe: The Government do not see a need to promote metric standardisation. All business sectors are free to undertake metric standardisation where they see benefits in doing so.

National Grid

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what discussions she has held with representatives of National Grid Transco regarding the maintenance of the grid system. [185453]

Mr. Timms: As part of the regular contracts Ministers and officials have with National Grid Transco, my right hon. Friend the Secretary of State met with Roger Urwin the company's Chief Executive on 9 February 2004. A range of issue were discussed at the meeting including those arising from the Engineering Inspectorate's investigation following the major power failures last year. Maintenance and repair were factors that were looked at as part of the investigation.

Nuclear Power Stations

Tom Cox: To ask the Secretary of State for Trade and Industry if she will list the age of each nuclear power station in the UK. [185338]

Mr. Timms: British Energy and BNFL's operational stations commenced operations in the following years:

British Energy

Year commenced	*Station*
1976	Hinkley Point B
1976	Hunterston B
1983	Dungeness B
1983	Heysham 1
1983	Hartlepool
1988	Heysham 2
1988	Torness
1995	Sizewell B

BNFL

Year commenced	*Station*
1966	Dungeness A
1966	Sizewell A
1968	Oldbury
1971	Wylfa

Post Offices

Tom Cox: To ask the Secretary of State for Trade and Industry how many *(a)* post offices and *(b)* sub-post offices have closed within the Greater London area during each of the last five years. [185340]

Mr. Timms: Data for Greater London are available from March 2000. The net closure figures for the London region are:

Year to end March	*Number*
2001	10
2002	16
2003	[1]44
2004	[2]155

[1] Including 11 under the urban reinvention programme.
[2] Including 142 under the urban reinvention programme.

Hugh Robertson: To ask the Secretary of State for Trade and Industry what estimate she has made of the number of people who use post offices threatened with closure at *(a)* The Green, Bearsted, *(b)* The Spires, Downswood and *(c)* Roseacre, Bearsted. [185159]

Mr. Timms *[holding answer 19 July 2004]:* This is an operational matter for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Privacy

Mr. Barnes: To ask the Secretary of State for Trade and Industry if she will make it her policy to require the manufacturers of phones with camera and video functions to incorporate an audible beep or ring when these functions are used in order to safeguard the privacy of those being photographed. [185627]

Mr. Timms: The Government have no plans to make this a policy requirement. Some mobile phone manufacturers already set their handsets to make a noise particularly when the camera function is used. We are aware that other manufacturers are reviewing their position in the light of concerns expressed by consumers etc.

Regional Development Agencies

Mrs. Spelman: To ask the Secretary of State for Trade and Industry what the *(a)* running costs and *(b)* total expenditure of each of the regional development agencies in England was for each year since each was established. [185008]

Jacqui Smith: I refer the hon. Member to the answer I gave the hon. Member for Cotswold (Mr. Clifton-Brown) on 11 May 2004, *Official Report*, column 247W.

Renewable Energy

Mr. Bellingham: To ask the Secretary of State for Trade and Industry if she will make a statement on the prospects for achieving the 2010 renewables energy target. [185545]

Mr. Timms: The target is challenging but we believe it remains achievable. We have worked hard to put an attractive system for new investment in place and the industry is responding.

There are many areas where there is still a great deal of work to be done such as the planning system both onshore and offshore and the development of the grid network. However, we are working closely with all the relevant interests, for example, via mechanisms such as the Wind Energy and Civil and Military Aviation Working Group, to ensure that any outstanding issues are resolved in a timely fashion.

The review of our primary support mechanism, the Renewables Obligation, will enable us to assess progress towards the target and consider in detail the points on incentives made by the final report of the House of Lords Science and Technology Committee, on the practicalities of renewables.

Special Advisers

Mr. Evans: To ask the Secretary of State for Trade and Industry how many of the reductions in the numbers of civil servants in her Department announced in the spending review will be of special advisers. [185482]

Ms Hewitt *[holding answer 20 July 2004]:* I refer the hon. Member to the reply given by my right hon. Friend the Chief Secretary on 20 July 2004, *Official Report*, column 190W.

WALES

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for Wales how many copies of his Department's and predecessor Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication cost and *(b)* sales revenue were. [183880]

Mr. Touhig: The costs for annual and departmental reports were as follows:

£

		Cost
2004	Annual Report	11,515
2003	Departmental Report	20,200
2002	Departmental Report	19,697
2001	Departmental Report	23,933

Note:

Information on 1999–2000 is not readily available and providing this information would require disproportionate cost. The Department only came into existence in 1999 so there were no reports prior to this.

The Wales Office produces 250 copies of the report each year for its own use and to lay in the House Libraries. The Wales Office does not sell copies of the report and as such does not receive any revenue from such sales.

The number of sale copies printed is a matter for The Stationery Office. The Wales Office receives neither revenue from these copies, nor sales figures for the report.

Departmental Publications (Storage)

Dr. Cable: To ask the Secretary of State for Wales how many departmental publications are in storage; and where they are located. [183863]

Mr. Touhig: The Wales Office have published a Departmental Report and a Departmental Resource Accounts Report annually from 2000 to 2003 through The Stationery Office. Copies of these reports are held in the London and Cardiff Offices.

In 2004, the Wales Office has published an Annual Report, replacing the Departmental Report, and a further Departmental Resource Accounts Report, both through The Stationery Office, as well as the Office's Welsh Language Scheme, which was produced internally. All of these are also held in the London and Cardiff offices.

Employment Tribunals

Malcolm Bruce: To ask the Secretary of State for Wales how many cases against his Department and its predecessor organisations have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent *(A)* settling and *(B)* contesting claims. [181467]

Mr. Touhig: The former Welsh Office records show that one case was brought against them in 1998 by an employee in relation to the Disability Discrimination Act, but the claim was not upheld. Information on how much was spent can only be obtained at disproportionate cost.

No claims have been brought against the Wales Office since its establishment on 1 July 1999.

EU Funding

Mr. Wiggin: To ask the Secretary of State for Wales what steps his Department has taken to increase the rate of implementation of EU funding programmes in Wales. [183023]

Mr. Hain: None. Responsibility for implementing the structural funds programme is a matter for the Welsh Assembly Government.

Health/Education Services

Mr. Wiggin: To ask the Secretary of State for Wales what cross-border measures he is undertaking to improve *(a)* health and *(b)* education services in Wales. [183175]

Mr. Touhig: I will answer this question in two parts:

(a) Whether a patient is resident in England or in Wales, they are offered NHS care at the most clinically and geographically appropriate location for their treatment. In border areas there are numerous examples of long established relationships between health commissioning bodies and treatment providers across the border.

(b) Pupils who live in England and attend schools in Wales are required to follow the national curriculum for Wales and vice versa. Schools on both sides of the border are free to choose examinations and qualifications from any of the awarding bodies irrespective of where those bodies are located.

Job Losses (Civil Servants)

Mr. Evans: To ask the Secretary of State for Wales how many of the reductions in the numbers of civil servants in his Department announced in the comprehensive spending review will be of special advisors. [185468]

Mr. Touhig: I refer the hon. Member to the answer given to him on 20 July 2004, column 190W, by the Chief Secretary to the Treasury.

Pay Systems

Malcolm Bruce: To ask the Secretary of State for Wales if he will place in the Library the most recent review of *(a)* his Department's pay systems and *(b)* the departmental equal pay action plan. [181354]

Mr. Touhig: Staff serving in the Wales Office have been on secondment or loan from other Government Departments—predominantly from the National Assembly for Wales. Their pay is therefore set by their home Departments rather than by the Wales Office.

Department for Constitutional Affairs staff working at the Wales Office since our merger in June 2003 fall under the DCA pay system and so are paid in accordance with the pay scheme of the DCA.

Richard Commission

Mr. Wiggin: To ask the Secretary of State for Wales whether changes in the constitutional position of Wales consequent on the report of the Richard Commission will be subject to a referendum. [183022]

Mr. Hain: The Richard Commission reported to the Welsh Assembly Government, which has not yet approached the Government with any representations concerning the report. When we receive such representations, we will give them full consideration, including whether they require a referendum.

CULTURE, MEDIA AND SPORT

Cultural Objects

Mr. Don Foster: To ask the Secretary of State for Culture, Media and Sport what discussions her Department has held in relation to the creation of a national database of stolen or otherwise tainted cultural objects in the last six months, with particular reference to discussions with *(a)* the Home Office, *(b)* the police, *(c)* bodies in the cultural sector and *(d)* other organisations; and if she will make a statement. [185678]

Estelle Morris: Officials within the Department worked jointly on a Home Office funded Options Appraisal, carried out by independent consultants. As part of that appraisal process, the police, bodies in the cultural sector, and other organisations, such as commercial providers of cultural databases, were invited to discuss their views. We are still considering how best to move forward in light of the findings of the report.

Departmental Expenditure

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport what the cost of running her Department's canteen facilities was in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185983]

Mr. Caborn: The information is as follows:

(a) DCMS did not have a canteen in 1996–97.

(b) A catering facility was opened in 2001 and in the 2003–04 year cost £67,431.

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport what the total cost of refurbishments to the fabric of buildings owned by her Department has been since May 1997. [185984]

Mr. Caborn: DCMS does not own any buildings; all buildings occupied by the Department are leased from commercial landlords.

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport what the total cost of printing departmental headed notepaper was in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185985]

Mr. Caborn: A record of expenditure at this level of detail within the overall stationery budget for 1996–97 is no longer available. The expenditure on headed notepaper in 2003–04, the last full year for which information is available, was £3,500

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport how much her Department has spent on *(a)* mobile phone costs, *(b)* hospitality and *(c)* taxi costs in (i) 1996–97 and (ii) the latest year for which figures are available. [186003]

Mr. Caborn: The information requested is included in the table. All expenditure on official hospitality is made in accordance with published departmental guidance on financial procedures and propriety, based on principles set out in Government guidance. The hospitality expenditure figure for 2003–04 reflects the changes made in 2002–03 in the way hospitality expenditure was captured to include associated staff costs following the contracting out of the hospitality service. Figures for 2004–05 are not available at present.

£000

	1996–97	2003–04
Mobile telephones	[1]—	35,000
Hospitality	41,000	[2]78,144.29
Taxi costs	16,914.69	[2]21,878.36

[1] It is not possible to provide an expenditure figure for mobile telephones in 1996–97 save at disproportionate costs.

[2] Provisional total pending finalisation of annual accounts.

Libraries

Mrs. Lait: To ask the Secretary of State for Culture, Media and Sport what plans she has to extend the Lending Time project to other library services using volunteers. [185498]

Estelle Morris: The Framework for the Future Action Plan contains a strategic objective to develop an inclusive library service that reflects and helps build cohesive communities. Volunteering is an integral component of this. Lessons will be drawn from the Community Service Volunteers (CSV) Lending Time project along with other experience of community engagement and used to develop a work programme which will take a wider approach to community engagement. The Museums, Libraries and Archives Council (MLA) are currently considering a proposal from CSV to provide expert advice and support through a national post funded by Framework for the Future. This person would work with a group of key partners as an advisory group to the work programme.

Mrs. Lait: To ask the Secretary of State for Culture, Media and Sport what steps she is taking to implement the recommendations made in Shared Intelligence, the evaluation report of the Lending Time project. [185510]

Estelle Morris: The recommendations from the Shared Intelligence evaluation report will be used by the Museums, Libraries and Archives Council (MLA) to develop a work programme widening the library approach to community engagement. The experiences from the Lending Time project will be used to ensure that volunteering will be an integral part of this work programme. Funding will come from the Framework for the Future Action Plan and a plan is currently being considered to include a national post at MLA for a member of Community Service Volunteers (CSV), who led the Lending Time project, to provide expert advice and support to the work programme alongside an advisory group of experts.

Mr. Chris Smith: To ask the Secretary of State for Culture, Media and Sport what plans she has for a second phase of the Lending Time: Volunteers in Libraries initiative. [185769]

Estelle Morris: Lending Time was an agreed three-year project and has now come to an end. The lessons drawn from the project and the recommendations from the evaluation report will be used by the Museums, Libraries and Archives Council (MLA) to support the development of a wider strategy of community engagement for libraries. This will encompass volunteering within a range of initiatives and will be funded through the Framework for the Future Action Plan. In order to utilise the experiences from the Lending Time project further, MLA are currently considering funding a national post for a member of Community Service Volunteers (CSV) to support and advise the development of this strategy.

Recruitment and Employment Costs

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport if she will publish the *(a)* recruiting and *(b)* salary and other employment costs associated with the post of (i) Chairman of the UK Film Council, (ii) Chairman for the Commission for Architecture and the Built Environment and (iii) Chairman of the Museum, Libraries and Archives Council. [184372]

Estelle Morris: The direct costs associated with the three public appointments referred to are set out as follows. The average cost of officials' time in running an appointments process, based on 2003–04 figures, was £2,500 per campaign.

(i) UK Film Council

Cost of advertising—£14,491.74

Chair's remuneration—The post is unpaid. However, £198 per day may be claimed, plus travel and subsistence. The time requirement for the post is four days on average per month.

(ii) Commission for Architecture and the Built Environment

Cost of advertising—£14,093.81

Chair's remuneration—£45,000 per annum plus reasonable expenses.

(iii) Museum, Libraries and Archives Council

Cost of advertising—£12,477.06

Chair's remuneration—£32,640 per annum plus reasonable expenses.

School Athletics

Mr. Alan Campbell: To ask the Secretary of State for Culture, Media and Sport (1) what support her Department gives to the English Schools' Athletic Association; [185878]

(2) what representations her Department has received regarding the future of the English Schools' Athletic Association; [185879]

(3) what action her Department has taken to promote athletics in schools. [185880]

Mr. Caborn: This Department provides no funding support to any schools sport association. It is Government policy that schools sport associations work closely with, and receive their core funding from, the governing bodies for their sports. DCMS officials and Ministers have held regular discussions with officers of the English Schools Athletic Association and UK Athletics over the past year about the future of competitive schools athletics. This is an issue that will be taken forward over the coming months by UK Sport and Sport England as part of the Foster Review implementation.

DCMS, the Department for Education and Skills and Sport England are supporting the secondment of a Development Manager to the National Council for School Sport. He is working with schools sport associations—including athletics—to embed competitive school sport in governing body one-stop/whole sport plans and to ensure that schools competition structures dovetail with the new infrastructure being established under the national strategy for PE, School Sport and Club Links.

The results of the 2003/04 PE, School Sport and Club Links Survey showed that athletics is the fourth most popular sport in school sport partnership schools (provided in 90 per cent. of schools) and the fourth most popular in terms of links between schools and clubs (32 per cent. of schools with links to clubs). Athletics is one of 22 sports receiving funding from the Club Links programme to increase the number of such links.

Special Advisers

Mr. Evans: To ask the Secretary of State for Culture, Media and Sport how many of the reductions in the numbers of civil servants in her Department announced in the Spending Review will be of special advisers. [185478]

Mr. Caborn *[holding answer 20 July 2004]:* I refer the hon. Member to the answer given by my right hon. Friend the Chief Secretary to the Treasury on 20 July 2004, *Official Report*, column 190W.

Tourism

Tony Lloyd: To ask the Secretary of State for Culture, Media and Sport if she will make a statement on the work of regional development agencies in developing tourism in Manchester Central. [184170]

Mr. Caborn: The North West Development Agency (NWDA) is working closely with Marketing Manchester, the nominated Destination Management

Organisation (DMO) for Manchester. DMOs are effectively mini tourist boards that will ensure a strong visitor and market focus to all that is done within the region, and aim to strengthen the connection that exist within the region between businesses and other organisations that make up the tourism sector.

Marketing Manchester also has a key role in securing funds for tourism development from the NWDA. Hence any funding for Manchester Central would need to be secured via that route. During 2003-04 Marketing Manchester received £898,000 to promote and develop tourism within the sub region. A similar amount has been identified to support their work during 2004-05.

Unfortunately at this stage NWDA cannot show a specific breakdown of funding provided to Manchester Central but the impact of NWDA funding to Marketing Manchester will certainly have been beneficial to the Manchester Central tourism product.

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport how many visitor attractions have signed up to the Visitor Attraction Quality Assurance Scheme. [186034]

Mr. Caborn: The Visitor Attraction Quality Assurance Service (VAQAS) has accredited 510 visitor attractions.

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport what the rate of productivity in the tourism industry has been in each of the last 10 years; and what criteria are used to measure these rates. [186036]

Estelle Morris: The Department estimates the rate of change of labour productivity in Tourism.

Data is derived from the Annual Business Inquiry, carried out by the Office for National Statistics. This takes the form of estimates of Gross Value Added and numbers in employment. Productivity is estimated as the ratio of Gross Value Added to numbers in employment, and the rate of change from one year to the next is calculated.

Information has been collected in its present form only since 1998. The latest figures are those for 2002.

The figures are as follows:

	Percentage
1998-99	+ 3.1
1999-2000	+ 4.0
2000-01	+ 2.5
2001-02	+ 4.6

SCOTLAND

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for Scotland how many copies of his Department's and predecessor Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication cost and *(b)* sales revenue were. [183882]

Mrs. McGuire: The Scotland Office was established on 1 July 1999.

The Scotland Office has had 150 copies of its Annual Report printed each year since 1999. The report is also available on the Office's website.

The printing costs to the Scotland Office were as follows:

	£
1999-2000	1,020
2000-01	3,160
2001-02	3,869
2002-03	4,036
2003-04	4,119

Other costs of printing and publication of the report are met directly by the publisher, The Stationery Office Limited (TSO), and did not fall to the Government. TSO recoups these costs through sales and uses its commercial judgment as to the number of copies printed. The numbers sold and the revenue from sales are matters for the publisher.

Departmental Staff

Mr. Bacon: To ask the Secretary of State for Scotland who the Finance Director of *(a)* the Scotland Office and *(b)* the Registers of Scotland is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts in each of the last five years. [183456]

Mrs. McGuire *[holding answer 14 July 2004]:* The Scotland Office is a distinct entity within the Department for Constitutional Affairs. The Head of Finance at the Scotland Office is Norman Kernohan. He does not hold a professional accountancy qualification but he has full access to advice from professionally qualified staff in both the DCA and the Scottish Executive. The Scotland Office was established on 1 July 1999 and since that date none of its accounts have received a qualified opinion.

Questions about the Registers of Scotland are a matter for the Scottish Executive.

Public Relations

Dr. Cable: To ask the Secretary of State for Scotland what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183859]

Mrs. McGuire: The Scotland Office was established on 1 July 1999. The Office has no staff working solely on public relations or publicity. The cost of press office staff was as follows:

	£
1999-2000	[1,2]44,078
2000-01	139,705
2001-02	134,702
2002-03	[2]99,166
2003-04	[3]111,202

[1] Part year cost from 1 July 1999.
[2] Part year cost because of vacancies.
[3] Estimated.

Travel Costs

Dr. Cable: To ask the Secretary of State for Scotland what the travel costs were of civil servants in *(a)* his Department and *(b)* its predecessor Department in each year since 1997. [183891]

Mrs. McGuire: The Scotland Office was established on 1 July 1999.

The following table shows the overall expenditure costs of civil servants in the Scotland Office and the Office of the Advocate-General on travel and subsistence since that date.

	£
1999–2000	[1]179,669
2000–01	318,858
2001–02	330,496
2002–03	346,373
2003–04	[2]264,407

[1] Part year: the Scotland Office was established on 1 July 1999.
[2] Financial year 2003–04 costs are provisional, pending finalisation of Annual Accounts.

All official travel is undertaken in accordance with the rules contained in the Civil Service Management Code.

Departmental Publications (Storage)

Dr. Cable: To ask the Secretary of State for Scotland how many departmental publications are in storage; and where they are located. [183860]

Mrs. McGuire: Most of the publications for the Scotland Office and the Office of the Advocate-General are produced on our behalf by commercial publishers, such as The Stationery Office. The retention and storage of items published commercially are matters for the publishers. Policy divisions with the Office retain small quantities of publications for working purposes. Details of recent publications are on the Scotland Office website, www.scottishsecretary.gov.uk.

TREASURY

Amateur Sports Clubs

Mr. Don Foster: To ask the Chancellor of the Exchequer what further benefits for community amateur sports clubs he plans to introduce; and if he will make a statement. [185012]

John Healey: The 2004 Spending Review has made increased funding available to sport. The benefit to Community Amateur Sports Clubs (CASCs) will depend on the spending plans of the Department for Culture Media and Sport. The Government are keen to ensure that as many eligible amateur sports clubs as possible benefit from the tax and other reliefs available to CASCs. The Chancellor will continue to keep the scheme under review in the context of the annual Budget process.

Bank of England (Regional Offices)

Mrs. Spelman: To ask the Chancellor of the Exchequer if he will list the Bank of England's regional offices; and what their annual expenditure was in each of the last five years. [184976]

Ruth Kelly: The following table provides the annual expenditure of the Bank's regional agencies for the last five years:

£000

Region	*Location*	*Financial Year from 1 March*				
		1999–2000	*2000–01*	*2001–02*	*2002–03*	*2003–04*
South West	Bristol/Exeter	422	397	407	502	526
West Midlands	Birmingham	488	391	437	456	439
Scotland	Glasgow	396	382	435	498	531
Yorkshire and the Humber	Leeds	—	283	393	448	425
North West	Liverpool/Manchester	1,097	644	584	689	611
Northern Ireland	Belfast	334	228	255	281	305
North East	Newcastle upon Tyne	367	360	390	401	349
Central Southern	Southampton	421	412	457	499	446
Wales	Cardiff	407	349	383	452	407
East Midlands	Nottingham	355	323	336	400	355
South East and East Anglia	Cambridge	299	412	440	519	468
London	London	69	259	280	332	286
Total		4,656	4,442	4,799	5,477	5,150

Childcare Tax Credit

Mr. Willetts: To ask the Chancellor of the Exchequer how many applications for the childcare tax credit have been *(a)* rejected and *(b)* initially paid and then rejected as invalid. [185695]

Dawn Primarolo: This information is not readily available and could not be obtained without incurring disproportionate cost.

Mr. Willetts: To ask the Chancellor of the Exchequer (1) what his estimate is of the average time between submission of an application for a childcare tax credit and the first payment; [185702]

(2) what the length is of the average claim for childcare tax credit. [185704]

Dawn Primarolo: Claims for the childcare element of the working tax credit are made as part of a single claim for child and working tax credits. For the time taken to process such claims, I refer the hon. Member to my reply to the hon. Member for Truro and St. Austell (Matthew Taylor) on 8 September 2003, *Official Report*, columns 21–22W.

Departmental Accounting Practice

Mr. Bacon: To ask the Chancellor of the Exchequer who the Finance Director of *(a)* the Treasury, *(b)* the

Inland Revenue Trust, *(c)* Customs and Excise, *(d)* the Government Actuary's Department, *(e)* the Crown Estate, *(f)* the Royal Mint, *(g)* the Office of National Statistics, *(h)* National Savings and Investments and *(i)* Inland Revenue is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts of each in the last five years. [183419]

Ruth Kelly: The answer is as follows.

Department	*Finance Director*	*Accountancy qualifications*
HM Treasury	Mrs Hilary Douglas (Managing Director, Corporate Services)	None, but supported by a fully qualified Head of Finance
	Ms Mary Keegan (from 1 September 2004)	Fellow, Institute of Chartered Accountants
Customs and Excise	Ms Alison French	None, but supported by a qualified and experienced team
Government Actuary's Department	Mrs Kim Clegg	Associate, Chartered Institute of Management Accountants
The Crown Estate	Mr John Lelliott	Fellow, Association of Chartered Certified Accountants
The Royal Mint	Mr Huw Edwards	Associate, Institute of Chartered Accountants
Office for National Statistics	Mr Peter Murphy	None
National Savings and Investments	Mr Trevor Bayley	Fellow, Institute of Chartered Accountants
Inland Revenue and The Inland Revenue Trust	Mr Stephen Jones	None

As to the qualification of the accounts of the Chancellor's departments, I refer the hon. Member to the accounts themselves.

Departmental Annual Report

Dr. Cable: To ask the Chancellor of the Exchequer how many copies of his Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication costs and *(b)* sales revenue were. [183884]

Ruth Kelly: Publication of HM Treasury's Departmental Report is handled by The Stationery Office Ltd. (TSO), who are responsible for determining print runs and for selling copies of the report. Sales figures for the previous seven years are as follows:

Edition	*Copies issued by TSO*
1998	589
1999	524
2000	484
2001	547
2002	465
2003	426
2004	306

Printing and publication costs for the Treasury Departmental Report are met by The Stationery Office Ltd. (TSO) and in recent years the document has been designed in-house by members of the Treasury's publishing unit.

For information on direct publication costs incurred by the Treasury in previous years, I refer the hon. Gentleman to the answer given by the former Financial Secretary to the Treasury, the right hon. Member for Brent South (Mr. Boateng), to the right hon. Member for Berwick-upon-Tweed (Mr. Beith) on 24 July 2002, *Official Report*, column 1190W.

Employment (Over-65s)

Mr. Hepburn: To ask the Chancellor of the Exchequer how many people over 65 years have been in work in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* Tyne and Wear and *(d)* the UK in each year since 1997. [184519]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mr. Stephen Hepburn dated 21 July 2004:

The National Statistician has been asked to reply to your recent Parliamentary Question asking about the number of people over 65 in employment in *(a)* the Jarrow constituency, *(b)* South Tyneside, *(c)* Tyne and Wear and *(d)* the UK in each year since 1997. I am replying in his absence. (184519)

The attached table gives estimates of the number of people aged 65 and over in employment in Tyne and Wear and the United Kingdom for the three months ending in May of each year from 1997 to 2004. However, the Office for National Statistics' Labour Force Survey (LFS) sample size is too small to give reliable estimates for the Jarrow Parliamentary Constituency and the South Tyneside Unitary Authority.

As with any statistical sample survey, estimates from the LFS are subject to sampling variability.

People 65 and over in employment

£000

3 months ending May each year	*UK*	*Tyne and Wear*
1997	432	4
1998	444	3
1999	464	3
2000	459	4
2001	421	3
2002	477	3
2003	525	3
2004	540	6

Source:
ONS Labour Force Survey.

Fuel Taxation

Mr. Wiggin: To ask the Chancellor of the Exchequer if he will reduce fuel taxation. [185204]

John Healey: I refer the hon. Member to the answer I gave him on 13 July 2004, *Official Report*, column 1014W.

Mr. Wiggin: To ask the Chancellor of the Exchequer if he will take steps to use funds raised from road and fuel taxes specifically for road construction and improvement projects. [185205]

John Healey: Revenue from any particular tax is not generally earmarked to any particular part of the public spending programme. However, the Government have a commitment to ring fence any revenue from fuel duty increases above inflation to improving public transport and modernising the road network.

Government Offices (East Midlands)

Mr. Dorrell: To ask the Chancellor of the Exchequer how many full-time equivalent employees of the Inland Revenue in the east midlands there were in each year since 1997. [185493]

Dawn Primarolo: The numbers of full-time equivalent employees of the Inland Revenue in the Government East Midlands region on 1 April each year since 1997 were:

	Number
1997	3,714
1998	3,807
1999	3,951
2000	4,010
2001	4,060
2002	4,080
2003	4,385
2004	4,368

The reasons for changes in staff numbers in a single Government region are difficult to accurately measure as they do not reflect organisational divisions within IR or changes in organisational design over the period. Nationally, Inland Revenue growth since 1997, of which a proportion will be reflected within East Midlands, can be attributed to workload growth, spend to save initiatives, programmes such as the Grabiner review of the informal economy, mergers with the contribution and benefit agencies and the introduction of new tax credits work.

Green Minister

Mr. Horam: To ask the Chancellor of the Exchequer if he will make a statement on the activities of the Green Minister in the Department in financial year 2003–04. [185130]

John Healey: As the Treasury's Green Minister, I am committed to improving the environmental impact of the Department's operations, to integrating environmental considerations across policy areas, and to improving the economic analysis underpinning the Government's environmental initiatives.

In the financial year 2003–04, as the Treasury's Green Minister my work included the development of a range of environmental policy measures including those announced in the pre-Budget report on 10 December 2003 and Budget on 17 March. It also included membership of the Ministerial Sub-Committee on Green Ministers and the Sustainable Development Taskforce, and meetings with representatives of non-governmental organisations and other key stakeholders on topics ranging from climate change to waste to aviation.

MRSA (Frimley Park Hospital)

Andrew Mackinlay: To ask the Chancellor of the Exchequer if he will investigate the practice at Frimley Park Hospital of not recording MRSA on death certificates where it was the cause or a contributory cause of death; and if he will make a statement. [184667]

Ruth Kelly: The information requested falls within the responsibility of the Registrar General for England and Wales, who has been asked to reply.

Letter from Len Cook to Mr. Andrew Mackinlay, dated 21 July 2004:

As Registrar General for England and Wales, I have been asked to reply to your recent question asking if the Chancellor will investigate the practice at Frimley Park Hospital of not recording MRSA on death certificates where it was the cause or a contributory cause of death. (184667)

The Births and Deaths Registration Act 1953 places an individual responsibility on the medical practitioner in attendance on the deceased to certify the cause of death to the best of his or her knowledge and belief, rather than on any organisation. The Registrar General has no specific power to instigate an inquiry into an accusation of this nature. Coroners can only investigate where a death is referred to them.

The Government published a position paper on death certification and Investigation in March 2004 outlining proposals for reform. In the interim, the General Register Office will be issuing guidance to all doctors on the best practice for death certification under current legislation. This will remind them of their duty to certify the cause of death to the best of their knowledge and belief, recording each condition which contributed to the death.

There were 7 deaths in Frimley Park Hospital in the years 2000 to 2002 where the cause of death was wholly or partly attributable to MRSA[1].

[1] Identified using the methodology described in Griffiths C, Lamagni TL, Crowcroft NS, Duckworth G and Rooney C (2004) Trends in MRSA in England and Wales: analysis of morbidity and mortality data for 1993–2002. Health Statistics Quarterly 21, 15–22.

Objections to Ministerial Decisions

Mr. Gordon Prentice: To ask the Chancellor of the Exchequer if he will list occasions since 1992 when a Permanent Secretary in his or her role as accounting officer has lodged a note of dissent formally objecting to a ministerial decision. [185628]

Ruth Kelly: I refer the hon. Member to the answer I gave the hon. Member for Lewes (Mr. Norman Baker) on 24 March 2004, *Official Report*, column 839W.

Office for National Statistics

Mrs. Spelman: To ask the Chancellor of the Exchequer what the estimated expenditure by the Office for National Statistics in compiling regional-level statistics and indicators was in the most recent year for which figures are available. [184977]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Colin Mowl to Mrs. Caroline Spelman, dated 21 July 2004:

The National Statistician has been asked to reply to your recent question concerning what the estimated expenditure by the Office for National Statistics in compiling regional-level statistics and indicators was in the most recent year for which figures are available. I am replying in his absence. (184977)

The estimated expenditure relating to the Regional and Local Division and the Regional Accounts branch of the Office for National Statistics (ONS) was £1.1 million 2003/04. These work areas have responsibility for the production of a range of statistics and analyses at Government Office region level (including sub-regional figures as appropriate).

There is also significant expenditure by ONS on the Neighbourhood Statistics programme, which primarily addresses the need for statistics for smaller local area, to inform neighbourhood renewal initiatives.

In addition, many work areas in ONS produce regional-level statistics as part of their routine statistical outputs. However, an estimate of the total expenditure across ONS on the production of regional-level statistics would be very approximate and could only be produced at disproportionate cost.

The Allsopp Review of Statistics for Economic Policy Making, whose final report was published in March 2004, made a number of recommendations for improving regional statistics in the UK. In the Government's recent 2004 Spending Review ONS was given the objective of implementing the recommendations of the Allsopp Review. As a result a higher level of ONS's resources will be allocated to regional statistics work than has been the case in recent years.

Oil Price

Mr. Chaytor: To ask the Chancellor of the Exchequer what assessment he has made in recent economic forecasts of the price per barrel of oil in each of the next five years; and if he will make a statement. [184744]

Ruth Kelly: The assumption underlying the public finance projections, audited by the NAO is stated in Box C1, page 251 of the 2004 FSBR.

Pension Schemes (Public Sector)

Mr. Willetts: To ask the Chancellor of the Exchequer how many workers have joined each public sector pension scheme in each year since 1997–98. [185710]

Ruth Kelly: This information is not held centrally and could be collected only at disproportionate cost.

Policy (Environmental Impact)

Mr. Horam: To ask the Chancellor of the Exchequer how many new policy proposals or significant changes in policy were produced in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185100]

John Healey: Chapter 7 of the 2003 and 2004 Budget books (HC 500 and HC 301) shows how budget measures sit alongside other policies as part of the Government's approach to the environmental elements of sustainable development and sets out the environmental impacts of measures introduced in recent Budgets that have a significant effect on the environment or which serve an environmental purpose (Tables 7.1 and 7.2).

A Regulatory Impact Assessment (RIA) is produced for all major Budget measures. From spring this year the RIA includes a requirement to consider environmental impacts.

Regional Productivity Growth

Mr. Stephen O'Brien: To ask the Chancellor of the Exchequer what plans he has to measure productivity growth by region following the 2004 Spending Review Key Performance Agreement with the Department of Trade and Industry to make sustainable improvements in the economic performance of all English regions. [185509]

Ruth Kelly: The 2002 Spending Review introduced a joint target for the Treasury, Department of Trade and Industry and the Office of the Deputy Prime Minister to improve the growth rate in every English region and over the long term reduce the persistent disparities in growth rates between the regions. In Scotland, Wales and Northern Ireland regional development is substantially devolved.

The Technical Note published after the 2002 Spending Review, available on the Departmental websites, sets out how this target will be measured, looking at regional Gross Value Added per head figures produced by the Office for National Statistics. The 2004 Spending Review has reaffirmed this target, and an updated Technical Note will be published on 31 July.

It was also announced that the Office for National Statistics will implement the recommendations of the Allsopp Review in full, which in its final report in March, set out the implications of the regional agenda for economic statistics.

In addition, the Treasury and DTI published a consultation document, Productivity in the UK 5, in March on how progress against productivity, and the drivers of productivity, could best be monitored. A full response to Productivity 5 will be made available soon.

Stamp Duty (Residential Property)

Mr. Prisk: To ask the Chancellor of the Exchequer if he will estimate the revenue implication of restructuring stamp duty on residential property sales to charge marginal rates of *(a)* 0 per cent. on property sales of £120,000 or less, 2 per cent. on sales revenue between £120,000 and £249,999, 5 per cent. on sales revenue between £250,000 and £499,999, 8 per cent. on sales revenue of £500,000 and above, *(b)* 0 per cent. on property sales of £120,000 or less, 3 per cent. on sales revenue between £120,000 and £249,999, 5 per cent. on sales revenue equal to £250,000, 8 per cent. on sales revenue of £500,000 and above and *(c)* 0 per cent. on property sales of £120,000 or less, 3 per cent. on property sales between £120,000 and £249,999, 5 per cent. on sales revenue of £250,000 and 7 per cent. on sales revenue of £500,000 and above. [185385]

Ruth Kelly: The estimated revenue cost, in 2005–06, of restructuring stamp duty on residential property sales

according to the three schemes described in the question is given in the following table:

Price of residential property	Tax regime 1 Marginal rates	Tax regime 2 Marginal rates	Tax regime 3 Marginal rates
£0 to £119,999 (percentage)	0	0	0
£120,000 to £249,999 (percentage)	2	3	3
£250,000 to £499,999 (percentage)	5	5	5
£500,000 and above (percentage)	8	8	7
Revenue Cost (£ million)	1,020	430	570

This does not include any allowance for behavioural changes.

Tax Credits

Lynne Jones: To ask the Chancellor of the Exchequer under what circumstances backpayments of *(a)* working tax credit and *(b)* child tax credit are paid as a series of regular payments rather than as a lump sum. [185683]

Dawn Primarolo: I refer my hon. Friend to the answer given to the hon. Members for Vale of York (Miss McIntosh) and Northavon (Mr. Webb) on 17 July 2003, *Official Report*, columns 465–66W.

Alan Simpson: To ask the Chancellor of the Exchequer pursuant to the Answer of 13 July, *Official Report*, columns 1014–15W, on tax credits, when figures for 2003–04 will be available. [185389]

Dawn Primarolo: The timing of complete figures on overpayments in 2003–04 will depend on the timing of the replies to the Annual Review, the time taken to obtain any extra information needed to process them, and the proportion of replies containing provisional income data.

West Sussex (Demographic Population)

Tim Loughton: To ask the Chancellor of the Exchequer (1) what is the demographic population breakdown of West Sussex; [185514]

(2) how many people moved into the Adur, Arun and Worthing Primary Care Trust area in *(a)* 2002–03 and *(b)* 2003–04; [185515]

(3) what the population of the south-east region is, broken down into those *(a)* under the age of 20 years, *(b)* between 20 and 60 years and *(c)* over the age of 60 years. [185521]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from John Pullinger to Mr. Tim Loughton dated 21 July 2004:

The National Statistician has been asked to reply to your Parliamentary Questions concerning the number of people that moved into the Adur, Arun and Worthing Primary Care Trust area in 2003 and 2004 and also the population breakdown of the South East and the demographic breakdown of West Sussex. I am replying in his absence. (185515, 185514, 185521)

Unfortunately I am not able to answer your question regarding the number of people moving into the Primary Care trust, as statistics on population flows for Primary Care Trust areas are not currently available. The Office for National Statistics (ONS) will be publishing population estimates by Primary Care Organisation area for the first time on 21 October for 2001, 2002, and 2003.

The first of the two attached tables shows a demographic population break down for West Sussex based on mid-2002 population estimates. The second table shows mid-2002 population estimates for those who are aged under 20, 20 to 59, and those aged 60 years and over in the South East government office region.

As announced by ONS on 8 July, revised mid-2002 population estimates are due to be released on 9 September. Information about the revisions can be found at: http://www.statistics.gov.uk/downloads/theme_population/PEUannouncement_08Jul.pdf

Mid-year 2002 population estimates for West Sussex

Thousand

Age bands	Male	Female	Total
0–19	91.4	85.9	177.3
20–59	189.1	197.1	386.2
60+	81.7	110.6	192.4
0–4	21.1	20.3	41.4
5–9	23.4	22.0	45.4
10–14	24.7	23.4	48.2
15–19	22.2	20.1	42.3

Working Tax Credit/Child Tax Credit

Mr. Simmonds: To ask the Chancellor of the Exchequer how many parents were in receipt of the lone parent element of the working tax credit in 2003–04. [185717]

Dawn Primarolo: Information is contained in the various issues of "Child and Working Tax Credits. Quarterly Statistics", which can be found on the Inland Revenue website at: www.inlandrevenue.gov.uk/stats/personal-tax-credits/menu.htm

Mr. Simmonds: To ask the Chancellor of the Exchequer what the budgetary cost of the lone parent element of the working tax credit was in 2003–04. [185718]

Dawn Primarolo: It is not possible to provide a split of total spending between the different elements of the working tax credit. The amount of award payable is reduced as family income increases, and this reduction is applied to the total value of all the elements taken together.

Andrew Selous: To ask the Chancellor of the Exchequer what his latest estimate is of the cost of disregarding maintenance payments for the purposes of calculating working tax credit and child tax credit. [181838]

Mr. Willetts: To ask the Chancellor of the Exchequer what the latest estimate is of the cost of disregarding maintenance payments for the purposes of calculating working tax credit and child tax credit. [182117]

Dawn Primarolo: I refer the hon. Members to my answer to the hon. Member for Wycombe (Mr. Goodman) on 19 July 2004, *Official Report*, column 44W.

DEPUTY PRIME MINISTER

Growth Areas (Infrastructure Projects)

5. **Mrs. Anne Campbell:** To ask the Deputy Prime Minister what action his Department is taking to ensure that infrastructure projects can be funded in growth areas. [185312]

The Deputy Prime Minister: In the statement I gave to the House on Tuesday 13 July following the Spending Review Settlement I announced that funding for the growth areas outside the Thames Gateway would double by 2007–08. I hope to announce the full details of the allocation when the House returns in September.

The Office of the Deputy Prime Minister has also established a new Community Infrastructure Fund to provide transport infrastructure in all growth areas, providing £200 million over the SR04 period.

Private investment, captured through developer contributions in areas of high land value will also play an important part in supporting the development of the Growth Areas.

Housing (Hertfordshire)

6. **Barbara Follett:** To ask the Deputy Prime Minister what steps his Department is taking to improve the availability of *(a)* social and *(b)* affordable housing in Hertfordshire. [185313]

Phil Hope: Through the Housing Corporation, Hertfordshire will gain around 1,170 homes for rent and low cost home ownership over this year and the next. This is a very significant increase on the 273 homes completed in 1997–98.

Following the Spending Review, the Office of the Deputy Prime Minister has announced that an extra 10,000 social rented homes a year will be provided, in England, by 2007–08. Over the next three years, the Office of the Deputy Prime Minister will provide more than 40,000 affordable homes for essential public sector workers and others in need.

Right-to-Buy System

7. **Sandra Gidley:** To ask the Deputy Prime Minister what action he is taking to prevent abuses of the right to buy system. [185314]

Mr. Raynsford: In March 2003 the Office of the Deputy Prime Minister reduced right to buy discounts in 41 local authority areas under the greatest housing market pressure and we have included provisions in the Housing Bill to tackle exploitation of the scheme.

The Office of the Deputy Prime Minister has also made it easier for landlords in rural areas to restrict the resale of ex-Right to Buy homes to local people. The Office of the Deputy Prime Minister intends shortly to lay an Order before Parliament in accordance with section 157 of the Housing Act 1985, designating Test Valley as a rural area for this purpose, in addition to the 30 other areas already designated.

Sustainable Communities (Student Areas)

8. **Lynne Jones:** To ask the Deputy Prime Minister what his policy is on developing sustainable communities in student areas of major towns. [185315]

Phil Hope: Student populations can bring real benefits to local neighbourhoods. However, universities and local authorities need to work together more closely to reduce potential problems in areas of high student populations. Last month we agreed to fund a project between Universities UK and the Local Government Association to improve the way that students are housed in local communities.

Planning Inspectorate

9. **Mr. Ben Chapman:** To ask the Deputy Prime Minister if he will make a statement on the role of the Planning Inspectorate. [185316]

Keith Hill: The Planning Inspectorate serves The Office of the Deputy Prime Minister (ODPM), the Welsh Assembly Government and other Government Departments by dealing with appeals, development plans and other casework under planning, housing, environment and allied legislation.

Its mission is:

"To use our impartial expertise in planning and land use to help shape well planned environments."

Neighbourhood Renewal Fund

10. **Ms Christine Russell:** To ask the Deputy Prime Minister what plans he has for the development of the Neighbourhood Renewal Fund. [185317]

Mr. Raynsford: On 12 July we announced, as part of the Spending Review 2004, that a further £525 million of Neighbourhood Renewal Fund (NRF) resources would be made available in each of the years 2006–07 and 2007–08. We expect to make a further announcement on the distribution of these resources later in the year.

Polluted Land (Investment)

11. **Dr. Gibson:** To ask the Deputy Prime Minister what steps his Department is taking to promote investment in cleaning up polluted land for new house building. [185318]

Keith Hill: The Government have a wide-ranging package of fiscal measures to support regeneration including a contaminated land tax credit designed to encourage the reuse of contaminated land. The Office has also negotiated a state aid approval from the European Commission that allows public sector support for the remediation of derelict and contaminated land. Furthermore, the Office is working closely with English Partnerships to develop a National Brownfield Strategy to ensure the best use of previously developed land, including contaminated land.

Market Renewal Pathfinder Programme

12. **Jim Dobbin:** To ask the Deputy Prime Minister if he will make a statement on the Market Renewal Pathfinder programme in Heywood and Middleton. [185319]

Phil Hope: The Middleton area of Rochdale is included in the Oldham Rochdale Partners in Action (the Market Renewal Pathfinder). Following submission of their strategic scheme, the pathfinder has been allocated £53.5million Housing Market Renewal Funding up to March 2006. Some of this will contribute to the funding of a comprehensive regeneration programme in the right hon. Gentlemen's constituency area of Middleton including works to refurbish over 800 homes to a decent homes standard, construction of over 300 private new homes and providing safe and secure off road parking for more than 3,000 homes.

Regional Assemblies

13. **Mr. Dalyell:** To ask the Deputy Prime Minister if he will make a statement on progress towards establishing regional assemblies. [185320]

Mr. Raynsford: The House is debating this afternoon three Orders to enable referendums to take place. The House of Commons Standing Committee on Delegated Legislation has already considered Orders on the date for those referendums and the local government options in the three regions where referendums are proposed.

Following a 'yes' vote in any one of those regions we will move as soon as possible to introduce legislation that will enable us to establish regional assemblies.

Fire and Rescue Service Equipment (Purchasing)

14. **Ann Winterton:** To ask the Deputy Prime Minister what changes his Department has implemented to the purchasing of fire and rescue service equipment. [185321]

Phil Hope: The Office of the Deputy Prime Minister has been working with fire and rescue authorities and suppliers to develop a National Procurement Strategy that aims to deliver improved cost effectiveness, to maintain competition and stimulate innovation. In the meantime, fire service circulars issued in 2003 and 2004 gave advice on the arrangements to be used pending publication of the strategy.

Affordable Housing

Ms Oona King: To ask the Deputy Prime Minister how many and what proportion of the affordable housing to be built in *(a)* Camden, *(b)* the City of London, *(c)* Hackney, *(d)* Hammersmith and Fulham, *(e)* Haringey, *(f)* Islington, *(g)* Kensington and Chelsea, *(h)* Lambeth, *(i)* Lewisham, *(j)* Newham, *(k)* Southwark, *(l)* Wandsworth and *(m)* Westminster in (i) 2004–05 and (ii) 2005–06 will be (A) social housing for rent, (B) low cost home ownership stock, (C) low cost home ownership stock for key workers and (D) intermediate rented housing for key workers. [185255]

Keith Hill: Allocations for funding by the Housing Corporation through its Approved Development Programme for schemes due to start in 2004–05 and 2005–06 in the London boroughs specified are set out in the following table. The data include the numbers of units for social rent, low cost home ownership for key workers and others and intermediate rent for key workers.

Allocations: 2004–05 and 2005–06

	Social rent		*Low cost home ownership*	
	Units	*Percentage of total*	*Units*	*Percentage of total*
Camden	230	54.2	49	11.6
City of London	0	0	0	0
Hackney	458	37.1	287	23.2
Hammersmith and Fulham	325	48.5	136	20.3
Haringey	488	54.3	154	17.1
Islington	369	37.5	39	4.0
Kensington and Chelsea	170	66.9	0	0
Lambeth	635	62.4	193	19.0
Lewisham	301	62.6	129	26.8
Newham	525	46.1	205	18.0
Southwark	425	49.2	155	17.9
Wandsworth	41	12.3	132	39.8
Westminster	215	56.1	47	12.3
Total for London	9,877	51.8	3,510	18.4

	Key Workers Low Cost Home Ownership		Key workers intermediate rent		
	Units	Percentage of total	Units	Percentage of total	Total units
Camden	67	15.8	78	18.4	424
City of London	0	0	0	0	0
Hackney	398	32.2	93	7.5	1,236
Hammersmith and Fulham	175	26.1	34	5.1	670
Haringey	203	22.6	54	6.0	899
Islington	275	27.9	302	30.7	985
Kensington and Chelsea	43	16.9	41	16.1	254
Lambeth	169	16.6	20	2.0	1,017
Lewisham	45	9.4	6	1.2	481
Newham	241	21.2	168	14.7	1,139
Southwark	226	26.2	58	6.7	864
Wandsworth	107	32.2	52	15.7	332
Westminster	45	11.7	76	19.8	383
Total for London	3,872	20.3	1,820	9.5	19,079

Ms Oona King: To ask the Deputy Prime Minister (1) how many units of affordable housing for *(a)* rent and *(b)* sale were built with funding generated by recycled capital grant in 2003–04, broken down by Government office region; [185256]

(2) what reports he has received of recycled capital grant being used for purposes other than investment in new affordable housing. [185259]

Keith Hill: Information is not currently available on the number of affordable housing units provided with recycled capital grant in 2003–04.

Provisional reports from the Housing Corporation indicate that for 2002–03, a total of 2,733 units were completed using recycled capital grant. Of this amount, 400 units were for social rent, 426 units were for shared ownership, while 1,907 units were re-improvements to existing stock.

English Partnerships

Sue Doughty: To ask the Deputy Prime Minister what share of its budget for remediation costs English Partnerships has brought forward into the first three months of the 2004–05 financial year to allow works to be undertaken before the implementation of the next phase of the Landfill Directive. [184946]

Keith Hill: Less than 1 per cent. of English Partnerships' total projected remediation costs for 2004–05 were brought forward into the first three months of the financial year to allow works to be undertaken before implementation of the Landfill Directive.

Sue Doughty: To ask the Deputy Prime Minister by what *(a)* amount and *(b)* percentage English Partnerships has increased the allowance for remediation costs in (i) the Thames Gateway and (ii) the coalfields in its 2004–05 budget to meet anticipated additional costs arising from the implementation of the ban on co-disposal of hazardous and non-hazardous wastes. [185090]

Keith Hill: The Office of the Deputy Prime Minister has not had to provide any additional funding to English Partnerships in 2004–05 for increased remediation costs arising from the ending of the co-disposal of hazardous and non-hazardous wastes. English Partnerships is committed to best practice and sustainability in regeneration and has always made allowances for remediation costs on the presumption of seeking the most economic waste treatment solution that minimises the removal of material to landfill. These efforts have been strengthened with the approach of the directive trigger date and English Partnerships has worked on a project level to mitigate cost effects on individual sites including examining feasibility for and effecting in-situ bio remediation.

Government Office of the East Midlands

Mr. Durrell: To ask the Deputy Prime Minister how many full-time equivalent employees of the Government Office of the East Midlands there have been since the establishment of its current structure. [185496]

Phil Hope: The table below sets out the number of full-time equivalent employees of the Government Office for East Midlands at annual intervals since May 2000:

Date	Number of full-time equivalent employees
May 2000	213.5
March 2001 (nearest available figures)	204.2
May 2002	209.6
May 2003	240.4
May 2004	298.7

Figures prior to 2000 could only be obtained at disproportionate cost.

The increase in the number of full-time equivalent employees reflects the fact that since 2000, staff from the Department for Environment Food and Rural Affairs and the Home Office have joined the Government Office. The increased numbers between 2003 and 2004 reflect, in particular, growth in the Community Cohesion, Crime Reduction and Sustainable Communities teams.

Home Ownership Task Force

Ms Oona King: To ask the Deputy Prime Minister pursuant to his answer of 2 February, *Official Report*, column 739W, on the Home Ownership Task Force, if he will make a statement on the outcome of the Department's discussions with the Housing Corporation on the Home

Ownership Task Force's recommendation of greater transparency in the setting of rent and other charges for shared ownership housing. [185257]

Keith Hill: Greater transparency in rent setting and other charges continues to be discussed with the Housing Corporation as part of the implementation of the Government's response to the Home Ownership Task Force which was announced on 6 May 2004.

Housing (North-west)

Mr. George Howarth: To ask the Deputy Prime Minister what assessment he has made of the impact of current demographic trends in the north-west on the region's housing stock. [185284]

Keith Hill: This issue will be addressed in the forthcoming full review of regional planning guidance for the north-west.

Planning Applications (Wandsworth)

Tom Cox: To ask the Deputy Prime Minister how many planning applications approved by the London borough of Wandsworth have been opposed in each of the last three years. [185345]

Keith Hill: Assuming that the question is about call-in of planning applications by my right hon. Friend the Deputy Prime Minister for his own determination following a public inquiry, the answer is as follows:

2001—None;

2002—Three;

2003—None;

Call-ins take place when my right hon. Friend the Deputy Prime Minister and First Secretary of State considers it necessary to call in the planning application to determine himself, instead of leaving the decision to the local planning authority. He will, in general only take this step if planning issues of more than local importance are involved. It would not be correct to regard call-in as an indication of his opposition to the proposals.

Regional Planning Guidance (North-west)

Mr. George Howarth: To ask the Deputy Prime Minister what assessment he has made of the impact of regional planning guidance on the affordability of homes in the north-west. [185283]

Keith Hill: This issue will be addressed in the forthcoming full review of regional planning guidance for the north-west.

Shared Ownership

Ms Oona King: To ask the Deputy Prime Minister what the total amount of capital receipts from shared owners staircasing up their equity share was in each year since 1997. [185258]

Keith Hill: The following table shows the total amount of capital receipts from shared owners staircasing up their equity share in each year since 1997.

Recycled capital grant fund (RCGF) shared ownership staircasing analysis

	Number of units involved	*Amount (£ million)*
1997–98	1,913	26.144
1998–99	2,043	28.287
1999–2000	3,321	52.223
2000–01	3,210	49.394
2001–02	3,603	58.828
2002–03	4,554	79.986
Total	18,644	294.862

Ms Oona King: To ask the Deputy Prime Minister pursuant to his answer of 5 July 2004, *Official Report*, columns 458–59W, on shared ownership housing, what the average rent and service charge was on the 50 per cent. stake held by the registered social landlord in a *(a)* one-bed, *(b)* two-bed and *(c)* three-bed shared ownership property in (i) Tower Hamlets, (ii) the eastern sub-region, (iii) London and (iv) England in the latest year for which figures are available. [185254]

Keith Hill: The following table shows the average rent and service charges for shared ownership properties where a 50 per cent. stake is held by the registered social landlord, broken down by the number of bedrooms, in Tower Hamlets, the east London sub-region, London and England in 2003–04.

Shared ownership sales during 2003–04
Average monthly rent and service charges for those who purchased a 50 per cent. stake

	Number of sales	*Monthly rent (£)*	*Monthly service charge (£)*
One bedroom			
Tower Hamlets	7	123.90	38.11
East London	27	151.15	57.43
London	165	155.55	58.66
England	339	139.83	50.30
Two bedrooms			
Tower Hamlets	5	209.84	51.36
East London	120	198.01	53.30
London	331	189.36	49.47
England	1,420	142.50	34.26
Three bedrooms			
Tower Hamlets	2	164.30	0.00
East London	39	201.63	26.88
London	89	197.24	25.16
England	682	152.79	19.27

1. Because the buyer took a 50 per cent. stake, the average price paid by the buyer represents one-half of the property.

2. The figures include the following schemes:

Do-It-Yourself Shared Ownership, Shared Ownership for the Elderly, Leasehold Schemes for the Elderly, Ordinary Shared Ownership Schemes

3. East London sub-region 1 is an amalgamation of Barking and Dagenham, Havering, Hackney, Newham, Tower Hamlets, Redbridge, Waltham Forest

Source:

Housing Corporation, CORE Sales

Starter Home Initiative

Tim Loughton: To ask the Deputy Prime Minister how many *(a)* social workers and *(b)* nurses were assisted by the Starter Home Initiative in 2003-04. [185520]

Keith Hill: Between 1 April 2003 and 31 March 2004, the Starter Home Initiative helped nearly 100 social workers and over 1,200 nurses into home ownership.

WORK AND PENSIONS

Access to Work Scheme

Mr. Gerrard: To ask the Secretary of State for Work and Pensions how many disabled people in London are receiving help with fares to work under the access to work scheme. [185472]

Maria Eagle: Between 1 April 2003 and 31 March 2004, Access to Work helped 364 new customers in London with travel to work costs. A further 802 customers who had applied for assistance prior to 1 April 2003 continued to receive assistance during the same period.

Appointees

Mr. Burstow: To ask the Secretary of State for Work and Pensions (1) what proportion of applications for appointeeship *(a)* involve an interview with the claimant and *(b)* rely on the discussion with a carer or professional alone; [182699]

(2) what monitoring takes place to ensure that appointees spend the benefit in the best interests of the claimant; [182701]

(3) how many cases there were in 2002-03 where concerns about appointeeship were brought to the attention of the Department; how many were investigated; and in how many cases the appointeeship was revoked. [182702]

Maria Eagle: Appointees are normally interviewed by a visiting officer to ensure their suitability and awareness of their roles and responsibilities; a visit will also be made to the customer, although exceptions may be made where the customer is in hospital.

While formal monitoring of appointeeships is not carried out thereafter, officers acting on behalf of the Secretary of State can revoke the authority of appointees where there are concerns that they are not acting in the interests of the person claiming benefit.

Information regarding the numbers and types of interviews carried out, and how many cases were investigated, is not available as statistics are not collected centrally.

Attendance Allowance (Over-80s)

Mr. Colman: To ask the Secretary of State for Work and Pensions how many people in London aged *(a)* 80 years and over, *(b)* 85 years and over and *(c)* 90 years and over are in receipt of attendance allowance. [184876]

Maria Eagle: The numbers of attendance allowance recipients in London by age are set out in the table.

	Thousand
All	123.1
Under 80	48.4
80 to 84	31.5
85 to 89	24.5
90 and over	18.7

Note:
Figures taken from a 5 per cent. sample at 29 February 2004.
Source:
AD information Centre.

Computer Systems

Mr. Webb: To ask the Secretary of State for Work and Pensions what percentage of computer systems which support the delivery of pensions and income support have been replaced since 2000. [185058]

Jane Kennedy: None of the computer systems supporting the delivery of pensions and income support have been replaced. They are however subject to upgrading to reflect legislative changes and procedural improvements as required.

Departmental Annual Report

Dr. Cable: To ask the Secretary of State for Work and Pensions how many copies of his Department's and predecessor Department's annual report were printed in each year since 1997; how many were sold in each year; and what the *(a)* publication cost and *(b)* sales revenue were. [183878]

Maria Eagle: The Department for Work and Pensions was created in June 2001 with a specific new purpose of promoting opportunity and independence for all. The Department has published three annual reports, in spring 2002, 2003 and 2004. Information on the number of copies produced and publication costs falling to the Department are shown in the table.

Year of publication of Departmental Report	*Number of copies printed*	*Publication costs falling to Department for Work and Pensions (£)*
2002	2,000	94,940
2003	2,500	73,089
2004	1,500	40,752

Other costs associated with sales and distribution are met directly by the publisher, The Stationery Office Ltd. (TSO), and do not fall to government. Information on the number of copies sold and sales revenue are matters for the publisher.

The Department of Social Security printed 1,075 copies of its annual report in 2001 at a cost of £66,537. Information on previous years is not available. As an agency of the Department for Education and Employment, the Employment Service was included in the annual reports of that department.

Departmental Re-branding

Mr. Willetts: To ask the Secretary of State for Work and Pensions what the total cost was of re-branding the Department in 2001. [185534]

Maria Eagle: The total cost of re-branding my Department to accommodate its name change in 2001 was £232,044, which includes the application of the logos to key items such as stationery, building signs and electronic media.

Departmental Staff

Mr. Goodman: To ask the Secretary of State for Work and Pensions how many people have left employment in his Department because of *(a)* anxiety, *(b)* stress, *(c)* depression and *(d)* other mental health reasons in each year since 1997. [175680]

Maria Eagle: Information is not collected on the number of resignations or dismissals from the Department resulting from anxiety, stress, depression, or other mental health reason.

The number of medical retirement certificates issued for mental health reasons over the last four financial years is in the table.

	Number of certificates
2000–01	81
2001–02	85
2002–03	64
2003–04	55

Notes:
1. The figures relate only to the number of medical retirement certificates issued. These may not all have resulted in medical retirements taking place.
2. DWP was formed in June 2001. Figures for 2000–01 and April and May 2001 relate to the former Employment Service and Department of Social Security.
3. Figures were not collected prior to April 2000.

The Department is committed to providing a safe working environment for all of its staff and has a range of support in place to help identify and tackle the causes of work related stress, anxiety and depression. This includes both preventative policies, such as the use of the HSE's Management Standards, and policies to help manage those cases that have resulted in individuals taking time off work. For example, an Attendance Management policy, a confidential employee assistance counselling service; and an occupational health provider service who provides advice on medical conditions including mental and behavioural disorders.

Disability Discrimination Act

Mr. David Stewart: To ask the Secretary of State for Work and Pensions what plans he has to promote the development of *(a)* supported employment opportunities and *(b)* intermediate labour market solutions to help those who are blind or partially-sighted. [182539]

Maria Eagle: Like all jobless people, where they meet the eligibility criteria, disabled people or those with health problems can access the full range of Government employment programmes, including intermediate labour market initiatives.

Workstep provides support in jobs for disabled people who have more complex barriers to finding and keeping work but who, with the right support, are able to make a valuable contribution in their job and where appropriate develop and progress to open employment. Workstep providers are required to work with all clients on a qualifying benefit, including clients who are blind or partially sighted. Remploy, which is the largest provider of the Workstep programme, supports over 230 people with visual impairments in a variety of jobs.

A number of organisations with their roots in helping people who are blind or partially sighted are also directly involved with Workstep as providers. These organisations include: Action for Blind People, Royal London Society for the Blind, Royal Strathclyde Blindcraft Industries, the Royal Aberdeen Workshops for the Blind and Disabled and Merthyr Tydfil Institute for the Blind. In line with the Workstep ethos, these organisations deliver support to clients with a range of disabilities.

The Access to Work programme is open to disabled people already in employment (including self-employment), people changing jobs and unemployed people about to start work. It helps towards the additional employment costs resulting from disability, for example, help with the costs of travelling to work, adaptations to premises and special equipment.

Health and Safety Executive

Mr. Webb: To ask the Secretary of State for Work and Pensions how many enforcement notices were issued by the Health and Safety Executive in each of the last seven years. [184681]

Jane Kennedy: Over the last seven years the Health and Safety Executive has issued the following number of enforcement notices. The figures for 2003–04 will be publicly available in the Offences and Penalties report, due for release in late October 2004.

Year[1]	*[2]Total enforcement notices issued*
1996–97	[3]7,444
1997–98	[3]8,911
1998–99	10,900
1999–2000	11,340
2000–01	11,056
2001–02	11,082
2002–03	13,324

[1] Year refers to operational year, which runs 1 April to 31 March.
[2] The table refers to total enforcement notices issued in Great Britain and includes improvement and prohibition notices.
[3] In 1996–97 and 1997–98, HSE issued "Notices of Intent" that required a satisfactory outcome be secured within two weeks so as to avoid serving an improvement notice. As a result, some improvement notices were not issued. If the notices of intent were not issued, the number of enforcement notices would have been about 540 higher in 1996–97 and 630 higher in 1997–98. This system is no longer used.

Incapacity Benefit

Mr. Chaytor: To ask the Secretary of State for Work and Pensions if he will make it his policy to ensure that no recipient of incapacity benefit suffers a reduction of net weekly income due to withdrawal of income support and related benefits; what assessment he has made of the number of individuals whose net weekly income is reduced in this way; and if he will make a statement. [184745]

Maria Eagle: We have made no estimates of the number of incapacity benefit (IB) recipients who have experienced a reduction of net weekly income due to withdrawal of income support and related benefits.

In most cases, people will be better off receiving incapacity benefit than an income-related benefit. In addition, as the position of those who lose entitlement to income support is no different from that of any other person whose income is above income support levels, it would be unfair to introduce special arrangements for people in these circumstances.

New Deal for Lone Parents

Mr. Simmonds: To ask the Secretary of State for Work and Pensions how many parents were on the New Deal for Lone Parents in 2003–04; and what the associated budgetary cost was. [185719]

Jane Kennedy: Between April 2003 and March 2004, 226,280[1] individuals participated on New Deal for Lone Parents. The estimated outturn spend on the programme is £66 million.

[1]Figures are rounded to the nearest 10.

Pay Systems

Malcolm Bruce: To ask the Secretary of State for Work and Pensions if he will place in the Library the most recent review of *(a)* his Department's pay systems, *(b)* the pay systems of the non-departmental public bodies for which he is responsible and *(c)* the departmental equal pay action plan. [181357]

Maria Eagle: The Department for Work and Pensions looks at its pay systems every year to inform the annual pay award process. There is no review report; the outcomes are captured in the pay offer we make to staff. Of the five non-departmental public bodies (NDPB), which the Department is responsible for, two—Remploy and the Occupational Pensions Regulatory Authority—complete a yearly review, which they will place in the Library by the end of August 2004. Both the Disability Rights Commission and the Health and Safety Executive are currently reviewing their pay progression arrangements. The outcomes of both these reviews will be placed in the Library when completed. The Rent Service's most recent review was completed in 2002, and we will arrange for a summary to be provided for the Library by the end of August 2004.

The Department for Work and Pensions (DWP) is committed to reviewing its pay policies to ensure that they are compliant with the current equal pay legislation and do not either directly or indirectly discriminate against any group of employees.

An Equal Pay Audit was completed in January 2002 in accordance with Cabinet Office guidance. This was based on details from the agencies which formed the Department for Social Security. Following the creation of DWP and the consequent alignment of pay policies, the findings from this report are now out-of-date. The Department is currently undertaking an Equal Pay Audit to review existing DWP policies and to inform the further development of its reward strategy. Once this is complete, a copy of the action plan will be placed in the Library.

Although non-departmental public bodies (NDPB) are not committed to completing an equal pay review, they are encouraged by the Department to conduct them. NDPB's staffed by civil servants follow the Cabinet Office commitment (e.g. HSE). Of the five NDPB's that the Department is responsible for, two (the Disability Rights Commission and The Rent Service) have conducted equal pay reviews, and the relevant documents will be put into the library by the end of August 2004. The Occupational Pensions Regulatory Authority has no current plans to complete an equal pay review, as they will cease to exist from 5 April 2005. Remploy will be making plans to complete an equal pay review on appointment of their new HR Director on the 26 July 2004.

The final NDPB, the Health and Safety Executive (HSE), submitted a draft equal pay action plan to Cabinet Office in 2003. When a finalised version has been agreed that incorporates the findings from a current review of pay progression arrangements it will be placed in the Library.

Pension Centre (Swansea)

Mr. Caton: To ask the Secretary of State for Work and Pensions if he will make a statement on his plans for the pension centre in Swansea. [185329]

Malcolm Wicks: Since the Budget announcement, detailed planning has been taking place across the Department. This has included discussions on the future size and shape of The Pension Service. My right hon. Friend, the Secretary of State for Work and Pensions issued a written statement on 29 June 2004, *Official Report*, columns 8–9WS announcing the first phase of that transformation.

Planning continues across the Department and we will inform the House when firm decisions are made.

Mr. Caton: To ask the Secretary of State for Work and Pensions what assessment he has made of the quality of work carried out at Swansea Pension Centre. [185330]

Malcolm Wicks: The Pension Service deploys quality support teams to assess the accuracy of payments made by pension centres. These teams sample pension credit payments and state pension payments for Swansea Pension Centre three times per year. Swansea Pension Centre also conducts a monthly survey of its customers to measure their satisfaction with the service provided.

Swansea Pension Centre is currently achieving all key performance targets.

Pension Credit

Mr. Amess: To ask the Secretary of State for Work and Pensions if he will make a statement on the take-up of pension credit. [185418]

Malcolm Wicks: I refer the hon. Member to the Written Statement by my hon. Friend the Secretary of State on 15 July 2004, *Official Report*, columns 77–78WS.

Mr. Amess: To ask the Secretary of State for Work and Pensions how many and what percentage of pensioners he estimate will not be claiming pension credit by 2006. [185422]

Malcolm Wicks: The information is not available in the form requested. The Department has set a Public Service Agreement target for at least three million pensioner households, corresponding to around 3.7 million individuals, to be in receipt of pension credit by March 2006 and is on course to achieve this. A projection based on available data suggests that approximately 3.85 million households, corresponding to around 5 million individuals, are likely to be eligible for Pension Credit in Great Britain in 2005–06. This projection, rounded to the nearest 50,000 households or individuals, includes a number of assumptions which will be sensitive to change. It is subject to a wide margin of error and should be used as a broad indication of the likely eligible population only.

Sickness Absence

Mr. Webb: To ask the Secretary of State for Work and Pensions how many working days per 100,000 workers were lost for reasons of work-related injury and ill-health in each of the last seven years. [184675]

Jane Kennedy: The information is not available in the form requested. Estimates of the number of working days lost as a result of work-related injury are obtained every three years through the Labour Force Survey (LFS). The latest estimate, for 2000–01, is 27,900 working days lost per 100,000 workers, compared with an estimate of 25,800 in 1997–98.

For work-related illness, the only available estimate in the seven-year period is based on information obtained from the 2001–02 LFS. The survey estimated that 140,000 working days per 100,000 workers were lost as a result of self-reported work-related ill-health.

A combined estimate for work-related injury and ill-health, covering 2003–04, will be published later this year.

CABINET OFFICE

Job Losses (Civil Servants)

Mr. Evans: To ask the Minister for the Cabinet Office how many of the reductions in the numbers of civil servants in his Department announced in the comprehensive spending review will be of special advisors. [185470]

Mr. Alexander: I refer the hon. Member to the answer given by my right hon. Friend, the Chief Secretary to Her Majesty's Treasury (Mr. Boateng), on 20 July 2004, *Official Report*, column 190W.

Lord Birt

Norman Baker: To ask the Minister for the Cabinet Office what areas of work Lord Birt is engaged upon. [182247]

Mr. Alexander: Lord Birt is the Prime Minister's unpaid strategy adviser and works alongside the Strategy Unit on a range of issues. He is also an external member of the Cabinet Office Strategy Board. The nature of Lord Birt's work is to provide private internal advice to the Prime Minister and other Cabinet Ministers. This advice is not disclosed under Exemption 2 of the Code of Practice on Access to Government Information.

Public Meetings (Access)

Brian Cotter: To ask the Minister for the Cabinet Office what action is being taken to encourage *(a)* central and *(b)* local government departments and agencies to ensure that public meetings are accessible for those with disabilities. [180912]

Maria Eagle: I have been asked to reply.

Where central and local government departments and their agencies are holding public meetings as a service to the public, they are covered by the service provider provisions of the Disability Discrimination Act (DDA) and have legal duties under Part 3 of the Act to make reasonable adjustments to enable disabled people to make use of them. In some instances, public meetings may form part of the function of a central or local Government department or its agencies. Currently, the access duties under Part 3 of the DDA do not extend to functions of public bodies. However, a proposal in the draft Disability Discrimination Bill would bring all such functions within the scope of Part 3 of the Act.

The Government are currently running a campaign to remind service providers of their duties under the DDA. The campaign focuses on the new duties being introduced from 1 October 2004, which require service providers to make reasonable adjustments to physical features of premises which make access to the service impossible or unreasonably difficult for disabled people.

The Disability Rights Commission (DRC), which is a non-departmental public body of the Department for Work and Pensions, published a revised statutory Code of Practice in 2002 explaining the service provider provisions, including the new duties from October 2004. In addition, the DRC has been working in partnership with the Local Government Association to raise awareness of the implications of the service provider duties for local authorities and to develop guidance on implementing the DDA duties within local authority service provision.

Security Vetting

Llew Smith: To ask the Minister for the Cabinet Office what representations he has received on the merits of re-establishing an inter-departmental committee of security vetting authorities. [184398]

Mr. Alexander: The most recent periodic review of the Government's personnel security system recommended the creation of a new official committee focusing on this area. That was accepted and that committee will work to ensure the continued effectiveness of personnel security policy and practice throughout Government, and in those organisations with which Government works in partnership.

HOME DEPARTMENT

Ammonium Nitrate

Patrick Mercer: To ask the Secretary of State for the Home Department whether his Department keeps on file records of thefts of ammonium nitrate; *(a)* in the United Kingdom and *(b)* on farms within the United Kingdom. [172743]

Mr. Blunkett: In England and Wales, numbers of thefts of ammonium nitrate are not collected separately from other thefts. I refer the hon. Member to the answer given by my right hon. Friend the Secretary of State for the Environment, Food and Rural Affairs (Alun Michael) on 27 April 2004, *Official Report*, column 857W. Ammonium nitrate in itself is not classified as an explosive.

Asylum Seekers

Annabelle Ewing: To ask the Secretary of State for the Home Department how many individuals whose application for asylum had been rejected absconded in each year since 1997. [183924]

Mr. Browne: Information on the number of asylum applicants who have absconded is not available except by examination of individual case-files at disproportionate cost.

Some asylum seekers who have "absconded" may have left the UK voluntarily; others may remain in the UK illegally. Applicants do not always inform the Immigration Service prior to leaving the UK. The Immigration Service's policy on contact management, the means by which the Home Office maintains contact with asylum seekers throughout the process, was introduced in 2002. The policy is being continuously enhanced with the proposed expansion of the detention estate; the development of more static reporting centres; the development of Immigration Service staff based at police stations; the rollout of induction centres at the beginning of the asylum process and the piloting of biometric reporting i.e. voice recognition, tagging and kiosk based reporting.

Annabelle Ewing: To ask the Secretary of State for the Home Department under what circumstances individuals are required to wear an electronic tagging device. [183925]

Mr. Browne: Individuals in England and Wales are required to wear a tag when sentenced by a court to a curfew order or curfew requirement with electronic monitoring; on release from prison under the Home Detention Curfew Scheme; or as a requirement of a bail or licence condition.

Individuals who are liable to detention under immigration legislation may, in future, be required to wear an electronic tagging device if a Chief Immigration Officer, adjudicator or judge of the Special Immigration Appeals Commission considers, following an individual risk assessment, that the risk of absconding can be managed through the additional safeguard of electronic monitoring by tagging as an alternative to detention.

Mr. Hepburn: To ask the Secretary of State for the Home Department what support is being offered to failed Iraqi asylum seekers being returned to Iraq. [184516]

Mr. Browne: Since July last year the Home Office has been facilitating the return of small numbers of Iraqi citizens who want to return home through the International Organization for Migration (IOM). Individuals returning under this programme receive independent advice and practical assistance with travel arrangements.

Enforced returns to Iraq will begin as soon as the practical arrangements for the returns programme are in place. The details of the returns programme have not yet been finalised, but are likely to include a package of support for returnees.

Failed asylum seekers of any nationality, including Iraqis, who are destitute and unable to leave the UK immediately for reasons entirely beyond their control may seek accommodation from National Asylum Support Service (MASS) under the Immigration and Asylum Act 1999. Those who do not otherwise meet the eligibility criteria but who are willing to register with the IOM for a voluntary departure would be eligible for accommodation under section 4 while they are waiting for their voluntary return to be arranged.

Greater Manchester Police

Mr. Chaytor: To ask the Secretary of State for the Home Department how many *(a)* police officers and *(b)* community support officers there were in the Greater Manchester Police in each of the last 10 years; and what his projections are for the next three years' spending period. [184746]

Ms Blears: The information requested is set out in the table. The Greater Manchester Police had record police strength at the end of December 2003.

We have made no projections for force strength over the next three years. It is for the Chief Constable of the Greater Manchester Police to determine the mix of officers and support staff within the budget set by the police authority over the next three years.

As at 31 March	*Police Officer strength*	*Police (support) staff strength*	*Community Support Officer strength*
1993–94	6,967	2,638	—
1994–95	7,037	2,674	—
1995–96	6,938	2,749	—
1996–97	6,922	2,612	—
1997–98	6,949	2,661	—
1998–99	6,810	2,623	—
1999–2000	6,795	2,822	—
2000–01	6,909	2,858	—
2001–02	7,217	3,135	—
2002–03	7,343	3,173	160
2003–04	[1]7,770	Not available	[2]185

[1] Police officer strength as at 31 December 2003.
[2] CSO strength as at 31 March 2004.

Correspondence

Kate Hoey: To ask the Secretary of State for the Home Department when his officials at the Immigration and Nationality Directorate will answer letters dated 22 February and 19 May from the hon. Member for Vauxhall about a constituent, reference number: S1003233. [184698]

Mr. Browne: I wrote to my hon. Friend on 21 July 2004.

Heathrow

Mr. Wilshire: To ask the Secretary of State for the Home Department how many immigration staff were employed at each of Heathrow airport's four terminals at 1 January in each year since 1997. [183301]

Mr. Browne: The following table sets out the number of full-time equivalent immigration officials employed at Heathrow airport, Terminals 1–4, at 1 January for the last eight years.

	1997	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*
TN1	187.1	209.2	189.8	194	179.4	203.1	210.3	234.9
TN2	231.7	225.7	201.6	192.5	188.2	208.8	205.7	193.1
TN3	[1]—	278.5	270	269.8	277.5	326.7	332.6	308.2
TN4	199.2	186.9	179.6	180	187.2	186.9	195.4	196.9
Total	618	900.3	841	836.3	832.3	925.5	944	933.1

[1] Figures are unavailable for Heathrow Terminal 3 for the years 1997. 1998 figure is for 1 February 1998 for Terminal 3.

In addition since 1 January 2004 127 officials have been trained or allocated training places for deployment at Heathrow airport.

Identity Cards

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will make a statement on the race impact assessment of the identity card scheme. [182298]

Mr. Browne: The identity cards scheme will be an inclusive scheme, designed to cover everyone who has the right to be in the United Kingdom. It will show that everyone belongs to our society whether they were born here, have chosen to make their home here or are just staying for a while to study or work. It will help people prove their identity to access services such as free health treatment or benefits and give everyone confidence that legal migration will not result in increased fraudulent use of hard-pressed public services. If our communities have confidence in our immigration controls, they will be more welcoming of new arrivals, helping to promote a more cohesive society.

The identity cards scheme itself is non-discriminatory as it is intended to cover everyone in the United Kingdom for longer than a specified period (three months). The scheme will not, in general, require people to obtain a specific, additional document as it will be designed to make use of existing documents that will be designated as identity cards. Most members of the identity cards "family" will be enhanced versions of existing identity documents which are very widely held familiar documents that are already used as proof of identity.

A partial race impact assessment was published with the draft Bill (CM 6178). This was developed following consultation with representatives of black and minority ethnic groups and research undertaken with these groups. Further assessments will be made as the design of the scheme develops, focusing mainly on how the introduction of ID cards affects the use of existing police powers, how the scheme is administered and its use in relation to access to services and employment.

Immigration

David Winnick: To ask the Secretary of State for the Home Department why the Indian passport and travel documents were sent to the constituent of the hon. Member for Walsall, North without explanation or information on how to proceed, ref 5773882. [185289]

Mr. Browne *[holding answer 20 July 2004]:* I understand that on the occasions that my hon. Friend's constituent applied for a No Time Limit (NIL) endorsement, his documents were returned to him with a covering letter explaining that a further endorsement cannot be placed in his passport whilst he is in possession of a valid travel document endorsed with an NIL stamp.

National Asylum Support Service

Mr. Brady: To ask the Secretary of State for the Home Department how many vacant homes in the borough of Trafford are held under contract to the National Asylum Support Service, broken down by *(a)* local authority, *(b)* private landlords and *(c)* housing association properties; and at what cost. [182000]

Mr. Browne: Details of the properties and costs of accommodation contracted to the National Asylum Support Service (NASS) cannot be disclosed since this information is part of the contract between NASS and the provider and must be treated as commercial in confidence.

Racist Visitors

David Winnick: To ask the Secretary of State for the Home Department what his policy is on allowing into the UK those with well-known racist and anti-semitic views who intend to speak at public meetings; and if he will make a statement. [183118]

Mr. Browne *[holding answer 12 July 2004]:* The Immigration Rules make provision for a person to be refused entry if their presence in the UK is not considered to be conducive to the public good. Each case is considered on its individual merits. Once admitted to the UK a person is expected to abide by UK law.

UK Passports Service

Mrs. Ellman: To ask the Secretary of State for the Home Department what assessment he has made of the efficiency of Special Mail Services in delivering United Kingdom passports; and if he will make a statement. [182803]

Mr. Browne: The United Kingdom Passport Service assesses the performance of Special Mail Services (SMS) on a regular basis. Since the new arrangements for secure delivery of UK passports commenced on 9 February SMS have successfully delivered just over

3 million passports and have surpassed their key performance target of delivering 97 per cent. of passports on the next working day. On current information recorded losses of passports total 219 over the five month period.

Based on the first five months of contract performance SMS and UKPS have identified a number areas of SMS's performance including the security of their premises and vetting of their staff where arrangements need to be strengthened. UKPS will be closely monitoring the implementation of planned improvements to their performance over the next few months.

The SMS contract was awarded following a competitive tender and the payments made to SMS are in line with the contract, delivering the anticipated value for money for passport customers.

Miss McIntosh: To ask the Secretary of State for the Home Department whether it is the practice of the UK Passports Service to cash cheques for passport applications before processing the application itself. [184201]

Mr. Browne: Yes, all payments for passport services are processed as soon as the application is received. There are good reasons for this. On security grounds, so that large sums of money are not held at passport offices. On grounds of regularity, so that passports are only issued to customers who have paid in full and for process efficiency. In processing over 5 million passport applications annually it would be impossible to keep payments with applications throughout the whole issuing process.

Miss McIntosh: To ask the Secretary of State for the Home Department whether compensation is payable for *(a)* delay and *(b)* distress in the case of an error by the UK Passports Service in transposing an incorrect photograph onto a passport application. [184218]

Mr. Browne: The compensation policy of the UK Passport Services (UKPS) which reflects good practice guidance issued by the Cabinet Office and the Parliamentary Commissioner for Administration, is to reimburse the reasonable out of pocket expenses incurred by customers as a direct consequence of clear errors or omissions by its staff. It is not UKPS's normal policy to make compensation payments for loss of enjoyment, distress or inconvenience arising from such errors. Each claim is treated on its merits, and for audit purposes documentary evidence is needed to confirm significant additional expenditure incurred by a passport applicant.

In the case of an error by the UKPS in inserting an incorrect photograph in an issued passport, under the terms of its policy, if additional costs have been incurred by the customer as a result of such an error, this would provide a basis for a claim on UKPS for compensation.

V2 Rocket Incidents

Mr. Gerrard: To ask the Secretary of State for the Home Department whether document reference number HO198/105, relating to V2 rocket incidents from September to December 1944, has been *(a)* retained by his Department and *(b)* withheld from the public domain. [182975]

Mr. Blunkett: The document (piece) has not been formally retained at the Home Office. It appears to have been lost after having been temporarily retained for administrative purposes when related records were transferred to The National Archives in 1972. The National Archives catalogue will be amended to show the piece is missing.

FOREIGN AND COMMONWEALTH AFFAIRS

Anti-terrorism Measures

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress was made at the recent talks at Hassop Hall with his European counterparts on anti-terrorism measures. [184265]

Mr. Blunkett: I have been asked to reply.

This question has been referred to me as I hosted the meeting at Hassop Hall with my Interior Ministry counterparts from France, Germany, Italy and Spain. We discussed a range of issues that relate to co-operation on counter-terrorism. It was a very useful meeting covering a number of areas of joint interest.

ID cards can allow travel throughout the EU, so we need to ensure that security standards are on a par with those relating to EU visas, residence permits and passports.

We felt that it would be important to look at strengthening ID card security, specifically measures on the incorporation of biometric identifiers, and methods to ensure a more robust issuing procedure.

Following on from this we felt that strong support should be given to the Commission's proposals for further action in facilitating the exchange of information on lost, stolen and forged passports between member states and Interpol. This would be on a basis consistent with G8 and ICAO initiatives.

We discussed how there could be benefits in Europol focusing on a number of clearly defined tasks in the counter-terrorism field. This could be in addition to its main role on organised crime. Analyses of the links between organised crime and terrorism, and the flows of finances that support terrorist organisations were considered. We particularly welcomed presidency ideas concerned with the disruption of these flows.

Ensuring our security through co-operation is a key goal for all member states. I believe that through discussion and working together closely we can give impetus to these important areas of work in the EU and deliver real practical outcomes.

Departmental Expenditure

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs how much the Foreign Office spent on *(a)* recruitment consultants and *(b)* management consultants in (i) 1996–97 and (ii) the latest year for which figures are available. [184503]

Mr. Straw: The figures for 1996–97 could be established only at disproportionate costs.

Expenditure on external consultants in general is reported annually in the Foreign and Commonwealth Office's (FCO) Departmental Report, available in the Library of the House and on the FCO's website: www.fco.gov.uk. Expenditure specifically on management consultants is not categorised separately and could be provided only at disproportionate costs.

Expenditure on consultants, the bulk of this being expenditure associated with our major Information and Communications Technology and estate construction programmes, for 2002–03 (the latest figures available) totalled £23.7 million. Out of that total the FCO spent £1.31 million on recruitment consultants.

Detention/Imprisonment Principles

Adam Price: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the Government recognises the UN Body of Principles for the Protection of All Persons under Any Form of Detention or Imprisonment. [184829]

Mr. Rammell: The UK supported the adoption of the Body of Principles for the Protection of All Persons under Any Form of Detention or Imprisonment by the United Nations in 1988.

The Principles are not specifically embodied in UK domestic legislation. However, they are effectively applied by means of existing legislation and procedures governing the detention of individuals, and by the system of independent checks of places of detention by Her Majesty's Inspectorate of Prisons, as well as by the European Committee for the Prevention of Torture.

Diego Garcia

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library copies of all his Department's *(a)* legal, *(b)* environmental and *(c)* economic studies on Diego Garcia and the Chagos Islands; and what correspondence has taken place between Her Majesty's Government and the United States Administration since November 2000 on Diego Garcia. [184389]

Mr. Rammell: Reports of studies relating to the British Indian Ocean Territory (BIOT) are placed in the Library of the House if they are likely to be of parliamentary or public interest. For instance the study into the feasibility of resettlement of the outer islands of the Territory was deposited in the Library in July 2002. Correspondence between the UK and US Governments about Diego Garcia is confidential to the two Governments and is withheld under exemption 1*(c)* of Part 2 the Code of Practice on Access to Government Information.

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on *(a)* dredging and *(b)* the expansion of naval facilities at Diego Garcia since 1980. [184966]

Mr. Straw: The US Naval Support Facility on Diego Garcia, which had been established pursuant to an agreement between the two Governments of February 1976 as a development of the previous US naval communications facility there. Following an Exchange of Notes between the Governments of the UK and the US in August and September 2001 the US Naval Support Facility was designated as a Bomber Forward Operating Location and various infrastructure upgrades to the facility were agreed. The 2001 Exchange of Notes recorded the understanding of the two Governments that this was consistent with the scope and purpose of the facility as provided for in the 1976 agreement. Further infrastructure upgrades were similarly approved by the two Governments in July 2002. In addition, an Exchange of Notes between the two Governments in June and July 1999 recorded their agreement to the construction and operation on Diego Garcia of a monitoring facility, primarily for inclusion in the International Monitoring System, established under the Comprehensive Nuclear Test-Ban Treaty of 1996.

As regards dredging, it will be necessary to obtain this information from the authorities on Diego Garcia. When it has been received, I will write to the right hon. Gentleman and place copies in the Library of the House.

European Constitution

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what effect the European Constitution will have on the UK's existing international treaties. [184257]

Mr. MacShane: None.

Guantanamo Bay

Mr. Lyons: To ask the Secretary of State for Foreign and Commonwealth Affairs what the ages are of the UK citizens in custody in Guantanamo Bay, Cuba. [183302]

Mr. Mullin: The ages of each of the four British nationals detained at Guantanamo Bay are 24, 24, 31 and 36.

Mr. Best: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will provide an update on the situation of the British Guantanamo detainees. [183318]

Mr. Mullin: The Government have consistently sought to resolve the position of the British nationals detained at Guantanamo Bay. Our position is that the British detainees should either be tried fairly in accordance with international standards or returned to the United Kingdom.

Following discussions with the US Government, led for the Government by my noble Friend the Attorney-General, we concluded that the US military commission process would not provide sufficient guarantees of a fair trial in accordance with international standards. The Government therefore asked that all nine British detainees be returned to the UK. Five were returned in March.

Following a visit by officials to Washington in May, my right hon. Friend the Prime Minister repeated our request that the remaining four detainees be returned to the UK. We continue to work to resolve their situation.

India

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) what representations he has made to *(a)* the Indian

Government and *(b)* the Chief Minister of Orissa concerning the arrest of Pastor Suresh Samal and five other Christians from the village of Kilipal; [184988]

(2) what representations he has made to *(a)* the Indian Government and *(b)* the Chief Minister of Gujarat concerning (i) the kidnap and suspected rape of a Christian woman, Manulaben Dinana, by a gang connected with Hindu militant groups and (ii) the recent destruction of a Christian graveyard by officials in Ahmedabad; [184990]

(3) what representations he has made to *(a)* the Indian Government and *(b)* the Chief Minister of Tripura concerning the attack on Pastor Letthang Gangte, of the Evangelical Congregational Church of India and his family on 19 April in the village of Rajghat, West Tripura. [184991]

Mr. Mike O'Brien: We have not raised these specific incidents with the Government of India. We do however monitor reports of attacks against minorities and raise these issues with the Government of India. We continue to urge the Indian authorities to ensure the right to freedom of religion is upheld, and to raise our concerns about incidents of religious intolerance in India, including attacks against Hindus, Muslims, Sikhs and Christians; and to urge that those responsible should be brought to justice. In this context, we welcome the commitment by Dr. Manmohan Singh to maintaining communal harmony at all costs in India.

Iran

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made with Iran in recent months as regards its nuclear programme. [184238]

Mr. MacShane: The Board of Governors of the International Atomic Energy Agency (IAEA) unanimously adopted a Resolution on 18 June calling for Iran to co-operate more actively with IAEA inspectors and to resolve outstanding questions regarding its nuclear programme.

Together with our French and German partners, the Government is urgently engaged in seeking to persuade Iran to re-engage fully with the IAEA, and to honour its commitments made in the Tehran Declaration of 21 October 2003.

We will continue to monitor developments closely.

Mr. Win Griffiths: To ask the Secretary of State for Foreign and Commonwealth Affairs what issues were raised at the recent EU/Iran Human Rights Dialogue meeting; and what assessment has been made of the progress being made by Iran on these issues. [185437]

Mr. Rammell: Discussions at the fourth meeting of the EU/Iran Human Rights Dialogue, held in Tehran on 14–16 June, covered a range of human rights issues in Iran. The EU delegation raised particular concerns about Iran's judicial and penal systems, the situation of religious and ethnic minorities, freedom of expression and assembly, discrimination against women and the conduct of this year's Majlis elections. The EU also raised the cases of a number of individuals in Iran. We are deeply disappointed that on many issues of concern there has been little or no progress in recent months.

Mr. Sandy Mitchell

Mrs. Mahon: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with Mr. Sandy Mitchell on the exchange of prisoners with the Saudi Arabian Government and the US Administration; and if he will make a statement. [182977]

Mr. Mullin: The release of Saudi detainees from Guantanamo is a matter for the US and Saudi Governments. It would not be appropriate for either Ministers or officials to discuss this matter with Mr. Mitchell.

Ministers, including my right hon. Friend the Foreign Secretary, have spoken to Mr. Mitchell since his return to the UK. Foreign and Commonwealth Office officials remain in contact with him. We were relieved that he was released and returned to the UK. This was something we worked very hard for.

North Korea

Mr. Rosindell: To ask the Secretary of State for Foreign and Commonwealth Affairs what progress has been made with North Korea in recent months as regards its nuclear programme. [184239]

Mr. MacShane: The six-party talks process, the aim of which is the creation of a Korean Peninsula free of nuclear weapons, is continuing. While the United Kingdom is not involved in the talks we do fully support the process, and carefully monitor developments. We welcome the constructive approach that North Korea is taking towards the process.

Public Relations

Dr. Cable: To ask the Secretary of State for Foreign and Commonwealth Affairs what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183855]

Mr. Mullin: Foreign and Commonwealth Office costs in relation to 2003–04 are not yet available. The salary costs to the Foreign and Commonwealth Office of employees working in public relations and publicity came to £1.8 million in 2001–02 and £2.1 million in 2002–03. These figures exclude the salary costs of employees working on public diplomacy (the objective of which is to promote the UK overseas), recruitment advertising, provision of public information such as travel advice, and production of annual reports. They also exclude costs associated with Press and Public Affairs Officers at overseas posts, which could be provided only at disproportionate costs. Figures for previous years are not readily available and could be provided only at disproportionate costs.

Rwanda

Mr. Ivan Henderson: To ask the Secretary of State for Foreign and Commonwealth Affairs what his assessment is of the current situation in Rwanda. [184999]

Mr. Mullin: Rwanda has made impressive political and economic progress since the 1994 genocide and is on track to meet the targets outlined in its Poverty Reduction Strategy. But there is now a need to open up political space and build greater democratic

accountability. We continue to press the Rwandan Government on the need to improve human rights and democratic openness and we continue to monitor their progress.

Spending Review

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral statement by the Chancellor of the Exchequer of 12 July 2004, *Official Report*, columns 1129–39, on the spending review, what the total value is of his Department's assets, broken down by those held *(a)* in the United Kingdom and *(b)* abroad. [185005]

Mr. Straw *[holding answer 20 July 2004]*: The total book value as at 31 March 2004 for the Foreign and Commonwealth Office's fixed assets (i.e. non-current assets) is approximately £1,223 million.

Of this approximately 16 per cent. is UK based with the balance being located abroad:

	£ million
UK	195
Overseas	1,028

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral statement by the Chancellor of the Exchequer of 12 July 2004, *Official Report*, columns 1129–39, on the spending review, whether the £51 million combined increase for the World Service and the British Council is included in the 1.4 per cent. departmental increase. [185006]

Mr. Straw *[holding answer 20 July 2004]*: Yes.

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to the oral statement by the Chancellor of the Exchequer of 12 July 2004, *Official Report*, columns 1129–39, on the spending review, which assets his Department has identified *(a)* in the United Kingdom and *(b)* abroad which will be sold off. [185007]

Mr. Straw *[holding answer 20 July 2004]*: The Foreign and Commonwealth Office (FCO) has no property assets for sale in the United Kingdom.

Assets currently being sold overseas are:

	Assets to be sold
Abidjan	Offices
Beirut	House
Bilbao	Land
Bratislava	House
Bucharest	House
Budapest	Two flats plus garage
Buenos Aires	Two flats
Canberra	House
Caracas	Offices and house
Copenhagen	House
Dublin	House
Kuala Lumpur	House
Kampala	Land
Kiev	Flat
Lima	Offices
Lusaka	Office
Paris	Flats
Port Louis	House
Rio de Janeiro	Flat
San Salvador	Office and residence
Santiago	House plus flat
St. Georges (Grenada)	House
Tel Aviv	House
The Hague	House
Tashkent	House
Tunis	Land
Wellington	House

The FCO will continue to keep its estate holdings under review, and will participate in consultations with Sir Michael Lyons in due course.

Sudan

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will propose to the UN Security Council the invocation of Chapter VII of the charter with regard to Sudan. [178784]

Mr. Mullin: We have made clear that UN Security Council action will be needed if the Government of Sudan does not honour the commitments it has given to improve humanitarian access and security. Discussion of a US draft Security Council Resolution, which invokes Chapter VII of the UN Charter, is on-going.

Turkey

Mr. Win Griffiths: To ask the Secretary of State for Foreign and Commonwealth Affairs what issues were raised at the UK/Turkey Human Rights Dialogue meeting on 15th July; and what progress has been made on these issues. [185438]

Mr. MacShane: At the fourth UK/Turkey Human Rights Dialogue on 15 July the following issues were raised: Turkey's bid to open accession negotiations with the European Union; fundamental freedoms, including of expression, religion, demonstration, and association; torture and ill treatment; women's rights; functioning of the judiciary and law enforcement agencies; the situation in the Southeast and cultural rights; measures taken within the UK to combat terrorism; implementation of European Court of Human Rights judgments; co-operation in international organisations; and bilateral project assistance. In addition, we passed a list of specific cases of concern to the Turkish delegation.

The UK side congratulated the Turkish side for the enormous progress made by Turkey and encouraged them to maintain the momentum of reform, indicating the areas where we saw a need for further progress. The Turkish delegation undertook to consider the points raised.

US/UK Entry Bans

Mr. Ancram: To ask the Secretary of State for Foreign and Commonwealth Affairs whether Foreign Office officials are in regular contact with their US counterparts concerning the co-ordination of intelligence on persons banned from entering the United Kingdom and the United States. [183775]

Mr. Straw *[holding answer 14 July 2004]*: The US and UK co-ordinate closely on intelligence matters. It is the longstanding practice of successive Governments not to comment on intelligence and security matters. The security and intelligence agencies are outside the scope of the Code of Practice on Access to Government Information (paragraph 6, part 1).

NORTHERN IRELAND

Area Child Protection Committees

Ms Shipley: To ask the Secretary of State for Northern Ireland when legislation will be introduced to give area child protection committees in Northern Ireland a statutory basis. [183587]

Angela Smith: The Department of Health, Social Services and Public Safety is currently developing a Strategy for Children and Young People in Need which will consider a wide range of child protection matters including placing Area Child Protection Committees on a statutory footing. Decisions on the need for primary legislation will follow on from the completion of the strategy.

Care Workers

Mr. Beggs: To ask the Secretary of State for Northern Ireland what proposals he has to provide minimum guaranteed hours of employment to home helps and care workers. [184935]

Angela Smith: In Northern Ireland, decisions about minimum hours of employment for home helps and analogous staff are a matter for HSS Trusts in the context of presenting need, resources and service priorities.

The primary objective for HSS Trusts is to deliver effective, efficient and flexible community care services to persons in need. However, HSS Trusts do endeavour to allocate sufficient work to home helps and the other home care staff they employ that give viable work opportunities while seeking to manage the presenting demand for these services.

Mr. Beggs: To ask the Secretary of State for Northern Ireland what steps are being taken in Northern Ireland *(a)* to make conditions of employment more attractive for and *(b)* otherwise to reward the dedication and service provided in the community by care workers and home helps. [184936]

Angela Smith: The Department of Health, Social Services and Public Safety is currently negotiating with representatives of local Social Services Staff with the aim of including this group of staff in the new pay system for Health Service staff, Agenda for Change. This is a major initiative being undertaken jointly by all four UK Health Departments in partnership with the main trade unions representing staff to modernise the NHS and HPSS Pay System. The objective of the new pay system is to ensure equal pay for work of equal value and to provide opportunities for staff to develop their knowledge and skills.

The new pay system is currently being tested within 12 sites in the NHS in England, and is scheduled to be introduced within the HPSS in Northern Ireland with effect from October 2004.

Electoral Fraud

Mr. Tony Clarke: To ask the Secretary of State for Northern Ireland how many *(a)* arrests and *(b)* convictions for electoral fraud there have been in Northern Ireland in each of the last four years. [184560]

Mr. Pearson: Information is not available on the number of arrests made for electoral fraud. The most recent courts data available is 2002 and in the four years up to then there have been two convictions recorded for election offences in Northern Ireland:

In 2001 there was one conviction for "corrupt practice at local election"

In 2002 there was one conviction for "personation at a Westminster election".

Fisheries Conservancy Board Vessel

Mr. Beggs: To ask the Secretary of State for Northern Ireland what the estimated cost of repairs to the new Fisheries Conservancy Board vessel have been since 5 May. [184831]

Angela Smith: No repairs have been made to the vessel since 5 May. Regarding the incident that occurred on 7 July 2004 when the vessel hit a submerged object at sea, an estimate of the cost of repairing it is not yet available. An assessor from the Fisheries Conservancy Board's insurance company has inspected the vessel and his report is awaited.

Mr. Beggs: To ask the Secretary of State for Northern Ireland for what reasons the new Fisheries Conservancy Board vessel has needed repairs since it was launched. [184832]

Angela Smith: The vessel sustained damage to its propellers as a result of striking a submerged object while on patrol off the North Coast on 7 July 2004.

Flags Regulations 2000

Lady Hermon: To ask the Secretary of State for Northern Ireland what discussions he has had with the Equality Commission about the effectiveness of the Flags Regulations (Northern Ireland) 2000. [185085]

Mr. Spellar: There has been no such recent contact.

Juvenile Justice Centre

Lady Hermon: To ask the Secretary of State for Northern Ireland how many juveniles, broken down by gender, have been locked up in the Juvenile Justice Centre for *(a)* 20 hours, *(b)* 21 hours, *(c)* 22 hours, *(d)* 23 hours and *(e)* 24 hours in each month of this year. [185086]

Mr. Spellar: The Juvenile Justice Centre for Northern Ireland does not collect this information routinely at present. The information is contained in paper records. The cost of obtaining this information would be significant and disproportionate. The Centre has

recently amended its recording systems to collect information on single separation and the Centre is planning to store all such information on a database.

MRSA

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland in what circumstances hospitals in Northern Ireland are required to provide strict isolation for MRSA sufferers; and if he will make a statement. [184775]

Angela Smith: The Government recognise that the emergence of Methicillin Resistant Staphylococcus Aureus (MRSA) over the last twenty years represents a serious threat to the prevention, control and successful treatment of infection. It is committed to taking forward a wide range of actions to reduce the emergence and spread of MRSA and its impact on the treatment of infection.

In Northern Ireland, the Chief Medical Officer has issued guidance to health and social service trusts on MRSA and the management and control of hospital infection, and on resistance to antibiotics and other antimicrobial agents, in 1999 and 2000, respectively.

The guidance requires hospitals to carry out a risk assessment on a patient found to be colonised or infected with MRSA. The result of the assessment determines how the patient is managed and the type of isolation required, if any.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what surveillance has been undertaken by hospitals in Northern Ireland in respect of MRSA; and if he will make a statement. [184776]

Angela Smith: It has been a mandatory requirement for acute trusts to report MRSA bacteraemia rates since 2002 to the Communicable Disease Surveillance Centre, Northern Ireland. The Healthcare-Associated Infection Surveillance Centre (HISC) based at the Royal Victoria Hospital in Belfast since 2001 was formed to assist acute trusts in Northern Ireland to undertake nosocomial infections surveillance at local level. HISC commenced its work on orthopaedic surgical site infections and is developing further modules.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland how many MRSA cases were recorded by the Northern Ireland equivalent of the Public Health Laboratory Service in each year from 1983; and if he will make a statement. [184778]

Angela Smith: Information on MRSA infection in Northern Ireland has only been available from 2001 when a pilot exercise on bacteraemias was undertaken prior to the introduction of the mandatory reporting system in April 2002. The following numbers of patient episodes of such MRSA infection were recorded:

	Number
2001-02	228
2002-03.	218

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what independent inspections are undertaken of hospital hygiene management programmes in Northern Ireland; and if he will make a statement. [184779]

Angela Smith: The responsibility for cleaning and inspection of hospital hygiene lies with each of the Trusts and information relating to independent inspections is not held centrally on behalf of the Department of Health, Social Services and Public Safety (DHSSPS). However DHSSPS is aware that some Trusts do carry out internal inspections on their hygiene management programmes. Hospital hygiene management programmes in Northern Ireland are not inspected independently on behalf of DHSSPS.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what assistance has been given since 19 March 1997 to the *(a)* development and *(b)* use in hospitals in Northern Ireland of new (i) paints and (ii) cleaning products able to kill known microbes; and if he will make a statement. [184780]

Angela Smith: The responsibility for refurbishment and cleaning of hospitals in Northern Ireland lies with each of the hospital trusts. The Department of Health, Social Services and Public Safety does not hold information on the use of paints and cleaning products able to kill known microbes centrally.

New build facilities are however constructed to the standards specified in the NHS Estates, Health Building Notes, which provide for anti-microbial paint finishes in specialist sterile areas such as operating theatres.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what action has been taken in Northern Ireland to implement the guidelines for combating MRSA set out in the report of the working party headed by Mr. G. Duckworth since its publication in 1990; and if he will make a statement. [184781]

Angela Smith: The 1990 guidance, revised in 1998, is followed in Northern Ireland. A combined working party made up of the British Society for Antimicrobial Chemotherapy, the Hospital Infection Society and the Infection Control Nurses Association are currently revising the guidelines.

On receipt of the revised guidelines, the Department of Health, Social Services and Public Safety will take forward the development of appropriately revised local protocols.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what measures he proposes to introduce to tackle MRSA in nursing homes in Northern Ireland; and if he will make a statement. [184782]

Angela Smith: The Department of Health, Social Services and Public Safety issued guidelines for residential and nursing home staff for the management of residents with MRSA in 1996. These are in the process of being revised and updated. The Department's Regional Advisory Committee on Communicable Disease Control is currently considering a report commissioned on an infection control nursing strategy for Northern Ireland. It deals with the service to the statutory sector including community and secondary care services, the independent sector including nursing homes, and primary care.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland which hospitals in Northern Ireland stock antibiotics against strains of MRSA; and if he will make a statement. [184783]

Angela Smith: All acute hospitals in Northern Ireland have access to antibiotics effective against strains of MRSA.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland which antibiotics are deemed by his Department to be effective against strains of MRSA; and if he will make a statement. [184784]

Angela Smith: The majority of MRSA strains are sensitive to the following antibiotics: vancomycin, teicoplanin, linezolid, synercid, rifampicin, fucidin and the tetracyclines.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what the percentage change in the incidence of MRSA was in Northern Ireland in each year since 1989; and if he will make a statement. [184785]

Angela Smith: Information on the incidence of MRSA bacteraemias in Northern Ireland is available only from 2001. These figures showed a reduction of 10 cases, 4.4 per cent., between 2001–02 and 2002–03. Figures for 2003–04 are not yet available.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what guidance he gives to the Ambulance Service in Northern Ireland on *(a)* combating MRSA and *(b)* infection control generally; and what additional resources he plans to make available for this purpose. [184786]

Angela Smith: The Northern Ireland Ambulance Service developed a protocol for the management of MRSA patients during transportation, which was agreed by the relevant local specialists in infection control and local hospitals. The protocol was issued to all staff in 1999.

Training in general precautions and management of MRSA patients during transportation is provided to all operational staff during their basic training and as appropriate and necessary during their regular post proficiency training. The Northern Ireland Ambulance Service is currently reviewing this training and its compliance with the recently published Controls Assurance Standards for the Control of Infections.

The funding for this training is provided from within the Northern Ireland Ambulance Service annual training budget.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland how many and what percentage of deaths in Northern Ireland were caused by MRSA, or had MRSA as a contributing factor, in the last year for which figures are available, broken down by hospital; and if he will make a statement. [184787]

Angela Smith: The latest year for which figures are available is 2003. The number and percentage of deaths contributed to by MRSA in Northern Ireland, for this year are given in the following table. Information broken down by hospitals is not provided to prevent the possible disclosure of information on individuals. Work is under way to introduce specific codes for antibiotic resistance in conjunction with the World Health Organisation. Active efforts to automate mortality statistics also continue.

Number of registered deaths where the death certificate mentioned MRSA

	2003 (provisional data)
All deaths	14,462
MRSA	30
Percentage of deaths which mention MRSA	0.21

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland whether the isolation procedures set down by the Department of Health to combat MRSA in England and which were operative as at 19 March 1997 are operative in Northern Ireland; when the procedures were last brought to the attention of hospitals; and if he will make a statement. [184788]

Angela Smith: The isolation procedures used to combat MRSA in England are also in use in Northern Ireland. The most recent Departmental guidance (HSS(MD)9/2000), "the Management and Control of Hospital Infection", was issued to the Health and Personal Social Services in Northern Ireland in April 2000.

Andrew Mackinlay: To ask the Secretary of State for Northern Ireland what measures he has instigated with the Chancellor of the Exchequer to ensure that *(a)* there is correct and consistent reporting of deaths caused by MRSA, or where it is a contributory factor, in Northern Ireland, and *(b)* death certificates in Northern Ireland are completed as directed by the Government. [184790]

Angela Smith: In the UK, the International Classification of Diseases (ICD) is used to classify causes of death. ICD does not have a specific code for Methicillin Resistant "Staphylococcus aureus" (MRSA) but statistics on deaths where MRSA was a contributing factor can be obtained. This is done by identifying all deaths with specific ICD codes likely to be linked with MRSA and then manually checking the cause of death written on the death certificate. This is consistent with the approach taken in England and Wales.

Doctors are required to complete the cause of death medical certificate to the best of their knowledge and belief. Guidelines on completing death certificates are included at the front of every book of certificates. Certificates are not available without these instructions. Medical students receive training in their final year on completion of death certificates.

Public Housing

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland what percentage of public housing stock was classified at each level of unfitness in each parliamentary constituency in the most recent year for which figures are available. [185117]

Mr. Spellar: The information is not available in the format requested. The rate of unfitness for all housing at the Northern Ireland level was 4.9 per cent. in 2001. The rate of unfitness in the Housing Executive and housing

association sectors was around 1 per cent. While it is not possible to provide a robust and precise figure below the Northern Ireland level because of the sample size, it is unlikely that there is any significant variation across parliamentary constituencies.

Traffic Calming Measures

Mr. Gregory Campbell: To ask the Secretary of State for Northern Ireland how much public money has been spent on providing traffic calming measures in Northern Ireland in each of the past five years. [185116]

Mr. Spellar: The Chief Executive of Roads Service (Dr. Malcolm McKibbin) has been asked to write to the hon. Gentleman in response to this question.

Letter from Dr. Malcolm McKibbin to Mr. Gregory Campbell dated 20 July 2004:

You recently asked the Secretary of State for Northern Ireland a Parliamentary Question about how much public money has been spent on providing traffic calming measures in Northern Ireland in each of the past five years. I have been asked to reply as the issue raised falls within my responsibility as Chief Executive of Roads Service.

The table as follows indicates the actual expenditure spent on Traffic Calming Measures from 1999/2000 to 2003/04.

	£k
	Expenditure
1999–2000	1,208
2000–01	1,027
2001–02	1,545
2002–03	1,859
2003–04	2,011

You may be aware that the Regional Transportation Strategy for Northern Ireland, published in July 2002, envisages a large increase in the amount of funding available over the next 10 years for road safety related works. It proposes a doubling of funds for traffic calming and a 50 per cent. increase in funding for collision remedial schemes. The actual funding allocated over the RTS period will, of course, depend on the outcome of the normal budgetary processes.

HEALTH

Drug Treatment Services

Mrs. Helen Clark: To ask the Secretary of State for Health (1) what steps he is taking to ensure that local partnerships with voluntary sector and drug agencies are not adversely affected under regional commissioning; [184893]

(2) what evidence he has collated on whether regional commissioning of drugs or alcohol services lead to economies of scale. [184892]

Miss Melanie Johnson: The national treatment agency (NTA) for substance misuse is developing guidance on models of regional commissioning, to enable implementation of regional systems for the commissioning of residential drug and alcohol misuse specific services (Tier 4). Clear and concise guidance setting out recommended models for regional commissioning of Tier 4 services will be available shortly. This will be used by NTA regional teams to implement local commissioning mechanisms by the end of December 2004.

The regional commissioning implementation is part of the NTA's Tier 4 work programme which has been widely consulted on by key stakeholders in the substance misuse field, including voluntary sector agencies. The consensus in consultation was that regional commissioning would lead to more effective and efficient commissioning of Tier 4 treatment, and would improve client access. Although not directly targeted at alcohol specific services, this work is applicable for all substance misuse services.

The Tier 4 work programme is advised by an advisory group consisting of a broad range of representatives involved in Tier 4 treatment provision, including voluntary and statutory sector service providers, commissioners and service users.

Food Labelling

Mr. Drew: To ask the Secretary of State for Health how many prosecutions were launched for wrong or inadequate food information labelling over the last year, broken down by local authority. [184441]

Miss Melanie Johnson: I am informed by the Food Standards Agency (FSA) that the latest available information is for the calendar year 2001. Local authority data reported to the FSA shows that, during 2001, 137 premises were prosecuted for food labelling and presentation issues in England. The local authorities which took the prosecutions and the number of premises subject to prosecution by each authority are shown in the table.

Local authorities taking food labelling and presentation prosecutions for the year 2001

Local authority	*Number of premises prosecuted for food labelling and presentation issues*
Barnet	1
Bedfordshire	1
Buckinghamshire	4
Burnley	1
Coventry	5
Derby City	2
Dorset	1
Dudley	3
Durham	1
Ealing	1
East Yorkshire	4

Tower Hamlets	1
Warwickshire	1
West Sussex	3
West Yorkshire	14
Westminster	1
Total	137

Mr. Drew: To ask the Secretary of State for Health if he will make a statement on his discussions with the Trading Standards Institute on food information labelling. [184442]

Miss Melanie Johnson: Food labelling as part of the enforcement of food law is the responsibility of local authorities. The Food Standards Agency provides advice, information or assistance relating to enforcement of food law generally and liaises regularly with the Trading Standards Institute and its members on such issues.

Mr. Drew: To ask the Secretary of State for Health (1) if he will make a statement on progress being made by the European Union on the implementation of a common system of food information labelling; [184443]

(2) what discussions the Food Standards Agency had on the issue of food information labelling, with specific regard to the evolution of a common EU approach. [184444]

Miss Melanie Johnson: Food labelling rules are agreed at European Union level. Directive 2000/13/EC and the Nutrition Labelling Directive 90/46/EC provide the legislative framework. The European Commission is currently carrying out a comprehensive review of both these directives. It has said that it expects to adopt a proposal for amendment of 90/46/EC later this year and has asked member states for views on issues to be tackled in the review. The Food Standards Agency is currently consulting stakeholders before responding to this request.

Lager

Julie Morgan: To ask the Secretary of State for Health what studies he has made of *(a)* the purity of lager that is sold and *(b)* additives to lager. [184835]

Miss Melanie Johnson: There is no specific United Kingdom legislation governing the purity of lager or other beers. Any food must comply with the requirements of the Food Safety Act 1990, which makes it an offence to sell food that does not comply with food safety requirements or which is not of the nature or substance or quality demanded by the purchaser.

Only a small number of additives are authorised to be used in lager and these have all been subjected to a rigorous safety assessment. No surveys have been conducted on the use of these additives in lager.

Allergy Services

Mr. Best: To ask the Secretary of State for Health (1) if he will make a statement on allergy services in England; [183319]

(2) what the average length of time is that a patient has to wait to see a NHS allergy specialist. [183329]

Dr. Ladyman: The national health service improvement programme, "Putting People at the Heart of Public Services", sets out the commitment that the NHS will build a responsive service tailored to people living with long-term conditions including allergies. There are already substantial initiatives which will help patients with long term diseases, including:

The development of standards for better health.

The expert patient programme.

The chronic disease management programme.

Food Standards agency work on food allergy.

The new general practitioner contract.

It is the role of primary care trusts, in partnership with local stakeholders, to decide what services to provide to meet the health needs of their populations, including those with allergies. They are best placed to understand local health care needs and commission services to meet them.

Information on the average length of time a patient waits to see a NHS allergy specialist is not held centrally. This is because a patient with an allergy can be seen by a range of specialists including dermatologists, immunologists and respiratory disease physicians, as well as allergists. We expect that any patient being referred for a first outpatient appointment by their general practitioner should be seen within the national 17 week maximum waiting time.

Assisted Reproduction

Mr. Amess: To ask the Secretary of State for Health (1) whether the Human Fertilisation and Embryology Authority inspects clinics outside the United Kingdom involved in egg and sperm collection; and if he will make a statement; [185015]

(2) how much the Human Fertilisation and Embryology Authority spent on overseas visits for *(a)* inspection and *(b)* public relations purposes in each year since 1997; and if he will make a statement; [185030]

(3) which overseas fertility clinics the Human Fertilisation and Embryology Authority *(a)* visited in each year since 1997 and *(b)* plans to visit for inspection purposes; and if he will make a statement. [185031]

Miss Melanie Johnson: The Human Fertilisation and Embryology Authority (HFEA) does not inspect treatment or research establishments outside Great

Britain and Northern Ireland. Members and senior officers of the HFEA do make overseas visits to learn more about practice in other countries and to attend and speak at international conferences. They have also visited overseas establishments to investigate issues relating to the provision of treatment services within the United Kingdom. These included Cryos International Sperm Bank in Aarhus, Denmark in November 2003 and Global ART in Bucharest, Romania in July 2004.

The cost to the HFEA of overseas visits since 2003 are shown in the table:

Costs of overseas visits by HFEA members and staff 2003–04

	Cost (£)
2003[1]	5,481
2004[1,2]	10,039

[1] Includes attendance of a number of HFEA staff at the European Society of Human Reproduction and Embryology annual conference to meet requests for information and provide speakers for the main conference and fringe events.
[2] Figures from 1 January to 19 July 2004.

Figures from 1997 to 2002 can be provided only at a disproportionate cost.

Mr. Amess: To ask the Secretary of State for Health whether the sale of *(a)* human eggs and *(b)* human sperm is permitted in the United Kingdom; and if he will make a statement. [185016]

Miss Melanie Johnson: The sale of human gametes (sperm and eggs) is prohibited in the United Kingdom. Under section 12 of the Human Fertilisation and Embryology Act 1990, no money or other benefits shall be given or received in respect of the supply of gametes unless authorised by directions from the Human Fertilisation and Embryology Authority (HFEA). These directions authorise a maximum payment of £15.00 per donation plus reasonable expenses. The HFEA's code of practice gives guidance to clinics on what claims could be considered as reasonable expenses.

Biochemical Assay

Mr. Drew: To ask the Secretary of State for Health on how many occasions, in each of the last five years, NHS medical staff working within the chemical and laboratory facilities associated with the National Poisons Information Service have sent biological samples from patients for biochemical assay to agrochemical companies; which companies were used; for what exposures; and whether independent checks were carried out on the results. [184452]

Miss Melanie Johnson: No biological samples have been sent by the National Poisons Information Service associated laboratories for assay by the agrochemical industry. It may be possible that other national health service laboratories have sent such samples, but no central register is held.

Cancer

Tim Loughton: To ask the Secretary of State for Health what estimate he has made of the number of people who will suffer from cancer in *(a)* 2005, *(b)* 2010 and *(c)* 2020. [185508]

Miss Melanie Johnson: The Government has made no long-term estimate of the future numbers of people who will be diagnosed with cancer.

Care Homes

Mr. Swire: To ask the Secretary of State for Health how many care homes *(a)* closed and *(b)* opened in east Devon in each of the past five years. [182048]

Dr. Ladyman: Information on the number of homes opening and closing is not centrally available. The table shows the number of care homes in Devon as at 31 March for the years 1999 to 2001. Data on the number of care homes in east Devon is not centrally available.

Number of care homes[1] in Devon[2], 1999 to 2001

	Rounded numbers Number[1]
1999	1,380
2000	1,300
2001	1,220

Notes:
[1] Nursing data includes general nursing homes, mental nursing homes and private hospitals and clinics.
[2] Residential data refers to Devon council with Social Services Responsibilities. Nursing data refers to north and east Devon and south and west Devon health authorities.
Source:
RA and Rh(N) form A.

The Commission for Social Care Inspection (CSCI) is responsible for collecting information on care homes in England from 1 April 2004; and previously the National Care Standards Commission from 1 April 2002. I understand from the chair of the CSCI that for technical reasons CSCI cannot currently provide sub-national data on the numbers of care homes.

Coronary Heart Disease

Mr. Burstow: To ask the Secretary of State for Health how many finished consultant episodes there were for *(a)* paediatric, *(b)* adolescent and *(c)* adult coronary heart disease treatment in (i) England and (ii) each strategic health authority in each year since 1996. [184101]

Miss Melanie Johnson: The information requested has been placed in the Library.

Delayed Discharges

Tim Loughton: To ask the Secretary of State for Health how many delayed discharges were recorded in the South East in *(a)* 2002–03 and *(b)* 2003–04. [185506]

Dr. Ladyman: Figures for delayed transfers of care have been supplied for every quarter in 2002–03 and 2003–04, at primary care trust level and are available in the Library, including the latest figures for 2003–04, quarter 4 (March 2004). Nationally, the total number of patients of all ages occupying an acute bed with a delayed transfer, fell from 4,100 in March 2003 to 2,821 in March 2004.

Dentistry

Mr. Hurst: To ask the Secretary of State for Health what plans he has to increase the provision of dental treatment under the national health service in Essex. [184496]

Dr. Ladyman: The health economy in Essex has received an additional £1.5 million access funding from the Department, which primary care trusts (PCTs) will use to commission additional national health service dental capacity from existing practices and to provide new dental practices.

To ensure that more people can see a NHS dentist when and where they need, the equivalent of 1,000 dentists nationally will be recruited by October 2005.

In addition, NHS dentistry will benefit from unprecedented investment:

the Government will fund 170 extra undergraduate dental training places in England from October 2005, a 25 per cent., increase. Revenue costs for this will reach £29 million by 2010–11.

capital investment of £80 million over four years to support this expansion.

by 2005–06, NHS dentistry will receive extra funding of over £250 million a year, an increase of 19.3 per cent., compared with spending in 2003–04.

in recognition of the additional work and training dentists and their practice staff will need to prepare for changes, an extra £9 million will be provided to help dental practices prepare.

Additionally reforms will be introduced to modernise the dentistry profession for the 21st century through:

a new dentists contract making it possible for them to spend more time with patients and encourage preventative care.

using the skills of the entire dental team more efficiently with new roles for hygienists and dental nurses.

local PCTs, including those in Essex, will use the £1.6 billion devolved budget to ensure that local expenditure on dentistry is sustained.

Mr. Hurst: To ask the Secretary of State for Health what the cost of national health service dental treatment was in *(a)* the County of Essex in each year from 1974 to 1998 and *(b)* the County of Essex and the boroughs of Thurrock and Southend-on-Sea in each year from 1998 to 2003. [184497]

Dr. Ladyman: The gross and net fees paid to dentists for the provision of general dental services (GDS) represent the main element of primary dental care costs and are the data most readily available by health authority area. Data since 1992–93 are shown in the table. These figures exclude some payments to dentists such as commitment payments, maternity and seniority payments as well as superannuation payments made on their behalf. There is a discontinuity in the figures in the middle of 2002–03 because of the change in health administration areas.

Community, personal and hospital dental services have not been included in this table; these are directly commissioned by individual health authorities from locally managed resources rather than funded from a central national budget as is the case with the GDS.

NHS dental service: Gross and net fees paid by the GDS—March ending each year

£ million

	Health authority/ primary care trust	*Gross fees*	*Net fees*[1]
1992–93	Essex HA	38.6	25.9
1993–94	Essex HA	37.2	24.7
1994–95	Essex HA	39.9	26.4
1995–96	Essex HA	39.8	26.4
1996–97	Essex HA	40.6	26.9
1997–98	Essex HA	41.4	27.1
1998–99	Essex HA	45.1	29.1
1999–2000	Essex HA	47.3	30.6
2000–01	Essex HA	51.0	32.8
2001–02	Essex HA	51.8	33.1
2002–03			
First half	Essex HA	36.6	27.0
Second half	Essex SHA	26.3	16.9
	Southend-on-Sea PCT	3.1	2.1
	Thurrock PCT	1.7	1.2

[1] Excludes patient charge.

Mr. Hurst: To ask the Secretary of State for Health how many patients received dental treatment from the national health service in *(a)* the County of Essex in each year from 1974 to 1998 and *(b)* the County of Essex and the boroughs of Thurrock and Southend-on-Sea in each year from 1998 to 2003. [184498]

Dr. Ladyman: The information in the table shows the number of people registered with a general dental service dentist in Essex at 30 September year from 1992 to 2003 and for Thurrock and Southend-on Sea for 2002 and 2003.

Registration started in October 1990 and the numbers did not stabilise until 1992. Registrations lapse if patients do not return to their dentist within 15 months and so the registration figures exclude patients who have not been to their dentist within the past 15 months. The figures also exclude patients who receive dental treatment from other national health service dental services including dental access centres and those patients who choose not to register and who seek treatment on an occasional basis.

General dental service: number of registered patients September each year (thousand)—Essex family health services authority (FHSA), health authority (HA) and strategic health authority (SHA) and primary care trusts (PCTs)

Expert Patients Programme

Dr. Murrison: To ask the Secretary of State for Health what assessment his Department has made of the implications of the Expert Patients Programme for the UK. [184566]

Miss Melanie Johnson: The implications of setting up an expert patients programme in the United Kingdom were assessed by the expert patients taskforce set up in 2000. It concluded that such a programme had the potential to create a cadre of expert patients—people who have the confidence, skills, information and knowledge to play a central role in the management of life with chronic diseases and to minimise the impact of disease on their lives. From the evidence base available it also concluded that the tangible benefits would include:

- reduced severity of symptoms;
- significant decrease in pain;
- improved life control and activity;
- improved resourcefulness and life satisfaction.

A copy of the report can be found at: http://www.dh.gov.uk/PublicationsAndStatistics/Publications/PublicationsPolicyAndGuidance/PublicationsPolicyAndGuidanceArticle/fs/en?CONTENT_ID=4006801&chk=UQCoh9

An independent evaluation of the programme is being conducted by the national primary care research and development centre at the University of Manchester and the centre for health economics at the University of York. A copy of their report of a preliminary survey of patients to identify barriers to establishing functional self-management programmes in the National Health Service can be found at: http://www.npcrdc.man.ac.uk/PublicationDetail.cfm?ID=105

Fairer Charging Policies

Mr. John Randall: To ask the Secretary of State for Health (1) when he plans to review the impact of the Fairer Charging Guidance; [183776]

(2) what examples of best practice he has identified in using income from charging for personal care to improve services for *(a)* people with disabilities and *(b)* older people; [183777]

(3) what assessment he has made of the effect of charging for personal care on community care services; [183778]

(4) what proportion of income derived from charging for personal care services has been spent on services for *(a)* people with a disability and *(b)* older persons; [183779]

(5) what plans he has to monitor the impact of the fairer charging policies for home care and other non-residential social services in England. [183812]

Dr. Ladyman: We plan in due course to monitor and evaluate the impact of the guidance, "Fairer Charging Policies for Home Care". Information on council's use of income from charging is not held centrally.

Fairfield Hospital, Bury

Mr. Chaytor: To ask the Secretary of State for Health how many *(a)* doctors, *(b)* nurses and *(c)* support staff were employed by Fairfield Hospital, Bury, in each of the last 10 years. [184747]

Miss Melanie Johnson: The information requested is only available from 1995 onwards and is shown in the table.

Department of Health Non-Medical Workforce Census

Health Food Supplements

Mr. Hancock: To ask the Secretary of State for Health what plans he has to meet members of the health food supplements industry; what recent progress has been made with European Union directives which affect this industry; and if he will make a statement. [184297]

Miss Melanie Johnson: I met with representatives of the health food supplements industry on 20 and 21 July.

European Directive 2002/46/EC came into force on 12 July 2002. It has been implemented by The Food Supplements (England) Regulations 2003 and similar legislation in Scotland, Wales and Northern Ireland, which come into force on 1 August 2005.

HIB Vaccine

Dr. Stoate: To ask the Secretary of State for Health if he will introduce a booster dose of HIB vaccine for young children; and if he will make a statement. [184986]

Miss Melanie Johnson: Following the recent "Haemophilus influenzae" (Hib) booster campaign, the rate of Hib disease in children aged one to four has fallen by 87 per cent.

Before we can consider whether a booster dose of Hib should be offered routinely as part of the routine immunisation programme, an evaluation of the impact of the recent Hib campaign will need to be assessed and advice sought from the joint committee on vaccination and immunisation.

Intermediate Care

Mr. Horam: To ask the Secretary of State for Health how many NHS hospital trusts provide intermediate care facilities. [185003]

Dr. Ladyman *[holding answer 20 July 2004]:* This information is not collected centrally.

Manchester, Central

Tony Lloyd: To ask the Secretary of State for Health how much public money has been spent on health in Manchester, Central in each of the last seven years. [184171]

Miss Melanie Johnson: The information is not available in the format requested. Expenditure per weighted head in the Greater Manchester Strategic Health Authority (SHA) area, which includes the constituency of Central Manchester, has increased from £582.33 in 1997–98 to £992.61 in 2002–03 (the latest year

available). This does not represent the total expenditure per head, as an element of health expenditure cannot be identified by SHA area.

Mental Health

Tony Lloyd: To ask the Secretary of State for Health if he will make a statement on the financial position of the Manchester Mental Health Trust. [184738]

Miss Melanie Johnson: The information requested on the financial situation of the Manchester Mental Health Care Trust is not available in-year.

David Taylor: To ask the Secretary of State for Health what percentage of the total number of NHS in-patients is comprised of mental health in-patients who have been in hospital for more than a year. [185558]

Ms Rosie Winterton *[holding answer 20 July]*: There were 7,440[1] inpatients under the care of a mental illness consultant with a length of stay of a year or longer on 31 March 2003. On the same day, the estimated number of unfinished episodes in National Health Service hospitals for all specialties was 117,550 [1,2].

Therefore, the estimated percentage of the total number of all national health service inpatients on 31 March 2003 comprised of by mental health inpatients who had been in hospital for more than a year is 6.3 per cent.

[1] The information is from Hospital Episode Statistics.

Figures are rounded to the nearest 10.

[2] Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).

David Taylor: To ask the Secretary of State for Health how many in-patients have been in NHS hospitals under the care of mental health consultants for more than a year, excluding those with *(a)* dementia and *(b)* learning difficulties. [185559]

Ms Rosie Winterton *[holding answer 20 July 2004]*: This information is not available, as centrally held data on unfinished hospital episodes cannot be broken down by diagnosis.

Myasthenia Gravis

Mrs. Humble: To ask the Secretary of State for Health if he will make a statement on myasthenia gravis; and what support is available for sufferers of the disease in Blackpool north and Fleetwood constituency. [184115]

Miss Melanie Johnson: Myasthenia gravis is a neurological condition characterised by fluctuating levels of muscle weakness. There is no cure but treatment includes medication, surgery and palliation.

The national service framework (NSF) for long term conditions will focus on improving services for people with neurological conditions. While the NSF will not cover myasthenia gravis specifically, it will recommend improvements in standards, care and support that will benefit everyone with a neurological condition. We are committed to publishing the NSF as soon as possible.

Primary care trusts, in partnership with other local stakeholders, determine how best to use their funds to provide health services for their populations, including those with myasthenia gravis.

Neuro Disability Centre (Newcastle)

Mr. Cousins: To ask the Secretary of State for Health whether the business case for a new neuro disability centre in Newcastle upon Tyne has been approved; and when he expects Hunters Moor hospital to close. [185560]

Miss Melanie Johnson: An outline business case for a new neuro disability centre in Newcastle upon Tyne was agreed by Northumberland Tyne & Wear Strategic Health Authority in September 2003. Work is now taking place on the full business case. This is expected to be completed in the autumn of this year.

It is expected that Hunters Moor hospital will close in late 2006.

Personal Care Charges

Andy King: To ask the Secretary of State for Health if he will list examples he has collated of best practice in councils income from charging for personal care to improve services for *(a)* disabled people and *(b)* older people. [183820]

Dr. Ladyman: We plan in due course to monitor and evaluate the impact of the guidance, Fairer Charging Policies for Home Care. Information on councils' use of income from charging is not held centrally.

Pesticides

Mr. Drew: To ask the Secretary of State for Health for which Pesticides Safety Directorate and Health and Safety Executive approved pesticides and biocides there are no assays for biological samples in human poisoning cases held by the NHS. [184451]

Miss Melanie Johnson: The Pesticides Safety Directorate (PSD) does hold analysis methods for many of the active ingredients contained in the products licensed by them as pesticides.

There are currently no biocides approved by the Health and Safety Executive under the biocidal products directive.

Pesticide assays for biological samples are not offered routinely by most national health service laboratories. Assays for paraquat are available from a selected group of NHS laboratories. In exceptional circumstances, NHS laboratories are able to test for other compounds.

Schizophrenia

Ann Winterton: To ask the Secretary of State for Health (1) what assessment he has made of *(a)* research linking the regular consumption of cannabis with schizophrenia and *(b)* the effects of cannabis use on schizophrenia sufferers; and if he will make a statement; [184428]

(2) if his Department will commission further research into *(a)* the possible link between the regular smoking of cannabis with schizophrenia and *(b)* the effects of cannabis on schizophrenia sufferers; and if he will make a statement. [184429]

Miss Melanie Johnson: A number of recent Department funded policy research projects have been completed that have contributed to informing the Department's assessment on the scale and impact of the use of cannabis in those with mental health problems.

The Department has kept under review the national and international epidemiological and other research on these topics and has obtained expert advice on interpreting the research base.

The Department has no plans at present to commission further research into the possible link between the regular smoking of cannabis with schizophrenia. The Department has recently commissioned, jointly with the Medical Research Council, a multi-site, randomised controlled trial, "Evaluating a Psychological Intervention for clients with Schizophrenia and Co-morbid Substance Abuse". The Department is also currently considering commissioning additional work in this area.

The Department also monitors national and international research and has a range of expert advisers to inform policy.

Sleep Apnoea

Mr. Burstow: To ask the Secretary of State for Health how many finished consultant episodes there were for *(a)* paediatric and *(b)* adolescent obesity-related sleep apnoea treatment in (i) England and (ii) each strategic health authority in each year since 1996. [184100]

Dr. Ladyman: The information requested has been placed in the Library.

Solvent Abuse

Mr. Gray: To ask the Secretary of State for Health what plans he has to require further warnings on aerosol cans of the dangers of solvent abuse. [184586]

Miss Melanie Johnson: The Department has no immediate plans on placing further warnings on aerosol cans advising of the dangers of solvent abuse. Although voluntary, the British Aerosol Manufacturing Association estimates that approximately 90 per cent. of all cans carry warnings.

Mr. Gray: To ask the Secretary of State for Health when he last met *(a)* Solv-It and *(b)* Re-Solv to discuss solvent abuse. [184588]

Miss Melanie Johnson: The then Parliamentary Under-Secretary of State (Yvette Cooper) met with Re-Solv in November 2001 to discuss volatile solvent abuse. Departmental officials have continued to meet with Re-Solv.

Mr. Gray: To ask the Secretary of State for Health if he will make a statement on the health effects of solvent abuse. [184589]

Miss Melanie Johnson: Adverse effects vary greatly with the specific substance and mode of administration.

There is a wide range of immediate physical health effects reported including: flushed face and neck; cold sweats; loss of balance, unsteadiness, lack of co-ordination; fainting; headache; nausea and vomiting; confusion, dizziness, disorientation; tachycardia, palpitations; drowsiness, sedation, unconsciousness and risk of accidental injury while intoxicated.

There is a range of potential immediate psychological adverse effects reported including: confusional states, disorientation; distorted perceptions, delusions, hallucinations, pseudo-hallucinations, and aggression, agitation or fear.

A number of immediate socially significant adverse effects have been reported including: accidents (road traffic accidents, swimming accidents, fires, falls); disinhibition, possibly leading to engagement in high risk behaviour (dangerous driving, unsafe sexual practices), or the risk of becoming a victim of crime; acute intoxication that may possibly result in aggressive and violent behaviour, or disorderly conduct; relationship problems and impairment of educational achievements in adolescents.

Adverse effects of longer-term use that have been reported include: peripheral neurological damage and brain damage; renal failure; hepatotoxicity; severe gastrointestinal upset; muscle damage, and in the very long term, for example, 10 years or so, lasting impairment of brain function—affecting especially control of movement. Some of these effects may be reversible on stopping use.

Fatal toxicity varies greatly with the specific substance, and the causes of death can be unclear. A number of causes of death through solvent abuse have been described including: most commonly, cardiac arrhythmia or accident; loss of consciousness and death through choking on vomit; suffocation, for example, if a plastic bag is placed over the head to inhale and asphyxiation from blocked airways, (due to intense cooling in mouth) and laryngeal spasm caused by squirting lighter fuel down throat.

Combining use with alcohol and other central nervous system depressants will bring increased risk of asphyxiation and death.

Solitary use in potentially dangerous settings may increase risk of injury.

Tuberculosis (Asylum Seekers)

Dr. Murrison: To ask the Secretary of State for Health what proportion of UK induction centres offer asylum seekers screening for tuberculosis. [184846]

Miss Melanie Johnson: There are two induction centres operating in the United Kingdom: one in East Kent and the other in Yorkshire and Humberside. Both offer screening for tuberculosis.

Ungraded Eggs

Mr. Lidington: To ask the Secretary of State for Health what assessment has been made by the Food Standards Agency of the possible risks to human health of allowing ungraded eggs to be sold unmarked. [184196]

Miss Melanie Johnson: The microbiological status of eggs does not affect whether they are graded and marked.

The sale of ungraded eggs, whether marked or not, is subject to the same food safety rules that apply to graded eggs, and in the circumstances, no particular assessment has been made of the possible risks to public health of allowing ungraded eggs to be sold unmarked.

Women's Health

Diana Organ: To ask the Secretary of State for Health (1) how many NHS locations perform *(a)* hydro thermo ablation, *(b)* microwave ablation, *(c)* balloon ablation and *(d)* uterine fibroid embolisation for the treatment of menorrhagia or uterine fibroids; [181139]

(2) how many people in the last year suffering from menorrhagia or uterine fibroids were treated by *(a)* hydro thermo ablation, *(b)* microwave ablation, *(c)* balloon ablation and *(d)* uterine fibroid embolisation. [181140]

Miss Melanie Johnson: Information in the form requested is not available. Data from hospital episode statistics (HES) giving counts of admissions to national health service hospitals is shown in the table.

Primary diagnosis (ICD-10 Diagnosis Codes D25, N92.-, N95.0) Selected combinations of main operations and secondary operations
Count of finished admission episodes. NHS Hospital, England, 2002–03

Operation	*Total episodes*
Endoscopic, theraputic and other operations on uterus	9,923
b) Microwave ablation	1,116
c) Balloon ablation	1,317
d) Uterine fibroid embolisation	286

Notes:
1. A finished admission episode is the first period of in-patient care under one consultant within one healthcare provider. Please note that admissions do not represent the number of in-patients, as a person may have more than one.
2. Figures have not been adjusted for shortfalls in data (i.e. the data are ungrossed).
3. The primary diagnosis is the first of up to 14 (seven prior to 2002–03) diagnosis fields in the HES data set and provides the main reason why the patient was in hospital.
4. The main operation is the first recorded operation in the HES data set and is usually the most resource intensive procedure performed during the episode.
5. Diagnosis Codes
The ICD10 codes for menorrhagia and uterine fibroids are:
Primary Diagnosis
N92.- Excessive, frequent and irregular menstruation.
N95.0—Postmenopausal bleeding.
D25.- Leiomyoma of uterus.
Procedure Codes
a) Hydro thermal ablation
No specific OPCS4 code but would be in either Q16.- or Q17.- (data above provided as background).
b) Microwave ablation
Main Operation
Q16.8 Other specified, other vaginal operations on uterus. Or
Q17.4 Endoscopic destruction of lesion of uterus nec.
Secondary operation
Y11.4 Radiofrequency controlled thermal destruction of organ nec.
c)Balloon ablation
Main Operation
Q16.8 Other specified, other vaginal operations on uterus.
Secondary operation
Y11.8 Other specified, other destruction of organ.
d)Uterine fibroid embolisation
Main Operation
L71.3 Percutaneous Transluminal embolisation of artery nec.
Secondary operation
Z38.8 Specified terminal branch of aorta nec.
Source:
Hospital episode statistics, Department of Health.

Information relating specifically to hydro thermal ablation is not available. However, this would be included in the count under the heading "Endoscopic, therapeutic and other operations on uterus".

117 trusts performed hydro thermo ablation, microwave ablation, balloon ablation or uterine fibroid embolisation for the treatment of menorrhagia or uterine fibroids. Information on which trusts performed hydro thermo ablation for the treatment of menorrhagia or uterine fibroids is not available.

Yellow Card Scheme

Mr. Burstow: To ask the Secretary of State for Health what assessment he has made of the validity of criticisms of the Yellow Card scheme published in the "International Journal of Risk and Safety of Medicine" (2003, 16, 3–17); what account he has taken of the view of the Medicines and Healthcare Products Regulatory Agency on the matter; and what steps he has taken *(a)* to ensure that there has been no significant miscoding and misinterpretation of Yellow Card adverse drug reaction reports for paroxetine and *(b)* to ensure that there has been effective follow-up of reports relating to suspected paroxetine-induced suicidal behaviour. [178431]

Tim Loughton: To ask the Secretary of State for Health what assessment he has made of the Medicines and Healthcare Products Regulatory Agency criticisms of the Yellow Card scheme published in the "International Journal of Risk and Safety of Medicine" (2003, 16, 3–17); and what assessment he has made of *(a)* the adequacy of the coding and interpretation of Yellow Card adverse drug reaction reports for paroxetine and *(b)* the effectiveness of the follow-up of reports relating to suspected paroxetine-induced suicidal behaviour. [178696]

Ms Rosie Winterton: The Yellow Card scheme was recently subject to an independent review led by Dr. Jeremy Metters and the recommendations of the review are out to consultation, apart from the recommendation to introduce direct patient reporting, which has been accepted in principle.

The Medicines and Healthcare Products Regulatory Agency (MHRA) has carefully reviewed the criticisms made in the article by Medawar and Herxheimer in relation to follow up and coding of reports of suspected adverse reactions associated with paroxetine (Seroxat) received through the yellow card scheme. Professor Herxheimer and Mr. Medawar contributed to the Metters review.

Yellow cards submitted by health care professionals are held as scanned images and coded data are transposed onto the adverse drug reactions online information tracking (ADROIT) system. This is a relational database of around 500,000 reports, which enables complex analyses to be performed to detect new or changing drug safety hazards. Data from the yellow

card scheme cannot be used to quantify the risk of an adverse reaction. Standard operating procedures are in place which ensure quality control of data.

Errors in transposition onto the database occur at a low rate and are kept to a minimum by quality checks. These transposition errors do not impact on signal detection and risk evaluation.

The standardised terms used for coding were based on what has become the internationally adopted standard in drug regulation, MedDRA—the medical dictionary for regulatory activities. The ADROIT classification procedure reflects as closely as possible the words used by the reporter rather than introducing further interpretation of the reporter's words. The image of the original yellow card is available alongside the electronic record. This enables the MHRA to assess the totality of the yellow card data, which are routinely examined when risk assessment is undertaken, along with other data sources.

The MHRA will respond directly to the authors of the article and a copy of that reply will be placed in the Library.

CONSTITUTIONAL AFFAIRS

Clinical Negligence

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs (1) how many legal aid funded clinical negligence cases were successful in each year since 1997; [185043]

(2) in how many clinical negligence claims legal costs exceeded damages paid to patients in each year since 1997; [185044]

(3) if he will list the *(a)* legal costs and *(b)* damages awarded for clinical negligence cases in each year since 1997. [185045]

Mr. Lammy: The Legal Services Commission is unable to provide the information necessary to answer the questions immediately. I will write to the hon. Member once the information becomes available.

Community Legal Service

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what areas of activity are covered by the Community Legal Service. [185151]

Mr. Lammy: The Community Legal Service (CLS) provides access to legal advice and representation across a number of common categories of law: family, housing, welfare benefits, debt, immigration and nationality, employment, mental health, consumer and general contract, clinical negligence, personal injury, actions against the police, education, community care, and public law.

These categories relate to all in the community but particularly focus on the problems that face some of the most vulnerable members of society.

Support is provided for a range of services within these categories including legal help, help at court, legal representation, family mediation, help with mediation and general family help.

Community Legal Services

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how the new Community Legal Services Directory line will be monitored for *(a)* quality of advice, *(b)* access to advice and *(c)* capacity. [185262]

Mr. Lammy: The new Community Legal Service (CLS) Direct telephone has been designed to produce management information that will enable all key aspects of service to be monitored closely.

Advice delivered through the telephone service is subject to the same CLS specialist quality mark assurance that applies to CLS-funded face to face advice. There is also an additional set of quality requirements that apply solely to telephone advice, and telephone contractors are audited against these criteria. A sample of the advice given by the telephone contractors will also be subject to peer review by recognised experts, to ensure that it is of high standard.

The statistics generated relating to CLS Direct will give the Legal Service (LSC) an excellent new method of surveying where and how advice is accessed, the areas where demand for advice is greatest, and how this compares with supply. Telephone advice offers an easy means of accessing advice for people with disabilities, people in remote areas and people who have caring responsibilities. The LSC uses client feedback surveys to monitor whether telephone advice is effectively reaching these groups.

The number of calls received and cases opened will be monitored to establish trends. The telephone service can be easily scaled up to keep pace with demand. Advice providers within CLS Direct are contracted to deliver an agreed volume of advice hours per year, and one of the criteria the LSC used to select contractors was their ability to expand their number of advice hours if required.

Housing

Mr. Webb: To ask the Parliamentary Secretary, Department for Constitutional Affairs for how many empty houses his Department is responsible; and if he will make a statement. [182151]

Mr. Lammy: There are no empty houses on the departmental estate.

Individual Case Contracts

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what savings have been made since the introduction of individual case contracts for very high cost criminal cases. [185037]

Mr. Lammy: From September 2003 the Legal Services Commission (LSC) has been bringing all new eligible cases under contract. Research prior to the introduction of VHCCC contracts suggested that savings of about 30 per cent. might be achieved. The LSC is conducting

a survey of non-contracted VHCCC cases in order to establish a benchmark to compare with contracted VHCCC cases. However VHCCC cases are by their nature, long and complex and their attributes vary greatly from case to case. It will therefore be some time before a sufficient number of contracted cases have been completed before sensible comparisons can be made between contract and non-contract cases and before a reliable estimate of the savings can be made. However, the LSC calculates that during 2003–04 savings of around £26.5 million were achieved.

Prior to 2003–04 a pilot scheme was operated. While relatively few contracts were managed during this period the LSC estimates that savings of around £7 million were realised.

Judicial Appointments Commission

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs whom the Judicial Appointments Commission will consist of. [185022]

Mr. Leslie: Schedule 12 of the Constitutional Reform Bill provides that the Commission will consist of a lay chairman, five judicial members, two professional members (a barrister and a solicitor), five lay members, a tribunal (or similar) member and a lay justice.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the planned costs are of the proposed Judicial Appointments Commission. [185040]

Mr. Leslie: Our estimate for the annual running cost of the Judicial Appointments Commission is £8.5 million per year, reducing to £8 million, from 2008–09 due to its planned partial relocation out of London and the south-east.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs when the Judicial Appointments Commission will be set up. [185041]

Mr. Leslie: The timetable for the setting up of the Commission is dependent on the passage of the Constitutional Reform Bill through Parliament. If the Bill receives Royal Assent by spring 2005, we would aim to launch the Commission in spring 2006.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will make a statement on the proposed establishment of an independent Judicial Appointments Commission. [185042]

Mr. Leslie: The Constitutional Reform Bill, currently before Parliament, will establish a Judicial Appointments Commission for England and Wales. The Commission will be responsible for selecting candidates for judicial appointment. The manner in which the Commission does so will be for it to determine, subject to the overriding criterion that selection must be on merit, and subject to any guidance which the Secretary of State for Constitutional Affairs may issue, for example, in requiring the Commission to seek to expand the pool of candidates from which a selection may be made.

Legal Adviser Costs

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much the Government has paid to *(a)* profit-making and *(b)* not-for-profit legal advisers for legal aid cases in each year since 1997. [185035]

Mr. Lammy: Payments made in each year since 1997 to *(a)* profit-making and *(b)* not-for-profit legal suppliers for legal aid work were as follows:

£ million

	Payments to profit-making agencies[1]	*Payments to not-for-profit-making agencies*[1]
1997–98	1,948.6	12.9
1998–99	2,039.8	17.3
1999–2000	1,950.6	18.5
2000–01	2,035.4	29.2
2001–02	2,065.2	47.5
2002–03	2,189.0	56.9
2003–04	2,316.0	58.1

[1] All payments are gross of contributions paid by funded clients and costs and damages paid by other parties.

Legal Aid

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the cost of post-charge legal aid has been in each year since 1997. [185033]

Mr. Lammy: The cost of providing post-charge legal aid in England and Wales for each financial year since 1997–98 was as follows:

	£ million
1997–98	609.1
1998–99	651.0
1999–2000	640.7
2000–01	705.3
2001–02	810.7
2002–03	907.8
2003–04	985.4

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what reforms are planned for post-charge legal aid. [185036]

Mr. Lammy: My Department published the Draft Criminal Defence Service Bill together with a consultation paper on 17 May 2004, copies of which were placed in the Libraries of both Houses. The proposals set out in the Bill fall into two parts. Firstly, the transfer of the responsibility for grant of criminal legal aid from the courts to the Legal Services Commission, and secondly the re-introduction of the means test.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs for what categories of charge the Government plans to abolish post-charge legal aid. [185928]

Mr. Lammy: The Government is not planning to abolish post-charge legal aid for any category of charge.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the cost was of providing legal aid in immigration cases in each year since 1997. [185047]

Mr. Lammy: The overall costs for immigration and asylum advice, assistance and representation since 1997 in England and Wales were as follows:

	£million
1997–98	35
1998–99	53
1999–2000	61
2000–01	81
2001–02	129
2002–03	176
2003–04	200

The Legal Services Commission cannot separate the cost of immigration and nationality cases from asylum cases, but the vast majority are thought to relate to asylum. The substantial increase in legal aid expenditure has been due, in large part, to the introduction of legal aid for representation at appeal, efforts to reduce the backlog of asylum cases and increases in asylum seeker numbers. Cash figures are expected to remain high in 2004–05 as work continues to clear immigration and asylum backlogs.

We expect that costs will fall in subsequent years as a result of the current lower intake of asylum seekers and measures to control spending.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many *(a)* not for profit organisations and *(b)* private practice firms are undertaking legal aid work; and what fields of work are covered by the former organisations. [185038]

Mr. Lammy: 414 Not for Profit (NfP) agencies and 5,033 solicitors' offices had a contract with the Legal Services Commission at 31 March 2004. Some solicitors' offices hold contracts in both civil and criminal work.

The total number of offices with General Civil Contracts at 31 March 2004 was 4,715. Of this figure, 4,301 were solicitors' firms and 414 were NfP agencies.

2,669 solicitors' offices were operating under Criminal Defence Services (CDS) contracts on 31 March 2004. As at 1 July 2004, on the introduction of the new General Criminal Contract, 2,525 firms had signed the contract.

NfP agencies undertake civil legal aid work in a range of categories within the civil category of law. In 2004 NfPs agencies held contracts in the following categories: family, community care, consumer, debt, education, employment, housing, immigration, mental health, public law and welfare benefits.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many firms have stopped doing legal aid work in each year since 1997. [185039]

Mr. Lammy: The Legal Services Commission is able to provide figures for the number of solicitors' offices in England and Wales that have had civil contracts withdrawn each financial year since 2000, as follows:

	Number
April 2000 to March 2001	700
April 2001 to March 2002	539
April 2002 to March 2003	408
April 2003 to March 2004	633

The figures above do not distinguish between firms withdrawing from the legal aid scheme and those that have had their contracts terminated, as the Commission's systems do not make this distinction.

Contracting for criminal legal aid began in April 2001 with 2,931 suppliers. During 2001–02, 146 contracts were terminated and 151 were terminated in 2002–03. Between April 2003 and March 2004, 317 suppliers had criminal contracts terminated.

Figures prior to the introduction of contracting in 2000 are not available, as under the previous advice and assistance scheme there was no method of calculating how many firms stopped legal aid work.

Legal Services Commission

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what plans there are to charge interest on sums owed to the Legal Services Commission. [185032]

Mr. Lammy: The Legal Services Commission already attaches interest to the majority of debts attributable to it. Cases relating to the statutory charge have since 1988 attached interest. The rate of interest is linked to the Bank of England base rate and currently stands at 5 per cent. simple interest. £50 million of the gross debt due to the Commission relates to interest.

Of other debts due to the Commission interest is not sought as they are normally payable immediately. Where it is necessary to pursue them through the issue of court proceedings interest at the standard debt rate (8 per cent.) is claimed.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will break down by type of debt the money owed to the Legal Services Commission. [185950]

Mr. Lammy: The break down by type of debt of the money owed to the Legal Services in 2003–04 is as follows:

	£ Amount
Contribution due from funded clients	29,509
Costs to be recovered	25,431
Statutory charge	263,896
Damages	12,904
Amounts due from suppliers	31,718
Recovery of defence costs orders	1,722
Accrued income European social fund	82
Prepayments and other accrued income	404
Total	365,666

Legal Services Direct

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many

telephone advisers will provide advisory services for Community Legal Services Direct *(a)* in total and *(b)* at any one time. [185150]

Mr. Lammy: The Community Legal Service (CLS) Direct helpline has 50 'full time equivalent' advisers. 41.5 advisers offer advice in three categories of law (debt, welfare benefits and education) in England and Wales and 8.5 advisers are contracted to offer advice in housing and employment law in particular targeted areas. There are also non-qualified call centre agents, providing services within the CLS Direct telephone system in relation to the CLS Directory and leaflets. Four more advisers, focusing on debt, benefits and housing advice in Wales, are planned to come on stream in late summer.

There is no fixed number of advisers present at any given time. The national helpline service has been designed to be able to react to demand and the Legal Services Commission monitors the distribution of calls throughout the day working with its contractors to ensure that the number of advisers available is proportionate to demand.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much the Government grant to Legal Services Direct is for the next financial year. [185218]

Mr. Lammy: No separate allocation for Community Legal Service Direct has been allowed in the total funding for the Legal Services Commission for 2005–06.

The overall cost of Community Legal Service Direct in 2004–05 is expected to be £6.5 million.

This is made up of the cost of the national telephone service, the website (formerly JustAsk!), CLS Directory and CLS information leaflets.

It includes all payments made to technical contractors, contracted telephone advisors, all staffing and management costs within the Community Legal Service Direct team, and associated promotional costs.

Solicitors

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what plans the Government has for reducing unproductive time spent by defence solicitors in *(a)* courts and *(b)* police stations. [185034]

Mr. Lammy: The Government are anxious to ensure that solicitors' time is spent productively at court and at police stations. Last year we consulted on proposals to focus both the court duty solicitor scheme and the police station duty solicitor scheme on those cases where an individual's liberty was at real risk or where an individual's interests could be properly advanced. These changes were introduced in regulations and in the General Criminal Contract on 17 May 2004. The Fundamental Legal Aid Review (FLAR) is looking at the efficiencies of the processes for defence solicitors in police stations, as is the Effective Trial Management Programme (ETMP) for the courts.

Written Answers to Questions

INTERNATIONAL DEVELOPMENT

Iraq

Mr. Rosindell: To ask the Secretary of State for International Development (1) what percentage of households in Iraq have *(a)* working electricity and *(b)* running water; [184275]

(2) what percentage of the Iraqi population live below the poverty line for the country. [184276]

Hilary Benn: Social statistics available for Iraq are currently limited and unreliable. DFID is considering ways in which to assist building statistical capacity in Iraq and has made available £30 million to the UN, including for statistical support, through the International Reconstruction Fund Facility For Iraq.

The UN is working with the Iraqi Central Statistics Organisation and Ministries to develop up to date statistics. A United Nations Development Plan (UNDP) survey of Living Conditions of Iraqi Households is due to be completed in November this year and will include economic indicators such as income, day to day expenditures, availability of health and education facilities and access to public services. A World Food Programme Baseline Food Security Assessment, due next month, is likely to produce estimates of the amount of poverty in Iraq.

In early July, peak production was averaging around 4,500 MW, just above pre war production levels. Progress has not been as rapid as planned, primarily as a result of sabotage and security constraints. High summer demand due to increased temperatures has resulted in reduced hours of electricity supply to most areas of Iraq. Significant programmes of long-term rehabilitation of electrical infrastructure continue.

Estimates suggest that immediately after the conflict, 60 per cent. of urban and 30 per cent. of rural populations had access to safe water. Considerable work has taken place since the end of the conflict to improve the quantity, quality and reliability of water supplies. There are no reliable statistics of current coverage, but informal estimates by the former Coalition Provisional Authority (South) indicate that, in the south, coverage has increased by 10–15 per cent. since May 2003. Water quality and volume in Basra is expected to exceed pre-conflict levels during the summer of 2004.

The joint UN and World Bank Needs Assessments of last year estimated that of the 70 per cent. of the Iraqi population that live in urban areas, 30 per cent. live near the poverty line. Approximately 60 per cent. of the population is dependent on free food rations under the Public Distribution System (PDS). Poverty in southern Iraq is particularly serious. A 2003 World Food Programme study on chronic poverty calculated that approximately 21 per cent. of Iraq's centre/south population were chronically poor or unable to meet their basic needs over long periods of time, even after assistance provided through PDS.

Advertising

Dr. Cable: To ask the Secretary of State for International Development how much money was spent on advertising and promotional literature for his Department's initiatives, broken down by year since 1997. [183804]

Mr. Gareth Thomas: DFID's expenditure on publicity, which forms a part of our effort to raise development awareness and understanding of international development issues in the UK, has been as follows:

£

	Amount
1996–97	579,916
1997–98	399,755
1998–99	674,531
1999–2000	879,354
2000–01	1,484,281
2001–02	1,286,053
2002–03	1,300,000
2002–04	773,772

DFID does not hold a separate advertising budget, the majority of advertising relates to recruitment advertising in newspapers and journals. Figures for the four calendar years 2000–03 are as follows. Expenditure figures for the previous years are not available:

£

	Amount
2000	751,972
2001	1,208,191
2002	914,571
2003	871,246

Africa (Trade)

Mr. Jenkins: To ask the Secretary of State for International Development what policies the Department has to stimulate trade between African countries. [185838]

Hilary Benn: The Department for International Development (DFID) is supporting a number of initiatives on developing trade and regional integration between African countries. As part of the G8 Africa Action plan DFID has committed to support African efforts to advance regional economic integration and intra-African trade, including the development of regional institutions. This includes support for the work of the Trade and Regional Integration Department at the UN Economic Commission for Africa, and the Africa Union's Trade, Customs and Immigration Ministerial Committee.

DFID is also supporting the regional economic communities in Africa to implement free trade areas and customs unions. One example is the £12 million regional trade facilitation programme to help expand trade in Southern Africa, and improve the incomes of poor people by increasing economic opportunities in the region. The programme will cover the Southern Africa Development Community (SADC) and Common Market for Eastern and Southern African (COMESA) secretariats and member states.

The Economic Partnership Agreements (EPAs) which are currently being negotiated between the EU and the African Caribbean and Pacific (ACP) countries also offer an opportunity to promote regional integration in Africa. One of the key objectives in the Cotonou agreement for EPAs is the development of trade between neighbouring countries. The UK is pressing the European Commission to ensure EPAs progress towards this objective as well as supporting capacity building in African countries to purse this in the negotiations.

Capacity Building Projects

Angus Robertson: To ask the Secretary of State for International Development if he will list the institutional and regulatory capacity building projects *(a)* initiated and *(b)* funded by his Department each year since 1997 in (i) Asia, (ii) Europe, (iii) Central America, (iv) South America, (v) Oceania and (vi) Africa including the amounts (A) of money and (B) of aid in kind (1) pledged and (2) delivered to each; and if he will make a statement. [186231]

Mr. Gareth Thomas: It is not possible to give this information without incurring a disproportionate cost. DFID's "Policy Information Marker System" does not include specific markers for institutional or regulatory capacity building projects. While a substantial proportion of DFID projects have a capacity building component not all do so. To identify those that do would require examining all projects approved since 1997 individually. Since 1997 over 4,500 individual projects, each with a commitment level exceeding £100,000, have been approved. There are, of course, many other projects that have been approved below this ceiling.

Departmental Expenditure

Mr. Bercow: To ask the Secretary of State for International Development what the cost was of running the Overseas Development Administration's canteen facilities in 1996–97; and what the cost of running his Department's canteen facilities was in the latest year for which figures are available. [185568]

Mr. Gareth Thomas: The costs of running DFID's canteen facilities in 1996–97, and for the last financial year, are as follows:

£

	Amount
1996–97	51,214
2003–04	181,237

Mr. Bercow: To ask the Secretary of State for International Development what the cost has been of refurbishments to the fabric of buildings owned by his Department *(a)* in the UK and *(b)* overseas since May 1997. [185569]

Hilary Benn: Refurbishments to DFID buildings in the UK over the period in question are as follows:

1 Palace Street, London

(a) Refurbishment project over the period 2000–01—2001–02, total cost £27 million

(b) Maintenance and repair works to exterior of building, in accordance with

requirements of lease, 2003/04, cost £1.2 million

(c) Refurbishment/replacement of lifts, 2003/04, cost £350,000.

20 Victoria Street, London

(a) Refurbishment of building over the period 2001–02, total cost £1.2 million.

Abercrombie House, East Kilbride

(a) Refurbishment project over the period 2002–03 to date (due for completion late 2004), total cost £16 million.

Information on refurbishment costs in our overseas offices is not collated centrally and is not readily available. To give the figures requested would incur a disproportionate cost.

Mr. Bercow: To ask the Secretary of State for International Development whether office furniture designated for overseas offices owned by his Department is purchased *(a)* locally and *(b)* from the UK. [185570]

Mr. Gareth Thomas: Responsibility for the procurement of furniture in our overseas offices is normally delegated to the head of the office concerned. In the vast majority of cases procurement is carried out locally.

Mr. Bercow: To ask the Secretary of State for International Development what the cost has been of replacement office furniture within buildings owned by his Department *(a)* in the UK and *(b)* overseas since May 1997. [185546]

Hilary Benn: The total cost of replacement furniture within buildings owned by DFID, purchased within the UK since May 1997, is £3,128,000. Information on expenditure on furniture in our overseas offices is not collated centrally; to provide the figures requested would incur a disproportionate cost.

Mr. Bercow: To ask the Secretary of State for International Development what the cost was of printing *(a)* Overseas Development Administration headed notepaper in 1996–97 and *(b)* Department for International Development headed notepaper in the last year for which figures are available. [185561]

Mr. Gareth Thomas: DFID does not use pre-printed headed notepaper, and has not done so for many years, including the period in question. Headed paper is produced using templates on our internal IT systems.

Mr. Bercow: To ask the Secretary of State for International Development how much was spent by *(a)* the Overseas Development Administration in 1996–97 and *(b)* his Department in the last year for which figures are available on academic consultants;

and how many academic papers were published as a result of their work in (i) 1996–97 and (ii) the last year for which figures are available. [185562]

Hilary Benn: DFID's headquarters procurement group issued consultancy contracts to universities worth £15,189,439 in 1996–97 and £7,093,078 in 2003–04. Information from overseas offices is not held centrally and could only be provided by incurring a disproportionate cost.

DFID does not maintain a record of academic papers published.

Mr. Bercow: To ask the Secretary of State for International Development how much was spent by *(a)* the Overseas Development Administration in 1996–97 and *(b)* his Department in the last year for which figures are available on (i) advertising, (ii) public relations consultants and (iii) press officers, broken down by grade. [185563]

Mr. Gareth Thomas: DFID does not hold a separate advertising budget, the majority of advertising relates to recruitment advertising in newspapers and journals. Expenditure figures for years prior to 2000 are not available; the figure for the last calendar year, 2003 is £871,246.

DFID does not keep central records of all staff working on communications across the Department and this information could not be gathered without incurring a disproportionate cost for the years specified. Information on the press office and publicity staff is available from 1996–97 and is set out as follows.

	Number of officers	*Grades*	*Annual cost £*
1996–97	6 (press only)	Not available	195,000
2003–04	10	1xA1 4xA2 3xB1 2xB2	373,500

Disaster-prone Regions

Mr. Lazarowicz: To ask the Secretary of State for International Development (1) what actions have been taken to improve the Department's strategies for disaster-prone regions since the publication of the National Audit Office's report on Responding to Humanitarian Emergencies, HC 1227 of Session 2002–03; [186056]

(2) whether his Department systematically analyses and reduces disaster risks within its development planning and programming; [186057]

(3) when his Department will formulate a strategy to mainstream disaster preparedness and mitigation into its development work; and if he will make a statement; [186058]

(4) what plans his Department has to take disaster risks into account in its approach to development; and if he will make a statement. [186059]

Hilary Benn: A reduction in the incidence and impact of natural and man-made disasters is an essential precondition for poverty reduction in many countries.

DFID accepts that we need to give due weight to ensuring that our development policies are risk aware and that people's vulnerability to risks is reduced. For example, DFID's Global Environmental Assets team is seeking to promote the integration of climate change risk into development planning. DFID's Central Asia, South Caucasus and Moldova team has carried out a review of disaster preparedness and response capacity in Central Asia to analyse gaps in support of disaster reduction and prevention.

DFID has agreed to change the guidance for DFID country teams preparing Country Assistance Plans to ensure that disaster risk reduction issues are taken into consideration. DFID's guidance to country teams on environmental screening instructs country teams to examine disaster risk issues.

DFID is in the process of reviewing how we might step up our work in this area. A scoping study, commissioned by DFID and undertaken by the Overseas Development Group, will report soon on how the development community and DFID can tackle disaster risk most effectively. It will also advise on ways to better mainstream disaster risk reduction and mitigation into development work. DFID expects to develop a forward strategy for DFID on disaster reduction in the light of the findings of this study. The findings will be disseminated to interested parties.

The Government are commissioning a report to document UK civil society work in disaster reduction in preparation for the World Conference on disaster reduction to be held in Kobe, Japan next January, it is hoped this will enable networking and skill sharing within the disaster community.

HIV/AIDS

John Robertson: To ask the Secretary of State for International Development what assessment his Department has made of the impact on children with HIV/AIDS of the shortage of specially designed drugs. [185351]

Mr. Gareth Thomas: Every day, about 1,700 children become infected with HIV. There are an estimated 2.1 million children under age 15 living with HIV in the world today. The vast majority of these are in developing countries.

Including children with HIV in treatment and care programmes is critical. Brazil has successfully implemented antiretroviral (ARV) treatment for children and adolescents as part of its national treatment policy. A number of other countries, including Uganda, Zambia, and South Africa, are beginning to enrol large numbers of children with HIV in their programmes.

However, the absence of specially designed drugs for children causes problems. Many ARVs are not available in paediatric formulations that can be given to small children as a liquid, and tablets are often not

manufactured in small enough doses for a child's body weight, requiring pharmacists and doctors to guess how to break up tablets or dose according to weight.

The UK, through its recently published strategy on HIV and AIDS and DFID's new policy on HIV and AIDS treatment and care, has committed to support research into paediatric treatments including paediatric ARVs, and future treatment options. Indeed, the new HIV and AIDS Strategy prioritises the needs of children alongside those of women and vulnerable and marginalised groups. The UK has committed £150 million over the next three years on work to respond to the needs of orphans and other children made vulnerable by HIV and AIDS. DFID has also endorsed UNICEF's Strategic Framework on Orphans and Vulnerable Children. We will work to ensure children have access to treatment and care.

Overseas Aid/Funding

Angus Robertson: To ask the Secretary of State for International Development how much funding the UK provided *(a)* directly, *(b)* through the EU and *(c)* through trade agreements to (i) Nicaragua, (ii) the Philippines, (iii) Romania and (iv) Ukraine in each of the past five years; and if he will make a statement. [185650]

Mr. Gareth Thomas: The table shows how much funding DFID provided directly and through the EU, for the relevant countries:

UK Aid

£000

	1998/99	1999/2000	2000/01	2001/02	2002/03
Nicaragua	1,996	3,780	636	613	2,397
Philippines	10,220	6,424	2,245	5,744	1,177
Romania	4,158	3,744	3,439	5,396	6,167
Ukraine	8,619	8,442	9,331	8,877	7,892

EU multilateral share

£million

	1997	1998	1999	2000	2001
Nicaragua	2.6	3.3	3.0	5.2	3.6
Philippines	3.0	3.9	3.4	3.4	2.9
Romania	11.4	19.1	2.8	32.2	57.5
Ukraine	0.8	11.2	8.4	8.8	11.8

There is no separate funding under trade agreements. Any funding relating to trade agreements is included in the above figures.

Angus Robertson: To ask the Secretary of State for International Development how much funding the UK provided *(a)* directly, *(b)* through the EU and *(c)* through trade agreements to (i) Honduras, (ii) Kazakhstan, (iii) Macedonia, (iv) Moldova and (v) Mongolia in each of the last five years; and if he will make a statement. [185652]

Mr. Gareth Thomas: The following table shows how much funding DFID provided directly and through the EU for the relevant countries:

UK aid

£000

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
Honduras	3,351	2,097	1,371	1,220	1,075
Kazakhstan	1,359	1,077	896	699	720
Macedonia	530	12,326	2,185	8,066	1,837
Moldova	825	829	1,074	1,584	3,354
Mongolia	477	322	1,408	542	395

EU multilateral share

£ million

	1997	*1998*	*1999*	*2000*	*2001*
Honduras	0.7	1.3	1.8	2.2	1.7
Kazakhstan	1.3	1.4	1.9	0.8	0.9
Macedonia	1.0	3.0	9.7	10.6	6.7
Moldova	0.8	0.9	1.1	0.7	0.6
Mongolia	0.3	0.2	0.7	0.7	0.4

There is no separate funding under trade agreements. Any funding relating to trade agreements is included in the figures.

Angus Robertson: To ask the Secretary of State for International Development how much funding the UK provided *(a)* directly, *(b)* through the EU and *(c)* through trade agreements to (i) Albania, (ii) Azerbaijan, (iii) the Dominican Republic, (iv) El Salvador and (v) Georgia in each of the last five years; and if he will make a statement. [185653]

Mr. Gareth Thomas: Details of funding are as set out as follows:

UK aid

£000

	1998–99	*1999–2000*	*2000–01*	*2001–02*	*2002–03*
Albania	643	15,240	2,288	4,178	2,582
Azerbaijan	498	697	688	479	269
Dominican	253	35,209	646	11,082	17,362
El Salvador	299	318	6,265	4,572	945
Georgia	1,272	958	2,789	2,447	2,386

EU

£ million

	1997	*1998*	*1999*	*2000*	*2001*
Albania	2.2	9.7	13	10.6	7.6
Azerbaijan	2	3	2.6	2.5	1.6
Dominican	2.3	4.1	3.2	1.6	1.6
El Salvador	1.5	2.4	1–6	1.8	1.8
Georgia	2	2.7	3.2	1.7	2.9

There is no separate source of funding for trade agreements and any such assistance is included in the figures.

Angus Robertson: To ask the Secretary of State for International Development how much *(a)* monetary aid and *(b)* aid in kind his Department has (i) pledged and (ii) delivered to (A) Albania, (B) Azerbaijan and (C) the Dominican Republic (1) in each financial year since 1997–98 and (2) in each month since January 2003; what new programmes his Department has *(y)* initiated and *(z)* funded in each country since January 2003; and if he will make a statement. [185654]

Mr. Gareth Thomas: The table as follows shows what has been delivered to Albania, Azerbaijan and Dominican Republic in terms of aid in kind and monetary aid from 1997–8 to 2003–4 (latest figures). DFID does not keep monthly records of pledges or expenditures specifically in terms of aid in kind or monetary aid; DFID also does not keep records of how much has been pledged specifically in terms of aid in kind or monetary aid.

1. Humanitarian Assistance comprises food aid and other humanitarian assistance.
2. This comprises both interest and principal foregone under Retrospective Terms Adjustment. Amounts reported are repayments which would have fallen due each year.
3. 2001–02 is a unique year in that total DFID expenditure is understated by around £140 million due to move to resource accounting.
4. The figures for 2003–04 are still provisional.

There are two new programmes in Albania: Support to Tax Administration Reform. The goal of this project is "To strengthen and stabilise the role of the State in order to alleviate poverty in Albania through the positive effect of economic activity and stability" at a cost of £1.2 million over two years; National Strategy for Socio-Economic Development Support Programme (NSSED): Albania, the goal of this programme is to mainstream the NSSED in public policy processes over the next three years at a cost of £1.2 million.

DFID does not have a bilateral programme in Azerbaijan. Direct funding to Azerbaijan is however provided through the Small Grants Scheme (SGS) administered by the British embassy. For 2004–05, the budget for the SGS is £36,450.

Together with the Foreign Office and the Ministry of Defence, DFID is supporting work in the South Caucasus through the Global Conflict Pool (GCPP). From September 2003, the UK has been supporting Conflict Resolution work in Nagorno Karabakh. This aims to improve understanding of the conflict among stakeholders, strengthen conflict sensitivity amongst national and international actors working in the region and implement activities that contribute to peace. DFID's contribution to this work is £2.4 million over three years.

DFID gave support to the Dominican Republic and Haiti on the 1 May (40,000) after the flooding there.

Angus Robertson: To ask the Secretary of State for International Development how much *(a)* monetary aid and *(b)* aid in kind his Department has (i) pledged and (ii) delivered to (A) El Salvador, (B) Georgia, (C) Honduras, (D) Kazakhstan, (E) Macedonia, (F) Moldova, (G) Mongolia and (H) Nicaragua (1) in each financial year since 1997–98 and (2) in each month since January 2003; what new programmes his Department has (x) initiated and *(y)* funded in each country since January 2003; and if he will make a statement. [185715]

Mr. Gareth Thomas: The following table shows how much monetary aid and aid in kind DFID has delivered in each financial year since 1997–98.

Bilateral aid by country

[2] This comprises both interest and principal foregone under retrospective terms adjustment. Amounts reported are repayments which would have fallen due each year.
[3] 2001–02 is a unique year in that total DFID expenditure is understated by around £140 million due to move to resource accounting.
[4] Figures for 2003–04 are provisional.

DFID does not keep monthly records of pledges or expenditures specifically in terms of aid in kind or monetary aid.

The following table shows new programmes DFID has initiated and funded in each country since January 2003.

£

Country	Programme	Commitment
El Salvador	Network to combat commercial sex exploitation	223,000
Georgia	Poverty reduction and good governance assessment	4,000
Georgia	Technical assistance to the Ministry of Health to establish a sustainable and affordable system of primary healthcare	5,220,000
Georgia	Technical assistance to the Ministry of Finance to enable the Government to utilise resources effectively	165,000
Honduras	Poverty reduction strategy	1,582,000
Honduras/ Nicaragua	HIV/AIDS programme	1,900,000
Central America including Honduras/ Nicaragua/ El Salvador	Support to regional unit for technical assistance (RUTA) to promote rural development	700,000
Macedonia	Public administration reform phase 2	3,000,000

£

Country	Programme	Commitment
Moldova	Support for the national rural development strategy	9,000
Moldova	Support to the rural investment services project	2,680,000
Moldova	Poverty synthesis study to strengthen poverty reduction and improve programme effectiveness	5,000
Moldova	Contribution to the population census	200,000
Moldova	Continuation of support to the Ministry of Finance for the development of a medium term expenditure framework	500,000
Moldova	Work through the global conflict prevention pool on a peace-building framework project to facilitate civil society engagement in conflict reduction (with the FCO)	440,000
Nicaragua	Civil society monitoring	434,000
Nicaragua	DFID/Inter-American development bank (IDB) cooperation to enhance social inclusion	1,669,250
Nicaragua	Maximising access to appropriate quality adolescent reproductive health services	500,000
Nicaragua	Violence reduction	720,000
Nicaragua	Promoting women's citizenship	179,000
Nicaragua	Youth sexual and reproductive health rights	500,000
Nicaragua	Promoting equity through economic growth	2,500,000

There have been no new programmes initiated in Kazakhstan or Mongolia since January 2003. DFID provides direct funding to these countries through the Small Grants Scheme (SGS) administered through the British Embassy. For 2004–05 the budget for the SGS is £45,000 and £200,000 respectively.

Policies (Environmental Impact)

Mr. Horam: To ask the Secretary of State for International Development how many new policy proposals or significant changes in policy were produced in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185106]

Mr. Gareth Thomas: The Department for International Development (DFID) recognises that environmental assessment is essential to ensure that environmental sustainability is integrated into international development policy, planning and operations.

All DFID's development initiatives with a spend of more than £1 million are subject to environmental screening, which is also advised for projects of less than £1 million where there is a likelihood of significant environmental impacts. Where appropriate, screening will initiate a more comprehensive appraisal and assessment for policies, plans and programmes. The procedures, and guidance on the screening process, are detailed in DFID's Environment Guide (2003), which is available on the Department's public website www.dfid.gov.uk.

In the last year, the rate of application of environmental screening to projects has almost doubled (from 34 per cent. in 2002–03 to 62 per cent. in 2003–04), following a review and strengthening of the procedures. A new team has been established within DFID to monitor and strengthen these procedures.

Public Relations

Dr. Cable: To ask the Secretary of State for International Development what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183843]

Mr. Gareth Thomas: Communication is integral to DFID's mission. DFID does not keep central records of all staff working on communications across the Department and this information could not be gathered without incurring a disproportionate cost for the years specified. Information on the press office is available from 1997 and is set out in the following table for all completed financial years to 2003–04.

	Number of press officers	Annual cost
1997–98	6	243,000
1998–99	4	240,000
1999–2000	3.3	100,000
2000–01	4.5	150,000
2001–02	4	148,000
2002–03	5	191,000
2003–04	6	230,000

ELECTORAL COMMISSION

Comptroller and Auditor General's Report

Mr. Heath: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission when the Speaker's Committee will publish the Comptroller and Auditor General's statutory value for money report to it for 2002–03 on the Electoral Commission. [186065]

Mr. Viggers: At its meeting on 14 July, the Speaker's Committee agreed to publish the Comptroller and Auditor General's report, which deals with the Commission's expenditure on its Public Awareness Strategy in 2002–03, as an Appendix to its First Report

2004. This report has been laid before the House and published today, 22 July, as House of Commons Paper No. 924. Copies are available in the Vote Office.

Postal Voting

Mr. Gordon Prentice: To ask the hon. Member for Gosport, representing the Speaker's Committee on the Electoral Commission what information he has as to when the Electoral Commission expects to publish its reports on the June 2004 all-postal pilot elections. [186438]

Mr. Viggers: I understand that the Commission has advised the Secretary of State for Constitutional Affairs of its intention to submit its evaluation of the June 2004 all-postal pilots to him on 27 August 2004. On this date the Commission will electronically publish on its website (www.electoralcommission.org.uk) all four regional reports as well as an overarching report. This will enable its conclusions to be available before Parliament returns from its summer recess in September.

Printed copies of all the reports will be available from 13 September and the Commission will send a copy of each of the reports to every Member of the House.

ADVOCATE-GENERAL

Departmental Staff (Upper Age Limits)

Mr. Andrew Turner: To ask the Advocate-General whether her Department *(a)* has a set retirement age which applies to all or most personnel and *(b)* has a maximum age beyond which applications for employment will not be considered; and what the age is in each case. [186037]

The Advocate-General for Scotland: I refer the hon. Member to the answer given today by my hon. Friend, the Parliamentary Under-Secretary of State for Scotland.

ENVIRONMENT, FOOD AND RURAL AFFAIRS

Fish Stocks

1. **Chris Grayling:** To ask the Secretary of State for Environment, Food and Rural Affairs what plans she has to preserve fish stocks. [185740]

Mr. Bradshaw: There are a range of national and EU measures in place to conserve fish stocks in our waters. Today I announced the Government's intention to seek a closure of the bass pair trawl fishery off South-West England.

Off-road Motor Cycles

18. **Andy Burnham:** To ask the Secretary of State for Environment, Food and Rural Affairs what steps she is taking to restrict the use of off-road motor cycles in *(a)* rural and *(b)* semi-rural areas. [185761]

Alun Michael: I recently consulted on a range of measures to tackle the problem of inappropriate use of off-road vehicles and to curtail inappropriate use of off-road motorcycles and other mechanically propelled vehicles on public rights of way. These proposals are relevant to both rural and semi rural areas. I shall respond to the consultative process and the views expressed in the near future.

Horticulture

19. **Mr. Grogan:** To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on policy towards the horticultural sector. [185762]

Alun Michael: The Government welcome the contribution of horticulture to the UK economy. It is worth some £2 billion at the farm gate and supports substantial downstream activity in packhouses, processing and the garden industry. We will continue to work with the industry through the Sustainable Farming and Food Strategy, by funding research and development and through the England Rural Development Programme.

Access Rules Review

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs what progress has been made by the European Commission in completing the review of access rules referred to in Article 19 of Council Regulation (EC) No. 2371/2002; and what the latest anticipated timescale is for the completion of this review. [184159]

Mr. Bradshaw *[holding answer 15 July 2004]:* The Commission has sought and secured a delay in the production of a report into the effectiveness of access restrictions, which was originally intended to be made available by 31 December 2003. During 2003 and 2004, the Commission secured agreement on the scope of the review, established a scientific expert group to agree its terms of reference and established scientific expert sub-groups to conduct reviews and draft reports for evaluation of each access rule. The Commission's scientific expert groups first met in April 2004, the sub-groups are now preparing their reports. No revised timescale for the Article 19 review has been agreed, but the Commission's final report and corresponding proposals are expected before the end of 2004.

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs what *(a)* submissions and *(b)* representations have been made to her by the Scottish Executive in relation to the review of access rules referred to in Article 19 of Council Regulation (EC) No. 2371/2002. [184160]

Mr. Bradshaw *[holding answer 15 July 2004]:* In the course of routine business the Scottish Executive has made numerous written and oral representations to Defra on several aspects of the Article 19 review, concentrating on the implications of the review for the Shetland Box access arrangements. Representations from Scottish Executive have included views on the proper scope and timetabling of the review, the membership and terms of reference for the Commission's scientific expert groups, and the UK strategy for anticipating and handling proposals arising from the Commission's report, including effective stakeholder engagement and consultation.

The Scottish Executive provided Defra with detailed submissions on the effectiveness of the Shetland Box during the negotiations leading to the reformed framework regulation of the Common Fisheries Policy. No further submissions have been provided.

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs what *(a)* submissions and *(b)* representations she has made to the European Commission in relation to the review of access rules referred to in Article 19 of Council Regulation (EC) No. 2371/2002. [184161]

Mr. Bradshaw *[holding answer 15 July 2004]:* UK submitted written comments on the scope of the Article 19 review, made necessary analytical data available to the Commission and offered active co-operation in the establishment and membership of necessary scientific expert working groups.

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs whether, in relation to the review of access rules referred to in Article 19 of Council Regulation (EC) No. 2371/2002, she intends to seek to justify the continued existence of the Shetland Box in terms of conservation and sustainable exploitation objectives. [184162]

Mr. Bradshaw *[holding answer 15 July 2004]:* Yes, the UK agrees that the Shetland Box access conditions should be strengthened and updated but considers the Shetland Box arrangement to be a vital protection for an important ecosystem—and also believes its continuation is also justified in other terms.

Mr. Salmond: To ask the Secretary of State for Environment, Food and Rural Affairs whether, in relation to the review of access rules referred to in

Article 19 of Council Regulation (EC) No. 2371/2002, she intends to seek to justify the continued existence of the principle of relative stability in terms of conservation and sustainable exploitation objectives. [184163]

Mr. Bradshaw *[holding answer 15 July 2004]:* No. The principle of relative stability is not being reviewed. Following working group discussions in 2003–04, it was agreed that the Article 19 review shall be limited to include the Shetland Box, the Plaice Box and certain access restrictions in the outermost territories of the Community.

Air Freight (Food)

Mr. Cousins: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the *(a)* value and *(b)* quantity of food airfreighted into the United Kingdom between 1999 and 2003. [185174]

Alun Michael: An assessment of airfreighted food is being made as part of a wider study commissioned by the Department on the impact of food transportation. The report of the study of "The Validity of Food Miles as an Indicator of Sustainable Development" will be published soon. I will write to the right hon. Member to inform him when the report is published.

Ammonium Nitrate

Patrick Mercer: To ask the Secretary of State for Environment, Food and Rural Affairs how often she meets industry representatives to discuss the manufacture and safe storage of ammonium nitrate fertiliser; and whether she has held such meetings since March. [184604]

Alun Michael: Officials from Defra and other key Government Departments have met industry representatives on a regular basis (weekly or more frequently), both before and since March, to discuss the manufacture and safe storage of ammonium nitrate fertiliser.

Aviation Emissions

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the carbon dioxide emissions from the aviation sector in each year since 1990; and what the projected figures are for each year to 2020. [184852]

Mr. Morley: Table A shows the estimated emissions of carbon dioxide from domestic and international flights departing from UK airports. The estimates are expressed in million tonnes of carbon per year (MtC/yr), for the period 1990–2002 as published in the latest UK Greenhouse gas inventory, released in April 2004.

Table A: Emissions of CO_2 from aviation, 1990–2002, MtC/yr

	Domestic	International	Total
1990	0.59	4.03	4.62
1991	0.58	3.97	4.55
1992	0.61	4.40	5.00
1993	0.62	4.70	5.32
1994	0.61	4.89	5.50
1995	0.65	5.20	5.85
1996	0.68	5.54	6.21
1997	0.70	5.90	6.60
1998	0.73	6.60	7.33
1999	0.75	7.23	7.98
2000	0.76	8.02	8.79
2001	0.80	7.53	8.33
2002	0.80	7.34	8.14

Projected total emissions from aviation are published in the DfT's "Aviation and Global Warming" technical paper. Table B shows these data for the UK, also in MtC/yr.

Table B: Total (international plus domestic) projected emissions for UK aviation emissions, MtC/yr

	Total emissions
2010	10.8
2020	14.9

These projections are based on emissions from all flights departing the UK. Emissions projections for intervening years to 2020 are not available.

British Beef

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the cost to the UK of France's ban on British beef; and what steps she has taken to recover such costs. [184006]

Mr. Bradshaw: The value of beef exports from the UK to France in 1995 was £250 million. However a large proportion of this was in the form of carcase beef from Over Thirty Month cattle. Exports of such beef are not permitted under the EU rules of the Date-based Export Scheme (DBES). Trade would also have been affected by factors such as the exchange rate, consumer confidence in France and the need for any UK slaughterhouses wishing to export to be approved under the stringent requirements of the DBES.

Compensation for losses resulting from the ban must be sought by those directly affected. It is not for the Government to seek compensation for damages to UK interests because it is not directly involved from a legal point of view. We would provide full support in terms of information and practical assistance to those who wish to seek compensation (although, as a matter of policy, we will not provide funding or detailed legal advice).

Cetacean By-catch

Ms Atherton: To ask the Secretary of State for Environment, Food and Rural Affairs whether she has received the results of this year's monitoring of cetacean by-catch; and if she will make a statement. [184227]

Mr. Bradshaw: As I explained in the written statement that I made earlier today on this subject, I have concluded, in the light of results from this season's monitoring of the UK element of the offshore bass fishery, that current levels of bycatch in the fishery as a whole may constitute a threat to the common dolphin population. In the course of this research conducted by the Sea Mammal Research Unit on our behalf, 169 dolphin casualties were observed. It has also become clear from our research that exclusion devices which previously showed some potential in reducing bycatch are not currently sufficiently developed to reduce bycatch to more acceptable levels in the immediate future.

Community action to address this problem is needed. We will therefore be requesting that the European Commission introduce emergency measures to close the fishery while more permanent measures are developed. If the case for emergency action is not accepted then I will consider other options, including restricting the number of vessels allowed into the fishery and seeking a ban on pair trawling within 12 miles of the UK.

CFCs

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what quantities of CFC have been collected and safely destroyed under the licensed facilities operating in the UK under EU Regulation 2037/2000 on ozone depleting substances in each year since implementation of the regulations; and what percentage of potential CFCs available for recovery this represented in each year. [184557]

Mr. Morley: The information on CFCs is not held in the form requested. However, the following information is provided:

Tonnes

	Recovery of ozone depleting substances (ODS) including CFCs	*Total ODS destroyed (including halon)*
2002	387	979
2003	494	819

In addition, a significant number of refrigerators leave the UK for treatment—418,000 in 2002 and 377,000 in 2003—and it will fall to the receiving EU state to recover the associated ODS, and report upon it.

It is not possible to state the percentage of potential ODS available for recovery that the destroyed amounts represented. One of the key reasons for this is ODS loss during a product's service life.

CITES

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what Regulatory Impact Assessment she has obtained for her review of charges for Convention on International Trade in Endangered Species licences and permits. [184713]

Mr. Morley: The Department issued a consultation on CITES charges on 1 April 2004. At this stage, a partial Regulatory Impact Assessment (RIA) has been completed and was issued with the consultation documents to stakeholders.

A partial RIA follows on from an initial RIA carried out at the first stages of policy development, it is informed by discussion, data gathering and informal consultations and in liaison with the Small Business Service.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the *(a)* cost to pet retailers of selling individual Hermann's tortoises and *(b)* cost to wholesalers importing large numbers of Hermann's tortoises as a consequence of the proposed charges for Convention on International Trade in Endangered Species licences and permits. [184714]

Mr. Morley: No specific assessment has been made within the regulatory impact assessment of the effects on pet retailers selling tortoises. However, the assessments made over a range of traders in CITES protected species assume that the additional costs will be passed on to the consumer and that costs will rise by the amount of the proposed increase in the fee levels.

As a general practice wholesale importers apply for an import permit to cover a number of specimens of the same species and their costs will therefore be lower when apportioned between individual specimens.

Mr. Paice: To ask the Secretary of State for Environment, Food and Rural Affairs what assessment she has made of the cost to UK breeders of Hermann's tortoises resulting from the proposed changes to charges for Convention on International Trade in Endangered Species licences and permits. [184715]

Mr. Morley: The partial Regulatory Impact Assessment developed for the consultation looked at a small sample of different businesses and how they might be affected by the proposed increases. UK breeders of Hermann's tortoises were not one of the businesses sampled.

The final Regulatory Impact Assessment, which will accompany any legislation, will be developed in the light of the information given during the consultation period and any further analysis indicated will be carried out before a final decision on how to proceed with the question of charges for CITES licences and permits.

Civil Service Relocation

Hugh Bayley: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on her Department's plans to relocate jobs from London and the South East to Yorkshire. [185756]

Alun Michael: The Department's Spending Review settlement includes a commitment to relocating 390 posts out of London and the South East by 2007–08. The Department is currently reviewing which posts will be relocated and exactly where these will be located.

Common Fisheries Policy

Mr. Rosindell: To ask the Secretary of State for Environment, Food and Rural Affairs what the Government's policy is towards the planned change in the European Common Fisheries Policy. [184261]

Mr. Bradshaw: In line with the UK's negotiating objectives we agreed important and wide-ranging reforms to the Common Fisheries Policy in December 2002. The reformed CFP provides a strong framework for policies and decisions which are more environmentally and economically sustainable. It provides for a stronger regional dimension, better stakeholder involvement, and better integration of environmental concerns. We remain committed to building on this reform.

Cormorants

Kate Hoey: To ask the Secretary of State for Environment, Food and Rural Affairs pursuant to her answer of 20 May 2004, *Official Report*, column 1084, on cormorant predation, when she expects to announce extra measures to help fishery owners and angling clubs to deal with the problem of predation by cormorants. [182312]

Mr. Bradshaw: We are currently considering the extra measures we can put in place to help inland fisheries. I expect to be able to announce these before the seasonal influx of cormorants from coastal areas which takes place during the autumn.

Curry Commission Report

Andrew George: To ask the Secretary of State for Environment, Food and Rural Affairs what recent progress has been made by the Government in response to each of the recommendations of the 2002 Curry Commission Report. [184764]

Alun Michael: The Government accepted 101 of the 105 recommendations in the report of the Policy Commission on the Future of Farming and Food. These are being taken forward through the Strategy for Sustainable Farming and Food. However, the onus is not on Government alone to deliver these changes: many of the Commission's recommendations were targeted wholly or partly at industry, which has a pivotal part to play in this process.

We are making good progress towards delivering the Strategy's objectives, most significantly through implementation of the Common Agricultural Policy reform agreement in June 2003. The deal will provide a more sustainable basis for European agriculture and reflect the wider environmental and rural development objectives which society seeks to achieve. The decoupling of payments will break the link between subsidy and production, so the farming industry will be free to react directly to market signals, not encouraged to follow the unsustainable production patterns of the past. CAP reform is expected to deliver significant economic benefits for the UK. These are estimated at between £400 million to £550 million a year at present exchange rates. The introduction of the Single Payment means that farmers will be freed from many of the bureaucratic rules associated with production linked subsidies and will have greater opportunity to restructure their businesses to best meet the needs of the market. We estimate that overall there will be an increase in farm incomes up to £150 million which represents around 5 per cent. of UK Total Income From Farming in 2003.

Enhancing our environment is central to the vision set out in the Strategy. A new agri-environment scheme, Environmental Stewardship, is being introduced in England in 2005 and this includes the new Entry Level Stewardship (ELS). The ELS will be at the heart of improving farming's environmental performance. It will be open to applications from all farmers, enabling them to deliver what society wants: the sustainable management of our countryside as a whole.

A series of initiatives in the food chain is designed to achieve a more efficient and competitive supply chain. These include the Food Chain Centre and English Farming and Food Partnerships, two industry bodies set up with Government support to increase competitiveness and encourage co-operation.

The Government recognise the need for smarter regulation of agriculture, focusing on outcomes rather than processes in order to minimise burdens on the industry. We are working to join up regulatory requirements into a whole farm approach which will reduce bureaucracy. The Whole Farm Appraisal is one of the key initiatives being developed to assist the farming industry in streamlining regulation; this has been successfully piloted and will be launched in autumn 2005.

Other initiatives being taken forward to deliver the Strategy include the establishment of a Non-Food Crops Centre to provide information and advice on non-food crop production; work on animal health and welfare, including the recent launch of the Animal Health and Welfare Strategy; consultation on the goals and priorities for the Food and Health Action Plan under the "Choosing Diet" strand of the Department of Health's "Choosing Health?" consultation and delivery of a Learning Skills and Knowledge programme.

The Government announced a sum of £500 million to implement the Strategy as part of the 2002 Spending Review, in addition to existing spending by Defra and other Government Departments which is already being used to deliver aspects of the Strategy. This sum covers a number of major aspects of the Strategy. These include the new Environmental Stewardship Scheme and the IT system to underpin all the England Rural Development Programme schemes; improvements in livestock traceability and other major animal health and welfare measures, and the new food chain initiatives.

Dairy Farmers

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what percentage of dairy farmers have shown profits in the last financial year; and if she will make a statement. [185231]

Alun Michael: The latest available data on farm incomes is for the 2002–3 farm accounting year from the Farm Business Survey. This survey covers around 2200 full time farm businesses in England, of which around a fifth are classified as dairy farms. Based on this survey data, the average net farm income of dairy farms in

2002–3 was £18,300 and 80 per cent. of dairy farm businesses showed a positive net farm income. Net farm income is defined as the return to the farmer and spouse for their manual and managerial labour and on the tenant type capital of the business. It does not include the cost of farmer and spouse labour.

Dairy farm incomes are forecast to rise slightly in 2003–4, principally due to an increase in milk prices although higher feed prices during the latter part of the year offsets some of this increase.

Departmental Buildings (Refurbishment)

Mr. Whittingdale: To ask the Secretary of State for Environment, Food and Rural Affairs what the cost has been of refurbishments to the fabric of buildings owned by her Department since May 1997. [185940]

Alun Michael: Expenditure on fabric refurbishment each year since Defra was established was:

	£
2000–2001	2,351,000
2001–2992	850,000
2002–2003	3,525,000
2003–2004	2,464,799

Eggs

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs who represented the United Kingdom at the Council of Ministers meeting that decided to remove the derogation from marking for ungraded eggs. [184191]

Alun Michael: My right hon. Friend, the Secretary of State, and my hon. Friend, the Parliamentary Under-Secretary of State (Commons) represented the UK at the meeting in question.

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs whether the United Kingdom voted against the decision of the Council of Ministers to remove the derogation from marking for ungraded eggs; and if she will make a statement. [184192]

Alun Michael: Throughout the negotiations, the UK opposed the Commission's proposal. At the Council of Ministers, we abstained and gave the following statement formally to record our position;

> "The United Kingdom has not felt able to support the proposal to require all eggs at local public markets to be marked. The Commission has produced no evidence demonstrating that there is actually a food safety or enforcement problem that needs to be addressed. The proposal is therefore likely to lead to unnecessary additional burdens on small-scale producers. A facultative provision, allowing those member states which do have concerns about local markets to take necessary action, would have been more appropriate."

Mr. Lidington: To ask the Secretary of State for Environment, Food and Rural Affairs which member states *(a)* supported and *(b)* opposed the Council of Ministers' decision to remove the derogation from ungraded eggs. [184193]

Alun Michael: The UK abstained from voting but all other member states voted in favour.

Emissions Trading Scheme

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate her Department has made of the carbon emissions reductions from the EU emissions trading scheme. [185758]

Margaret Beckett: The overall emissions reductions from the scheme will depend on the price of carbon, which in turn is dependent on the total number of allowances in the EU market. The number of allowances to be allocated by the UK in the first phase of the scheme (2005–2007) is based on the UK reducing carbon dioxide emissions below our Kyoto Protocol target and towards our domestic goal.

Energy Efficiency

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the external costs associated with energy wasted from inefficiencies, with particular reference to the environmental costs. [184581]

Mr. Morley: In January 2002, a Government Economic Service working paper "Estimating the Social Cost of Carbon Emissions" was published as a joint Defra-Treasury publication. The GES paper suggested £70 per tonne of carbon (within a range of £35 to £140/tC) as an illustrative estimate for the global damage cost of carbon emissions.

The Government's recently published Energy Efficiency Action Plan identified target annual savings of 12.1 M tonnes of carbon by 2010. The corresponding total annual value of the reduced environmental damage is therefore around £850 M/y.

Environmental Business Growth Action Programme

Mr. Kidney: To ask the Secretary of State for Environment, Food and Rural Affairs what the role of the Environment Agency is in the management of the Environmental Business Growth Action Programme, with particular reference to the west Midlands. [184147]

Mr. Morley: The Environmental Business Growth Action Programme is designed to assist small and medium enterprises to take advantage of the market for environmental goods and services. The Environment Agency is the accountable body for the programme, managing funds provided by Advantage West Midlands and the Government office for the west Midlands. The programme only operates in the west Midlands.

Water Leakage

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the external costs associated with water leakages and inefficient use of water, with particular reference to the environmental costs. [184584]

Mr. Morley: Water companies produce long-term (25 year) water resource plans to balance the supply and demand for water. These plans, which are reviewed annually and revised every five years, include economic leakage appraisals that form the basis of annual leakage targets. The plans are submitted to Ofwat and the Environment Agency for scrutiny as part of the business

planning process and contain companies' assessments of the relative costs and benefits of different options for balancing the supply and demand for water. The guidance for producing water resource plans requires water companies to take account of all costs and benefits, including environmental and social ones, in their assessments. The final mix of resource schemes, leakage reduction and demand management schemes chosen to balance supply and demand will be at the least cost to both customers and the environment.

Flooding

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the external costs associated with flooding, with particular reference to the environmental costs. [184585]

Mr. Morley: The Department has undertaken a number of estimates of the national costs associated with flooding. The impact of flooding will vary from case to case. However, the national level estimates have shown that in most cases flood damage estimates are dominated by damage to residential, commercial and industrial property and its associated contents. Work to evaluate other impacts includes:

recent research by the Flood Hazard Research Centre (FHRC) at Middlesex University which suggested that emergency response costs are probably some 11 per cent. of physical damage costs;

the FHRC also provides guidance on assessing the benefits to recreation of flood defence and coast protection works;

research lead by Risk and Policy Analysts Ltd. has identified the average value of health and stress due to flooding at £200 per household per year for those in high risk areas.

There have been many studies of the value of other environmental impacts, including a current study by the University of East Anglia that will report in 2005 on the functional value of wetlands. Current Defra guidance suggests that appropriate water level management for wetlands can have a benefit of between £175 and £300 per hectare per year. In the latest national assessments these figures were used to quantify environmental benefits from increased flooding of some lower grade agricultural land.

The above are included in current Defra guidance to operating authorities for project appraisal purposes.

Farm Payments

Mr. Wiggin: To ask the Secretary of State for Environment, Food and Rural Affairs how many applications for each category of farm payments, and of what value, were due to have been paid by 30 June but have not yet been paid; and if she will make a statement. [184939]

Alun Michael: The only category of farm payments due to be paid by 30 June are those for the 2003 bovine schemes. The following table shows the number of applications, the number paid, the value paid, the number unpaid and the value unpaid for each category of farm payment. For completeness the same data is also shown for the other categories of 2003 farm based schemes at the regulatory closing date for payments.

Category	*Number of applications*	*Number paid*	*Value paid (£)*	*Number unpaid*	*Percentage unpaid*	*Value unpaid (£)*
Bovine schemes	256,533	251,620	365,086,982	4,913	1.92	3,082,749
Sheep Annual Premium Scheme (SAPS)-closing date 31 March 2004	26,851	26,810	113,055,712	41	0.15	175,079
Hill Farm Allowance-closing date 31 March 2004	11,052	9,646	33,987,521	201	2.04	2,258,310
Arable Area Payments (AAPS) Main claims-closing date 31 January 2004	40,535	40,048	954,411,819	405	0.9	40,535
Non-food-closing date 31 March 2004	4,427	4,346	20,417,026	81	1.82	4,427

All 2003 scheme year payment targets were met. The excellent payment performance of previous years was maintained on AAPS (main claims) and SAPS and for the first time since the Rural Payments Agency (RPA) was created, the payment target was met for AAPS non food claims and all bovine schemes.

Flood Defence Projects

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what her Department's total spending was in each of the last three years on flood defence projects. [184944]

Mr. Morley: In the years under consideration, Defra provided grant aid as a percentage of eligible costs to the flood and coastal defence operating authorities—the Environment Agency (EA), local authorities and internal drainage boards—to assist with improvement works and studies to manage flood and coastal erosion risk. Grant aid was also made to the EA to assist towards the cost of national initiatives (such as the national flood and coastal defence database, flood warning public awareness and catchment flood management plans) and in 2001–02 exceptional funding was provided to the EA following the floods of autumn 2000 for repair works and feasibility and design costs for accelerated river defences.

Grant aid (including Supplementary Credit Approval for local authorities) was £90 million in 2001–02, £120 million in 2002–03 and £127 million in 2003–04. These figures include funding for projects to protect against coastal erosion but many of these also provide significant benefits in terms of reducing risk of flooding from the sea.

Further Government support was provided by the Office of the Deputy Prime Minister's local government funding system. This supported, among other things, levies paid by local authorities to the EA which funded the balance of the cost of EA improvement projects after Defra grant.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what action her Department is taking to ensure that all timber purchased for flood defences comes from legal and sustainable sources. [184945]

Mr. Morley: While Defra has overall policy responsibility for flood and coastal erosion risk in England, we do not build defences, nor do we have any power to direct the operating authorities' choice of materials for their projects. However, we have provided guidance to operating authorities since the mid-1990s.

In 1994, the Chief Engineer of the former Ministry of Agriculture, Fisheries and Food, a predecessor of this Department, wrote to maritime district councils to encourage them to consider the use of alternative materials and to procure timber from well-managed and sustainable sources.

In 2000, the then Environment Minister, Michael Meacher, announced that Government Departments and agencies, including the Environment Agency, must actively seek to procure timber and timber products from sources independently validated as legal and sustainably managed.

In 2002, Mr. Meacher wrote to all English local authorities to encourage them to adopt responsible timber procurement policies.

Fruit

Mr. Cousins: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate the proportion by *(a)* value and *(b)* quantity of fruit consumed in the UK that was produced in the UK in each of the last three years for which records are available. [185173]

Alun Michael: The following table provides details of the quantity and value of UK fruit production and supply.

UK fruit production and supply

	Quantity (Thousand tonnes)			*Value (£ million)*		
	2001	*2002*	*2003*	*2001*	*2002*	*2003*
UK production	330	290	242	238	253	281
Imports	2,868	2,988	2,979	1,482	1,612	1,712
Exports[1]	73	69	78	41	47	48
Total supply[2]	3,125	3,209	3,143	1,679	1,818	1,945
Production as percentage of total supply	11	9	8	14	14	14

[1] Exports includes imported fruit subsequently re-exported.
[2] UK production plus imports less exports.

Customs and Excise overseas trade information does not distinguish exports of fruit produced in the UK from re-exports of imported fruit. Also food consumption survey data does not distinguish UK and imported produce. This makes it difficult to provide accurate information on consumption of UK produced fruit. Therefore information has been presented to show the proportion of the total supply of fruit in the UK that is represented by UK production.

The main fruits produced on a commercial scale in the UK include apples (where the production as a percentage of total supply was 21 per cent. by quantity in 2003), pears (20 per cent.), strawberries (53 per cent.) and raspberries (63 per cent.).

For other fruits, for example oranges, bananas, peaches, nectarines, grapes, and pineapples, the UK is virtually entirely dependent on imports.

Fuel Poverty

Alan Simpson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on progress in eradicating fuel poverty. [185763]

Mr. Morley: The Government's Second Annual Progress Report highlighted the progress made in tackling fuel poverty. The outlook is encouraging. In 2002 it is estimated there was a drop in the number of fuel poor households in the UK to around 2½ million, from 3 million in 2001. We remain committed to tackling the issue of fuel poverty.

Green Minister

Mr. Horam: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the activities of the Green Minister in the Department in financial year 2003–04. [185112]

Mr. Morley: My noble Friend, the Lord Whitty, is Defra's Green Minister and in this role is a Member of the Ministerial Sub-Committee of Green Ministers. I chair the Sub-Committee. However, it has been established practice under successive Governments not to disclose information relating to the proceedings of Cabinet Committees.

Sustainable development is the overarching aim of Defra. Therefore, the work of all Defra's ministers, including the Green Minister, contributes to this aim. Consequently, it is not possible to separate the role of the Green Minister from Lord Whitty's other work in the financial year 2003–04.

Important pieces of work that Lord Whitty has been involved with over the last year include publication of a UK Framework for Sustainable Consumption and Production in conjunction with the DTI, the Sustainable Food and Farming Strategy, the UK initiative on developing a global Renewable Energy and Energy Efficiency Partnership and agreement on several chapters of the Framework for Sustainable Development on the Government Estate. Lord Whitty also represented Defra on the Ministerial Group for Implementation of the Energy White Paper and covers energy efficiency and fuel poverty.

Greenhouse Gases

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the external costs associated with greenhouse gas emissions, with particular reference to the environmental costs. [184580]

Mr. Morley: A Government Economic Service working paper "Estimating the Social Cost of Carbon Emissions" was published as a joint Defra-Treasury publication, and this contains estimates of the external costs associated with greenhouse gas emissions. This paper is available on the Defra website at www.defra.gov.uk/environment/climatechange/carbon-cost/index.htm along with other papers describing the Government's work on the social cost of carbon.

Hazardous Waste

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs what estimate she has made of the amount of hazardous waste produced in 2003–04, broken down by *(a)* quantity and *(b)* type. [183813]

Mr. Morley *[holding answer 13 July 2004]:* None. Data on hazardous waste (as consigned special waste) are reported by calendar year. That for 2003 is currently being processed by the Environment Agency and is expected to be available in September.

Home Energy Efficiency Scheme

Mr. Tony Clarke: To ask the Secretary of State for Environment, Food and Rural Affairs how many homes in Northampton have benefited from the Home Energy Efficiency Scheme. [184840]

Mr. Morley: The Home Energy Efficiency Scheme is now marketed as Warm Front. Between the launch of the scheme in June 2000 and the end of March 2004, approximately 873 households in Northampton received assistance from the Scheme.

Departmental Housing

Mr. Webb: To ask the Secretary of State for Environment, Food and Rural Affairs for how many empty houses her Department is responsible; and if she will make a statement. [182155]

Alun Michael: The Department is currently responsible for three empty houses. Our agents have been instructed to dispose of them by sale on the open market.

Kite Flying

Mr. Drew: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance her Department issues to *(a)* local authorities and *(b)* others relating to the banning of kite flying in certain public places. [184120]

Alun Michael: Our guidance notes on the procedures for making byelaws explain how to ban kite flying in the countryside. There is additional guidance in "Managing Coastal Activities: A Guide for Local Authorities". Both of these documents can be found on the Defra website. Hard copies of the general guidance may be obtained by writing to Defra's countryside recreation branch, Zone 1/03, Temple Quay House, 2 The Square, Bristol, BS1 6EB. The guidance on coastal activities is available from Defra Publications, Admail 6000, London, SW1A 2XX, Tel: 08459 556000.

There are occasions, particularly in relation to public safety, when byelaws are the only answer to managing recreational activities; we encourage local authorities and others to look first at other solutions. Schemes for self-regulation can enable the public to continue to enjoy as wide a range of activities as possible.

Landfill

Joan Ruddock: To ask the Secretary of State for Environment, Food and Rural Affairs how much hazardous waste has been disposed of to landfill in each year since 1997. [183828]

Mr. Morley: Data for the fate of consigned special waste have been collated centrally by the Environment Agency from 1998 to 2002 and are as follows; 2003 data are in preparation.

Special waste consigned to landfill disposal for the years:

	Million tonnes
1998–99 (combined)	2.3
2000	2.1
2001	2.3
2002	2.0

Mr. Flook: To ask the Secretary of State for Environment, Food and Rural Affairs where funds diverted to the Treasury from the Landfill Tax Credit Scheme since 2003 have been spent, broken down by *(a)* region and *(b)* project. [184643]

Mr. Morley: As part of the reform of the Landfill Tax Credit Scheme approximately £84/92/92 million has been allocated to sustainable waste management in England (£100/110/110 million to the UK as a whole) for the financial years 2003–04, 2004–05 and 2005–06. A new public expenditure programme, delivered jointly by Defra and the Waste and Resources Action Programme, has been established for England. The new Waste Implementation Programme is designed to accelerate progress towards meeting the landfill directive targets.

The Waste Implementation Programme is taking forward a package of strategic measures recommended by the Strategy Unit in "Waste Not Want Not", published in November 2002. Key areas of action so far (including indicative three-year funding allocations) include the following:

£ million

Project	*Budget allocation*
Four programmes for waste minimisation	40
Kerbside taskforce to help local authorities maximise potential for kerbside collection of recyclables and to boost the recycling of organic materials	15
Programme for education and awareness	30
Two programmes for data and research	22
Programme of development of new technologies,	37

Project	£ million Budget allocation
including pilots	
Programmes designed to help local authorities with their recycling strategies, and ensure they are offered targeted assistance	10

In addition to these programmes, the Waste Implementation Programme contributed £29 million in 2003–04 and 2004–05 to boost Defra's Waste Minimisation and Recycling ("Challenge") Fund. This fund provides project-based funding to local authorities to enable them to roll out high-quality recycling and home composting schemes in their area.

The Waste Implementation Programme has also provided £20 million in targeted grants to local authorities in 2004–05. This grant is designed to reduce the pressure faced by councils to fund services such as waste management through increases in council tax.

Milk

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs to what factors does she attributes the difference in gross payments per litre of milk produced in the UK compared with prices in *(a)* France *(b)* Germany and *(c)* other EU member states. [184730]

Alun Michael: As has been stated in response to parliamentary questions on a number of occasions, KPMG's report, "Prices and Profitablitily in the GB Supply Chain", concluded that low farmgate prices in the UK were largely due to the structure of the UK industry, the low value of the product mix and the low level of product innovation within the UK compared with some member states.

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what checks are carried out on the quality of milk imported *(a)* from (i) new and (ii) longer-standing, members of the EU and *(b)* from elsewhere; and if she will make a statement. [185228]

Alun Michael: All milk imported into the UK from other EU member states must have been produced in accordance with the Community rules laid down in Council Directive 92/46/EEC. All milk and milk products placed on the market in the EU must conform to the requirements of that Directive irrespective of whether they originate from new or existing member states. Community rules permit random spot checks at destination on milk imported into the UK from other EU member states. Plants in the new member states which could not meet the requirements of Directive 92/46/EEC on accession were granted transitional status and allowed to place products on their domestic market for a limited period as long as they bore a special health mark which identified them as being only for the domestic market.

The above Directive lays down the hygiene rules which apply to the production wrapping, storage and transportation of milk to ensure human and animal health are protected.

Ensuring that all member states comply with their Community obligations in properly implementing and applying the Directive is the responsibility of the European Commission, whose Food and Veterinary Office carries out regular programmes of inspection visits to all member states. All milk imported into the UK from third countries must come from EU approved establishments in approved countries and must be accompanied by appropriate animal and public health certification signed by a veterinarian of the competent authority. The milk must enter via an approved Border Inspection Post (BIP) where it is subject to veterinary inspection to ensure that conditions of import have been complied with and to ensure that it has remained in a satisfactory condition during transport. The checks ensure that all the required documentation is correct and applies to the consignment in question. 50 per cent. of consignments of milk imported for human consumption are also given a physical check which can include taking samples for laboratory analysis.

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs how many litres of imported milk have been rejected in the last five years for which figures are available; and if she will make a statement. [185229]

Alun Michael: There are no figures available on the amount of milk imported into the UK that has been rejected.

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs how much milk has been imported in the last five years for which figures are available, broken down by country of origin; and if she will make a statement. [185230]

Alun Michael: The table below show the UK imports of liquid milk in each of the last five years to 2003, broken down by country of despatch.

UK imports of liquid milk 1999–2003

Thousand litres

Country	1999	2000	2001	2002	2003	Grand Total
Irish Republic	60,342	60,199	54,835	26,233	19,495	221,105
Denmark	30,334	25,166	9,421	795	425	66,140
Germany	17,078	19,531	11,196	5,629	3,888	57,323
France	13,288	8,514	9,667	10,299	8,600	50,368
Belgium	6,786	6,922	3,811	2,345	3,759	23,624
Netherlands	3,620	462	919	2,198	1,027	8,227
Austria	2,844	1,355	—	—	—	4,200

UK imports of liquid milk 1999–2003

Thousand litres

Country	*1999*	*2000*	*2001*	*2002*	*2003*	*Grand Total*
Italy	114	214	91	101	70	590
Portugal	—	0	—	—	40	40
Spain	23	14	—	—	—	37
Sweden	1	—	—	—	—	1
EU 15 Total	134,431	122,378	89,940	47,600	37,303	431,653

Source:
H M Customs and Excise.
Data prepared by Statistics (Commodities and Food) Consultancy, Trade and IT, ESD, DEFRA.
Note:
2003 data one provisional and subject to amendment

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will provide figures for *(a)* UK imports, *(b)* exports, *(c)* production, *(d)* domestic use and *(e)* self-sufficiency of major milk products for (i) 2002, (ii) 2003 and (iii) 2004 (estimated). [184815]

Alun Michael: The information requested is given in the following table. Care is needed when interpreting forecasts for 2004 as only a small proportion of data for 2004 are so far available and market developments from now until the end of the year remain uncertain.

UK milk products: Production and supplies of milk products manufactured by both dairy companies and on farm

Thousand tonne (unless otherwise specified)

	2002	*2003 (provisional)*	*2004 (forecast)*
Butter (a) (b)			
Production *(c)*	136	148	152
Imports	116	118	122
Exports	39	44	41
Total new supply *(d)*	213	222	233
Increase in stocks *(e)*	1	-2	-2
Total domestic uses *(d) (e)*	212	224	234
Production as percentage of total new supply for use in UK	64	67	65
Closing stocks *(e)*	19	17	15
Cheese			
Production *(c)*	380	362	370
Imports	285	320	318
Exports	82	90	100
Total new supply	583	593	588
Increase in stocks	-3	-5	4
Total domestic uses	585	598	584
Production as percentage of total new supply for use in UK	65	61	63
Closing stocks *(f)*	12	7	0

Policies (Environmental Impact)

Mr. Horam: To ask the Secretary of State for Environment, Food and Rural Affairs how many new policy proposals or significant changes in policy were produced by her Department in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185108]

Mr. Morley: All Defra's new policy proposals or changes in policy which were likely to have a direct or indirect impact (whether benefits or cost) on business, charities and the voluntary sector were the subject of Regulatory Impact Assessments (RIAs). In accordance with Cabinet Office guidelines, these were required to include the full range of potential impacts on all stakeholders, including environmental impacts where relevant. Separate environmental appraisals were not required. All completed RIAs were published on Defra's website at http://www.defra.gov.uk/corporate/ria/default.htm.

In 2002–03, 26 RIAs were published on Defra's website. Of these nine included consideration of environmental impacts. However in the other 17 the policy assessed was considered not to have significant environmental impacts, indicating that environmental appraisal would not have been necessary. This is in accordance with departmental guidance. In 2003–04[1], 41 RIAs were published on Defra's website, and 21 included consideration of environmental impacts. A further 18 were considered not to have significant environmental impacts.

[1]http://www.defra.gov.uk/environment/economics/appraisal/index.htm

Polish Fishing Fleet

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs whether she has had discussions with representatives of the Polish Government on arrangements for access to Polish fishing vessels to British waters. [184816]

Mr. Bradshaw: No. Poland has no access to the 6–12 mile zone from the UK's shoreline. And whilst the principle of free access in the Community's Exclusive Economic Zone from 12 to 200 miles offshore applies to all member states the only access Poland has to any quota stocks where the UK has an interest is limited to 1096t of mackerel in western Community waters, out of a total allowable catch of 545,500t.

Polish Milk Products

Mr. Paterson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will estimate *(a)* the change in volumes of *(a)* milk and *(b)* milk products from Poland since its accession to the European Union on 1 May and *(b)* full year imports in 2005. [184720]

Alun Michael: Post-accession trade figures are not yet available and insufficient time has elapsed since accession to enable reliable yearly forecasts to be made. There were no imports of milk or milk products into the UK from Poland in 2003 or during the first quarter of 2004.

Post-consumer Paper Waste

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs how much post-consumer paper waste was produced in the UK in each of the last three years; what percentage of post-consumer paper waste was collected for recycling in the UK in *(a)* 2001, *(b)* 2002 and *(c)* 2003; and what the projected annual percentages are for the collection of post-consumer paper waste for recycling in the UK for the next five years. [184949]

Mr. Morley: Estimates from the Confederation of Paper Industries give UK recovered paper usage. The results and corresponding percentages produced from total paper production are listed in the following table.

	Recovered paper usage (thousands tonnes)	*Percentage of UK production*
2001	4,612	74
2002	4,610	74
2003	4,533	73

No official projections of post-consumer waste recycling for the UK are available.

Quality Status (Yorkshire)

Jeff Ennis: To ask the Secretary of State for Environment, Food and Rural Affairs how many *(a)* parish and *(b)* town councils have been awarded quality status in (i) Barnsley, (ii) Doncaster and (iii) South Yorkshire. [184110]

Alun Michael: There are a number of challenging criteria that town and parish councils have to pass in order to gain Quality Status. One criteria is that the clerk needs to be qualified in the Certificate in Local Council Administration. In addition there are other criteria such as democratic accountability, communications and audited accounts.

To date nationally there are 55 town and parish councils that have gained Quality Status and there are 500 clerks registered for the Certificate in Local Council Administration.

The Yorkshire and Humber Training Partnership has held 12 training events with 400 delegates attending. In addition the Countryside Agency has sponsored an event which was attended by a further 160 delegates.

The Yorkshire and Humber Training Partnership have received 40 registrations from clerks that are working towards the Certificate in Local Council Administration. An additional 40 are also working towards the qualification but have not yet registered. We anticipate that there will be 80 town and parish councils in this region applying for Quality Status in the coming 12 months

No applications for Quality status have yet been received from parish councils or town councils in Barnsley, Doncaster or South Yorkshire.

Radiation Risks

Mr. Meacher: To ask the Secretary of State for Environment, Food and Rural Affairs (1) what the dates were of the meetings reported on the web-site of the Committee Examining Radiation Risks from Internal Emitters; [185119]

(2) what the origin was of the dosimetric data used in investigating the radiological significance of increases in leukaemia among children aged up to one year in the Federal Republic of Germany between 1 July 1986 and 31 December 1987 by the Committee Examining Radiation Risks from Internal Emitters. [185118]

Mr. Morley: The CERRIE Secretariat has informed me that the committee held 16 meetings on the following dates

4 December 2001;
7 February 2002;
20 March 2002;
6 June 2002;
8 August 2002;
1 October 2002;
11 December 2002;
27 February 2003;
30 April 2003;
26 June 2003;
22 October 2003;
16 December 2003;
24 February 2004;
31 March 2004;
19 May 2004; and
24 June 2004.

The Committee also convened a workshop on 21, 22 and 23 July 2003, which all Members attended.

The Department has not yet received the final version of the CERRIE report, which is still in preparation. It would not be appropriate to comment on the report until the Committee has finalised it and presented it to its parent body, COMARE, and to Ministers. I understand the report is expected to be published in October this year.

Ragwort

Mrs. Gillan: To ask the Secretary of State for Environment, Food and Rural Affairs if her Department will ask local authorities to publish their ragwort control policies; and if she will make a statement. [186075]

Alun Michael: The Code of Practice on control of Ragwort that I published recently set out what needs to be done by all land managers including local authorities to prevent the spread of Ragwort. It recommends that where a medium or high risk to animal welfare from ragwort has been identified, land managers, including those with responsibility for public land, should put in place and implement a control policy.

It is for individual local authorities to decide their control policy and to decide whether to make their control policy publicly available.

Renewable Transport Fuel Obligation

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs what

discussions she has had with farmers on the effects on them of a renewable transport fuel obligation; and if she will make a statement. [185213]

Mr. Morley: The Department has had a number of discussions with farmers and farming industry representatives on the effect of the renewable transport fuel obligation on farmers. In addition, we have received a large number of letters and petitions from farmers supporting the obligation.

The Department for Transport is currently considering the response to its consultation on the implementation of the EU Biofuels Directive, including the option of a renewable transport fuel obligation. The Government has included permissive clauses in the Energy Bill that would allow the Secretary of State to introduce such an obligation. The Government would consult extensively on the detail with all relevant stakeholders, including the farming community, if an obligation is assessed to be the best way forward.

We recognise that transport biofuels have potential for UK agriculture and we are keen to develop new market opportunities for farmers.

Slaughterhouses

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs how many animal welfare personnel there are at slaughterhouses; how many animals have been slaughtered without animal welfare personnel present for each year from 1994 to date; and if she will make a statement. [184845]

Mr. Bradshaw: Under the Welfare of Animals (Slaughter or Killing) Regulations 1995, a slaughterhouse occupier must ensure that a competent person is available whenever there are live animals on the premises. This person must have the authority to take whatever action may be necessary to safeguard the welfare of the animals in accordance with the Regulations. The legislation is enforced by Official Veterinary Surgeons of the Meat Hygiene Service in licensed slaughterhouses, and by Veterinary Officers of the State Veterinary Service elsewhere.

The Regulations do not require the competent person to be physically present at the point of slaughter when animals are being slaughtered or killed. Therefore, there is no data on the number of livestock slaughtered without animal welfare personnel present.

Special Advisers

Mr. Evans: To ask the Secretary of State for Environment, Food and Rural Affairs how many of the reductions in the numbers of civil servants in her Department announced in the comprehensive spending review will be of special advisers. [185463]

Alun Michael: I refer my hon. Friend to the answer given by the Chief Secretary to the Treasury on 20 July 2004, *Official Report*, column 190W.

Stewardship Applications

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs how many stewardship applications have been made in the last *(a)* quarter, *(b)* half-year and *(c)* year for which figures are available, broken down by county; and if she will make a statement. [185211]

Alun Michael: There is an annual application period for the Countryside Stewardship Scheme. 2,056 applications were received during the period, which closed on 31 March 2004. This total includes applications for the renewal of agreements coming to an end in 2004. A breakdown by county is not currently available.

Timber

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what advice will be given to non-departmental public bodies regarding the use of the Central Point of Expertise on Timber. [184942]

Mr. Morley: Central Government departments are responsible for communicating Government policy and related information to the non-departmental public bodies they sponsor. I expect whatever information on a central point of expertise on timber (CPET) is communicated to central departments to be passed on by those departments to the bodies they sponsor if those bodies purchase timber or products made from timber.

The CPET Phase 1 contract will result in revised guidance being issued to central departments. This contract is expected to be completed in September 2004.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what plans there are to make the services of the Central Point of Expertise on Timber available to local authorities. [184943]

Mr. Morley: The Government's plan is that all UK public sector bodies and their suppliers will have access to guidance published by the Central Point of Expertise on Timber Procurement (CPET). Furthermore, plans are being formulated for the CPET to operate a help line service that would be available to all UK public sector bodies. Implementation of these plans has cost implications that will be subject to resource availability and this will be reviewed in the autumn of 2004.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance will be produced by the Central Point of Expertise on Timber; how it will be distributed to Government departments; and if she will make a statement. [184951]

Mr. Morley: The Central Point of Expertise on Timber Phase 1 is: *(a)* reviewing existing guidance to establish robust contract definitions for legal and sustainable timber; *(b)* devising a methodology for assessing whether individual certification schemes meet UK Government requirements for identifying legal and sustainable timber and *(c)* undertaking such assessments for five certification schemes. This work will result in revised guidance that will be communicated by email to heads of procurement and environmental managers in central Government departments, to the devolved administrations and to the Improvement Development Agency. In addition the revised guidance will be published on a CPET web site that will be

publicised by a press release. Future phases of the CPET service will build on this work and it is expected that a similar communication strategy will be adopted.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what guidance will be issued to Government departments regarding the use of the Central Point of Expertise on Timber. [184952]

Mr. Morley: Central Government departments will be advised to apply guidance published under the name of the Central Point of Expertise on Timber (CPET) when they identify a need to procure timber or products derived from timber and to follow that guidance throughout the procurement process. When the CPET is operating a help line service departments will be advised to use that service whenever they or their suppliers encounter difficulties acquiring their timber and timber products from legal and sustainable sources or are in any doubt over claims made by suppliers in that respect. Departments will also be advised to avail themselves of any other services that the CPET may provide, including, for example, training workshops for procurement personnel.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what her plans are for phase two of the Central Point of Expertise on Timber; how it will be funded; and over what time period it will run. [184953]

Mr. Morley: Building on the foundations laid through Phase 1 of the Central Point of Expertise on Timber (CPET), the Government plan to commission further services as follows:

Assessment of certification scheme bodies not covered by CPET Phase 1;

Development of criteria to evaluate the suitability of suppliers' assurance that is not based on certification schemes and provision of guidance for procurement officers, facilities managers, estate managers, architects and suppliers;

Consultations with certification scheme bodies and other key stakeholders on the application of the CPET service and its effect on their operations;

Provision of guidance, training and education for heads of procurement, buyers and specifiers, e.g. through the website, workshops, voluntary audits and a helpline;

Raising awareness throughout the supply chain.

Whether all the services outlined above would be covered by CPET Phase 2 has yet to be decided. That decision will depend on resource availability. The CPET is a new concept and investment has to be soundly based. The full CPET service is being created in phases so that experience gained can be applied to future development. The detailed plans and resource allocation for Phase 2 will be considered in the autumn of 2004 with a decision expected by the end of November 2004. The resource implications of expanding the CPET client base beyond central Government buyers will need careful consideration. The extent to which a CPET could generate income from fees, sponsorship and other commercial activities is one of a number of options that will be investigated.

Sue Doughty: To ask the Secretary of State for Environment, Food and Rural Affairs what the estimated costs are of *(a)* establishing and *(b)* running for the first 12 months the Central Point of Expertise on Timber. [184957]

Mr. Morley: To establish the Central Point of Expertise on Timber Procurement to operate a wide range of services as originally envisaged and run those services for a year is estimated to cost in the region of £300,000 in total.

Waste Disposal

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what the total volume of *(a)* domestic, *(b)* commercial and *(c)* other waste was in each region in each year since 2001–02; what this represents (i) per head of population and (ii) broken down by the proportion of waste (A) sent to landfill, (B) incinerated and (C) disposed of by other means. [184860]

Mr. Morley: Information on domestic waste from the Defra Municipal Waste Management Survey for 2001–02 and 2002–03, split by Government region is shown as follows:

	Household waste Tonnes (Thousand)	*Kilogrammes (Per head)*	*Landfilled (Percentage)*	*Incinerated (Percentage)*	*Other (Percentage)*
2001–02					
North East	1,313	521	78	16	7
North West	3,846	568	86	2	11
Yorkshire and The Humber	2,516	506	84	4	12
East Midlands	2,183	522	77	6	16
West Midlands	2,664	504	57	32	12
East	2,809	520	80	1	18
London	3,411	467	73	20	8
South East	4,227	527	79	0	21
South West	2,584	523	81	0	19
England	25,554	583	77	9	14
2002–03					
North East	1,376	548	76	14	10
North West	3,935	581	84	3	14
Yorkshire and The Humber	2,525	506	79	7	14
East Midlands	2,214	525	77	6	17

	Household waste Tonnes (Thousand)	Kilogrammes (Per head)	Landfilled (Percentage)	Incinerated (Percentage)	Other (Percentage)
West Midlands	2,694	508	54	32	14
East	2,820	520	79	1	20
London	3,379	459	71	20	9
South East	4,249	529	76	0	23
South West	2,625	529	78	0	22
England	25,819	521	75	9	16

Notes:
1. Totals and percentages might not add up due to founding.
2. Household disposal methods estimated from published municipal totals.

The latest year for which full information on industrial and commercial waste is available is 1998–99, from the Environment Agency's National Waste Production Survey, Strategic Waste Management Information for England and Wales. Results can be found at: www.environment-agency.gov.uk

Information on construction and demolition waste is available from the Office of the Deputy Prime Minister, Survey of Arisings and Use of Construction and Demolition Waste in England and Wales in 2001, published in October 2002. Results can be found at: www.odpm.gov.uk

Water and Sewerage Services

Norman Baker: To ask the Secretary of State for Environment, Food and Rural Affairs what the average monthly cost to consumers is of *(a)* water services and *(b)* sewerage services in each water supply area (i) in total and (ii) broken down by those who were (A) metered and (B) unmetered in 2003–04. [184861]

Mr. Morley: Water bills and sewerage bills are set separately by each water and sewerage company and water company in England and Wales.

The average monthly costs to household consumers of water and sewerage services in each supply area in total and broken down into metered and unmetered customers in 2003–04 are set out in the following table.

Average monthly cost in 2003–04

£

Company	Water Measured	Sewerage Unmeasured	Total	Measured	Unmeasured	Total
Anglian	8	11	10	11	16	13
Dwr Cymru	7	11	10	7	14	13
United Utilities	9	10	10	9	11	10
Northumbrian/Essex and Suffolk	7	9	8	—	—	—
Northumbrian	6	8	8	9	10	10
Essex and Suffolk	7	11	10	—	—	—
Severn Trent	8	10	9	8	9	8
South West	8	12	10	13	23	18
Southern	7	8	8	11	14	13
Thames	8	9	9	8	8	8
Wessex	8	11	10	10	13	12

Mid Kent	9	11	11	—	—	—
Portsmouth	7	6	6	—	—	—
South East	9	11	10	—	—	—
South Staffs	7	7	7	—	—	—
Sutton and East Surrey	9	11	10	—	—	—
Tendring Hundred	11	16	13	—	—	—
Three Valleys/North Surrey	8	10	10	—	—	—
Three Valleys	8	10	10	—	—	—
North Surrey	8	10	9	—	—	—
Industry average	8	10	9	10	11	10

Level of average bills for 2003–04 are based on estimated data provided by each company.

Wheat

Mr. Laurence Robertson: To ask the Secretary of State for Environment, Food and Rural Affairs if she will make a statement on the price of wheat. [185141]

Alun Michael: Wheat prices rose sharply last year as a response to the lower than expected harvest in central and southern Europe, but have since fallen to more normal levels in response to the gradual improvement in the supply situation and forecasts for the level of the harvest in 2004. In this immediate pre-harvest period, there is a certain amount of price volatility as old stocks are run down and the trade waits for more certainty about the availability and quality of the new harvest. Quotes for feed wheat currently range from £88.50-tonne spot July to £65.50-tonne at harvest.

WORK AND PENSIONS

Appeals Service (Liverpool)

Mr. Kilfoyle: To ask the Secretary of State for Work and Pensions what plans he has for changes to the Appeals Service office in Liverpool. [185121]

Mr. Pond: This is a matter for Christina Townsend, Chief Executive of the Appeals Service. She will write to the hon. Member.

Letter from Christina Townsend to Mr. Peter Kilfoyle, dated 22 July 2004:

The Secretary of State has asked me to respond to your question regarding planned changes to the Appeals Service in Liverpool.

The Appeals Service is currently considering a number of proposals about its current organisation.

No decisions have yet been made on how many operating sites the Appeals Service will have in the future. However, agreement has been reached with the Pensions Service to take over their Burnley site which it is planned will be a future operating centre.

I hope this reply is helpful.

Automated Payments

Mr. Tynan: To ask the Secretary of State for Work and Pensions on how many occasions in the last year automated payments of benefits and pensions have been delayed; for how long payments were delayed; and what recompense was offered to recipients for the delay. [185673]

Mr. Pond: There have been four occasions in the last year when automated payments of benefits have been paid late to DWP customers. Some disability living allowance customers received their payment two banking days late on one occasion, and one banking day late on another. The other occasions delayed payments to some jobseeker's allowance customers and income support customers by one banking day. Departmental policy provides a scheme for financial redress for maladministration. This scheme is available to consider ex-gratia payments for customers who face financial inconvenience or distress because of late payments. This is dependent on the individual circumstances of the case.

Benefit Fraud

Mr. Webb: To ask the Secretary of State for Work and Pensions what the average weekly amount of *(a)* housing benefit fraud and *(b)* council tax benefit fraud was (i) in total and (ii) for each local authority, detected under the Security Against Fraud and Error scheme in 2002–03. [183167]

Mr. Pond: For local authorities, the Weekly Benefit Saving (WBS) scheme was replaced by the Security Against Fraud and Error (SAFE) scheme on 1 April 2002. Unlike WBS which recorded fraud only, the SAFE scheme records fraud and error.

The average weekly amount of housing benefit fraud and error detected under the SAFE scheme for 2002–03 was £52.52 and the average weekly amount of council tax benefit fraud and error detected under the SAFE scheme for 2002–03 was £11.97.

The available information about the average weekly amount of housing benefit and council tax benefit fraud and error for local authorities has been placed in the Library.

Mr. Webb: To ask the Secretary of State for Work and Pensions how many calls were received by the National Benefit Fraud Hotline in 2003–04; and how many *(a)* investigations, *(b)* prosecutions and *(c)* convictions resulted. [184683]

Mr. Pond: The information is in the table.

National Benefit Fraud Hotline

April 2003 to March 2004	*Total*
Number of calls received	211,054
Investigations	44,127
Prosecutions	672
Convictions	619

Note:
Some convictions may relate to prosecutions from previous years.
Source:
National Benefit Fraud Hotline and Fraud Information by Sector system

Mr. Webb: To ask the Secretary of State for Work and Pensions how many cases of benefit fraud were detected in 2003–04; and how many of these resulted in *(a)* prosecutions and *(b)* convictions. [184684]

Mr. Pond: The number of cases of benefit fraud detected is not available. The number of cases resulting in prosecution and cases resulting in conviction is in the table.

2003–04

	DWP	*Local authorities*
Prosecutions	9,204	4,601
Convictions	9,091	3,747

Note:
Some convictions may relate to prosecutions from previous years.
Sources:
1. DWP—Fraud Information by Sector and National Investigation Service.
2. Local authorities—local authority subsidy claim forms.

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the *(a)* operational and *(b)* advertising costs of the National Benefit Fraud Hotline in 2003–04. [184685]

Mr. Pond: The operational cost of the National Benefit Fraud Hotline in 2003–04 was £1,038,505. The cost of advertising is not separately assessed.

Notes:

1. Since the Targeting Benefit Fraud advertising campaign started in 2003, the NBFH has been included in the campaign advertising and has not been the subject of its own advertising.

2. Operational costs include staffing and goods and service costs.

3. The operational costs of administering the NBFH include the costs of administering report-a-cheat-online. These costs cannot be separated.

Source:

National Benefit Fraud Hotline (NBFH)

Mr. Webb: To ask the Secretary of State for Work and Pensions what the recorded benefit fraud savings for *(a)* his Department and *(b)* local authorities were in 2003–04. [184686]

Mr. Pond: The available information is in the table.

For local authorities, the Weekly Benefit Savings (WBS) scheme was replaced by the Security against Fraud and Error (SAFE) scheme in April 2002, with some local authorities joining in April 2001. Like WBS, the SAFE scheme provides rewards for detected overpayments. However, it provides rewards for the detection of both fraud and claimant error overpayments and it is not possible to identify fraud overpayments separately.

Monetary Value Adjustments (MVA) by DWP in 2003–04

	MVA (£)
2003–04	14,588,905

Notes:

1. MVA is the difference between the weekly amount of benefit, which would have been paid or would have continued to be paid and the benefit paid following the decision maker's decision on the information gathered. It includes both increases and decreases.

2. The figure includes Instrument of Payment (IOP) adjustments

3. The figure includes adjustments in addition to those attributable to fraud as it is not possible to separate them out.

Source:

Fraud Information by Sector and General Matching Service.

Benefit Payment Arrangements

Lynne Jones: To ask the Secretary of State for Work and Pensions how many pensioners received benefit payments by order book on the latest date for which figures are available; and by what date he expects all pensioners to have transferred to the new system. [175928]

Mr. Pond: There were 5,270,170 order book accounts held by pensioners, live and in payment from the latest data available at 17 April 2004. Payments due from March 2005 will be made by a different method of payment.

Benefit Processing Centres

Mrs. Mahon: To ask the Secretary of State for Work and Pensions (1) if he will list the locations, broken down by parliamentary constituencies, of all the offices identified in his announcement on 29 June relating to the centralisation of benefit processing centres; [184335]

(2) if he will list the locations, broken down by parliamentary constituencies, of each of the proposed benefit processing centres referred to in his announcement on 29 June; and within what timescale decisions on the locations of the remaining benefit processing centres will be made; [184336]

(3) what the proposed timescale is for carrying out the centralisation of benefit processing referred to in his announcement on 29 June. [184337]

Maria Eagle: The offices impacted by the announcement on 29 June were the ten pension centres referred to in the following table, together with details of the constituency in which each is located:

Office	*Constituency*
Burnley Pension Centre	Burnley
Derby Pension Centre	Derby South
Liverpool Pension Centre	Liverpool Walton
Norwich (Baltic House) Pension Centre	Norwich South
Nottingham Pension Centre	Nottingham South
Plymouth Pension Centre	Plymouth, Devonport
Stockton Pension Centre	Stockton South
Wolverhampton Pension Centre	Wolverhampton South West
Wrexham Pension Centre	Wrexham
York Pension Centre	Ryedale

Of the 10 sites identified, six will become part of the Jobcentre Plus Network predominantly as benefit processing centres. These are Derby, Norwich (Baltic house) Nottingham, Wolverhampton, Stockton and Wrexham.

The plans for the remaining pension centres are being developed and we are looking for opportunities to transfer estate and people to other parts of the department, other Government Departments or the private sector. I will inform the House as soon as plans are final and firm decisions are made.

The announcement also signalled the intention of Jobcentre Plus to begin centralising their processing work—moving from a large number of dispersed sites nationally to a smaller number of larger sites.

Detailed planning work is currently underway to determine the number and location of these sites. I will report these locations when planning is complete. The centralisation of benefit processing will be implemented in a rolling programme for completion by 2008 at the latest.

Child Support Agency

Mr. Lyons: To ask the Secretary of State for Work and Pensions if he will require the Child Support Agency to copy to hon. Members' letters which it sends to constituents whose cases hon. Members have taken up with the Agency. [181991]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. John Lyons, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, if he will require the Child Support Agency to copy to hon. Members letters which it sends to constituents whose cases hon. Members have taken up with the Agency.

The Agency wishes to understand and where possible to meet the needs of Members of Parliament. It does not automatically copy to Members letters which it sends to constituents whose cases Members have taken up with the Agency. It will carefully consider any such request on a case by case basis.

Mr. Webb: To ask the Secretary of State for Work and Pensions pursuant to the answer to the hon. Member for Strathkelvin and Bearsden (Mr. Lyons) of 7 July 2004, *Official Report*, column 758W, on the Child Support Agency, for what reasons cases have been moved from the old to the new computer system; and if he will make a statement. [185013]

Mr. Pond: Cases will move from the old to the new computer system if they are linked to a case in the new child support scheme. Some cases will subsequently convert to the new scheme. These will include, for example, cases where a non-resident parent who already has an old scheme assessment is also the non-resident parent in relation to a new scheme application.

It would neither be fair nor workable for people to have a liability under two different schemes, so it is best to move these linked cases onto the new scheme together.

Mr. Hancock: To ask the Secretary of State for Work and Pensions what the projected costs are of closing the Basingstoke Child Support Agency office; and how long he expects it will take to recover those costs. [183285]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Mike Hancock, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what the projected costs are of closing the Basingstoke Child Support Agency office; and how long he expects it will take to recover those costs.

We are currently engaging elsewhere in the Department for Work and Pensions and with other Government Departments to consider potential re-deployment opportunities. Until that work is complete we will not take a final decision on the closure of the Basingstoke site and are thus unable to finalise the business case and therefore the associated costs.

Mr. Hancock: To ask the Secretary of State for Work and Pensions what plans he has to re-deploy staff when the Basingstoke Child Support Agency office closes. [183287]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Mike Hancock, dated 22 July 2004:

In reply to your recent parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what plans he has to re-deploy staff when the Basingstoke Child Support Agency office closes. The Agency developed a Redeployment Plan that is being shared with the relevant trade unions. As part of that, we are engaging elsewhere within the Department for Work and Pensions and with other Government Departments to establish potential re-deployment options. Alongside this all staff in Basingstoke have been seen to establish their preferences. Additional skilled staff have been allocated to support this activity.

Mr. Hancock: To ask the Secretary of State for Work and Pensions what organisations he consulted and what representations he has received from *(a)* the local council and *(b)* other interested bodies on the proposal to close the Basingstoke Child Support Agency office. [183289]

Mr. Pond: The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. Mike Hancock, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what organisations he consulted and what representations he has received from *(a)* the local council and *(b)* other interested bodies on the proposal to close the Basingstoke Child Support Agency office.

A public consultation commencing on 19 June 2003, formed part of the Lyons Review. It created a total of 207 responses, of which, 105 came from Local Authorities and 11 from interested parties. A full list of consultation respondents can be found in the Lyons Report (appendix 2), along with details of the representations made.

The Agency is committed to a policy of open communications with its staff. It therefore told people of its intention to cease its operations in Basingstoke at the earliest opportunity. Formal consultation is now taking place with staff and trade unions. We are currently engaging elsewhere in the Department for Work and Pensions and with other Government Departments to consider potential redeployment opportunities. Until that work is complete we will not take a final decision on the closure of the Basingstoke site. No representations have been received from the local council or any other interested body other than the Public and Commercial Services Union.

John McDonnell: To ask the Secretary of State for Work and Pensions whether a business case has been drawn up to support the closure of the Child Support Agency office in Basingstoke; and if he will make a statement. [183581]

Mr. Pond *[holding answer 15 July 2004]:* The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. John McDonnell, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, whether a business case has been drawn up to support the closure of the Child Support Agency office in Basingstoke; and if he will make a statement.

Our intention is to maximise the deployment of staff elsewhere in the Department for Work and Pensions. We are currently in discussions with colleagues elsewhere in the Department and until these discussions are complete no final decision on the closure of the Basingstoke site will be taken. No business case can be finalised until we have been able to quantify those alternative opportunities.

John McDonnell: To ask the Secretary of State for Work and Pensions what consultation was undertaken before the announcement of the closure of the Child Support Agency office in Basingstoke. [183582]

Mr. Pond *[holding answer 15 July 2004]:* The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. John McDonnell, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what consultation was undertaken before the announcement of the closure of the Child Support Agency office in Basingstoke.

The Agency is committed to a policy of open communications with its staff. It therefore told people of its intention to cease its operations in Basingstoke at the earliest opportunity. Formal consultation is now taking place with staff and trade unions. Our intention is to maximise the deployment of staff elsewhere in the Department for Work and Pensions. We are currently in discussions with colleagues elsewhere in the Department. Until these discussions are complete no final decision on the closure of the Basingstoke site will be taken.

John McDonnell: To ask the Secretary of State for Work and Pensions what options have been considered as alternatives to the closure of the Basingstoke Child Support Agency office. [183583]

Mr. Pond *[holding answer 15 July 2004]:* The administration of the Child Support Agency is a matter for the Chief Executive, Mr. Doug Smith. He will write to the hon. Member with the information requested.

Letter from Doug Smith to Mr. John McDonnell, dated 22 July 2004:

In reply to your recent Parliamentary question about the Child Support Agency the Secretary of State promised a substantive reply from the Chief Executive.

You asked the Secretary of State for Work and Pensions, what options have been considered as alternatives to the closure of the Basingstoke Child Support Agency office.

We are charged with reducing the size of our estate based on an expectation of a significant reduction in headcount. Basingstoke falls within the geographic region covered by the Lyons Review and we have accepted the findings of this review. We are intending to move the Agency's operations from Basingstoke in line with the review and a direct alternative was not therefore considered.

Child Tax Credit

Mr. Webb: To ask the Secretary of State for Work and Pensions if he will estimate the number of families in receipt of income support and income-based jobseeker's allowance, also receiving full council tax benefit and assistance with mortgage interest payments, that will migrate to child tax credit. [185056]

Mr. Pond: As at February 2004, there were 54,000 families receiving income support or income-based jobseeker's allowance, and also receiving assistance with their mortgage interest payments; all of whom will migrate to child tax credit in due course.

There is no comparable data from which to determine the number that also receive council tax benefit; however, it is likely that the majority of these families will receive council tax benefit.

Notes:

1. Figures are based on a 5 per cent. sample and are therefore subject to sampling variation.

2. Figures have been rounded to the nearest 100.

Mr. Webb: To ask the Secretary of State for Work and Pensions (1) if he will estimate how many individuals have experienced a drop in their income as a result of migrating to the child tax credit from income support and jobseeker's allowance; [181580]

(2) how many interviews his Department has conducted to help to secure the position of those who have been floated off income support and jobseeker's allowance as a result of their benefits being passported to the child tax credit; and if he will make a statement. [181581]

Mr. Pond: The information is not available.

To date there have been 3,658 interviews recorded with families likely to float off income support or jobseeker's allowance.

Civil Partnerships Bill

Mr. Chris Smith: To ask the Secretary of State for Work and Pensions what savings on income-related benefits he anticipates making once the Civil Partnerships Bill is introduced for, and the living together test extended to, same-sex couples. [184728]

Maria Eagle: If the Civil Partnership Bill is enacted same-sex couples, whether they have formed a civil partnership or are living together as civil partners, will be treated in the same way as opposite-sex couples in the income-related benefits. It is possible that DWP will realise some savings as a result.

There is very little information about the number of same-sex couples in this country. The Labour Force Survey suggests that there are about 50,000 cohabiting same-sex couples in the UK, very few of whom are pensioners.

However, there is likely to be some under-reporting, because individuals' reluctance to disclose information about their personal circumstances. Further, the Department does not have any statistical information about individuals currently receiving income related benefits who are cohabiting with someone of the same sex. Savings are, therefore, difficult to assess with any degree of confidence and it has not been possible to include estimates in the Regulatory Impact Assessment of the Civil Partnership Bill.

Sutton Disability Benefits Centre

Mr. Burstow: To ask the Secretary of State for Work and Pensions what assessment he has made of how changes in civil service numbers announced by the Chancellor in his statement on the Spending Review will affect the Sutton Disability Benefit Centre. [185799]

Maria Eagle: The Department's contribution to Sir Michael Lyons's Review of Public Sector Relocation identified work at a number of sites in London and the South East which could be relocated subject to more detailed consideration in each case. Final decisions have yet to be taken about how the Sutton Disability Benefits Centre may be affected.

Civil Service Redundancies

Chris Ruane: To ask the Secretary of State for Work and Pensions (1) whether the proposed job reductions in his Department will be achieved through *(a)* voluntary and *(b)* compulsory redundancies; [186066]

(2) what the timescale is for job reductions in his Department; [186068]

(3) if his Department will take part in cross-departmental negotiations concerning civil servant job losses to ensure that past and future job losses do not fall disproportionately on any individual community. [186069]

Maria Eagle: Following the Spending Review announcement, detailed business and staffing plans continue to be developed across all parts of the Department in order to manage the overall reduction of 30,000 posts over the four years to March 2008.

At this stage of planning it is too early to quantify the likely number of voluntary or compulsory redundancies. Compulsory redundancies, if required, will be a last resort after all other options have been considered.

The Department is fully engaged with the Cabinet Office to ensure cross Government co-ordination of staff redeployment and surplus management activity is effectively managed.

Chris Ruane: To ask the Secretary of State for Work and Pensions what contingency plans are in place to ensure that his Department's staffing levels are sufficient to cope with an increase in unemployment; and whether a need for additional staff would be met from the *(a)* public and *(b)* private sectors. [186070]

Maria Eagle: The Department's workforce strategy and planned staffing levels take account of key economic assumptions provided by HM Treasury. The current assumptions suggest that unemployment levels will remain static over the next four years.

The Department's workforce strategy will be kept under review to account for any changes in these economic assumptions and the potential impact on staffing requirements in particular parts of the Department.

Mr. Meale: To ask the Secretary of State for Work and Pensions (1) what the estimated number of Civil Service jobs expected to be lost to the Department arising from the Spending Review is; [186171]

(2) which local offices are included in his Department's closure programme arising out of the Spending Review; and what the timetable for closures is. [186173]

Maria Eagle: As announced in the Spending Review, the Department proposes to realise a net reduction of 30,000 posts by March 2008.

Detailed business and staffing plans continue to be developed across all parts of the Department in order to manage the proposed reductions. My right hon. Friend the Secretary of State issued a written statement on 29 June 2004, *Official Report*, columns 8–9WS, outlining the first phase of this transformation. We will inform the House as further planning decisions are made.

Communicating Difficult Messages

Mr. Willetts: To ask the Secretary of State for Work and Pensions if he will place in the Library a copy of the memorandum to his Department's offices entitled Best Practice in Communicating Difficult Messages. [185708]

Jane Kennedy: The document requested has been placed in the Library.

The Best Practice in Communicating Difficult Messages document was produced in-house by Jobcentre Plus drawing on good practice from within the communication industry.

The document was intended to provide brief, and easy to absorb information to support local managers when communicating to their staff about aspects of Jobcentre Plus business which could have an impact on people's jobs.

Community Sentences and Benefits Pilots

Mr. Willetts: To ask the Secretary of State for Work and Pensions when he next expects to be able to report on the results of operational improvements to the community sentences and benefits pilots. [182128]

Mr. Pond: We have said that the scheme would continue, with operational improvements, for a further year. We will report on the results of the improvements once they have been thoroughly evaluated.

Departmental Accountancy Practice

Mr. Bacon: To ask the Secretary of State for Work and Pensions who the Finance Director of *(a)* the Department and *(b)* the Child Support Agency is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts of each in the last five years. [183418]

Mr. Pond: The Finance Director of the DWP is John Codling who is CIPFA qualified. The Finance Director of the Child Support Agency is Jim Edgar who is CIMA qualified.

The DWP and its predecessor Department, DSS, has had its resource accounts qualified in each of the years since published resource accounts were first produced in

1999–2000. Since the DWP was formed in 2001–02 its resource accounts have been qualified in both 2001–02 and 2002–03 due to:

significant levels of estimated fraud and error in benefit expenditure recorded in the operating statement;

weaknesses in the Department's audit trails relating to contributory and non-contributory benefit customer over-payments debtors and the encashment control creditor. The Department has a programme in place to address these long standing system weaknesses.

The 2003–04 resource accounts will be available later this year.

Prior to 1999–2000 the Department's accounts were produced on a cash basis and the DSS Vote 1 Account was qualified on the basis of fraud and error since 1990–91 along with the National Insurance Fund Account which was the responsibility of the Department prior to its transfer to the Inland Revenue in 2001–02.

In the past five years, all other accounts within the Department, with the exception of the Child Support client funds account, have been produced free of a qualified audit opinion.

The Child Support Agency administration account has never been qualified. The client funds account has been qualified each year due to largely historic errors in the underlying maintenance assessments resulting in misstatements in receipts and payments, and in the maintenance balances outstanding.

The 2003–04 CSA client fund account will be available later this year.

Departmental Publications

Mr. Meale: To ask the Secretary of State for Work and Pensions (1) how many publications his Department has issued over the past three years; and what the print run distributed was in each case; [186174]

(2) how much the Department spent on departmental publications in the past three years. [186172]

Maria Eagle: The Department and its customer-facing businesses produce a wide range of publications, ranging from reports to Parliament, other official documents and research reports through to booklets and leaflets designed to inform the citizen of their rights and responsibilities.

The detailed information requested is not held centrally and could only be obtained at disproportionate cost.

Dr. Cable: To ask the Secretary of State for Work and Pensions how many departmental publications are in storage; and where they are located. [183867]

Jane Kennedy: The Department for Work and Pensions had 420 publication titles and a total of 7,307,933 copies in storage at its five main stores on 13 July 2004. Our main stores are a mix of departmental and contractor stores. The two main departmental stores are at Heywood and Beacon Road, Norcross. The three contractor stores are Meads at Nottingham, Belmont Press at Northampton and Astron at Chadderton. Retention and storage of materials at commercial stores are a matter for the Publisher who may rely on the use of on-demand printing facilities to meet the Department's demand.

In addition small buffer stocks of leaflets and guidance material for our customers are held at about 1,800 offices across our national network.

A small number of leaflets, associated with major advertising campaigns, are also held for the duration of the campaign by companies who operate campaign response mechanisms for the public.

Departmental Redundancies

Chris Ruane: To ask the Secretary of State for Work and Pensions if he will list the *(a)* organisations and *(b)* agencies which his Department will consult before deciding upon the locations for potential job reductions. [186029]

Maria Eagle: The detail of where and when staff reductions will happen is still being developed.

As more information becomes available the department will consult with appropriate public and private sector organisations in the relevant locations as well as our trade unions.

Chris Ruane: To ask the Secretary of State for Work and Pensions what funding has been set aside to retrain staff of his Department that are likely to lose their jobs. [186030]

Maria Eagle: Following the Spending Review announcement, detailed business and staffing plans continue to be developed across all parts of the Department in order to manage the reduction of 30,000 posts by March 2008. Until these plans are finalised it is too early to predict the numbers of staff requiring retraining, the exact nature of the training and the level of funding provision required.

Chris Ruane: To ask the Secretary of State for Work and Pensions (1) how many jobs it is proposed will be lost in his Department, broken down by pay grade in *(a)* percentage and *(b)* actual terms; [186031]

(2) if he will express the number of proposed job cuts in his Department as a *(a)* total and *(b)* percentage of the work force in each region of the UK. [186032]

Maria Eagle: Following the Spending Review announcement, detailed business and staffing plans continue to be developed across all parts of the Department in order to manage the reduction of 30,000 posts by March 2008. Until these plans are finalised it is too early to say how the planned reduction in posts will affect each grade in the Department or the percentage reductions in each region.

The first phase of the plans were announced in a written statement by my right hon. Friend the Secretary of State on 29 June 2004, *Official Report*, columns 8–9WS. Further detailed plans are currently being developed. These plans will enable us to determine how the staffing reductions will be profiled across each Government office region.

Departmental Staff (Wales)

Chris Ruane: To ask the Secretary of State for Work and Pensions how many people were employed by his Department in Wales in each of the last 15 years, broken down by location. [186076]

Maria Eagle: Information on staff numbers broken down by location in Wales is not available. Information on the number of staff in Wales as a whole is not available prior to September 2001. Information at that date and each year thereafter is in the following table.

As at 30 September	*Number*
2001	6,581
2002	7,491
2003	7,697

Notes:

1. Numbers are based on headcount not Whole Time Equivalents.
2. Numbers are consistent with Cabinet Office definitions other than the inclusion of staff on paid maternity leave.
3. Numbers are point in time at the date shown.

Disability Living Allowance

Mr. Lazarowicz: To ask the Secretary of State for Work and Pensions how many applications for disability living allowance were initially *(a)* granted and *(b)* refused in the last year for which figures are available; and how many of those refused were subsequently allowed after review or appeal. [186054]

Maria Eagle: The available information is set out in the table.

Disability living allowance: Numbers of initial awards; claims disallowed; awards increased on review and appeals decided in favour of the appellant: From 1 March 2003 to 29 February 2004

	Number
Initial Awards[1]	217,300
Claims Disallowed[1]	220,200
Awards increased on review[2]	56,400
Appeals in favour of appellant[3]	37,200

[1] Figures taken from a 100 per cent. sample at 29 February 2004.
[1] Figures are rounded to the nearest 100.
[2] Figures taken from 100 per cent. sample at 29 February 2004.
[2] Figures are rounded to the nearest 100.
[2] Figures include reconsiderations and supersessions.
[3] All figures are subject to change as more up to date data becomes available.
[3] Figures are rounded to the nearest 100.

[1, 2] MJS

[3] 100 per cent. download of the Generic Appeals Processing System.

Fatal and Major Injury Accidents

Mr. Webb: To ask the Secretary of State for Work and Pensions what the incidence rate of fatal and major injury incidents was in each of the last seven years. [184676]

Jane Kennedy: The incidence rate of fatal and major injuries (per 100,000 employed), reported to all enforcing authorities in the period 1997–98 to 2002–03 is shown in the following table:

	Employee		*Self-employed*	
	Fatal injury rate	*Major injury rate*	*Fatal injury rate*	*Major injury rate*
1996–97	0.9	127.5	2.3	38.4
1997–98	0.9	127.6	1.8	23.3
1998–99	0.8	121.7	1.9	20.3
1999–2000	0.7	116.6	1.7	19.7
2000–01	0.9	110.2	2.4	19.2
2001–02	0.8	110.9	1.3	27.8
2002–03[1]	0.7	113.0	1.3	31.9

[1] Provisional.

Notes:

1. Incidence rates are derived from reports made to HSE and local authorities under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 1995.
2. Incidence rates are expressed per hundred thousand employees or self-employed people as appropriate.
3. The annual basis is the planning year from 1 April to 31 March.
4. Statistics are those reported to all enforcing authorities.

Formal Child Care (Take-up)

Mr. Webb: To ask the Secretary of State for Work and Pensions how he plans to increase the take-up of formal childcare by lower income families. [185061]

Jane Kennedy: The Government are committed to helping children in low income families by providing and improving take up of good quality formal childcare. We are working to increase the availability, accessibility, affordability and variety of formal childcare and, importantly, to ensure parents understand the choices open to them.

We have provided substantial investment via the Sure Start Unit and its predecessors—£4.2 billion invested since 1997 and a further £4.3 billion earmarked in the Spending Review for the period up to 2008—and have broadened the range of childcare opportunities available. For example, we have introduced Extended School Childcare Pilots to provide the childcare lone parents need to enter employment and Childcare Taster Pilots to give lone parents the opportunity to experience formal childcare.

To further increase parents' knowledge, we have made individual and tailored advice available through the new deal and Jobcentre Plus and as part of the range of services offered by Sure Start Local Programmes and Children's Centres. Meanwhile, Jobcentre Plus has introduced dedicated Childcare Partnership Managers to coordinate Jobcentre Plus's programmes and strategies with local childcare development plans.

Through tax credits we have made significant improvements to the financial assistance for child care available to working parents—up to £140 a week can be claimed—and have made plans for a voluntary accreditation scheme, extending the types of childcare

that parents can receive financial support for. We have also invested in the Support Childminder Scheme, to engage existing childminders in supporting new people, including informal carers, in registering with Ofsted.

Departmental Staffing (Fylde)

Mr. Jack: To ask the Secretary of State for Work and Pensions if he will list his proposed staffing reductions for each of his Department's areas of responsibility in Fylde, for each year from 2004 to 2008. [184575]

Maria Eagle *[holding answer 16 July 2004]:* Following the announcement in the Budget statement on future departmental staffing levels work has been taking place across the Department to develop detailed business and staffing plans. The first phase of these plans was announced in a statement by my right hon. Friend the Secretary of State on 29 June 2004, *Official Report*, columns 8–9WS. Further detailed plans are currently being developed. These plans will enable us to determine how the staffing reductions will be profiled across each part and location of the Department and its businesses.

Green Minister

Mr. Horam: To ask the Secretary of State for Work and Pensions if he will make a statement on the activities of the Green Minister in the Department in financial year 2003–04. [185128]

Jane Kennedy: The Department's Green Minister is Baroness Hollis of Heigham. Baroness Hollis is a member of ENV(G), the Ministerial Sub-Committee of Green Ministers. However, it has been established practice under successive Governments not to disclose information relating to the proceedings of Cabinet Committees.

The Department actively contributes to the UK Strategy for Sustainable Development through its core objectives to combat poverty and social exclusion and to eliminate child poverty. Baroness Hollis' ministerial role on these issues is interwoven with her Green Minister role.

During the past year, Baroness Hollis has also been involved in communications with the Treasury to further develop the integration of qualitative assessment into cost benefit analysis. This will allow analyses to better demonstrate social, economic and environmental balance.

The Department issued its third Sustainable Development Annual Report in the autumn of 2003.

Health and Safety Executive

Mr. Webb: To ask the Secretary of State for Work and Pensions how many Health and Safety Executive *(a)* regulatory contacts and *(b)* investigations were carried out in each of the last seven years. [184679]

Jane Kennedy: The numbers of regulatory contacts and investigations carried out by the Health and Safety Executive over the last seven years are as follows.

Report year (April to March)	*Regulatory contacts*	*Investigations*
1997–98	186,065	33,585
1998–99	183,292	32,200
1999–2000	185,496	35,551
2000–01	192,693	40,774
2001–02	195,695	37,855
2002–03	218,574	34,724
2003–04	206,460	27,816

Mr. Webb: To ask the Secretary of State for Work and Pensions how many *(a)* incidents and *(b)* complaints were (i) reported to and (ii) investigated by the Health and Safety Executive in each of the last seven years. [184680]

Jane Kennedy: Incidents and complaints, reported to and investigated by the Health and Safety Executive are as follows:

Report year (April to March)	*Incidents reported*	*Complaints reported*	*Incidents investigated*	*Complaints investigated*
1997–98	n/a	n/a	[1]33,585	
1998–99	164,912	29,610	9,400	22,800
1999–2000	160,514	30,901	10,844	24,707
2000–01	164,287	28,933	15,489	25,285
2001–02	156,058	28,021	13,421	24,434
2002–03	142,418	27,554	11,251	23,473
2003–04	[2]n/a	24,404	[3]5,288	22,528

[1] Total.

[2] Data will be available on 18 November 2004.

[3] In 2003–04 HSE's target was to investigate 95 per cent. of reported incidents that met its published investigation criteria. In previous years the HSE target was to investigate a percentage of reported incidents (different targets for each year). In 2003–04, HSE achieved its targets for percentage of complaints followed up (plan—90 per cent.; outturn—94.8 per cent.) and incidents investigated (plan—95 per cent.; outturn—97.66 per cent.).

Mr. Webb: To ask the Secretary of State for Work and Pensions how many cases of information being laid by the Health and Safety Executive in order to support a prosecution there have been in each of the last seven years. [184682]

Jane Kennedy: Over the last seven years the following number of offences have been prosecuted in Great Britain, following investigation by the Health and Safety Executive. Each offence prosecuted represents one information laid or, in Scotland, charge preferred. The information given is publicly available. The 2003–04 figures will be publicly released in the Offences and Penalties Report, due for release in late October 2004.

Year[1]	*Total offences prosecuted*
1996–97	1,490
1997–98	1,627
1998–99	1,759
1999–2000	2,115
2000–01	1,973
2001–02	1,986
2002–03	1,659

[1] Year refers to operational year, which runs from 1 April to 31 March.

Housing Benefit

Mr. Willetts: To ask the Secretary of State for Work and Pensions if he will list the 20 councils with the longest times for processing new housing benefit claims, identifying in each case the average time for processing claims. [185706]

Mr. Pond: The information is in the table.

20 local authorities with the longest processing times for new claims for housing benefit (HB) and council tax benefit (CTB)

Local authority	*Average time for processing new claims (calendar days)* HB	CTB	HB and CTB
Bristol	87	90	88
North Ayrshire	79	97	88
Dundee	88	90	89
Flintshire	89	89	89
York	78	108	91
Croydon	83	105	95
East Devon	95	96	96
Mid Suffolk	92	98	96
South Northamptonshire	100	95	97
Torridge	99	96	97
Chelmsford	95	108	101
Lambeth	90	122	104
Renfrewshire	92	115	104
Portsmouth	103	112	107
Leicester	106	122	114
Manchester	137	89	115
Merthyr Tydfil	—	—	118
Hackney	114	134	123
Liverpool	183	152	167
Swale	182	203	193

Notes:

1. Four local authorities did not supply data for 2003–04.
2. It is not possible to differentiate the housing benefit/council tax benefit data from Merthyr Tydfil.
3. The data are taken from un-audited returns by local authorities to DWP, and are the most recent quarterly data they have returned for 2003–04.

Mr. Willetts: To ask the Secretary of State for Work and Pensions how many councils are *(a)* meeting and *(b)* not meeting the Government's target for handling new housing benefit claims within 14 days. [185707]

Mr. Pond: The Department for Work and Pensions does not set a target of 14 days for deciding new claims; the regulations require a claim to be decided within 14 days of the relevant information having been received or as soon as reasonably practicable thereafter. The Department launched national Performance Standards in April 2002, which set a standard of 90 per cent. of new housing benefit claims to be decided in 14 days, but these are not mandatory. In the fourth quarter of 2003–04 (the most recent data available) the national average performance was 75 per cent. of new claims decided within 14 days with 23 per cent. of local authorities currently meeting or exceeding the 90 per cent. standard.

In order to improve this performance the Benefit Fraud Inspectorate targets its inspections on those authorities that have the longest processing times. We also provide every local authority chief executive with information as to how they compare against national standards and performance.

Job Centre Plus

Chris Ruane: To ask the Secretary of State for Work and Pensions which towns in North Wales have Job Centre Plus offices; and when Job Centre Plus will be rolled out in Rhyl. [186025]

Jane Kennedy: The administration of Jobcentre Plus is a matter for the chief executive of Jobcentre Plus, David Anderson. He will write to the hon. Member.

Letter from David Anderson to Mr. Chris Ruane, dated 22 July 2004:

The Secretary of State has asked me to reply to your question concerning the rollout of Jobcentre Plus in North Wales. This is something which falls within the responsibilities delegated to me as Chief Executive of Jobcentre Plus.

It may be helpful if I explain that the introduction of the Jobcentre Plus model across North Wales is being undertaken in a staged process, which should be completed by March 2006. We have already introduced the new service in our North West Wales and Powys District, and there are Jobcentre Plus Offices in Amlwch, Bangor, Caernarfon, Dolgellau, Holyhead, Llangefni, Porthmadog and Pwllheli.

I am aware that the District Manager for Wrexham and North Wales Coast, which covers Rhyl, wrote to you on 5 April, outlining his initial service delivery plans.

There are presently a mixture of Jobcentres and Social Security Offices in Cefn Mawr, Colwyn Bay, Conwy, Denbigh, Flint, Holywell, Llangollen, Llanrwst, Llandudno, Mold, Prestatyn, Rhyl, Shotton and Wrexham. However, plans for the rollout of the new integrated service have not yet been finalised.

The recent announcement that Wrexham Pension Centre will transfer to Jobcentre Plus, along with our decision to centralise benefit processing into larger units to help deliver our demanding efficiency agenda, are all factors that will need to be taken into account before plans can be finalised.

At this stage, I am therefore unable to give a specific date for the introduction of the integrated Jobcentre Plus service in Rhyl. However, as the position becomes clearer, the District Manager for Wrexham and North Wales Coast, will keep you fully informed of developments.

I hope this is helpful.

Special Advisers

Mr. Evans: To ask the Secretary of State for Work and Pensions how many of the reductions in the numbers of civil servants in his Department announced in the comprehensive spending review will be of special advisers. [185466]

Maria Eagle: I refer the hon. Member to the answer given by my right hon. Friend the Chief Secretary to the Treasury on 20 July 2004, *Official Report*, column 190W.

New Deal

Mr. Willetts: To ask the Secretary of State for Work and Pensions how many participants have been through *(a)* the New Deal for the over -50s and *(b)* the New Deal for Partners to date; and what percentage moved into jobs in each case. [182071]

Jane Kennedy: To the end of March 2004, there have been a total of 7,820 starts to the New Deal for Partners and a total of 1,870 jobs (24 per cent. of total starts) have been gained through the programme.

Figures on the number of people participating in New Deal 50-plus are not available.

Up to March 2003, job outcomes for New Deal 50-plus were based on the number of people taking up the New Deal 50-plus Employment Credit. Between April 2000, when New Deal 50 Plus started, and March 2003, there were 98,040 employment credit starts. Figures for the number of people finding jobs through New Deal 50-plus but not receiving the employment credit are not available.

In April 2003, the employment credit was replaced by the 50-plus return to work element of the working tax credit. We are currently working with the Inland Revenue to secure robust data on how many people have claimed this. However, between April 2003 and December 2003, 19,970 people returned to work thanks to Jobcentre Plus and the New Deal.

Mr. Willetts: To ask the Secretary of State for Work and Pensions how many people have participated in New Deal 50-plus in each year since it was introduced; how many have found a job as a result; and how many have received a weekly employment credit. [178873]

Jane Kennedy: Figures on the number of people participating in New Deal 50-plus are not available.

Up to March 2003, job outcomes for New Deal 50-plus were based on the number of people taking up the New Deal 50-plus Employment Credit. These figures are in the table.

New Deal 50-plus Employment Credit starts

	Number[1]
April 2000 to December 2000	24,830
January 2001 to December 2001	35,080
January 2002 to December 2002	31,830
January 2003 to March 2003	6,300

[1] Figures are rounded to the nearest 10.

Note:
ND50+ Employment Credit started in April 2000 and was replaced by the 50 plus return to work element of Working Tax Credit in April 2003.

Non-departmental Public Bodies

Mr. Stephen O'Brien: To ask the Secretary of State for Work and Pensions how many non-departmental public bodies for which his Department is responsible have been *(a)* established and *(b)* abolished since 1997. [182946]

Maria Eagle: The information is in the table

Non-departmental public bodies sponsored by the Department for Work and Pensions which have been (a) established and (b) abolished since 1997

Body	*Date established*	*Date abolished*
Occupational Pension Board (OPB)[1]	—	1 April 1997
Central Adjudication Services (CAS)[1]	—	1 November 1999
Independent Tribunal Service (ITS)[2]	—	31 March 2000
Incorporating:		
Medical Appeal Tribunals		
Disability Appeal Tribunals		
Vaccine Damage Appeal Tribunals		
Social Security Appeal Tribunals		
Child Support Appeal Tribunals		
New Deal Task Force (NDTF)[3]	July 1997	October 2001
Advisory Committee for Disabled People in Employment Training (ACDET)[4]	1 April 1998	31 March 2002
Race Education and Employment Forum (REEF)[4]	1 April 1998	1 April 2003
Disability Rights Commission (DRC)[4]	1 April 2000	—
Appeals Service[2]	3 April 2000	—
National Employment Panel (NEP)[3]	October 2001	—
Disability Employment Advisory Committee (DEAC)[5]	1 August 2002	—

[1] This body was originally established by the Department of Social Security, which became the Department for Work and Pensions in June 2001. The new Department was formed by bringing together the Department of Social Security and the Employment Services, which prior to this machinery of government change was part of the Department for Education and Employment (now the Department for Education and Skills).
[2] Originally established by the Department of Social Security, the ITS tribunals were replaced by the Appeals Service in April 2000. The Appeals Service consists of two distinct bodies within a single organisation. The first is a tribunal non-departmental public body with responsibility for the judicial functioning of appeals tribunals. The second is an executive agency responsible for the administration of appeals.
[3] Originally established by the Department for Education and Employment, the New Deal Task Force's name was changed to the National Employment Panel and its remit expanded by the Department for Work and Pensions in 2001.
[4] This body was originally established by the Department for Education and Employment, but responsibility moved to the Department for Work and Pensions when the new Department was formed in 2001.
[5] Established by the Department for Work and Pensions.

Work Incentives (Homeless Households)

Ms Oona King: To ask the Secretary of State for Work and Pensions pursuant to his answer of 28 June 2004, *Official Report*, column 88W, on work incentives (homeless households), what assessment his Department has made of the impact high rents in temporary accommodation have on the ability of homeless households to access employment opportunities; and if he will make a statement. [182716]

Mr. Pond: Recent research undertaken by the Department with Registered Social Landlords, statutory and voluntary agencies and other stakeholders in local authorities, suggested that high rents in temporary accommodation can act as a disincentive to tenants re-entering employment.

We plan to publish this research in the autumn.

Pensions and Benefits (Direct Payments)

Mr. Hancock: To ask the Secretary of State for Work and Pensions pursuant to his answer of 20 April 2004,

ref 165353, and his letters to the hon. Member for Portsmouth, South undated and dated 29 March, refs PQ/03/98099 and PQ/03/97277, (1) if he will explain the differences between the figures given; [168643]

(2) when he will answer the question of 21 April from the hon. Member for Portsmouth, South, ref 168643, about figures provided by his Department. [185217]

Mr. Pond: I regret that discrepancies between the figures arose because of errors in the terminology used. A claimant can have several payment accounts, each for a separate benefit; therefore the total number of accounts in Portsmouth South will exceed the number of claimants. The answers to the earlier questions did not correctly distinguish between account numbers and claimant numbers.

The following information is the full set of correct figures relevant to the three earlier questions. This corrects the information given in written answers on 24 February 2004, *Official Report*, column 197W and column 202W, and on 20 April 2004, *Official Report*, columns 443–44W.

Retirement pension accounts in Portsmouth, South constituency

As at December	Payments direct into bank/ building society accounts	Payable order	Payments through post office
2002	6,375	110	7,775
2003	6,945	90	6,825

Other benefit accounts held by pensioners in Portsmouth, South constituency (excluding war pension)

As at December	Payments into bank/building society accounts	Payable order	Payments through post office
2002	1,490	0	3,275
2003	2,240	0	3,355

Notes:

1. Payable orders are sent to the customer's home address but must be produced for payment at a bank or building society.
2. Included in payment through the post office are customers paid into post office card accounts and customers paid by girocheque. Girocheques are either encashable at a post office or payable into a bank or building society account.
3. The account figures in Table One and Two above exclude war pension and child benefit customers as these accounts are the responsibility of the Ministry of Defence and Inland Revenue respectively.
4. Some customers who are paid direct into an account can also collect their payments in cash at post offices through the wider range of banking services now available at post offices. There is no data available on the umber of benefit claims collected in this way.
5. The number of pensioners receiving one or more DWP benefits (including war pension) collectable at post offices in Portsmouth south at 28 December 2002 was £9,935.

Pension Credit

Mr. Peter Duncan: To ask the Secretary of State for Work and Pensions what proportion of pension credit payments are being paid into Post Office card accounts. [186257]

Jane Kennedy: At 30 June the number of live pension credit accounts was 2,548,895, of which 198,230 or 7.8 per cent. were paid to a Post Office card account. Of the total, 893,835 were not previously receiving minimum income guarantee. Of these cases, 40,110, or 4.5 per cent. were being paid to a Post Office card account.

Mr. Waterson: To ask the Secretary of State for Work and Pensions how many people eligible for pension credit have not taken it up in each month since October 2003; and how much money this represents in each case. [184940]

Malcolm Wicks: The information is not available in the form requested. The table sets out numbers of pension credit recipients in each month between October 2003 and June 2004, with the average weekly award. We estimate that approximately 3.75 million households, corresponding to around 4.85 million individuals, are likely to be eligible for pension credit in Great Britain in 2004–05. This estimate, rounded to the nearest 50,000 households or individuals, is subject to a wide margin of error and should be used as a broad indication of the likely eligible population only.

To help ensure that people do not lose out, entitlement to pension credit can, where appropriate, be backdated by up to 12 months.

Pension credit recipients, Great Britain, October 2003 to June 2004

	Households	Individuals	Average weekly award (£)
October 2003	1,795,875	2,109,200	47.10
November 2003	2,056,010	2,454,640	46.40
December 2003	2,115,195	2,533,960	44.20
January 2004	2,172,280	2,610,450	43.50
February 2004	2,264,115	2,731,480	42.60
March 2004	2,401,850	2,907,775	41.34
April 2004	2,445,660	2,961,885	41.67
May 2004	2,496,970	3,028,390	42.42
June 2004	2,548,895	3,094,870	41.99

Notes:

1. October 2003 figures are as at 17 October 2003. Figures from November 2003 to June 2004 are mid-monthly and have been rated up to give month end estimates.
2. Figures are rounded to the nearest 5.
3. Individual recipients include a number of partners under age 60.

Mr. Gill: To ask the Secretary of State for Work and Pensions (1) how many pensioners are estimated to be eligible for the pension credit in Leicester South; [186263]

(2) how many pensioners are claiming the pension credit in Leicester South. [186264]

Malcolm Wicks: Information on the number of people likely to be eligible for pension credit is not available at constituency level. However, we estimate that approximately 250,000 households in the East Midlands region, corresponding to approximately 350,000 individuals (rounded to the nearest 50,000), are likely to be eligible for pension credit in 2004–05. At the end of June, 5,135 pensioner households in Leicester South, comprising 6,415 individuals (rounded to the nearest five), were in receipt of pension credit. The corresponding figures for the East Midlands at the same date were 182,570 households and 224,435 individuals in receipt of pension credit.

Ms Keeble: To ask the Secretary of State for Work and Pensions how many pensioners in Northampton, North have received home visits from the Pension Service to assist them with claiming pension credit. [185785]

Malcolm Wicks: The table shows the number of home visits undertaken by the local service of the Pension Service in the Northampton local service cluster, which includes both Northampton, North and Northampton, South, between April 2003 and June 2004. All visits undertaken since April 2003 have covered pension credit.

Home visits by the Pension Service local service, Northampton cluster, April 2003-June 2004

	Number of visits
2003	
April	120
May	117
June	150
July	171
August	148
September	159
October	206
November	161
December	88
2004	
January	153
February	134
March	336
April	122
May	170
June	153

Pension Credit Application Line

Mr. Willetts: To ask the Secretary of State for Work and Pensions pursuant to his answer of 3 February 2004, *Official Report*, columns 833–34W, if he will provide the information on calls to the pension credit application line for each month since January for which figures are available. [185734]

Malcolm Wicks: The available information is shown in the table.

Calls to pension credit application line, January-June 2004

	Calls received by application line	*Calls receiving engaged tone or recorded message*	*Calls answered within 30 seconds*	*Average call duration (minutes: seconds)*
January	495,560	120	429,670	08:12
February	433,790	190	372,930	08:34
March	430,070	230	378,440	08:38
April	346,890	13,560	250,970	09:18
May	234,580	20	212,570	08:48
June	315,200	20	266,040	07:20

Notes:
1. Numbers of calls are rounded to the nearest 10.
2. The number of calls receiving the engaged tone or a recorded message was unusually high in April due to reduced numbers of staff as a result of industrial action. The number of lines feeding into the application line from the network was reduced to avoid people having to wait for a long time for an answer (instead they received a recorded message).
3. The number of calls received is a measure of the total number of calls from customers made to the application line number 0800 99 1234. The number of calls answered within 30 seconds is a measure of all calls answered in application line sites and excludes any calls abandoned by the customer.

Pension Payment Arrangements

Norman Baker: To ask the Secretary of State for Work and Pensions how many and what percentage of pensioners in *(a)* England, *(b)* East Sussex and *(c)* Lewes constituency are using pension books to collect their pensions at a post office. [185905]

Mr. Pond: Information available on pensioners (women over 60 and men over 65) as at 15 May 2004 in *(a)* England *(b)* East Sussex and *(c)* Lewes constituency receiving their retirement pension by order books, collectable at a post office, is shown in the table.

	Accounts paid by order book	*Percentage of retirement pension accounts paid by order book*
England	2,936,800	37
East Sussex	32,505	28.40
Lewes	5,210	25.60

Notes:
1. Figures are rounded to the nearest five.
2. Figures do not include retirement pension combined with pension credit in a single payment.

Source:
IAD information Centre, 100 per cent. sample.

Norman Baker: To ask the Secretary of State for Work and Pensions how much has been spent to date on the change of pension payment arrangements from book to bank account; and how much of that has been spent on contact with recipients. [185906]

Mr. Pond: We are unable to answer in the format requested.

As at the 31 March 2004 the Department had, through its payment modernisation programme, incurred £210 million towards converting benefit and pensions customers from paper based methods of payment to payment by direct payment. Of this total around £90 million related to the cost of contacting benefit and pension customers. With the remainder being spent on project team costs, IT development, marketing and training of staff.

Michael Fabricant: To ask the Secretary of State for Work and Pensions how many pensioners who receive their pensions by giro have agreed an alternative means of payment with the Government. [159752]

Mr. Pond: Only a very small number of pensions customers receive their pension by giro, and in the 12 month period ending 24 January 2004 less than 50 changed to another method of payment.

Almost nine out of ten (87 per cent) of benefit customers already have an account suitable for Direct Payment, and this rises to 90 per cent. for pensioners.

Sarah Teather: To ask the Secretary of State for Work and Pensions what assessment his Department has made of the importance of regular income in helping the elderly budget for their needs. [186253]

Mr. Pond: The Government acknowledge the importance of pension payment arrangements that reflect elderly people's budgeting needs. We therefore offer a range of payment frequencies for benefits. Pensioners can choose to have their state pension paid weekly, four weekly or 13 weekly; pension credit is paid weekly.

The move to Direct Payment involves no changes to customers' existing benefit and pension payment frequencies. Pensioners who receive their pension by weekly order book will continue to receive their pension weekly when they transfer to Direct Payment.

Sarah Teather: To ask the Secretary of State for Work and Pensions (1) what proportion of pension payments paid into bank accounts since the beginning of the current financial year have not been paid seven days after the previous payment; [186249]

(2) how many bank accounts into which pensions are directly paid have had at least one occasion where the payment has not been paid exactly seven days after the last one; [186251]

(3) what steps he has taken to ensure that pensions paid into bank accounts are done paid every seven days. [186252]

Mr. Pond: The information is not available in the format requested.

Pensioners can choose to have their state pension paid weekly, four weekly or 13 weekly; pension credit is paid weekly.

Since the beginning of the financial year there have been no occasions when pension payments generally have been paid late into bank accounts. However there will have been individual cases where a change of circumstance has caused a review of the award, which may delay a payment. There may also be instances where banks have rejected payments because of changes to account details or similar circumstances.

The Department ensures that payments due payment on a bank holiday are advanced so that customers can get the money before the holiday. The general rule for direct payment is that payment due on a UK bank holiday (including 2 January in Scotland) is advanced to the last banking day before the holiday.

Sarah Teather: To ask the Secretary of State for Work and Pensions into how many bank accounts pensions are directly paid. [186250]

Mr. Pond: The information is not available in the format requested.

However, information is available to show that, as at 15 May 2004, 6,794,800 pensions accounts were paid by direct payment. Included in his total are 377,130 payments direct into a Post Office card account.

Mr. Willetts: To ask the Secretary of State for Work and Pensions how many pensioners have migrated from over-the-counter benefit payments to automated credit transfer in each month since May 1997. [177553]

Mr. Pond: The precise information is not available in the format requested. The number of pensioners (women over 60 and men over 65) that have migrated from over the counter benefit payments to direct payments each month since 15 June 2002 is shown in the table.

Month	*Number of accounts*
15 June to 13 July 2002	4,460
13 July to 10 August 2002	16,000
10 August to 7 September 2002	13,240
7 September to 5 October 2002	3,840
5 October to 2 November 2002	19,805
2–30 November 2002	4,560
30 November to28 December 2002	21,445
28 December 2002 to 25 January 2003	3,730
25 January to 22 February 2003	26,065
22 February to 22 March 2003	20,310
22 March to 19 April 2003	6,620
19 April to 17 May 2003	19,715
17 May to 14 June 2003	30,075
14 June to 12 July 2003	7,120
12 July to 9 August 2003	34,130
9 August to 6 September 2003	69,475
6 September to 4 October 2003	10,255
4 October to 1 November 2003	128,745
1–29 November 2003	115,710
29 November to 27 December 2003	20,045
27 December 2003 to 24 January 2004	188,080
24 January to 21 February 2004	182,205
21 February to 20 March 2004	108,665
20 March to 17 April 2004	296,865

Notes:

The following special points should be noted:

1. Figures produced by comparing two snapshots of live accounts in payment on the specified dates where the method of payment variable has changed to direct payment on the second dataset.
2. Figures produced relate to accounts not claimants, a benefit recipient may therefore have more than one account. Figures do not include any benefit payment that is made "in combination", through another benefit system, such as state pension paid through the pension credit system as a combined payment.
3. Over the counter payments includes order books and giros.
4. Figures are rounded to the nearest 5.
5. Figures refer to pensioner age benefit recipients residing in GB only.
6. Included in these figures is payments made to customers by girocheque. Girocheques are encashable at either a bank/building society account or a post office.
7. Some customers who are paid direct into an account can also collect their payments in cash at post offices through the wider range of banking services now available at the post office. There is no data available on the number of benefit claims collected in this way.

Policy (Environmental Impact)

Mr. Horam: To ask the Secretary of State for Work and Pensions how many new policy proposals or significant changes in policy were produced in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185102]

Jane Kennedy: The following table gives details of recorded policy decisions and changes, together with screenings undertaken. No full environmental appraisals have been undertaken.

	2002–03	*2003–04*
Number of new policies and significant changes in policies	21	30
Number of environmental screenings undertaken	4	9

The Department has now incorporated sustainable development into its change processes. This requires

all programmes and projects to undertake a sustainability assessment, including the consideration of environmental impacts, at key stages in development.

Post Office Card Accounts (Pensions)

Mr. Drew: To ask the Secretary of State for Work and Pensions how many complaints he has received from pensions recipients about difficulties in accessing their funds through Post Office card accounts since the accounts were introduced. [185029]

Mr. Pond: The information is not available in the specific format requested. Feedback and complaints to The Pension Service are recorded under a number of categories, which include delays to or non-receipt of payments but not the method of payment involved.

The Post Office is responsible for dealing with any problems account holders may have in accessing money already held in a Post Office card account.

Press Officers

Mr. Willetts: To ask the Secretary of State for Work and Pensions how much his Department spent on press officers, broken down by grade, in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [185533]

Maria Eagle: The Department for Work and Pensions was formed in June 2001 from the former Department of Social Security, parts of the former Department for Education and Employment and the Employment Service. Information on costs for 1996–97 is not held centrally and could be obtained only at disproportionate cost.

During 2003–04 the Department spent £1,482,811 on press officer salaries. A breakdown of expenditure by grade cannot be provided, in order to protect individual confidentiality. However, information on the number of press officers employed in each grade is in the table.

Grade	*Number of press officers employed*
Senior Civil Service	1
Grade 7	2
Senior Executive Officer/Senior Information Officer	6
Higher Executive Officer/ Information Officer	25
Executive Officer/Assistant Information Officer	6

Note:
Staffing figures are whole time equivalents.

Public Awareness Campaigns

Mr. Willetts: To ask the Secretary of State for Work and Pensions what the objectives were for each advertising campaign undertaken by his Department since 2001, what criteria were used to judge their effectiveness; and to what extent these criteria were met. [170588]

Maria Eagle: A summary of advertising campaigns that have been conducted by the Department since 2000–01 is in the table.

Advertising campaign	*Objective*	*Evaluation method*	*Campaign result*
Minimum Income Guarantee	To encourage pensioners to take up their entitlement	Measure the awareness of MIG Monitor the number in receipt of MIG	Awareness and take up levels increased
Winter Fuel	To inform those eligible that payment is being made, inc 70+ and 80+ payments, and to encourage those who need to claim to do so	Measure the awareness of the payments Monitor new claims (NB—most payments made automatically)	Awareness levels increased Number of new claims increasing
Pensions Education Campaign	Long term campaign to encourage people to save for their retirement and improve their understanding of the options available	Track the take-up of information guides Monitor the number of visitors to relevant information on website Monitor calls to call centre	Number of guides, visitors and calls increased
Targeting Benefit Fraud	Long term campaign to tackle general attitudes to fraud and deter fraudsters	Monitor awareness and attitudes to fraud	Increase in awareness and progress towards key attitude changes
New Deal for Lone Parents	Raise awareness of the help available to lone parents in preparing for work	Measure awareness among target audience Track volume of calls to helpline	Awareness level and number of calls to helpline increased
New Deal for Disabled People	To raise awareness and generate response to the helpline	Measure awareness amongst the target audience Track number of calls to helpline	Awareness level and number of calls to helpline increased
New Deal 25 Plus	To inform the long term unemployed of help available	Measure awareness among target audience	Awareness level increased
Disability Discrimination Act	To raise awareness of the Act and encourage service providers to ensure that disabled people can access their services	Track awareness among target audience	Awareness levels increased
Pension Credit	To encourage eligible pensioners to claim the new Pension Credit	Measure the awareness of Pension Credit Monitor the number of eligible pensioners in receipt of Pension Credit, to ensure progress towards PSA target of 3 million by 2006.	Awareness and take up levels increased Progress on caseload in line to meet PSA target
State Second Pension	To encourage carers to review their circumstances to ensure that they are building up a Sate Second Pension	Monitor the number of requests for copies of the guide "State Pensions for carers and parents" requested in response to advertising Monitor awareness among target	Number of guides issued and awareness increased

Advertising campaign	Objective	Evaluation method	Campaign result
		audience	
Inherited SERPS	To explain the relative amount of SERPS pensions that people may be able to pass onto their spouses on death	Monitor awareness among target audience	Awareness level increased
Direct Payment	Three year campaign to support the conversion of customers from paper based methods to payment direct into an account	Monitor awareness of Direct Payment Customers' understanding of the new system and key campaign messages	Awareness and understanding increased
Age Positive	To communicate to employers the benefits of an age-diverse workforce	Monitor awareness of the Code of Practise Track awareness of the website	Awareness of Code and website increased
The Pension Service	To raise awareness of the services of the new Pension Service	Track number of visitors to the mobile exhibition unit Track attendance at Pension Service surgeries	Number of visitors and attendance at surgeries increased
Council Tax Benefit	Raise awareness amongst those on low incomes -primarily pensioners	Monitor awareness of among target audience	Awareness level increased
Jobseeker Direct	To promote telephone service to those looking for work, particularly to priority customer groups of lone parents and people aged 50 +	Monitor awareness among target audience Track number of calls received	Awareness level increased
Jobcentre Plus Employer Marketing	To generate vacancies delivering performance improvement.	Measure year-on-year vacancy volumes	Number of vacancies increased
New Deal	To raise awareness of the breadth of help available and encourage key target groups to respond	Monitor awareness among target audience Track the number of responses	Awareness and number of responses increased

Notes:
1. Information relates to advertising campaigns over the value of £250,00 for 2000–01 and over £500,000 for subsequent years.
2. Information on advertising campaigns costing under £250,000 and details of highly localised activity by the Departments customer-facing businesses have generally not been included as a disproportionate cost would be incurred in compiling these figures.
3. Evaluation of all campaigns is a routine procedure. Methods of evaluation vary and reflect the needs of each individual campaign. Detailed information of evaluation is not held centrally nor in a standard format and so can be provided only at disproportionate cost.
4. Copies of the Management summaries for the Targeting Fraud Campaigns are available in the Library.

Public Relations

Dr. Cable: To ask the Secretary of State for Work and Pensions what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183849]

Maria Eagle: The Department for Work and Pensions was formed in June 2001 from the former Department of Social Security, parts of the former Department for Education and Employment and the Employment Service. The available information is in the table.

DWP salary costs for employees working in publicity and public relations

£

	Publicity	Press officers/ public relations	Total
2001–02 (from June 2001)	1,407,738	816,725	2,224,463
2002–03	1,667,295	1,739,935	3,407,230
2003–04	1,569,683	1,482,811	3,052,494

Notes:
1. Information on costs prior to June 2001 is not held centrally and could be obtained only at disproportionate cost.
2. The figures refer to staff in the DWP Communications Directorate and exclude staff in marketing roles in the Department's customer facing businesses, or supporting and delivering marketing activity at local level. This information could be provided only at disproportionate cost.

Students (Means-tested Benefits)

Chris Grayling: To ask the Secretary of State for Work and Pensions how many full-time undergraduate students were in receipt of means-tested benefits when they applied for their course in each year since 2000; and how many continued to receive means-tested benefits while on their course. [184879]

Mr. Pond: The information is not available.

Social Fund Crisis Loan Alignment Payments

Mr. Webb: To ask the Secretary of State for Work and Pensions how many Social Fund crisis loan alignment payments were awarded in *(a)* 2002–03 and *(b)* 2003–04; what the expenditure on alignment payments was in each of those years; and if he will make a statement. [185055]

Mr. Pond: Crisis loan alignment payments are made to people awaiting their first payment of benefit, which is paid in arrears. Crisis loan payments made in these circumstances are intended to cover day-to-day living expenses until the first benefit pay day, following which full payments of benefit can be made. Where a claim has not been decided by the time that the first payment is due, interim payments are available.

Alignment payments can also be made to people moving from benefit into work who need financial help until they receive their first wage.

The information is in the table.

	Number of awards	Expenditure (£ million)
2002–03	510,000	29.8
2003–04	513,000	31.0

Notes:
1. The number of awards listed includes all crisis loans made in whole or in part for alignment purposes.
2. Number of awards is rounded to the nearest thousand.

Source:
DWP Social Fund Policy, Budget and Management Information System.

Social Fund Funeral Expenses Payment

Mr. Webb: To ask the Secretary of State for Work and Pensions what the level of the Social Fund funeral expenses payment was in each of the last seven years. [185059]

Mr. Pond: The funeral payment scheme provides people receiving qualifying benefits or tax credits with payments for simple, respectful funerals. Awards cover the reasonable cost of specified items, including necessary burial or cremation charges, plus up to £700 for other non-specified funeral expenses. This was increased from £600 in April 2003.

The information is in the table.

£

	Average funeral payment
1997–98	796
1998–99	836
1999–2000	862
2000–01	885
2001–02	909
2002–03	929
2003–04	1,019

Source:
DWP Social Fund Policy, Budget and Management Information System

Travel Costs

Dr. Cable: To ask the Secretary of State for Work and Pensions what the travel costs were of civil servants in *(a)* his Department, *(b)* its predecessor Department and *(c)* its related agencies in each year since 1997. [183899]

Maria Eagle: The available information is in the tables. DWP was formed in June 2001 from the former Department of Social Security (DSS) and parts of the former Department for Education and Employment (DfEE). Travel expenditure information is not available for the former DfEE prior to March 2000, therefore expenditure figures up to and including 31/03/2000 are for the former DSS only. All travel complied with the requirements of the Civil Service Management Code.

Travel costs from 1997–98 to 2000–01 for the DSS and its agencies

	1997–98	1998–99	1999–2000	2000–01
Benefits Agency	18,968,615	18,692,979	20,803,862	18,382,607
Contributions Agency	2,420,422	2,889,523	—	—
Child Support Agency	2,380,132	2,244,467	3,114,557	3,841,188
War Pensions Agency	275,967	348,711	416,182	445,401
HQ	1,535,194	2,423,911	2,939,166	3,462,278
Independent Statutory Bodies	862,751	828,137	1,890,467	1,876,481
Employment Services	—	—	—	2,613,873
Total	26,443,081	27,427,728	29,164,243	30,621,828

Notes:
1. Travel costs include vehicle rental, UK travel, foreign travel and official vehicle costs.
2. BA costs included benefit offices, pensions, disability and carers directorate and DSS corporate centre.
3. Contributions Agency transferred to Inland Revenue in 1999.

Travel costs from 2001–02 to 2003–04 for DWP

	2001–02	2002–03	2003–04
Benefits Agency	14,311,031	—	—
Employment Services	2,730,854	—	—

Total	34,431759	35,082,308	36,530,279

Notes:
1. Travel costs include vehicle rental, UK travel, foreign travel and official vehicle costs.
2. BA costs included benefit offices, pensions, disability and carers directorate and DSS corporate centre.

Tribunal Appeal Centres

Mr. Barnes: To ask the Secretary of State for Work and Pensions if he will list the tribunal appeal centres which are being considered for closure. [185626]

Maria Eagle: This is a matter for Christina Townsend, Chief Executive of the Appeals Service. She will write to the hon. Member.

Letter from Christina Townsend to Mr. Harry Barnes, dated 22 July 2004:

The Secretary of State has asked me to respond to your question regarding appeal tribunal centres being considered for closure.

The Appeals Service is considering a number of proposals about its current organisation. No final decisions on the number of tribunal venues or their location have yet been taken.

I hope this reply is helpful.

Work-related Ill Health

Mr. Webb: To ask the Secretary of State for Work and Pensions what the incidence rate was of cases of work-related ill health in each of the last seven years. [184677]

Jane Kennedy: No single source of information gives a complete and reliable measure of work-related ill health in Great Britain. The most inclusive and broadly based estimates come from self-reporting surveys in which individuals are asked to report any work-related ill health they have suffered in the last 12 months. In the period requested only one such measure is available, for 2001–02. For this year the estimated incidence rate was 2,200 per 100,000. A more up-to-date estimate, covering 2003–04, will be published later this year.

Mr. Webb: To ask the Secretary of State for Work and Pensions how many members of the public have suffered ill health as a result of work activity in each of the last seven years. [184678]

Jane Kennedy: Comprehensive figures do not exist for the number of cases of ill health suffered as a result of work activity by members of the public, that is, by people other than workers. There are a number of issues that can contribute to ill health in the public caused by work activity. These include Healthcare Acquired Infection (HAI), pesticide-related ill health and Legionellosis. Partial information through the incidence statistics collected by various bodies, including HSE, local authorities and health agencies.

Working Temperature

Mr. George Osborne: To ask the Secretary of State for Work and Pensions what plans the Health and Safety Executive has to set a maximum working temperature. [186151]

Jane Kennedy: The Health and Safety Executive (HSE) will not be setting a maximum working temperature, as, due to the diversity of workplaces and work activities, it would be impractical to do so. Temperature is but one of a range of environmental and personal factors that thermal comfort in the workplace is dependant upon. Other factors include ventilation, humidity, radiant temperature, clothes worn, and the type of work involved. However, HSE do have plans to explore ways in which more guidance can be provided on the assessment and control of thermal comfort, and officials are currently considering possible approaches to a proposed dialogue on the matter with social partners.

Workplace Health and Safety

Mr. Kidney: To ask the Secretary of State for Work and Pensions whether the new public service agreement target on improving workplace health and safety will include improving the safety of those who drive in the course of their work. [186111]

Jane Kennedy: The public service agreement applies only to people who drive or operate plant and vehicles on worksites.

SCOTLAND

Departmental Questions

John Thurso: To ask the Secretary of State for Scotland how many *(a)* ordinary written and *(b)* named day questions his Department received in (i) the 2002–03 Session and (ii) this Session. [182718]

Mrs. McGuire: I refer the hon. Member to my answer of today to his earlier question, 171196.

Departmental Staff (Upper Age Limits)

Mr. Andrew Turner: To ask the Secretary of State for Scotland whether his Department has *(a)* a set retirement age which applies to all or most personnel and *(b)* a maximum age beyond which applications for employment will not be considered; and what the age is in each case. [186083]

Mrs. McGuire: Most of the staff in the Scotland Office and the Office of the Advocate-General are on loan from the Scottish Executive. The normal retirement age for all Scottish Executive staff is 60 years and, in line with this, applications for employment are not normally considered from candidates over 60. This policy is currently under review.

Devolution

Mr. Tynan: To ask the Secretary of State for Scotland what regular assessments of the balance between devolved and reserved powers are carried out. [185660]

Mrs. McGuire: The Government keeps policy and practice in relation to all aspects of the Scottish devolution settlement under review.

Those matters reserved to the UK Parliament are set out in Schedule 5 to the Scotland Act 1998. Any amendments to Schedule 5, either increasing or reducing the scope of reserved matters, are considered on a case-by-case basis and are subject to scrutiny in both the UK and Scottish Parliaments.

Mr. Tynan: To ask the Secretary of State for Scotland what *(a)* devolved issues and *(b)* other responsibilities have been transferred from the Scottish Executive to the UK Government since 1999; what return of funding each transfer involved; how many staff each transfer involved; and what legal basis was required for each transfer. [185661]

Mrs. McGuire: There have been no devolved issues transferred from the Scottish Executive to Ministers of the Crown since 1 July 1999.

Mr. Tynan: To ask the Secretary of State for Scotland what *(a)* reserved issues and *(b)* other responsibilities have been transferred from the UK Government to the Scottish Executive since its creation; what additional funding each transfer involved; how many staff each transfer involved; and what legal basis was required for each transfer. [185662]

Mrs. McGuire: This is a complex and detailed matter, which will require the preparation of a comprehensive list of legislation that relates to any transfer of functions or legislative competence. I will write to my hon. Friend as soon as this list can be prepared and place a copy of my letter in the Library of the House.

Efficiency Savings (Scottish Executive)

John Robertson: To ask the Secretary of State for Scotland what discussions he has had with the First Minister since the Comprehensive Spending Review in connection with efficiency savings in the Scottish Executive. [185352]

Mr. Darling: I have regular discussions with the First Minister on a range of subjects.

Special Advisers

Mr. Evans: To ask the Secretary of State for Scotland how many of the reductions in the numbers of civil

servants in his Department announced in the comprehensive spending review will be of special advisers. [185459]

Mrs. McGuire: I refer the hon. Member to the answer given by my right hon. Friend the Chief Secretary to the Treasury, on 20 July 2004, *Official Report*, column 190W.

Parliamentary Questions

John Thurso: To ask the Secretary of State for Scotland (1) how many *(a)* ordinary written and *(b)* named day questions his Department received in (i) 2002–03 and (ii) this parliamentary Session, broken down by month; [171196]

(2) what proportion of *(a)* ordinary written questions to his Department were answered within five sitting days of tabling and *(b)* questions for written answer on a named day received a substantive answer on that day in (i) the 2002–03 parliamentary Session and (ii) this parliamentary Session, broken down by month. [171197]

Mrs. McGuire: The breakdown of written questions received is as follows:

	Ordinary written	*Named day*
Session 2002–03		
November 2002	16	2
December 2002	9	6
January 2003	50	7
February 2003	19	4
March 2003	34	8
April 2003	28	2
May 2003	34	4
June 2003	59	6
July 2003	36	3
September 2003	8	1
October 2003	9	5
November 2003	8	—
Session 2003–04 (to end June)		
November 2003	—	2
December 2003	12	5
January 2004	17	4
February 2004	19	4
March 2004	19	2
April 2004	23	—
May 2004	26	3
June 2004	8	1

While records on average processing times are not collected, approximately 65 per cent. of the ordinary written questions were answered within five sitting days. Approximately 60 per cent. of the named day questions were answered by the date specified.

Sewel Motions

Mr. Lazarowicz: To ask the Secretary of State for Scotland pursuant to his answer of 7 July 2004, *Official Report*, column 709W, on Sewel motions, what Westminster legislation has been enacted in respect of each Sewel motion. [184967]

Mrs. McGuire: Sewel motions passed by the Scottish Parliament have been relevant to the following enactments of the UK Parliament:

Enactment	*Date Sewel motion approved*
Food Standards Act 1999, c.28	23 June 1999
Financial Services and Markets Act 2000, c.8	23 June 1999
Electronic Communications Act 2000, c.7	23 June 1999
Limited Liability Partnerships Act 2000, c.12	23 June 1999
Sea Fishing Grants (Charges) Act 2000, c.18	8 December 1999
Representation of the People Act 2000, c.2	13 January 2000
Sexual Offences (Amendment) Act 2000, c.44	19 January 2000
Political Parties, Elections and Referendums Act 2000, c.41	9 March 2000 (1) 6 July 2000 (2)
Regulation of Investigatory Powers Act 2000, c.23	6 April 2000
Learning and Skills Act 2000, c.2 1	18 May 2000
Race Relations (Amendment) Act 2000, c.34	25 May 2000
Insolvency Act 2000, c.39	1 June 2000
Care Standards Act 2000, c.14	22 June 2000
Government Resources and Accounts Act 2000, c.20	6 July 2000
Criminal Justice and Court Service Act 2000, c.43	5 October 2000
Health and Social Care Act 2001, c.15	17 January 2001
Tobacco Advertising and Promotion Act 2002, c.36	17 January 2001
International Criminal Court Act 2001, c.17	18 January 2001
Criminal Justice and Police Act 2001, c.16	7 February 2001
International Development Act 2002, c.1	8 March 2001
Armed Forces Act 2001, c.19	29 March 2001
Adoption and Children Act 2002, c.38	4 April 2001 (1) 24 October 2001(2) 30 January 2002 (3).
Proceeds of Crime Act 2002, c.29	24 October 2001
Anti-Terrorism, Crime and Security Act, c.24	15 November 2001
National Health Service Reform and Health Care Professions Act 2002, c.17	22 November 2001
Police Reform Act 2002, c.30	30 January 2002(1) 27 June 2002 (2)
Enterprise Act 2002, c.40	17 April 2002
Private Hire Vehicles (Carriage of Guide Dogs etc.) Act 2002, c.37	19 June 2002
Extradition Act 2003, c.41	21 November 2002
Waste and Emissions Trading Act 2003, c.43	28 November 2002
Criminal Justice Act 2003, c.44	5 December 2002(1) 9 October 2003 (2)
Crime (International Co-operation) Act 2003, c.32	5 December 2002
Local Government Act 2003, c.11	6 February 2003
Sexual Offences Act 2003, c.42	20 March 2003
Railways and Transport Safety Act, c.20	20 March 2003
Health and Social Care (Community Health and Standards) Act 2003, c.43	19 June 2003
Fireworks Act 2003, c.22	26 June 2003
Legal Deposit Libraries Act 2003, c.28	11 September 2003

Enactment	Date Sewel motion approved
Planning and Compulsory Purchase Act 2004, c.5	20 November 2003
Gender Recognition Act 2004, c.1	5 February 2004
Higher Education Act 2004, c.8	12 February 2004
Justice (Northern Ireland) 2004, c.4	18 March 2004

* Approval of Westminster legislation by the Scottish Parliament before it assumed its full powers on 1 July 1999.

The following Sewel motions have been passed by the Scottish Parliament in relation to Bills that have either subsequently not been enacted in the UK Parliament or have not yet completed their parliamentary consideration:

Sewel motion/Bill	Date approved	Status
Outworking	31 January 2001	Private Member's Bill—dropped
Culture and Recreation	8 March 2001	Not proceeded with after second reading in House of Lords
Health Protection Agency	29 January 2004	Bill currently before Parliament
Energy	4 February 2004	Bill currently before Parliament
Asylum and Immigration (Treatment for Claimants etc.)	12 February 2004	Bill currently before Parliament
Companies (Audit, Investigations and Community Enterprise)	4 March 2004	Bill currently before Parliament
Civil Contingencies	4 March 2004	Bill currently before Parliament
Civil Partnership	3 June 2004	Bill currently before Parliament

Sustainable Development (Government Estate)

John Thurso: To ask the Secretary of State for Scotland what changes there have been in *(a)* road transport vehicle carbon emissions and *(b)* single occupancy car commuting from his Department against the baseline year in the Framework for Sustainable Development on the Government Estate. [185605]

Mrs. McGuire: The use of vehicles by the Scotland Office is limited to official Ministerial travel. Vehicles are supplied by the Government Car and Despatch Agency, which has reduced vehicle carbon emissions from its fleet by 0.8 per cent. in the first year following the baseline year in the Framework for Sustainable Development on the Government Estate.

Vehicles are not used by the Scotland Office on a single occupancy basis.

Water

John Thurso: To ask the Secretary of State for Scotland whether his Department has joined the Watermark project. [185606]

Mrs. McGuire: The Scotland Office has not joined the Watermark project. The Office is now a distinct entity within the Department for Constitutional Affairs and its water usage, together with other sustainable development issues, will be reviewed in that context in the coming year.

John Thurso: To ask the Secretary of State for Scotland what changes there have been in water consumption by his Department in each year since 1997. [185607]

Mrs. McGuire: The Scotland Office was established on 1 July 1999.

Information on water consumption is not held centrally and could be provided only at disproportionate cost. The Scotland Office is now a distinct entity within the Department for Constitutional Affairs and its water usage, together with other sustainable development issues, will be reviewed in that context in the coming year.

John Thurso: To ask the Secretary of State for Scotland if he will list the non-office sites within his departmental estate which have been identified as being likely to provide opportunities for significant water savings. [185608]

Mrs. McGuire: The Scotland Office does not have any non-office sites within its estate.

PRIME MINISTER

Advisory Committee on Business Appointments

Linda Gilroy: To ask the Prime Minister when he plans to publish the annual report of the Advisory Committee on Business Appointments; and if he intends to carry out a review of the business appointment rules. [186447]

The Prime Minister: The Advisory Committee on Business Appointments has submitted its sixth report to me. The report provides an account of the work of the Committee in advising me on business appointment applications from Crown servants on the acceptance of outside appointments after leaving Government. The report covers the period 1 April 2002 to 31 March 2004. Copies of the report have been placed in the Libraries of the House.

I am very grateful to all the Committee members for giving their time so freely to it.

In addition, I have asked Sir Patrick Brown to undertake a review of the Business Appointment rules taking account of the work already done by the Committee and referred to in their report. The rules were last reviewed in 1996. Since then there has been a greater emphasis on interchange with the private and other sectors. The review will have the following terms of reference:

> "To review the Business Appointment rules to ensure that they are compatible with a public service that is keen to encourage greater interchange with the private and other sectors which is essential for effective delivery in today's public service. The review will consider the operation of the system, taking account of practice overseas. It will also consider the current machinery for dealing with applications and the necessary resources".

Butler Report

Llew Smith: To ask the Prime Minister pursuant to his statement of 14 July 2004, *Official Report*, column 1435,

on the Butler Report, what action he proposes to take to address the errors for which he has taken responsibility. [186097]

The Prime Minister: I refer my hon. Friend to my statement in the Iraq debate on 20 July 2004, *Official Report*, column 195.

Iraq

Mr. Dobson: To ask the Prime Minister (1) what advice he has received from the intelligence services about the impact of the Iraq war and subsequent occupation on the likely incidence of terrorism in *(a)* the Middle East, *(b)* the UK and *(c)* the rest of the world; [185693]

(2) what advice he has received from the intelligence services about the impact of the Iraq war and subsequent occupation on public opinion on the popularity of the UK in the Middle East. [185694]

The Prime Minister: I regularly receive intelligence assessments that address the situation in Iraq and its wider impact, including on the threat from international terrorism.

Llew Smith: To ask the Prime Minister if he will give details of each of the false statements or omissions in the Iraqi declarations provided pursuant to United Nations Security Council Resolution 1441 (2002) to which reference was made in the letter sent by his private secretary to the legal secretary of the law officers on 15 March 2003, referred to in paragraph 384 of the report of the Butler Committee on the review of intelligence on weapons of mass destruction. [186186]

The Prime Minister: As set out in the Butler Report, intelligence and information from a wide range of other sources, especially from UNMOVIC, demonstrated that there were false statements and omissions in the declarations submitted by Iraq.

Llew Smith: To ask the Prime Minister when he was informed of the proposal made by the director of the Central Intelligence Agency's weapons, intelligence, non-proliferation and arms control centre that the statements made on Iraq's attempts to secure uranium from Niger in the British Government dossier should be removed, as set out on pages 64–65 of the United States Senate report on intelligence on Iraq. [186218]

The Prime Minister: As set out in paragraph 497 of the Butler Report, the Central Intelligence Agency advised caution about any suggestion that Iraq had succeeded in acquiring uranium from Africa, but agreed that there was evidence that it had been sought.

Iraq (Statement on Mass Graves)

Llew Smith: To ask the Prime Minister what the source was for the statement he made on 20 November 2003 that the remains of 400,000 people had been discovered in mass graves in Iraq. [186040]

The Prime Minister: Human rights organisations, forensic groups and the UN have estimated that there are hundreds of thousands of people believed to be buried in mass graves. What is clear is that until a systematic investigation of Iraq's 259 reported mass gravesites is completed we are unlikely to know the complete picture.

Kosovo

Andrew Mackinlay: To ask the Prime Minister what measures have been taken each year to advance the undertakings he gave during his first visit to Pristina, Kosovo; what further measures he proposes; and if he will make a statement. [185632]

The Prime Minister: The UK remains committed to building a stable, democratic and multi-ethnic Kosovo, based on UN Security Council Resolution 1244, which set up the UN Mission in Kosovo (UNMIK) to help establish an autonomous, self-governing Kosovo. Free and democratic elections were held in 2001 which resulted in the formation of a Provisional Kosovo Government (PISG). In November 2003, the UNSC set out key standards that the PISG needed to reach for a process on final status to begin. The UN Secretary General, consulting the Contact Group, will assess progress in a formal review in 2005.

The UK continues to be a leading partner in Kosovo working closely with the UN Mission in Kosovo, the EU and the Contact Group to build a Kosovo based on the rule of law. I welcome the 14 July Joint Declaration by Kosovo Serb and Albanian leaders pledging to work together on reconciliation, return of displaced Serbs and reform of local self-government.

Since the establishment of UNMIK in 1999, the UK has provided over £50 million and over 100 seconded staff. We have contributed over £115 million to programmes to help develop policy, strategy and operational systems in key areas such as public administration, social policy and health care reform.

Ministerial Gifts

Mr. Dhanda: To ask the Prime Minister if he will list gifts received by Ministers in 2003–04 valued at more than £140. [186448]

The Prime Minister: I have today published a list of gifts received by Ministers. The list provides details of gifts received by Ministers valued at more than £140 for the period 1 April 2003 to 31 March 2004. Copies of the list have been placed in the Libraries of the House.

Ministerial Visits

Mr. Watson: To ask the Prime Minister if he will list *(a)* Government expenditure on ministerial overseas visits for the financial years 1996–97 to 2003–04 and *(b)* all visits overseas undertaken by Cabinet Ministers costing in excess of £500 between 1 April 2003 and 31 March 2004, including the cost, destination and purpose of each visit. [186446]

The Prime Minister: Expenditure on ministerial overseas visits for the period requested is estimated as follows.

	Expenditure (£ million)
1996–97	7.9
1997–98[1]	6.4
1998–99	4.9
1999–2000	4.6
2000–01	4.7
2001–02	5.6
2002–03	5.7
2003–04[2]	5.2

[1] 2 May 1997 to 31 March 1998.

[2] The figure for 2003–04 reflects payments made so far for travel undertaken in the period, a few bills have yet to be submitted to Departments for payment.

A list of all visits overseas undertaken by Cabinet Ministers costing £500 or more during the period 1 April 2003 to 31 March 2004 has been placed in the Libraries of the House. The list provides details of the date, destination, purpose and costs of individual visits made by Cabinet Ministers.

Special Advisers

Mr. Watts: To ask the Prime Minister if he will list *(a)* the names of special advisers in post and their specific area of expertise if appropriate, *(b)* special advisers' pay ranges for 2004–05, *(c)* the number of special advisers in each pay band by Department and *(d)* the total cost of special advisers for 2003–04. [186445]

The Prime Minister: Listed as follows are the names of special advisers in post at 19 July 2004, the special advisers' pay ranges for 2004–05, the number of special advisers in each pay band by Department and the total cost of special advisers for 2003–04.

All special advisers are appointed under terms and conditions set out in the "Model Contract for Special Advisers" providing advice on the full range of their appointing Minister's departmental responsibilities. Where a special adviser has a specific expertise this is indicated.

Advisers in post

Appointing Minister	Special adviser in post	Expertise

Total	1	23	26	22	4

[1] Plus two special advisers who are paid beyond pay band 4 but within the scheme maximum

[2] Plus one adviser who is unpaid

[3] Plus the five members of the Council of Economic Advisers who are employed on special adviser terms (one in band 4, three in band 3 and one in band 1). One of the members of the Council work part time.

Paybill costs

The cost of special advisers in 2003–04 is £5.3 million[1].

[1] This figure includes salary, severance pay and an estimate of pensions costs.

United Healthcare

Mr. Burstow: To ask the Prime Minister on what dates special advisers from his Office have met representatives of United Healthcare since 1 May; which of his special advisers took part in each meeting; and where each meeting was held. [186144]

The Prime Minister: My officials and I have meetings and discussions with a wide range of organisations and individuals. As with previous Administrations it is not the Government's practice to provide details of all such meetings, under Exemptions 2 and 7 of the Code of Practice on Access to Government Information.

TREASURY

CITES (Contravention)

Norman Baker: To ask the Chancellor of the Exchequer what instances of international trade in contravention of the Convention on International Trade in Endangered Species (CITES) have been *(a)* identified and *(b)* apprehended by UK authorities since January 2001, broken down by (i) species and (ii) CITES category; and if he will make a statement. [185898]

John Healey: HM Customs and Excise made 237 seizures of endangered species imported in air or sea freight in 2003.

	Number of seizures	*Number of items seized*	*Weight of items seized (kg)*
Live animals and birds	89	2,905	—
Parts and derivatives of endangered species	79	1,443	—
Ivory	18	96	—
Plants	10	2,018	—
Other CITES listed species	14	302	—
	9	—	32.9
Preparations of oriental medicines that include parts or derivatives of endangered species	6	4,220,807	—
	12	—	467.0

Seizures may be recorded by weight or number of seizures of items such as traditional Chinese medicines may be recorded either according to the individual count of capsules or according to the quantity of containers.

Equivalent breakdowns for 2001 or 2002 would only be available at disproportionate cost. Information on CITES category is not recorded against individual seizures and in some cases the species could not be covered by two or more of the annexes in EU Regulation.

MRSA

Andrew Mackinlay: To ask the Chancellor of the Exchequer how many and what percentage of deaths were caused by MRSA, or had MRSA as a contributing factor, in the last year for which figures are available, broken down by hospital; and if he will make a statement. [184410]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Andrew Mackinlay dated 22 July 2004:

As National Statistician, I have been asked to reply to your recent question asking how many and what percentage of deaths were caused by MRS A, or had MRSA as a contributing factor in the last year for which figures are available, broken down by hospital. (184410)

The latest year for which figures are available is 2002. The number of deaths contributed to by MRSA, by hospital, for this year is given in the table attached. This table includes hospitals where there were five or more deaths for which MRSA was recorded as a contributory factor. Where the number of deaths was less than five the number of deaths has not been provided, to minimise the risk of disclosure of confidential information.

I am also placing in the House of Commons library a table showing all the establishments recorded by ONS as general hospitals or multi-function sites during 2002 at which there was:

at least one death from any cause, and

either no deaths where MRSA was a contributory factor, or fewer than five such deaths.

It should be noted that it is not possible to put a firm figure to the number of people who die from MRSA because people are often very sick with a number of other conditions so the contribution of MRSA to the outcome in any particular case is uncertain. The underlying causeof death is most often the disease or injury which led them to be admitted to hospital, rather than the MRSA which may have complicated the course of the illness. Internationally accepted guidance from the World Health Organisation on the completion of death certificates requires only those conditions that contribute directly to death to be recorded.

Number of deaths where MRSA was a contributory factor[1], by hospital[2]

Hospital name	*No. of deaths where MRSA was a contributory factor*	*Percentage of all deaths*
England and Wales	721	0.2
Hospitals with five or more deaths where MRSA was a contributory factor		
Addenbrookes Hospital, Cambridge	10	0.6
Alexandra Hospital, Redditch	5	0.7
Arrowe Park Hospital, Birkenhead	5	0.3
Ashford Hospital	6	0.9
Birmingham Heartlands Hospital	17	0.9
Bristol Royal Infirmary	6	0.5
Broomfield Hospital, Chelmsford	8	0.6
City Hospital, Winson Green	10	0.7
Conquest Hospital, St. Leonards on Sea	9	0.7
Derriford Hospital, Plymouth	22	1.1
Freeman Hospital, Newcastle	9	0.9
General Hospital, Bishop Auckland	5	0.8
General Hospital, Southampton	7	0.3
General Infirmary, Leeds	11	0.6
George Eliot Hospital, Nuneaton	5	0.4
Hull Royal Infirmary	5	0.3
Ipswich Hospital NHS Trust	9	0.5
King's College Hospital, London	5	0.4
Lister Hospital, Stevenage	5	0.4
Luton and Dunstable Hospital	5	0.4
Maelor Hospital, Wrexham	10	0.8
Medway Maritime Hospital, Gillingham	13	0.8
Morriston Hospital, Swansea	7	0.5
Musgrove Park Hospital, Taunton	7	0.5
New Cross Hospital, Wolverhampton	8	0.4
Norfolk and Norwich University Hospital	7	0.3
North Middlesex Hospital, Edmonton	5	0.5
Prince Charles Hospital, Merthyr Tydfil	6	0.6
Princess Margaret Hospital, Swindon	5	0.4
Princess of Wales Hospital, Bridgend, Mid Glamorgan	6	0.6
Queen Alexandra Hospital, Portsmouth	15	0.7
Queen Elizabeth Hospital, Edgbaston	5	0.6
Royal Berkshire Hospital, Reading	5	0.4
Royal Cornwall Hospital, Truro	5	0.4
Royal Infirmary, Doncaster	6	0.4
Royal Infirmary, Huddersfield	5	0.5
Royal Preston Hospital	5	0.4
Royal Sussex County Hospital, Brighton	6	0.4
Southmead Hospital, Bristol	5	0.5
St. Helier Hospital, Carshalton	5	0.4
St. Mary's Hospital, Westminster	9	1.0
St. Thomas's Hospital, London	9	0.8
Stoke Mandeville Hospital, Aylesbury	5	0.7
Torbay Hospital	5	0.4
University Hospital Aintree	7	0.4
University Hospital of Wales, Cardiff	8	0.4
University Hospital, Nottingham	6	0.3
Warwick Hospital	5	0.5
Whittington Hospital St. Mary's Wing, Islington	6	0.7
Wycombe General Hospital	5	0.6

[1] Identified using the methodology described in Griffiths C, Lamagni TL, Crowcroft NS, Duckworth G and Rooney C (2004) Trends in MRSA in England and Wales: analysis of morbidity and mortality data for 1993–2002. Health Statistics Quarterly 21, 15–22.

[2] Defined as general hospitals or multi-function sites using the ONS classification of establishment types.

Note: Figures are for deaths occurring in 2002.

Pensions Mis-selling (Compensation)

Adam Price: To ask the Chancellor of the Exchequer how many individual general pensions mis-selling cases have been settled by compensation in the last year for which figures are available. [185766]

Ruth Kelly: The Financial Services Authority, the Financial Ombudsman Service and the Financial Services Compensation Scheme are independent bodies.

I understand from the Financial Services Authority, the Financial Ombudsman Service and the Financial Services Compensation Scheme that the following pensions cases has been resolved in the last year.

	Number of cases at 31 March 2004
Pensions review cases carried out by the financial industry	23,600
Pensions review cases conducted by the Financial Services Authority in conjunction with the Financial Services Compensation Scheme for those firms that are unable to meet claims against them.	3,335
Pension cases resolved by the Financial Ombudsman Service (including those cases relating to personal pensions, pensions review, free-standing additional voluntary contributions schemes, annuity contracts and all other products with a pensions element.)	6,265

Adam Price: To ask the Chancellor of the Exchequer what checks are carried out to ensure that compensation in cases of pension mis-selling are equivalent to reinstatement of the original pension scheme. [185767]

Ruth Kelly: I understand from the FSA that in the case of pension compensation cases which are part of the formal Pensions Review, recompense is not normally payable in the form of cash but by addition to the individual's pension. The term "redress" is apposite rather than the term "compensation".

Where a loss has been caused by non-compliant advice and reinstatement into the original pension scheme is available at fair cost, then an offer of reinstatement must be made.

Otherwise, the normal method of redress is by topping-up the individual's personal pension. The value of pension and other benefits that would have been available from the original pension scheme, is compared with that from the personal pension after allowing for any relevant differences in the individual's pension contributions. The shortfall in value is added to the personal pension as redress.

As the level of benefits and risks differ between pension arrangements the method of working out the value of benefits needs to allow for this. Under the Pensions Review, which reviewed sales of personal pensions between 29 April 1988 and 30 June 1994, and which is now virtually complete save for relatively few difficult cases, the following method and checks applied:

To ensure that benefits provided by the personal pensions were equivalent in value to those provided by the original pension scheme, the method of valuation was specified in regulatory provisions using actuarial methodology together with assumptions about future investment return, inflation and longevity.

These assumptions were based on independent actuarial advice, confirmed by the actuarial profession and regularly reviewed.

Where other assumptions were needed about the individual's particular situation, either standard amounts were specified in the regulator's provisions or sufficiently important assumptions were required to be disclosed to the individual so that he or she could question them and provide further information if available.

Firms were required to confirm that the redress complied with the regulatory provisions for each case and also to carry out audits of their review process and results.

In addition, firms were subject to supervisory checks by the regulators.

If a consumer was not content with the offer made and was unable to resolve his or her concerns with the firm, he or she had the right to complain to the relevant Ombudsman, the normal time scales for complaints having been waived.

General pensions complaints are dealt with by the Financial Ombudsman Service for solvent firms and by the Financial Services Compensation Scheme for firms that are unable to meet claims against them.

Aggregates Tax

Mr. Alan Reid: To ask the Chancellor of the Exchequer how much aggregates tax has been levied in total in Argyll and Bute constituency in each year since the tax was first levied. [185854]

John Healey: A breakdown of Aggregates Levy receipts is not available by individual parliamentary constituency.

Air Passenger Duty

Tom Cox: To ask the Chancellor of the Exchequer what the income has been in each of the last three years from the payment of air passenger duty; and if he will make a statement. [185343]

John Healey: The revenues from air passenger duty are published online in the HMC&E Air Passenger Duty Bulletin at www.uktradeinfo.com. In each of the last three calendar years these were:

	£ million
	Revenue
2001	834
2002	809
2003	778

Balance of Trade

Mr. Kenneth Clarke: To ask the Chancellor of the Exchequer what has been the level of the UK deficit in the balance of traded goods in each of the last seven years. [186211]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Kenneth Clarke, dated 22 July 2004:

As National Statistician, I have been asked to reply to your recent question on the United Kingdom's deficit on trade in goods. (186211)

The following table shows the latest estimates for the UK balance of trade in goods. The figures shown are consistent with the published Balance of Payment "Pink Book". The balance of trade in goods is the value of goods exported less the value of goods imported.

	Balance of trade in goods (£ million)
1997	-12,342
1998	-21,813
1999	-29,051
2000	-32,976
2001	-40,648
2002	-46,675
2003	-47,290

Business Investment

Mr. Kenneth Clarke: To ask the Chancellor of the Exchequer what has been the percentage change in the level of business investment in the United Kingdom in each of the last seven years. [186209]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Kenneth Clarke, dated 22 July 2004:

As National Statistician I have been asked to reply to your recent Parliamentary Question concerning the percentage change in the level of business investment in each of the last seven years. (186209)

The information requested is shown in the table below, consistent with the Business Investment First Release published on 1 July. The table uses the Chained volume measure series, which exclude the effects of price changes.

Annual percentage change in business investment (Chained volume measures)—UK, 1997–2003

Period	Business investment (annual percentage change)
1997	+10.1
1998	+18.1
1999	+2.8
2000	+4.6
2001	+1.9
2002	+0.6
2003	-0.9

Child Care Tax Credit

Mr. Willetts: To ask the Chancellor of the Exchequer how many childcare tax credit payments have been made in respect of children aged *(a)* under one, two, three and four years, *(b)* five, six, seven and eight years and *(c)* who are eight years old in the latest period for which figures are available. [185701]

Dawn Primarolo: The following table shows the number of families benefiting from the childcare element of Working Tax Credit at 5 April 2004, with an estimated analysis by the ages of the children for whom eligible childcare costs were incurred:

Ages of children for whom eligible childcare costs incurred, 5 April 2004

Age combination of children for whom eligible childcare costs incurred	Number of families benefiting from the childcare element of Working Tax Credit[1] (Thousand)
All aged under five	170
Aged under five, and five to eight	20
Other with aged under five	10
Aged five to eight only	50
Aged five to eight, and older	20
Aged over eight only	50
Total	320

[1] Those claiming the childcare element, and with Child Tax Credit above the family element. Rounded to the nearest 10,000.

Mr. Willetts: To ask the Chancellor of the Exchequer if he will estimate the total expenditure on the childcare tax credit in 2003–04; how many recipients there were of childcare tax credit in that year; what the average payment was; and in respect of how many children payments were made. [185709]

Dawn Primarolo: For the level of child care support provided through the child care element of working tax credit, I refer the hon. Member to my answer to the hon. Member for Mid Dorset and North Poole (Mrs. Brooke) on 27 April 2004, *Official Report*, column 866W.

The number of families benefiting from this element, and the average help with child care costs, appear in the various issues of "Child and Working Tax Credits. Quarterly Statistics", which can be found on the Inland Revenue website, at www.inlandrevenue.gov.uk/stats/personal-tax-credits/menu.htm.

It is estimated that these families incurred eligible child care costs for an average of 1.3 children.

Civil Service Recruitment

Mr. Jim Cunningham: To ask the Chancellor of the Exchequer based on the 2004 Spending Review, how many civil service jobs he estimates will be lost in the area of Coventry, South; from which Departments and agencies; and what assessment he has made of the likely effect on services to the public. [185279]

Mr. Boateng: There will be an overall gross reduction in posts of 84,150 by 2008 and Departments will pursue these reductions in line with business need. It is not yet possible to say where reductions will happen on a geographic or departmental basis as Departments are still developing these plans.

Mr. Hammond: To ask the Chancellor of the Exchequer what controls he is proposing to ensure that Civil Service job cuts as a result of his announcements in Budget 2004 and Spending Review 2004 are not replaced by consultants hired by departments but not on departmental payrolls. [186121]

Mr. Boateng: The civil service job cuts are being made because new technology enables us to reduce the number of personnel required to deliver services. The 2004 Spending Review also announced that every department is required to consider and agree with the Office of Government Commerce by December 2004 how to pursue improvements in the value for money of all procurement of external professional services.

Mr. Andrew Turner: To ask the Chancellor of the Exchequer pursuant to his announcement on 12 July, how many Civil Service posts he expects to be *(a)* abolished and *(b)* re-assigned to front line services in each Government Department and agency. [185367]

Mr. Boateng *[holding answer 20 July 2004]:* With the detailed plans Departments are publishing for the years to 2008, the Chancellor announced at the Spending Review a gross reduction in civil service posts of 84,150—of which 13,550 posts will be reassigned to frontline services to release resourced from administration to invest in the front line.

The Devolved Administrations in Scotland and Wales and the Northern Ireland Office have also announced that they are engaged in Spending Review efficiency and evaluation exercises as ambitious as those in England—with reductions also in back office and

related areas; and with the 2.5 per cent. annual efficiency savings applied to the settlement for local government in England, this allows for a reduction of a further 20,000.

Public Servants asked to change jobs will be offered support with retraining and we are ready to work with the work force and their unions to provide that help.

Mr. Andrew Turner: To ask the Chancellor of the Exchequer what definition he uses of frontline for the purposes of his announcement on 12 July about reductions in civil service staff; and which posts in each Department and agency fall within that definition. [185369]

Mr. Bonteng *[holding answer 20 July 2004]:* The 2004 Spending Review announced reductions of 84,150 posts by 2008. Of this, 13,550 posts will be redeployed to key frontline areas in HM Revenue and Customs, the Department for Transport or the Department for Work and Pensions. These redeployments from back office functions will enable increases in key frontline roles, for example personal advisors in Job Centre Plus.

Cotton Oil Imports

Mr. Lazarowicz: To ask the Chancellor of the Exchequer what the *(a)* value and *(b)* volume of cotton oil imports into the UK was in the last year for which records are available, broken down by country of origin. [186055]

John Healey: Provisional estimates for annual imports for 2003 were published by HM Customs and Excise in the Overseas Trade Statistics in February 2004. The final (revised) figures will be available from the HMCE www.uktradeinfo.com website in August 2004 (when final figures for 2003 are published). The value and volume of cotton oil imported into the UK in 2003, broken down by country of origin are:

Imports of cotton seed oil and its fractions, crude and refined general trade: 2003[1]

Country of dispatch/ origin[2]	*Statistical value (£1,000)*	*Netmass (tonnes)*
Imports from EU countries		
France	13.1	2.1
Netherlands	139.6	269.6
Germany	2.7	1.7
Italy	47.7	49.6
Total EU	203.1	322.9
Imports from non-EU countries		
Canada	5.9	2.7
China	8.1	6.3
USA	170.1	80.0
Total non-EU	184.0	89.1
All countries total	387.2	412.0

[1] Provisional figures, may be subject to revision.
[2] Country of origin for non-EU imports; country of dispatch for EU imports (country of origin not available for EU trade).
Source:
Overseas Trade Statistics, HM Customs and Excise

Crown Estate

Mr. Carmichael: To ask the Chancellor of the Exchequer how much the Crown Estate spent on *(a)* public relations and *(b)* corporate hospitality in the last financial year. [185970]

Ruth Kelly: The information for financial year 2003–04 is as follows:

(a) 267,452[1]

(b) 9,456.

[1] Public Relations expenditure is defined as the Communication Department's budget less staff costs and production of the Annual Report and Accounts.

Mr. Carmichael: To ask the Chancellor of the Exchequer what the cost was of producing the Crown Estate's 2004 annual report. [185972]

Ruth Kelly: The Crown Estate annual report and accounts 2004 has only recently been completed and distributed. Final costs have not yet been determined.

Departmental Agency Staff

Matthew Taylor: To ask the Chancellor of the Exchequer what the total amount paid by his Department to employment agencies for the supply of temporary staff was in financial year 2003–04. [178911]

Ruth Kelly: The total cost incurred by HM Treasury for the supply of temporary staff by employment agencies in the financial year 2003–04 was £1,386,000.

Departmental Vehicles

Mr. Kidney: To ask the Chancellor of the Exchequer how many road vehicles are operated by the Department and its agencies; how many personal injury accidents involving road vehicles operated by the Department have occurred within each of the last five years; and what the Department's policy is for managing work-related road safety. [185925]

Ruth Kelly: Total number of road vehicles operated by the Chancellor's Departments and agencies is 4,785.

The number of Personal Injury Accidents in each of the last five years was:

	Number
1999–2000	47
2000–01	44
2001–02	31
2002–03	31
2003–04	32

The Chancellor's Departments and agencies are committed to the delivery of their obligations under Health and Safety legislation with regard to driving on official business.

Economic Growth

Mr. Willetts: To ask the Chancellor of the Exchequer how much the British economy grew on average per annum *(a)* in total and *(b)* per capita in the period (i) 1993 to 1998 and (ii) 1998 to 2003. [178846]

Ruth Kelly: This information is set out in the following table.

Percentage

	Average GDP growth per annum		*Average GDP growth per capita per annum*	
	Real terms (chained-volumes)	*Nominal terms (current prices)*	*Real terms (chained-volumes)*	*Nominal terms (current prices)*
1997–2003	2.8	5.4	2.4	5.0
1992–97	2.7	5.6	2.4	5.3
1998–2003	2.7	5.2	2.3	4.9
1993–98	3.1	5.9	2.9	5.6

Source:
Treasury Economic Statistics (ONS)

Employment Tribunals

Malcolm Bruce: To ask the Chancellor of the Exchequer how many cases against his Department, and the agencies for which it is responsible have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent (A) settling and (B) contesting claims. [181468]

Ruth Kelly: The information requested is as follows:

Cases to ET	*Number of cases*	*Cost awards made against respondents (£000)*	*Cost awards made against applicants (£000)*
Equal Pay	1	-	-
Racial Discrimination	4	5,000	-
Sex Discrimination	2	500	-
Disability Discrimination	5	-	-
Unfair Dismissal	11	-	14,000
Total	23	5,500	14,000

(A) and (B) Settling and contesting claims

£000

	1998	*1999*	*2000*	*2001*	*2002*	*2003*	*2004*	*Total*
Settlement Cost	3,000	5,000	0	11,293	47,500	15,148	19,800	101,741
Contesting Claims	4,700	117,374	0	23,185	32,386	19,773	7,700	205,118
Total:	7,700	122,374	0	34,478	79,886	34,921	27,500	306,859

Note:
Settlement and contesting costs not available for one case in 2000 and 2001 and 2003

Endowment Mortgages (Compensation)

Mr. Spring: To ask the Chancellor of the Exchequer what plans he has to compensate people who bought endowment mortgages before the system of regulation covering the sale of these came into existence and who cannot pursue a claim through the normal regulatory channels; and if he will make a statement. [185966]

Ruth Kelly: The Government supports the Financial Services Authority's proposal to conduct further analysis to identify those people who were sold an endowment policy before 29 April 1988 that is forecast to shortfall. The Government also supports the efforts of the FSA and industry to explore the scope for voluntary action to help people in this situation. The Government have no plans to compensate people who bought endowment mortgages before 29 April 1988.

EU Financial Regulation

Mr. Stephen O'Brien: To ask the Chancellor of the Exchequer what estimate he has made of the *(a)* proportion and *(b)* cost of new financial sector regulation that derives from the EU. [186175]

Ruth Kelly: As stated by the Chancellor of the Exchequer in his Mansion House speech of 16 June 2004, three-quarters of financial services regulation is derived from the European Union. There is no estimate available of the total cost in the UK of financial sector regulation derived from the EU.

European Single Market

Mr. Foulkes: To ask the Chancellor of the Exchequer what assessment has been made of the effect on UK consumers of *(a)* competition and the *(b)* free flow of trade as a result of membership of the European single market; and if he will make a statement. [184522]

Mr. Mike O'Brien: I have been asked to reply.

The European Commission estimates that in the 10 years after 1992 the internal market created 2.5 million jobs in the EU and increased its GDP by €877 billion. This amounts to an average €5,700 of extra income per household (source: European Commission (2002) "The Internal Market—10 Years without Frontiers"). In addition to increased jobs and prosperity, the Commission report points to benefits to consumers from the increased choice, price competition, and product quality and innovation in the world's largest single market. For example, according to a Commission survey, 80 per cent. of EU citizens believed that the internal market has led to wider choice and 67 per cent. that it had led to improved quality.

Mr. Foulkes: To ask the Chancellor of the Exchequer what assessment he has made of the effects on the compliance and development costs to *(a)* British exporters and *(b)* British consumers of EU single market rules which allow products approved in one EU country to be sold across the EU. [184523]

Mr. Mike O'Brien: I have been asked to reply.

British exporters have benefited from reduced compliance and development costs, resulting from the removal of frontier controls and from rules that allow goods to be traded across the EU rather than complying with 25 different sets of national laws. The 1988 Cecchini Report ("The Cost Of non-Europe") estimated the cost saving to EU business of removal of internal

frontier controls alone in a Union then consisting of 12 members states at €8 billion. In its report, "The Internal Market—10 Years without Frontiers" (European Commission (2002)), the European Commission notes that before the frontiers came down, the tax system alone required 60 million customs clearance documents annually: these are no longer needed. The Commission's report notes how a strong, competitive internal market has helped firms become more productive and efficient and so enhanced their ability to compete in global markets. It sets out benefits to consumers from the greater prosperity, choice, price competition and product innovation that the world's largest internal market brings.

Government Offices (East Midlands)

Mr. Dorrell: To ask the Chancellor of the Exchequer how many full-time equivalent employees of Customs and Excise in the east midlands there were in each year since 1997. [185494]

John Healey: The figures are based on the number of staff in post at April 2001 each year. The regional distribution of permanent (including fixed term) staff in all Government Departments is published annually by the Cabinet Office in table D of Civil Service Statistics', a copy of which is available in the Library of the House. The number of HMC and E permanent staff based in the east midlands region for 1997–2002 are:

	Number
1997	1,104
1998	884
1999	863
2000	850
2001	770
2002	720

Figure for 2003 and 2004 are currently unavailable, however, the Cabinet Office are expected to publish figures for 2003 shortly.

Mr. Dorrell: To ask the Chancellor of the Exchequer what government offices have been identified for closure in the east midlands in the light of the Comprehensive Spending Review. [185497]

Mr. Boateng: There will be an overall gross reduction in posts of 84,150 by 2008 and Departments will pursue these reductions in line with business need. Departments continue to plan the implementation of their efficiency programmes.

Household Savings, Liabilities and Debt

Mr. Kenneth Clarke: To ask the Chancellor of the Exchequer (1) what the level of household savings expressed as a percentage of UK gross domestic product has been in each of the last seven years; [186213]

(2) what the level of *(a)* household liabilities and *(b)* household debt expressed as a percentage of UK gross domestic product has been in each of the last seven years. [186215]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Kenneth Clarke, dated 22 July 2004:

As National Statistician, I have been asked to reply to your two recent Parliamentary Questions on the level of household savings; the level of household liabilities and the level of household debt, each expressed as a percentage of UK gross domestic product in each of the last seven years. (186213 and 186215)

The information requested is shown in the table below. Household debt is measured as the total of household outstanding liabilities at the end of the period and hence only the latter is shown in the table.

The household series used for these data are for the combined household and non-profit institutions serving households (NPISH) sectors. The accounts for the household and NPISH sectors are currently combined: separate estimates are not available.

Household[1] savings and liabilities as a percentage of Gross Domestic Product (GDP) UK, 1997–2003

	Household[1] savings as a percentage of GDP	*Household[1] liabilities[2] as a percentage of GDP*
1997	6.8	73.0
1998	4.4	73.3
1999	3.7	75.4
2000	3.9	78.0
2001	5.0	82.4
2002	4.1	89.2
2003	4.2	95.7

[1] Estimates are for the combined household and non-profit institutions serving households (NPISH) sectors.
[2] Total outstanding liabilities at the end of each year.

Ministerial Visits

David Davis: To ask the Chancellor of the Exchequer (1) if he will list the travel costs incurred by *(a)* his Department and *(b)* each Minister within his Department, for each of the last 10 years; [175658]

(2) how many journeys were made by helicopter by each Minister in his Department in each of the last 10 years; and what the journey length was in each case. [175737]

Ruth Kelly: Since 1999 the Government have published annually a list of all visits overseas undertaken by Cabinet Ministers costing £500 or more during each financial year. The Government have also published each year since 1995–96 the total annual cost of all Ministers' visits overseas. Copies of the lists are available in the Libraries of the House. Information for 2003–04 will be published later today.

In respect of total travel costs for civil servants in the department I refer the r hon. Gentleman to the answer I gave to the Member for Twickenham (Dr. Cable) on 19 July 2004 (*Official Report*, column 43–6W) which gave the costs for the financial years 1997–98 to 2003–04. The total costs on the same basis for 1996–97 were £951,347. Information for earlier years is no longer held. It is not possible to give a breakdown of total travel costs by individual Ministers.

I refer the right hon. Gentleman to the answer given to the Member for West Chelmsford (Mr. Burns) on 27 February 2003 which stated that no flights by helicopter were made between 2001 and 27 February 2003. Information relating to other years is not held by the department.

All ministerial travel is undertaken in accordance with the rules set out in the Ministerial Code and Travel by Ministers, copies of which are available in the Libraries of the House.

MOD Administration Costs

Mr. Keith Simpson: To ask the Chancellor of the Exchequer for what reasons the Ministry of Defence does not have an administration costs limit. [181773]

Mr. Boateng: The Ministry of Defence was originally excluded from the administration cost control regime because it could have discouraged inter-changeability between Service and civilian personnel. The Ministry of Defence is not exempt from the administration costs efficiency target announced in the 2004 Budget. This target applies to all departments and MOD will be required to freeze the equivalent of its administration budget over the Spending Review years.

Oil Reserves

Mr. Chaytor: To ask the Chancellor of the Exchequer if he will list, for each of the last 10 years, *(a)* the total output and *(b)* the total Exchequer revenue from the UK's oil reserves; and what assessment he has made of (i) output and (ii) revenue in each of the next 10 years. [185249]

Ruth Kelly: Annual information on UK indigenous oil production to 2002 can be found at http://www.dti.gov.uk/energy/inform/energy_stats/oil/dukes3_1_1.xls and more recent monthly information at http://www.dti.gov.uk/energy/inform/energy_stats/oil/3_10oilproduction-ettab13.xls

The latest available DTI forecasts of UK oil production, from 2004 to 2009, can be found at http://www.og.dti.gov.uk/information/bb_updates/chapters/Section4_17.htm

And historic Inland Revenue financial year tax receipts jointly from North Sea oil and gas, together with published Budget 2004 projections for 2004–05, can be found at http://www.og.dti.gov.uk/information/bb_updates/appendices/Appendix8.htm

Table C9 on page 261 of Budget 2004 shows longer term projections of North Sea revenues as a percentage of GDP.

Tax Credits

Mr. Webb: To ask the Chancellor of the Exchequer pursuant to the answer of 10 December 2003, *Official Report*, columns 494–95W, on tax credits, if he will update the tables for each month for which figures are available. [185014]

Dawn Primarolo: The number of manual tax credits payments issued in each month between December 2003 and March 2004 is shown in the table. Manual giro payments are made particularly to deal with an immediate change in circumstances pending automatic payments being adjusted.

	[1]*Number of manual tax credit payments*	[2]*Number of automatic direct payments (million)*
December 2003	14,000	11.5
January 2004	16,000	10.5
February 2004	17,000	10.5
March 2004	22,000	12.5

Notes:
1. These figures cover all manual payments—that is, giro payments issued by local offices, or issued by other Inland Revenue offices but outside the main tax credits automatic payment mechanisms. They are rounded to the nearest 1,000. The previous figures covered only same-day payments issued by local offices.
2. The numbers of automatic direct payments are rounded to the nearest 0.5 million.

Personal Income Tax Allowance

Mr. Willetts: To ask the Chancellor of the Exchequer if he will estimate *(a)* the gross cost and *(b)* the cost net of savings in social security benefits of raising the personal income tax allowance to £10,000 per annum. [185705]

Dawn Primarolo: The cost of raising the personal income tax allowances to £10,000 per annum in 2004–05 is *(a)* £29.8 billion in gross costs and *(b)* £29.6 billion in costs net of savings of social security benefits. The figures exclude any estimate of behavioural response to the tax change.

The gross costs are based on the Survey of Personal Incomes 2001–02 and are consistent with the Budget 2004. The savings from social security benefits are from the DWP Policy Simulation Model, based upon the Family Resources Survey 2002–03 and consistent with the Budget 2004.

Population Register

Harry Cohen: To ask the Chancellor of the Exchequer if he will place in the Library formal privacy impact assessments relating to the population register which is being compiled by the Registrar General. [185953]

Ruth Kelly: The information requested falls within the responsibility of the General Registrar for England and Wales, who has been asked to reply.

Letter from Len Cook to Mr. Harry Cohen, dated 22 July 2004:

As Registrar General for England and Wales, I have been asked to reply to your recent Parliamentary Question concerning privacy impact assessments relating to the population register. (185953)

Work on the Citizen Information Project is being taken forward by the General Register Office (GRO), part of the Office for National Statistics (ONS). The Project is concerned with establishing the potential of a population register for providing cost savings and improvements to the delivery of public services. It is currently in the project definition stage. A detailed business case has still to be developed and no decision has been taken yet as to whether or not the population register should proceed to implementation.

ONS is considering, its plans for public consultation. We would anticipate that a privacy impact assessment would form part of any formal consultation process. Any consultation document would be placed in the Library of the House of Commons, in line with standard procedure.

Spending Review (Job Reductions)

Mr. Letwin: To ask the Chancellor of the Exchequer if he will list the estimated reductions in work force planned in *(a)* local government, *(b)* the Scottish Executive and *(c)* the Welsh Assembly. [184705]

Adam Price: To ask the Chancellor of the Exchequer (1) what the basis was for his estimate of 20,000 job reductions in the devolved Administration and in local government in England and Wales announced in the Comprehensive Spending Review; [184753]

(2) whether he *(a)* requested and *(b)* received estimates for the number of job reductions in the devolved Administrations and in local government announced in the Comprehensive Spending Review from (i) the National Assembly for Wales, (ii) the Scottish Executive, (iii) the Northern Ireland Executive and (iv) the Local Government Association. [184754]

Mr. Wiggin: To ask the Chancellor of the Exchequer (1) what methodology was used to calculate the reduction by 20,000 of jobs in devolved Governments; [184561]

(2) with which National Assembly for Wales Government members he agreed the civil service jobs reductions in Wales; [184562]

(3) how many Civil Service jobs will be lost in Wales as a result of his announcement in the 2004 Spending Review; [184563]

(4) what consultations there will be with the National Assembly for Wales before the civil service jobs reductions he has announced take place. [184564]

Mr. Boateng *[holding answer 16 July 2004]:* The devolved Administrations in Scotland and Wales and Northern Ireland Ministers have announced that they are engaged in Spending Review efficiency and evaluation exercises as ambitious as those in England—with reductions also in back office and related areas; and with the 2.5 per cent. annual efficiency savings to which local government in England is committed, this would allow for a reduction of 20,000 posts across local government and the devolved Administrations.

The devolved Administrations will be making their own announcements in the context of their spending plans in the autumn and the Office of the Deputy Prime Minister and other Government Departments will work in partnership with the Local Government Association to help local government drive forward the efficiency agenda.

Mr. Letwin: To ask the Chancellor of the Exchequer if he will list the amounts, by Department, which make up the total overlap of £5.650 million efficiencies across central and local government referred to in Table 2.1 of the 2004 Spending Review Report. [184707]

Mr. Boateng: The local government proposed savings of £6,450 million includes a forecast of £5,650 million of savings including, in procurement, productive time, and public finance and regulation, which are included in the proposed savings for Department for Education and Skills, Department for Transport, Department for Health, Home Office, Department for Work and Pensions, Department for Environment, Food and Rural Affairs, Department for Culture, Media and Sport, and the Office of the Deputy Prime Minister. I refer the hon. Member to chapter C of Sir Peter Gershon's report for further details of individual departmental efficiency programmes.

Sue Doughty: To ask the Chancellor of the Exchequer (1) how many civil service jobs will be lost in the Guildford constituency as a result of the cuts announced in the July Spending Review; [186045]

(2) which *(a)* Departments and *(b)* agencies will make job cuts in the Guildford constituency as a result of the July Spending Review; [186046]

(3) what services in the Guildford constituency will be affected by the job cuts announced in the July Spending Review. [186047]

Mr. Boateng: There will be an overall gross reduction in posts of 84,150 by 2008 and Departments will pursue these reductions in line with business need. Departments continue to plan the implementation of their efficiency programmes.

Stamp Duty

Mr. Willetts: To ask the Chancellor of the Exchequer (1) what has been the cost to the Exchequer of providing stamp duty relief to residential properties under the value of £150,000 in deprived areas in each month since November 2001; [185711]

(2) how many property transactions have taken place paying stamp duty at 0 per cent. for *(a)* residential properties in deprived areas and *(b)* non-residential properties in deprived areas in the Havant constituency in each month since November 2001; [185712]

(3) what the total number is of property transactions which have taken place at the zero rate of stamp duty in deprived areas since it was introduced; how many have taken place in those areas bearing stamp duty; and how many property transactions bearing stamp duty have taken place in the UK in the same period; [185713]

(4) how many property transactions have taken place paying stamp duty at 0 per cent. for *(a)* residential properties in deprived areas and *(b)* non-residential properties in deprived areas (i) in each month since November 2001 and (ii) in total. [185714]

Ruth Kelly: The cost to the Exchequer of stamp duty relief on residential properties in the qualifying disadvantaged areas is given in the following table for each month since November 2001. The number of residential transactions in qualifying disadvantaged areas which received the relief is also shown in the table together with the number of non residential transactions receiving the relief in these areas. The information has been given for Great Britain as information for Northern Ireland is not readily available on a monthly basis for the whole period.

Information is not reliable enough to be given at the parliamentary constituency level for every month since inception.

Information is only available since inception of the relief for numbers of transactions in disadvantaged areas which would otherwise pay stamp duty but do not do so because of the relief. Counts of transactions in qualifying

disadvantaged areas since inception are not available for transactions below the liability threshold or above the threshold at which the relief ceases to apply.

There were 3.0 million transactions between inception of the relief and June 2004 in the UK whose value was above the appropriate stamp duty threshold and which did not benefit from Disadvantaged Areas Relief.

	Number of residential transactions receiving Disadvantaged Area Relief in Great Britain (thousand)[1]	*Number of non residential transactions receiving Disadvantaged Area Relief in Great Britain (thousand)*[1]	*Cost to the Exchequer of providing Disadvantaged Area Relief in Great Britain (£ million)*[1]
2001			
November	0.7	<0.1	1
December	3.5	<0.1	3
2002			
January	3.0	<0.1	3
February	3.1	<0.1	3
March	4.4	<0.1	4
April	4.2	<0.1	4
May	5.8	<0.1	5
June	5.0	<0.1	5
July	5.7	<0.1	5
August	5.7	<0.1	5
September	5.2	<0.1	5
October	5.5	<0.1	5
November	6.4	<0.1	6
December	5.8	<0.1	5
2003			
January	4.7	<0.1	4
February	5.0	0.1	5
March	5.8	0.2	5
April	6.2	0.4	6
May	7.0	0.6	7
June	7.4	0.7	7
July	7.6	0.6	7
August	7.9	0.6	7
September	6.2	0.6	6
October	5.2	0.6	5
November	4.8	0.6	5
December[2]	2.5	0.1	2
2004			
January[2]	8.0	0.6	7
February[2]	8.2	0.5	7
March[2]	8.5	0.5	7
April[2]	9.8	0.8	9
May[2]	10.3	0.7	9
June[2]	11.7	0.7	10

[1] Counts to the end of November 2003 are based on the date of completion of the transaction. Counts from 1 December 2003 are based on the date the transaction was received at the office set up for processing the transactions.

[2] Because of the change to the new data collection and processing system as a result of the introduction of Stamp Duty Land Tax, care should be taken in interpreting monthly movements since December.

Employment (Tamworth)

Mr. Jenkins: To ask the Chancellor of the Exchequer how many people over 65 years have been in work in Tamworth constituency in each year since 1997. [185834]

Ruth Kelly: The information requested falls within the responsibility of the National Statistician, who has been asked to reply.

Letter from Len Cook to Mr. Brian Jenkins, dated 22 July 2004:

As National Statistician, I have been asked to reply to your recent Parliamentary Question asking how many people over 65 years have been in work in Tamworth constituency in each year since 1997. (185834)

The Office for National Statistics' Labour Force Survey sample size is too small to give reliable estimates of the number of people aged 65 and over in employment in the Tamworth Parliamentary Constituency in each year since 1997.

Tax Credits (Overpayments and Underpayments)

Mr. Webb: To ask the Chancellor of the Exchequer what the *(a)* total and *(b)* average (i) number and (ii) value of additional payments made in 2003–04 was to ensure that paying back tax credits overpayments did not cause hardship to families. [185064]

Dawn Primarolo: As at 5 April 2004, there were six million families benefiting from tax credits. The Code of Practice sets out the circumstances in which additional payments may be made (for example as a result of their reporting changes in circumstance such as a rise in income). In 2003–04, in line with the code, around 65,000 such payments were made to tax credit recipients whose 2003–04 tax credit award had been reduced. The total value of those additional payments was around £20 million.

Trainee Inspector of Taxes Programme

Mr. Prisk: To ask the Chancellor of the Exchequer what the target number of *(a)* full-time and *(b)* part-time recruits is for the Inland Revenue's Trainee Inspector of Taxes Programme for July 2004. [185930]

Dawn Primarolo: There are currently 234 vacancies for tax inspectors throughout the UK. The vacancies are not advertised in terms of part time or full time. Candidates may apply to work part time if they wish.

Wind Power (Tax Avoidance)

Mr. Andrew Turner: To ask the Chancellor of the Exchequer what assessment has been made of the scope for tax avoidance in the trading of renewable obligations certificates by wind power companies registered in the UK but whose beneficial ownership is offshore. [185738]

John Healey: Tax rules for wind farms are no different to those applying to other kinds of UK registered business. The Government keep all taxes under review and any changes will be announced as part of the normal Budget process.

LEADER OF THE HOUSE

Sub Judice Resolution

Ms Keeble: To ask the Leader of the House if he will bring forward proposals to amend the House's sub judice Resolution to allow reference to matters before coroners' courts. [185946]

Mr. Hain: I have no plans to do so, though I am willing to consider suggestions for change on this, as on other matters.

CABINET OFFICE

Constable of Lancaster Castle

Mr. Hoyle: To ask the Minister for the Cabinet Office who was consulted on the most recent appointment of the Constable of Lancaster Castle. [186197]

Mr. Alexander: I refer my hon. Friend to the answer I gave him on 6 July 2004, *Official Report*, column 641W.

Access to Government Services

Virginia Bottomley: To ask the Minister for the Cabinet Office when he will next publish a report on the achievements and progress towards targets on accessibility of government services to disabled people. [177220]

Maria Eagle: I have been asked to reply.

Progress against the Public Service Agreement target relating to electronic service delivery by government departments is reported in the UK online annual report and quarterly updates are posted on the e-Government Unit website. The annual report for 2003 stated that two-thirds of all central government services are now available electronically and departments continue to make progress towards getting all services online by 2005. The quarterly update for Quarter 4 2003 shows that departments had e-enabled 71 per cent. of services to citizens and businesses.

Provision of online Government information for disabled people and unpaid carers has been greatly improved with the launch of Directgov in April 2004. The site meets World Wide Web Consortium (W3C) Web Accessibility Initiative (WAI) level A standard. Directgov presents information in a clear and structured way covering a range of areas such as rights, employment, independent living and health. The site offers links through to existing services—such as claiming carer's allowance online. As more government services become available, Directgov will expand to include them.

Civil Service Contracts

Mr. Jim Cunningham: To ask the Minister for the Cabinet Office what percentage of civil servants are employed on a fixed contract basis. [184576]

Mr. Alexander *[holding answer 20 July 2004]:* The percentage of civil servants employed on a fixed term contract was 1.2 per cent., on 1 October 2003. That figure is based on those departments that supply appointment status data centrally and covers approximately three quarters of all civil servants.

More detailed information on the Civil Service is published annually in Civil Service Statistics, copies of which are available in the Library.

Civil Service Recruitment

Mr. Tynan: To ask the Minister for the Cabinet Office what reduction in *(a)* the Senior Civil Service and *(b)* Senior Civil Service recruitment is planned as part of concentrating civil service resources in the frontline. [185663]

Mr. Alexander: Departments are currently in the process of drawing up detailed plans to implement the Spending Review 2004. It is for individual Departments to determine, as part of their plans, the staffing requirements at senior level that match their business priorities.

Mr. Tynan: To ask the Minister for the Cabinet Office how many Civil Service Fast Streamers *(a)* are in post and *(b)* will be recruited this year. [185664]

Mr. Alexander: The Cabinet Office collects figures from Departments on numbers of Fast Streamers 'In post' as at 1 April each year. The latest figures for which information is available (1 April 2003) showed 1,164 Fast Streamers recorded as being 'In Post' in the Fast Stream entry grade.

The recruitment competitions for Fast Streamers for the current year are yet to finish, to date, 418 candidates have been recommended for appointment and it is anticipated that the final number will be around 450.

Mr. Tynan: To ask the Minister for the Cabinet Office what reduction in *(a)* Fast Stream posts and *(b)* Fast Stream recruitment is planned as a part of concentrating civil service resources in the frontline. [185665]

Mr. Alexander: Individual Government Departments are responsible for deciding the number of Fast Stream posts they require, and my Department recruits centrally to meet their current and anticipated business needs. The civil service will continue to need the new skills and attributes that high calibre graduates can bring to it, and we are still working to ensure that we recruit entrants to meet the new challenges.

Departmental Vehicles

Mr. Kidney: To ask the Minister for the Cabinet Office how many road vehicles are operated by the Cabinet Office; how many personal injury accidents involving road vehicles operated by the Department have occurred within each of the last five years; and what the Department's policy is for managing work-related road safety. [185911]

Mr. Alexander: The Government Car and Despatch Agency (GCDA) provide all road vehicles for the Cabinet Office.

The responsibility for the provision of ministerial cars and drivers has been delegated under the terms of the Framework Document to the Government Car and Despatch Agency. I have asked its Chief Executive Mr. Nick Matheson to write to the hon. Member regarding the GCDA fleet. Copies of his letter will be placed in the Library.

European Legislation

Mr. Connarty: To ask the Minister for the Cabinet Office what the evidential basis was for the statement in the Cabinet Office Synthesis Report of October 2002, Improving the Way the UK handles European Legislation, page 2, that around 50 per cent. of significant legislation enacted in the UK originates from the European Union. [184992]

Mr. Alexander: The evidential base for this statement was an analysis of Regulatory Impact Assessments (RIAs), which showed that about half of all measures that imposed non-negligible costs on business, charities and the voluntary sector originated from the European Union.

Government Annual Reports

Mr. Cameron: To ask the Minister for the Cabinet Office what the total cost has been of the publication of Government annual reports, in each year since 1997. [185273]

Mr. Boateng *[holding answer 20 July 2004]*: Government annual reports were published for the years 1997–98 to 1999–2000. I refer the hon. Member to the answer given by the Prime Minister to the hon. Member for Yeovil (Mr. Laws) on 18 July 2001, *Official Report*, column 206W.

Sir Richard Dearlove

Andrew Mackinlay: To ask the Minister for the Cabinet Office if the Central Office of Information will issue a photo image of Sir Richard Dearlove upon his retirement from MI6. [184666]

Mr. Straw: I have been asked to reply. No.

CULTURE, MEDIA AND SPORT

Archaeology

Mrs. Anne Campbell: To ask the Secretary of State for Culture, Media and Sport what plans the Government has to *(a)* extend planning policy guidance to require developers to publish and store archaeological finds and archives and *(b)* give the public access to archaeological finds and archives through outreach programmes; and if she will make a statement. [185770]

Estelle Morris: Planning policy guidance is co-ordinated by the Office of the Deputy Prime Minister (ODPM). The ODPM recently published a list of those planning policy guidance notes it would treat as priority, and this did not include PPG 16 (Planning and Archaeology). The review of PPG 16 will therefore take place as and when is necessary in the light of its policy and strategic significance. In the interim, the current PPG will remain in place.

Children's Sport

Ms Keeble: To ask the Secretary of State for Culture, Media and Sport (1) what support her Department is providing for children's sporting activities in Northampton; [185789]

(2) what support her Department has provided in 2003–04 for children's sport in the East Midlands. [185790]

Mr. Caborn: The Government are investing more than £1 billion to transform physical education (PE), school sport, and club links. The funding will help deliver an ambitious Public Service Agreement target, shared with the Department for Education and Skills, to increase the percentage of 5–16 year olds who spend a minimum of two hours each week on high quality PE and school sport within and beyond the curriculum to 75 per cent. by 2006.

Spearheading delivery are School Sport Partnerships, which provide for groups of schools to work together to increase sports opportunities for all young people. Each partnership receives formula funding of up to £270,000 per annum. Information regarding School Sport Partnerships going live in the East Midlands and Northampton is as follows:

	East Midlands	*Of which: in Northampton*
April 2003	12	2
September 2003	4	1
September 2004	15	3

All maintained schools in the East Midlands will be in a partnership from September 2006.

The East Midlands region is receiving nearly £40 million through the Big Lottery Fund's New Opportunities in PE and Sport programme, over £5 million of which is going to Northamptonshire. This funding will help improve sports facilities on school sites.

Children and young people in the East Midlands are also benefiting from national initiatives such as the Community Club Development Fund (promoting Club Development with an emphasis on participation by young people), Sporting Playgrounds (improving primary school playgrounds in 27 local education authorities including Nottingham), and Positive Activities for Young People (aimed at 8–19 year olds at risk of social exclusion).

Departmental Expenditure

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport how much has been spent by her Department on *(a)* advertising and *(b)* public relations consultants in (i) 1996–97 and (ii) the latest year for which figures are available. [186006]

Estelle Morris: There has been no spend on advertising or public relations consultants in this period.

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport how much her Department spent on press officers, broken down by grade, in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [186015]

Mr. Caborn: Spending by the Department on press officers, broken down by grade, for the latest year available, 2003–04, was as follows:

Grade	*£*
A	66,124
A/TP	56,325
B	315,021

Information requested for earlier years could be provided only at disproportionate cost.

Miss Kirkbride: To ask the Secretary of State for Culture, Media and Sport how much her Department spent on *(a)* head-hunters and recruitment consultants and *(b)* management consultants in 1996–97. [186061]

Mr. Caborn: The departmental expenditure on management consultants in 1996–97 was £65,747.99. An analysis of expenditure on head-hunters and recruitment consultants is not recorded on the Department's accounting system and can be obtained only at disproportionate costs.

Departmental Staff (Upper Age Limits)

Mr. Andrew Turner: To ask the Secretary of State for Culture, Media and Sport whether *(a)* her Department and *(b)* agencies for which it is responsible (i) have a set retirement age which applies to all or most personnel and (ii) have a maximum age beyond which applications for employment will not be considered; and what the age is in each case. [186090]

Mr. Caborn: In the Department for Culture Media and Sport the minimum retirement age for all staff is 60. The maximum retirement age for permanent staff outside the senior civil service is age 65. Age retirement for the senior civil service is currently age 60 but heads of departments have the flexibility to retain staff beyond age 60 if they judge it to be in the public interest. Applications for employment will be considered up to the maximum retirement age.

In the Royal Parks, the normal retirement age is 60. The Royal Parks do not stipulate a maximum age in their recruitment material and will consider applicants beyond the normal retirement age on an exceptional basis depending on the needs of the organisation.

Departmental Staffing

Mr. Bacon: To ask the Secretary of State for Culture, Media and Sport how many people were employed in the Department *(a)* in 1997 and *(b)* at the latest date for which information is available, broken down by job title; if she will list the job functions performed by those holding each job title; and for how many people the primary function was (i) human resource or personnel functions, (ii) finance and accounting functions, (iii) information technology functions and (iv) other support, back office or administrative functions (A) in 1997 and (B) at the latest date for which information is available. [183458]

Mr. Caborn *[holding answer 14 July 2004]*: There were 338 full time equivalent staff in 1997 and 482 FTEs in 2004 in this department. A breakdown by job title and functionality is not available.

Departmental Vehicles

Mr. Kidney: To ask the Secretary of State for Culture, Media and Sport how many road vehicles are operated by the Department and its agencies; how many personal injury accidents involving road vehicles operated by the Department have occurred within each of the last five years; and what the Department's policy is for managing work-related road safety. [185913]

Estelle Morris: DCMS does not operate any road vehicles. The Royal Parks operates a total of 42 road vehicles in managing and policing the eight Royal Parks: 22 cars are available for use by horticultural and office staff for operational purposes; 15 cars and vans, four motor cycles and one horse box are employed on the policing side.

No personal injury accidents involving road vehicles operated by the Agency have been reported within the last five years.

The Royal Parks policy on managing work-related road safety is encompassed within its overall Health and Safety policy, as required by the Health and Safety at Work Act 1974. This commits the Agency to safeguarding the health, safety and welfare of its staff, and others affected by its activities; when a risk associated with work related road safety is identified by risk assessment it is dealt with accordingly.

Marine Protection

Richard Younger-Ross: To ask the Secretary of State for Culture, Media and Sport what assessment she has made of the impact of the creation of marine parks on tourism in England. [186282]

Mr. Caborn: The Department has made no assessment of the impact specifically of marine parks on tourism in England. There are tremendous opportunities for water-based tourism in England. In 2002, the last year that full figures are available, UK residents took 26 million holiday trips to the seaside and 19 million visits to UK wildlife attractions and zoos. The Deep attraction in Hull received 750,000 visitors in its first year, and the National Marine Aquarium in Plymouth received around 380,000 visitors in 2002. Marine attractions are promoted in VisitBritain's current "Waterside England" campaign, which promotes water-based attractions and activities.

National Lottery

Andy Burnham: To ask the Secretary of State for Culture, Media and Sport how much has been awarded from the National Lottery to *(a)* rugby union and *(b)* rugby league in each year since 1994. [185488]

Estelle Morris: The table shows details of lottery grants awarded in England to support rugby union and rugby league since lottery funding streams began in 1995. The programmes referred to are Sport England's community and world class programmes and Awards for All, the joint lottery distributors programme.

£

	Rugby union lottery awards			Rugby league lottery awards		
	Community	World class	Awards for All	Community	World class	Awards for All
1995–96	4,396,212	0	0	226,201	0	0

Total	33,017,779	11,649,576	2,215,196	13,095,771	5,027,347	1,363,882

Tourism

Mr. Moss: To ask the Secretary of State for Culture, Media and Sport by how much the Government aims to increase participation in accommodation grading schemes by 2006. [186035]

Mr. Caborn: The improvement of the quality of tourism products is one of the five key priority areas agreed between the DCMS and the tourism industry. These are set out in the Tomorrow's Tourism Today document, which was launched by my right hon. Friend the Secretary of State at the Tourism Alliance's Plenary Session on 19 July.

After detailed consultation, DCMS and its key partner organisations have agreed to aim to significantly increase the rate of participation in grading schemes in England from the present 43 per cent. of accommodation. Work towards this, and in respect of the other programmes outlined in Tomorrow's Tourism Today, will be guided and monitored by the Tourism Review and Implementation Group, which my right hon. Friend the Secretary of State also announced on 19 July. The Group will be informed by the recent Alan Britten report on common accommodation quality standards across Britain, which recommended that at least 75 per cent. of known accommodation stock should be included in the schemes by 2008.

Laura Moffatt: To ask the Secretary of State for Culture, Media and Sport what plans she has to encourage people living in towns to visit the countryside. [185751]

Mr. Caborn: In autumn last year, VisitBritain launched its 'Outdoor England' campaign which encouraged people to visit England's varied countryside. VisitBritain recently launched its 'Waterside England' campaign, which promotes England's coastline as well as its many inland waterways. The countryside will continue to feature strongly in VisitBritain's future campaigns. Further information can be found on the website www.visitengland.com.

EDUCATION AND SKILLS

Children's Commissioner

Annabelle Ewing: To ask the Secretary of State for Education and Skills whether the proposed children's commissioner will have powers which extend to Scotland. [185274]

Margaret Hodge *[holding answer 20 July 2004]:* Under the Government's proposals, the Children's Commissioner will have powers in relation to non-devolved matters in Scotland and across the UK. We do not intend that the proposed Commissioner should have any role in devolved matters in Scotland. However we do intend that the Commissioner should carry out his or her general functions in relation to non-devolved matters across the UK—promoting awareness of the views and interests of children, and looking into and reporting on the matters which affect and concern them—as well as his or her inquiry functions.

Dentistry

Mr. Burstow: To ask the Secretary of State for Education and Skills for what reason the recent funding uplift for England's dental schools does not cover the backdating of extra programmed activity. [181644]

Ms Rosie Winterton: I have been asked to reply.

Funding for the 2003–04 contractual changes for medical and dental clinical academics was agreed jointly between the Department of Health, the Department for Education and Skills and the Universities and Colleges Employers Association. The universities are now allocating the additional funds by reference to job plans prepared by individual consultants.

Recruitment Consultants

Mr. Hoban: To ask the Secretary of State for Education and Skills how much the Department spent on recruitment consultants in each year since 1996–97. [184359]

Mr. Charles Clarke *[holding answer 15 July 2004]:* The Department was established in June 2001. Information is available for the financial years of 2002–2003 and 2003–2004. In 2002–2003 the cost of recruitment consultants used to fill Departmental posts was £584,976. In 2003–2004 the cost was £335,321.

Disabled People (Services)

Mr. Goodman: To ask the Secretary of State for Education and Skills what arrangements he has in place for monitoring statistics concerning the supply of services by his Department to disabled people; and if he will make a statement. [183255]

Mr. Charles Clarke *[holding answer 12 July2004]:* The Government is committed to improving the position of disabled people in society and believes that

public bodies should take the lead in promoting equal opportunities. That is why my Department has in place arrangements for monitoring the position, either directly or through delivery partners.

As part of the performance management arrangements on children's social services departments, we collect and monitor information on the number of disabled children receiving services which support them either in their families or to live independently. We also monitor statistics collected via the Department of Health, of the number of parents of disabled children and 16–17 year old disabled young people, who receive direct payments from Local Authorities.

The numbers of pupils with SEN are collected through the Pupil Level Annual Schools Census (PLASC). All maintained and non-maintained schools are asked to record pupils with statements of SEN, pupils at School Action and those at School Action Plus, using 11 categories of need.

Connexions Partnerships record the number of young people in their area who have been identified as having learning difficulties and disabilities, and their participation in education, employment and training. Statistics are also maintained on the number of young people with learning difficulties and disabilities in their last year of compulsory education who have received an assessment that meets the requirements of S140 of the Learning and Skills Act.

For Learning and Skills Council (LSC) funded post-16 learning, detailed information is collected by the LSC about each learner, the learning they are undertaking and qualifications success.

Information on HE students who are disabled is collected annually from all HE institutions in the UK by the Higher Education Statistics Agency (HESA)

Educational Attainment

Mr. Hoban: To ask the Secretary of State for Education and Skills what information he collates on levels of attainment at each of the Key Stages and GCSE/GNVQ by socio-economic class. [185806]

Mr. Miliband: The following table shows a time series of estimates from the Youth Cohort Study (YCS) of the proportion attaining five or more GCSEs at grades A*-C or equivalent by year 11 by Socio-Economic Group. Similar information is not available at earlier Key Stages from the YCS. Attainment data up to Key Stage 4 for pupils from English maintained schools is, however, available using Free School Meals as a proxy for Socio-Economic Class for 2002 and 2003. For this data see tables 9–12 and 25–28 of DfES Statistical First Release 04/2004 available at http://www.dfes.gov.uk/rsgatewav/DB/SFR/s000448/index.shtml.

Attainment of five or more GCSE grades A-C in Year 11 by parental occupation: 1988–2001 England and Wales, maintained and independent schools*

	1988	1990	1991	1993	1995	1997[1]	1999	2001

Youth Cohort Study cohorts 4–11, sweep 1.

Emmanuel Foundation

Adam Price: To ask the Secretary of State for Education and Skills how much state support has been awarded to the Emmanuel Foundation; and what projects of the Foundation *(a)* have received financial backing from the Department and *(b)* the Government are committed to funding. [184963]

Mr. Miliband: No funds are paid to the Emmanuel Schools Foundation direct in the case of the Academies programme. Capital and recurrent funding is paid to the governing body of each school. Capital funding of £21,604,359 has been awarded to King's Academy, £23,645,530 to Trinity Academy and £8,512,945 to Emmanuel College, giving a total of £53,762,834. In addition we pay recurrent funding to each school which is

comparable to funding for other maintained schools. For 2004–05 the amount of recurrent funding for Emmanuel College is £5,472,000 and for King's Academy is £5,032,367. Apart from, as yet, undetermined recurrent costs for Trinity Academy, when it opens in 2005, we have no other funding commitments at this time.

Entrepreneurship Courses

Mr. Wiggin: To ask the Secretary of State for Education and Skills what further and higher education courses are available which assist young people who plan to start their own businesses. [185199]

Mr. Miliband: There are a considerable number and variety of courses available to students in both higher and further education which aid those with aspirations to start their own business. In fact there are 5,210 courses nationwide currently advertised by the University and Colleges Admissions Service (UCAS) which relate to Business.

Government are very committed to ensuring that all students and graduates who aspire to self employment receive the support and advice they need. To demonstrate this we have several new initiatives; for example:

- DfES and Higher Education Academy undertaking work this year to embed entrepreneurship skills into the curriculum
- Science Enterprise Centres (SECs)
- National Council for Graduate Entrepreneurs
- Enterprise Insight

GCSEs

Mr. Willis: To ask the Secretary of State for Education and Skills how many and what percentage of students gained *(a)* five or more and *(b)* no GCSEs at A* to C in (i) grammar schools, (ii) foundation schools, (iii) voluntary aided schools, (iv) voluntary controlled schools, (v) community schools, (vi) special schools and (vii) pupil referral units in (A) 2002 and (B) 2003. [185088]

Mr. Miliband *[holding answer 20 July 2004]:* The information requested is as follows:

		Number of 15 year old pupils achieving 5+ A-C*	*Percentage of 15 year old pupils achieving 5+ A*-C*	*Number of 15 year old pupils achieving no GCSEs at A*-C*	*Percentage of 15 year old pupils achieving no GCSEs at A*-C*

Voluntary Controlled	9,958	49.2
Community	131,554	35.8
Special	17	0.2
Pupil referral units	17	0.4

Literacy and Numeracy

Mr. Wiggin: To ask the Secretary of State for Education and Skills what research his Department has commissioned on the numbers of children leaving primary school who have inadequate literacy and numeracy skills. [185201]

Mr. Miliband: The annual data received from the Key Stage 2 results enables the Department to identify the proportion of children who have not reached the expected level for their age. In 2003, 75 per cent. of 11-year-olds achieved a Level 4 in English and 73 per cent. achieved a Level 4 in mathematics. The national pupil database enables a detailed understanding of the progress of these pupils to Key Stage 3 and beyond.

The Primary Strategy supports the drive to raise standards in literacy and numeracy by providing specific programmes to improve the quality of teaching and learning in primary schools so that every child can make the maximum possible progress. Through this we now have the best ever literacy and numeracy results at ages 7 and 11. Our long term aim, set out in the five year Strategy for Children and Learners published on 8 July 2004, is to maintain world class standards and to achieve both excellence and equity for all primary age children by raising standards for those from our most disadvantaged groups.

Selection by Aptitude

Miss Kirkbride: To ask the Secretary of State for Education and Skills how many children in *(a)* Bromsgrove, *(b)* Wyre Forest, *(c)* Redditch, *(d)* Worcester and *(e)* Worcestershire failed to get into the school of their first choice in each year since 1997; and how many of those subsequently appealed in each of those years. [184711]

Mr. Miliband: Information on the number of pupils admitted to their first choice school is not collected centrally.

Admission appeal data are not available at parliamentary constituency level. A table giving admission appeal information for all local education authority areas has been placed in the House of Commons Libraries. (I refer the hon. Member to the answer I have given to my hon. Friend the Member for Bury, North (Mr. Chaytor), on 23 June 2004, *Official Report*, column 1430W). Final figures from 1997/98 to 2001/02 have been provided. Further details on the latest 2002/03 (provisional) figures on admission appeals by local education authority can be found on http://www.dfes.gov.uk/rsgateway/DB/SFR/s000470/index.shtml.

School Admissions

Mr. Chaytor: To ask the Secretary of State for Education and Skills if he will list, for each of the last five years, the total *(a)* number and *(b)* percentage of non-specialist schools that have declared themselves to have a specialism in which the option to select 10 per cent. of pupils by aptitude has been exercised. [185248]

Mr. Miliband: The Department does not collect this data. Schools do not identify themselves as schools selecting by aptitude in their annual returns to the Department. The admission authority for any school which can identify itself as having a specialism may introduce 10 per cent. selection by aptitude as part of its published admission arrangements. Such arrangements are subject to local consultation, and any objections may be referred to the Schools Adjudicator.

Schools are not required to identify themselves as having selection by aptitude as part of their annual returns to the Department, and so we do not have an exact figure for the number of schools taking advantage of this provision. However, based on research carried out in 2001 by Anne West of the LSE, we estimate that just under 6 per cent. of schools in the specialist schools programme select any pupils on the basis of aptitude for the specialism, and that overall around 2 per cent. of all secondary schools do.

Mr. Chaytor: To ask the Secretary of State for Education and Skills what assessment he has made of the change in costs to local education authorities and individual admission authorities arising from the administration of 11-plus tests as a result of the implementation of the workforce agreement. [185250]

Mr. Miliband: I refer to the Written Statement I laid before the House on Tuesday 13 July on school funding for 2005–06 (column 55WS refers). The Written Statement to the House sets out how we have considered, with our partner signatories—including the local government employer organisation, the costs of implementation of the National Agreement. It announces what funds will be available to schools to implement the Agreement in 2005–06.

We believe that the minimum guarantee set out will cover the cost pressures associated with workforce reform and implementation of the contractual changes. We will of course continue to monitor implementation on the ground. One of the areas that we have promised to return to with our partners in the autumn will be to look at the support involved in the transfer of exam invigilation work from teachers in secondary schools. We will also look at any issues around administration of the 11-plus examination also at that time.

School Design

Mr. Chaytor: To ask the Secretary of State for Education and Skills what assessment he has made of the implications for carbon dioxide emissions of the Building Schools for the Future exemplar designs; what guidance he intends to issue in respect of the use of best practice in energy efficiency; and if he will make a statement. [185252]

Mr. Miliband: All new schools including those built under the Building Schools for the Future initiative must comply with Part L2 "Conservation of Fuel and Power" of the Building Regulations as revised in 2002. Approved Document L2 in support of the Building Regulations quotes Building Bulletin 87 (BB87) "Guidelines for Environmental Design In schools" as the relevant compliance document for schools. The current May 2003 edition is available for download from the DfES website www.teachernet.gov.uk/energy. The maximum annual energy consumption target allowed under BB87 is 5 kg of carbon per square metre of floor area for all new school buildings. BB87 also

gives guidance on energy efficient design of new buildings. For best practice guidance on energy efficiency for both new and existing schools see the DfES energy portal www.teachernet.gov.uk/sdenergy.

Secondary Schools (Pupil Numbers)

Mr. Cousins: To ask the Secretary of State for Education and Skills if he will estimate the future numbers of pupils of secondary school age in *(a)* 2004, *(b)* 2005, *(c)* 2006 and *(d)* 2007 in (i) Newcastle, (ii) North Tyneside and (iii) Northumberland; and what the figures were for 2003. [185575]

Mr. Miliband: The number of pupils of secondary school age in 2003, including pupils over compulsory school age, and provisional estimates for 2004 are as follows:

At January	*2003*[1]	*2004*[2]
Newcastle	20,317.5	20,143.5
North Tyneside	13,897.5	13,866.5
Northumberland	23,780.5	23,850.0

[1] actual
[2] provisional
Note:
Full-time equivalents, counting each part-time pupil as 0.5

Projections[1] are only available for England as a whole:

At January	*Pupils of secondary age in all schools (000)*
2003[2]	3,656
2004[3]	3,662
2005[4]	3,686
2006[4]	3,684

[1] full-time equivalents, counting each part-time pupil as 0.5
[2] actual
[3] provisional
[4] projected

Travel Costs

Dr. Cable: To ask the Secretary of State for Education and Skills what the travel costs were of civil servants in *(a)* his Department, *(b)* its predecessor Department and *(c)* its related agencies in each year since 1997. [183896]

Mr. Charles Clarke: The detailed information requested is not held centrally and can only be obtained at disproportionate cost.

All travel is conducted in accordance with the requirements of the Civil Service Management Code.

TRADE AND INDUSTRY

Exports to Turkey

Tom Cox: To ask the Secretary of State for Trade and Industry what British goods have been exported to Turkey in each of the last three years. [185337]

Mr. Mike O'Brien: The value of exports from the UK to Turkey, as published by HM Customs and Excise, were as follows:

UK Exports of goods to Turkey

£000

SITC	*Description*	*2001*	*2002*	*2003*

Post Office Card Accounts

Ian Lucas: To ask the Secretary of State for Trade and Industry what plans she has to make it easier to open a Post Office Card Account. [184888]

Mr. Timms: The design and management of the Post Office card account is an operational matter for the Post Office. I understand from the company that the application process is as simple as possible within the legal and regulatory requirements for the banking industry. I also understand that the account opening process is no more onerous than that for a bank account with a financial institution. We have not seen any real evidence that the process for opening a Post Office card account is difficult. Already, over 2.8 million card accounts have been opened.

While there has been no problem with the opening of the account, the Government have identified a problem that too many customers were failing to pass on their Post Office card account details to DWP or the Inland Revenue, so making it impossible for those Departments to pay money into the new account. Having identified the problem, solutions are being put in place, including the creation of a pre-populated bank account details form (with the account number, sort code and mandate for the spending Department to credit the account) which will be given to customers at their local post office when they collect their card. By signing the forms there and then customers can start receiving benefits into their card account much quicker.

Mr. Peter Duncan: To ask the Secretary of State for Trade and Industry (1) how many applications for Post Office card accounts have been completed and returned, but not yet processed and approved; [186255]

(2) how many applications for Post Office card accounts have been rejected owing to errors on the application form. [186256]

Mr. Timms: The operation and management of the Post Office card account is a matter for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Biomass Energy Industry

Nick Harvey: To ask the Secretary of State for Trade and Industry what specific fuel will be used by the biomass energy industry to produce electricity or heat for domestic consumption. [185843]

Mr. Timms: The biomass industry will use a range of fuels for production of energy—including all of those eligible for the Renewables Obligation such as straw, willow, miscanthus and forestry residues.

Nick Harvey: To ask the Secretary of State for Trade and Industry what the expected percentage of renewable energy to be derived from wood biomass is in *(a)* 2010, *(b)* 2015 and *(c)* 2020. [185844]

Mr. Timms: The Government have set a target that 10 per cent. of electricity supply in the UK will come from renewables by 2010 and an aspiration to double this by 2020. The Government does not set targets for contributions from individual renewable resources.

However the Renewables Innovation Review indicated a practical potential for biomass of some six per cent. of electricity supply by 2020 based on a range of assumptions

Nick Harvey: To ask the Secretary of State for Trade and Industry what her assessment of the *(a)* resource implications and *(b)* environmental impacts of the movement of biomass over to fuel large power stations is. [185846]

Mr. Timms: Assessments of biomass resource have been published in the course of the Renewables Innovation Review and the Statutory Consultation on Amendments to the Renewables Obligation Order.

The Royal Commission on Environmental Pollution made an assessment of the carbon dioxide associated with biomass production and transport in their recent report on Biomass as a Renewable Energy Source. Total life cycle emissions from biomass remain low compared to fossil-fuel fired power plant.

Individual projects will make their own assessments of environmental impact as part of their application for planning consent.

Brazil

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what percentage of imports into the UK were from Brazil in 2003–04. [184183]

Mr. Mike O'Brien: In 2003 Brazil accounted for 0.62 per cent. of the UK's total imports of goods. In the first five months of 2004, Brazil accounted for 0.63 per cent.

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what the UK policy is on the Brazilian production of generic AIDS drugs to prevent the spread of AIDS; and what assessment has been made of their use in Africa. [184187]

Mr. Mike O'Brien: The UK Government are committed to increasing access to medicines—through affordable pricing, sustainable financing, reliable health and supply systems and the rational selection and use of drugs—in the developing world. Our policy paper, "Increasing access to essential medicines in the developing world: UK Government policy and plans", was published on 30 June and copies are available in the Libraries of both Houses.

Brazil is one of a number of developing countries whose generic drug manufacturing capacity is sufficient to allow manufacture of their own HIV/AIDS drugs. Brazil has close links with a number of countries in Africa. The UK Government have made no specific assessment of the use of Brazilian AIDS drugs in Africa.

Mr. Rosindell: To ask the Secretary of State for Trade and Industry if she will make a statement on the level of trade in the industrial sector between Brazil and the UK. [184189]

Mr. Mike O'Brien: In 2003, UK exports to Brazil and UK imports from Brazil of manufactured goods (defined as Divisions 5 to 8 of the Standard International Trade Classification) were worth £784 million and £669 million respectively. The two most important sectors by value for UK exports were medicinal and pharmaceutical products and power generating machinery and equipment. For Brazilian exports to the UK, the two most important sectors were power generating equipment and machinery and cork and wood manufactures (excluding furniture).

Business Failures

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry how many business failures there have been in each year since 1997. [185511]

Mr. Sutcliffe: The following table shows the number of company and individual insolvencies in each year from 1997 to 2003. While company insolvencies are all known to be business failures, individual insolvencies also include consumer insolvencies. For bankruptcies, a breakdown into "self-employed" (small businesses) and "other individuals" is available, although a similar breakdown is not available for individual voluntary arrangements (IVA's). For this reason it is not possible to separate all business failures from the total individual insolvencies.

	1997	*1998*	*1999*	*2000*	*2001*	*2002*	*2003*
Company Insolvencies	12,610	13,203	14,280	14,317	14,972	16,305	14,184
Individual Insolvencies	24,441	24,549	28,806	29,528	29,775	30,587	36,328
Bankruptcies—Total	19,892	19,647	21,611	21,550	23,477	24,292	28,021
Of which:							
Self-employed	11,269	10,420	10,723	9,952	9,839	8,854	9,139
Individual Voluntary Arrangements	4,549	4,902	7,195	7,978	6,298	6,295	8,307
Total known business Insolvencies	23,579	23,623	25,003	24,269	24,811	25,159	23,323

Business Regulation

Mr. Bellingham: To ask the Secretary of State for Trade and Industry whether her Department has made an assessment of the cost to small businesses of changes to employment legislation introduced since 1997. [185543]

Mr. Sutcliffe: The DTI estimates the potential impact on small businesses of changes to employment legislation in its Regulatory Impact Assessments. Summing these estimated costs to all businesses of employment legislation introduced since 1997, produces a figure of £5.1 to £5.6 billion a year of policy costs (such as the cost to employers of paying the national minimum wage), but just £32 to £39 million per year of on-going 'implementation' costs (the administrative or 'red-tape' costs). Small firms might account for £1.5 to £1.6 billion of the policy costs and £9 to £11 million of implementation costs. At the same time, it should be remembered that there are very significant benefits to small firms associated with these changes to employment legislation.

The DTI has also commissioned research into what the effects on small firms of changes to employment legislation have been. The impact of employment legislation on small firms: a case study analysis, by Paul Edwards, Monder Ram and John Black, 2003 for the DTI, found that "the impact on firms appears generally to remain relatively small."

Car Batteries

Mr. McLoughlin: To ask the Secretary of State for Trade and Industry how many and what percentage of end-of-life car batteries were recycled in each of the last two years. [185742]

Mr. Timms: No precise data for the recycling of end of life automotive batteries are currently collected. However, discussions with the battery manufacturing and distributing sector, and the lead recycling industry, suggest that in 2002 the UK recycled 94 per cent. of spent automotive batteries and that this figure rose to 99 per cent. in 2003. In each year, an estimated 7.5 million automotive batteries entered the waste stream.

Chronic Diseases (Compensation Claims)

Mr. Foulkes: To ask the Secretary of State for Trade and Industry how many compensation claims received for chronic obstructive pulmonary disease and vibration white finger damages are waiting to be processed; and what the average time taken to process a claim is. [183247]

Nigel Griffiths: There are around 428,000 respiratory disease claims waiting to be settled. 380,000 were submitted in the last six months alone. The time taken to process a claim is dependent on the time it takes the claimants' representatives and the Department's contractors to provide all the required information for the full Medical Assessment Process (MAP) to take place. The average is two years for a live claim and one year for a deceased claim from registration to MAP.

There are some 79,000 Vibration White Finger (VWF) claims waiting to be settled. The average time taken from registration of claim to settlement is around 2.5 years and is dependant on the factors mentioned above.

Adam Price: To ask the Secretary of State for Trade and Industry how many chest disease coal-related compensation claims remain outstanding; how many have been settled in the last 12 months; and when the Government expects to settle all chest disease coal-related compensation claims. [185765]

Nigel Griffiths: There are over 428,000 claims still to settle. 280,000 came in during the last six months before the cut off date. In the last 12 months some 54,000 claims have been settled.

With regard to the timetable for settling outstanding claims, I refer my hon. Friend to the answer given by my noble Friend the Parliamentary Under-Secretary of State for Trade and Industry in the House of Lords on 21 April 2004, *Official Report*, column WA49.

Company Insolvencies

Mr. Bellingham: To ask the Secretary of State for Trade and Industry (1) what estimate her Department has made of the number of company insolvencies in 2003; [185452]

(2) what estimates her Department has made of the number of company insolvencies in 2003. [185544]

Mr. Sutcliffe: There were 14,184 company insolvencies in 2003. These comprised of 5,234 creditors voluntary liquidations and 8,950 company compulsory liquidations.

Defence Equipment (Exports)

Mr. Cousins: To ask the Secretary of State for Trade and Industry when she expects to extend the UK regulations on the licensing of exports of defence equipment to the UK dependent territories; and if she will estimate the value of those exports in the last year for which figures are available. [185172]

Mr. Rammell: I have been asked to reply.

The Government are working with the Overseas Territories to implement the Export Control Act by the end of the year. In the absence of centrally kept records, an estimate of the exports of defence equipment from the Overseas Territories would be meaningless, and liable to be misconstrued as an official figure. However, the Government believe the level of such exports to be very small, since the Overseas Territories neither manufacture defence equipment on a large scale, nor have large stocks of such equipment.

DIY Accidents

Mr. Burstow: To ask the Secretary of State for Trade and Industry what estimate her Department has made of the prevalence of accidents relating to DIY; and what measures her Department is taking to reduce the number of such accidents. [185982]

Mr. Sutcliffe: DTI no longer provides a service on accident statistics.

During 2002, the final year for which statistics were collected, the UK national estimate for the number of home accident victims where the patient's activity at the time was DIY/maintenance was 218,510 (24th HASS report, page 124); and a further 15,785 whilst at leisure outside the home and its surrounds (24th HASS report, page 133).

The 24th HASS report can be ordered or downloaded from www.dti.gov.uk/homesafetynetwork/gh_stats.htm.

More detail can be obtained by contacting the Royal Society for the Prevention of Accidents: www.rospa.com tel. 0870 777 2171.

As regards policy, the General Product Safety Regulations require products to be safe in normal or reasonably foreseeable use and that consumers are provided with the relevant information to enable them to assess the risks inherent in a product and where these are not obvious for warnings to be provided.

Employment Benefits

Malcolm Bruce: To ask the Secretary of State for Trade and Industry what assessment she has made of the effect on part-time workers in *(a)* the UK and *(b)* each region of measures agreed at EU level to ensure pro rata rights to (i) paid leave, (ii) pensions, (iii) access to training and (iv) other company benefits. [185324]

Mr. Sutcliffe: The Second Work-Life Balance Study—Employees' Survey, carried out during January and February 2003, asked employees if their employer provided part-time workers with *(a)* the same hourly rate of pay as full-time workers; *(b)* the same entitlements to annual leave and maternity/parental leave on a pro rata basis as full-time workers; and *(c)* the same entitlement to contractual sick pay as full-time workers. A significant minority answered 'no', as shown in the following table.

Table: Percentages of employees who answer 'no' when asked about provisions for part-time staff, by UK region

Does your employer provide part-time workers with the following?	*NE*	*Yorks and Humb*	*E Mids*	*Eastern*	*Gtr London*	*SE*
The same hourly rate of pay as full-time workers	18	9	11	12	15	11
The same entitlements to annual leave and maternity/paternity leave on a pro rata basis as full-time workers	9	3	4	8	11	7
The same entitlement to contractual sick pay as full-time workers	12	6	8	12	13	8

Does your employer provide part-time workers with the following?	*SW*	*W Mids*	*NW*	*Wales*	*Scotland*	*UK*
The same hourly rate of pay as full-time workers	9	13	12	14	15	12
The same entitlements to annual leave and maternity/paternity leave on a pro rata basis as full-time workers	6	10	10	17	9	8
The same entitlement to contractual sick pay as full-time workers	10	11	14	18	12	11

Note:
Base = 1823. Other response categories not reported here were 'yes' and 'don't know'.

According to the Second Work-Life Balance Study—Employers' Survey, carried out between December 2002 and April 2003, less than 1 per cent. of part-time employees were ineligible for maternity/paternity, parental or special paid leave entitlements available to full-time employees. Employers reported that none of their part-time staff were ineligible for employer-provided childcare facilities or help where they were available. Employers reported that between 0.1 and 1.9 per cent. of their part-time staff were ineligible for various flexible working practices, depending on which particular practice was being considered. Because the number of corresponding cases is very small, it is not possible to provide a regional breakdown. It is recognised that it is likely that employers will under report any ineligibility for part time staff.

The DTI has not collected any statistics on pensions, access to training or other company benefits (other than access to flexible working practices and child care).

Employment Tribunals

Mr. Todd: To ask the Secretary of State for Trade and Industry in what proportion of employment tribunal judgments in the last five years the debt owed by the employer was not wholly recovered. [185450]

Mr. Sutcliffe: The Employment Tribunals Service does not hold information on the number of employment tribunal judgments where the debt owed by the employer was not wholly recovered.

Environmental Business Growth Action Programme

Mr. Kidney: To ask the Secretary of State for Trade and Industry what funding *(a)* is budgeted to be spent, *(b)* has been spent and *(c)* is forecast to be spent by regional development agencies in 2004–05 on the Environmental Business Growth Action Programme in (i) England and (ii) the west Midlands. [184138]

Jacqui Smith: The Environmental Business Growth Action Plan operates in the west Midlands only. The expenditure by Advantage West Midlands on this plan is as follows:

	£
Expenditure already made in 2004–05	22,000
Expenditure budgeted for the balance of 2004–05	424,798
Expenditure forecast for the balance of 2004–05	[1]915,994

[1] This figure is subject to approval of a project currently being considered by AWM.

The Plan is also in receipt of funding from European and other UK sources, both public and private sector.

Mr. Kidney: To ask the Secretary of State for Trade and Industry what the role of regional development agencies is in the management of the Environmental Business Growth Action Programme, with particular reference to Advantage West Midlands. [184145]

Jacqui Smith: The Environmental Business Growth Action Plan is a west Midlands' region only initiative led by the Environmental Agency. The initiative is supported by funding from Advantage West Midlands which also participates in the Management Board of the Action Plan together with other regional partner organisations.

Exports/Imports

Mr. Rosindell: To ask the Secretary of State for Trade and Industry if she will list the export and import figures to and from *(a)* European Union states and *(b)* non-European Union states for the last year for which figures are available. [184258]

Mr. Mike O'Brien: According to figures published by the Office for National Statistics the information is as follows:

UK trade in goods and services with European Union (EU15) and Non-European countries—2003

£ million

	European Union	Non-European Union
UK exports	139,739	137,800
UK imports	168,544	141,668

Source:
National Statistics, Balance of Payments, First Release

Furniture Regulations

Alan Simpson: To ask the Secretary of State for Trade and Industry how many *(a)* actual and *(b)* withdrawn prosecutions there have been of businesses failing the furniture regulations since 1993. [185853]

Mr. Sutcliffe: The Furniture and Furnishings (Fire) (Safety) Regulations 1988 are enforced by local trading standards departments. This Department collates statistics on prosecutions under the regulations every five years and publishes them in a statutory report on consumer safety. For the period 1 April 1993 to 31 March 1998 the report records 404 prosecutions of which 398 resulted in convictions. Between 1 April 1998 and 31 March 2003, there were 101 prosecutions resulting in 98 convictions. These statistics are obtained from enforcement authorities under Section 70 of the Weights and Measures Act 1985. Data for the period from 1 April 2003 is not yet available.

Mercosur

Mr. Rosindell: To ask the Secretary of State for Trade and Industry what the Government's policy is on the expansion of Mercosur. [184190]

Mr. Mike O'Brien: Mercosur, the Common Market of the South, was created by Argentina, Brazil, Paraguay and Uruguay in March 1991. In 1996 association agreements were signed with Bolivia and Chile establishing free trade areas with these countries; Mexico and Venezuela have recently expressed interest in joining the group. Expansion of Mercosur would be a decision for the full members. The UK favours the process of deeper regional integration since we believe this creates greater possibilities for economic growth and poverty reduction.

Minimum Wage

Mr. Gordon Prentice: To ask the Secretary of State for Trade and Industry if she will require all employers to print the national minimum wage at any given point in time on all wage slips; and if she will make a statement. [185512]

Mr. Sutcliffe: We have no plans to require all employers to print the national minimum wage on wage slips.

However, every output worker, including homeworkers, paid under the piece rate system introduced by the National Minimum Wage Regulations 1999 (Amendment) Regulations 2004 from October 2004 must be given a written notice making it clear what the fair piece rate is, how it was set by the employer, and give the national minimum wage helpline number, which the worker may contact if they have a query or wish to make a complaint.

Civil Nuclear Security

Llew Smith: To ask the Secretary of State for Trade and Industry what the reasons were for the revocation of security clearance by the Office for Civil Nuclear Security of an individual in the past two years; and what consultations have taken place with the Cabinet Office over the decision of the Security Vetting Appeals Panel. [184399]

Mr. Timms: I am not able to comment on individual cases.

Post Offices

Mrs. Lawrence: To ask the Secretary of State for Trade and Industry how many main post offices in county towns have been franchised by the Post Office *(a)* before and *(b)* since 1997. [185649]

Mr. Timms: These are operational matters for Post Office Ltd. and I have therefore asked the Chief Executive to reply direct to the hon. Member.

Mr. Peter Duncan: To ask the Secretary of State for Trade and Industry how many post offices have closed in Dumfries and Galloway region since 1997. [186303]

Mr. Timms: I am advised by Post Office Ltd. that data on post office closures by constituency is not available in the form requested, as the company does not require this data for operational purposes. However it has produced quarterly statistics on post office closures by Government region/country since March 2000 and the net closure figures for Scotland are:

	Number
Year to end March 2001	63
Year to end March 2002	26
Year to end March 2003	20
Year to end March 2004	77

Regional Development Agencies

Mrs. Spelman: To ask the Secretary of State for Trade and Industry to what public service agreements and targets set by central Government regional development agencies are subject. [184982]

Jacqui Smith: The Regional Development Agencies (RDAs) have been set a framework of challenging targets which they must demonstrate their contribution to. Under the three-tier target framework, tier 1 targets restate their statutory purposes. Tier 2 are regional outcomes of interest to the funding Departments. Tier 3 are targets for direct outputs, achieved through RDA programme spend. These are listed as follows.

Tier 3 outputs:

(i) Employment Opportunities:

Support the creation or safeguarding of x net jobs;

(ii) Brownfield Land:

Reclaim or remediate x hectares of previously developed land and buildings;

(iii) Education and Skills:

Support the creation of learning opportunities for x individuals;

(iv) Business Performance:

Support the creation and or attraction of x new businesses;

(v) Investment benefiting deprived areas:

Leverage through RDA funding and activity x pounds private sector investment benefiting residents of the most deprived wards

Each RDA has the same core targets, though the numbers differ region by region, and activities aimed at meeting them and addressing regional needs are described in the Regional Economic Strategy developed with regional stakeholders.

As set out in the Devolved Decision Making Review (March 2004), the DTI, working in partnership with other Government Departments, is coordinating the implementation of a new approach to tasking the RDAs in time to come into effect from April 2005.

The new framework will help the RDAs and Departments to work on regional priorities in a way that also serves national interests more effectively. It will provide clearer direction by simplifying targets and making them more relevant to what the Agencies are trying to do.

Regulatory Impact Assessments

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry what the distinction is between regulatory impact assessments where *(a)* the benefits justify the costs and *(b)* the benefits outweigh the costs. [183217]

Mr. Alexander: I have been asked to reply.

The Cabinet Office guidance "Better Policy Making: A Guide to Regulatory Impact Assessment" requires the responsible Minister to certify that he or she is satisfied that the benefits of the proposed measure justify its costs. The Minister will consider the full range of benefits arising from the measure, including social, environmental and economic.

Renewable Energy

Mr. Meale: To ask the Secretary of State for Trade and Industry if she will list the capital grants demonstration projects for renewable energy technologies that are not yet economic with support from the renewable obligation alone. [185397]

Mr. Timms: The Department has supported with capital grants the following number of demonstrations of renewable energy technologies not yet economic with support from the Renewables Obligation alone. This includes funding for Capital Grants which has been allocated from the Big Lottery Fund.

The total number of projects in each sector that the Department is aware of is:

Photovoltaic—653, under the major demonstration programme.

Biomass—21, under the Bioenergy Capital Grants Scheme

Offshore wind—12, under the Offshore Wind Capital Grants Scheme

Mr. Swire: To ask the Secretary of State for Trade and Industry what guidelines she has issued on the percentage of energy which should come from renewable sources in relation to the proposed development at Clyst Vale in Devon. [185764]

Mr. Timms: Our overall target is that by 2010, 10 per cent. of the UK's electricity should come from renewable sources. ODPM are currently reviewing their national guidelines which help set out planning guidance for local authorities on renewable energy development. Responses to their consultation and the new planning guidance, PPS 22, are being analysed and final publication of PPS 22 is due in the summer.

At a regional level the Southwest Government Office have planning guidance in the shape of RPG 10—produced in 2001 and informed by PPS 22's predecessor. This sets an indicative target of 11–15 per cent. of electricity from renewables by 2010—just under 600MW of capacity. The regional office then worked with individual counties to agree indicative targets at the county level and incorporate them into individual renewable energy strategies; for example, Devon has a 151 MW indicative target. These were based upon detailed resource and character assessments of the landscape but the indicative targets are not split by technology. RPG 10 is due to be updated by the Regional Spatial Strategy in 2005—which will be informed by PPS 22. No guidelines have been issued in respect of renewable energy provision for any individual development.

Renewable Obligations Certificate

Mr. Andrew Turner: To ask the Secretary of State for Trade and Industry to what extent the renewable obligations certificate can be traded with wind power generating companies registered in the UK but whose beneficial ownership lies in offshore tax havens. [185739]

Mr. Timms: Renewables obligation certificates or ROCs are issued in relation to eligible renewables output from generating stations in the United Kingdom. ROCs can be traded within Great Britain and in future this will be extended to include Northern Ireland. The renewables obligation is placed upon licensed electricity suppliers supplying customers in Great Britain.

irrespective of where those suppliers may be based, and ROCs can be expected to be of value to such companies, to those selling renewables electricity to them and to traders in ROCs.

Renewables Obligations Order

Nick Harvey: To ask the Secretary of State for Trade and Industry when she expects the Renewables Obligation Order review's findings will be published; what the parameters of the review are; and from whom it will take evidence. [185841]

Mr. Timms: We plan to publish our proposals on the scope and terms of reference of the review later this summer. We aim to complete the review itself by the end of 2005—this will include a statutory consultation on any proposed changes to the Obligation.

The Utilities Act requires us to consult a wide range of statutory consultees before any changes are made to the Order. Such consultees include the Gas and Electricity Markets Authority, The Gas and Electricity Consumer Council, electricity suppliers to whom the Order would apply and generators of electricity from renewable sources. Gauging the opinion of this range of consultees will enable us to seek views from a wide base.

Small Businesses

Mr. Hepburn: To ask the Secretary of State for Trade and Industry what support has been offered to small businesses in *(a)* the Jarrow constituency, *(b)* south Tyneside, *(c)* Tyne and Wear and *(d)* England in each year since 1997. [184517]

Nigel Griffiths: A number of steps have been introduced to help small businesses including an increase of capital allowances to 50 per cent. and raising VAT registration threshold to 58 per cent., all of which helps small businesses in south Tyneside.

The Employer Training Pilot, run in Tyne and Wear for the last 15 months, is being made available to businesses throughout the north east. This helps businesses to improve workforce skills by providing training tailored to their needs. The main source of publicly funded business support is Business Link Tyne and Wear (BLTW).

Core funding of £2.2459 million provided to Business Link Tyne and Wear (BLTW), laid the foundation on which they are planning to source additional funding projected at £14.5 million for the benefit of businesses in Tyne and Wear, for the year 2004–5. Such funding and the creation of partnership working allowed the following to be delivered within Tyne and Wear.

Around £7.5 million was made available to SMEs based in the sub-region in 2003–04 as part of projects managed by BLTW.

Businesses benefited from a range of Workforce Development services to help SMEs achieve the Investors in People Standard (IiP) and develop their workforce.

Financial subsidies up to 45 per cent. towards consultancy can be accessed by businesses of any age or size issue. Around £4 million is available for this purpose.

SMEs benefit from up to 45 per cent. funding towards the cost of exhibition space, and design, build and dressing of stands. BLTW have held three 'Meet the Buyer' events over the last two years as a means for local SMEs to meet buyers from both within and beyond the region, offering them the opportunity to become integral cogs in supply chains. BLTW also recently hosted an 'Access to Finance' event, where SMEs met flinders. This was attended by 30 funders and over 100 SMEs.

Unsecured loans of up to £15,000 are available to SMEs in the NE that have difficulty accessing finance elsewhere. The SMEs must work with a mentor and repay the loan within five years.

A Business Link adviser is currently based at TEDCO's premises in Jarrow providing advice and support to south Tyneside businesses. Business adviser will soon be based in south Tyneside metropolitan borough council premises, and in south Tyneside College two days a week.

In addition a Tyne and Wear Small Business Fund, through ONE NE's Single Programme Funding, of a 50 per cent. Capital Equipment Grant of between £500 and £2,500 available to pre-start and new businesses—up to 12 months old.

Supplementing the support available from BLTW, south Tyneside metropolitan borough council and south Tyneside Enterprise Agency, TEDCO run a number of their own initiatives to support SMEs in the south Tyneside borough. These initiatives are outlined as follows:

South Tyneside metropolitan borough council:

Tyne and Wear Small Business Grant;

50 per cent. of eligible costs up to £5,000;

New businesses up to 36 months old;

Supports projects from a wide range of sectors with a capital spend of at least £2,000.

Major Business Grant Fund:

£20,000-£100,000;

New and established businesses in most sectors;

Encourages major investments into the borough which support the attraction, creation, retention and rescue of significant jobs and businesses.

Youth Employment Grant:

Up to £3,000 on 30 per cent. basis over first year;

Established businesses in all sectors;

30 per cent. of the first years basic wage costs in a new, full-time, permanent post, for a person of south Tyneside, under 25 years of age.

TEDCO:

Business Start-up

Access is available to the Tyne and Wear Business Start-up service, for individuals to access advice and support on all aspects of starting and running a business. The trend for business start-up is an upward one, in 2001, 50 start-ups were recorded for south Tyneside rising to 83 for 2003.

There is close partnership working with South Tyneside Credit Union, STRIDE and the citizen's advice bureau on anti-poverty and projects focused on

wealth creation and retention. Total funding for these activities in Jarrow since 1997 has been in the region of £311,000.

Business Development.

Business Development support activities include Outreach counselling, E-commerce, Marketing Support, Business Planning, Cluster Development, Workforce Development, graduate and undergraduate placement programmes and support with grant applications for expansion and growth. Total funding for the counselling and consultancy aspects of this work has been in the region of £230,000.

Grant Funding:

Grants for local businesses have been accessed through south Tyneside to promote growth, competitiveness, support expansion and inward investment. There have been two sources of this funding, a Major Grants Fund, and the south Tyneside Development Fund. It is not possible to ascertain an exact split of funds, but in broad terms, since 1997 Jarrow businesses have received £200,000 from the Major Grants Fund and £100,000 per annum from the Development Fund.

Other Sources of Funding.

Further financial support has also been available through The Department for Work and Pensions, e.g. InBiz and also through DTI Regional Selective Assistance although it has not been possible to establish how much.

Solar Photovoltaics

Syd Rapson: To ask the Secretary of State for Trade and Industry what her Department's estimate is of the total amount of grid-connect solar photovoltaics which will be installed in the UK in 2004. [185791]

Mr. Timms: The Department does not have an estimate of grid-connected PV installed in the UK in 2004.

The cumulative installed grid-connected PV in the UK was 5.189 MWe at the end of 2003, of this 1.623 MWe was installed in 2003.

Stream 2 Funding

Mr. Don Foster: To ask the Secretary of State for Trade and Industry what the total value is of large-scale grant applications for funding received in stream 2 of the Government's solar PV Major Demonstration Programme since its launch; and what the total value is of applications approved. [186110]

Mr. Timms: Under Stream 2 of the PV Major Demonstration Programme, 240 grant applications have been received with a total grant value of £32,552,100. Of these, 137 applications have been approved and offered grants with a total value of £16,612,695.

Technological Innovation

Mr. Stephen O'Brien: To ask the Secretary of State for Trade and Industry for what reason applicants for the Grant for Research and Development have been asked to confirm in writing that they are withdrawing their bids; and what assessment she has of the impact this will have on encouraging small businesses to carry out research and development that leads to technologically innovative products and processes. [185513]

Nigel Griffiths: I am advised that applicants for the Grant for Research and Development have not been asked to withdraw their applications. However, if any choose to do so they should inform the office dealing with their application.

UK Trade and Investment

Mr. Swayne: To ask the Secretary of State for Trade and Industry what the *(a)* recruitment and *(b)* total cumulative salary costs of the Chief Executive of UK Trade and Investment are. [185253]

Mr. Mike O'Brien: The information is as follows.

(a) The recruitment costs associated with the last recruitment exercise for the Chief Executive of UK Trade and Investment totalled approximately £74,000. This is in line with the costs associated with other open competitions held for the recruitment of Permanent Secretaries.

(b) The Chief Executive's current salary falls within the salary range £120,000 to £124,999.

UK/EU Trade

Mr. Foulkes: To ask the Secretary of State for Trade and Industry if she will estimate the number of businesses in each region of the UK which trade with the EU; what percentage of *(a)* small businesses, *(b)* medium sized businesses and *(c)* large companies this represents in each region; and what the value of such trade in each region was for each business sector in the last year for which figures are available. [184524]

Mr. Mike O'Brien: The latest available information on UK trade in goods, by UK regions, was published by HM Customs and Excise on 17 June 2004. The Press Release (NAT 27/04) and accompanying tables of statistics are available from the Customs' website: www.uktradeinfo.com which may be accessed from the Libraries of the House.

Customs do not collect information on numbers of employees so it is not possible to distinguish between small, medium sized and large businesses.

Wool Industry

Mr. Wiggin: To ask the Secretary of State for Trade and Industry what assessment she has made of the current *(a)* state and *(b)* competitiveness of the British wool industry. [184050]

Alun Michael: I have been asked to reply.

Sales of new season's British wool have begun well, with strong demand and prices firm compared to those achieved at the end of last season's selling in June. But the volatility of the world market and the influence of currency fluctuations and world events may lead to some slowing of the market.

The Government/Industry Forum on the Non-Food uses of Crops has considered ways to improve the competitiveness of the wool industry and included three recommendations in its second Annual Report. The

Government will respond to those recommendations soon. A copy of this report and the recommendations made can be found at: http://148.252.1.12/gifnfc/index.asp.

Working Time Directive

Mr. Bellingham: To ask the Secretary of State for Trade and Industry what estimate she has made of the annual cost to small businesses of the Working Time Directive. [185474]

Mr. Sutcliffe: The Department of Trade and Industry estimates in its Regulatory Impact Assessments that the total annual cost to business of the Working Time Regulations is £2.7 billion, of which up to £800 million might apply to small firms. There are also benefits to firms through improved health and safety and a more committed workforce, which may have led to productivity gains.

The Department of Trade and Industry has commissioned research into the impact of the Working Time Regulations. One such report was "Implementation of the Working Time Regulations: follow-up study", Fiona Neathey, July 2003. The report finds that: "In most cases the WTR were not seen as a major business issue. However, the interviews produced some evidence of working time reduction arising from the Regulations and examples were given of operational benefits including more efficient ways of working and the positive impact on worker flexibility and efficiency of reduced working hours. Where a negative impact was cited it was most commonly in relation to increased labour costs, however only one company identified substantial costs which were directly associated with the WTR." (page 9).

Workplace Discrimination

Malcolm Bruce: To ask the Secretary of State for Trade and Industry if she will list current UK legislation on discrimination in the workplace which resulted from *(a)* agreements reached at an EU level and *(b)* judgments of the European Court; what estimates she has made of the number of cases brought in each region of the UK under each piece of legislation in each of the last five years; how many cases were successful in each case; and what the total value of awards made in each of the last five years was for each region. [185323]

Mr. Sutcliffe: The current UK (excluding Northern Ireland) legislation on discrimination in the workplace which resulted from agreements at an EU level is as follows:

Disability

The Disability Discrimination Act 1995 (Amendment) Regulations 2003

The Disability Discrimination Act 1995 (Pensions) Regulations 2003

Sexual orientation

The Employment Equality (Sexual Orientation) Regulations 2003

The Employment Equality (Sexual Orientation) (Amendment) Regulations 2003

Religion or belief

The Employment Equality (Religion or Belief) Regulations 2003

The Employment Equality (Religion or Belief) (Amendment) Regulations 2003

The Independent Schools (Employment of Teachers in Schools with a Religious Character) Regulations 2003

The School Standards and Framework Act 1998

The Education (Scotland) Act 1980

Tribunals

The Employment Tribunals (Interest on Awards in Discrimination Cases) Regulations 1996

Race

The Race Relations Act 1976 (Amendment) Regulations 2003

Gender

The primary gender legislation which has been affected by European Court legislation is the Equal Pay Act 1970, as amended and the Sex Discrimination Act 1975, as amended. However, a full legislative list has been provided in the following table.

Number of cases

The Employment Tribunals Service is not able to provide a regional breakdown of the number of cases brought before the tribunal and of those that were successful. Given the short length of time that the Employment Equality Regulations have been in force, the number of cases reaching an Employment Tribunal is currently very small.

Disability

The Disability regulations come into force on 1 October 2004 and as yet there are no cases to report. The following table shows the number of cases that were brought before the tribunal on the grounds of disability in the last five years.

Sexual orientation

Only one case so far has been decided upon in the Employment Tribunal under the Employment Equality Sexual Orientation Regulations. The discrimination on the grounds of sexual orientation was not upheld by the tribunal.

In the period December 2003 to June 2004 there have been 83 Employment Tribunal applications registered by the Employment Tribunals Service relating to sexual orientation.

Religion or belief

To date, no cases have been decided upon in the Employment Tribunal under the Employment Equality Religion or Belief Regulations.

In the period December 2003 to June 2004 there have been 44 applications registered by the Employment Tribunals Service relating to religion or belief.

Race

The Race Regulations have now been in force for a year and there are no cases to report that have come before the Employment Tribunal. The table shows the number of cases that were brought before the tribunal on the grounds of racial discrimination in the last five years.

Sex

The Sex Discrimination Act 1975 has been amended by European Court legislation. The table shows the number of cases that were brought before the tribunal on the grounds of sex discrimination in the last five years.

Equal pay

The Equal Pay Act 1970 has been amended by European Court legislation. The table below shows the number of cases that were brought before the tribunal on the grounds of discrimination arising from equal pay issues in the last five years.

The Employment Tribunals Service is unable to provide information on the total value of awards made in the last five years on a regional basis.

	Applications registered	*Number of cases disposed of at hearing*	*Number successful at hearing*
Equal pay—main jurisdiction cases			
1999–2000	2,391	110	9
2000–01	6,586	55	11
2001–02	5,314	185	149
2002–03	3,077	92	47
2003–04	3,217	77	51
Disability—main jurisdiction cases			
1999–2000	1,743	292	67
2000–01	2,100	457	105
2001–02	2,624	345	77
2002–03	2,716	408	90
2003–04	2,764	396	99
Sex—main jurisdiction cases			
1999–2000	4,926	866	233
2000–01	17,200	967	322
2001–02	10,092	838	239
2002–03	8,128	904	289
2003–04	14,284	711	265
Race—main jurisdiction cases			
1999–2000	3,246	632	170
2000–01	3,429	975	204
2001–02	3,183	722	112
2002–03	3,039	655	104
2003–04	2,830	687	115

Employment Tribunals Service

DEFENCE

Accommodation

Mr. Hancock: To ask the Secretary of State for Defence how much has been spent upgrading and building accommodation for the junior ranks of the *(a)* Army, *(b)* Royal Navy and *(c)* Royal Air Force, in each of the last three years; how much is provided in the forward programme; and if he will make a statement. [146166]

Mr. Caplin: The Ministry of Defence has embarked on a programme to upgrade the Services' single living accommodation. However, because the costings include whole blocks, or others areas such as non-commissioned officer accommodation or ancillary areas, it is not possible to separate out expenditure for Junior Ranks, although much of the programme involves the upgrade of this type of accommodation.

The following table shows past and planned expenditure on single living accommodation. This is the best information which can be provided without disproportionate cost and effort. It should be noted that the forecast spend in years 2004–05 and 2005–06, may be subject to change as in-year planning issues arise, and the figures represent an indicative allocation of funds.

£ million

	2001–02	*2002–03*	*2003–04*	*2004–05*	*2005–06*
RN	4	2	22	21	31
Army	41	51	19	67	64
Single Living Accommodation Modernisation (SLAM)	14	19	4	27	13
Other	7	13	72	86	92
Totals	66	85	162	316	277

The entry on 'OTHER' expenditure relates to projects delivered by the Defence Estates agency, on tri-Service projects including within the Defence Logistics Organisation, Permanent Joint Headquarters, and in Northern Ireland.

Expenditure on SLAM (the project to modernise single living accommodation for the Services) assumes some 17 per cent. to RN, 54 per cent. to Army and 26 per cent. to RAF (3 per cent. other) but these figures are indicative as the work is likely to be tackled on a 'worst first' rather than Service basis.

Cadet Forces

Mr. Keith Simpson: To ask the Secretary of State for Defence what provisions have been made for cadet recruitment and training by his Department. [184158]

Mr. Caplin *[holding answer 15 July 2004]*: The provision made for recruitment and training for the Cadet Forces can be shown by the latest budget/expenditure for all of the Cadet Forces (including CCF), which were as follows:

Recruitment and Training for Cadet Forces—2003–04

	£ million
£million	
Cadets affiliated to the Royal Air Force	21
Cadets affiliated to the Royal Navy and Royal Marines	10
Cadets affiliated to the Army	60

The Army is responsible for providing many items for use by all Cadet Forces, such as Medical Modules for use on adventure training and Cadet camps.

Civilian Deaths (Amargh)

Adam Price: To ask the Secretary of State for Defence what information he has examined in relation to civilian deaths allegedly caused by British forces in the city of Amargh between 8 and 10 May. [179057]

Mr. Ingram *[holding answer 15 June 2004]*: Ministers were briefed on operations that occurred in al-Amarah on 8–9 May 2004, and my right hon. Friend the Secretary of State for Defence referred to them in his statement on 10 May 2004, *Official Report*, column 21.

Combat/Operational Clothing

Mr. Hoyle: To ask the Secretary of State for Defence what criteria were used in awarding the contract for combat and operational clothing DC4BESL/1002. [184361]

Mr. Ingram *[holding answer 15 July 2004]*: Under European Union Public Procurement Regulations we may only consider factors directly relevant to the nature of the items or services to be supplied in order to apply the principles of Most Economically Advantageous Tender.

The published award criteria were Technical Compliance, Cost of Acquisition, Soft Issues (to determine partnering capability), and Delivery. This is in accordance with the Public Procurement Regulations.

Mr. Lindsay Hoyle: To ask the Secretary of State for Defence what experience of supplying battledresses the winner of the contract for combat and operational clothing DC4BESL/1002 has. [184362]

Mr. Ingram *[holding answer 15 July 2004]*: The selected contractor has not previously supplied Combat Soldier (CS) 95, the main combat ensemble worn by the United Kingdom Armed Forces, however, they have supplied RN Improved Action Working Dress, Anti-Flash Clothing and elements of the Armoured Fighting Vehicle ensemble over a number of years, some of which are more complex and technically difficult to manufacture than CS 95 items. This contract was let to a prime contractor who is required to supply a range of nearly 200 products, including combat clothing, barrack/workwear and sportswear and the specific combat clothing element comprises only 20 different products.

Mr. Hoyle: To ask the Secretary of State for Defence how many officials from his Department visited China before awarding the contract for combat and operational clothing DC4BESL/1002. [184349]

Mr. Ingram: No officials have visited China in respect of this contract. It is not normal MOD practice to visit sub-contractors in advance of an award unless a significant risk has been identified during the assessment phase and this was not the case with this contract.

Correspondence

Tony Lloyd: To ask the Secretary of State for Defence when he intends to reply to the letter from the hon. Member for Manchester, Central dated 6 May regarding Mr. QH, reference 02245/2004. [185487]

Mr. Ingram: I wrote to the hon. Member on 19 July.

Defence Research and Development

Mr. Godsiff: To ask the Secretary of State for Defence what *(a)* defence technology centres, *(b)* defence and aerospace research partnerships and *(c)* towers of excellence have been set up; which universities are involved in each case; and what activities have taken place in each case. [182015]

Mr. Ingram: I am placing the requested information in the Library of the House.

Departmental Accountancy Practice

Mr. Bacon: To ask the Secretary of State for Defence who the Finance Director of the Department is; what accountancy qualifications the Director holds; and on how many occasions there has been a qualified opinion on *(a)* the resource accounts and *(b)* other accounts of the Department in the last five years. [183428]

Mr. Caplin: The Ministry of Defence's Finance and Planning Director is Trevor Woolley. Mr. Woolley was appointed following a Whitehall wide competition and took up post on 13 October 2003. He has substantial financial management experience in MOD at senior level across a range of posts within Head Office and in managing the finances of one of our largest budget areas. Although Mr. Woolley does not himself have an accountancy qualification, his staff includes a senior team of experienced accountants and other professional specialists.

The MOD's first Departmental Resource Accounts were published in 2000 and were disclaimed by the National Audit Office. Significant progress has been made since then and, although the accounts have been qualified in each year, those for 2002–03 received just one qualification.

Trading Fund organisations and non-departmental public bodies associated with the MOD also publish accounts, but these fall outside the departmental accounting boundary and the organisations' Chief Executives and Finance Directors are separately accountable for them.

Departmental Publications (Storage)

Dr. Cable: To ask the Secretary of State for Defence how many departmental publications are in storage; and where they are located. [183868]

Mr. Caplin: The Ministry of Defence's main storage depot for publications is in Llangennech in South Wales. This site currently holds copies of over 170,000 different forms and publications. However, many other publications are issued by, and stored at, unit level and information about these is not held centrally and could be provided only at disproportionate cost.

Iraq

Mr. Soames: To ask the Secretary of State for Defence whether at any point children have been detained in the Coalition-run detention centres in Umm Qasr; and if he will make a statement. [182929]

Mr. Ingram *[holding answer 8 July 2004]*: During decisive operations to 1 May 2003 and subsequently, UK forces have detained individuals who have been a

threat to them and a number believed to be criminals. Some of these people were detained in the facility at Umm Qasr and some were discovered to be under 18 years of age. Those internees and detainees still held by UK forces in the Umm Qasr facility were transferred to the UK Divisional Temporary Detention Facility at Shaibah on or about 15 December 2003.

Adam Price: To ask the Secretary of State for Defence pursuant to the answer of 15 July 2004, *Official Report*, column 1235W, on Iraq, whether hooding was a contributory factor in any harm suffered by individuals in the incident mentioned. [185973]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Adam Price: To ask the Secretary of State for Defence pursuant to the answer of 15 July 2004, *Official Report*, column 1235W, on Iraq, on what basis military commanders concluded that hooding detainees could be harmful. [185974]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Adam Price: To ask the Secretary of State for Defence pursuant to the answer of 15 July 2004, *Official Report*, column 1235W, on Iraq, whether military commanders concluded following the incident concerned that the potentially harmful effects of hooding could be fatal. [185975]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Lloyd Inquiry

Llew Smith: To ask the Secretary of State for Defence whether he has given his Department's employees permission to give evidence to the inquiry into Gulf war illness being held under the chairmanship of Lord Lloyd of Berwick. [184822]

Mr. Caplin: I wrote to Lord Lloyd of Berwick on 12 July 2004 and explained that it would not be appropriate for Ministers, officials or serving military personnel to attend his investigation. However, in the interests of openness, I intend to provide Lord Lloyd with a pack of all appropriate documents by the end of July.

Major Ian Hill

Annabelle Ewing: To ask the Secretary of State for Defence pursuant to his answer of 15 January 2004, *Official Report*, column 822W, on Major Ian Hill, if he is now in a position to give his assessment of the findings of the Cheshire Coroner regarding the death of Major Ian Hill. [185161]

Mr. Caplin *[holding answer 19 July 2004]*: The Ministry of Defence has completed its assessment of the findings of the Cheshire Coroner in the inquest of Edward Ian Hill and has noted the observations, comments and findings.

Nimrod

Mr. Jack: To ask the Secretary of State for Defence how many Nimrod MR4A aircraft are required to provide the same operational capability as the current Nimrod fleet. [186067]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

Nuclear Submarines

Alan Simpson: To ask the Secretary of State for Defence what plans he has to use *(a)* private finance initiative and *(b)* public private partnership mechanisms to decommission nuclear submarines. [184663]

Mr. Ingram: There are no plans to use either the Private Finance Initiative (PFI) or Public Private Partnership (PPP) to defuel and decommission nuclear powered submarines when they leave operational service. Since 1990 this work has been contracted out to Devonport Management Limited in Plymouth. As part of this process, the submarine's reactor is defuelled at the earliest practicable opportunity and the fuel—High Level Waste (HLW)—is removed for long term storage at British Nuclear Fuels plc at Sellafield.

We are undertaking Project ISOLUS, to determine storage arrangements for the Intermediate Level Waste (ILW) from the decommissioned submarines, pending a decision on a national waste management solution, and are currently considering industry outline proposals. PFI, partnering and prime contracting are the procurement options being considered. PFI will only be pursued if it can be demonstrated that it offers the most effective procurement strategy.

Prisons (Iraq)

Tom Cox: To ask the Secretary of State for Defence (1) how many *(a)* male and *(b)* female prison officers are employed in the running of British military and civilian prisons in Iraq; how many have been prison officers employed in prisons in the UK; and if he will make a statement; [177244]

(2) how many *(a)* men and *(b)* women prison officers employed in British-run military/civilian prisons in Iraq have been removed from their role as prison officers because of concern as to their suitability to be a prison officer; and if he will make a statement. [184119]

Mr. Ingram: There are no British military or civilian prisons in Iraq, and no prison officers are employed. As at 21 July 2004, around 65 personnel are based at the Divisional Temporary Detention Facility (DTDF) at Shaibah. This is the only British detention facility in Iraq. All custody officers are currently male, although one female custody officer was employed previously. None is known to have been removed from duty.

Special Advisers

Mr. Evans: To ask the Secretary of State for Defence how many of the reductions in the numbers of civil servants in his Department announced in the comprehensive spending review will be of special advisers. [185465]

Mr. Caplin: I refer the hon. Member to the answer given to him by my right hon. Friend the Chief Secretary to the Treasury (Mr. Boateng) on 20 July 2004, *Official Report*, column 190W.

Staffordshire Regiment

Michael Fabricant: To ask the Secretary of State for Defence if he will make a statement on the future of the Staffordshire Regiment. [185603]

Mr. Ingram: I will write to the hon. Member and place a copy of my letter in the Library of the House.

CONSTITUTIONAL AFFAIRS

Claiming Asylum Leaflet (Welsh Version)

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what assessment he made of the demand for a version of the Community Legal Services leaflet Claiming Asylum to be printed in Welsh, before the leaflet was printed. [185938]

Mr. Lammy: Section 5(1)*(a)* of the Welsh Language Act 1993 provides that English and Welsh languages should be treated on a basis of equality in the conduct of public business and the administration of justice in Wales. In accordance with these obligations, the Legal Services Commission has produced the 'Claiming Asylum' leaflet in Welsh and all the Community Legal Service (CLS) Direct leaflets will be available in Welsh by autumn 2004.

Community Legal Service

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs (1) which legal suppliers have over-billed for services provided on behalf of the Community Legal Service in each year since 1997; and what the total cost was of over-billing in each year; [185647]

(2) how many of those legal suppliers that over-billed for services provided on behalf of the Community Legal Service had their contracts terminated in each year since 1997; and on what date each termination took place. [185648]

Mr. Lammy: The Legal Services Commission (LSC) monitors whether costs claimed by suppliers are reasonable, either by individual bill submitted (for civil representation) or by auditing a sample of files (for controlled work under an LSC contract). At some stage, virtually all suppliers in receipt of public funding will have had their bills reduced, either by the LSC or by the court through its assessment process.

The LSC does not record costs in a way which enables them to identify the total cost for over-toiling in each year. Neither does it distinguish between those firms that have stopped doing work because the LSC has actively terminated contracts, and those firms that have withdrawn voluntarily. The LSC may terminate contracts for a range of reasons including over-toiling.

The LSC carries out cost compliance audits on all firms who are contracted with them to measure whether the suppliers are claiming correctly on their files. This is an objective audit where LSC compares what is claimed by the suppliers against what is actually evidenced in those files. Where a supplier is confirmed as 'category 3'—the lowest rating under the LSC's cost assessment audit—the Commission recovers the amounts claimed from the supplier. In 2003–04, the LSC recovered in excess of £7 million from 711 suppliers as a result of these audits.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what issues will be covered by the recorded message relating to education on the new Community Legal Service Direct advice line. [185260]

Mr. Leslie: Issues covered by recorded messages on the Community Legal Service (CLS) Direct advice line relating to education are as follows: parents rights relating to school exclusion, advice for parents unable to obtain a place for their child at their preferred school, rights and responsibilities of a parent whose child is truanting and advice for students facing difficulties with their university.

The Legal Services Commission plans to introduce further messages as other commonly experienced education-related problems are determined. Further topics are covered in leaflet number 20 of the CLS Direct Leaflet Series, entitled "Education: Parents' and Children's Rights at School." The leaflet is widely available in hard copy and also through the CLS Direct website.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many *(a)* visitors to the Community Legal Services website and *(b)* callers to the Community Legal Services direct telephone line were received each day in the last month for which figures are available; and how many (i) website visits and (ii) calls he expects in the next year. [185261]

Mr. Lammy: The website of the Community Legal Service (CLS) was known as 'JustAsk!' prior to 14 July 2004, and 'CLS Direct' from this date. Figures for daily visits to the website, in June, are detailed in table 1.

The Community Legal Service Direct telephone line was launched on 14 July 2004 (although the line had been operational from 2 July 2004). Figures for calls to CLS Direct, in July, are detailed in table 2.

The increased publicity generated by the launch of CLS Direct is expected to increase significantly visits to the website and phone calls made. No precise estimates of total calls, or website visits, next year can yet be made.

Table 1: Legal Services Commission breakdown of visitors to the 'Just Ask!' website

	Visits	
Date	*Number*	*Percentage of monthly total*
June 2004		
1	0	0
2	0	0
3	2,271	5.14
4	2,404	5.44
5	1,492	3.38
6	1,429	3.24
7	2,907	6.58
8	2,836	6.42
9	3,073	6.96

Table 1: Legal Services Commission breakdown of visitors to the 'Just Ask!' website

Date	Visits	
	Number	Percentage of monthly total
10	2,839	6.43
11	100	0.23
12	1,346	3.05
13	1,449	3.28

28	2,774	6.28
29	3,010	6.82
30	2,940	6.66
Total	44,156	100.00

Note:
The server was down for periods of time while essential work was being carried out in preparation for the launch of CIS Direct. A substantial number of visitors to the website are likely not to have been captured during this time. Average monthly website visits number around 60,000. Figures for July will be available in August 2004.

Departmental Publicity

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much was spent by his Department on *(a)* advertising and *(b)* public relations consultants in (i) 1996–97 and (ii) the last year for which figures are available. [185824]

Mr. Lammy: In 2003–04 the Department for Constitutional Affairs did not spend anything on advertising and public relations consultants. Figures for 1996–97 are not available since my Department only came into existence on 12 June 2003.

Departmental Staff (Upper Age Limits)

Mr. Andrew Turner: To ask the Parliamentary Secretary, Department for Constitutional Affairs whether *(a)* his Department and *(b)* agencies for which it is responsible (i) have a set retirement age which applies to all or most personnel and (ii) have a maximum age beyond which applications for employment will not be considered; and what the age is in each case. [186084]

Mr. Lammy: In the Department for Constitutional Affairs including its agencies, (i) at present all staff at Span 3 (formerly AO) and below have a normal retirement age of 65. Staff at Spans 4 and 5 (formerly EO) normally retire at age 62. Staff may stay on under the "short service concession" rule, that is if they have not completed 20 years reckonable service. The normal retirement age for all other staff is 60, although even then all staff may stay on beyond 60 if there are sound business reasons. The DCA board has recently agreed that the normal retirement age should be increased to 65 for all staff with effect from 1 April 2005, subject to consultation with the departmental trade unions. (ii) There is no set maximum age beyond which applications for employment will not be considered. Business managers compare the cost and time of training a new entrant against the length of service available.

Ineffective Trials

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much has been spent on ineffective trials in *(a)* magistrates courts and *(b)* Crown courts in each year since 1997; and for what main reasons trials prove to be ineffective. [185374]

Mr. Leslie *[holding answer 20 July 2004]:* It is not possible to provide information in the form requested. The costs of an ineffective trial separately accrue to a number of agencies (the CPS, the police, the court, defence solicitors).

However, the Crown court over the last year has cut the Ineffective Trial Performance from 23.5 per cent. to 17.3 per cent. and the magistrates court Ineffective Trial Performance has reduced from 29.5 per cent. to 26.9 per cent.

There are 15 different categories recorded for a case being ineffective in the Crown court and 13 in the magistrates court.

The most used categories have remained the same since 1997, although the order and number fluctuates. The reasons below were taken from the most recent data set (rolling quarter ending May 2004) and have been listed in numerical order (highest first).

Crown

Prosecution witness fails to attend

Defendant failed to attend—Bench Warrant Issued

Defendant not ready for trial—Further preparation needed

Prosecution not ready for trial

Defendant ill—trial stood out (did not proceed)

Floater/backer not reached (the trial fails to go ahead on the day, a substitute trial may be available replace it)

Magistrates

Prosecution witness absent

Defendant absent—Did not attend

Other

Lack of court/magistrate availability

Defence not ready

Prosecution witness absent (police officer)

Judicial Appointments Commission

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the qualifications for serving on the Judicial Appointments Commission will be. [185883]

Mr. Leslie: Schedule 12 of the Constitutional Reform Bill provides that the Commission will consist of a lay chairman, five further lay members, five judicial members, two professional members (a barrister and a solicitor), a tribunal member and a lay justice.

Of the Commissioners appointed as judicial members, one must be a Lord Justice of Appeal; one a High Court judge; one either a Lord Justice of Appeal or a High Court judge; one a circuit judge and one a district judge.

Of the others: the professional members must be a practising barrister and a practising solicitor; the lay members must never have held a listed judicial office or been a practising lawyer; the tribunal member must be the holder of an office listed in Part 3 of Schedule 14 of the Bill; and the lay justice must be a justice of the peace.

None of the members may be a member of either the House of Lords or the House of Commons, or a civil servant.

Legal Services Commission

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what money is owed to the Legal Services Commission; and what the reasons are for the Commission not having collected this debt. [185046]

Mr. Lammy: The Legal Services Commission (LSC) had debts due to it at the end of the financial year 2003–04 of £262 million. Much of this debt (around 72 per cent.) is secured by the registration of a statutory charge against property and is not, generally, immediately collectable. The LSC allows the funded client to postpone the operation of the charge, subject to certain conditions, and the debt is not repayable until the property is sold or upon the death of the client.

Cases relating to the statutory charge have since 1988 attached interest. The rate of interest is linked to the Bank of England base rate and currently stands at 5 per cent. simple interest. £50 million of the gross debt due to the Commission relates to interest.

Other debts due to the LSC are normally immediately repayable and are pursued by a dedicated debt recovery team. In 2003–04, the LSC successfully recovered £28 million worth of debt. Some of these debts may be owed by funded clients (e.g. unpaid contributions towards funding legal aid) and are difficult to recover given the limited financial circumstances of the clients.

November 9th Society

Mr. Dismore: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will raise with the Electoral Commission the plans of the November 9th Society to use the election freepost to distribute its material; and if he will make a statement. [186292]

Mr. Leslie: Any candidate at a parliamentary election, and any individual candidate or registered political party at a European parliamentary election has a statutory right to send election material to electors in the constituency or region in which they are standing. Any material must relate solely to that election and must also comply with the general law (for instance, the Malicious Communications Act, the Public Order Acts and Postal Services Act).

I understand that an organisation calling itself the November 9th Society has applied to the Electoral Commission for registration as a political party and that this is under consideration.

Partnership Initiative Budget

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs if he will list the current projects that receives funding from the Partnership Initiative Budget. [185645]

Mr. Lammy: Since its implementation in 2001, there have been two rounds of the Partnership Initiative Budget (PIB), each with a different focus, funding a total of 143 projects. Currently there are 136 projects receiving funding, 66 from round one and 70 from round two. A list of current projects with references to their lead organisation and region has been placed in the libraries of both Houses.

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs what factors are taken into consideration when deciding how funding is allocated to projects from the Partnership Initiative Fund. [185646]

Mr. Lammy: The Partnership Initiative Budget aims to provide flexible funding within the Community Legal Service Partnership (CLSP) framework to support initiatives which will have a direct impact on individuals' access to advice and information in priority categories of law, as identified locally.

In order to receive funding project bids had to meet certain criteria. They had to: further a local/regional strategy for provision of legal advice services; be either local (involving a single CLSP, or part thereof) or regional (involving more than one CLSP); relate to priority need identified in a specific CLSP needs assessment or strategic plan; relate to priority areas identified by either (i) all CLSPs covered or (ii) if covering a Legal Services Commission (LSC region, the relevant Regional Legal Services Committee; encourage partnership working particularly between previously distinct advice providers or organisations; link with other public initiatives or add value to existing schemes or provision; either hold the LSC Quality Mark (QM) or be capable of gaining the QM within a year of the project being awarded funding; have a minimum of 25 per cent. match funding (cash and in kind—excluding

unpaid staff time); ensure that a significant number of those who will ultimately benefit from a project should be financially eligible; provide value for money; be for a maximum of three years worth of funding; normally be for running costs; have an exit strategy; and demonstrate a commitment to Equal Opportunities.

Postal Ballots

Mr. Djanogly: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many people have been registered for a permanent postal vote in each constituency in the UK in each of the last three years. [185644]

Mr. Leslie: This information is not collected centrally. Individual Electoral Registration Officers may keep historical records of the number of postal voters in their registration area, though separate records are not kept of long-term postal voters and those for one election only. It is possible to apply for a postal vote at any time, and figures are not maintained on a yearly basis. Available statistics show that at the 2001 general election, 1,758,055 postal votes were issued in total (3.9 per cent. of the electorate) compared to 937,205 (2.1 per cent. of the electorate) at the 1997 general election.

Press Officers

Mr. Alan Duncan: To ask the Parliamentary Secretary, Department for Constitutional Affairs how much his Department spent on press officers, broken down by grade, in *(a)* 1996–97 and *(b)* the last year for which figures are available. [185823]

Mr. Lammy: I shall reply to the hon. Member as soon as possible.

Public Records

Lynne Jones: To ask the Parliamentary Secretary, Department for Constitutional Affairs how many files that have passed the normal 30-year closure period laid down by the Public Record Act 1958 have not been published. [184358]

Mr. Leslie: 121,923 files more than 30-years-old have been identified by the National Archives as being either closed or retained by Departments. 97,446 of these files are closed, the majority of them in order to protect personally sensitive information.

Public Relations

Dr. Cable: To ask the Parliamentary Secretary, Department for Constitutional Affairs what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183844]

Mr. Lammy: Since 12 June 2003, when the Department for Constitutional Affairs came into existence, until end March 2004 salary costs to my Department for employing public relations (all press officers) and publicity staff was £736,626.

FOREIGN AND COMMONWEALTH AFFAIRS

Asia and Europe Meeting

Mr. Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what response he has made to the decision by the EU to cancel forthcoming Asia and Europe Meeting (ASEM) meetings due to the proposed participation of the Burmese regime. [185550]

Mr. Mike O'Brien: My right hon. Friend the Foreign Secretary agreed with EU colleagues that the two ASEM meetings which were due to be held in July and in September would have to be postponed, as the EU could not participate without the 10 new EU member states, who are not yet members of ASEM.

The 10 new EU member states have applied to join ASEM at the Hanoi Summit in October, along with Cambodia, Laos and Burma. The Foreign Secretary and EU colleagues recently endorsed the appointment of Mr. Hans van den Broek as Special Envoy of the Presidency, to consult ASEM partners on an acceptable and feasible solution to handling Burma in the context of ASEM enlargement.

Burma

Mr. Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs what reports he has received concerning the ongoing State Peace and Development (SPDC) offensives in Karen and Karenni states in recent weeks; and if he will now make urgent representations to the SPDC regime in Burma concerning those offensives. [185571]

Mr. Mike O'Brien: We welcome the oral ceasefire agreement between the SPDC and the Karen National Union (KNU) and hope that this will lead to a lasting peace settlement. But we remain concerned that offensives continue.

We regularly raise our concerns on human rights in Burma with the Burmese regime including the suffering of ethnic groups such as the Karen and Karenni, most recently when I met the Burmese ambassador on 1 June.

Human rights violations have been highlighted by successive highly critical UK and EU co-sponsored UN Resolutions, most recently at the UN Commission on Human Rights on 21 April. This referred to the violations of human rights suffered in particular by persons belonging to ethnic minorities, women and children, especially in non-ceasefire areas and the situation of the large number of internally displaced persons as well as the flow of refugees to neighbouring countries. It emphasised the obligations of Burma under international law to pursue through dialogue and peaceful means the immediate suspension and permanent end of conflict with all ethnic groups in the country and to conclude a ceasefire agreement with the KNU.

Mr. Bercow: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will strengthen sanctions against the Burmese regime. [185597]

Mr. Mike O'Brien: Our policy remains as set out in the answer I gave to the hon. Member for Portsmouth, South (Mr. Hancock) on 24 May 2004, *Official Report*, column 1357W.

Cameroon

Mr. Tynan: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the arrest of BBC staff by the Cameroon authorities. [185668]

Mr. Mullin: Two BBC journalists were arrested in the Bakassi peninsula earlier this month. One was South African, the other Cameroonian. At the request of the BBC, the British High Commission in Yaounde made enquiries of the Cameroonian authorities on 12 July. The Cameroonian authorities had given the journalists permission to travel in Cameroon, but it was unclear whether their permits included the Bakassi peninsula. Partly as a result of our intervention, both journalists were released on 16 July.

Chagos Islands

Mr. Tynan: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answer of 24 June 2004, *Official Report*, column 1528W, whether persons detained by the US armed forces arriving in the Chagos islands require entry permits. [185658]

Mr. Rammell: The United States authorities have repeatedly assured us that no detainees have at any time passed in transit through Diego Garcia or its territorial waters, or have disembarked there. The Government are satisfied that these assurances are correct. The issue of entry permits for detainees arriving in the Chagos islands does not therefore arise.

Democratic Republic of Congo

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what changes there have been in the commitment by the UK Government to the United Nations Mission in the Democratic Republic of Congo in *(a)* monetary terms, *(b)* assistance in kind and *(c)* manpower under UN Security Council Resolution 1493 compared to UN Security Council Resolution 1279; what changes have taken place since 28 July 2003; and if he will make a statement. [185680]

Mr. Rammell: UK assistance to the UN Mission in the Democratic Republic of Congo (MONUC) has increased since UN Security Council Resolution 1279 of November 1999, as exigencies have dictated. Figures for 1999 are not readily available, but available figures from 2001 to UN Security Council Resolution 1493 of July 2003 show that UK commitment to MONUC has:

In monetary terms, increased from £10.7 million in 2001–02 to £18.5 million in 2002–03. In the period after Resolution 1493, i.e. in 2003–04, the UK's monetary contribution amounted to £33.8 million. It is expected to total approximately 28.7 million in 2004–05. These figures are for the UK's assessed contribution to MONUC through the UN only.

In addition to the UK's assessed contribution to MONUC through the UN, the UK also gives additional and voluntary assistance to MONUC's peacekeeping activities. In 2001–02, the UK contributed £588,000 in additional assistance to MONUC, and £669,000 in 2002–03. In the period after Resolution 1493, i.e. in 2003–04, the UK contributed £1.8 million (including £1.1 million to an EU peace support operation). The UK will likely contribute an additional £1 million to the peacekeeping effort in the Democratic Republic of Congo in 2004–05.

In terms of manpower, the UK had six officers in MONUC from 2000 to 2003, now reduced to five. The UK currently has five troops serving with MONUC. The UK also contributed a Royal Engineer squadron and two aircraft to the EU peace support operation to DRC (an interim measure lasting from June-September 2003). Also as part of the EU operation, the UK deployed staff to assist in the operation's headquarters in Paris and Entebbe. In total, the UK contributed 120 staff to the operation.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs how many personnel are authorised to be deployed with the United Nations Mission in the Democratic Republic of Congo under UN Security Council Resolution 1493; how many are deployed; and if he will make a statement. [185681]

Mr. Rammell: UN Security Council Resolution 1493 (2003), of 28 July 2003, authorised an increase of the military strength of the UN Mission in the Democratic Republic of Congo (MONUC) to 10,800 personnel. As of 31 May 2004 (the most up-to-date figures available), MONUC's military strength stood at 10,715 uniformed personnel.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what proposals *(a)* he, *(b)* members of his Department and *(c)* other members and representatives of the UK Government have made for a UN Security Council Resolution (i) to extend and (ii) to modify the mandate of the United Nations Mission in the Democratic Republic of Congo; when he expects such a resolution to be passed; and if he will make a statement. [185682]

Mr. Mullin: We are in regular discussion with the Secretariat of the United Nations about the United Nations Mission in the Democratic Republic of Congo (MONUC). We await the UN Secretary-General's report and recommendations for the future of MONUC, due on 15 August. We will consider these carefully. We expect a Security Council resolution on MONUC to be passed before the end of September.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has *(a)* sought and *(b)* had with (i) his EU member state counterparts, (ii) EU officials, (iii) his US counterpart, (iv) his African Union member state counterparts, (v) UN officials, (vi) other Foreign Ministers and (vii) members of non-governmental organisations concerning the mandate of the United Nations Mission in the Democratic Republic of Congo; what suggestions for change of the mandate were put forward during these meetings; and if he will make a statement. [185684]

Mr. Mullin: I discussed ways to improve the UN Mission in the Democratic Republic of Congo's (MONUC) effectiveness with African leaders and other members of the international community at the African Union Summit on 6 July and also during my visits to the Democratic Republic of Congo and Rwanda in June. UK officials have also discussed this with EU

partners, US and UN officials. We have received recommendations from NGOs on modifying MONUC's mandate. Possible options include increased troop numbers and a clarification of MONUC's mandate under Chapter VII. We await the Secretary-General's report and recommendations for the future of MONUC, due on 15 August. We will consider these carefully.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs who the five main contributors to the United Nations Mission in the Democratic Republic of Congo are in terms of *(a)* military observers, *(b)* military contingent, *(c)* monetary contribution and *(d)* contribution in kind; and if he will make a statement. [185685]

Mr. Rammell: The five main contributors of Military Observers to the UN Mission in the Democratic Republic of Congo (MONUC), as of 31 May 2004 are:

Country	*Numbers contributed*
India	33
Kenya and Nigeria	[1]28
Romania, Russia, Tunisia, Uruguay and Mali	[1]27
Pakistan	26
Malawi	24

[1] Per country.

The five main contributors to the MONUC military contingent, as of 31 May 2004 are:

Country	*Numbers contributed*
Uruguay	1,800
Bangladesh	1,309
South Africa	1,269
Nepal	1,226
Pakistan	1,066

The five main monetary contributors to MONUC, based on the UN's scale of assessment for July 2004 are:

Country	*Percentage of costs contributed*
USA	26.7
Japan	19.5
Germany	8.6
UK	7.4
France	7.3

The information as to amounts of contribution in kind is not readily available. But the main five contributors of civilian police to MONUC, as of 31 May 2004 are:

Country	*Numbers contributed*
Niger	19
Turkey	13
Benin	12
Cote d'Ivoire, France and Serbia and Montenegro	[1]11
Burkina Faso and Mali	[1]10

[1] Per country.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made concerning the impact of the United Nations Mission in the Democratic Republic of Congo on the security situation for civilians in *(a)* the Democratic Republic of Congo and *(b)* the eastern part of the Democratic Republic of Congo; and if he will make a statement. [185686]

Mr. Rammell: The United Nations Mission in the Democratic Republic of the Congo (MONUC) has contributed significantly to an improved security situation throughout the country, including in the east, where it has increased its presence. But there is still work needed to further improve humanitarian agencies' access to vulnerable populations and to help secure the safe return of internally displaced persons (IDPs). MONUC is also working with international donors to establish a functioning police and judicial system.

Angus Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment his Department has made of *(a)* the impact of and *(b)* which parties are participating in resource exploitation and smuggling to support the conflict in eastern Democratic Republic of the Congo; and if he will make a statement. [185692]

Mr. Mullin: Resource exploitation has been a significant contributing factor to conflict in the Democratic Republic of Congo (DRC). The UN Expert Panel reports on the Illegal Exploitation of Natural Resources and Other Forms of Wealth in the DRC, published in 2002 and 2003, provided information linking exploitation and conflict, and named several countries and companies alleged to be involved.

The UK supports initiatives to combat illegal resource extraction such as the Kimberley process and supports international efforts to help the Transitional National Government in the DRC rebuild its capacity to manage its natural resources in an efficient and transparent manner.

EU/US Summit

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what matters in respect of joint work on the clean up and disposition of surplus military nuclear materials in the former Soviet Union countries were discussed at the EU-US summit in Ireland on 26 June. [185516]

Mr. Rammell: These matters were not discussed at the EU-US Summit in Ireland.

Green Minister

Mr. Horam: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the activities of the Green Minister in the Department in financial year 2003–04. [185129]

Mr. Rammell: As the Foreign and Commonwealth Office's (FCO) Green Minister, during the financial year 2003–04 I participated fully in the cabinet committee of Green Ministers (ENV(G)) and in the Sustainable Development Task Force which first met in May 2003.

I have encouraged implementation in the FCO of the Framework for Sustainable Development on the Government Estate, including agreeing waste, procurement, and renewable energy and energy

efficiency targets. In August 2003 I inaugurated our contract with 'Greenworks', responsible for re-using and re-cycling the FCO's surplus furniture. The media were invited to attend the event to publicise the inauguration and the wider sustainability agenda. I agreed the FCO contribution to the Government response to the Environmental Audit Committee report 'Greening Government 2003', providing information on our progress towards integrating sustainable development into our policy-making, and the performance of our UK estate.

I also agreed the FCO contribution to the Government response to the House of Commons Audit Committee (EAC) October 2003 report 'World Summit on Sustainable Development 2002—from Rhetoric to Reality' on our progress towards meeting the commitments made at WSSD.

I am actively involved in the review of the 1999 UK Sustainable Development Strategy 'A better quality of life' and took part in the launch of the consultation on the new strategy earlier this year. The FCO is working with Defra, DFID and DTI to ensure that international issues are integrated into the new UK Sustainable Development Strategy.

I have also been working closely on the drafting of the FCO Sustainable Development Strategy, which we aim to launch later this year.

International Atomic Energy Agency

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs whether he asked the International Atomic Energy Agency to share with the United Kingdom the primary source documentation it holds on Iraq's interest in procuring uranium from Niger. [184385]

Mr. Rammell: No. Copies of the documentation were made available to the UK at the time that they were passed to the International Atomic Energy Agency in February 2003.

Iraq

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what instructions and guidance have been given to members of the armed forces and other United Kingdom personnel and contractors in Iraq as to the obligations imposed by *(a)* the United Nations International Covenant on Civil and Political Rights and *(b)* the United Nations Convention Against Torture and Other Cruel, Inhuman and Degrading Treatment or Punishment; and if he will make a statement. [183941]

Mr. Straw *[holding answer 20 July 2004]*: The UK armed forces are fully aware of their obligations under international law. They are given thorough mandatory training, which includes specific guidance on handling prisoners of war. All personnel must attend refresher training every year. Other UK personnel going to Iraq who are likely to be involved in activities that require an understanding of these international obligations are also given appropriate guidance.

UK staff seconded from HM Prison Service are deployed to Iraq solely to act as monitors and mentors within civil prisons run by the Iraqi Correctional Service, where all prisoners are held on remand or following conviction of criminal charges in civil courts. All HM Prison Service staff receive in-depth training on their roles and responsibilities and act at all times in accordance with international statutes and conventions.

There are no contractors employed by the UK in Iraq who have duties in detention facilities or who are involved in activities that may require an understanding of these international obligations.

Sir Menzies Campbell: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps have been taken since the occupation of Iraq to ensure that *(a)* members of the armed forces and other United Kingdom personnel and persons employed by contractors there comply with international human rights and humanitarian law, *(b)* there are effective safeguards and sanctions against abuse by contractors and *(c)* there are effective remedies for any victims of such abuse. [183942]

Mr. Straw *[holding answer 20 July 2004]*: I refer the right hon. Gentleman to the answer I gave to him today (UIN 183941).

UK armed forces personnel are subject to UK law as they would be in the UK. As in the UK or in other operational theatres, the responsibility for enforcing the law lies with the Royal Military Police. Anyone found to have broken the law is dealt with appropriately, but of course it is important to establish the facts first. This is what we are now doing with regard to allegations against UK military personnel in Iraq.

The Coalition Provisional Authority put in place a number of regulations that apply to foreign contractors in Iraq. These regulations are set out in CPA Order 17 and CPA Memorandum 17, which can be found on the CPA website at www.cpa-iraq.org.

Any claims arising from actions attributable to UK military personnel will be considered against UK national law.

Harry Cohen: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the security contractors his Department uses for operations in Iraq about them *(a)* being subject to Iraqi law and *(b)* being recipients of immunities subsequent to the transfer of sovereignty; and if he will make a statement. [184712]

Mr. Rammell: The only security contractors that the Foreign and Commonwealth Office uses in Iraq are those involved in protecting the premises and staff of our missions there. The staff provided by those contractors are accredited to our embassy in Baghdad and our embassy offices in Basra and Kirkuk and thus benefit from diplomatic status and immunities.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs (1) whether the signals intelligence from GCHQ concerning a visit by an Iraqi official to Niger, referred to in Paragraph 89 of Cm 5972, relates to the UK Government claim that Iraq sought to procure uranium from Africa; [185176]

(2) pursuant to the answer of 19 May 2004, *Official Report*, column 1085W, and 30 January 2004, *Official Report*, column 581W, on Iraq, whether the source upon which it based its claim in the September 2002 dossier, that Iraq sought to procure uranium from Africa, is the same information that it understands was discussed with the International Atomic Energy Authority before 7 March 2003; [185220]

(3) pursuant to the answer of 26 May 2004, *Official Report*, columns 1638–39W, on Iraq, between what dates the September 2002 source upon which the Government based its claim that Iraq sought to procure uranium from Africa indicated that the attempted procurement took place; [185221]

(4) pursuant to the answer of 26 May 2004, *Official Report*, column 1639W, on Iraq, whether the documentary evidence reported in June 2002, referred to in Paragraph 89 of the Intelligence and Security Committee Report, Cm 5972, upon which the Government did not rely to back up its claim that Iraq sought to procure uranium from Africa, was found to be *(a)* forged and *(b)* the same as any of the documents described as forged by the International Atomic Energy Agency on 7 March 2003; [185222]

(5) pursuant to the answer of 26 May 2004, *Official Report*, column 1639W, on Iraq, whether the Government have established the origin and history of the documents referred to as still under consideration in Paragraph 4 of the Further Supplementary Memorandum from the Foreign and Commonwealth Office, Iraqi Attempts to Procure Uranium, of July 2003, Written Evidence to the Foreign Affairs Committee, Ninth Report, HC 813-II; [185223]

(6) pursuant to the answer of 26 April 2004, *Official Report*, column 774W and 6 May 2004, *Official Report*, column 1733W, on Iraq, what form the second intelligence source reported in September 2002 took; [185226]

(7) pursuant to the answer of 26 April 2004, *Official Report*, columns 1733–34W, on Iraq, whether his reference to the intelligence that the Government understand was discussed with the International Atomic Energy Authority is to the second source referred to in paragraph 93 of the Intelligence and Security Committee's report, Iraq Weapons of Mass Destruction. [185227]

Mr. Straw: I have nothing further to add. However, my hon. Friend will be aware that Lord Butler's Inquiry reviewed the intelligence relating to this matter in detail and concluded at paragraph 503 that:

"From our examination of the intelligence and other material on Iraqi attempts to buy uranium from Africa, we have concluded that:

a. It is accepted by all parties that Iraqi officials visited Niger in 1999.

b. The British Government had intelligence from several different sources indicating that this visit was for the purpose of acquiring uranium. Since uranium constitutes almost three-quarters of Niger's exports, the intelligence was credible.

c. The evidence was not conclusive that Iraq actually purchased, as opposed to having sought, uranium and the British Government did not claim this.

d. The forged documents were not available to the British Government at the time its assessment was made, and so the fact of the forgery does not undermine it."

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what the source was of the intelligence received by the United Kingdom in 2002 in respect of alleged attempts by Iraq to purchase uranium from Niger to which reference is made at paragraph 495 of the Butler Committee report on intelligence on weapons of mass destruction. [185189]

Mr. Straw: I refer my hon. Friend to the answer I gave to my hon. Friend the Member for Birmingham, Selly Oak (Lynne Jones) today in response to series of questions on the issue of this intelligence (UINs 185176, 185220, 185221, 185222, 185223, 185226, 185227).

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs whether his Department was the source of the statement at paragraph 501 of the Butler Committee Report on intelligence on weapons of mass destruction in respect of the date on which the British Government first learned of the United States' and other states' receipt of documents alleging Iraqi attempts to secure uranium from Niger. [185190]

Mr. Rammell: The Butler Review carried out its work independently of the Government. It would not be appropriate therefore for the Government to comment on who gave what evidence to the Review. However, the hon. Member may wish to consult the report of the Intelligence and Security Committee on Iraqi Weapons of Mass Destruction—Intelligence and Assessments, paras 87–93 which also deals with this issue.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs which members of the security services briefed the Leader of the Opposition prior to the vote in the House on 18 March regarding the invasion of Iraq. [185224]

Mr. Straw: I refer my hon. Friend to the answer my right hon. Friend the Prime Minister gave to the right hon. Member for Chingford and Wood Green (Mr. Duncan Smith) in the House on 9 July 2003, *Official Report*, column 1151.

Lynne Jones: To ask the Secretary of State for Foreign and Commonwealth Affairs pursuant to his answer of 8 July 2004, *Official Report*, column 846W, on Iraq, whether Iraq's oil production was metered during Coalition Provision Authority rule; and how much oil was produced by Iraq during the Coalition's tenure. [185499]

Mr. Rammell: When the Coalition Provisional Authority (CPA) took office there were no functioning meters in the Iraqi oil system. The CPA oil team had been pressing for meters to be installed as a matter of urgency, but as of 28 June—when the CPA dissolved—the issue remained outstanding. However oil exports, either by pipeline to Ceyhan in Turkey or by tanker through the Arabian Gulf, were metered as they passed into the receiving tanks.

Oil production during the CPA's tenure for each month from June 2003 to April 2004 is shown in table 1. Weekly data from May to the beginning of July 2004 is shown in table 2.

Table 1: Iraq—average daily crude oil production

	Barrels per day (million)
2003	
June	0.453
July	0.573
August	1.053
September	1.403
October	1.753
November	1.853
December	1.952
2004	
January	2.103
February	2.003
March	2.203
April	2.303

Table 2: Iraq—average daily crude oil production

	Barrels per day (million)
2004	
30 April to 6 May	2.4
7–13 May	1.9
14–20 May	1.8
21–27 May	2.25
28 May to 3 June	2.4
4–10 June	2.3
11–17 June	2.1
18–24 June	1.15
25 June to 1 July	1.3

Adam Price: To ask the Secretary of State for Foreign and Commonwealth Affairs whether members of his departmental staff were informed in July 2003 that the Secret Intelligence Service in that month had withdrawn reporting from a source who claimed that the production of biological and chemical agents had been accelerated by the Iraqi regime, because the source of the reporting had subsequently been deemed unreliable. [185786]

Mr. Straw: We have nothing further to add to the remarks that were made in last Tuesday's debate on Iraq.

Kashmir

Andrew Mackinlay: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to *(a)* the Indian Government and *(b)* the Chief Minister of Jammu and Kashmir concerning the decision to expel Mr. Jim Borst from Kashmir. [184989]

Mr. Mike O'Brien: We believe Father Jim Borst is a Dutch citizen. It would be therefore for the Dutch authorities to act. We have alerted the Netherlands embassy in New Delhi, which is looking into his case.

Kenya

Mr. Andrew Turner: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will place in the Library evidence provided by Her Majesty's High Commissioner in Kenya to the Kenyan Government in support of his speech to Kenyan businessmen; and which company it was whose name was omitted from published versions of his remarks. [185477]

Mr. Mullin *[holding answer 20 July 2004]*: We are responding to requests for information from the competent Kenyan authorities. They have asked us not to divulge details in order to avoid prejudicing ongoing anti-corruption investigations.

No company names were omitted from the published version of the High Commissioner's speech.

Mr. Tynan: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement about the current state of relations with Kenya. [185667]

Mr. Mullin: The UK currently enjoys excellent bilateral relations with Kenya.

Mr. Jenkins: To ask the Secretary of State for Foreign and Commonwealth Affairs what the Department's assessment of the level of corruption within the Kenyan Government is. [185839]

Mr. Mullin: In its 2003 report, Transparency International judged Kenya to be the eleventh most corrupt country globally. There are certainly frequent allegations of unsatisfactory tendering and contracting procedures in which senior members of the Kenyan Government are allegedly involved. We have been pressing strongly for these to be fully investigated and firm action taken against any individual shown to have been involved in any corrupt practice. The British Government are co-operating fully with investigations.

Maldives

Mr. Gale: To ask the Secretary of State for Foreign and Commonwealth Affairs what information he has received concerning the first sitting on 19 July of the special Majlis in the Republic of Maldives; and if he will make a statement. [185800]

Mr. Mike O'Brien: We welcome the start of the Special Majlis and the opportunity this provides for the people of the Maldives and their elected representatives to consider constitutional reform. We welcome the proposals made in President Gayoom's speech of 9 June and his commitment to a free and transparent debate. The opening session was temporarily suspended after disagreement on the voting procedure for a speaker. We look to all concerned to resolve this matter as soon as possible to allow the session to begin. We will continue to follow events in the Maldives closely.

Mr. Key: To ask the Secretary of State for Foreign and Commonwealth Affairs if he will make a statement on the situation in the Maldives. [185827]

Mr. Mike O'Brien: We welcomed President Gayoom's speech of 9 June, which proposed wide ranging constitutional reforms to develop and strengthen democracy in the Maldives, including the right to establish political parties, the full separation of powers, establishing the office of Prime Minister and limiting the terms of President. We welcome President Gayoom's commitment to free and open debate, and look to the Maldivian authorities to ensure this. The Special Majlis on constitutional reform will be key. We will continue to follow events in the Maldives closely.

Middle East

Mr. Jim Cunningham: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions his Department has had with other Middle East partners and states concerning stability in the region. [185278]

Mr. Rammell *[holding answer of 21 July 2004]*: My right hon. Friend the Foreign Secretary has in the last three months spoken to the Foreign Ministers of Egypt, the Palestinian Authority and Israel, as well as EU counterparts and the US Secretary of State.

My noble Friend the Baroness Symons of Vernham Dean has recently visited Syria (8–9 June) and Israel (28–30 June). Regional issues were discussed during both of these visits.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli Government concerning the crushing to death of Ibrahim Mahmoud Khalafallah during the demolition of homes in Gaza. [185443]

Mr. Rammell: The demolition of homes is a form of collective punishment and harms innocent civilians. It fuels anger among Palestinians and makes a peaceful settlement more difficult to achieve. We continue to raise our concerns with the Government of Israel about such actions. We recognise Israel's right to defend itself against terrorism, but it must act within the parameters of international law.

We have not made specific representations to the Government of Israel concerning the death of Ibrahim Mahmoud Khalafallah.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli Government concerning the targeting of British hon. Members and Peers by soldiers of the Israeli Defence Force in June; and if he will make a statement. [185446]

Mr. Rammell: We have raised our concerns with the Israeli Government and the Israeli ambassador about the shots that were reportedly fired at a group of British Parliamentarians during their visit to Rafah on 18 June. We have asked the Israelis for an explanation.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to his colleagues in the Quartet concerning Israel's retention of settlements in the West Bank following the withdrawal from Gaza. [185447]

Mr. Rammell: The UK is represented in the Quartet (UN, US, EU, Russia) through the EU. We, EU partners and other Quartet members have made clear that Prime Minister Sharon's plan to withdraw from Gaza and part of the West Bank would provide a rare moment of opportunity in the search for peace in the Middle East. At the same time they have said that all final settlement issues, including borders, are to be decided through negotiations between the parties. The UK fully supports this position.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli Government concerning freedom of movement of Palestinians in and out of the Gaza Strip after the Israeli withdrawal from Gaza. [185448]

Mr. Rammell: As the Quartet (UN, US, Russia, EU) set out on 4 May, securing freedom of movement for the Palestinian population will be an important element in ensuring that withdrawals bring about an improved quality of life for the Palestinian people. The World Bank report of 24 June also cited improved freedom of movement as essential to development of the Palestinian economy.

We have discussed withdrawal and its implications with the parties and will continue to do so. My noble Friend the Baroness Symons of Vernham Dean discussed withdrawal with several Israeli Ministers during her visit to the region on 28 to 30 June, and made clear the importance of maximum freedom of movement for Palestinians following Israeli withdrawal from Gaza.

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Israeli Government concerning the route of the security barrier. [185492]

Mr. Rammell: As my right hon. Friend the Foreign Secretary said in the House on 13 July 2004, *Official Report*, columns 1240–41, he and my noble Friend the Baroness Symons of Vernham Dean have discussed the issue of the barrier with Israeli Ministers on many occasions. We have consistently made it clear to the Israeli Government that the barrier built on occupied territory is illegal. Most recently the Foreign Secretary discussed the issue of the barrier and the ICJ ruling with Israeli Foreign Minister Shalom on 15 July.

Parliamentary Questions

Mrs. Browning: To ask the Secretary of State for Foreign and Commonwealth Affairs when he expects to reply substantively to the question tabled by the hon. Member for Tiverton and Honiton, ref 182518. [185976]

Mr. Rammell: My right hon. Friend the Minister of State at the Foreign and Commonwealth Office (Mr. MacShane) replied substantively on 14 July 2004, *Official Report*, column 1187W.

Policies (Environmental Impact)

Mr. Horam: To ask the Secretary of State for Foreign and Commonwealth Affairs how many new policy proposals or significant changes in policy were produced in *(a)* 2002–03 and *(b)* 2003–04; how many of these were screened for their environmental impacts; and how many were the subject of separate environmental appraisals. [185101]

Mr. Rammell: In considering new policy proposals we take into account all relevant factors including the environmental impact where appropriate.

Business cases, design studies and specifications for major estate developments and contracts include an assessment of environmental impact and measures to achieve good environmental performance.

The information requested on the total number of new policy proposals and significant changes in policy proposals for the years in question is not held centrally and could be provided only at disproportionate costs.

Rwanda

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what discussions he has had with the Rwandan Government concerning the parliamentary commission in Rwanda requesting the dissolution of four civil society human rights organisations. [185442]

Mr. Mullin: We are concerned by the content and methodology of the Parliamentary Commission's report on Genocidal Ideology. We have registered our concerns with the Rwandan Government. My right hon. Friend the Secretary of State for International Development (Hilary Benn) raised this with the Rwandan ambassador on 5 July. Our Ambassador to Rwanda also discussed this report with the Minister for Good Governance on 16 July. We will continue to encourage Rwanda to open up space for the operation of civil society.

Seal Culls

Mr. Tynan: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to *(a)* his Canadian counterpart and *(b)* the Canadian Government in respect of the use of independent monitoring of seal culls. [185669]

Mr. Mike O'Brien: I spoke to the Canadian High Commissioner in April about the seal cull in Canada. I encouraged the Canadian Government in an adjournment debate on seal hunting to ensure that their monitoring regulations are implemented in practice and do not just lie on the statute book—*Official Report*, columns 219WH to 222WH. On both occasions, I also made clear this Government's view that we do not accept the need for any seal cull, but if one does take place it should be sustainable and based on a precautionary principle. The Canadian Government monitors the operation of their seal culling regulations.

Sudan

Mr. Best: To ask the Secretary of State for Foreign and Commonwealth Affairs what steps the Government is taking to resolve the situation in Darfur. [183334]

Mr. Mullin: We are urging the Government of Sudan to honour the commitments it has given to rein in the Janjaweed, remove the obstacles to humanitarian access, and facilitate deployment of the African Union-led Ceasefire Commission (AU CFC). We are urging the UN Security Council to keep the situation under review, and consider further steps if there is no significant progress soon.

The priority is to improve the security situation and to respond to the humanitarian crisis. Since September 2003, we have provisionally allocated £62.5 million to the humanitarian response, including £2 million we have contributed to the AU CFC. This makes the UK the second largest bilateral donor in Darfur.

We continue to urge all sides to meet soon to discuss a political solution.

Sustainable Energy

John Robertson: To ask the Secretary of State for Foreign and Commonwealth Affairs what recent discussions he has had with the US Department of State on sustainable energy consumption. [185361]

Mr. Rammell: My right hon. Friend the Foreign Secretary has not had any recent discussions with the US Department of State on Sustainable Energy.

Ministerial colleagues have had extensive discussions on sustainable energy with a range of US contacts including Under Secretary of State for Global Affairs, Paula Dobriansky. There are a host of on-going discussions with the US on sustainable energy. For example the Foreign and Commonwealth Office (FCO), through its Embassy in Washington, works closely with contacts in the US and Whitehall Departments on various US-led international technology partnerships. One example is the International Partnership for a Hydrogen Economy. We are also working to engage with the US on sustainable energy through the Commission on Sustainable development (CSD).

The FCO has also, in co-operation with other government departments, secured US sign-up to the Renewable Energy and Energy Efficiency Partnership (REEEP). I launched the REEEP in London in October 2003 with my right hon. Friends the Secretaries of State for Trade and Industry (Patricia Hewitt) and Environment (Margaret Beckett) and had a bilateral discussion with US Department of Energy Assistant Secretary David Garman. In April this year Paula Dobriansky (Under Secretary of State for Global Affairs) formally signed the US government up as a partner of the Renewable Energy and Energy Efficiency Partnership and agreed to contribute $50,000 a year to help fund the REEEP's International Secretariat in Vienna. Larisa Dobriansky (US Department of Energy) is also a representative on the REEEP Governing Board.

Turkey

Sandra Gidley: To ask the Secretary of State for Foreign and Commonwealth Affairs whether the issue of violence against women in Turkey was raised in the UK/Turkey Human Rights Dialogue meeting on 15 July; and if he will make a statement. [185987]

Mr. MacShane: The issue of violence against women in Turkey was raised at the fourth UK/Turkey Human Rights Dialogue on 15 July. The UK side welcomed the recent progress made by Turkey on women's rights, including on revisions made to the draft Turkish Penal Code, and the constitutional amendment asserting gender equality signed by the President in May. We encouraged them to take further steps to improve the situation of women in Turkey including through the provision of shelters, further training of the judiciary in adopting sentences commensurate with the gravity of the offence, and training of the police and gendarme in how to respond immediately and effectively to violence against women. The Turkish delegation undertook to consider the points raised.

Turkmenistan

Mr. Tynan: To ask the Secretary of State for Foreign and Commonwealth Affairs what assessment he has made of freedom of religion in Turkmenistan; and what representations he has made to the Government of Turkmenistan in respect of *(a)* freedom of Christian worship, *(b)* raids on houses and premises used by Christians and *(c)* the imprisonment of Christians for religious activities. [185659]

Mr. Rammell: We remain seriously concerned by reports of religious intolerance and human rights abuses against Christian and other religions in Turkmenistan. Religious freedom is guaranteed under the Turkmen constitution, but the requirement for religious groups to register remains a major obstacle. Religious activity in Turkmenistan remains tightly controlled and even registered religions are at best tolerated by the state.

The UK actively supports the promotion of human rights including freedom of thought, conscience, religion and belief. We remain in close touch with representatives of religious groups and NGOs in Turkmenistan to promote freedom of religion. We are aware of a number of prominent human rights cases, including allegations of religious persecution and imprisonment. We are also aware of raids on premises used by Christians, in particular, prior to autumn 2003, although none have so far been reported to our embassy in 2004. We condemn all instances where religious groups are persecuted because of their faith or belief, wherever they happen and whatever the religion of the individual or group concerned. Our ambassador in Turkmenistan together with EU and US colleagues, regularly raises specific cases of religious persecution with the Turkmen Government, and takes every opportunity to urge the pursuit of laws and practices that foster tolerance and mutual respect.

The recent decision by the Turkmen Government to decriminalise unregistered religious activity is a positive development and we welcome the registration of two religious minorities: the Baha'is and the Seventh Day Adventists.

We will continue to monitor the situation closely and push for further progress on this issue.

UN Relief and Works Agency

Dr. Tonge: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Israeli Government concerning the incident involving Peter Hansen, Director General of the UN Relief and Works Agency, when he was delivering food supplies to Beit Hanoun. [185440]

Mr. Rammell: We are concerned at the continuing levels of violence in the Occupied Territories and the resulting humanitarian impact. We have urged the Israeli Government to ensure aid agencies are able to provide humanitarian assistance to the Palestinian population. We have made clear our concern at actions which constitute excessive use of force and result in the injury and death of civilians. We have made no specific representations about the incident involving Peter Hansen.

US Senate Intelligence Committee Report

Llew Smith: To ask the Secretary of State for Foreign and Commonwealth Affairs what plans he has to evaluate the content and conclusions of the United States Senate Intelligence Committee report on the US Intelligence Community's Prewar Intelligence Assessments on Iraq, published on 9 July, in so far as they are relevant to the United Kingdom policies on intelligence. [184384]

Mr. Straw: This is a matter for the US authorities.

Vietnam

Mr. Drew: To ask the Secretary of State for Foreign and Commonwealth Affairs what representations he has made to the Government of Vietnam concerning the arrests of *(a)* Nguyen Hieu Nghia, Nguyen Thanh Nhan, Pham Ngoc Thach and Nguyen Van Phuong on 2 March in Ho Chi Minh City, *(b)* Le Thi Hong Lien on 3 July in Ho Chi Minh City, *(c)* Ly Chin Sang, Ly Sin Quang, Vang Chin Sang and Vang My Ly in late 2003 and now in prison and *(d)* Father Nguyen Van Ly in 2001 and serving a five year sentence; and what representations he has made concerning (i) the treatment of Nguyen Thanh Nhan and Pham Ngoc Thach when they were detained in police stations and (ii) the conditions in prison for Christians. [185065]

Mr. Mike O'Brien: With EU partners, we participate in a regular EU-Vietnam Human Rights Dialogue with Vietnam. The last meeting, attended by our ambassador in Hanoi, was held on 22 June. Freedom of religion and the plight of unlicensed Christian groups were among the issues raised by the EU. We also raised our concerns regarding fair trials and prison conditions in Vietnam.

The EU maintains a list of prisoners/detainees of concern in Vietnam, which currently includes Father Nguyen Van Ly.

We are currently investigating, with EU partners, events surrounding the reported arrest of Rev. Nguyen Hong Quang and some of his followers in Ho Chi Minh City earlier this year including Nguyen Hieu Nghia, Nguyen Thanh Nhan, Pham Ngoc Thach and Nguyen Van Phuong.

Zimbabwe

Mr. Weir: To ask the Secretary of State for Foreign and Commonwealth Affairs what assistance the Government offer to UK citizens living in Zimbabwe who wish to return to the UK. [184113]

Mr. Mullin: We offer UK nationals living in Zimbabwe the same assistance as we would to UK nationals living in any other country. If requested, we can contact relatives or friends in the UK to ask for financial or other assistance. We may also be able to help with travel documents. We can provide information on such things as state benefits, health and education services, citizenship and employment, and inform returning UK nationals about the options available to them on return to the UK.

DEPUTY PRIME MINISTER

Additional Households

Mr. Lilley: To ask the Deputy Prime Minister (1) how many additional households he estimates will be created in the South East region including London and the South, South West and Eastern regions between *(a)* 2001 to 2011 and *(b)* 2021 to 2031 as a result of (i) the reduction in the average number of people per household, (ii) the excess of births over deaths among those residents in 2001, (iii) net immigration from the rest of the UK including subsequent births less deaths and (iv) net immigration from outside the UK including subsequent births less deaths; [185814]

(2) how many additional households he estimates were created in the South East region including London and the South, South West and Eastern regions in each of the last two decades as a result of *(a)* the reduction in the average number of people per household, *(b)* excess of births over deaths among the initially resident population, *(c)* net immigration from other parts of the UK including subsequent births less deaths and *(d)* net immigration from outside the UK including subsequent births less deaths; [185815]

(3) how many additional households he estimates were created in the UK in each of the last two decades as a result of *(a)* the reduction in the average number of people per household, *(b)* the excess of births over deaths and *(c)* the excess of immigration over emigration including subsequent births less deaths; [185816]

(4) what change in the number of households created in the UK between *(a)* 2001 to 2011 and *(b)* 2021 to 2031 he estimates will result in (i) changes in the average number of people per household, (ii) the difference between births and deaths from the population resident in 2001 and (iii) the difference between immigration over emigration including subsequent births less deaths. [185817]

Keith Hill: The information is not available at present. We will write our reply when we are able to produce the required statistics.

Postal Ballots

Mr. Hammond: To ask the Deputy Prime Minister whether the Government intends to publish a consultation on the roll-out of all postal ballots this year. [186122]

Mr. Raynsford: The Government intend to make a decision on this matter once it has the benefit of the Electoral Commission's evaluation of the all-postal pilots held in June 2004 in the north-east, north-west, east midlands, and Yorkshire and the Humber regions under the European Parliamentary and Local Elections (Pilots) Act 2004.

Accessibility Planning Projects

Sir Sydney Chapman: To ask the Deputy Prime Minister what progress has been made since January 2004 with accessibility planning pilot projects and the development of accessibility indicators; and what plans he has to produce further guidance on how to incorporate community infrastructure projects, including schools, hospitals and open space, into masterplans and other spatial plans for the Thames Gateway. [185820]

Keith Hill: The Department for Transport completed the eight accessibility planning pilots in April 2004. Six core accessibility indicators have been agreed, which include access to education and health care (two indicators each) and access to jobs and major retail centres. Each English Local Transport Authority outside London will report against these indicators as part of their next Local Transport Plan. The indicators and the findings of the pilots will also inform the development of planning policy guidance. In addition the Office of the Deputy Prime Minister is developing an accessibility indicator for local planning authorities, as part of their annual monitor reporting requirements under section 35 of the Planning and Compulsory Purchase Act 2004.

The Government will shortly be publishing policy guidance in respect to Regional Spatial Strategies (Planning Policy Statement 11) and Local Development Frameworks (Planning Policy Statement 12) which will apply in Thames Gateway as elsewhere. In particular, the latter will set out guidance in respect to masterplans and other forms of area action plan, explaining how local planning authorities should adopt a spatial approach to development which incorporates the need for community infrastructure including schools and hospitals.

In the Thames Gateway the Government will also be issuing guidance to local delivery vehicles that are currently being established in priority development areas. This guidance will focus on the development of sustainable communities in line with the principles set out in "Sustainable Communities : building for the future", including the need to work with relevant local service providers to plan for the delivery of schools, healthcare provision and good quality public spaces alongside housing growth.

Brent Council Properties

Sarah Teather: To ask the Deputy Prime Minister how many previously non-Brent tenants moved into Brent Council properties in each year since 1997; and how many of these were families with children. [186297]

Keith Hill: Information on the number of Local Authority dwellings let through mobility arrangements since 1997–98 in Brent is tabled.

Lettings under mobility arrangements include the Housing Organisation Mobility Exchange Service (HOMES) and other similar schemes. The majority of households transferring under these schemes will come from outside the local authority boundary, but may include Registered Social Landlord tenants moving to Local Authority dwellings within Brent. Information on the number of families with children cannot be distinguished in the data.

Both mutual exchanges, and lettings made directly from the housing waiting list may also include households from outside the Brent area, but these households and those that are families with children cannot be distinguished.

LA dwellings let through mobility arrangements in Brent

1997–98	19
1998–99	16
1999–00	10
2000–01	20
2001–02	3
2002–03	11

Source:
ODPM's Housing Investment Programme Return

Sarah Teather: To ask the Deputy Prime Minister how many local authority-owned properties in Brent do not meet the Government's decent homes standard; and what the estimated cost is of bringing them up to this standard. [186298]

Keith Hill: In their Business Plan Statistical Appendix Brent reported that 5,211 local authority-owned properties did not meet the Government's decent homes standard at April 2003. Based on an assessment of their costs presented at the time of their bid their Arms Length Management Organisations have been allocated £33.8 million to date to bring properties up to decent homes.

Departmental Advertising

Dr. Cable: To ask the Deputy Prime Minister how much money was spent on advertising and promotional literature for his Department's initiatives, broken down by year since 1997. [183809]

Phil Hope: The Office of the Deputy Prime Minister was created on 29 May 2002.

In the financial year 2002–03 the Office of the Deputy Prime Minister spent £3,347,000 on advertising, the majority on the Fire Safety campaign, and approximately £700,000 on promotional literature.

In the financial year 2003–04 the Office of the Deputy Prime Minister spent £3,411,000 on advertising, the majority on the Fire Safety campaign, and approximately £650,000 on promotional literature.

Figures for the Department's agencies and non-departmental bodies are not held centrally and could be supplied only at disproportionate cost.

Departmental Mobile Phones

Mrs. Spelman: To ask the Deputy Prime Minister what the *(a)* capital and *(b)* running cost of mobile phones to his Department was in each year since 2001. [185775]

Phil Hope: The Office of the Deputy Prime Minister was created on 29 May 2002. Mobile phone costs are funded from budgets held within divisions, and they cannot be disaggregated from other communications costs.

Departmental Publicity Staff

Dr. Cable: To ask the Deputy Prime Minister what the salary costs to the Department were for employees working in public relations and publicity in each year since 1997. [183857]

Phil Hope: The Office of the Deputy Prime Minister (ODPM) was created following the machinery of government changes on 29 May 2002.

The salary costs for employees working in the Office's Directorate of Communication were £2.627 million in 2002–03 and £2.751 million in 2003–04.

Departmental Spending (Utilities)

Mr. Edward Davey: To ask the Deputy Prime Minister how much *(a)* his Department and *(b)* agencies of the Department have spent on (i) electricity use and (ii) water and sewerage services for each year since 1997. [182899]

Phil Hope: Since the Office of the Deputy Prime Minister was created in May 2002, the costs of electricity and water and sewerage services for the Office and its agencies is tabled as follows:

£

	(a) ODPM (including Government Offices)	*(b) Agencies*	*Total cost*
Electricity 2002–03	606,809	562,590	1,169,399
Electricity 2003–04	740,191	782,454	1,522,645
Water and sewerage 2002–03	110,570	106,883	217,453
Water and sewerage 2003–04	74,923	120,758	195,681

The figures for 2003–04 are indicative as they have yet to be independently verified by the Building Research Establishment. The agreed figures will be included in the forthcoming Sustainable Development in Government Report 2003–04 to be published by Department of Environment, Food and Rural Affairs.

Although the Office of the Deputy Prime Minister has overall responsibility for the buildings occupied by Government Offices, they carry out functions on behalf of 10 Government Departments.

Departmental Vehicles

Mr. Kidney: To ask the Deputy Prime Minister how many road vehicles are operated by the Department and its agencies; how many personal injury accidents involving road vehicles operated by the Department have occurred within each of the last five years; and what the Department's policy is for managing work-related road safety. [185918]

Phil Hope: The Office of the Deputy Prime Minister and its agencies operate six road vehicles. The Government offices for the regions operate a further 57 vehicles.

There have been no personal injury accidents involving road vehicles operated by the Office of the Deputy Prime Minister, its agencies or the Government offices since the Office of the Deputy Prime Minister was created in May 2002.

The Office of the Deputy Prime Minister, its agencies and the Government offices provide training in road safety to all staff who operate road vehicles. In addition guidance and advice, based on current best practice, is made available and disseminated in printed and electronic form to all staff.

The Office of the Deputy Prime Minister has overall responsibility for Government offices they carry out functions on behalf of 10 Departments.

English Partnerships

Sue Doughty: To ask the Deputy Prime Minister what *(a)* change and *(b)* percentage change there has been in English Partnerships' allowance for remediation costs in its 2004–05 budget, to meet anticipated additional costs arising from the implementation of the next phase of the Landfill Directive. [184947]

Keith Hill: I refer the hon. Member to the answer given on 21 July 2004, *Official Report*, column 321W.

Government Office for London

Ms Buck: To ask the Deputy Prime Minister what the percentage change in the Government Office for London's *(a)* running costs and *(b)* projected expenditure has been in each year since 1999 to 2000. [185325]

Phil Hope: Government Office for London (GOL) Running Cost (admin) expenditure and percentage change is as follows:

	£ million	Percentage change
1999–2000	16.0	n/a
2000–01	13.2	-17.5
2001–02	13.2	0.0
2002–03	14.1	6.8
2003–04	16.7	18.4
2004–05	18.1	8.4

Note:
The expenditure figure for 2004–05 reflects the anticipated end-year outturn.

Ms Buck: To ask the Deputy Prime Minister if he will list programmes managed by the Government Office for London in 2004–05, indicating in each case *(a)* the total funding and *(b)* the anticipated end date of the programme. [185327]

Phil Hope: The following table shows the Programmes managed by Government Office for London in 2004–05. The Office of the Deputy Prime Minister is still waiting confirmation of some of the Home Office allocations (allocation field '—'). The Office of the Deputy Prime Minister has only been informed of one end date (for New and Renewable Sources of Energy, which will end in September 2004). It is anticipated that the others will continue in 2004–05 and we will be notified closer to the new financial year (2005–06) as to whether or not the Programmes will cease.

2004–05

Sponsor department	Programme budgets	Allocation (£)

Total		4,093,865,754

Homeless Persons

Tom Cox: To ask the Deputy Prime Minister how many homeless people are estimated to be living in the Greater London area; and if he will make a statement. [185350]

Phil Hope: Information collected about local authorities' actions under homelessness legislation is in respect of households, rather than persons. Estimates of the number of households accepted as eligible for assistance, unintentionally homeless and in priority need, by London boroughs during 2003–04, and the number of homeless households in temporary accommodation in London as at the end of March 2004, is tabled as follows.

Homeless households in London: 2003–04

	Date	Number
Households accepted as homeless[1]	2003–04	31,530
Households in temporary accommodation[2]	31 March 2004	59,170

[1] Households eligible under homelessness legislation and found to be unintentionally homeless and in a priority need category.
[2] Households in temporary accommodation arranged by London boroughs pending inquiries, or after being accepted, under homelessness legislation.
Source:
ODPM P1E homelessness returns (quarterly)

Housing Improvement

Dr. Iddon: To ask the Deputy Prime Minister what the latest figure is for the average cost per unit of *(a)* improving a local authority-owned home to the Government's Decent Homes Standard and *(b)* the equivalent cost for a former local authority home that has been transferred into alternative management and/or ownership through (i) the private finance initiative, (ii) an arm's length management organisation and (iii) large scale voluntary transfer. [184107]

Keith Hill: The Office of the Deputy Prime Minister does not hold comparative information for the cost of making homes decent under the different forms of management. As the data were derived from different sources and in some cases covers more than the cost of making homes decent as they include costs to prevent deterioration as well as costs associated with work which falls outside the decent homes standard. Costs also depend on the condition of the homes owned.

(a) £6,100 is the average need to spend per dwelling to make homes decent reported by local authorities.

(b) (i) £1,370 is the average unit cost per year for 30 years for properties in a PFI scheme. PFI is used by local authorities to tackle a small number of their most challenging stock and as such unit costs are higher than the national average.

(ii) £6,889 per dwelling is the average bid for by ALMOs on rounds 1 to 4 to make homes decent.

(iii) £8,200 per dwelling for improvements is the average amount levered in from the private sector under LSVT.

Housing Investment

Mr. Chris Smith: To ask the Deputy Prime Minister what funding made available in each year since their inception for *(a)* the Neighbourhood Renewal Fund for the London Borough of Islington and *(b)* the EC1 New Deal for Communities; and what projected funding is in future years for each. [184726]

Phil Hope: The information is as follows:

Neighbourhood Renewal Fund resources

	£
2001–02	3,136,000
2002–03	4,703,000
2003–04	6,270,000
2004–05	8,052,735
2005–06	10,726,788

EC1 New Deal for Communities partnership

	£
Phase 1	
1999–2000	10,000
Phase 2	
2000–01	400,000
Phase 3—Delivery	
2001–02	910,000
2002–03	2,280,000
2003–04	6,289,800
2004–05	5,795,500
2005–06 to 2009–10	36,624,700

Mr. Mole: To ask the Deputy Prime Minister if he will make a statement on Government investment in housing in the next financial year. [185386]

Keith Hill: The Office of the Deputy Prime Minister currently plans to provide £5.4 billion for capital investment to housing, including the growth areas, in 2005–06. This includes an estimated £1.4 billion for the Major Repairs Allowance for undertaking on-going capital works to council housing and £4 billion for investment programmes set out in the Sustainable Communities Plan. The bulk of the latter funding is provided through the Regional Housing pots to the Housing Corporation's main investment programme and to local authorities, following recommendations made by the Regional Housing Boards. Other large programmes include resources for local authorities which have set up Arms Length Management

Organisations, Market Renewal Pathfinders and Thames Gateway and other growth areas. The day to day costs of maintaining and managing social housing, which are largely met from rents, are not included in the figures, nor are the non capital housing programmes.

Housing Quality Forum

Sir Sydney Chapman: To ask the Deputy Prime Minister if he will set out the work programme of the Housing Quality Forum; and if he will make a statement on the role of the Forum in delivering the policies set out in the Sustainable Communities Plan. [185818]

Keith Hill: The Housing Quality Forum, which is a partnership between ourselves the Commission for Architecture and the Built Environment (CABE), English Partnerships and the Housing Corporation, exists to facilitate a continuing debate about approaches to creating sustainable communities in the Housing Growth Areas, to champion new solutions to improving design quality and to build consensus among the private and public sector partners charged with delivery. The Forum meets twice a year and is attended by representatives from local authorities, housing associations, housing developers, regional agencies and local delivery vehicles.

The first meeting, attended by 120 delegates, was held in March 2004, and the second in October 2004 will address issues relating to the delivery of good quality design, disseminate emerging best practice advice and present exemplary development projects in the Housing Growth Areas. More broadly, the focus will be on wider strategies for making successful places, with themes such as public open space strategies and social and cultural infrastructure that form key elements of successful and sustainable communities.

Housing Stock/Supply

Sarah Teather: To ask the Deputy Prime Minister how much has been spent by each London borough in each year since 1997 on *(a)* refurbishment, *(b)* redecoration and *(c)* renewal of its directly-owned housing stock; and what the average spending per property in each authority was each year, excluding the amount spent on central Government schemes including the New Deal. [186296]

Keith Hill: Information is not held centrally and could be provided only at disproportionate cost on the amount spent on refurbishment, redecoration and renewal of local authority owned dwellings, nor can the average spent per local authority dwellings be calculated.

Mr. Hayes: To ask the Deputy Prime Minister what discussions he has had with the Chancellor of the Exchequer regarding increases in housing supply; and if he will make a statement. [183471]

Keith Hill: On 17 March 2004, Kate Barker reported on the review of housing supply that my right hon. Friend the Chancellor of the Exchequer and my right hon. Friend the Deputy Prime Minister had asked her to carry out. HM Treasury and the Office of the Deputy Prime Minister (ODPM) published a joint response on the same day, accepting her central recommendation that there should be a step change in housing supply, and committing to detailed consideration of her recommendations by working together over the next 12 to 18 months.

On 13 July, my right hon. Friend the Deputy Prime Minister confirmed the outcome of the Spending Review settlement for the Office of the Deputy Prime Minister which will support investment made in previous Spending Reviews to deliver the Sustainable Communities Plan. Over the five years to 2008, the Office of the Deputy Prime will spend £38 billion to tackle housing shortages in the South and low housing demand areas in the North and Midlands. This commitment includes a 50 per cent. increase in new social house building each year, providing homes for people who most need them.

Key Workers (Housing)

Mr. Edward Davey: To ask the Deputy Prime Minister which groups of key workers can benefit from the Key Worker Living scheme in each *(a)* of the scheme zones and *(b)* English region. [184140]

Keith Hill: The Key Worker Living (KWL) scheme is operating in the London, South East and East regions of England. The following public sector groups are eligible to apply for assistance across all three regions: nurses and other NHS clinical staff; teachers in schools and further education colleges; probation officers; social workers; occupational therapists; educational psychologists; and speech and language therapists. Certain prison staff are eligible to apply across all three regions as are retained fire-fighters and whole-time junior fire officers within participating fire and rescue services and police officers, together with some civilian staff, in participating police forces. In London, local authority planners are also eligible to apply.

The greater London region is broken down into five areas for which three zone agents are working together as a partnership. South East England is covered by a zone agent consortium. Eastern region is broken down into four areas.

In addition to KWL, there is a key worker scheme particular to the South West region which was established by the South West Housing Body. Under the South West initiative, the definition of key workers is derived from a local assessment of need aimed at ensuring communities remain sustainable and that essential public services are maintained.

Lost/Stolen Departmental Property

Mrs. Spelman: To ask the Deputy Prime Minister if he will list the items that his Department has reported lost or stolen to the police from his Department's buildings and property since 2001. [185782]

Phil Hope: The information requested is not held centrally and could be provided only at disproportionate cost.

Night Shelters

Tom Cox: To ask the Deputy Prime Minister how many night shelter beds there are in the Greater London area. [185349]

Phil Hope: This information is not held centrally and could be provided only at disproportionate cost. However, the Office of the Deputy Prime Minister knows that there are around 2,750 quick access bedspaces in London hostels together with a further 13,300 bed spaces in longer stay hostels for homeless people. Some 100 people are accommodated each night in rolling shelters designed to help rough sleepers move quickly away from the streets. Other night shelters are managed predominantly by faith based organisations particularly during the Winter.

Objective 2 Funds

Mr. Cousins: To ask the Secretary of State for Trade and Industry whether Government North East had failed to spend any allocations of European support under Objective 2 as at 31 December 2003; whether any fine was imposed; and what the profile of spending was for the 2004 calendar year. [185589]

Mr. Raynsford: The Objective 2 spending targets for 2003 were met therefore no funds were lost. The ERDF element of Objective 2 is set to achieve its 2004 spend target of £153.42 million. While progress against the ESF spend target of £33.9 million has been slow, measures have been implemented to accelerate spending in the remainder of the year.

Parks and Green Spaces (Safety/Security)

Dr. Stoate: To ask the Deputy Prime Minister (1) what policy measures have been introduced by his Department to protect and enhance the safety and security of the users of municipal parks and urban green spaces; [185792]

(2) what guidance his Department has issued to local authorities and other agencies responsible for the maintenance and management of municipal parks and urban green spaces regarding the promotion of the safety and security of park and green space users. [185793]

Keith Hill: The policies of the Office of the Deputy Prime Minister for protecting and enhancing the quality of parks and green spaces are set out in Living Places—Cleaner, Safer, Greener (2002) and Sustainable Communities—building for the future (2003). Working closely with local authorities and other agencies to creating safe and secure spaces that people will want to use is a key objective of our policies, which include, for example:

publication of 'Safer Places—the planning system and crime prevention', which shows how positive planning can contribute to crime prevention and to the creation of safer places;

creation of CABE Space to assist local authorities and promote good practice on planning, designing, management and maintenance of urban green space; and

publication of Living places—Caring for Quality, which advises managers of best practice in creating and maintaining safe spaces.

The Office of the Deputy Prime Minister is working closely with the Home Office through its Together—tackling anti-social behaviour action plan to prevent and reduce crime and disorder in public spaces.

Private Rented Sector

Mr. Love: To ask the Deputy Prime Minister (1) what his Department is doing to stimulate investment in the private rented sector to boost affordable housing options; and if he will make a statement; [186108]

(2) what discussions his Department is having with the investment and regulatory housing sector in relation to delivering affordable privately rented accommodation; and if he will make a statement; [186128]

(3) if he will make a statement on his Department's work on the *(a)* planning and *(b)* production of affordable rental housing. [186129]

Keith Hill: The Office of the Deputy Prime Minister set out a radical reform programme in our "Sustainable Communities Plan", which was published on 5 February 2003, to increase the provision of affordable housing, including through increased investment, improvements to the planning system and the establishment of four growth areas to provide an additional 200,000 homes. As a result of the Spending Review announced last week, the Government will more than double spending on new affordable housing since 1997 up to £2.25 billion. This funding will provide an extra 10,000 social rented homes a year by 2008—a 50 per cent. increase—to help tackle homelessness.

The private rented sector also has an important role to play in providing affordable accommodation for those who cannot afford to buy their own homes, the growingnumber of students and single person households. The sector offers a flexible form of tenure to young professionals. It contributes to greater labour market mobility, the efficient functioning of the housing market and to the success of the wider economy.

The Government believe that there is scope for the private rented sector to make a bigger contribution to meeting individuals' housing needs. The Office of the Deputy Prime Minister is seeking to encourage this including through consultation on the promotion of investment in commercial property and the private rented sector by removing the tax disadvantages currently faced by institutions. In addition, the Housing Bill seeks to raise quality, especially of management, in some of the worst parts of the private rented sector, where the most vulnerable members of society frequently bear the brunt of some of the poorest conditions and services.

The Office of the Deputy Prime Ministers proposed update to Planning Policy Guidance Note No. 3 (PPG3) titled "Influencing the size, type and affordability of housing", due to be published in October 2004, includes the requirement that local planning authorities should address the housing requirements of the whole community by ensuring a better match between a community's housing needs and supply. It requires that all local planning authorities must have policies on affordable housing to help deliver affordable housing where it is needed. Local authorities are increasingly looking to the private rented sector as a means of meeting housing need.

Rate Relief (Small Businesses)

Brian Cotter: To ask the Deputy Prime Minister pursuant to his answer of 21 June 2004, *Official Report*,

column 1236W, on the rate relief scheme, if he will place in the Library a list of hon. and right hon. Members who have written to his Office regarding the Government's new rate relief scheme for small businesses. [182504]

Phil Hope: A list of those hon. and right hon. Members who, according to our records, have written to the Office of the Deputy Prime Minister between 18 September 2003 and 18 June 2004 regarding the Government's rate relief scheme for small businesses, has been tabled as follows.

Regional Chambers

Mrs. Spelman: To ask the Deputy Prime Minister (1) whether regional chambers are required to produce performance indicators for central Government; [184978]

(2) to what public service agreements and targets set by central Government regional chambers are subject; [184979]

(3) what offices outside the United Kingdom are maintained by regional chambers; and what the cost of maintaining each one was in the last financial year for which figures are available. [184983]

Mr. Raynsford: Regional chambers are voluntary, independent bodies that have certain designated functions for which they receive Government grant support. They also receive funding from other sources, including the local authorities within their regions. As part of the condition for Government grant the chambers must produce an annual business plan. These set out their objectives and proposed outcomes relating to their responsibilities for scrutiny of the Regional Development Agencies, as the Regional Planning Body, advocacy of their region and the development of their strategic regional role. The business plans are submitted to the Government before funding agreements are issued to chambers for the relevant financial year.

The chambers claim grant on a periodic basis and each claim must be accompanied by a report detailing the activities undertaken and outcomes achieved through the receipt of Government grant in the preceding period. They are not required to report against common performance indicators. Nor do they report performance against any public service agreements or targets.

Each chamber makes a contribution with regional partners, including the regional development agency and regional local government association, towards an office outside the United Kingdom. Details of the cost incurred by each chamber are:

Chamber	Location of Office or Representation	Cost of Maintenance (£)	Explanation of Cost	Source of Funding
East	Brussels	321,740.00	Contribution to maintenance of office	Non-ODPM funding
East Midlands	Brussels	5,000.00	Contribution to maintenance of joint office	ODPM funding
North East	Brussels	94,700.00	Contribution to maintenance of joint office	Non-ODPM funding
North West	Brussels	20,000.00	Contribution to maintenance of joint office	Non-ODPM funding
South East	Brussels	37,050.00	Contribution to maintenance of joint office	Non-ODPM funding
South West	Brussels	12,316.35	Contribution to maintenance of joint office	ODPM funding

Chamber	Location of Office or Representation	Cost of Maintenance (£)	Explanation of Cost	Source of Funding
West Midlands	Brussels	6,051.00	Contribution to maintenance of joint office	ODPM funding
Yorkshire and the Humber	Brussels	250,000.00	Contribution to maintenance of joint office	Non-ODPM funding

[1] 2004-05.

Rent Arrears (London)

Tom Cox: To ask the Deputy Prime Minister what the current level of rent arrears is in each London local authority; and if he will make a statement. [185346]

Phil Hope: Estimated total arrears of council rents at 31 March 2004, as reported by each local authority in London, were as follows:

£000

Local authority	Rent arrears owed by: Current tenants	Former tenants	Total arrears
Barking and Dagenham	2,232	465	2,697
Barnet	956	1,020	1,975
Brent	2,201	1,559	3,761
Camden	3,583	2,049	5,632
City of London	112	75	187
Croydon	1,927	1,991	3,918
Ealing	3,681	3,953	7,634
Enfield	2,187	980	3,167
Greenwich	7,980	9,700	17,679
Hackney	13,747	8,109	21,856
Hammersmith and Fulham	3,393	523	3,916
Haringey	5,000	2,049	7,049
Harrow	712	666	1,377
Havering	883	780	1,662

Note:

Some of the totals do not appear to be the sum of the parts. This is because of rounding.

Source:

Unaudited figures from the "First Advance Claim Form 2004–5", which forms part of the "Entitlement to Housing Subsidies and Grants" survey that is administered by the Office of the Deputy Prime Minister.

A 2003 Audit Commission report on local authority housing rental income found that the performance of rent arrears services had been judged by housing inspectors to be weak relative to other housing services. Based on these findings a number of recommendations have been put forward for improving the prevention and management of arrears:

1. Local authorities should have clear, effective rent arrears strategies in place to prevent, manage and recover arrears.

2. Where tenants are in financial difficulties or are vulnerable, authorities should consider a range of methods for preventing and dealing with arrears, before considering legal action to recover debts. These include access to information and support; debt counselling; liaison with housing benefits sections; and debt management plans to enable tenants to sustain their tenancies and repay their arrears.

Tenant Representation

Dr. Iddon: To ask the Deputy Prime Minister pursuant to the Audit Commission's report, 'Improving Services Through Resident Involvement', if he will recommend a change of policy on *(a)* tenants' membership of boards of arms length management organisations and large scale voluntary transfer associations and *(b)* stock transfer; and if he will make a statement. [184882]

Mr. Raynsford: The Audit Commission's Report on 'Improving Services through Resident Involvement' provides clear evidence of the benefit that resident involvement can have on improving housing services. In the light of the recommendation made the Office of the Deputy Prime Minister will consider whether any changes are necessary to advice on and support for resident board membership in housing transfer registered social landlords and arms length management organisations.

Thames Gateway

Sir Sydney Chapman: To ask the Deputy Prime Minister what assessment he has made of the *(a)* adequacy of and *(b)* consistency with the policy objectives set out in the Sustainable Communities Plan standard of architectural design in new housing developments in the Thames Gateway. [185821]

Keith Hill: New housing development in the Thames Gateway will be expected to comply with existing planning policies, as is the case for development elsewhere in the country. Planning Policy Guidance Note 1 (PPG1) on 'General Policy and Principles' requires that "good design should be the aim of all those involved in the development process and should be encouraged everywhere". This policy is supported by the Office of the Deputy Prime Minister's good practice guidance 'By Design' and 'Better Places to Live'. Planning Policy Guidance Note 3 (PPG3) on 'Housing' places a considerable emphasis on securing well-designed residential developments of the highest standard.

High quality design is crucial to the delivery of sustainable communities. Projects that the Office of the Deputy Prime Minister (ODPM) is funding in the Thames Gateway have been selected against thematic objectives, one of which is "to implement a consistent policy of quality design". We have also increased funding for the Commission for Architecture and the Built Environment (CABE), who launched the Growth Areas Housing Quality Forum in March 2004 to

disseminate best practice on housing design. Major developments in the Thames Gateway, such as the Greenwich Millennium village, have already used urban design codes to provide certainty to developers and the community as to what constitutes acceptable design quality. The Office of the Deputy Prime Minister is in the process of identifying other potential sites in the Gateway to pilot further urban coding schemes.

Travel Costs

David Davis: To ask the Deputy Prime Minister if he will list the travel costs incurred by (*a*) his Department and its predecessors and (*b*) each Minister within his Department, for each of the last 10 years. [175656]

Phil Hope: The Office of the Deputy Prime Minister was formed on 29 May 2002.

(*a*) The travel and subsistence costs incurred by the Office of the Deputy Prime Ministers (ODPM) employees in each financial year are as follows:

	£000
2002-03	4,313,010.44
2003-04	4,928,250.91

(*b*) UK travel costs (air and rail fares) incurred by the ODPM Ministers since June 2002 to 31 March 2004 are as follows:

	£000
Deputy Prime Minister:	5,079.60
Nick Raynsford:	4,860.90
Lord Rooker:	2,276.10
Chris Leslie:	2,537.90
Phil Hope:	3,458.80
Barbara Roche:	3,842.60
Keith Hill:	1,078.80
Tony McNulty:	5,775.00
Yvette Cooper:	1,947.20

Information for earlier years in respect of both (*a*) and (*b*) could only be obtained at disproportionate cost and in some cases will no longer be held.

In respect of overseas travel by Ministers, since 1999 the Government has published an annual list of all visits overseas undertaken by Cabinet Ministers costing £500 or more during each financial year. The Government has also published on an annual basis the cost of all Ministers' visits overseas. Copies of the lists are available in the Libraries of the House. These reports information reaching back to 1995–96. Information for earlier years could only be obtained at disproportionate cost and in some cases will no longer be held. Information for 2003–04 will be published in due course

Urban Capacity Studies

Sir Sydney Chapman: To ask the Deputy Prime Minister which local authorities in the Thames Gateway have completed an urban capacity study; when the most recent one in each local authority area was completed; and which of these studies were undertaken according to the best practice guidance set out in "Tapping the Potential", December 2000. [185819]

Keith Hill: Urban capacity studies for local authorities in the London part of the Thames Gateway have been undertaken as part of larger London-wide capacity work. The latest London-wide urban housing capacity study was undertaken by the London Planning Advisory Committee in 1997 and published by the GLA in 1999. The approach taken by the London Planning Advisory Committee in their study informed the methodology for urban capacity studies set out in the Planning Policy Guidance Note 3: "Tapping the Potential document".

All four local authorities in the Kent part of the Thames Gateway are signed up to Kent County Council's protocol for producing urban capacity studies, which is in line with the methodology set out in Planning Policy Guidance Note 3. Gravesham Borough Council published their urban capacity study in 2000, Dartford Borough Council in 2002 and Swale Borough Council in 2003. Medway Council expect to complete their urban capacity study later this year.

Each of the urban capacity studies carried out by local authorities in the Essex part of the Thames Gateway were undertaken in line with Planning Policy Guidance Note 3. Rochford Borough Council completed their urban capacity study in 2001, and plan to review this in the latter half of next year. Urban capacity studies for Southend-on-Sea Borough Council and Thurrock Council were completed in 2003. Both Basildon and Castlepoint completed urban capacity studies in 2004.

Urban District Councils

Bob Spink: To ask the Deputy Prime Minister what the current status of an urban district council in England is; and when this status changed. [186227]

Mr. Raynsford: Urban district councils were abolished during the reorganisation of local government in 1974. The Local Government Act 1972 divided England into local authority areas called counties and districts. The areas of the former urban district councils became part of the new district council areas.

WALES

Consultant Episodes

Ian Lucas: To ask the Secretary of State for Wales how many finished consultant episodes there were in the NHS in Wales in each year since 1999, broken down by the local authority in which the patient resided. [184889]

Mr. Touhig: The information is in the following table:

Finished consultant episodes (inpatients and daycases)[1]

Unitary authority	*1999–2000*	*2000–01*	*2001–02*	*2002–03*	*2003–04*
Isle of Anglesey	17,405	17,196	17,552	17,230	17,954
Gwynedd	30,645	30,577	30,123	29,172	30,083
Conwy	32,484	32,764	34,353	31,582	32,819

Finished consultant episodes (inpatients and daycases)[1]

Patient Episode Database for Wales

Hospital Waiting Lists

Mr. Wiggin: To ask the Secretary of State for Wales what recent discussions he has had with his colleagues in the Welsh Assembly on hospital waiting lists in Wales. [184033]

Mr. Touhig: I regularly meet the National Assembly Health Minister to discuss matters of health and social care in Wales: our most recent meeting was on 16 June.

The Assembly announced on 30 June that the 2nd Offer Scheme is to be extended to reduce the maximum waiting time for inpatient and day-case surgery in Wales to 12 months. This will mean that by 31 March 2005, there will be no one in Wales waiting over 12 months for surgery who has not been offered the opportunity of having their treatment.

Milford Haven

Lembit Öpik: To ask the Secretary of State for Wales (1) what assessment he has made of the availability of equipment and personnel from the emergency services in the event of a major disaster at the proposed liquefied natural gas handling facility at Milford Haven; and if he will make a statement; [179861]

(2) what provision he has made for the development of an emergency disaster plan for the proposed liquefied natural gas handling facility at Milford Haven; and if he will make a statement. [179862]

Mr. Jamieson: I have been asked to reply.

If the proposed liquefied natural gas handling facility goes ahead at Milford Haven, the development of an emergency disaster plan will be required.

My Department will be involved in assessing the Emergency Disaster Plan once it has been agreed by the relevant parties, and it will need to be included in the site's Port Facility Security Plan, as stipulated by the International Maritime Organisation's International Ship and Port Security Code.

NHS Performance Criteria

Mr. Wiggin: To ask the Secretary of State for Wales on what main criteria he judges the performance of the NHS in Wales. [183392]

Mr. Touhig: The performance of NHS Wales is evaluated as part of the Performance Improvement Framework for NHS Wales.

The "balanced scorecard" is a key component of the framework, giving all perspectives of performance equal weighting. Unlike previous systems which focused on finance and operations, this approach also includes assessment of how the NHS continuously improves and how effectively the needs of all stakeholders are met. Scorecards are produced on a quarterly basis and inform organisational performance reviews.

In addition, key annual targets for NHS Wales are monitored on a monthly basis and where performance causes concern action is taken by regional offices.

HOME DEPARTMENT

"Reducing Crime—Changing Lives"

Mr. Llwyd: To ask the Secretary of State for the Home Department what responses he has received to "Reducing Crime—Changing Lives"; and how many supported the principal proposals. [182309]

Paul Goggins: We have received a total 264 responses to the initial consultation on the National Offender Management Service.

52 of these responses requested specific information or further copies of the consultation document. Of the responses that provided an opinion, over half offered general support for the new service.

Airguns

Mr. Hoban: To ask the Secretary of State for the Home Department (1) what estimate he has made of

the number of airguns which should have been licensed by 30 April but for which no application has been received; [179584]

(2) what discretion is available to the police to grant a licence to an individual who possessed an airgun prior to 30 April and subsequently makes an application; and in what circumstances that discretion may be exercised; [179585]

(3) how many late applications the police have received for air gun licences; and in how many cases *(a)* a licence has been granted and *(b)* the gun has been confiscated by the police and destroyed. [179586]

Caroline Flint *[holding answer 21 June 2004]*: We estimate that between 50,000 and 70,000 self-contained gas cartridge guns have been sold in the UK. Not all will still be in circulation but because they were not previously subject to control it is not possible to say how many might have been destroyed or otherwise disposed of before the new laws came into effect. I understand from the Association of Chief Police Officers that as at 30 April a total 5,791 guns had been entered on certificate and a further 1,524 had been surrendered for destruction. Separate information on the number of late applications is not available. It is for the police to determine in individual cases whether the circumstances warrant acceptance of a late application. Owners have already had over three months in which to either surrender their guns or apply for a certificate. Those who have failed to do so are committing an offence although the Association of Chief Police Officers have advised that where somebody voluntarily comes forward to surrender a gun which they have only just learned has been banned, it will often be sufficient to seize the gun and not to prosecute.

Amyl Nitrate

Mr. Edwards: To ask the Secretary of State for the Home Department what measures he proposes to take to tackle solvent abuse through the use of poppers containing amyl nitrate, with particular reference to the products *(a)* Liquid Gold, *(b)* Pure Gold and *(c)* TNT. [178804]

Caroline Flint: None. The alkyl nitrites (poppers) are not controlled under the misuse of drugs legislation. The Advisory Council on the Misuse of Drugs has considered whether they should be controlled and concluded that they did not give rise to a social problem justifying their control under the Misuse of Drugs Act 1971. The substances Liquid Gold, Pure Gold and TNT are all brands of poppers. They are not solvents but are controlled under the Medicines Act 1968.

Animal Research

Mr. Djanogly: To ask the Secretary of State for the Home Department pursuant to his answer of 14 May 2004, *Official Report*, column 603W, on animal research, what discussions Ministers have had since 1999 to ensure that businesses and individuals can carry on working without interference from animal rights protesters; and on what dates these discussions took place. [185072]

Caroline Flint *[holding answer 19 July 2004]*: Under exemption 2 of the Code of Practice on Access to Government Information it is Government policy that information relating to internal meetings is not disclosed.

Anti-drugs Co-ordinator

David Davis: To ask the Secretary of State for the Home Department what *(a)* the cost of recruitment and *(b)* the total cumulative salary bill of the UK Anti-drugs Coordinator is. [184455]

Caroline Flint *[holding answer 16 July 2004]*: Following the general election in 2001, the Home Secretary took over lead responsibility for driving forward delivery of the UK Drug Strategy.

Within the Home Office, the Home Secretary is supported in this role at official level by the Drug Strategy Directorate, led by Vic Hogg.

Asylum Seekers

Annabelle Ewing: To ask the Secretary of State for the Home Department what conditions have been placed within his Department's contract with Reliance Monitoring Service to provide a system for tagging persons seeking asylum in relation to *(a)* the monitoring of families and *(b)* the monitoring of people under the age of 18 years. [183921]

Mr. Browne: Clause 36 of the Asylum and Immigration (Treatment of Claimants etc) Bill provides the legislative authority for electronic monitoring within the immigration context. Tagging is likely to be appropriate for those who would otherwise have been detained and will, therefore, be used as an alternative to detention.

A number of factors are taken into consideration when assessing the risk of a family absconding. These may result in one or both of the parents being subject to electronic monitoring.

Electronic Monitoring for immigration purposes will only be available to those who are 18 years of age and over.

Botox Toxicity

Mr. Hancock: To ask the Secretary of State for the Home Department what recent research he has *(a)* commissioned and *(b)* evaluated on the (i) accuracy and (ii) reproducibility of in vitro tests for botox toxicity; and if he will make a statement. [181806]

Caroline Flint: The Home Office has not commissioned research of the kind described, but it has provided funds for three projects aimed at trying to develop and evaluate alternatives to using animals in this type of testing. Further details are in the Reports of the Animal Procedures Committee for the years 1996, 1997, and 2002, copies of which are available in the House Library. In addition the Animals (Scientific Procedures) Inspectorate considers and advises on progress made in this field.

Botulinium

Mr. Hancock: To ask the Secretary of State for the Home Department how many licences were issued for the animal testing of botulinium toxin in each year since 1997; how many animals were involved, broken down by *(a)* breed and *(b)* type; and how much toxin was involved in each case. [181809]

Caroline Flint: A survey of currently held data indicates that 10 project licences have been granted since 1997 under the Animals (Scientific Procedures) Act 1986, authorising the use of animals in research and testing involving botulinum toxin. The figures are:

	Number of project licences issued
1997	1
1998	1
1999	1
2000–01	0
2002	4
2003	2
2004 (To date)	1

The licensed work has covered safety testing of the toxin for clinical use, research and development as regards possible new clinical applications, research into alternative methods of testing, and forensic food safety checks. None has been connected with publicised use of the substance for non-medical cosmetic purposes.

The animals used for clinical purpose safety testing in 2002 are a subset of those reported at column 1 of table 15 in the publication entitled Statistics of Scientific Procedures on Living Animals in Great Britain 2002 (Command 5886, available in the House Library). This relates to all protected animals used in safety testing of pharmaceuticals—those used for testing botulinum toxin are not identified separately. Although all the testing is undertaken using rodent species, the precise details of the numbers, breed and type are not collated centrally. This is also the case as regards earlier years.

The amount of toxin used varies between testing programmes and studies, but licence authorities mandate only the use of the minimum intended to achieve the scientific objective.

Bribery/Corruption

Malcolm Bruce: To ask the Secretary of State for the Home Department what procedures the National Criminal Intelligence Service employs to grade allegations of overseas bribery held on the national register; and how many allegations in each grade are held on the NCIS register. [174032]

Caroline Flint: Upon receipt of all allegations, research is made and, if appropriate, sent to the relevant investigation authority.

Allegations are not graded as all are of a serious nature and should there be a prima facie case, which falls within this legislation, further investigation will always be made.

Cannabis

Mr. Paice: To ask the Secretary of State for the Home Department what studies his Department has *(a)* commissioned and *(b)* received regarding the use of cannabis since its reclassification took place; and if he will place a copy of these studies in the Library. [184868]

Caroline Flint *[holding answer 16 July 2004]*: The British Crime Survey provides annual updates on drug use. The Home Office is working closely with police forces to monitor the policing of drug offences since cannabis was reclassified and early figures are encouraging. As more robust data become available, a more thorough assessment of the impact of reclassification will be undertaken.

Careless Driving

Ian Lucas: To ask the Secretary of State for the Home Department if he will make it his policy to introduce an offence of causing death by careless driving. [184915]

Caroline Flint *[holding answer 20 July 2004]*: The Government are reviewing the existing framework of the criminal law concerning bad driving, particularly where death or injury results, in order to ensure that appropriate offences and penalties are put in place. Any comprehensive review of this area of the law must examine the adequacy of the law relating to fatalities that occur as a result of careless driving. We will publish a consultation paper detailing our proposals as soon as possible.

Carter Report

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what the terms of reference were for the Carter report. [182318]

Paul Goggins: As set out in the report, "Managing Offenders—Reducing Crime", the terms of reference for the Correctional Services Review were to establish a credible and effective system for the correctional services that focused on reducing crime and maintaining public confidence, whilst remaining affordable.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department which of the recommendations from the Carter Report have been implemented. [182320]

Paul Goggins: The Carter Report 'Managing Offenders—Reducing Crime' a copy of which was placed in the Library on 6 January 2004 was welcomed by Ministers at the time of its publication. The Government response was published on the same date. Much work has been done since to take forward the recommendations made, particularly those involving the development of a single National Offender Management Service.

Mr. Oaten: To ask the Secretary of State for the Home Department if he will list the external consultants who contributed to Patrick Carter's review of the correctional services; and how much they were paid in each case. [182095]

Paul Goggins: External consultants were engaged by the Cabinet Office at a cost of £33,378 to carry out a high level review of the non-operating costs incurred by the correctional services.

Child Trafficking

Ms Keeble: To ask the Secretary of State for the Home Department how many unaccompanied minors entered the UK in each of the last five years for which figures are available, broken down by country of origin. [182844]

Mr. Browne: The requested information on the number of unaccompanied children entering the UK in each year is not available.

The available information on applications for asylum from unaccompanied children is given in the table.

Information on asylum applications from unaccompanied minors is published in quarterly web pages and in the annual statistical bulletin 'Asylum Statistics United Kingdom'. Copies of these publications and others relating to general immigration to the UK are available from the Library of the House and from the Home Office Research Development and Statistics Directorate website at http://www.homeoffice.gov.uk/rds/immigration1.html.

Unaccompanied[1,2,3] children, aged 17 or under, applying for asylum in the United Kingdom, by nationality, 1999 to 2003

[5] Not comparable with manual counts data prior to 2002.
[6] Provisional figures.

Civil Service Recruitment

Mr. Jim Cunningham: To ask the Secretary of State for the Home Department what the effects of cuts in civil servants will be on his Department. [185812]

Fiona Mactaggart: As my right hon. Friend the Chancellor of the Exchequer, announced on 14 July, the size of the Home Office will be reduced by 2,700 people.

Community Sentences

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department how he intends to improve the information received by magistrates regarding prison alternatives. [182286]

Paul Goggins: The National Probation Service has put in place a number of measures to improve the information provided to magistrates on prison alternatives. These include the provision of: a sentencer communications strategy and a sentencer liaison officer in all areas; national and local information about the work of the service; leaflets about the content of successful schemes and programmes attached to pre-sentence reports; and videos on the content of community interventions and the 'what works' initiative.

As the new National Offender Management Service is taken forward we intend to strengthen the liaison arrangements between sentencers and the prison and probation services.

The new Sentencing Guidelines Council will also have a role in providing information to sentencers, for example about sentencing patterns, which will inform discussions at a local level. The council will have key role in re-balancing the system to make better use of resources. In framing sentencing guidelines, the council must, among other things, take account of the cost of different sentences and their relative effectiveness in preventing re-offending. One of its earliest priorities is to produce a guideline on the new generic community sentence.

Computer Misuse

Mr. Webb: To ask the Secretary of State for the Home Department how many cases of computer misuse there were in his Department in *(a)* 1997 and *(b)* 2003, broken down by category of misuse; and how many of those cases resulted in disciplinary action. [163249]

Fiona Mactaggart: The figures, so far as information is available in the form requested, are as follows:

Cases of computer misuse

Area	*1997*	*2003*
Core Home Office, including IND		
Sending inappropriate email	[1]—	18
Accessing inappropriate sites	[1]—	4
Prison Service Agency		
Sending inappropriate email	[1]—	2
Accessing inappropriate sites	[1]—	[1]—
UK Passport Agency		
Sending inappropriate emails	[1]—	15
Accessing inappropriate sites	[1]—	[1]—
Forensic Science Service		
Sending inappropriate emails	[1]—	1
Accessing inappropriate sites	[1]—	[1]—

[1] Indicates that no comprehensive figures available.

Constitutional Treaty

Mr. Wiggin: To ask the Secretary of State for the Home Department what research his Department has commissioned on the possible *(a)* impact and *(b)* cost that may follow from the adoption of the proposed European Union constitution, in relation to criminal matters. [184015]

Caroline Flint: The Government carried out detailed examination of all proposals in the field of criminal justice with regard to their potential impact, prior to agreement on the Constitutional Treaty. The Government have not commissioned separate research in this area following agreement on the text of the Constitutional Treaty.

Contracted Prisons

Mr. Oaten: To ask the Secretary of State for the Home Department whether the Prison Service annual report for 2003–04 will contain statistical data on the performance of contracted prisons against key performance indicators; and if he will make a statement. [181518]

Paul Goggins: The Prison Service is no longer responsible for the performance of contracted prisons and so the Service's Annual Report does not contain data on the performance of these prisons. The aggregate performance of all prisons in England and Wales, and details of the performance of contracted prison estate are set out in the written ministerial statement I made on 15 July. Details of the performance of individual establishments will be published at a later date.

Conviction Data Systems

Ms Shipley: To ask the Secretary of State for the Home Department what steps he plans to take to develop IT systems that can share conviction and non-conviction data across police forces in England and Wales, Scotland and Northern Ireland. [183266]

Paul Goggins: As part of current arrangements Scottish conviction records are uploaded automatically to the Police National Computer (PNC) in England and Wales through the Scottish Criminal Records Office. The Police Service in Northern Ireland has PNC, which provides them with 24-hour access to the service.

As part of the important work for implementing the recommendations of the Bichard Inquiry we will look to resolve the issue of sharing Intelligence non-conviction data between the 43 forces in England and Wales as well as with Scotland and Northern Ireland.

Correspondence

Mrs. Ellman: To ask the Secretary of State for the Home Department when he will reply to the letter of 5 July from the hon. Member for Liverpool, Riverside relating to entry to the UK of Dr. Yusuf Ali Qaradawi; and what investigations were conducted in advance of his entry to the UK. [184544]

Fiona Mactaggart *[holding answer 16 July 2004]:* I wrote to my hon. Friend on 21 July 2004.

My hon. Friend also asks what investigations were conducted in advance of Dr. Qaradawi's entry to the United Kingdom: I am withholding that information under exemption 5 of the Code of Practice on Access to Government Information.

It is not our practice to disclose details of individual entry clearance cases in a public forum.

Mr. Andrew Turner: To ask the Secretary of State for the Home Department when he will reply to the letter from the hon. Member for the Isle of Wight dated 25 May concerning the National Offender Management Service. [181804]

Paul Goggins *[holding answer 1 July 2004]:* I replied to the hon. Member on 7 July 2004.

Sir Michael Spicer: To ask the Secretary of State for the Home Department when the hon. Member for West Worcestershire will receive a response to his letter of 15 April (Ref: M480/4). [182930]

Mr. Browne *[holding answer 8 July 2004]:* I wrote to the hon. Member on 22 July 2004.

Crime Solving

Mr. Hoyle: To ask the Secretary of State for the Home Department how many crimes in *(a)* Merseyside, *(b)* Lancashire, *(c)* Cheshire, *(d)* Cumbria and *(e)* Greater Manchester have involved (i) the Forensic Science Service and (ii) a private company in their solution in each of the last 12 months. [181674]

Caroline Flint: From the data recorded by these police forces it is not possible to identify how many crimes involved use of forensic science in their solution. The best indicator of the relative use of (i) the Forensic Science Service (FSS) and (ii) private sector forensic science providers is the number of submissions made by the five named forces to each of these within the last 12 months.

(a) For Merseyside police forensic submissions during the year 1 April 2003 to 31 March 2004 were as follows:

	Forensic provider	
	(i) FSS	*(ii) Private companies*
April	69	344
May	65	418
June	96	377
July	93	367
August	73	376
September	100	391
October	96	311
November	77	318
December	64	252
January	77	311
February	73	268
March	60	289

Differences in the level of detail to which data on submissions for forensic analysis is recorded by police forces prevents similar presentation of figures for the remaining forces. The data recorded by these forces indicate:

(b) For Lancashire Constabulary forensic submissions during the year 1 April 2003 to 31 March 2004 were as follows:

	Number
April	419
May	342
June	398
July	389
August	389
September	355
October	355
November	359
December	372
January	421
February	371
March	432

Lancashire Constabulary was unable to report how many of these submissions were made to(i) the Forensic Science Service (FSS) and (ii) private sector forensic science providers.

(c) For Cheshire Constabulary forensic submissions during the year 1 April 2003 to 31 March 2004 were as follows:

(i) FSS: 525

(ii) Private companies: 609.

Cheshire Constabulary was unable to provide a monthly breakdown of these figures.

(d) For Cumbria Constabulary the number of submission for DNA analysis reflects is related to the level of volume crime, the predominant category of crime in Cumbria. These submissions were all made to the FSS:

	Number
April	26
May	28
June	37
July	20
August	18
September	41
October	30
November	11
December	17
January	18
February	23
March	32

(e) For Greater Manchester Police forensic submissions during the year 1 April 2003 to 31 March 2004 were as follows:

(i) FSS: 8,392

(ii) Private companies: 135.

GMP was unable to provide a monthly breakdown of these figures.

Criminal Cases Review Commission

Mr. Wood: To ask the Secretary of State for the Home Department how many cases have been considered by the Criminal Cases Review Commission since its inception; and how many are awaiting determination. [184798]

Paul Goggins: At 31 May 2004 the Criminal Cases Review Commission had received 6,798 applications of which 638 had yet to be determined. Further detail is available on the Commission's website at www.ccrc.gov.uk.

CS Gas

Mr. Wood: To ask the Secretary of State for the Home Department if he will make a statement on the use of CS gas spray by police forces in England and Wales. [184797]

Caroline Flint: CS incapacitant spray has been available to police forces in England and Wales since 1996. Currently out of 43 police forces, 40 are using CS incapacitant spray as an item of self-defence equipment.

Departmental Accounting Practice

Mr. Bacon: To ask the Secretary of State for the Home Department who the Finance Director of the *(a)* Department, *(b)* Probation Service, *(c)* Charity Commission and *(d)* Assets Recovery Agency is; what accountancy qualifications each Director holds; and on how many occasions there has been a qualified opinion on (i) the resource accounts and (ii) other accounts of each in the last five years. [183423]

Fiona Mactaggart: The information requested, is shown in the table.

	Finance Director	Accountancy qualifications held
(a) Home Office	William Nye	—
(b) Probation Service	Ray McBurney	Fellow of the Chartered Institute of Management Accountants
(c) Charity Commission	Nick Allaway	Member of the Chartered Institute of Management Accountants
(d) Assets Recovery Agency	Ivor Jamison	Member of the Chartered Institute of Public Finance and Accounting

In respect of Departmental Accounts, the audit opinion has been given on the accounts for the periods requested. Of the Departments requested the Probation Service is a part of the Home Office while the Asset Recovery Agency and the Charities Commission are non-Ministerial Departments. The Asset Recovery Agency has only recently been created and no accounts are yet available. Audit opinion for the Department and for the Charities Commission are given in the Table:

Financial year	National Audit Office opinion: The Home Office	National Audit Office opinion: The Charities Commission
1999–2000	Disclaimed	Unqualified
2000–01	Qualified	Unqualified
2001–02	Qualified	Qualified
2002–03	Unqualified as true and fair, but qualified arising from an expenditure in excess of amounts authorised for Request for Resource 2	Unqualified
2003–04	Resource Accounts not yet audited—an opinion will not be available until later in the year	Unqualified

Departmental Buildings

Mr. Oaten: To ask the Secretary of State for the Home Department what the total floor space area of buildings owned or leased by *(a)* his Department and *(b)* his agencies has been in each year since 1997. [182220]

Fiona Mactaggart: The non-agency part of the Home Office currently occupies 274,693 sq m of freehold space and 498,664 sq m of rented space. The Department's Executive Agencies occupy 4,188,012 sq m of freehold space and 69,256 sq m of rented space. Together these comprise offices, prisons and other specialised accommodation.

The figures exclude residential properties, premises that are not rented but taken under service agreements and those where costs are shared with other Government Departments who pay the rent.

Departmental Expenditure

David Davis: To ask the Secretary of State for the Home Department what the cost was of satellite and cable subscriptions in his Department's buildings in the last year for which figures are available; and if he will list the premium channels that his Department subscribes to. [185277]

Fiona Mactaggart *[holding answer 20 July 2004]*: Figures for all the Department's buildings are not held centrally. The subscription for cable for the Home Office HQ for 2004–05 will be £20,609.67 plus VAT. No premium channels are subscribed to. This is to ensure access to full range of news and current affairs channels.

David Davis: To ask the Secretary of State for the Home Department what the cost was of running the canteen facilities of his Department in *(a)* 1996–97 and *(b)* the latest year for which figures are available. [184457]

Fiona Mactaggart *[holding answer 16 July 2004]*: Information on the level of the subsidy for canteen facilities in the Department's main central London buildings in 1996–97 is not available. The subsidy paid in 2002–03 was £180,000.

Departmental Mobile Phones

David Davis: To ask the Secretary of State for the Home Department how many mobile phones owned by his Department were reported lost or stolen since 2001. [185268]

Fiona Mactaggart: Only one item is showing on the Losses Register since 2001.

Departmental Refurbishment

David Davis: To ask the Secretary of State for the Home Department what the cost has been of refurbishments to the fabric of buildings owned by his Department since May 1997. [184454]

Fiona Mactaggart *[holding answer 16 July 2004]*: I refer the right hon. Member to the answer given to the hon. Member for Meirionnydd Nant Conwy (Mr. Llwyd) on 24 May 2004, *Official Report*, column 1409W.

Direct Communications Unit

Matthew Taylor: To ask the Secretary of State for the Home Department what work is undertaken by the Direct Communications Unit at his Department; and if he will make a statement. [183163]

Fiona Mactaggart: The Direct Communications Unit consists of two sections—a Customer Communications Service and a Resource and Planning Section.

The Customer Communications Service consists of 72 staff and is responsible for a wide range of work in the area of customer communications. They provide:

A Front of House (reception) service at the Home Office's HQ building;

A public inquiry telephone service

Management and co-ordination of the production of replies to ministerial correspondence across the Home Office group, excluding agencies

Management and co-ordination of the production of replies to public correspondence, including emails, across the Home Office group, excluding agencies, HMPS and the Immigration and Nationality Department

Management of responses to requests for publications

Support for the Home Office's internal Directory of Business

Internal communications relating to correspondence performance and management

User support for, and management of the ongoing development of, the Correspondence Tracking System introduced last year

Support, management and development of the Correspondence Tracking System's Management Information System, and production of performance and management data.

The Resource and Planning Section consists of 16 staff, and provides a full range of business support services for the Communication Directorate, of which Direct Communications Unit is one part. The services provided include finance and budget management, procurement, business planning, risk management, accommodation support, business continuity planning, and human resources management.

Matthew Taylor: To ask the Secretary of State for the Home Department what work is undertaken by the Public Contact Section of the Direct Communications Unit in his Department, broken down by policy areas covered; and how many *(a)* letters and *(b)* phone calls it has received each year since its creation, broken down by policy area. [183168]

Fiona Mactaggart: The Direct Communications Unit (DCU) was created on 1 September 2001.

The Public Contact Teams undertake the following work for all areas of the Home Office Group excluding Agencies:

Answering telephone calls from the public (other than on matters relating to HM Prison Service and Immigration and Nationality Department)

Front of House (Reception) Service at the Home Office headquarters building

The Correspondence Teams undertake the following work for all areas of the Home Office Group excluding Agencies:

Co-ordinating the provision of replies to correspondence from Members (and members of the House of Lords) addressed to Ministers

MP's hotline (for inquiries about correspondence from Members to Ministers)

Co-ordinating the provision of replies to correspondence from members of the public (not Her Majesty's Prison Service (HMPS) or the Immigration and Nationality Directorate (IND)

(a) The volume of letters received is given in the tables.

Volume of Ministerial letters[1] handled by DCU

	Number
1 September to 31 December 2001	5,619
1 January to 31 December 2002	27,320
1 January to 31 December 2003	21,735
1 January to 31 May 2004	9,508

[1] Excludes agencies other than HMPS

Volume of letters[1] from the public handled by DCU

	Number
1 September to 31 December 2001	12,695
1 January to 31 December 2002	43,886
1 January to 31 December 2003	22,074
1 January to 30 April 2004	5,846

[1] Excludes correspondence on IND and HMPS matters and since 1 July 2003 campaign correspondence i.e. that where 50 or more identical items are received.

The computerised Correspondence Tracking System was introduced for Ministerial Correspondence on 1 April 2003. A breakdown by policy area is available only from that date and is shown in the table.

Ministerial correspondence handled by DCU, broken down by policy area

Policy area	*1 April to 31 December 2003*	*1 January to 31 May 2004*
IND	9007	5301
HMPS	661	426
Correctional Services	362	327
Human Resources	0	4
Crime Reduction and Community Safety Group	2,423	1,422
Community Policy	937	553
Criminal Justice Group	810	447
Reply drafted by DCU—no policy unit identified	1,465	1,028

Letters from members of the public (other than campaigns, HMPS and IND) were included on the Correspondence Tracking System from 1 July 2003. A breakdown by policy area is available only from that date and is shown in the following table.

Correspondence from members of the public handled by DCU, broken down by policy area

Policy area	*1 July to 31 December 2003*	*1 January to 30 April 2004*
Correctional Services	317	738
Crime Reduction and Community Safety Group	2,820	2,570
Community Policy	1,024	618
Criminal Justice Group	319	264
Reply drafted by DCU—no policy unit identified	3,207	1,656

The figures in the table do not include approximately 70,000 emails p.a. which are also handled by DCU. The handling of emails has only recently been transferred onto the Correspondence Tracking System, and data on distribution across policy areas are not yet available.

(b) The volume of telephone calls received from the public is given in the table. No breakdown by policy area is available.

	Number
1 September to 31 October 2001[1]	9,914
1 January to 31 December 2002	70,320
1 January to 31 December 2003	70,352
1 January to 30 June 2004	33,416

[1] Data for November and December 2001 is not held

Driving Disqualification/Offences

Mr. Chope: To ask the Secretary of State for the Home Department how many people were disqualified from driving in England and Wales in *(a)* 2002 and *(b)* 2003 under section 35 of the Road Traffic Offenders Act 1988. [184767]

Caroline Flint *[holding answer 16 July 2004]*: The number of people disqualified at all courts in England and Wales as a result of 'totting up' of points on their driving licence under s.35 of the Road Traffic offenders Act 1988 is 30, 498 for the year 2002.

Data for 2003 will not be available until the autumn.

Michael Fabricant: To ask the Secretary of State for the Home Department how many *(a)* prosecutions were brought against and *(b)* cautions were given to drivers on motorways in the last 24 months for (i) speeding and (ii) non-speeding offences. [184956]

Caroline Flint: Information collected centrally on prosecutions for speeding and other road traffic offences does not distinguish the type of road on which the offence took place.

The available information for the year 2002 showing the total number of fixed penalties, written warnings issued and court proceedings in England and Wales for Motorway offences (other than speeding) under the Road Traffic Regulations Act 1984 s. 17(4) and Motorways Traffic (England and Wales) Regulations 1982 Regs. 5–12 and 14 are given in the table.

Data for 2003 will not be available until the autumn.

Motorway offences[1] (other than speeding) by type of police action, England and Wales, 2002

Type of action	*Number of offences*
Total Court proceedings	2,947
Fixed penalty notices issued	5, 292
Written warnings issued	354
Total	8,593

[1] Offences under s. 17(4) of the Road Traffic Regulation Act 1984 and Motorways Traffic (England and Wales) Regulations 1982.

Drug/Alcohol Treatment

Mr. Battle: To ask the Secretary of State for the Home Department what funding is available for drug addiction treatment of prisoners and ex-prisoners over the next five years *(a)* in Leeds and *(b)* in total. [181974]

Paul Goggins: It is not possible to differentiate between funding provided to treat ex-prisoners and others who access treatment in the community.

Table 1 shows the amount of funding available for all forms of drug treatment for prisons in the Leeds area. Funding is allocated on an annual basis, and therefore the figures for prisons in the Leeds area are provided only for 2004–05.

Table 1: Drug treatment funding in prisons in the Leeds area, 2004–05

Prison	*Funding (£)*
Leeds	1,200,000
Wealstun	332,000
Wetherby	118,000

Table 2 shows the total funding for drug treatment in adult prisons and juvenile establishments until March 2006, which is the latest date for which funding decisions have been taken.

Table 2: Total drug treatment in adult prisons and juvenile establishments until March 2006[1]

£

	2004–05	*2005–06*
Prison Service[2]	44,900,000	52,400,000
Department of Health	3,900,000	3,900,000
Youth Justice Board[3]	10,000,000	10,000,000
Total	58,800,000	66,300,000

[1] These are ring-fenced funds, made available from spending reviews since 1997–98.

[2] This figure includes £5,000,000 from the Home Office for the CJIP initiative.

[3] The YJB funding shown includes funding for secure training centres and local authority secure children's homes. The allocation for Juvenile Prisons are as follows:

2004–05: £2,500,000

2005–06: £3,200,000

Note:

All funding is projected and therefore still subject to negotiation. The remaining four years will be determined by further allocations made from SR2004.

Mr. Drew: To ask the Secretary of State for the Home Department if he will take steps to ensure that sufficient funds are made available for treatment programmes for all young people convicted of drug and alcohol offences. [184203]

Caroline Flint: Early identification of substance misuse problems and the provision of appropriate early intervention and treatment for young offenders is a key element of the young people's strand of the National Drug Strategy.

The Young People's Substance Misuse Grant brings together a number of funding streams which total £59 million for the development of young people's substance misuse services, alongside mainstream resources by Drug Action Teams.

Over £18 million of the Young People's Partnership Grant is currently invested in the provision of specialist young people's drug treatment services.

£30 million has been made available over three years for the development of an Integrated Substance Misuse Programme for the Secure Estate—Young Offenders Institutes, Secure Training Centres and Local Authority Secure Children's Homes.

As part of this programme of work Youth Offending Teams screen all young offenders and provide early intervention and/or onward referral to specialist young people's drug treatment services.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department whether drug testing on charge is in place in Crosby. [177936]

Caroline Flint: Drug testing of persons in police detention (after charge) is not currently available in Crosby.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what plans he has to require prisons to record the proportion of prisoners who complete drug treatment following detoxification. [182230]

Paul Goggins: There are currently no plans to require prisons to record the proportion of prisoners who complete drug treatment following detoxification.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department if he will make a statement on the effectiveness of drug treatment programmes within prisons. [182300]

Paul Goggins: Due to the need to wait two years for reconviction results, only a limited research base is so far available on the effectiveness of prison-based drug rehabilitation programmes in reducing re-offending.

Emerging research into the RAPt[1] programme is showing encouraging results, with 40 per cent. of graduates, rather than an expected 51 per cent., re-offending within two years. However, such results can only be achieved where effective through-care arrangements are made and timely after-care services are available in the community.

[1] RAPt—Rehabilitation of Addicted Prisoners Trust.

Mrs. Curtis-Thomas: To ask the Secretary of State for the Home Department what percentage of people receiving drug treatment while in prison were offered aftercare on their release in each year since 1997. [182301]

Paul Goggins: Data are not collected centrally on those people that receive drug treatment in prison and who are subsequently offered aftercare on release.

Drugs

Mr. Wiggin: To ask the Secretary of State for the Home Department if he will make it his policy to ensure that recreational drugs remain illegal; and if he will encourage police to prosecute criminals who supply such drugs. [184021]

Caroline Flint: The Government have no intention of legalising any currently controlled drug. The Government takes the supply and possession of illegal drugs very seriously. We work closely with the police to focus more effectively to disrupt the drug supply chain at all levels and prosecute offenders. The Drugs Strategy makes clear our priority is to tackle Class A drug supply offences. The Strategy is supported by the police as we all recognise that Class A drugs do most harm to individuals and to communities.

Electronic Tagging

Bob Spink: To ask the Secretary of State for the Home Department how many criminals were released in Essex with electronic tags in each year since tagging was introduced. [183601]

Paul Goggins: The area in which electronically tagged prisoners reside upon release is not recorded centrally.

The number of prisoners released on the Home Detention Curfew Scheme (HOC) from HMP Bullwood Hall and HMP Chelmsford in each year since the scheme began, and to 31 May 2004, is provided in the table.

Prisoners released on the HOC scheme from Essex prisons, by year of release

	Number
1999	121
2000	150
2001	142
2002	316
2003	278
2004	58

Employment Tribunals

Malcolm Bruce: To ask the Secretary of State for the Home Department how many cases against his Department, the agencies for which it is responsible and its predecessor organisations have been brought to employment tribunals in each year since 1997 in relation to *(a)* equal pay, *(b)* sex discrimination, *(c)* race discrimination, *(d)* disability discrimination and *(e)* unfair dismissal; how many cost awards were made against (i) respondents and (ii) applicants; and how much has been spent (A) settling and (B) contesting claims. [181476]

Fiona Mactaggart: The information requested is not available and could be collected only at disproportionate cost.

Energy Efficiency

David Davis: To ask the Secretary of State for the Home Department if he will make a statement on energy efficiency in his Department's buildings. [185286]

Fiona Mactaggart: The Home Office continues to improve the energy efficiency of its buildings. It is addressing the Government's target of increasing the energy efficiency on its estate in terms of kWh used per square metre of building floor area by 15 per cent. by 2010–11, relative to 1999–2000.

The Department actively improves the energy efficiency of its estate. A switch off campaign is currently in progress across the Central London and Croydon estates, which encourages staff to switch off lights and computer equipment when not in use. There is a contractual requirement to achieve energy consumption at least 10 per cent. below the targets in the Government's energy efficient best practice programme energy consumption guide at the Department's new headquarters building at 2 Marsham street. In September 2003, The Prison Service was re-accredited under the National Energy Foundation's scheme for energy efficiency.

Environmental Sustainability
